

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Standard Corporation Service

Each daily sheet of the Standard Daily Corporation News Service is numbered, and after it has been read should be filed in the spring binder labeled "Current File," which we provide for that purpose.

All items are indexed each week. This weekly index is cumulative, i. e., covers all items published since the first of each month.

At the end of the month the daily sheets are replaced by a pamphlet in which all items are arranged in alphabetical and chronological order.

This process of replacing all previous items by a new monthly pamphlet is continued for a period of four months, each new pamphlet accumulating all previous items to date, upon receipt of which, previous pamphlets and loose-leaf sheets may be thrown away.

For example: at the end of January we issued a pamphlet containing the January items in alphabetical and chronological order.

At the end of February we issued a pamphlet containing all January and February items combined, in alphabetical and chronological order.

At the end of March we issued a pamphlet containing all January, February and March items combined, in alphabetical and chronological order.

At the end of the four months period all items are republished for the last time in a cloth-bound volume, which is sent to you for your reference library. You should accordingly receive three of these permanent volumes in each twelve months.

How to Use the Standard Daily Corporation Service in Connection with Standard Daily Stock Card Service

While being a separate and distinct service within itself, the Standard Daily Corporation Service has been designed to supplement and amplify the Standard Daily Card Services.

By a system of cross reference, now further simplified, the Standard Daily (Stock) Card Service is automatically brought up to date each day through the Daily Corporation Service.

All items on a particular corporation published in the Daily Corporation Service are consecutively numbered each month. At the end of the "General Information" section of each white Bulletin Card will be found a paragraph similar to the following specimen:

Any later information on this company begins with the item No. — in the Standard Daily Corporation Service for the month of —, 1916.

If reference is made to an item in the current month, the Weekly Cumulative Index in the canvas binder holding the daily sheets of the Daily Corporation Service will indicate the page upon which that and all subsequent items may be found. If reference is made to a previous month, the item will be found in the bound volume for that month in its proper alphabetical and numerical order.

The Stock Card Records cover in great detail the status of all securities, listed or unlisted, that are actively dealt in. To add card records on inactive securities, which are infrequently referred to, would increase the bulk of the file and decrease its quick reference efficiency.

The Standard Corporation Service exactly meets the requirements of the situation, providing a separate, compact and daily revised file, containing a digest of practically all corporate news, earnings, dividends, etc., including those corporations which are covered in card form. It presents a daily

summary of all corporate events in alphabetical and chronological order.

The Stock Card Records segregate, classify and preserve the information on the more important securities, furnishing a quick and frequently revised survey of the financial and business status of a particular corporation.

Thus one service is virtually a daily complement of the other, forming an ideal combination for the attainment of the widest field of information at a minimum cost in time and money.

STANDARD CORPORATION SERVICE

JANUARY 1 TO APRIL 30, 1917

ABITIBI POWER & PAPER CO., LTD.

¹(1) Earnings in 1916 Show Increase.—Stated at Montreal, Que., Feb. 12, 1917, that although no official figures were given out for publication, the financial statement of this company for 1916, as submitted at the annual meeting, is understood to have shown earnings equivalent to better than 10% on the common stock, after allowing for a full year's pfd. dividend, but before depreciation and other writing-off. Dividends on the \$1,000,000 pfd. stock were started only toward the end of the year, with one quarterly payment of 1%.

After meeting interest charges the net profits for the year were approximately \$600,000. For depreciation, writing-off, etc., there was appropriated approximately \$365,000, and a balance of \$220,000 was carried forward. The total in profit and loss is about \$500,000.

The work in connection with installing the new paper machines, which will double the company's output of newsprint, is going forward, and the machines will probably be operating before the end of 1917.

The extensions are being financed partly out of the proceeds of notes recently sold, and partly out of earnings. The capital stock remains unchanged at \$5,000,000 common and \$1,000,000 pfd., and profits from the extensions will accrue largely to the benefit of the holders of these securities.

—Mar.

²(1) To Be Listed in Montreal.—It was stated March 19, 1917, that plans were being prepared for listing the securities of this company on the Montreal Stock Exchange.

It was stated progress is being made with the extension under way to the company's plant at Iroquois Falls, Ont. The first addition to be completed will be the extension of the sulphite mill, which will be ready in April to produce 150 tons of sulphite a day.

ACME AUTO SPECIALTY CO., INC.

²(1) Incorporated on Feb. 1, 1917, in New York, with a capital of \$300,000, to deal in autos, motorcycles and vehicles. Incorporators: H. R. Elias, E. Truckenbrodt and R. G. Mullens, 235 East 48th Street, New York.

ACME-GREAVES MACHINE TOOL CO., CINCINNATI.

⁴(1) Incorporated on April 4, 1917, in Ohio, with a capital of \$1,000,000. Incorporators: A. H. Atkins, B. B. Quillen, George Langen, A. J. Jones and Wm. A. Greaves.

ACME MANUFACTURING CO.

²(1) Merger.—See Andrews (O. B.) Co.—Item No. 1.

ACME PACKING CO.

¹(1) New Plant.—Announcement was made at Chicago Jan. 3, 1917, that this company had completed plans for a new plant. It has set aside \$100,000 of common stock which will be sold to employees at par, making the employees a part of the company.

The company has also inaugurated a sick and death benefit plan in which the employees who participate pay sums ranging from 5 to 15 cents a week and the company contributes 25% of the entire proceeds each week to the fund.

J. C. Nielsen, Pres., disposed of his holdings to C. E. Martin and announced that he would sever his connections with the company on Jan. 15. Mr. Martin, who is now active head of the business as well as Sec.-Treas., will succeed Mr. Nielsen as Pres.

ACME STEEL & MALLEABLE IRON

WORKS, INC.,
BUFFALO, N. Y.

²(1) Capital Increase.—On Feb. 10, 1917, the company filed notice at Albany, N. Y., of an increase in capital from \$100,000 to \$400,000.

ACME TEA CO.

¹(1) Directors Re-elected.—Announced Jan. 4, 1917, that at the annual meeting of this company retiring directors were re-elected.

¹(2) Sales, December, 1916.—On Jan. 11, 1917, this company reported sales for four weeks of December, 1916, amounting to \$1,700,753, as compared with \$1,248,786 for the same period of 1915.

¹(3) Sales, Six Months Ended Dec. 31.—It was stated Jan. 12, 1917, that the total sales of this company for December showed an increase of \$457,980, or 38.67% over December, 1915.

For the first six months of the fiscal year, including December, sales were \$9,487,521, compared with \$7,876,764 for the same months of 1915, an increase of \$1,620,757, or 20.6%.

¹(4) Merger Planned.—It was stated at Philadelphia Jan. 29, 1917, that a merger of five chains of retail stores, headed by this company, is being negotiated. The plan is to consolidate this company, the Childs Co., Robinson & Crawford, Bell & Co. and the Dunlop Co. It was stated that options had been taken and plans for the financing were being made, but that the merger would not be completed before the end of March, at least.

At the office of Chandler & Co. it was said that while the Acme Tea Co. was involved in the deal, it had not gone far enough to warrant any definite statement.

—Feb.

²(1) Stricken from List.—It was announced Feb. 6, 1917, that this company's temporary certificates for common and pfd. stock had been stricken from the list by the New York Stock Exchange.

²(2) Admitted to List.—Announced Feb. 6, 1917, that the New York Stock Exchange had admitted to the list this company's permanent engraved interchangeable certificates for 1st pfd. "A" and common stocks.

²(3) Sales, January, 1917.—Announced Feb. 8, 1917, that sales of the company in January were \$2,121,061, compared with \$1,662,100 in January, 1916, an increase of \$458,961, or 28.28%.

—Mar.

²(1) Sales, Four Weeks Ended March 3, 1917, were \$1,894,744, as compared with \$1,384,381 for the corresponding period of 1916, an increase of \$510,363, or about 36%.

For the eight months period to March 4, 1917, the sales were \$13,513,328, an increase over the same period in 1916 of \$2,590,081.

²(2) Amalgamation Completed.—Announced on March 29, 1917, that amalgamation of five chain grocery companies at Philadelphia, Pa., controlling 1,285 stores had been completed. Firms are the Acme Tea Co., Bell Co., Robinson & Crawford, Childs Grocery Co. and George M. Dunlap Co. New corporation will be known as the American Stores Co., with a capital of \$24,000,000. Samuel Robinson is to be president. Companies included in the merger did a business of \$40,000,000 in 1916.

—Apr.

⁴(1) Sales, Five Weeks Ended April, 7, 1917, totalled \$2,385,073, compared with \$1,761,643 for the corresponding period the previous year. This indicated an increase of \$623,429, or 35.39%.

ACQUILLA OIL & MINERAL CO.

⁴(1) Sale.—See Echo-Brea Oil Co.—Item No. 1.

⁴(2) New Company to Operate Property.—On April 9, 1917, the "San Francisco Chronicle" stated that the property of this company, comprising 1,000 acres in the upper end of Santa Paula Canyon, Ventura County, Cal., and formerly leased by the British Consolidated Co., is to be put under development again. A new corporation, called the Echo-Brea Oil Co., has been organized to take over the property, on which a well was drilled to a depth of 600 feet before the British Consolidated Co. abandoned the tract. The new company has obtained permission to raise funds for development work by the sale of stock to the public.

J. A. Brower, of the Vernon Oil refinery, and A. C. Labrie are associated with the Slocum Brothers, the Sands Brothers and others as organizers of the Echo-Brea Co.

ACUSHNET MILL.

²(1) Capital Increase—Stock Dividend.—It was announced March 12, 1917, that stockholders of this company had voted an increase in capital stock from \$1,000,000 to \$1,500,000 by a stock dividend of 50%, as recommended by the directors.

—Apr.

⁴(1) Stock Dividend.—Announced April 12, 1917, that this company had declared a 50% stock dividend from surplus, payable to stockholders of record March 12. This increases the capital from \$1,000,000 to \$1,500,000.

ADAMS-BAGNALL ELECTRIC CO., CLEVELAND, O.

²(1) Capital Decreased.—It was announced March 10, 1917, that this company had decreased its capital stock from \$800,000 to \$300,000.

ADAMS EXPRESS CO.

²(2) Contracts in New England.—It was stated March 2, 1917, that this company would continue to operate in New England. With the nearby opening of the New York Connecting Ry., the facilities for business between this territory and the South will be further strengthened.

This company has just made a new contract with the New Haven and affiliated lines. It will date from Nov. 1, 1916. It is for five years, and will con-

JANUARY 1 TO APRIL 30, 1917

tinue thereafter unless one year's notice of discontinuance is given by either party.

The New Haven's former 15-year contract with Adams Co. expired in December, 1915, but its arrangements were temporarily continued pending the negotiation of a new pact. The new contract grants a substantial increase over the old allowance of 45%.

In the year ended Dec. 31 the New Haven's income from the express business over its rails was \$4,237,000.

The new contract applies to the Central New England and the New York, Ontario & Western, as well as to the New Haven, and, it is understood, will be accepted also by the New York, Ontario & Western.

ADAMS & MCKEE LAND CO.

*(1) Incorporated in April, 1917, in California, with a capital of \$250,000. Directors: H. B. Adams, S. M. McKee and C. B. Adams.

● ADIRONDACK ELECTRIC POWER CORP.

*(1) Acquisition Plans.—On Feb. 3, 1917, it was stated that plans for absorption by this company of neighboring properties had been perfected.

It is planned that the Adirondack shall buy Schenectady Illuminating Co., Mohawk Gas Co., Schenectady Power Co., East Creek Electric Light & Power Co. and Edison Electric Light & Power Co. of Amsterdam. These companies, most of which have been affiliated with General Electric, include developed water powers of 29,600 horsepower, but are essentially retailers, while the Adirondack Corp., with water powers of 31,000 horsepower, is now chiefly a wholesaler.

The management plans new issues of about \$8,500,000 bonds and \$4,500,000 pfd. stock. Only one-half the par value of the common shares will be retained by present shareholders and the rest will be utilized as part payment for properties acquired.

Stone & Webster will take an option on a "substantial block" of the common, and will oversee the combined system.

With the merger capitalization would be \$11,500,000 5% bonds, \$7,000,000 6% cumulative pfd. and \$9,500,000 common.

Directors state that 75% of earnings would be retail, against 36% now, that earnings would immediately be more than doubled, and that the company would have a comprehensive distributing system.

Earnings for the year to Nov. 1, 1916, are figured as follows:

	Adirondack	Cos. to Be Acquired
Gross	\$1,494,028	\$1,713,720
Bal. after full pfd. div.	178,359	191,968

For 1917 combined surplus earnings of \$604,000 were officially estimated.

*(2) Opposition to Reorganization Plan.—On Feb. 7, 1917, the "Boston News Bureau" said that some opposition had developed to the reorganization officially outlined for this company.

Critics of the plan pointed out that, while the Boston voting trust controlling the Adirondack Co. expires on Feb. 27, Boston interests are apparently seeking to secure stock through the proposed consolidation.

The financial position of the Adirondack Co. has been strong for quite a long while, the Nov. 30 statement indicating cash of over \$486,000.

The common stock represents actual cash paid in, and is the survival of bond issues in reorganization. There will have to be much more publicity as to the situation before a reorganization can be put through.

*(3) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$1,512,516	\$1,317,068
Net after taxes	565,151	550,792
Surp. aft. chgs.	306,864	296,825

*(4) Earnings on Stock.—It was stated Feb. 19, 1917, that after 6% dividend requirements on the pfd. stock of this company in 1916 there is shown a balance of \$146,825, equal to 1.65% on the common stock.

ADIRONDACK RESORT CORP., LAKE PLACID.

*(1) Incorporated on Feb. 28, 1917, in New York, with a capital of \$800,000, to conduct hotels, restaurants, cafes, camps, club houses, amusement and pleasure resorts. Incorporators: J. A. Potter, H. B. Judkins and T. M. Applegarth, Hotel Ansonia, Manhattan, New York.

● ADVANCE-RUMELY CO.

*(1) Income Account, Year Ended Dec. 31, 1916.—Gross profits from operations, \$1,757,344; miscellaneous income, \$420,077; total profits, \$2,178,321; net profits from operations, \$488,379; net after fixed charges, \$283,478.

—Apr.

*(1) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$283,478.

*(2) Statement by President.—In his annual remarks to stockholders Pres. Finley P. Mount, of this company, said in part: "With our good product, our enthusiastic organization, and sound business methods the company has every right to expect from the future a substantial measure of success."

"During the year the company has been very successful in the liquidation of the farmers' notes taken over when it began business and the loss sustained in the liquidation of these old notes was charged against the reserve. The company is obligated to invest each year \$100,000 in its own debentures and retire them. We are able to purchase and retire \$114,000 of our debentures for \$100,320, and the profit on the transaction was credited to the reserve."

"The company's cash position is strong. The company carried on its operations during the year without borrowing and does not expect to borrow during the ensuing year of 1917."

"Under this policy the company obtained in the year 1916 70% of its total sales in cash. The strong cash position, together with the fundamental improvement in methods of operation, make possible a reasonably safe expansion and growth of the business."

ADVANCE RUBBER CO.

*(1) Incorporated on Jan. 18, 1917, in Delaware, with a capital of \$2,000,000, to manufacture tubes, tires, automobiles and accessories. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Horthy, Wilmington, Del.

AEOLIAN-WEBER PIANO & PIANOLA CO.

*(1) No Dividend Action.—Announced March 10, 1917, that at a meeting of the Board of Directors it was decided to take no action on the pfd. dividend at that time.

AEROPLANE AMUSEMENT CO., CLEVELAND, O.

*(1) Incorporated on Feb. 5, 1917, in Ohio, with a capital of \$6,000,000, to conduct aerodromes. Incorporators: Claude Sayles McCoolle, Wm. Seher, I. D. Sells, Harry S. Blackburn and W. C. Gannon.

● AETNA EXPLOSIVES CO.

*(1) Directors' Meeting.—It was announced Jan. 3, 1917, that the meeting of directors scheduled for that date had been postponed until the following week owing to the lack of a quorum. Action on the quarterly dividend is due at this time.

*(2) Status.—On Jan. 6, 1917, the "Boston News Bureau" said that if the necessity existed, this company could sell its newly constructed "war" plants and turn its materials and supplies into cash, leaving a net balance of \$5,000,000 over all liabilities—a sum equal to \$8 per share on 630,000 shares of common stock. This assumes a "scrap" value of but \$2,500,000 for the new factories built at a cost of \$11,000,000. For further details, see Standard Corporation Service for Jan.-Feb., 1917, page 1.

"The trouble with the Aetna Co. continues to be poor credit and lack of working capital," it added. "It is doing a gross business of \$5,000,000 a month upon which it could make a 10% manufacturing profit if it were not embarrassed by insufficient cash."

"It stands in need of two or three million dollars with which to carry stocks of manufactured product when export shipments are delayed or interrupted or when for any reason the foreign governments delay their settlements."

"If, for no other reason, deliveries to Great Britain or France are held up by non-arrival of steamers in which to ship the powder—and delays have been frequent of late—it puts the Aetna Co. in a tight situation."

"At the present time the company is getting 55 cents per pound for smokeless powder from Great Britain; it is under contract with France at 75 cents."

"At 55 cents for smokeless Aetna can make a small profit—the factory cost being somewhere in the neighborhood of 45 cents per pound. When there are delays in the receipt of raw material used in the manufacture of explosives, and deliveries at times are very irregular, the temporary closing down of certain plants is made necessary."

"In a nutshell, the Aetna Co. is doing too much business for its capital and at prices which, while they would show a fair manufacturing profit under normal operating conditions, are returning but a small net balance after all the many extraordinary charges and expenses are taken into account."

"In addition to 630,000 shares of common stock, the company has \$5,420,000 7% cumulative pfd. stock and \$2,187,750 6% bonds."

*(3) Directors' Meeting.—It was announced Jan. 10, 1917, that the meeting of directors of this company on that date was adjourned without action being taken on either pfd. stock or the election of a new President to succeed H. S. Kimball. It was stated the directors probably would meet again Jan. 15.

*(4) Preferred Dividend Passed.—It was announced Jan. 15, 1917, that this company's directors had passed the quarterly dividend of 1% on the pfd. stock, due at that time. The dividend had been paid regularly since April, 1915.

No action was taken on the resignation of Pres. Kimball.

*(5) Dividend Discussion.—On Jan. 16, 1917, it was stated that this company had earned the regular quarterly dividend on its pfd. stock, due at this time, but it was decided to conserve the money for operation of the plants. Two of the plants which had been closed down had been placed in operation, thus creating further demands on working capital.

According to one of the directors, the company, as of Dec. 1, 1916, had net quick assets of \$11,000,000 and quick liabilities of \$5,000,000, leaving working capital of about \$6,000,000.

"The Aetna company," said the director, "needs an enormous amount of cash working capital. Its payroll alone, I estimate, runs about \$1,000,000 monthly. Its production runs about \$5,000,000 a month, or, roughly, \$125,000 a day. It requires a great deal of money to operate such a business, due to the lack of transportation facilities, both by rail and water."

"At the present time the Aetna company has six military explosive plants running at capacity. We have enough firm contracts on hand to keep up this

JANUARY 1 TO APRIL 30, 1917

capacity until July, and there are options available for orders beyond that date. In addition, we have several contracts which call for monthly shipments until 30 days after the war.

"The trouble with the Aetna company right along has been its lack of credit. Like other munition companies, the Aetna had money placed in banks as advance payments on its contracts, but did not have sufficient credit to obtain this money before it had made the finished product for which the money was deposited. This, of course, interfered with the purchase of raw materials and production."

—Feb.

***(1) Options Exercised by Great Britain.**—On Feb. 6, 1917, an official of this company stated that Great Britain had exercised options held with the company for 8,500,000 pounds of smokeless powder. Work on the order should be completed by July.

The price of powder is about 52 cents a pound, making the value of the order approximately \$4,500,000. The company is practically all covered on raw materials required for the order.

In addition, Great Britain has an option on an additional 4,500,000 pounds of smokeless, which becomes effective April 15. The British Government also has an option for 9,000,000 pounds of smokeless to be made at the Aetna Co.'s Canadian plant.

***(2) Stockholders' Committee.**—It was announced Feb. 16, 1917, that notices were being sent to common and pfd. stockholders of this company regarding the formation of a committee representing both classes of stock for the purpose of uniting for co-operation and protection of their interests. The committee is composed of William A. Bradford, Pres. of the Butterworth-Judson Co., chairman; Bayard Dominick, of Dominick & Dominick; Charles A. Sargent, Jr., Eugene V. R. Thayer, Frederick K. Rupprecht, Grayson M. P. Murphy and Stephen J. Leonard. T. C. Gillespie is Sec'y and Chadbourn & Shores, counsel.

The Guaranty Trust Co. of New York and the Merchants National Bank of Boston are the depositaries. Holders of the common and pfd. stock are asked to deposit their certificates, duly endorsed in blank, for transfer with either of the depositaries, and there will be issued certificates of deposit therefor.

The agreement provides that upon termination by the committee or upon withdrawal of any depositor under the provisions thereof, there will be no charge by the committee for services against the depositors, and each depositor's proportion of the expense and disbursement of the committee shall not exceed 15 cents for each share of stock, common or pfd., deposited by him. To participate in the agreement stockholders must deposit their certificates on or before March 1.

The agreement provides that the committee is vested with the legal and equitable title to all shares of pfd. or common stock represented by the certificates deposited, and that depositors coming in under the agreement assign and transfer their certificates to the committee.

The committee is given power, under the agreement, to prepare and adopt or approve and adopt a plan of reorganization or readjustment of the company's affairs.

***(3) Committee's Object.**—On Feb. 19, 1917, the "Boston News Bureau" in commenting upon the formation of a committee of stockholders of this company said that it was a step taken not because actual serious trouble is at the door, but in order to create a co-operative condition that will prevent future trouble.

The statement has been many times reiterated that what Aetna Explosives lacks and has lacked from the first has been adequate working capital. As of Dec. 1, 1916, the company is understood to have had about \$6,000,000 net working capital. If ship arrivals, train movements, delivery of raw materials and other primary factors in powder

making would move along like normal this \$6,000,000 might be sufficient to finance a gross business running at the rate of \$5,000,000 a month.

It has taken more working capital than the company possessed to handle its business.

Yet even with this condition it is estimated that so material has been the recent betterment in the company's position that \$2,000,000 of new cash would assuredly put it on its feet.

It is not impossible that through the protective committee a comprehensive plan will be worked out to give the company the full amount of new working capital that it needs.

The company has six military plants running at 100%. It has a plant in Canada. There is a chance this will be sold and if so the cash from this would be a help in the working capital situation.

***(4) Status.**—It was stated Feb. 21, 1917, that the newly formed stockholders' committee, which will serve without compensation, hopes to be able to prepare a plan that will so strongly influence the company that it can operate to full capacity and render to the United States Government and others the assistance which its plants warrant. There is no suggestion of "freezing out" any stockholders.

The fact that the company at all times has between \$3,000,000 and \$5,000,000 of unpledged finished product or accounts receivable would seem to indicate a method by which the stockholders themselves upon perfect security might well be willing to lend the company any money which it may need to operate to full capacity.

The report of the duPont Co. for 1916 shows that it received cash advances exceeding requirements to such an extent that it was able to loan nearly \$150,000,000. The Aetna Co. has never been able to obtain any advances which it could use.

A glance at the company's financial position reveals that it has commercial plants costing approximately \$3,000,000, munition plants costing approximately \$12,000,000, and quick assets of approximately \$12,000,000 more. These quick assets consist largely of raw materials, finished product and accounts receivable, and more than 95% of the quick assets has been received at the plants within 60 days from date. There are no shopworn goods. The company has had none of its product rejected.

Liabilities are approximately \$2,200,000 mortgage bonds issued in part payment for plants at the time of the organization of the company, \$2,000,000 of secured notes, \$3,000,000 of accounts payable, of which approximately \$1,000,000 is overdue, and \$1,000,000 of other quick liabilities like accrued payrolls, accrued taxes, etc.

In other words, the company has assets which have cost approximately \$27,000,000, and total liabilities of approximately \$8,000,000. Of the liabilities, however, approximately \$2,000,000 are involuntary; that is, some of the note holders would like to reduce the amount of their notes, and some of the raw material men are being compelled to extend a longer term of credit than they are willing to grant.

If the company had \$2,000,000 it could pay all overdue accounts, keep a reasonable cash balance in the banks, and, according to the best advice, even upon the low priced contracts under which it is working, could make profits of several million dollars a year.

—Mar.

***(1) Deposit Time Extended.**—It was announced March 2, 1917, that the time for depositing the common and pfd. shares of this company with the stockholders' protective committee had been extended to March 8.

The extension was granted at the request of a large number of stockholders who have not had time to send in their securities, due to being absent from the city or because their securities were not readily available.

It was ascertained that a sufficient amount of stock has been deposited

with the committee to permit it to go ahead with its work.

***(2) Deposit Time Extended.**—It was announced March 9, 1917, that the stockholders' protective committee of this company had extended the time for deposits of common and pfd. shares to March 20. This extension of time was made at the request of a large number of brokers in New York and Boston, and from individuals.

Deposits of stocks up to March 8 were 62% of the common, and about 55% of the pfd. stocks. In addition to this there are approximately 25,000 shares of stock, which have been pledged, but which could not be deposited before the time expired on March 8. When this is deposited it will bring the common stock pledged up to 70% of the total.

***(3) Report, Nine Months Ended Dec. 31, 1916,** shows net earnings of \$4,321,392. The entire amount has been appropriated on account of amortization by the company and its subsidiaries.

***(4) Consolidated Balance Sheet,** as of Dec. 31 shows capital assets of \$11,543,152 after deducting the reserve for amortization of \$5,144,613; current assets of \$11,922,050, of which \$160,097 is cash and the remainder inventory and receivables. Current liabilities amount to \$6,417,031, of which bills payable account for \$2,513,264 and accounts payable, \$3,586,378.

***(5) Annual Meeting Adjourned** to April 5.—Announced March 20, 1917, that the annual meeting of this company had been adjourned to April 5, without action being taken on the election of directors.

***(6) Stock Deposits.**—It was stated March 20, 1917, that the postponement of the annual meeting of this company to April 5 was for the purpose of affording the Stockholders' Protective Committee more time in which to investigate the affairs of the company. Considerable progress has been made along this line, and it is expected that a full report will be submitted to the stockholders at the adjourned meeting.

Deposits of stocks with T. C. Gillespie, secretary of the committee, have been heavy, the committee now having approximately 440,000 shares of common and 36,000 shares of pfd. This is equivalent to about 70% of the outstanding common stock, and about 62% of the outstanding pfd.

***(7) Comment on Financial Condition.**—On March 27, 1917, the "Wall Street Journal" said that the balance sheet of this company as of December 31, 1916, emphasized clearly just where the company's financial troubles were—lack of working capital. On that date the company had in materials, finished product, accounts receivable, etc., a total of \$12,000,000. Against this it owed \$6,500,000, leaving a balance of quick assets amounting to \$5,500,000.

As the company has been doing a gross of \$50,000,000 per annum, it can readily be appreciated how insufficient is a working capital fund capable of swinging just one month's business.

A comparison of balance sheets, March 31, 1916, with Dec. 31, 1916, shows some striking changes. On the former date the plant account was placed at \$15,700,000, with \$3,391,000 for good will, a total of \$19,000,000. On the latter date this valuation had been written down to \$11,543,000. At the same time the common stock liability—and this stock has no par value—figured at \$12,578,580 on March 31, 1916, was, on December 31, placed at \$8,745,800.

At \$1 per share for 630,000 shares of common stock, and \$20 per share for 54,950 shares of preferred, the equity in the company over and above bonds of \$2,228,500, is selling in the market at only \$1,000,000; while, as above stated, the surplus of quick assets is \$5,500,000.

From the standpoint of assets, the company can show a very comfortable surplus over and above the selling value of its securities. Even assuming

JANUARY 1 TO APRIL 30, 1917

that the \$15,000,000 of cash which has gone into the construction of the munition plants and commercial factories is not worth in liquidation over 25 cents on the dollar, there is a surplus for the junior securities of at least \$3,000,000 over and above present quoted prices for the common and preferred stock.

If the company could sell some of its plants at any kind of a fair price, and reduce the volume of its business, it would seem as though some of its financial difficulties would be ameliorated.

—Apr.

*(1) **Directors.**—Announced April 5, 1917, that at the annual meeting of stockholders of this company the following directors were elected: N. W. Runkon, W. A. Chadbourne, E. K. Davis, B. H. Faulkner, F. F. Knapp and H. J. Wolff.

The following were re-elected: Josiah Howard, B. W. Palmer, W. H. Coolidge.

*(2) **May Lose Money on British Contract.**—On April 6, 1917, the "Boston News Bureau" said: "We understand that the Aetna Explosives Co. is now making deliveries of smokeless powder on a contract with Great Britain which promises to work severe hardship. The contract calls for sliding scale prices for quarterly deliveries this year—55 cents per pound for the first quarter, 50 cents for the second quarter, and 47½ cents for the third quarter, with a clause to the effect that if the English Government takes deliveries in the third quarter at 47½ cents, this price shall be applied against deliveries for the full year of 1917. It is said at least a million pounds a month is involved in this contract. The contract with the French Government is very much more favorable and will permit of some operating profit, but the English contract will work out an actual loss, probably of substantial proportions."

*(3) **Bondholders' Protective Committee.**—Announced was made April 13, 1917, of the appointment of a protective committee for holders of the 6% bonds of this company. There is outstanding only \$2,188,050 of the issue.

The committee is composed of E. R. Duer, Vice-Pres. of the Finance & Trading Corp.; Edward R. Tinker, Jr., Vice-Pres. of the Chase National Bank; F. N. B. Close, Vice-Pres. of the Bankers' Trust Co.; A. G. Fay, formerly Pres. of the old Aetna Powder Co.; Evan Randolph, Vice-Pres. of the Girard National Bank, Philadelphia; and A. W. Bullard, of Chicago. The Bankers' Trust Co. is the depository for the committee, and Messrs. Sullivan & Cromwell are counsel.

The Aetna is one of the munition companies which has suffered from undertaking war contracts beyond its capacity.

The protective committee has issued a call for the immediate deposit of bonds with the Bankers' Trust Co. The committee stated that prompt action by the bondholders was deemed necessary for the proper protection of their interests.

*(4) **New Chairman of Bondholders' Committee.**—On April 16, 1917, at a meeting of the bondholders' committee of this company, F. N. B. Close was elected chairman. F. R. Hart, chairman of the Board of Directors of the Old Colony Trust Co., Boston, was added to the committee.

*(5) **Application for Receivership Planned by Bondholders' Committee.**—Royall Victor, of the law firm of Sullivan & Cromwell, New York, who is counsel for the bondholders' protective committee of this company, April 16, 1917, said:

"You may state emphatically that the bondholders' protective committee has been formed in the interests of the bondholders only, and is not co-operating with any other committee, creditors of the company or any one else. Our interest is solely to protect the bondholders."

"We are now going over the affairs of the company, endeavoring to learn the true financial position of the organiza-

tion, and will shortly determine upon a plan of procedure which undoubtedly will call for a reorganization and readjustment. It is natural to expect that to accomplish this result it will be necessary to make formal application for a receiver for the property."

*(6) **Receivership Sought by Grasselli Chemical Co.**—An application for a receiver for this company was filed in the Federal District Court at New York April 18, 1917, by counsel for the Grasselli Chemical Co., of Cleveland, O., a creditor to the amount of \$103,655, due for merchandise. Following the filing of the petition Judge Julius M. Mayer fixed April 18, 1917, at 10.30 A. M., as the time for hearing counsel representing all interests in the case.

The complainant stated through its counsel, Hamilton, Gregory & Freeman, that the munitions firm is not insolvent, but that a receivership is necessary to conserve its assets.

Notwithstanding the fact that the concern is deeply in debt, it was said that its assets, consisting of plants and other property in several States, accounts due, and especially many large contracts for munitions for the Allies, greatly exceeded its liabilities.

The company was organized on Nov. 28, 1914, and on Feb. 8, 1916, under an amended certificate of incorporation, its authorized capital was \$18,100,000.

It was said the company was harassed by many creditors and liable to suffer attachment of some of its property.

Much of the trouble is attributed to notes issued by A. J. Moxham and F. L. Bell, formerly Pres. and Treas., to Edward W. Bassick.

Bassick has suits pending against the concern for \$3,494,913, \$321,583 of which is represented by notes. Other suits aggregating more than \$300,000 are pending on notes which Bassick transferred to third parties.

It is stated that the Guaranty Trust Co. is acting as trustee on the mortgage bond issue for \$5,300,000. These obligations mature Jan. 1, 1945, and bonds to the extent of \$2,188,050 are outstanding. The greater part of the bond issue, valued at \$3,053,750, has been pledged to secure the payment of notes and contracts.

Further debts, aggregating more than \$3,000,000, are said to be outstanding for materials and on notes.

*(7) **Consent to Receivership Plan Filed by Company.**—On April 17, 1917, this company, through Stanchfield & Levy, filed an answer admitting all the charges in the complaint filed by the Grasselli Chemical Co. and consented to the receivership plan.

*(8) **Creditors' Protective Committee Formed.**—On April 18, 1917, Dow, Jones & Co. said that in view of the application for appointment of receivers of the property of this company and the organization of two committees, one to represent the bondholders and the other to represent the stockholders, a general creditors' protective committee for the protection of the interests of the general creditors had been formed, as follows: Mortimer N. Buckner, chairman, Pres. of the New York Trust Co.; W. Palen Conway, Vice-Pres. Guaranty Trust Co.; Charles B. Wiggin, Vice-Pres. Merchants National Bank of Boston; W. F. Hoffman, Asst. Treas. Bethlehem Steel Co.; Sherburne C. Presscott, Treas. Anglo-American Cotton Corp.; and Charles E. Sholes, of the Grasselli Chemical Co.

*(9) **Receivers Appointed.**—Judge Mayer of the Federal District Court, New York, April 19, 1917, named ex-Gov. Benjamin B. Odell and ex-Judge George C. Holt as receivers of this company, with orders to continue the business. Each receiver must furnish \$25,000 bond. They will be represented by the law firm of Winthrop & Stimson.

Application for receivers was made April 17, 1917, by the Grasselli Chemical Co. of Cleveland, O., a creditor for \$103,655. The company will be continued and later authority probably will be given by the court for certificates so that money may be speedily raised. Quick funds are needed for the pay-

ment of employees and purchase of materials.

*(10) **Receivers to Deliver Finished Products.**—Receivers Benjamin B. Odell and George C. Holt, of this company, were authorized April 23, 1917, by Judge Mayer, of the Federal District Court at New York, to deliver the munitions that have been finished so that they could receive payment and thus be provided with money to carry on the business.

It was explained that the bankers, Kidder, Peabody & Co. and F. S. Moseley & Co. had entered into a contract with the Aetna Co. for the delivery of a quantity of gun cotton, smokeless powder and picric acid, which would be paid for as soon as it was inspected by agents of the French Government.

AGRICULTURAL DEVELOPMENT CO.

*(1) **New Fertilizer Industry.**—It was stated March 2, 1917, that this new company, incorporated in Maine, plans to conduct a general mercantile and trading business with farmers, but more especially to manufacture a fertilizer that will contain almost 2% of potash. This is to be done by utilizing the deposits of mussel beds on the Maine coast.

● AHMEEK MINING CO.

*(1) **Sales.**—On Jan. 15, 1917, it was stated that this company had sold copper for delivery up into August of 1917 at better than 35 cents a pound.

This figure of 35 cents compares with 25 cents, which is about the average secured by the mines of that district during 1916. The Ahmeek, and practically all of the other mines of the district, have contracted for approximately all of their output for the first six months of 1917, prices running from 27 to 29 cents, Ahmeek having a contract for delivery of nearly 2,000,000 pounds at 29 cents for June.

Ahmeek had a balance of assets of \$2,764,717 Dec. 1, 1916, including 20 days' output of 1916 copper then held at 28.48 cents and unsold.

*(2) **Production, December and 12 Months.**—Announced Jan. 23, 1917, that this company in December, 1916, produced 2,248,745 pounds of copper, against 2,157,959 in November.

During 1916 the production totaled 24,060,367, against 21,800,492 in 1915.

—Feb.

*(1) **Production.**—Announced Feb. 19, 1917, that this company in January produced 2,411,329 lbs. of copper.

—Mar.

*(1) **Production, February, 1917.**—Announced March 16, 1917, that this company in February produced 2,261,356 pounds of copper, compared with 2,411,329 pounds in January, 1917.

*(2) **Report, Year Ended Dec. 31, 1916.** shows a profit of \$3,449,709, or \$17.24 a share on 200,000 shares.

—Apr.

*(1) **Production Increasing.**—Reported on April 9, 1917, that the production of copper from Ahmeek was increasing by leaps and bounds. The rock tonnage for March was the largest in the history of the mine, 117,000 tons, and the copper output goes ahead of the three mines of the Osceola Consolidated. The rock tonnage was 3,000 better than February and 1,800 above the best record previously made in any one month. For April it will be larger still if the present record is maintained.

*(2) **Production, March, 1917.**—This company, April 18, 1917, reported March production as 2,726,889 lbs. of copper, compared with 2,261,329 in February.

AINSWORTH-DUNN CO., SEATTLE, WASH.

*(1) **Incorporated** on Feb. 23, 1917, in Washington, with a capital of \$250,000. Incorporators: Arthur G. Dunn, Helen G. Ainsworth and W. A. Peters.

AIR O FLEX AUTOMOBILE CORP.

*(1) **Incorporated** on March 30, 1917, in Delaware, with a capital of \$2,500,000,

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

to manufacture pneumatic suspension cylinders for automobiles, etc. Incorporators K. M. Dougherty, C. Fearon and E. Lynch, Wilmington, Del.

AIR REDUCTION CO., INC. NEW YORK.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

(1) Acquisition.—It was announced Feb. 1, 1917, that this company had taken over the Superior Oxygen Co., Pittsburgh, Pa., including its plants in New York, Illinois, Ohio and Missouri; also the Niagara Oxygen Co., Buffalo, N. Y., and the Searchlight Co., Chicago, Ill., acetylene manufacturer, with branches all over the United States. It also has installed plants for the manufacture of oxygen and nitrogen at Philadelphia and Detroit, and has other plants under construction at Cleveland, O., and elsewhere.

The Jersey City plant, now under construction, will be the home plant, where a department for the manufacture of all its equipment, a school for welding and cutting, an experimental plant and a research department will be established.

Officers of the company are Walter W. Birge, Pres.; Stirling H. Thomas, Vice-Pres. and Treas.; and Maurice W. Randall, Sec'y. The directors are Frederick B. Adams, Frederick W. Allen, Walter W. Birge, Paul Delorme, Edmund Deschamps, W. T. P. Hollingsworth, L. F. Loree, Ambrose Monell, Robert C. Pruyn, Samuel F. Pryor and Percy A. Rockefeller.

(2) Capital Increased.—On Feb. 17, 1917, the company filed notice at Albany, N. Y., of an increase in the number of shares from 25,000 to 140,000, and in the stated capital from \$2,125,000 to \$4,400,000.

—Apr.

(1) Status.—It was stated April 1, 1917, that this company had been organized one year. The Board of Directors is composed of the following: Frederick B. Adams, Frederick W. Allen, Walter W. Birge, Guy Cary, W. T. P. Hollingsworth, L. F. Loree, Ambrose Monell, Robert C. Pruyn, Samuel F. Pryor, Maurice W. Randall and P. A. Rockefeller. Mr. Birge is Pres.

The newly authorized funds are to meet requirements for plants, new cylinders ordered, funding investments in the Superior plants, taking up floating debt and additional working capital.

The company has plants in Philadelphia, Brooklyn, Chicago, Pittsburgh, Defiance, O., and St. Louis. It manufactures oxygen, which is being sold at remunerative prices throughout the United States east of the Missouri river. Its plant at Philadelphia is of the French Claud type, having been in successful operation since July, 1916, and the other five are Euperlor plants.

The second Claud plant is about to go into operation at Detroit. Another is being erected in Jersey City and four others are contemplated for other cities within two months.

Thus far only oxygen has been manufactured, but some of the proposed new plants will manufacture hydrogen and acetylene, the company recently having taken over the Searchlight Acetylene Co.

● AJAX RUBBER CO., INC.

(1) Capital Increased.—On Jan. 8, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$5,000,000 to \$10,000,000.

(2) Application to List.—Announced Jan. 20, 1917, that the New York Stock Exchange had received application to list \$3,100,000 additional capital stock of this company.

(3) Acquisition Plan Completed.—On Jan. 24, 1917, it was announced that final details for the purchase of the Racine Rubber Co. by this company had been concluded. Through the purchase of the Racine Co. the number of shares of stock of the Ajax Rubber Co. has been brought up to 142,000, or \$7,600,000 out of a total authorized issue of \$10,000,000.

At the annual meeting of the Ajax Company in February the board will be increased from nine to fifteen members, and the retiring directors re-elected, it was stated.

(4) Admitted to List.—Announced Jan. 25, 1917, that the New York Stock Exchange had listed \$3,100,000 capital stock of this company.

(5) Income Account. Aug. 31 to Dec. 31, 1916, as reported to the New York Stock Exchange, shows gross income of \$7,518,434; gross profits of \$1,608,732; net profits after operating expenses, depreciation, etc., \$548,123, and surplus after dividends, \$139,247.

—Feb.

(1) Directorate Increased.—It was announced Feb. 14, 1917, that the number of directors of this company had been increased from nine to fifteen. The new directorate is the representation of the Racine Rubber Co., recently taken over by the Ajax Co.

Net profits of the Ajax and Racine companies for the year ended Dec. 31, 1916, aggregated \$1,268,311.

(2) Business, January, 1917.—It was stated Feb. 15, 1917, that the business of the Ajax Rubber Co. and of the Racine Rubber Co., which have been merged, was the largest in January of any month in the history of these concerns.

The dividend on the new stock will be 5%, the same as on the old Ajax stock. At least dividends will be started at that rate, although earnings would appear to justify a larger disbursement before the end of 1917. For the year ended Dec. 31, 1916, net earnings of the two companies aggregated \$1,268,311, which is equal to about \$9 a share on the new capitalization.

The Racine interests are now represented on the Ajax board by the following: L. B. Patterson, H. L. McClaren, L. T. Vance, Herbert C. Severance, Stuart Webster and Joseph Weissbach.

AJAX RUBBER CO. OF CANADA, LTD.

(1) Incorporated on Jan. 5, 1917, in Canada, with a capital of \$1,000,000, divided into 10,000 shares of \$100 each, to manufacture and deal in rubber and rubber goods of every kind. Incorporators: Wm. D. Hamilton, Richard Sutherland Gilpin, John Fraser Selby, Edward Beaconsfield, Egar de Camps and Geo. Wm. Miller. Chief place of business, Toronto, Ont.

AKRON DRY GOODS CO., AKRON, O.
(1) Capital Increased.—On April 23, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$200,000 to \$1,750,000.

ALABAMA CO.

(1) New Officers.—It was announced March 9, 1917, that Edw. N. Rich had been elected Pres. of this company, succeeding J. Wm. Middendorf. W. I. Pierson was elected Sec'y and Asst. Treas.; J. W. Porter, Treas. and Asst. Sec'y; Joshua Levering, 1st Vice-Pres., and H. W. Coffin, 2d Vice-Pres. and Gen. Mgr.

ALABAMA CO-OPERATIVE OIL & DEVELOPMENT CO.

(1) Incorporated in April, 1917, in Alabama, with a capital of \$375,000. Incorporators: E. S. Hammond, Pres., Atlanta, Ga.; G. A. Sequin, Vice-Pres., Memphis, Tenn., and A. E. Hill, Sec'y, Atlanta, Ga.

ALABAMA DRY DOCK & SHIPBUILDING CO.

(1) Merger.—It was announced March 3, 1917, that this company had consolidated with the Gulf City Boiler Works.

(2) Capital Increase.—It was stated March 3, 1917, that this company had completed plans to increase its capital stock \$500,000. The concern will issue bonds to the amount of \$500,000 for improvements and enlarging the plant.

(2) Bond Offering.—Announcement was made March 5, 1917, that Fetter, Choate & Prentice are offering at 90 and interest \$1,550,000 first consolidated mortgage 5% bonds of this company. The bonds are part of an issue of \$25,000,000, of which \$4,812,000 are outstanding.

(3) Stock Offering.—Announcement was made March 23, 1917, that Spencer Trask & Co. are offering 6,000 shares of this company's ordinary stock at a price to yield in excess of 7%, basing the income on the 1916 dividend distribution. Regular dividends of 5% a year have been paid since 1911, and the present rate includes an extra payment of 2%. Current earnings are at the annual rate of nearly 19% on the outstanding shares.

(4) Offering of Small Block of Stock.—Stated on March 27, 1917, that a small block of ordinary stock of this company was being offered by Spencer Trask & Co. This issue has paid 5% or more since 1911 and now pays 5% regular and 2% extra dividends. At the offering price the yield is a little more than 7%.

(2) Bond Sale.—Announcement was made Jan. 4, 1917, that this company, a subsidiary of Alabama Traction, Light & Power Co., had sold to Harris, Forbes & Co. \$2,000,000 first mortgage 5% bonds. These are in addition to the \$4,750,000 bonds placed in the Spring of 1916. Proceeds will be for the construction of a new 70,000-horsepower steam station on the Black Warrior River and the installation of 15,000 additional horsepower at "Lock 12" on the

JANUARY 1 TO APRIL 30, 1917

Coosa River, together with the extension and completion of the company's 676 miles of distribution system.

(8) Status.—It was stated Jan. 5, 1917, that the gross earnings of the company for the year ending Oct. 31, 1916, were \$1,315,126, with net after taxes of \$790,566 to meet annual interest charges on \$8,750,000 bonds of \$337,000. The first mortgage indebtedness can be increased only as the two-for-one ratio of net earnings to first mortgage interest is maintained.

Alabama Power operates in the "Birmingham district" of northern Alabama and enjoys an unusual diversity of its power consumers. Retail operations—street railway, light and small power—consume 28.4% of the output, other public service companies 27.1%, steel companies 10.1%, cement companies 9.7%, cotton mills and ore mines 5.4% and 5.1%, respectively, while the balance is scattered, with 3.1% taken by coal mines.

(2) Rates Reduced.—It was announced Feb. 15, 1917, that this company had made public reductions in lighting rates of from 12 to 10 cents per kilowatt-hour in 24 Alabama municipalities served by the Birmingham Ry., Light & Power, Co. The reduction is made "in pursuance of the company's policy to extend to the users of its light and power the lowest rates consistent with the highest class of public service."

The city of Birmingham, which is served by the Birmingham Ry., Light & Power, Co., through current from the Alabama Power, was granted a reduction several weeks previously.

ALABAMA WATER CO.

(1) Capital Increase and Bond Issue Planned.—It was announced Jan. 10, 1917, that this company had completed plans for increasing its capital from \$25,000 to \$500,000 and issuing \$2,500,000 bonds for use in acquiring the Bessemer Water Co., Bessemer, Ala., and the Anniston Water Co., Anniston, Ala.

—Feb.

(1) Mortgage Filed.—It was announced at Birmingham, Ala., Feb. 15, 1917, that this company had filed a mortgage for \$2,000,000 in favor of the Equitable Trust Co. of New York. The bonds mature in 1932 and will bear interest at the rate of 6%. The company recently consolidated and now owns the water systems of Anniston, Bessemer and Albany, Ala.

ALADDIN-COBALT, LTD.

(1) Interim Dividend.—Announced that an interim dividend of 2% had been declared on the outstanding capital stock of this company, payable Feb. 28, 1917. It was stated that the dividend comes out of earnings on Chambers-Ferland stock, but that the latter company's shareholders who have not exchanged their holdings into Aladdin stock do not participate. If they want to get dividends they have to exchange their stock, it was announced.

ALAMEDA SUGAR CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

(1) Report, Year Ended Dec. 31, 1916, shows net profits of \$150,000.

(2) Balance Sheet, as of Dec. 31, 1916, shows cash amounting to \$10,837, a profit and loss surplus of \$62,642 and total assets and liabilities of \$3,104,354.

ALASKA GASTINEAU MINING CO.

(1) Report, Year Ended Dec. 31, 1916, of this company, controlled by the Alaska Gold Mines Co., shows:

	1916	1915
Gross revenue....	\$1,837,291	\$1,046,104
Mining profit....	414,031	251,848
Total profit....	451,027	278,771

(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss deficit of \$105,740, compared with a surplus of \$80,886 Dec. 31, 1915.

ALASKA GOLD MINES.

(1) Report, December, 1916.—Announced Jan. 3, 1917, that this company in December milled 196,495 tons of ore, assaying an average of \$1.22 per ton. Per cent. of extraction was 81.54; loss in tailings 22 cents per ton.

(2) Operation Results, Estimated.—On Jan. 16, 1917, the "Boston News Bureau" said that this company in 1916 treated 1,888,869 tons of gross value of \$1.23 per ton. Deducting loss in mill tailings of 22 cents, leaves \$1.01 per ton net, against 93 cents in 1915.

Deducting those to theoretical income account shows: Net gold recovered, \$1,907,757; net profit, \$566,611; surplus after interest on \$3,000,000 bonds, \$386,661.

After development expenditures not charged into current account there is a very small balance left for 750,000 shares. In 1915 "deferred charges to

operations" were \$338,039. Similar expenditures for 1916 would reduce surplus close to vanishing point.

Alaska Gold represents in cost of property and development close to \$11,000,000; at \$40 per share property has a selling value of over \$30,000,000. Today it is selling for \$9,000,000, or \$2,000,000 less than invested.

Promoters firmly believed from experimental mill runs and drill hole assays that ore would run not less than \$1.75 per ton, or \$1.50 after losses in mill treatment.

Actual results to date show a net return of \$1, and this difference of 50 cents spells either success or failure.

(3) Statement by Managing Director.—On Jan. 23, 1917, the "Boston News Bureau" quoted Managing Director D. C. Jackling, of this company, as follows:

"I have received no advices from Alaska that would account for recent decline, and believe, therefore, that there is nothing in conditions at the property to warrant it. The outlook, so far as I am able to interpret it, justifies the belief that tonnage can be maintained at not less than the average for the last three months, barring interference of severe weather; and probabilities are that output may be gradually but slowly increased as weather conditions improve toward Spring. I do not expect that the average values of the past year can be improved much, if any, for several months."

—Feb.

(1) Report, January, 1917, compares with previous month as follows:

	Jan.	Dec.
Tons, ore.....	173,300	196,495
Extraction.....	81.95%	81.54%
Tailings.....	22c	22c

—Mar.

(1) Production, February, 1917.—It was announced March 15, 1917, that this company in February milled 150,000 tons of ore, averaging \$1.35 a ton. The percentage of extraction was 83%; loss in tailings, 22 cents a ton. This compares with 173,300 tons of ore milled in January, averaging \$1.24 a ton; percentage of extraction, 81.95%; loss in tailings, 22 cents.

—Apr.

(1) March Production.—This company in March, 1917, milled 217,700 tons of ore, averaging \$1.09 per ton. Per cent. of extraction was 82.91, loss in tailings 18.7 cents a ton.

(2) Two New Directors Elected.—At the annual meeting of this company April 20, 1917, J. B. Haddon, of Boston, and B. L. Thane, of Alaska, were added to the Board of Directors, replacing J. T. Gilbert, deceased, and W. H. Coolidge, of Boston.

(3) Report of Controlled Co., 1916.—See Alaska Gastineau Mining Co.—Item No. 1.

(4) Report, Year Ended Dec. 31, 1916, shows year milled 1,892,788 tons of ore with an average yield of 97 cents a ton, making the gross income \$1,836,004, a gain of \$787,627 over the result of the preceding year. In 1915 the ore run through the reduction process was 1,115,234 tons, and the yield amounted to slightly less than 94 cents a ton. After operating expenses were accounted for the net yield per ton of ore in 1916 was no more than 23.8 cents per ton, against 24.9 cents the preceding year.

(5) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$461,378, compared with \$356,699 Dec. 31, 1915.

(6) Operated in 1916 at a Profit, But Results were Disappointing, States Pres. Hayden.—Pres. Chas. Hayden, of this company, in his remarks to stockholders April 21, 1917, said, in part: "To briefly summarize the operating results during the year, it may be said that 1,892,788 tons of ore were milled, carrying average metallic contents of \$1.193 per ton; of this amount there was lost in tailings \$0.222, making a net recovery of \$0.9708 per ton, which represents an extraction of 81.33%. The average cost

JANUARY 1 TO APRIL 30, 1917

of developing, mining, tramming and milling this ore, together with all expenses of smelting concentrates and all overhead expenses of the business after deducting miscellaneous income, distributed over the tonnage milled, was \$0.73240 per ton.

"The profit per ton was \$0.23828, which, applied to the tonnage milled, amounted to \$451,026; this sum represents the profit from operations of the year, before deduction of interest on the debenture bonds and floating indebtedness.

"The mine development expenditures for the year amounted to \$219,105, of which \$113,952, representing credit to reserve extinguishment account, was charged off to current expenses.

"While the foregoing figures show that the business was operated for the year 1916 at a profit, it goes without saying that the results are exceedingly disappointing. At the time this enterprise was presented to the public it was confidently expected that there would be a profit of approximately 75 cents per ton handled. This profit was estimated on working costs of 75 cents per ton and on recovered value of about \$1.50 per ton.

"The original estimates were based upon mill records of an experimental plant operated prior to the acquisition of the property by your company and the most thorough examination of which such a body of ore is susceptible before its actual mining.

"The recovered values per ton have been much less than were expected; at the same time the working expenses have fully met the original estimates, despite the large increases in the cost of material and labor due to current conditions."

"(7) Mine Production Reported as 7,500 Tons Daily by Vice-Pres. Jackling.—Vice-Pres. Jackling, of this company, reported April 23, 1917, that a thorough examination late in the Summer of 1916 made by a corps of independent geologists and engineers under the direction of A. H. Rogers indicated that as to the tonnage then developed and partially developed there would be an average gross value of \$1.45 per ton for about 5,500,000 tons. This figure is about 30 cents less than the promoters estimated and 27 cents more than the 1915-16 average.

The 1916 profit per ton was 23.828 cents, against 24.995 cents in 1915.

Mine production is now closely approximating a rate of 7,500 tons per day.

"(8) Not Endangered by Cave-In.—On April 24, 1917, the "Boston Evening Transcript" said: "Alaska Gold shares sold down to 6½ by reason of fears that the disastrous cave-in, which has let the waters of Gastineau channel into the lower workings of the Alaska Trendwell, Alaska United and Alaska Mexican gold mines, had brought disaster to the Alaska Gold.

"In correction of this apprehension it may be said that the lowest workings of the Alaska Gold are 1,000 feet above the sea level, while the upper workings are 4,000 feet above the sea level.

"Furthermore, the mine is on a mountain three miles inland, so that there is not the slightest danger from any sea water floods such as have broken into the three mines referred to above."

• ALASKA-JUNEAU GOLD MINING CO.

"(1) Coarse Crushing Plant Started.—Reported on April 9, 1917, that the coarse crushing plant of this company had started up on March 31. It was said that the whole mill would be gradually brought in before the end of 1917.

ALASKA MINES CORP.

"(1) Bessie Properties Acquired.—This company has announced April 20, 1917, the acquisition of the Bessie properties at Nome, comprising 100 acres and having a production record of \$1,400,000 with crude equipment. Estimated ore reserves are more than \$8,000,000.

The purchase includes a new modern dredge of 100,000 cubic yards monthly

capacity, which the Bessie management had ordered and which is expected to be completed in July. The Johnson properties acquired earlier in the year have a production record of \$1,758,000.

ALASKA PACKERS' ASSOCIATION.

"(1) Exchange of Stock.—See California Packing Corp.—Item No. 1.

"(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,544,915.

"(3) Profits, Year Ended Dec. 31, 1916.—On Jan. 17, 1917, it was stated that net profits of this company, almost 80% of the capital stock of which is owned by the California Packing Corp., from all sources, for the year ended Dec. 31, 1916, amounted to \$2,000,354, as against \$941,597 for the preceding year.

All the bonds of the Alaska Packers' Association were paid off during the year. The only indebtedness outstanding was \$50,513, representing current items; whereas the company had current assets of \$5,981,972, of which \$932,159 was cash, and \$2,274,925 represented marketable investments consisting of State, municipal and general corporation bonds.

The favorable results of the Alaska Packers' Association have a correspondingly direct effect on the position of California Packing Corp. When the original estimate of earnings of the last-named company was made, it was calculated that the Alaska Packers' Association would earn \$1,500,000, or practically \$600,000 less than what it actually earned.

The result of the dried fruit and canned goods branches of the California Packing Corp. business will not be determined for some time yet. If the original estimates in these lines are realized earnings of the California Packing Corp. in 1916 will be equivalent to between \$6.50 and \$7 a share on the common stock.

"(4) Dividends.—Announced Jan. 10, 1917, that this company's re-elected directors had increased the regular quarterly dividend rate from 1½% to 2% and declared a special dividend of 2% out of the income from the insurance fund, both payable Feb. 10 to stock of record Jan. 31.

The effect of this action is to place the stock on a 10% basis, as the insurance fund is invested in securities, the income from which is not likely to be impaired.

—Apr.

"(1) Financial Statement, as of Dec. 31, 1916, shows:

Assets—	
Canneries, fleet, etc.	\$5,260,991
Inventories	1,807,816
Insurance fund investments	2,724,925
Accounts receivable	517,072
Cash on hand	932,160
Total	\$11,242,964
Liabilities—	
Capital stock	\$5,750,800
Current indebtedness	50,513
Insurance fund	2,896,735
Surplus	2,544,915
Total	\$11,242,964

ALASKA PITTSBURGH GOLD MINING CO.

"(1) Incorporated on Feb. 19, 1917, in Delaware, with a capital of \$1,000,000, to carry on business of mining, milling and refining of ores, metals, etc. Incorporators: F. R. Hansell, Geo. H. B. Martin and S. C. Seymour, Philadelphia.

ALASKA STANDARD COPPER MINING CO.

"(1) Favorable Report from Mine.—Under date of March 29, 1917, a letter to shareholders said in part: "Adjoining five claims owned by the company have excellent surface showings of ore in several places. Work on these ore bodies will be commenced very shortly, and it is believed that development at depth will disclose as valuable a property as the Standard mine.

"One of these claims will serve as the site of the new deep tunnel which the company proposes to drive to cut at a depth of about 2,000 feet the 11 ore bodies in the Standard mine. It is expected that three of these ore bodies will merge into one great deposit at that depth. This tunnel should also intercept at depth the different ore bodies in the five claims owned outright by the Alaska Standard Copper Mining Co.

"The Alaska Standard Copper Mining Co. has decided to exercise its option to purchase the Standard mine and proposes to make a first payment thereon shortly after the returns from the first shipment of ore are received."

—Apr.

"(1) Ore Body Encountered by Tunnel No. 3.—The Sec'y of this company on April 16, 1917, announced receipt of a telegram from the mine manager, stating that tunnel No. 3 had encountered the ore body opened up in tunnel No. 2 at 126 feet greater depth. The ore is reported to be 5 feet wide and of good shipping grade. This development is expected to make available upward of \$300,000 worth of ore on this vein alone, in addition to the ore reserves in other veins blocked out in the upper workings.

ALASKA STEAMSHIP CO.

"(1) Report, Year Ended Dec. 31, 1916, showed gross income of \$3,816,087; operating expenses and taxes, \$2,449,420; net income, \$1,366,667; previous surplus, \$658,894; total surplus, \$2,025,561; depreciation and dividends, \$1,895,345; final surplus, \$130,216.

ALASKA SULPHUR CO.

"(1) Incorporated on Feb. 3, 1917, in Delaware, with a capital of \$500,000, to acquire and develop sulphur lands. Incorporators: Otto L. Erickson, Wm. W. Johnston and Thomas Landswick, Minneapolis, Minn.

ALASKA WILLOW CREEK MINING CO., SEATTLE, WASH.

"(1) Incorporated on Jan. 3, 1917, in Washington, with a capital of \$500,000. Incorporators: L. S. Brockway, E. A. La Fountain and M. A. Ware.

ALBANY SOUTHERN R. R. CO.

"(1) Tenders Asked.—Announced March 4, 1917, that the Bankers Trust Co., New York, trustee, would receive proposals until March 15, 1917, for the sale to it of sufficient 1st mortgage sinking fund 5% 30-year gold bonds, dated Sept. 1, 1909, to exhaust \$22,500, at a price not exceeding 100 and accrued interest.

ALBERNI LUMBER CO.

"(1) Receiver Named.—It was announced Feb. 15, 1917, that Morrill H. Drew and Edward N. Hutchins had been named temporary receivers for this company by Justice Bird in the Supreme Court, Portland, Me. Action was taken on petition of Frank L. Ferguson, former business manager for Rev. Newell D. Hillis, principal stockholder of the company.

ALBERTA FLOUR MILLS, LTD.

"(1) Stock Offering.—It was announced Jan. 25, 1917, that this company had decided to establish a 6,000-barrel plant at Calgary. The company's capital is \$5,000,000, divided into 100 shares. An issue of 25,000 shares of the par value of \$100 each is being made. These are offered on the following terms of payment: 25% upon application, 25% upon allotment, 25% 60 days after allotment, and 25% 90 days after allotment.

The Western Agencies & Development Co., Ltd., Loucheud Building, Calgary, are making the offering.

J. S. Dennis is Pres. of the company.

ALBODON CO., INC. (THE).

"(1) Capital Increased.—On Jan. 18, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$25,000 to \$250,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

ALCOHOL PRODUCTS CO.,

NEWARK, N. J.

¹(1) Incorporated on March 1, 1917, in New Jersey, with a capital of \$650,000, to manufacture and deal in anhydrous and aqua-ammonia and chemicals. Incorporators: Harold T. Edgar, Henry M. Miner, Brooklyn, and Harold W. Haines, Milburn, N. Y.

ALDER WIRE WOUND SPOKE WHEEL CO.

¹(1) Incorporated on Feb. 27, 1917, in Delaware, with a capital of \$500,000, to manufacture and sell wheels for all kinds of vehicles. Incorporators: J. Edmond Stevens, Lyman H. Smith and Geo. T. Maxwell, Dover, Del.

ALEXANDER & BALDWIN, HAWAII.

¹(1) Extra Dividend.—Announced that this company in January, 1917, paid a regular dividend of \$1 monthly and \$4 extra, or \$25,000.

ALGOMA STEEL CORP., LTD.

¹(1) Note Payment.—On Feb. 15, 1917, this company announced through its Pres., J. Frater Taylor, that it would pay off its \$2,500,000 three-year notes, due March 1, 1917.

ALKI MINES CO.

¹(1) Incorporated on March 5, 1917, in Delaware, with a capital of \$2,500,000, to engage in a general mining business. Incorporators: Arthur W. Britton, Harry B. Davis and Samuel B. Howard, New York City.

ALLEGHENY MINES CORP.

¹(1) Capital Increased.—Change in Name.—On April 20, 1917, this company filed notice at Dover, Del., of an increase in capital stock from \$100,000 to \$300,000 and of a change in name to the Fullard Drying Products Corp., of Philadelphia.

ALLENDALE OIL CO.

¹(1) Sold to Sanders Co.—On April 12, 1917, the "Cincinnati Enquirer" said this company, of Wabash County, Ill., had closed a deal for sale of all its holdings to the Sanders Co. of Chicago, for \$700,000. The Sanders Co. has deposited a \$100,000 check as first payment.

The Allendale Co. is almost entirely owned by residents of Mt. Carmel and Allendale, Ill., and is one of the richest independent oil concerns. Dividends have been declared nearly even month for a year. They have run as high as 100% on the stock.

ALLIANCE GAS & POWER CO., ALLIANCE, O.

¹(1) Capital Increased.—On Jan. 31, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$550,000 to \$1,550,000.

¹(2) Stock Sale.—It was announced Feb. 13, 1917, that this company had sold to Otis & Co. \$500,000 1st. pfd. 6% stock, recently authorized by the Ohio Public Utilities Commission. Proceeds of this issue are to be used to reimburse the treasury of the company for betterments.

ALLIANCE MOTORS CORP., NEW YORK, N. Y.

¹(1) Capital Increased.—On April 5, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$25,000 to \$250,000.

ALLIED CONSTRUCTION MACHINE CORP.

¹(1) New Subsidiary.—See American International Corp.—Item No. 1.

ALLIED CONSTRUCTION MACHINERY CORP.

¹(1) Organized.—It was announced March 19, 1917, that this company, incorporated in Delaware, with a capital stock of \$250,000, would act as exclusive foreign sales representative for a number of non-competing manufacturers of machinery used on construction work of all kinds. The following

directors have been elected: H. P. Tinsley, W. S. Kies, Willard Straight, S. T. Henry, C. F. Lang, F. A. Smythe and Cecil Page. Mr. Tinsley is Pres. of the company. The Vice-Pres. are S. T. Henry, R. S. Sheridan, C. L. Carpenter and J. W. Hook. The Sec'y is Cecil Page and the Treas. Percy Hayes.

ALLIED GROCERS CORP., EAST ORANGE, N. J.

¹(1) Incorporated on March 16, 1917, in New Jersey, with a capital of \$500,000, to manufacture and deal in food products. Incorporators: Thomas T. Graham, East Orange; Chas. J. Campbell and Frank A. B. Boland, New York.

ALLIS-CHALMERS MANUFACTURING CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Sales billed	\$19,440,509	\$11,666,413
Net profits	3,165,020	1,078,352

¹(2) Earnings on Stock.—It was stated Feb. 6, 1917, that this company's 1916 net profits of \$3,165,020 is equal to 8.36% on the \$28,000,000 common stock, after allowing the regular 6% on the \$18,500,000 pfd.

¹(3) Unfilled Orders, as of Dec. 31, 1916, amounted to \$13,424,488, compared with \$11,040,683 Dec. 31, 1915, and \$2,503,937 Dec. 31, 1914.

¹(4) Dividend Discussion.—It was stated Feb. 7, 1917, that during 1916 the company paid off 4 1/4% of the back dividends on the pfd. stock, leaving 10% to be paid off on accumulated dividends on that issue.

—Mar.

¹(1) Dividends.—Announced March 1, 1917, that this company had declared a dividend of 1 1/4% on the pfd. stock for the quarter ending March 31 and three-fourths of 1% on account of back dividends, both payable April 16 to stock of record March 31.

¹(2) Earning Rate, Two Months.—It was announced March 8, 1917, that net profits of \$600,000 for this company in January and February were at the rate of \$9.50 a share on the common stock after deducting regular pfd. dividends at the rate of 7% annually. Beginning in May, Allis-Chalmers will start to make deliveries on a basis of high-priced contracts, and net profits are expected to reach \$500,000 a month. This would be equal approximately to \$19 a share on the common after the payment of 7% on the pfd. In this connection, however, Allis-Chalmers is eliminating its back dividends by paying to shareholders at the rate of \$2.50 quarterly on the pfd.

—Apr.

¹(1) Report, Year Ended Dec. 31, 1916, shows income account as follows:

	1916	1915
Sales billed	\$19,440,509	\$11,666,413
Net incl. oth. inc.	3,165,020	1,078,353
Surp. after pfd. dividend	1,738,565	602,888

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$3,071,489, compared with \$1,332,924 Dec. 31, 1915.

¹(3) Earnings on Stock \$19.18 a Share in 1916.—This company's 1916 net profit of \$3,165,020 is equivalent to \$19.18 a share earned on 165,000 shares of pfd. stock, against \$8.53 a share earned in 1915.

¹(4) Report, Quarter Ended March 31, 1917, shows:

	1917	1916
January	\$1,690,627	\$1,368,203
February	1,615,009	1,367,736
March	1,878,080	1,640,901
Total	\$5,183,716	\$4,374,840

	1917	1916
January	\$301,466	\$219,734
February	273,164	232,085
March	326,042	288,518
Total	\$900,672	\$740,337

Unfilled orders on hand at the end of the quarter amounted to \$16,000,847, exceeding 1916 orders by \$3,968,561.

● ALLOUEZ MINING CO.

¹(1) Production, December and 12 Months.—Announced Jan. 23, 1917, that this company in December produced 773,311 pounds of copper, against 815,458 in November.

During 1916 the production totaled 10,222,378, against 10,043,459 in 1915.

—Feb.

¹(1) Development.—It was stated Feb. 14, 1917, that this company is using the eighth head of the Ahmeek mill, the new head that went into commission six weeks previously. Allouez thus gets a short haul on better than 700 tons a day. Allouez likewise is using the No. 2 Lake milling plant, with its two heads. La Salle rock is going to the No. 1 plant of the Lake Milling Co. at Point Mills. It is figured that before June, 1917, Ahmeek will require the entire eight heads for her own rock.

¹(2) Production.—Announced Feb. 19, 1917, that this company in January produced 861,413 lbs. of copper.

—Mar.

¹(1) Production, February, 1917.—Announced March 16, 1917, that this company in February produced 742,250 pounds of copper, compared with 861,413 in January, 1917.

¹(2) Report Year Ended Dec. 31, shows mining profits of \$1,524,510, or \$15.32 a share, compared with \$9.29 in the previous year. Production was 10,219,290 pounds of refined copper, compared with 10,043,459 in 1915 and 8,068,648 in 1914.

—Apr.

¹(1) Production, March, 1917.—This company, April 18, 1917, reported March production as 790,724 lbs. of copper, compared with 742,250 the previous month.

ALLOYS FOUNDRY CO., WARWICK, OHIO.

¹(1) Change in Control.—See Swastika Flexible Metals Co.—Item No. 2.

ALL SEASON BODY CO.

¹(1) New Company.—It was announced Feb. 17, 1917, that this company, capital \$500,000, had been organized by Jackson, Mich., men. They are John A. McAvoy, Ralph Trese, F. Bothwell and Mansell Hackett.

The company has taken over the Page Bros. Buggy Co., of Marshall, Mich. It will manufacture detachable auto tops, enclosed bodies, limousine bodies, etc., and deal in the sale of automobile parts.

—Mar.

¹(1) Order.—See Briscoe Motor Car Co.—Item No. 1.

ALPHA CHEMICAL WORKS, INC.

¹(1) Incorporated on April 3, 1917, in Delaware, with a capital of \$1,000,000, to manufacture and deal in drugs, chemicals, etc. Incorporators: A. W. Britton, S. B. Howard and L. H. Gunther, all of New York City.

ALTON GAS & ELECTRIC CO., CHICAGO.

¹(1) Capital Increased.—On Jan. 10, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$350,000 to \$575,000.

ALUMINUM GOODS MANUFACTURING CO., NEWARK, N. J.

¹(1) New Factory.—Stated on March 29, 1917, that this company had awarded contract to Lockwood, Green & Co., Chicago, Ill., for a six-story reinforced concrete factory building, 63x350 feet, estimated to cost \$250,000.

ALVARADO MINING & MILLING CO.

¹(1) Resumption in August Planned.—The "Boston Financial News" April 18, 1917, stated that this company planned to resume operations in August, 1917. On account of the interruption to operations in November, 1916, with the consequent destruction of operating data, the usual annual report, covering operations in 1916, will not be issued. In order to fund the floating debt the di-

JANUARY 1 TO APRIL 30, 1917

rectors have decided to borrow \$350,000 for three years at 6% interest, 6% coupon bullion notes being offered the stockholders at 147.

The company recently acquired \$350,000 of the capital stock of the American Engineering & Operating Co.

AMALGAMATED FILM DISTRIBUTION, INC.

*(1) Incorporated on Feb. 28, 1917, in Delaware, with a capital of \$3,000,000, to feature films and manufacture machinery and all apparatus pertaining to photographs. Incorporators: Emanuelle Trotta, Angela Youzolino and Majorie K. Jobock, all of Brooklyn, N. Y.

AMALGAMATED PHOSPHATE CO.

*(1) Sold.—See American Cyanamid Co. Item No. 1.

AMARGOSA COPPER CO., SPOKANE, WASH.

*(1) Incorporated on Feb. 6, 1917, in Washington, with a capital of \$1,000,000. Incorporators: C. D. Nuxen, G. A. Henkel and A. M. P. Spalding.

AMBRO MINING CORP.

*(1) Incorporated on Jan. 12, 1917, in Delaware, with a capital of \$1,000,000, to do a general mining business in all its branches. Incorporators: W. F. O'Keefe, Geo. G. Steigler and E. E. Wright, Wilmington, Del.

AMERICAN AGRICULTURAL CHEMICAL CO.

*(1) Development by Controlled Co.—See American Phosphate Mining Co.—Item No. 1.

—Apr.

*(1) Forecast of Earnings.—On April 10, 1917, the "Wall Street Journal" said that unless car shortage proves more of an impediment than now seems probable, American Agricultural, and for that matter all fertilizer companies, will do an immense business this Spring in sales of complete fertilizers.

It is a little early as yet to get a close line on what American Agricultural will earn for its fiscal year to June 30, next. In the 1916 year profits for the \$18,430,900 common reached the previously undreamed-of total of 20.50%. These profits were stimulated to the extent of perhaps 4% by special earnings incidental to war demand for certain chemicals. These earnings cannot be counted upon for the current fiscal year. This means that if the company is to earn 20% on its common in 1917 it must make up about 4% from straight fertilizer profits.

There is a fair chance of doing this. In any event, if profits do not quite reach the 1916 high water mark, they should not fall more than 2% or 3% behind. American Agricultural common is steadily passing into investment hands and is taking its place among the standard industrial common stocks to which New England and Boston capital have an increasing affinity.

AMERICAN ARCH CO., NEW YORK.

*(1) Capital Stock Increased.—On March 29, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$3,000,000 to \$5,000,000.

AMERICAN AUTOMATIC ORDNANCE CO., CHICAGO, ILL.

*(1) Incorporated on April 19, 1917, in Delaware, with a capital of \$250,000, to manufacture shell cases and other machine products. Incorporators: C. R. Cole, Chicago, Ill.; K. S. Wilson and Marion Luce, Oak Park, Ill.

AMERICAN AUTOPHONE CO.

*(1) Incorporated on March 8, 1917, in Delaware, with a capital of \$1,000,000, to manufacture machines for receiving and transmitting telephonic and telegraphic communication. Incorporators: Samuel B. Howard, Harry B. Davis and Arthur W. Britton, all of New York.

AMERICAN BALSA CORP.

*(1) Incorporated on Feb. 28, 1917, in New York, with a capital of 2,500 shares of \$100 each, 5,000 shares of no par value; to carry on business with \$275,000; balsa and other woods, insulation, refrigeration, wharves, drydocks, lighters, warehouses, elevators and terminal facilities. Incorporators: J. A. Bennett, S. E. Miller and A. P. Lundin, 305 Vernon Ave., Queens, N. Y.

AMERICAN BANK NOTE CO.

*(1) Increased Dividend on Common.—Announced Jan. 17, 1917, that this company had declared a quarterly dividend of 1½% on the common stock, payable Feb. 15 to stock of record Feb. 1. This is an increase of one-half of 1% over the previous rate and places the stock on a 6% per annum basis.

—Mar.

*(1) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net profits	\$929,167	\$959,693
Bal. after chgs. and pfd. divs.	655,268	515,015
Com. divs.	179,828	89,914
Special	138,203	
Pension fund	40,000	40,000
Surplus	397,237	385,101
Deductions	\$200,000	
Surplus	197,237	385,101

†After allowing \$146,383 for depreciation.

†Special compensation for the year distributable under profit-sharing plan. †Amount applied to reduction of the book value of real estate in the Borough of Manhattan, N. Y., formerly occupied by the company's plant, and now held for sale.

*(2) Earnings on Stock.—It was stated Feb. 28, 1917, that this company's 1916 balance after pfd. dividends of \$655,268 is equal to \$7.28 a share on 89,917 shares of common stock, compared with \$5.72 a share on the same amount in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,585,511, compared with \$1,200,000 Dec. 31, 1915.

*(4) Comment on 1916 Report.—On March 3, 1917, the "Wall Street Journal" said that the annual report of this company showed the largest earnings for any year in its history. Total income, after allowing \$146,383 for depreciation, was \$976,135, compared with \$890,464 in 1915, which was the previous record year. After interest charges there remained \$925,007, or about 3¼ times the dividend requirements on the \$4,495,650 pfd. Balance for common stock was \$655,268, equivalent to \$7.28 a share on the 89,914 shares of common stock outstanding, compared with \$5.72 a share in 1915.

There are two features of the annual report of particular interest to stockholders. The first is Pres. Green's statement to the effect that the orders on the books at the beginning of 1917 were the largest in the history of the company, and that the company's business in 1916 was put on a more stable foundation. His remarks in this latter respect were:

"Our business, depending largely as it does upon financial conditions, fluctuates from month to month and is difficult to handle from a manufacturing point of view. This has been, in a measure, equalized because of our world-wide connections, and now, through the successful completion of our plans in the Far East looking toward a continuity of work, covered by long-time contracts, we feel this much-desired steadiness in manufacturing conditions will be improved."

These remarks undoubtedly refer to the company's contract for supplying the Chinese Government with paper money over a period of years. This permanent piece of business, requiring monthly deliveries, is a big aid to economies in plant operations. Similar contracts from South American and other countries have also been received.

The second feature is the fact that the company's floating debt, in the form of 5% notes, was reduced to \$200,-

000 by paying off \$400,000 of the notes during 1916. This was apparently done with but slight impairment to cash which is placed at \$645,484, compared with \$682,616 in 1915. Floating debt was reduced from \$1,050,000 in 1914 to \$800,000 in 1915 and to \$200,000 in 1916. These remaining notes will undoubtedly be paid off during the current year, leaving the company free from floating debt.

Another development of interest to the common stockholders is that while the company was clearing up its floating debt the dividend on the junior shares was increased from 2% per annum in 1915 to 4% in 1916 and to 6% in the first quarter of the current year.

In addition to the employees' pension fund, the company has inaugurated a profit-sharing plan for its employees.

*(5) Directors Re-elected.—It was announced March 6, 1917, that at this company's annual meeting retiring directors and officers were re-elected.

*(6) Dividend.—It was stated that at their annual meeting the directors of this company had declared the regular quarterly dividend of 1½% on the pfd. stock, payable April 1 to stock of record March 15.

AMERICAN BEET SUGAR CO.

*(1) Extra and Increased Dividends on Common.—It was announced Feb. 2, 1917, that this company had declared an extra dividend of \$12 a share on the common and had increased the regular dividend from \$6 to \$8 a share on this stock. The regular quarterly dividend of \$1.50 on the pfd. was also declared, payable April 2 to stock of record March 17.

The extra \$12 cash dividend is payable on March 1 to stock of record Feb. 17. The regular dividend is payable in quarterly instalments of \$2 each as follows: On April 30 to stock of record April 14; on July 31 to stock of record July 14; on Oct. 31 to stock of record Oct. 13; and on Jan. 13, 1918, to stock of record Jan. 13, 1918.

*(2) Comment on Dividends.—On Feb. 5, 1917, the "Boston News Bureau" said that the \$12 extra cash dividend which this company's directors had the courage to declare in the face of international complications had come somewhat unexpectedly. It was significant that the dividend was in cash.

This expresses the conservative feeling of directors that \$15,000,000 common stock is about the maximum that the property should stand. It is also a reminder of the great strength of treasury position.

American Beet Sugar's fiscal year does not end until March 31 and it still has millions of pounds of sugar to sell. At the same time the crop has been made, its size is definitely known and the only gamble about the actual earnings for the ensuing two months is the possible decline which German troubles may create in sugar prices.

American Beet Sugar in its 1916 crop season is understood to have produced better than 180,000,000 pounds of sugar. With the carry-over from the previous year it has had for sale about 210,000,000 pounds of sugar. Its manufacturing costs are pretty definitely established and on a selling price averaging 6½ cents it is estimated that the March 31 year will show profits of \$35 per share.

This \$12 cash extra will call for a \$1,800,000 disbursement which the company can safely spare, as even with this payment net working capital will be better than \$5,500,000 by March 31, 1917, against \$4,700,000 on March 31, 1916.

This \$12 payment is within ¼% of what the company had distributed from the time of its organization in 1899 up to the beginning of the 1916-17 fiscal year.

The increase in the regular rate to 8% can be expected to continue while sugar prices rule at anything like their present levels. After the war if Cuba raws go to two cents per pound or less, a corresponding drop will inevitably occur in American Beet Sugar's selling prices and its profits.

JANUARY 1 TO APRIL 30, 1917

In such a contingency the 8% dividend could not be earned and probably for that matter the 6% rate formerly prevailing would be difficult to continue.

—Apr.

*(1) **Profits, Year Ended March 31, 1917.** Estimated.—On April 2, 1917, the "Boston News Bureau" said that this company ended its fiscal year March 31, 1917, with gross and net profits for the 12 months exceeding all previous records.

Total net profits come within a few thousand of the \$5,000,000 mark, which, after deduction of the 8% dividend on the \$5,000,000 pfd., would leave better than \$30 per share for the \$15,000,000 common.

The extraordinary proportions of these earnings for the common stock are partly attested when it is stated that the 1916-17 year's balance for the common are at least 4% more than was earned in the entire previous four fiscal years. In the 10 years from 1907 through March 31, 1916, the company earned 61% for its common. The 1916-17 balance is fully half of this amount.

When American Beet Sugar was formed the common was entirely "water." At the end of the 1916 year the actual assets for the common, after allowing par for the pfd., were equal to about \$33 per share. This amount will have been increased by the end of the current fiscal period to better than \$50 per share, even after allowing for the distribution of \$18 in dividends, of which \$12 was the cash extra paid on March 1.

American Beet Sugar and the other beet companies should have a good year in 1917. The general belief is that high prices for sugar are assured for all of 1917.

*(2) **Modification of Rate Order Denied.**

—The Interstate Commerce Commission April 26, 1917, denied the application of this company for a modification of its order declaring that the rate of 85 cents per hundred on sugar from California to Texas common points was reasonable.

AMERICAN BLAUGAS CORP.

*(1) **Organized to Take Over Other Companies.**—Announcement was made April 20, 1917, at the offices of Robinson & Co., 26 Exchange Place, New York, of the incorporation in New York of this company, to succeed the Blaugas Co. of America, and to take over the Atlantic Blaugas Co., Long Island City, and the Eastern Blaugas Co., Portland, Me. The new company owns all the patents formerly held by the Blaugas Co. of America. Charles H. Tenney & Co., Boston, have agreed to manage the new company. The blaugas gas is used for household and industrial purposes.

The executive offices of the company are at 25 Madison Ave., New York. Officers are as follows: Pres., D. Edgar Manson, Brookline, Mass.; Vice-Pres., Palmer York, Boston; Sec'y and Treas., Arthur S. Beves, New York.

AMERICAN BOOK CO.

*(1) **Financial Statement.**—This company, incorporated under the laws of New York April 23, 1917, filed with the Massachusetts Secretary of State a statement of its financial condition, dated Jan. 1, 1917, which compares as follows:

	1917	1916
Assets—		
Real estate.....	\$589,018	\$594,150
Machinery.....	243,359	239,513
Merchandise.....	1,274,205	1,156,653
Cash and debts receivable.....	3,551,414	3,213,781
Copyrights, plates, etc.....	5,000,000	5,000,000
Total.....	\$10,657,997	\$10,204,103
Liabilities—		
Capital stock.....	5,000,000	5,000,000
Accts. payable.....	311,145	283,133
Funded debt.....	1,733,000	1,779,000
Surplus and reserves.....	3,613,852	3,141,969
Total.....	\$10,657,997	\$10,204,103

• AMERICAN BRAKE SHOE & FOUNDRY CO.

*(1) **Plant Ready for Government Work.**—On April 9, 1917, the "Wall Street Journal" said that having completed both its British shell orders, this company had indicated its readiness to put its plant at Mahwah at the disposal of the United States Government. If this offer is not accepted, it is likely that the plant will be again devoted to the manufacture of railroad equipment.

Both of its British contracts, for a total of 700,000 9.2-inch shells, were completed well within the limits set for delivery, or before December 31 for the first order, and March 31 for the second. The company was among the most successful shell producers, and profits from this source were large.

In the fiscal year ended Sept. 30, 1916, American Brake Shoe showed net profits equal to \$26.11 per share on its pfd. stock, after allowing for 7% on the common, against \$16.47 the previous year. (All profits above 7% on the common stock are applicable to the preferred.) It is yet early to estimate this year's profits. While shell earnings were large, and the company has been working to capacity on equipment business, the advancing costs of labor and material have tended to offset to some extent the high prices received. It is likely that the results for the year, however, will be not far from those of last year.

• AMERICAN BRASS CO.

*(1) **Extra Dividend.**—Announced Jan. 25, 1917, that this company had paid an extra dividend of 11% and the regular quarterly dividend of 1½%, both payable Feb. 15 to stock of record Jan. 31.

*(2) **Report, Year Ended Dec. 31, 1916,** shows:

	1916	1915
Net profit.....	\$10,991,669	\$6,128,454
Surp. attr. divs.....	7,241,060	4,178,454

*(3) **Earnings on Stock.**—It was stated Jan. 26, 1917, that this company's net profits of \$10,991,669 for 1916 were equal to \$72.66 per share on the 150,000 shares.

*(4) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$20,857,279, compared with \$13,645,610 Dec. 31, 1915.

*(5) **Comment on Annual Report.**—On Jan. 29, 1917, the "Boston News Bureau" said, in part: "It was to be expected that with the extraordinary demand for all kinds of brass during the past year—a substantial portion of it presumably for war purposes—the annual report of the American Brass Co., the largest single consumer of copper in this country, would make a sensational showing. It did.

"For the 12 months ended Dec. 31 the company reports net earnings of \$10,991,669, and this is after \$2,000,000 had been arbitrarily charged out for 'contingencies.'

"Including this \$2,000,000 as earnings, the profits for the year were equal to \$36 per share, or within \$14 per share of the par of the stock. It is needless to say that this record far surpasses anything that the company has ever before achieved. Notwithstanding earnings last year of almost \$11,000,000, however, the directors declared cash dividends of only 25%, or \$3,750,000.

"The question naturally arises, with the extraordinary growth in the profit and loss surplus, notwithstanding heavy charge-offs for permanent improvements (\$3,455,549 in 1916), how long it will be before another stock dividend is in order. The company has an authorized capital of \$20,000,000, of which at the present time only \$15,000,000 is outstanding.

"At the annual meeting in New York on Thursday, Messrs. Harris Whittemore, of Naugatuck, Conn., and Royall Victor, of New York, were added to the board, succeeding A. A. Cowles and John J. Sinclair, deceased."

—Apr.

*(1) **Extra Dividend of 11%.**—This company announced April 26, 1917, that it had declared the regular quarterly divi-

dend of 1½% and an extra dividend of 11%, both payable May 15 to stock of record April 30. Three months previously the same amount was declared.

AMERICAN BREWING CO., LTD.

*(1) **Incorporated** on Jan. 25, 1917, in Canada, with a capital of \$500,000, divided into 5,000 shares of \$100 each, to carry on the business of brewers and malsters in all its branches. Incorporators: Joseph Gustave Duquette, Napoleon Pepin, Aime Malo, Pierre Henri Forbes and Marie Anne Henault. Chief place of business, Montreal, Que.

AMERICAN BRIDGE CO.

*(1) **Business in 1916.**—It was announced Jan. 3, 1917, that this company, the fabricating subsidiary of the United States Steel Corp., contracted for business in 1916 aggregating about 700,000 tons. The largest volume of business was secured in the Pittsburgh territory, where sales are understood to have aggregated 300,000 tons, the largest annual business for this division in the history of the organization.

Orders taken in the Eastern territory were the smallest in several years, amounting to only 200,000 tons, of which nearly one-half was for subway construction. Under ordinary conditions, the orders taken by the Eastern division exceed the contracts booked in other territories by 100,000 to 200,000 tons.

—Feb.

*(1) **Contracts for Steel.**—See Ford Motor Co.—Item No. 2.

*(2) **New Work.**—It was announced Feb. 1, 1917, that this company would furnish 3,400 tons of fabricated steel for the structural shop to be built at the League Island Navy Yard, when the formal general contract is awarded by the Government to P. F. Bromley, of Washington, D. C., the lowest bidder.

—Apr.

*(1) **Government Contract.**—Announcement was made April 12, 1917, that the United States Navy Department had awarded contracts to this company for about 5,000 tons of structural steel for the building of a gun shop at Washington and for 3,300 tons of steel for machine and electrical shops at the League Island Navy Yard. Bids were submitted on these contracts prior to the arrangement made between Secretary Daniels and Pres. Farrell, of the United States Steel Corp., governing prices of structural steel to be required by the Navy Department.

To meet the Government's requirements for structural steel the American Bridge Co. is obliged to transfer some of the work already on its books, to the Western division. Probably a large tonnage designed for the elevated railroad extensions in New York will be rolled at Gary instead of at Ambridge and Pencoed. The transfer of this work will entail an additional cost of about \$1.20 per ton on the fabricated steel required for elevated railroad construction. The main cause for the increased cost is the railroad freight charges to and from the Western plant for the 1917 shipment under the agreement recently entered into for lower prices.

• AMERICAN CAN CO.

*(1) **Price Advance.**—It was announced Jan. 2, 1917, that this company had advanced prices of sanitary cans ranging between 19% and 22% over the price list announced in September, 1916. The new prices show advances of between 54% and 64% over the prices announced a year previously.

Four advances in prices were made in 1916, from the schedule effective Jan. 2, 1916. The fourth advance was made on Sept. 26, but on Dec. 12 the company withdrew its prices.

On hole and cap cans present prices are 21% to 25% above the prices announced in September and 57% to 74% above January, 1916, quotations. On solder hemmed caps prices have been

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

advanced 22% to 25% above last January.

Repeated advances in can prices over the past year are due largely to higher cost of tin plate, which is now selling almost double what it was a year previously.

(2) New Yearly Record in Earnings.—On Jan. 3, 1917, it was stated that earnings of this company for 1916 were placed, roundly, at \$10,000,000, making it the greatest year in the company's record. After allowing for interest and depreciation charges on the same basis as for the previous year, there would remain a balance of \$5,609,000, equivalent to 13.6%, for the \$41,233,300 common stock, after providing for the 7% dividend on the preferred.

In 1915 American Can earned \$6,533,800, or \$5.20 a share on the common. With 1916 earnings about \$3,500,000 greater the balance for the common was enlarged by about \$8.40 a share over the preceding year.

These earnings for 1916 will be made strictly from the regular lines of the company's business.

American Can is shipping shells regularly and it is probable that it will clear up its contracts in March. Consequently profits of the munitions branch of the business will be added to earnings for 1917.

It was expected that \$10,000,000 net would be received from the manufacture of shells. The company will make a profit on the enterprise, but not so much as was looked for.

Nearest approach of the 1916 level of earnings was in 1912, when earnings of \$7,522,932 were recorded. In that year the balance for the common stock was equivalent to 8.85%.

Back dividends accrued on the pfd. stock would require about \$3,607,000, or 8 7/8%. Had profits on the munitions contracts met expectations it is probable that this accumulation would have been paid off before this time, putting the common in line for dividends.

(3) Annual Meeting Feb. 6.—Announced Jan. 6, 1917, that the annual meeting of this company will be held Feb. 6. Books close Jan. 9 and reopen Feb. 7.

(4) Acquisition Reported.—See Canadian Car & Foundry Co., Ltd.—Item No. 9.

—Feb.

(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net earnings	\$11,091,048	\$6,533,806
Bal. aft. deprec., etc.	7,962,081	5,029,273
Surp. aft. pfd. divs.	5,076,650	2,142,942

(2) Earnings on Stock.—It was stated Feb. 5, 1917, that this company's 1916 surplus of \$5,076,650, after pfd. dividends, is equal to 12.31% on \$41,233,300 common stock, as compared with 5.2% earned on the same stock in 1915.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$11,112,231, compared with \$6,035,581 Dec. 31, 1915.

(4) Directors Re-elected.—Announced Feb. 6, 1917, that at the annual meeting of this company retiring directors were re-elected.

(5) Statement by President.—It was announced Feb. 6, 1917, that in his remarks to stockholders of this company Pres. F. S. Wheeler said, in part:

"Volume of business in usual lines exceeded all previous records. In the export department no profits have as yet been shown under the contracts mentioned in last year's report, but difficulties causing delays have been overcome. Under readjustments of contracts made in 1916, extensions of time of delivery were made without penalty, and liberal additional advance payments were received.

"Shipments in large volume began some months ago and are proceeding regularly. No rejections of importance have occurred. Present foreign contracts should be completed in the near future. Your management is confident

that substantial net profits will be realized from this business.

"The statement submitted herewith has been made up with the usual care and conservatism hitherto followed by your company. All merchandise has been inventoried at cost, or at present market value if less than cost, and all liabilities fully shown. Plants and equipment have been maintained and kept up to a condition of high efficiency. To keep pace with the growth of business, there was expended during the year \$3,191,484 for new construction and equipment.

"The past year was difficult from a manufacturing standpoint. Unusually large requirements of customers, combined with a short supply of materials and delays in transportation, made the conduct of the business more than usually arduous.

"Your officers are impressed with the need for conservatism at this time; present commercial conditions cannot be regarded as normal; readjustments may be necessary in the not far distant future, and the transaction of business on present high prices of materials requires considerably more working capital than heretofore.

"Contracts already made, and orders which may be reasonably expected, insure a large volume of business for 1917."

(6) Comment on Annual Report.—On Feb. 7, 1917, the "Wall Street Journal" said that with a balance, after a \$2,500,000 depreciation charge, of \$8,591,048 in the year ended Dec. 31, 1916, this company earned the interest charge on its debentures almost 14 times over, whereas in 1915, the best year to that time in the company's history, it earned its charges nearly nine times over.

By the operation of the sinking fund the company reduced its outstanding debentures in 1916 by \$526,000, bringing the amount so far retired by the sinking fund to \$1,614,000 and making the amount of debenture now outstanding \$12,386,000. Of the original debenture issue of \$14,000,000 the sinking fund will have retired by maturity approximately \$7,000,000.

Earnings were sufficient to satisfy accumulated dividends and leave better than 3% on the common.

It is not unreasonable to assume that 1917 will show for the Can Co., as is the promise with many other industrials, quite as large earnings as 1916, leaving profits on munitions contracts out of the question, in which event cancellation of the balance of unpaid pfd. dividends in 1917 should not be surprising.

Continuation of any such prosperity as that now being experienced by the Can Co. would then bring to the fore the question of payment of dividends on the common stock or redemption of the balance of debentures.

These are callable at 102 1/2% on any interest date on 60 days' notice. Their issuance coincided with the payment in 1913 of 24 1/4% on account of back dividends on the pfd., and it may seem proper to the management that these bonds should be retired before any distribution were made on the common.

The American Can debentures constitute the only funded debt of the company and the indenture bars the placing of any mortgage on the property.

Balance sheet as of Dec. 31, 1916, shows excess of current assets over current liabilities of \$17,059,000, constituting the working capital, compared with \$16,799,000 on Dec. 31, 1916.

—Apr.

(1) Russian Contract Adjustment.—It was stated April 2, 1917, that a further adjustment of the terms of payment and deliveries under the Russian shell contracts had been concluded. The companies principally affected are American Can, General Electric and International Steam Pump.

The new agreement was signed between the Russian representatives and the American Can Co. March 31. It is understood that the other companies have not actually signed, but all negotiations have reached the concluding

stage. The terms are similar in all instances.

The changes which have been made in the contracts will be of material benefit to the contracting companies, as it will release millions of dollars which they have tied up in shell parts and enable them to realize some of the expected profits from the orders.

Chief among the changes made in the contracts are an extension of the period for final deliveries four months, or from April 30 to Aug. 31, and an agreement on the part of the Russian Government to pay for all finished shell parts without waiting for the assembly of the completed shells.

Under the original contracts no payments were made until the shell was assembled and accepted. The companies concerned are understood practically to have completed the manufacture of the shell bodies and a large percentage of the cartridge cases, but difficulties in the manufacture of fuses prevented their getting payment for the work accomplished, and this tied up large sums in working capital.

It is estimated that the amount of working capital which will be freed is approximately \$9,000,000 in the case of General Electric and around \$5,000,000 in the case of American Can.

It is expected that, with the further time extension, the orders will be completed in full. The great difficulty encountered in the manufacture of aluminum fuses is being overcome. General Electric, which has had considerable trouble in this regard, having made substantial shipments of such fuses recently.

AMERICAN CAMEL CO.

(1) Dividend Resumed.—Announced Jan. 5, 1917, that this company had declared a dividend of 1%, payable Feb. 2 to stock of record Jan. 20. The last previous payment was 2%, Oct. 1, 1912.

AMERICAN CARBON & BATTERY CO., CHICAGO.

(1) Capital Increased.—On March 8, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$250,000 to \$600,000.

AMERICAN CAR & FOUNDRY CO.

(1) Yearly Earnings, Estimated.—It was stated Jan. 15, 1917, that this company in the fiscal year to end April 30, 1917, should show earnings of \$5,000,000 net on the \$30,000,000 common stock, or more than 16%.

Officials of the company say that the outlook for the rest of 1917 could hardly be better in the circumstances. The 9.2-inch shells will be finished in April. Thereafter car orders will keep the plants going at capacity into July, and after that right up to the end of 1917 in some departments.

American Car & Foundry Co. is justly proud of its record in connection with munition contracts. There has not been one shell rejection to date.

(2) Status.—It was stated Jan. 20, 1917, that this company's current fiscal year to end April 30 would easily outclass any former performance. The year's profits should include \$5,000,000 of net from munitions work. American Car has been a most successful shell producer. Its contracts for 8 and 9.2-inch shells have been coming through promptly on schedule time and percentage of rejections has been exceedingly slight.

This \$5,000,000 net represents the probable profit on some \$25,000,000 of shell orders for the Allies. In addition, the company is making 300,000 shells of 3-inch size for the United States Government, and on these there will be some profit, perhaps the equivalent of 2% on the common.

Altogether from allied work and this comparatively small United States Government order, the company seems in a fair way to include in the current year's profits net from munitions work equal to between 15% and 16% on the \$30,000,000 common stock.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

From equipment work the company will easily earn its 7% dividend on the \$30,000,000 pfd., and the regular 4% being distributed on the common. In other words, the current fiscal year may reasonably be expected to show that the net from munitions work has not been touched, and that it will largely be reflected in cash.

—Mar.

⁽¹⁾ Extra Dividend on Common.—Announced March 1, 1917, that this company had declared an extra dividend of 1% and a quarterly dividend of 1% on the common stock, in addition to the regular quarterly pfd. dividend of 1%. This is the same as three months previously. All dividends are payable April 2 to stock of record March 12.

⁽²⁾ New Orders.—See Union Tank Line.—Item No. 1.

⁽³⁾ Car Order Received.—See Chicago & North Western Ry.—Item No. 7.

⁽⁴⁾ Car Order Received.—See Atchison, Topeka & Santa Fe Ry.—Item No. 3.

—Apr.

⁽¹⁾ Equipment Orders.—See Reading Co.—Item No. 2.

⁽²⁾ Profits on Shells About \$4,500,000.—This company, said the "Boston News Bureau" April 10, 1917, is one whose munitions work has been eminently satisfactory to itself and to its clients. The company had a big contract for 8-inch and 9.2-inch shells from the Allies. This work, according to contract, was to be finished on April 1. The company filled the contract and had everything cleaned up and satisfactorily completed on March 31.

The fiscal year ends April 30 and all the munitions profits therefore will be included in the financial period to be concluded the last of April. It seems probable that munitions profits will run better than \$4,500,000, or \$15 or more on the \$30,000,000 common stock.

If the United States Government places further substantial shell orders for prompt execution it seems a reasonable supposition that American Car will be a recipient.

⁽³⁾ Order for 800 Refrigerator Cars.—See Atchison, Topeka & Santa Fe Ry. Co.—Item No. 2.

AMERICAN CASE & REGISTER CO.

⁽¹⁾ Sale.—See Sterling Cord Tire Co.—Item No. 1.

AMERICAN CASH REGISTER CO.

⁽¹⁾ Incorporated on April 17, 1917, in Delaware, with a capital of \$1,730,000, to manufacture, sell and deal in and with cash registers, etc. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

AMERICAN CHAIN CO., INC.,

MANHATTAN, N. Y.

⁽¹⁾ Capital Increased.—On Dec. 30, 1916, the company filed notice at Albany, N. Y., of an increase in capital stock from \$4,000,000 to \$10,000,000.

⁽²⁾ To Build at Norfolk, Va.—It was announced Jan. 3, 1917, that this company had decided to build works at Norfolk, Va. A six-unit plant costing \$300,000 and employing 300 men will be equipped. Land suitable for a site has been obtained and special machinery costing \$150,000 has been ordered the equipment to include a testing machine with a capacity of 2,000,000 pounds.

The American Chain Co. is a \$4,000,000 corporation, and it is planning an increase to \$10,000,000.

—Apr.

⁽¹⁾ Site Purchased for Virginia Plant.—On April 26, 1917, "The Iron Age" stated that this company, Bridgeport, Conn., had purchased 35 acres of land and a like acreage of riparian rights at Norfolk, Va., at the site occupied by the Jamestown Exposition, at a reported price of \$130,000. The company has entered into an agreement with the Norfolk City Council to expend at least \$150,000 in plant construction, but it is

reported that the actual expenditure will amount to at least \$300,000, and may reach \$500,000.

The erection of the plant will be started immediately.

AMERICAN CHICLE CO.

⁽¹⁾ Acquisition.—See Sterling Gum Co.—Item No. 1.

—Apr.

⁽¹⁾ Income Account Year Ended Dec. 31, 1916.—Gross profits, \$727,527, against \$548,934 last year; net profits, after bond interest and depreciation, \$587,445, against \$413,769 last year; surplus after dividends, \$287,445, against a deficit of \$686,231 last year.

⁽²⁾ Balance Sheet, as of Dec. 31, 1916, showed profit and loss surplus of \$299,046 compared with \$130,409 last year.

⁽³⁾ Report, Year Ended Dec. 31, 1916, shows: Gross profits, \$727,527, against \$548,934 in 1915; net profits, \$587,445, contrasted with \$413,769 in 1916.

The balance sheet as of Dec. 31, 1916, shows cash, \$297,108; notes and accounts receivable, \$800,969; investments, \$1,389,494; notes and accounts payable, \$985,486; profit and loss surplus, \$299,046, and total assets and liabilities, \$14,706,089.

AMERICAN CIGAR CO.

⁽¹⁾ Earnings, 1916, Estimated.—It was stated Jan. 25, 1917, that this company did a business of approximately \$27,000,000 in 1916, an increase of approximately \$2,500,000 over 1915. Earnings were equal to about 13% for the \$10,000,000 American Cigar common stock, which is a slight increase over 1915. Of the \$10,000,000 American Cigar outstanding the American Tobacco Co. owns \$7,000,000.

In view of unfavorable labor conditions in the cigar trade in the year just closed, the showing of the American Cigar Co. cannot be considered other than as a remarkable one. The company is many millions of cigars behind in its orders.

Up to the end of June, 1916, business of the American Tobacco Co. was running about even with the same period of 1915. This means that the increase in gross, as shown above, was accomplished on business over the closing half of the year. Outlook for 1917 is for an even greater increase over 1916 than was shown in 1916 over 1915.

Since July 1, 1916, sales of the American Tobacco Co. proper have shown a minimum increase by months over 1915 of \$700,000. The gain in net during the same period is understood to have shown an average of at least \$200,000 a month.

—Feb.

⁽¹⁾ Earnings, 1916, Estimated.—See American Tobacco Co.—Item No. 1.

—Mar.

⁽¹⁾ Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net earnings....	\$1,987,285	\$1,850,406
Bal. after pfd. dividends	1,287,285	1,250,406
Surp. after com. dividends	662,308	650,406

⁽²⁾ Earnings on Stock.—It was stated March 6, 1917, that this company's 1916 balance after pfd. dividends of \$1,287,285 is equal to 12.67% on \$10,000,000 common stock, compared with 12.5% earned on the same stock in 1915.

⁽³⁾ Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$10,316,178, compared with \$9,853,870 Dec. 31, 1915.

⁽⁴⁾ Directors Re-elected.—It was stated March 6, 1917, that at the annual meeting of this company retiring directors were re-elected.

● AMERICAN CITIES CO.

⁽¹⁾ Petition Against Acquisition by Subsidiary Denied.—See Birmingham Ry., Light & Power Co.—Item No. 1.

—Mar.

⁽¹⁾ New Directors.—Announced March 6, 1917, that at the annual meeting of

stockholders of this company C. K. Beekman and H. J. Pritchard were elected directors to fill vacancies on the board.

⁽²⁾ Income Account, Year Ended Dec. 31, 1916, of constituent companies shows earnings as follows:

	1916	1915
Gross	\$15,484,361	\$14,145,442
Net	5,409,278	5,023,708
Surp. for divs....	1,689,019	1,366,510

⁽³⁾ Report, year ended Dec. 31, 1916 shown income account as follows:

	1916	1915
Gross	\$1,418,923	\$1,405,089
Op. exp. & taxes ..	224,502	227,259
Net after taxes....	1,165,996	1,177,830
Surp. after chgs. & pfd. divs....	21,591	61,225
Surp. at end of year	374,281	352,690

⁽⁴⁾ Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$374,281, compared with \$352,690, Dec. 31, 1915.

⁽⁵⁾ Comment on 1916 Report.—On March 9, 1917, the "Wall Street Journal" said that during the years the company retired \$2,500,000 of the eight-year 5-6% collateral trust bonds and by issuance of one-year 6% notes. Combined gross of subsidiary companies for 1916 increased \$1,318,919 and the operating expenses \$843,349, with an increase of \$153,061 in interest and deductions which made the increase in income applicable to dividends \$322,509. If the proportionate interest of the holding corporation in the undivided surplus earnings of the constituent companies were added to surplus earnings of the American Cities, the surplus of that company for the year would have amounted to \$282,768, instead of \$21,591, in 1916.

⁽⁶⁾ Income Account, Constituent Companies, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross earnings....	\$15,484,361	\$14,145,442
Net after taxes....	5,409,278	5,023,708

⁽¹⁾ Stock of Birmingham-Tidewater Ry. Acquired by Subsidiary.—See Birmingham, Ensley & Bessemer R. R.—Item No. 1.

AMERICAN CLAY MACHINERY CO., BUCYRUS, O.

⁽¹⁾ Capital Increased.—It was announced March 10, 1917, that this company had increased its capital stock from \$500,000 to \$1,500,000.

AMERICAN COAL & BY-PRODUCTS COKE CO.

⁽¹⁾ Coke Ovens for Manchurian Iron Developments.—On April 2, 1917, "The Iron Age" stated that this company, Chicago, had closed a contract for a battery of by-product coke ovens of the Roberts type to be installed in Manchuria in connection with a blast furnace, to be built for the South Manchuria Ry. Co. The plant will be near an iron mine in the An Shan Chan district and is to have an output of at least 150,000 tons per annum.

The South Manchuria Ry. Co. owns the Fushun coal mines, which will supply the ovens.

AMERICAN COAL CO.

⁽¹⁾ Extra Dividend.—Announced Feb. 13, 1917, that this company had declared the regular semi-annual dividend of 3% and an extra of 2%, both payable March 1 to stock of record Feb. 28. Books do not close.

AMERICAN COAL CO. OF ALLEGHENY COUNTY.

⁽¹⁾ Report, Year Ended Dec. 31, 1916, shows a gross income of \$993,155 from the sale of 680,543 tons of coal. The output showed a decline of 27,612 tons from the production the year before. Operating expenses amounting to \$720,825 were \$87,658 less than in 1915, and

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

the net income of \$272,330 was \$28,547 more than the preceding year produced. The balance for dividends after depreciation charges was \$187,471, equal to \$3.12 per share of stock.

AMERICAN CONCRETE PRODUCTS CO., BOSTON, MASS.

*(1) Incorporated in February, 1917, in Massachusetts, with a capital of \$500,000, to engage in engineering and contracting. Incorporators: F. K. Daggett, C. W. Rogers, A. L. Flanders, Lewis Flanders and G. H. Talbot.

AMERICAN CONVEYOR CORP.

*(1) Incorporated on Feb. 26, 1917, in New York, with a capital of \$250,000, to deal in conveyors, cranes, motors, engines and machines. Incorporators: A. W. Hester, Jr., B. W. Tucker and C. G. Armstrong, 149 Broadway, New York.

AMERICAN COTTON OIL CO.

*(1) New Director and First Vice-Pres.—It was announced April 4, 1917, that at a meeting of directors of this company Lyman N. Hine was elected a director to fill the vacancy caused by the death of Wm. Barbour. He also was elected a member of the executive committee and 1st Vice-Pres. He will continue as Treas.

AMERICAN CYANAMID CO.

*(1) Damaged by Fire.—It was announced Jan. 27, 1917, that this company's plant at Stamford, Ont., had been damaged by fire to the extent of several hundred thousand dollars.

—Feb.

*(1) Acquisition.—It was announced Feb. 21, 1917, that this company, New York, had bought the mines of the Amalgamated Phosphate Co. at Brewster, Polk County, Fla. The output will be used for manufacturing a new fertilizer material, which the American corporation will manufacture in the plant it recently completed on New York harbor.

The entire present output of the phosphate mines having already been sold for a period of years, the company is installing machinery and other equipment to double the output.

AMERICAN DISTRICT TELEGRAPH CO., NEW JERSEY.

*(1) Extra Dividend.—Announced that this company had declared a quarterly dividend of 1% and an extra of 1%, payable Jan. 29 to stock of record Jan. 15, 1917.

—Apr.

*(1) Report, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross revenues...	\$2,844,005	\$2,655,560
Net revenue.....	748,105	748,134
Surp. after divs.	180,331	236,811

*(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,578,937, compared with \$1,389,606 Dec. 31, 1915.

AMERICAN DISTRICT TELEGRAPH CO. OF NEW YORK.

AMERICAN EDUCATION PRESS, INC., MANHATTAN, N. Y.

*(1) Incorporated on April 25, 1917, in New York, with a capital of \$550,000, to engage in the business of editing, printing and publishing newspapers and books. Incorporators: F. G. Smith, P. Davis and E. W. Beattie, 15 Dey St., New York.

AMERICAN ELECTRIC SHARE CO.

*(1) Incorporated on April 14, 1917, in Delaware, with a capital of \$2,200,000, to deal in and with investments. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

AMERICAN ENGINEERING & OPERATING CO., PORTLAND, ME.

*(1) Incorporated in April, 1917, in Maine, with a capital of \$350,000, par \$1, to engage in a mining business. Pres. T. L. Croteau, Treas.; A. B. Farnham; Clerk, Jas. E. Manter, Portland, Me.

AMERICAN ENVELOPE CO., WEST CARROLLTON, O.

*(1) Capital Increased.—In January, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$400,000 to \$500,000.

AMERICAN EXPLORATION & TRANSPORTATION CO., PORTLAND, ME.

*(1) Incorporated in April, 1917, in Maine, with a capital of \$300,000, par \$100, to build and operate vessels, etc. Incorporators: Pres. T. L. Croteau; Treas., A. B. Farnham; Clerk, Jas. E. Manter, Portland.

AMERICAN EXPRESS CO.

*(1) Webb-Kenyon Liquor Law Upheld.—It was announced at Washington Jan. 8, 1917, that the constitutionality of the Webb-Kenyon liquor law, involved in two cases from Maryland and West Virginia, and in which these two States, the American Express Co. and the Western Indiana R. R. were made defendants, had been upheld in a majority opinion of the United States Supreme Court.

AMERICAN FOREIGN SECURITIES CO.

*(1) Stricken From List.—Announced Jan. 23, 1917, that the New York Stock Exchange had stricken from the list this company's temporary 3-year 5% collateral notes, due 1919.

*(2) Admitted to List.—Announced 28, 1917, that the New York Stock Exchange had admitted to the list this company's permanent 3-year collateral 5% notes, due 1919.

—Feb.

*(1) Initial Dividend.—Announced Feb. 6, 1917, that this company had declared a dividend of 5% from its earnings for the six months ended Feb. 1, payable Feb. 15 to stock of record Feb. 14.

*(2) Status.—It was stated Feb. 6, 1917, that the company was organized in 1916. It loaned \$100,000,000 to the Government of France, raising the money partly by the issuance of its own secured notes running for three years and partly by the sale of \$10,000,000 capital stock, which was subscribed and paid up by American interests. The collateral lodged with the company by the Government of France as security for the loan, part of which was subsequently re-hypothecated by the American Foreign Securities Co. as security for its notes, consisted in large part of obligations of neutral governments, some of the securities of the Suez Canal Co. and a considerable part of American securities.

AMERICAN GAS CO.

AMERICAN GAS & ELECTRIC CO.

*(1) New Operations.—It was announced Jan. 29, 1917, that this company, through a new subsidiary, the Ohio River Power Co., would begin Feb. 1, operation in Steubenville, East Liverpool, Toronto, Wellsville and Empire, Ohio, and Chester, W. Va. Leases, with ultimate purchase agreements, have been taken on the electric light and power properties of the East Liverpool Traction & Light Co. and the Steubenville & East Liverpool Ry. & Light Co., which now supply these communities.

All the new territory, which embraces a population of about 80,000, is north of Wheeling. The properties will be operated in two districts, the Steubenville and the East Liverpool.

Current for light and power will come from the new station at Windsor, W. Va., now almost ready for operation.

Reports from the subsidiary properties of American Gas & Electric Co. continue to tell of large gains in earnings.

—Feb.

*(1) Directors Re-elected.—Announced Feb. 21, 1917, that at the annual meeting of this company retiring directors were re-elected.

—Mar.

*(1) Merger Discussion.—See Lehigh Navigation Electric Co.—Item No. 2.

—Apr.

*(1) Subsidiaries Show Revenue Gains.—On April 14, 1917, the "Wall Street Journal" said gross revenue and new business of the subsidiaries of American Gas & Electric Co. continued to show large gains, but the steady increase in the ratio of operating expenses to net earnings was cutting down the net and surplus revenues of the operated properties. For February, 1917, February being one of the slowest months of the year for attaching new business, the combined estimated annual revenue from new business secured by the subsidiaries was \$92,432, with a guaranteed annual revenue of \$41,227.

The new customers added to lines of the operated properties was 1,778 and the new power business totaled 2,506

JANUARY 1 TO APRIL 30, 1917

horsepower. At Canton the United Alloy Steel Corp. largely increased its taking of current for power and at other plants satisfactory progress was made in securing new business.

The average increase in the ratio of operating expenses to gross revenues at all properties was 14.4%, the average increase in fixed charges was 14.7%, and the average increase in operating expenses was 56.7% over January, 1916.

⁽²⁾ Listed in Philadelphia.—On April 16, 1917, \$1,600 additional of this company's collateral trust bonds were placed on the regular list of the Philadelphia Stock Exchange.

AMERICAN GENERAL ELECTRIC

EDISON CORP.

ROTTERDAM, N. Y.

⁽¹⁾ Incorporated March 2, 1917, in New York, with a capital stock of \$250,000, to manufacture and sell incandescent lamps, apparatus, tools, supplies and machinery. Incorporators: S. C. Kimball, C. S. Maxwell and D. E. Peck, Schenectady, N. Y.

AMERICAN GLASS CASKET CO.

⁽¹⁾ Capital Increased.—In January, 1917, the company filed notice at Oklahoma City, Okla., of an increase in capital stock from \$150,000 to \$500,000.

AMERICAN GLUE CO.

⁽¹⁾ Status.—It was stated Jan. 31, 1917, that this company concluded on Dec. 31, 1916, one of the best years in its history.

In the 1915 year net earnings, before allowing for depreciation, were \$298,530, equivalent to 17.3% on the \$800,000 common stock after taking out pfd. dividends. It is expected that the year just closed will make a materially better showing.

In the 11 years since the present company was incorporated it has charged off to depreciation well over \$1,000,000, which is equivalent to over 38% on its total outstanding capital. In one 19 months' period it cleared off its entire "good-will" carried on its balance sheet at \$700,000, leaving only a nominal valuation of \$1 for this item.

Materials used by American Glue in its products have shown substantial advances, but its wares are selling for very much higher prices than before the war and there is a great demand for all lines of its products.

The American Glue Co. is a large manufacturer of sandpaper and emery paper. For these products there has been a great demand because of the activity in the metal and wood-working industries. Sandpaper has advanced fully 65% in price.

⁽²⁾ Earnings, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net	\$714,887	\$298,530
Surp. after chgs. and divs.	456,887	40,530

⁽³⁾ Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,047,131, compared with \$590,244 Dec. 31, 1915.

⁽⁴⁾ Comment on Yearly Earnings.—On Feb. 17, 1917, the "Boston News Bureau" said that earnings of this company far surpassed those of any previous year in its history. Net profits of \$714,886 contrasted with \$298,530 in 1915, representing an increase of \$416,356, or 139%.

Applied to American Glue's small capitalization, these profits figure out over \$60 per share on the \$800,000 common stock, after taking out the 8% dividend on the \$2,000,000 pfd. This, however, is before allowing for \$500,000 charged off for depreciation on real estate and machinery. These remarkable share earnings for the common have naturally led to the belief in some

quarters that an "extra" might be forthcoming for common stockholders. Indeed, such a course would be fully warranted, but extreme conservatism has always characterized the management.

The company has pursued in its last report its usual policy of secrecy. The information vouchsafed is exceedingly meager. The stockholder has to be content with such general statements as "conditions have been somewhat abnormal during the year," and "your management is hopeful of satisfactory results for 1917."

It would be more illuminating were it stated that glues, which just before the war were 9 to 9½ cents a pound, are now 18 to 19 cents, an increase of fully 100%, and those which sold for 12 to 15 cents are now 30 to 40 cents. Sandpaper has advanced over 65% in price. It must, however, be borne in mind that raw materials have advanced almost correspondingly. Extraordinary demand for its products was primarily what lifted earnings of the company to record levels.

American Glue has always been very liberal in the matter of charges for depreciation. In no year, with the exception of 1911, has it failed to make substantial write-offs, and in 1912 it compensated for the omission to do so in the previous year. In 1916 it charged off \$50,000 for depreciation on real estate and machinery, the same as in 1915.

—Apr.

⁽¹⁾ Extra Dividend on Common.—Announced April 13, 1917, that this company had declared the regular semi-annual dividend of \$3 a share and an extra of \$2 a share on the common stock, both payable May 1 to stock of record April 23.

⁽²⁾ Capital Increase as Stock Dividend.—On April 19, 1917, the "Boston News Bureau" said: "Stockholders and directors of American Glue Co. have authorized increase in common capital stock of \$200,000, to be distributed May 3, as a common stock dividend to common stockholders of record April 23, each common stockholder receiving right to one-fourth of an additional share to each common share held by him."

AMERICAN GRAPHOPHONE CO.

⁽¹⁾ Change in Control.—It was stated March 18, 1917, that control of this company had passed to interests connected with E. I. duPont deNemours & Co. Evidence of this was shown by the election of Frank S. Whitten, Vice-Pres. of Laird & Co., to the presidency of the company. The election took place at a special meeting of the Board of Directors. Philip T. Dodge, the former Pres., resigning to become chairman of the Board of Directors.

⁽²⁾ Stock Issue—Stockholders' Rights.—It was stated March 18, 1917, that to take care of the required expansion in production and to supply additional working capital directors of this company had decided to issue \$2,563,895 in new common stock and offer it at par, \$100 a share, to both common and pfd. stockholders, on the basis of one share of new common for every two shares of common or pfd. now owned. Stockholders of record March 24 have the right to subscribe, payments to be made 20% on or before April 4, and the remainder on or before April 15.

⁽³⁾ Syndicate.—It was stated March 18, 1917, that a syndicate headed by Laird & Co., of Wilmington, Del.; Clothier & Tyler and Bertron, Griscam & Co., of New York, and Bloren & Co., of Philadelphia, had been formed to underwrite the offering of this company's issue of \$2,563,895 common stock.

⁽⁴⁾ Report, Year Ended Dec. 31, 1916, shows gross business amounting to more than \$15,000,000, an increase of about 57% over 1915. Net earnings in 1916, after interest charges, were \$1,903,599, equivalent to \$37.12 a share on all the common and pfd. stocks outstanding.

The surplus, after general inventory reserve and reserve on account of notes receivable, was \$1,703,599. Net working capital at the end of 1916 was \$4,133,433, compared with \$1,548,883 at the beginning of the year. The biggest improvement in current assets are cash of \$604,011, compared with \$397,674; raw material, \$1,435,496, compared with \$354,689; accounts and notes receivable \$3,516,812, compared with \$2,495,268; and finished goods and goods in progress \$4,104,244, compared with \$1,575,488. Current liabilities, composed of bills payable, increased from \$1,447,178 to \$3,139,235. The company reduced the book value of its patents, franchises, good-will, etc., by \$500,000 to \$1,000,000, and increased the value of plants \$3,023,683 to \$4,114,165. Surplus was increased from \$1,590,352 to \$2,047,147.

⁽⁵⁾ Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,047,147.

⁽⁶⁾ Stock Listed on New York Curb.—On March 28, 1917, the New York Curb Market Association listed 75,000 shares of common and 25,000 shares of pfd. stock of this company. Par value \$100.

AMERICAN-HAWAIIAN STEAMSHIP CO.

⁽¹⁾ Earnings for 1917, Estimated.—On Jan. 9, 1917, the "Boston News Bureau" said that this company's latest payment brought the 1916 dividends to \$250. The company is wholly a twentieth century proposition and its 21 boats of 212,000 capacity tonnage are therefore all modern vessels. They are all, moreover, of the best build and type for freight service.

Dividends were inaugurated in 1903 and maintained at 6% per annum until 1911. From 1912 to 1914 8% was paid, and in 1915, 10%. From the start a large part of earnings was put back into new boats and 5% of their cost written off each year. Those first built now stand at less than one-quarter their cost. There is no pfd. stock or bonds.

Of \$16,000,000 securities and money now in the treasury, over \$6,000,000 is understood to be cash. From charters running throughout 1917, earnings will be between \$20,000,000 and \$25,000,000. It is expected that during the year the company will pay at least \$400 per share in dividends, reserving the rest for new construction when shipbuilding gets back on a less expensive basis.

● AMERICAN HIDE & LEATHER CO.

⁽¹⁾ New Quarterly Earnings Record.—On Jan. 5, 1917, it was stated that this company in the quarter ended Dec. 31, 1916, made new high record in earnings, running more than 500% ahead of the previous quarter. Earnings show in excess of \$600,000 net for the quarter, against \$110,000 the previous quarter. The best previous quarter showed \$481,000.

October and November ran far ahead of any previous months, and if this rate of business continued in December the actual figures may be nearer \$800,000. Official figures will be issued Jan. 20, when directors meet. Question of increasing dividend on pfd. stock from 5% to 7% will be raised at the meeting. Some directors favor regular quarterly rate of 1%. In 1915 the company paid 5% in one payment.

There are about 110% accrued dividends on the pfd., and if prosperity continues there will be prospects of extra dividends to reduce that amount.

Leather stocks accumulated six months ago are now worth twice the purchase price. American Hide & Leather has on hand leather stocks which cost about \$9,300,000. It is said that these stocks are now worth \$18,600,000. Cash on hand amounts to at least \$1,000,000, so that liquid assets on this basis of computation equal about \$19,600,000. There are \$3,900,000 bonds outstanding, thus leaving a sum of \$15,700,000 applicable to the pfd. stock.

This is an asset value equivalent to about \$125 a share on the \$12,500,000 pfd.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

stock without counting the investments in plants and property. On the books the plants and property are carried at \$26,000,000.

¹(2) **Dividend Statement.**—On Jan. 19, 1917, the "Boston News Bureau" said: "The impression seems to have gained ground in certain speculative quarters that American Hide & Leather may be on the eve of placing its \$13,000,000 pfd. on a regular 7% basis, thus stopping the further accrual of dividends.

"The statement can be explicitly made that there is no thought of this kind in the minds of directors. More than that, any such radical step, if forced through the board, would be followed by the prompt resignation of the entire present management.

"The company did pay, in 1916, one dividend of 5%; but it was simply an isolated distribution and contained no promise for the future.

"American Hide is emphatically a peace stock. It is out of the war game, probably permanently; and as a domestic operator it must look for its market exclusively to American users of upper leather."

¹(3) **Report, Quarter Ended Dec. 31, 1916.** shows:

	1916	1915
Net earnings	\$1,235,337	\$846,466
Surp. after chgs.	1,069,962	481,091

¹(4) **Earnings on Stock.**—It was stated Jan. 23, 1917, that this company's surplus of \$1,069,962 for the quarter ended Dec. 31, 1917, is equal to 8.23% earned on \$13,000,000 pfd. stock, or at the rate of 32.92% annually.

¹(5) **Comment on Quarterly Report.**—On Jan. 24, 1917, the "Wall Street Journal" said this company in the quarter ended Dec. 31, 1916, earned \$1,069,962 for its \$13,000,000 pfd. stock, equivalent to 8.23% for the quarter, or at the annual rate of nearly 33%. This showing breaks all previous records. The best previous quarter was \$481,000, and the September quarter was only \$110,000. Hence the increase in net earnings over the September quarter was nearly 900%.

The income account shows that bonds in the hands of the public amount to \$3,640,000. This is a reduction of about \$200,000 in the last three months.

The unusual showing made by the American Hide & Leather Co. is credited to the improved domestic market in upper leathers and to the shortage of hides. Stocks of hide bought by this company in 1916, it is said, have doubled in value.

The company reported net current assets of \$12,118,427 and bonds in hands of public \$3,640,000.

—Mar.

¹(1) **Readjustment Plan.—Discussion.**—On March 12, 1917, the revival efforts to readjust the capitalization of this company came at an appropriate time, in that the leather business is in a state of unequalled prosperity.

In the quarter ended Sept. 30, 1916, the company earned only \$110,000 net after making provision for its heavy sinking fund. In the quarter ended Dec. 30, these earnings increased to \$1,100,000, an increase of 1,000%.

If an average is taken for the last two quarters of 1916 the American Hide & Leather Co. is earning at the annual rate of \$2,400,000 for its pfd. stock, equivalent to about \$20 a share on the \$12,250,000 pfd. stock. In conservative quarters the net earnings, after making provision for the sinking fund—this calls for about \$650,000 a year—are estimated at a minimum of \$1,200,000, or about \$10 a share on the pfd.

It is planned to issue \$20,000,000 new stock, all of one class. The \$12,250,000 pfd. is to take \$18,000,000 of this new stock and the present \$11,250,000 common is to take \$2,000,000 new stock. A new issue of debentures is to be substituted for the \$2,400,000 outstanding first mortgage bonds, thus releasing \$650,000 annually for the stock.

The estimated minimum of \$1,200,000 net earnings, under this plan, by adding the sum released by the cancellation of the sinking fund provision, would be approximately \$1,850,000. This

sum would be equivalent to approximately \$9 a share on the new stock issue.

If the new stock, paying \$5 or \$6 a year, were worth \$60 a share, it is figured, then the old pfd., which shares to the extent of about 150% in the distribution of new stock, should have a value of \$90 a share. The common stock, which would share to the extent of about 18% in the distribution, should be worth about \$11 a share.

Plans at this date are in a tentative stage. The most favorable factor in the situation is that the interests which were formally opposed to the plan originally furthered by the banking house of Swartwout & Appenzeller are in favor of the reorganization.

—Apr.

¹(1) **Report, Quarter Ended March 31, 1917.** shows earnings as follows:

	1917	1916
Net	\$501,330	\$556,030
Surp. after chgs.	335,955	390,655
9 mos. net	2,012,754	1,795,227
Surp. after chgs.	1,516,629	1,299,102

AMERICAN ICE CO.

¹(1) **Earnings, Approximate, Year Ended Oct. 31, 1916.**—Announced Jan. 9, 1917, that for the fiscal year ended Oct. 31, 1916, this company showed net after fixed charges of approximately \$750,000, as compared with \$526,000 in 1915.

¹(2) **Reorganization Plans.—Syndicate.**—Announcement was made Jan. 9, 1917, that this company had completed its reorganization plans. These call for the dissolution of the American Ice Securities Co., which will be succeeded by the American Ice Co., whose shares will be traded in under that name.

The American Ice Securities Co. owns all but 1/4 of 1% of the outstanding pfd. stock of the American Ice Co. It also has outstanding debentures to the amount of \$2,972,650, and other indebtedness. It is proposed to pay this off by selling 57,150 shares of pfd. stock from the treasury, after it has been divested of accumulated and cumulative features.

This stock will be offered to shareholders of the American Ice Securities Co. in proportion to their holdings (or about 30% of their holdings of Securities Co.'s stock) at \$66 a share, with a bonus of 40% in common stock.

A syndicate has been formed to take all the stock not taken by stockholders on the same terms as offered to the stockholders. This syndicate will receive a commission of 5% for its guarantee. Harris, Winthrop & Co. and C. D. Barney & Co. will act as syndicate managers.

After this plan has been carried out the Securities Co. will be dissolved and it will distribute the remaining assets to stockholders pro rata. Stockholders will receive 48% of present holdings in pfd. stock of the American Ice Co. and 25% in common stock of the American Ice Co. The net result will be the elimination of the Securities Co. and a saving of \$193,000 a year in interest charges on the debentures, taxes, expenses, etc. It also disposes of the necessity of meeting these bonds at maturity nine years hence.

The American Ice Co. will then take the place of the Securities Co. and will have as its outstanding capitalization \$15,000,000 of non-cumulative 6% pfd. stock and \$7,500,000 of common stock, which, incidentally, is the present outstanding capitalization of the company.

Earnings position, it is officially stated, justifies the immediate payment of dividends on the pfd. stock at the rate of 5%, with the probability that the full 6% will be paid later.

¹(3) **Meeting Jan. 22.**—Announced Jan. 11, 1917, that stockholders of this company would meet at Jersey City, N. J., Jan. 22, 1917, to consider reorganization plans.

¹(4) **Income, Year Ended Oct. 31, 1916.** compares as follows.

	1916	1915
Gross	\$9,172,962	\$8,639,984
Net	2,732,008	1,853,415
Surp. after chgs. & pfd. divs.	704,561	526,182

¹(5) **Balance Sheet, as of Oct. 31, 1916.** shows a profit and loss surplus of \$4,798,171, compared with \$4,284,018 Oct. 31, 1915.

¹(6) **Reorganization Plan Approved.**—Announced Jan. 22, 1917, that stockholders of this company at a special meeting approved the action of the directors in calling for reorganization with the issuance of new stock. The total new issue will be the same as that now outstanding and divided in the same amounts of pfd. and common.

The new pfd. will be non-cumulative.

—Feb.

¹(1) **Net Earnings, Two Months.**—It was stated Feb. 2, 1917, that net earnings of this company for November and December, first two months of the current fiscal year, increased \$109,000 over the same months a year previously. For fiscal year ended Oct. 31, 1916, American Ice Co. earned a net of \$750,000, equal to 5% on outstanding \$15,000,000 pfd.

¹(2) **Dividend Discussion.**—It was stated Feb. 2, 1917, that directors of this company early in February probably would declare an initial dividend of 5% on the new pfd. stock, payable in quarterly instalments, beginning in April.

¹(3) **Statement to Stockholders.**—On Feb. 5, 1917, Pres. W. M. Oler, of this company, issued a statement to the stockholders in which he said:

"In gauging the company's progress it must be traced from the time the company's machinery began to have a predominance over nature in the production of ice—which was in 1914. Success is now a question of economical production and distribution not influenced by the wide fluctuations incident to the earlier periods when it was a constant gamble on the weather. "In 1914 the company earned net \$408,866, after paying fixed charges. The following year net was \$526,182, a gain of 30%.

"In 1916 a gain of 90% over 1914 netted \$750,655. The 1916 year showed a gain of almost 43% over the previous twelve months."

—Mar.

¹(1) **Net Earnings, Three Months.**—It was stated March 17, 1917, that this company, in the first three months of the current fiscal year, November, December and January, increased \$122,000 over the corresponding period in the previous year.

In preliminary estimates at the time the reorganization plan was announced officials forecast a minimum net in the 1917 fiscal year of at least \$1,000,000, as compared with \$750,000 for the 12 months ended Oct. 31, 1916. The results for three months mean that half the difference between the 1916 net and the expected net for 1917 has been secured in the first quarter of the year.

The American Ice Co. should reap the real benefits of lower production costs in the heavy selling season, which starts in May.

¹(2) **Dividend Action Delayed.**—Owing to the absence of several of the directors from the meeting held in Jersey City, N. J., on March 27, 1917, it was decided to postpone the contemplated declaration of the initial dividend on the preferred stock. There was, however, no objection raised to this action being taken. A meeting will be held on April 3, when it is expected that a dividend of 1% will be declared.

¹(3) **Earnings Discussion.—Reorganization.**—On March 30, 1917, the "Boston News Bureau" said that net earnings of this company for the four and one-half months to mid-March showed a comparative increase of about \$225,000 over the same period of 1916.

It has been officially estimated that in the fiscal year to Oct. 31, 1917, American Ice would earn a balance above

JANUARY 1 TO APRIL 30, 1917

interest, taxes and betterments of \$1,000,000. This gain of \$225,000 has put the company in a position where if the remaining seven months only break even with last year the \$1,000,000 expectancy will probably be realized. It is now expected that directors of American Ice will start dividends on the \$15,000,000 preferred sometime during the next six weeks.

On April 1 the reorganization of American Ice, accompanied as it is by the dissolution of the American Ice Securities Co., will go into practical effect. Under this reorganization plan the owners of American Ice Securities stock, which is the security now traded in on the New York Exchange will receive 48% of their present holdings in preferred stock of the American Ice Co. and 25% in American Ice common. The preferred in this unscrambling process has been given an arbitrary value of 66, which seems conservative enough for a proposition which is promising to start quarterly dividends at the rate of 5% per annum within the next few weeks.

This would mean that the owner of 100 shares of American Ice Securities Co. would receive preferred and common stock (assuming a value of 10 for American Ice common) having a theoretical value of \$3,418, which is \$1,000 more than 100 shares of Securities stock is now commanding in the market. The reorganization wipes out the accumulated preferred dividend situation and will leave a corporation with \$15,000,000 preferred and \$7,500,000 common outstanding. It also cancels \$2,972,650 of Securities Co. 6% debentures.

—Apr.

*(1) Initial Dividend on Preferred.—Announced April 3, 1917, that this company had declared an initial quarterly dividend of 1 1/4% on the pfd. stock, payable April 25 to stock of record April 16.

*(2) Application Made to List in New York.—This company, on April 27, 1917, made application to the New York Stock Exchange to list \$15,000,000 of its 6% non-cumulative pfd. stock, and \$7,500,000 of its common stock.

● AMERICAN ICE SECURITIES CO.

*(1) To Be Dissolved.—See American Ice Co.—Item No. 1.

*(2) Special Meeting Jan. 19.—It was announced Jan. 10, 1917, that a special meeting of stockholders of this company had been called for Jan. 19 at 2 P. M. at the office of the company in Camden, N. J., for the purpose of ratifying the plan calling for the redemption of \$2,972,650 of 6% debentures and at the same time approve a plan to dissolve the company on a basis of exchange of stock for stock of the American Ice Co.

*(3) Bond Redemption.—Announced Jan. 19, 1917, that stockholders of this company at a special meeting approved the plan to redeem \$3,000,000 debentures on April 1. This is a step in the reorganization plan.

*(4) Bonds Called.—Announced Jan. 26, 1917, that this company had called for payment on March 31, at par, the entire outstanding amount of its debenture 6% bonds, due April 1, 1925.

*(5) Rights Admitted to Dealings.—Announced Jan. 29, 1917, that the New York Stock Exchange had admitted to dealings this company's rights.

—Mar.

*(1) Reorganization Discussion.—See American Ice Co.—Item No. 3.

—Apr.

*(1) Bonds Stricken from List and Called.—Announced April 12, 1917, that the New York Stock Exchange had stricken from the list and called for redemption this company's 6% 20-year debenture bonds, due 1925.

AMERICAN INTERNATIONAL CORP.
*(1) Bond Purchase.—See United States Rubber Co.—Item No. 4.

—Feb.

*(1) New Subsidiary.—It was announced Feb. 7, 1917, that a new sub-

sidary of this company had been formed to introduce American labor-saving machinery throughout the world. It is to be known as the Allied Construction Machine Corp. R. P. Tinsley is Pres. and S. T. Henry, Vice-Pres.

—Mar.

*(1) Meeting April 4.—It was stated March 9, 1917, that this company would hold its second annual meeting on April 4, on account of the change in its fiscal year. The stock transfer books will be closed from March 14 until that date. The meeting, it is anticipated, will be purely formal, as it follows closely upon the first annual meeting held in December, 1916, at which Pres. Stone presented his report upon the first year's business.

*(2) Officers on Industrial Alcohol Board.—See United States Industrial Alcohol Co.—Item No. 2.

—Apr.

*(1) Report, Year Ended Dec. 31, 1916, shows consolidated income account as follows: Earnings from operations, \$3,337,450; total income, \$3,839,877; net earnings, \$2,483,943; surplus after dividends, sundry adjustments and debit balance of Dec. 31, 1916, \$1,923,539.

*(2) Earnings on Stock.—It was stated April 3, 1917, that this company's 1916 net earnings of \$2,483,943 are equivalent to \$5 a share on 490,000 shares of common stock, after providing for pfd. dividends at the rate of \$3 a share on 10,000 shares of pfd. stock. Par value of common and pfd. stocks is \$100, but to that date only \$50 a share had been paid.

*(3) Directors Re-elected.—Announced April 4, 1917, that at the annual meeting of this company retiring directors were re-elected.

*(4) Comment on 1916 Report.—On April 5, 1917, the "Wall Street Journal" said: "Earnings reported by American International Corp. for 1916 of \$4.60 a share on its capital, or \$9.20 a share on the paid in capital, were for the most part obtained from what directors call its 'bread and butter' business, as the big ventures which the company looks to as the most important source of profits have hardly even been touched as yet."

"Most important of these is the contract for building railroads in China. This will involve probably over \$1,000,000 and should bring in a large return to the company financing the project. Then there are the smaller deals under negotiation of a somewhat similar character in various parts of the world; and, finally, there is the pending negotiation with Russia, also for railroad building, which, if concluded, may prove considerably larger even than that with China."

"The report shows that company as of Dec. 31 had current assets of \$7,134,848, against quick liabilities of \$5,405,141. Of these assets \$2,954,313 were in cash. Its investments in various securities amounted to \$23,226,558 and the book value of the stock, as shown by the balance sheet, was \$53.85 a share."

*(5) Comment on Earnings.—On April 6, 1917, the "Boston News Bureau" said that in its fiscal 12 months to Dec. 31 this company made an earning record with which officials expressed themselves as very well satisfied. The year 1916 was the first in the company's history and involved an immense amount of formative and pioneer work. Yet despite the handicap involved in getting started the new company was able to come through with net profits of \$2,483,877 and with a balance for dividends after deducting approximately \$1,350,000 for organization and parent company expenses of \$2,483,943. This is equivalent to a bit over \$5 per share on the 490,000 shares of common now outstanding.

As a matter of fact, this \$2,483,943 is equal to a trifle over 10% on the \$24,500,000 of common stock capital now in the business. The average capital which American International had outstanding last year was a few hundred thousand dollars less than \$10,000,000. On this average capital the balance for dividends was equal to 15.5%. This is the test which measures the actual performance of the company.

The \$2,483,943 net for dividends does not tell the entire story of what American International earned last year. As a holding corporation there were a number of subsidiaries and a number of investments which paid to the parent organization no return whatever. These investments earned substantial sums, but they were not divided. The inclusion of undivided profits would very materially have increased this income balance for dividends.

American International's profits last year came from interest and dividends on stocks owned, from profit on export orders, particularly an export order of large amount for steel rails to a certain foreign nation, from profit on sale of certain shares of stocks and from operations of the Allied Machinery Co. The Dec. 31 balance sheet will probably show investments in stock and bonds of slightly over \$23,000,000, and these figures, it is understood, are conservative valuations materially below current market prices.

*(6) New Officers.—Announced April 12, 1917, that R. P. Tinsley had been elected Vice-Pres. of this company and Cecil Page and Thomas W. Streeter had been elected, respectively, Secy. and Treas., to succeed Mr. Tinsley.

R. B. Sheridan, Pres. of the Allied Machinery Co., and Harris D. H. Connick, who was construction expert of the San Francisco Exposition, were also made Vice-Presidents. All other officers were re-elected.

*(7) Stock Increased by Controlled Co.—See Rosin & Turpentine Export Co.—Item No. 1.

AMERICAN IRON & STEEL MANUFACTURING CO.

*(1) Merger.—Announcement was made March 10, 1917, by the Girard Trust Co., Philadelphia, trustee, under the mortgage, that the merger of this company with the Penn-Mary Steel Company, a subsidiary of the Bethlehem Steel Corp., had been completed.

This deal temporarily was held up on account of the death of Howard C. Shirk, bank president and attorney, of Lebanon, Pa., who had charge of the final arrangements of the deal.

AMERICAN KARABULE CO., PORTLAND, ME.

*(1) Incorporated in January, 1917, in Delaware, with a capital of \$1,000,000, to raise, deal in, etc., all kinds of live stock, tan and prepare hides and pelts for market, etc. Pres., E. O. Hiller, Boston, Mass.

AMERICAN LA FRANCE FIRE ENGINE CO.

*(1) Report, year ended Dec. 31, 1916, shows:

	1916	1915
Net profits	\$353,570	\$269,132
Surp. aft. divs.	155,570	71,123

*(2) Balance Sheet, as of Dec. 31, 1916, shows cash in banks and on hand of \$186,755; accounts receivable \$1,390,271 and total assets and liabilities of \$5,781,849.

● AMERICAN LIGHT & TRACTION CO.

*(1) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$5,850,938	\$5,178,387
Net after taxes	5,648,027	5,021,768
Surp. after pfd. and cash and com. stk. divs.	1,190,260	902,302
Total surplus	12,051,599	10,861,339

*(2) Earnings in Stock.—It was stated Jan. 31, 1917, that the company earned 25.66% on the common stock outstanding at the close of 1916, compared with 24.62% in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$12,051,599, compared with \$10,861,339 Dec. 31, 1915.

—Feb.

*(4) Acquisition of Controlled Co. Planned by Milwaukee.—See Milwaukee Gas Light Co.—Item No. 1.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

—Apr.

¹(1) Dividends.—Announced April 3, 1917, that this company had declared the regular quarterly dividends of $1\frac{1}{4}\%$ on the pfd. and $2\frac{1}{2}\%$ in cash and $2\frac{1}{2}\%$ in common stock on the common, all payable May 1 to stock of record April 14.

AMERICAN LOCK-NUT CO., CHICAGO.

¹(1) Capital Increased.—On Jan. 9, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$200,000 to \$400,000.

• AMERICAN LOCOMOTIVE CO.

¹(1) New Orders.—Announced Jan. 11, 1917, that this company had received orders for forty 184-ton locomotives for the New York, New Haven & Hartford R. R.; twenty 160-ton and five 230-ton engines for the Northern Pacific, and 24 large Santa Fe type engines for the Southern Pacific.

¹(2) New Orders.—It was announced Jan. 15, 1917, that this company, which recently received an order for forty 184-ton engines for the New York, New Haven & Hartford R. R. Co., had received an additional order for 10 engines from the same company.

The company also closed orders for two consolidation engines for the Chicago, Terre Haute & Southeastern, one six wheeler for the Western Steel Car & Foundry Co. and one tank engine for the Robla Railway.

These orders bring the total number of locomotives placed with American Locomotive during the week of Jan. 7 to 103, nearly all large engines. Their aggregate cost may be estimated at \$5,000,000.

¹(3) Orders on Increased Scale.—On Jan. 17, 1917, the "Wall Street Journal" said that this company was piling up equipment business faster than it can turn it out, although production at all its plants devoted to the manufacture of engines was being rushed.

About three weeks previously American Locomotive had total contracts booked of over \$79,000,000, of which probably \$45,000,000 represented equipment orders. The company has a theoretical capacity of \$60,000,000 in locomotives a year, but as two of its larger plants are engaged exclusively in the manufacture of munitions, it is probable that an outside estimate of equipment capacity at present would be not over \$4,000,000 monthly. On this basis, production in the three weeks may be placed at \$3,000,000, exclusive of shell shipments.

In the same time American Locomotive has closed contracts for engines estimated to cost over \$5,000,000, so that equipment contracts on hand are probably around \$47,000,000.

Shell contracts on hand are probably not much changed. Reports of large orders placed with the Montreal plant are unconfirmed and it is likely that their total is much smaller than has been suggested. At the same time the company lost, through cancellation, a small part, under \$1,000,000, of its orders for shells of various sizes.

Earnings for the half year to Dec. 30 were somewhat smaller than estimated. Nevertheless earnings will be shown sufficient to pay both pfd. and common dividends for the entire fiscal year, pay all war taxes, and leave a substantial surplus, besides permitting all second half profits to be applied to the junior issue.

¹(4) Order for 30 Locomotives.—Announced Jan. 17, 1917, that the Buffalo, Rochester & Pittsburgh Ry. Co. had ordered 30 locomotives from this company.

¹(5) Statement, Six Months, Ended Dec. 31, 1916, made public Jan. 21, 1917, showed that the company earned for the period a gross income of \$37,863,594, a gain of \$23,464,735 over the same period of the previous year.

The period covered the first half of the current fiscal year. Operating and

administrative expenses and depreciation amounted to \$32,328,743, an increase of \$20,913,041. After paying interest on bonds of constituent companies and notes, and setting aside \$1,822,500 for United States and Canadian munition taxes, a profit of \$3,630,834 remained, which was \$803,094 larger than a year before.

The amount available for common stock dividends was \$2,755,834. If this level should be maintained throughout the fiscal year, profits applicable to the common stock would be slightly more than \$22 a share.

¹(6) Income Account, Six Months, Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$37,863,594	\$14,398,859
Net	5,536,851	2,985,157
Bal. after fixed chgs., reserve for munitions & other taxes.	3,630,834	2,827,740
Surp. after pfd. & com. divs....	2,130,834	1,952,740

¹(7) Unfilled Orders, as of Dec. 31, 1916, as shown in statement issued Jan. 21, 1917, totaled \$75,746,377.

¹(8) New Officers.—Announcement was made Jan. 21, 1917, that Columbus K. Lassiter, mechanical superintendent of this company, would succeed James McNaughton as Vice-Pres. in charge of manufacture on Feb. 1. Other appointments effective that date are James D. Sawyer, Vice-Pres. in charge of sales; Joseph Davis, Vice-Pres. and Comptroller, and Harry B. Hunt, Asst. Vice-Pres. in charge of manufacture.

¹(9) Order for Forty Locomotives.—Announced Jan. 22, 1917, that this company had received an order for 40 consolidated 80-ton locomotives from the Chemins de Fer Midi.

¹(10) Comment on Annual Report.—On Jan. 23, 1917, the "Wall Street Journal" said an analysis of this company's report for the half year ended Dec. 31, 1916, revealed that actual net earnings for the stock were much larger than the \$11.02 per share (at the annual rate of \$22.04) shown on the junior issue.

Charged against earnings for the half year is an item of \$1,822,500 under the head of "Reserve for United States munitions and income taxes and Canadian war taxes for the calendar year 1916." The creation of this reserve was made necessary by the retroactive munitions tax passed in the latter half of 1916, but the major portion of it is really a charge against earnings of the 1915-16 fiscal year.

American Locomotive completed its earlier war contracts about the first week in August, and most of its profits in the half year ended June 30, 1916, were from this source and were taxable, while more recent munitions contracts provided that the purchasing government was to bear the burden of any special tax imposed by the United States Government. Except for Canadian taxes for the half year and a comparatively small United States war tax accrued in July and August, the item of \$1,822,500 represented taxes against profits of the last fiscal year.

It is probable that war taxes of all kinds, properly chargeable to this year, were not more than \$500,000, on which basis the company's earnings for the common stock would be increased over \$5 a share, making earnings on the issue for the period at the rate of approximately \$33 per share a year.

Necessary reserves for war and other taxes naturally will be much smaller during the second half of the fiscal year, and if operating earnings continue at the same rate as in the previous six months, net for common should be around \$20 a share, making the final net for the year about \$31 a share.

There is every reason to hope that this will be much exceeded.

Another feature of the company's report that is worthy of notice is the fact that it completed business to a total of \$37,863,594 in the six months, and showed unfilled orders at the end of the Jan. 14 week of \$75,746,377. Allow-

ing for \$4,000,000 completed in the first three weeks of January, this makes the total of the company's business carried over from the 1916 year and taken during the current fiscal period over \$117,500,000.

American Locomotive began the fiscal year with about \$38,000,000 of business on its books, so that it must have taken orders since July 1 to a total of about \$79,000,000, or over 200% of capacity, as indicated by output for the first half.

On the outcome of the car situation more than anything else depend the financial results of its operations during the ensuing six months.

¹(11) Munitions Work.—It was stated Jan. 24, 1917, that the munitions work of this company is being confined entirely to the Richmond plant. This plant has been enlarged in order to concentrate production at that point. Considerable enlargement expense was absorbed in operating expenses in the half year to Dec. 31.

When munitions work started it was also handled at the Dunkirk works, but these have been entirely restored to locomotive building. This restoration work took six weeks, so that for a month and a half of the six months to Dec. 31 the Dunkirk plant was entirely shut down and non-productive. This is another explanation of the rather poor earning record in the half year to Dec. 31.

The Montreal plant of American Locomotive is crowded with war work and will be until the war ends. This plant probably will be turning out shells long after the Richmond plant is back on the locomotive work again.

The Montreal plant of American Locomotive is now the largest munitions works in Canada.

¹(12) Orders Booked Into 1918.—It was reported Jan. 25, 1917, that this company had orders for locomotives booked into 1918. Railroads, not only of the United States, but of Canada as well, need a large amount of new equipment, indicating a bright outlook for the domestic end of this company's business.

Of the \$75,000,000 unfilled orders on the books of this company on Jan. 1 there was represented in locomotive orders \$43,000,000, while unfilled munitions orders approximated \$32,000,000.

—Feb.

¹(1) New Order.—See Chicago & North Western Ry. Co.—Item No. 4.

¹(2) Operations.—It was stated Feb. 13, 1917, that although this company had been one of the most successful manufacturers of munitions for the Allies and is still engaged on orders for shells and shrapnel fuses, it is doubtful whether it would be given munitions orders for the United States in the event of this country taking part in the European war.

The company has large orders for locomotives for practically all the Entente Allies, whose need for locomotives surpasses that for shells. The company, therefore, plans to put its Richmond works, on the completion of running munition orders being finished there, back into its former equipment business, in order to expedite the delivery of the foreign equipment business.

The company, since the publication of its half-yearly report, has been receiving domestic orders for engines at the rate of about 300% of its equipment capacity. Its locomotive orders on hand aggregate over \$50,000,000, or practically a year's business, to which may be added close to \$30,000,000 of shells and fuse orders unfilled.

¹(3) Locomotive Orders.—It was announced Feb. 14, 1917, that this company had taken orders for twenty 138-ton and twenty 85-ton locomotives for the Illinois Central, eight 156-ton and eight 108-ton engines for the Elgin, Joliet & Eastern and one 97-ton engine for the Copper River & Northwestern.

—Mar.

¹(1) New Business.—On March 14, 1917, it was stated that this company at that date had orders for 600 engines for

JANUARY 1 TO APRIL 30, 1917

Europe on its books. These are for delivery up to April, 1918. The orders include 240 for French roads, 150 for Russia, 100 for Italy, 40 for Spain and 20 for Finland. Besides these, deliveries are being made on a British order for 100 small trench engines.

It is likely that the company may add substantially to its foreign orders soon, as one French road for which it is already building 100 engines is asking for from 50 to 100 more. Other Spanish roads, it is understood, are also in the market.

Domestic roads are also asking for new motive power equipment, but the company's books are filled so far ahead that it is impossible to consider new business except for distant deliveries.

Notwithstanding the railroad tie-up, earnings are believed to be running well ahead of 1916. American Locomotive will not complete its munitions contracts until May and it is considered the more conservative course to maintain working capital at a high level until these are off the books, at least.

American Locomotive has due on July 1 notes to the amount of \$1,336,000. These will be met from earnings.

(2) Order for Locomotives.—Announcement was made on March 26, 1917, that the Richmond, Fredericksburg & Potomac R. R. had ordered six 140-ton Pacific and two 86-ton switching engines from this company.

—Apr.

(1) Engine Orders.—Announced April 2, 1917, that this company had taken orders for fifty 121-ton Mikado engines for the Chicago North Western, and eight 97-ton Mallet engines for the South African Rys.

(2) New Orders Add \$2,500,000 to Business.—It was stated April 3, 1917, that orders for 58 engines reported placed with this company April 2 would add, at the current prices for motive power equipment, over \$2,500,000 to the total business on the company's books.

It is understood that these engines are for delivery in the first quarter of 1918, American Locomotive already being sold up throughout the year.

These orders, it is estimated, will bring the total value of 1918 delivery business booked to between \$3,000,000 and \$10,000,000. Out of a total of about 600 foreign engines contracted for about 200 are for delivery in 1918. The value of these may be estimated at over \$8,000,000.

(3) New Orders.—It was announced April 11, 1917, that this company had received an order from the Canadian Government for 30 Mikado type 141-ton, 10 Pacific 124-ton, and 10 Santa Fe 162-ton engines, also five 160-ton Mikado engines for the El Paso & Southwestern R. R. The total of the contracts is estimated at \$2,500,000.

(4) Quarterly Earnings, Estimated.—It was stated April 12, 1917, that in its March quarter this company's net profits felt the stimulus of big shell productions. It was not until the first part of January that the company really made progress with the production of the larger sized shells, for which orders were taken in August or September. These 8 and 9.2-inch shells were turned out in large volume in the March quarter.

The result was that the company is understood to have earned about 12% for its \$25,000,000 common during the three months to March 31, or more than the 11.02% earned in the entire six months to Dec. 31.

Shell work will extend over a goodly portion of the current quarter, with the result that the three months to June 30 should show a very handsome margin of earnings.

It is thought that for its entire fiscal year to June 30 American Locomotive will produce a balance for the common of between 30% and 35%.

Locomotive orders on hand mean practically capacity operations through June Fall. The company has on hand between \$5,000,000 and \$10,000,000 of locomotive orders for delivery in 1918.

(5) Orders Ahead of Output.—On April 14, 1917, the "Wall Street Journal" said that this company's new orders for locomotives since the beginning of 1917 had run considerably ahead of output. Business of all kinds on the books is about the same as it was in the middle of January, when \$75,746,377 booked orders were reported. This means that new motive power contracts have been sufficient not alone to offset locomotive output, but to make up for shells shipped or cancelled.

The business on the company's books represents all but a full year's operations at capacity, which may be estimated at \$80,000,000 a year.

Like many other manufacturing concerns, however, American Locomotive is handicapped by labor shortage, especially in regard to skilled men and labor, and other costs have mounted within the year.

(6) New Engine Order.—See Buffalo, Rochester & Pittsburgh Ry. Co.—Item No. 1.

AMERICAN MAGNESIUM CORP.

(1) New Plant.—It was stated on March 15, 1917, that this company, recently incorporated with a capital stock of 2,500 shares of \$100 par value and 10,000 shares no par value, to carry on business with \$600,000, had established a plant at Niagara Falls, N. Y., and is producing magnesium ingots. I. R. Edmonds is Pres.; E. S. Whitney and George O. Seward are Vice-Presidents, and D. Burgess, Sec'y and Treas.

AMERICAN MALT CORP.

(1) Readjustment Plan Operative.—Announcement was made Feb. 19, 1917, that the readjustment plan calling for the elimination of this company and the assumption of its activities by the American Malt Co. had been declared operative by the committee by virtue of the fact that the required assent by holders of more than 80% of the outstanding stock had been obtained.

The plan calls for the exchange of both the common and pfd. stocks of the American Malt Corp. for corresponding securities of the American Malt Co.

More than 91% of the pfd. stock of the malt corporation agreed to the exchange, or certificates representing \$7,897,500 out of a total of \$8,559,000; while \$3,600,300 of the common has also been deposited.

Deposits had been impeded because over \$1,000,000 par value of pfd. stock was held in Holland and Germany, while other shares are held by estates with the result that legal technicalities had to be overcome.

—Mar.

(1) Stock Deposits.—On March 1, 1917, the committee in charge of the plan for the exchange of American Malt Corp. securities announced that at the close of business Feb. 28 total deposits of both classes of stock amounted to 88½%. Over 96% of the pfd. stock has been deposited, leaving only 3,244 shares of this issue undeposited, a large part of which is held abroad.

Out of a total of 57,623 shares of common 44,296 shares have been deposited. The New York Stock Exchange has stricken the American Malt Corp. pfd. from the list.

(2) Stock Deposits.—See American Malt Co.—Item No. 1.

AMERICAN MALTING CO.

(1) Readjustment Plan Operative.—See American Malt Corp.—Item No. 1.

—Mar.

(1) Earnings, Five Months, Estimated.

—On March 20, 1917, it was stated that earnings of this company for the first five months of its current fiscal year, or from September to January, inclusive, were a little above the 4% dividend requirements on its \$8,559,000 1st pfd. stock for the full year.

Holders of the stock of the American Malt Corp. who have agreed to ex-

change their securities for those of the Malting Co. are to receive the new certificates the week of March 18. Nearly 98%, or 97.65% of the pfd. Malt stock has been deposited and of the remaining 2.35% the greater part is held in Europe, while a substantial part of the remainder is in estates or is held by persons who have been travelling.

(2) Stock Ready for Exchange.—It was announced March 24, 1917, that the reorganization department of the Guaranty Trust Co. was ready to deliver American Malting Co. common and pfd. stock in exchange for its certificates of deposit representing pfd. and common stock of the American Malt Corp.

(3) Application to List Stock.—On March 23, 1917, the New York Stock Exchange received application to list \$8,559,000 1st pfd. and \$5,762,300 of this company's common stock.

(4) Earnings Running Large.—On March 27, 1917, the "Wall Street Journal" said that earnings of this company were running at the rate of \$1,000,000 per annum. These are the largest earnings in the history of the company, being at the rate of about \$14 a share in the preferred stock.

The Malting company is now in the most prosperous condition in its history, having a working capital of approximately \$5,000,000. From interests in close touch with the company it is learned that the preferred stock will be placed on the regular basis of \$6 a year in June. At present, dividends are at the rate of \$4 a year.

Accumulated dividends on the preferred amount to 33% and in view of the heavy earnings and the enormous working capital it is expected that some action will be taken later in the year to wipe out a part if not all of these dividends.

The prosperity of the company is in no way due to the war as the company's business is buying barley and selling malt, the price of latter being governed by the price of the former. The improvement in earnings and financial condition is due to the operating economies which have been effected by the new management. An instance of this work can be cited. The company had three plants in New York which were operated at a loss of \$50,000 a year. When the new interests took charge they sold the plants and with the proceeds retired some of the company's bonds.

The company has also used some of its surplus funds to purchase approximately \$1,100,000 par value of its pfd. stock. The stock was bought in the open market at about \$40 a share, reducing the pre-outstanding preferred issue to \$7,459,000.

(5) New Director.—On March 28, 1917, A. E. Cortis was elected a director of this company.

—Apr.

(1) Dividend Discussion.—It was stated April 3, 1917, that the progress made in the affairs of this company had been such that the directors are formulating a plan for the clearing up of the 33% back dividends on the pfd. stock. It is the intention of the board to place this issue on its full 6% dividend basis in July, the present rate being 4%.

As a result of the economies which have been effected by the present management, net earnings in the current fiscal year, which ends in August, 1917, have been on a steady increase, and are expected for this period to total approximately \$1,000,000.

The company has a working capital of close to \$5,000,000, which is considered to be larger than is necessary for the volume of business done. The capacity is less than 11,000,000 bushels of malt per annum.

(2) Stock Would Have High Value in Case of Liquidation, States Director Cortis.—A. E. Cortis, director of the American Malting Co., asked regarding the report that in event of the enforcement by Congress of a law refusing grain to distilleries, liquidation of the

JANUARY 1 TO APRIL 30, 1917

American Malting Co. would result, with little value to the common stock, said April 23, 1917.

"It is misleading to say that if the American Malting Co. should liquidate the common stock would be of practically no value. It is true that the pfd. stock is entitled in liquidation to \$133 a share (including back dividends) before the common, and it is also true that the liquidating value of the pfd. is something less than \$133.

"However, in the event that liquidation should be decided on, the consent of the common stockholders would have to be obtained for immediate action, and holders of the pfd. stock (who are also large holders of the common) would be willing to allow substantial value to the common for this consent. An amicable agreement could be easily reached between the two classes of stockholders allowing a value to both stock issues greater than the highest price either has sold at in many years."

AMERICAN MANUFACTURING CO.

"(1) Stock and Extra Dividends.—It was announced Jan. 31, 1917, that the directors of this company had voted to common stockholders a dividend of 16%, or \$1,000,000 5% pfd. stock, and a stock dividend of 33 1/3%, or \$2,000,000 in new common stock. These stock dividends are payable April 15, 1917, to stock of record March 16, 1917.

The directors also declared a cash dividend of 5% on the pfd. and 6% on the common stock, payable quarterly during 1917 out of the surplus of Dec. 31, 1916, and also an extra cash dividend of \$2 on the common, payable April 1, 1917.

The directors also authorized the sale of \$1,000,000 new common stock to employ from time to time at not less than par upon terms such as may be fit.

"(2) Stockholders' Meeting Feb. 27.—It was announced Jan. 31, 1917, that the stockholders of this company at a meeting Feb. 27 would be asked to approve an increase in the authorized stock from \$6,000,000 common and \$4,000,000 pfd. to \$12,000,000 common and \$4,000,000 pfd.

AMERICAN METAL CAP CO., BROOKLYN, N. Y.

"(1) Capital Increased.—On April 17, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$500,000.

AMERICAN METAL CO.

"(1) Silver Purchased by Government.—On April 17, 1917, the United States Treasury Department ordered purchased from this company 100,000 ounces of silver at \$0.7410 per ounce, for delivery at Philadelphia.

AMERICAN MILLING CO.

"(1) Report, Year Ended Dec. 31, 1916, shows net profits of \$101,904. After paying a dividend of 6% on the \$938,804 capital stock the accumulated surplus stood at \$210,016. In 1915 the net earnings from all sources, after deducting \$20,644 for depreciation, were \$71,520.

"(2) Statement by President.—It was announced March 7, 1917, that Pres. H. G. Atwood, of this company, in his annual remarks to stockholders said: "In continuance of the policy of concentrating your company's business at Peoria, your Board of Directors has accepted the offer of Spencer Kellogg & Sons, Inc., and has sold to them the entire property of your company at Superior, Wis., for \$475,000.

"From the proceeds of this sale, all the outstanding bonds have been retired and the entire mortgage debt against your properties thus extinguished. The remainder of the proceeds will be available for such improvements and enlargements of your plant at Peoria as may become necessary, and in addition will provide ample working capital."

"(3) Listed in Philadelphia.—It was announced March 12, 1917, that an addi-

tional \$400 of this company's stock had been added to the regular list of the Philadelphia Stock Exchange.

—Apr.

"(1) Extra Dividend.—Announced April 5, 1917, that this company had declared an extra dividend of 5%, payable July 16 to stock of record June 30. Books close June 30 and reopen July 17.

AMERICAN MINING & DEVELOPMENT CO., LOS ANGELES, CAL.

"(1) Stock Issue for Mining Claims.—On April 10, 1917, this company was permitted by California Commissioner of Corporations H. L. Carnahan to issue 90,996 shares to Mrs. Georgia A. Earl, D. R. Jones, Charles Gaiser and Ben Dison, in exchange for mining claims near Coarsegold, Madera County, Cal., and to sell 20,000 shares at par, \$1 per share, to net the company not less than 80% of the selling price, the proceeds to be used for the purchase of additional machinery, the installation of electric power and further development work.

AMERICAN MOLASSES CO. OF NEW YORK.

"(1) Capital Increased.—On April 23, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$600,000 to \$3,500,000.

AMERICAN MOTORS CORP.

"(1) Stockholders' Meeting at Richmond, Va., May 1.—Notice has been issued for a meeting of stockholders of this company at Richmond, Va., May 1. The business to be transacted, according to the "Richmond Times-Dispatch" April 22, 1917, includes voting on action of the Board of Directors in increasing the capital stock to \$2,500,000.

AMERICAN MOTOR TRUCK CO.

"(1) Operations.—It was announced Feb. 9, 1917, that this company had completed plans to begin work on a plant in Detroit on the Michigan Central R. R. The company is incorporated under the laws of Maine and has a capital stock of \$600,000.

AMERICAN NATURAL GAS & OIL CORP.

"(1) Incorporated on March 13, 1917, in Delaware, with a capital of \$1,500,000, to produce oil and natural gas. Incorporators: Arthur W. Britton, Samuel B. Howard and Harry B. Davis, New York City.

AMERICAN NET & TWINE CO.

"(1) Work Started on New Mill.—An Anniston, Ala., dispatch to the "Boston Evening Transcript" April 17, 1917, stated that work had been started on a new building for this company to cost \$200,000.

AMERICAN NITROGEN PRODUCTS CO., SEATTLE, WASH.

"(1) Capital Increased.—On Jan. 27, 1917, the company filed notice at Olympia, Wash., of an increase in capital stock to \$1,250,000.

—Apr.

"(1) Plant in Operation.—Stated on April 10, 1917, that this company, financed by Norwegian capital, had begun the manufacture of nitrates from the air at its new plant at La Grande, near Tacoma, Wash. Three furnaces of 600 kilowatt capacity will run full blast 24 hours a day. Two carloads of nitrogen-sulphide will be turned out each week at the start.

AMERICAN ORE REDUCTION CO.

"(1) Incorporated on March 29, 1917, in Delaware, with a capital of \$5,000,000, to acquire and develop mineral lands and manufacture machinery for refining metals. Incorporators: Roger A. Pryor, Jr., Wm. L. Hullier, Guy R. Hayes, John C. O'Brien and Maj. J. T. Whelan, all of New York.

AMERICAN & PACIFIC OIL CO.

"(1) Incorporated on Jan. 24, 1917, in Delaware, with a capital of \$5,000,000,

to acquire by purchase or otherwise, deal in and with telegraph and telephone instruments, also to do a general oil business. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Harty, Wilmington, Del.

AMERICAN PHOSPHATE MINING CO.

"(1) Development.—It was announced March 22, 1917, that this company, Bloomingdale, Fla., controlled by American Agricultural Chemical Co., New York, had completed plans for phosphate developments in connection with \$1,000,000 phosphate terminals to be built near Tampa by the Export Ry. Co. and acid phosphate and fertilizer factory to be built near Tampa by American Agricultural Chemical Co.

AMERICAN PHOTO PLAYER CO.

"(1) Sale.—See American Photo Player. —Item No. 1.

AMERICAN PHOTO PLAYER, SAN FRANCISCO.

"(1) Acquisition—Stock Issue.—It was announced March 3, 1917, that this company had been permitted by California Commissioner of Corporations H. L. Carnahan to issue 15,000 shares of its common stock to the American Photo Player Co. in exchange for the property and assets of the latter company and to sell 5,000 shares of its pfd. stock at the aggregate par value of \$500,000, at par for cash, net to the company.

AMERICAN PIANO CO.

"(1) Sales, 1916, of this company amounted to \$5,200,000 compared with \$3,837,000 in 1915. Surplus increased \$232,354, or 7.34% on the common stock, on which no dividends are being paid.

—Apr.

"(1) Net Earnings, January and February, 1917, applicable to pfd. dividends were \$102,922, compared with \$55,499 for the same period in 1916. The sales for the first two months of 1917 were approximately \$1,200,000 against \$755,000 for the same period in the previous year.

AMERICAN PINE PRODUCTS CORP.

"(1) Incorporated on March 7, 1917, in Delaware, with a capital of \$1,000,000, to establish and conduct one or more stores. Incorporators: Guy V. Ferguson, S. F. Peaver, Jr., and Albert T. Ratcliff, all of New York.

AMERICAN PIPE & CONSTRUCTION CO.

"(1) Directors.—Announced Jan. 24, 1917, that at the annual meeting of this company the following directors were elected: William J. McClary, J. Ernest Richards, Erskine M. Smith, Richard Wetherill, James G. Leiper, E. Eldridge Pennock, George H. Bayard Hodge, Robert Wetherill, John C. Scott, Thomas J. Jeffries and William Roth.

"(2) Refinancing Plan.—It was reported Jan. 25, 1917, that A. Merritt Taylor had agreed to accept the presidency of this company, providing the stockholders would endorse the refinancing plan.

The plan is in part stated to be as follows: That the capital stock of \$5,000,000 be cut to \$2,500,000 and that pfd. stock be issued, the amount of which is yet to be determined by the Board of Directors.

After the directors have definitely agreed upon the proposed plan there will be called a special meeting of stockholders to be held in February for their approval.

AMERICAN PNEUMATIC SERVICE CO.

"(1) House Vote on Tube Systems.—It was announced Jan. 16, 1917, that the House of Representatives, by a vote of 193 to 153 retained in the Postal Appropriation bill the appropriation of \$1,661,000 for continuation of the postal tube systems in New York, Chicago, Philadelphia, Boston and St. Louis.

JANUARY 1 TO APRIL 30, 1917

Another fight on the item, to which the Postmaster-General is openly opposed, will take place when the bill reaches the Senate.

—Feb.

(1) Senate Votes to Retain Tubes.—It was announced at Washington Feb. 14, 1917, that by a vote of 45 to 25 the Senate sustained the amendment to the Post Office Appropriation bill binding the Postmaster-General to retain the pneumatic tube mail service at its capacity in all the large cities of the country for the coming year. The amendment also provides for the appointment of a commission to investigate the feasibility of the purchase of the tube service by the Government.

The Senate's action followed a long fight by Postmaster-General Burleson to eliminate the service in all cities but New York, and to reduce it there.

—Mar.

(1) Dividends.—Announced March 9, 1917, that this company had declared the usual semi-annual dividend of 3½% on the 1st pfd. stock and a dividend of 1½% on the 2d pfd., payable March 31 to stock of record March 24.

(2) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Mail Tube Co. earnings	\$334,379	\$346,239
Lamson Co. earnings	272,069	96,452
Total income	613,629	455,281
Net earnings	427,236	319,030

12 months gross	8,651,013	7,830,584
Net after taxes	3,942,703	3,634,898

—Apr.

(1) Income Account, Year Ended Dec. 31, 1916, from subsidiary companies and other sources, compares as follows:

	1916	1915
Gross	\$1,236,757	\$1,275,687
Net after exp.	930,076	1,011,049
Surp. after chgs.	746,651	549,490
Bal. after pfd. and com. divs.	204,643	17,540

(2) Balance Sheet, as of Dec. 31, 1916, shows a combined surplus of \$1,632,284.

(3) Earnings on Common for 1916, 6.49%.—The company's 1916 surplus after charges of \$746,651 is equivalent to 6.49% on the common stock after pfd. dividends, compared with 4.21% in 1915.

AMERICAN PUBLIC SERVICE CO.

(1) Financial Statement, Year Ended Nov. 30, 1916, shows gross earnings of \$726,180, and net of \$298,596. The interest on \$1,750,000 first lien bonds amounted to \$105,036. The net earnings are more than 2½ times the annual interest requirements on the bonds.

• AMERICAN PUBLIC UTILITIES CO.

(1) Output, Electric Subsidiaries, Week Ended Jan. 4.—It was announced Jan. 18, 1917, that the electric subsidiaries of this company reported combined output for the week ended Jan. 6 of 2,163,406 kilowatt hours, an increase of 248,852 kilowatt hours over the corresponding week of 1916. Artificial gas subsidiaries for the week reported combined gas output of 22,191,027 cubic feet, an increase of 1,608,809 cubic feet. The new hydro-electric development

of the Wisconsin-Minnesota Light & Power Co. on the Chippewa River will be completed in February.

(2) Operation Plans of Subsidiary.—See Wisconsin-Minnesota Light & Power Co.—Item No. 1.

—Feb.

(1) Acquisition.—It was announced Feb. 16, 1917, that Kelsey, Brewer & Co., Grand Rapids, Mich., had acquired for this company, all the properties owned and controlled by the Eastern Wisconsin Ry. & Light Co. The transaction involves about \$4,000,000. The properties acquired include the electric railway and light and power plants at Fond du Lac and Oshkosh, hydro-electric plants and water power sites in Marathon, and Long Lake Counties, and at Fond du Lac, Nevenah, Oshkosh and Omro and an electric interurban railway between Fond du Lac and Oshkosh.

The company owns about 70 miles of electric railway and the gas plant in Fond du Lac.

—Mar.

(1) New Plant of Subsidiary Opened.—See Wisconsin-Minnesota Light & Power Co.—Item No. 1.

• AMERICAN RADIATOR CO.

(1) Common Stock Dividend.—It was announced Feb. 1, 1917, that this company had declared an extra dividend of 50% on the common shares, payable in common stock March 15 to stock of record March 7; also quarterly cash dividend of 3% on all outstanding common stock as of March 21, payable March 31 to stock of record March 21. The usual rate was 4%, but due to the increased stock the rate for the current quarter will be reduced to 3%, which is equivalent to 4½% on the old stock. The regular quarterly dividend of 1¼% on the pfd. stock was also declared, payable Feb. 15 to stock of record Feb. 7. Books close on the pfd. dividend from Feb. 8 to Feb. 15; on the stock dividend from March 8 to March 15, and on the common stock cash dividend from March 22 to 31, inclusive.

The company also increased the capital of the common stock from \$9,000,000 to \$21,000,000, balance of which, after the stock dividend is distributed, will be held in the treasury.

—Mar.

(1) Earnings Statement, Year Ended Jan. 31, 1917, compares as follows:

	1917	1916
Net profits	\$2,604,068	\$2,364,953
Bal. aft. pfd. div.	2,394,068	2,154,953
Surp. aft. com. divs.	1,084,372	845,257

(2) Earnings on Stock.—It was stated March 7, 1917, that this company's 1916 balance after pfd. dividends of \$2,394,068, is equal to 29.24% on \$8,185,600 common stock, compared with 26.32% earned on the same stock in 1915.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$9,057,215, compared with \$7,972,843, Dec. 31, 1915.

(4) Stock Increase Authorized.—It was announced March 7, 1917, that a special meeting of the stockholders of this company ratified the recommendation of the Board of Directors to increase the common stock from \$9,000,000 to \$22,000,000. The pfd. issue of \$3,000,000 remains unchanged.

Common stock at present outstanding amounts to \$8,185,600. Of the increase authorized, \$4,092,800 will be issued on March 15, as a 50% stock dividend on the common stock.

(5) Capital Increased.—It was announced March 8, 1917, that this company had filed notice at Trenton, N. J., of an increase in its authorized capital stock from \$12,000,000 to \$25,000,000. The new issue is divided into \$3,000,000 pfd. and \$22,000,000 common stock. C. M. Woolley is Pres. of the company.

• AMERICAN RYS. CO.

(1) Pfd. Stock Trust Certificate Purchase.—It was stated Jan. 5, 1917, that this company had decided to purchase on the first day of March, 1917, all of the Scranton Ry. pfd stock gold trust certificates of the aggregate face value of \$1,500,000, issued under said agreement and now outstanding and numbered from 1 to 1,500, both inclusive, and that sum of \$1,025, together with the semi-annual payment provided for in the certificates due March 1, 1907, will be paid for each certificate at the office of the Continental-Equitable Title & Trust Co., Philadelphia, upon March 1, 1917, and for 30 days thereafter upon the delivery of said certificate, duly transferred to the American Rys. Co.

(2) Bonds.—On Jan. 18, 1917, Bloren & Co. and Newberger, Henderson & Loeb announced at Philadelphia that they had purchased \$1,750,000 new 5% collateral trust bonds of this company, issued for the purpose of retiring part of the \$2,500,000 Scranton Ry. gold trust certificates.

Holders of the certificates may deposit them in exchange for each maturing bond and interim certificate for one of the new bonds of the American Rys. Co. and \$50 in cash, together with \$25, the amount of the April 1 coupon.

(3) Bonds Sold.—Newburger, Henderson & Loeb and Bloren & Co. announced Jan. 25, 1917, that the \$1,750,000 of this company's collateral new 10-year 5% bonds, offered in exchange for the maturing bonds, had all been applied for by the public and the offer of exchange consequently was withdrawn.

(4) Bond Offer Withdrawn.—On Jan. 25, 1917, Newburger, Henderson & Loeb and Bloren & Co., Philadelphia, announced that the \$1,750,000 of this company's collateral new ten-year 5% bonds offered in exchange for the maturing bonds had all been applied for by the public, and the offer had been withdrawn.

—Feb.

(1) Bond Offering.—See Scranton Ry. Co.—Item No. 1.

—Mar.

(1) Bond Sale by Subsidiary.—See National Gas, Electric Light & Power Co.—Item No. 2.

(2) Combined Income Account, Subsidiaries, Year Ended Dec. 31, 1916.—It was announced March 13, 1917, that the 1916 report of this company, a subsidiary of the United National Utilities Co., shows combined income account of subsidiaries, as follows:

	1916	1915
Gross	\$8,840,913	\$5,438,247
Net	3,383,940	1,942,778
Total income	3,426,108	1,990,220
Surp. aft. chgs.	1,827,641	1,073,578

(3) Income Account, Year Ended Dec. 31, 1916, of American Rys. Co., compares as follows:

	1916	1915
Gross	\$1,538,299	\$1,145,625
Net after taxes	752,338	450,380
Surp. after pfd. and com. divs.	93,938	17,287

(4) Balance Sheet, as of Dec. 31, 1916, of American Rys. Co., shows a profit and loss surplus of \$604,254, compared with \$563,021 Dec. 31, 1915.

(5) Statement by President.—It was announced March 13, 1917, that Pres. Van Horn Ely, of this company, in his annual remarks to stockholders, said, in part: "The general prosperity of the country was reflected in 1916 in the gross revenues and net income of American Rys. Co. and all its subsidiary companies, which have shown satisfactory increases."

"In 1916, 56 new cars were purchased for electric railway subsidiaries and early in 1916 a number of electric light and power companies in southern New Jersey were purchased and consolidated into the Electric Co. of New Jersey, which is supplying light and power to more than 25 communities. Transmission lines have been built through-

JANUARY 1 TO APRIL 30, 1917

out this territory and the current is supplied from central generating stations at Bridgeton and Salem. Cables have been laid under the Delaware River and current will also be supplied from the generating station of the Wilmington & Philadelphia Traction Co. now controlled by American Ry. Co.

"At Huntington, W. Va., a 6,750 kilowatt generator has been added and at Wilmington, Del., 10,000 kilowatts additional generating capacity has been installed. Financing of the company in the year consisted of the sale of \$2,300,000 3-year notes to pay off floating debt and provide additional working capital. Of these notes \$628,000 have been called in for payment. The Ohio Valley Electric Ry. Co. and the Consolidated Light, Heat & Power Co. were refinanced and their financial requirements provided for over a long period. "The electric railway franchises at Huntington, W. Va., were extended to 1954. The financing of several other subsidiaries is under consideration and the payment of the collateral trust bonds of American Ry. Co., due April 1, 1917, has been arranged for."

AMERICAN REAL ESTATE CO.

"(1) Reorganization Plan.—It was announced Feb. 2, 1917, that the reorganization committee of this company, with the purpose of conserving the assets for gradual liquidation at favorable opportunities, plans to form a new company under new management and new capital to acquire the remaining assets of the old company, to improve selected portions of the vacant properties and to provide by subscription new funds sufficient to discharge the liens for taxes and assessments upon the properties, etc.

No less than \$2,300,000 must be provided, and it is planned that a further sum, approximating \$800,000, shall be available, subject to call by the committee of the new company.

Holders of bonds and certificates, other unsecured creditors of the old company, and its stockholders, are asked to subscribe 20% of their claims and the par value of their stock, respectively, to the aggregate amount of \$3,084,467. Against such subscriptions securities of the new company will be issued.

The reorganization committee has received deposits of bonds, certificates and claims aggregating over \$10,775,000, representing the holdings of over 14,000 creditors and more than 80% of the face amount of the company's unsecured obligations.

—Apr.

"(1) Reorganization Plan Approved by Holders of 85% of Securities.—On April 24, 1917, the "New York Times" stated that the plan for the reorganization of this company, which has been in the hands of receivers for more than a year, had been approved by holders of 85% of the company's securities. New capital to the amount of \$574,000 has been subscribed for the formation of a new company. Announcement was made that the plan would be operative, provided the additional funds needed for carrying it into effect were subscribed.

AMERICAN ROLLING MILL CO.

"(1) Extra Dividend.—On March 27, 1917, directors declared the regular quarterly dividends of 1½% on the pfd. and of 2% and 1% extra on the common stock, all payable April 15 to stock of record March 31. It is reported that practically all of the stock has been deposited under the exchange plan, but no date has been set for putting the exchange into effect.

—Apr.

"(1) Merger with Columbus Iron & Steel Co. Assured.—On April 24, 1917, the "Cincinnati Enquirer" said that the last big interest in this company's stock had agreed to deposit its holdings under the refinancing plan of the company, thus insuring the consummation of the merger effected in the Summer of 1916

with the Columbus Iron & Steel Co. Under the plan stockholders will receive five shares of common stock for each share of common stock. The company will be converted from a New Jersey to an Ohio corporation.

AMERICAN SAFETY FENDER CO.

"(1) Incorporated on Jan. 20, 1917, in Delaware, with a capital of \$1,250,000, to manufacture safety fenders for automobiles, engines, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

AMERICAN SAW & MANUFACTURING CO.

"(1) Expansion.—Announcement was made on March 29, 1917, that this company had secured land in Springfield, Mass., for the erection of new saw works, consisting of a brick factory building, into which the concern will move from its present location. The land consists of about 15,000 square feet.

Construction will begin shortly on the new building, which is to be 200 by 75 feet, and one story high. The company expects to occupy the new factory by the middle of June.

AMERICAN SCREW CO.

"(1) Extra Dividend.—Announced March 24, 1917, that this company had declared the usual quarterly dividend of 1½% and an extra of 1%, payable March 31 to stock of record March 24.

AMERICAN SEWER PIPE CO.

"(1) Report, Year Ended Dec. 31, 1916, shows: Gross, \$534,468; expenses, taxes, etc., \$252,879; bond interest, \$74,602; net profits, \$206,984. During the year the company paid two dividends and on March 20, 1917, a dividend of 50 cents a share will be declared.

The directors state that if business remains as good in 1917 as in 1916 "an effort will be made to continue the payment of dividends throughout the coming year."

AMERICAN SHADE ROLLER CO.

"(1) Incorporated on Dec. 29, 1916, in Delaware, with a capital of \$400,000, to manufacture shades, rollers and curtains of all kinds. Incorporators: William H. P. Roots, James A. Gray, Jr., and Geo. N. Deas, all of New York.

AMERICAN SHEET & TIN PLATE CO.

"(1) Hot Mills Started.—It was stated Jan. 2, 1917, that this company had started 20 hot mills at the Farrell works after a week's idleness, due to a shortage of steel.

"(2) New Rolling System.—It was stated Jan. 10, 1917, that this company is introducing a new system of rolling tinplate that will materially reduce the cost of production and, it is claimed, will give better results by increasing the output. Already the plant is in operation at Gary and Elwood, Ind., and a part of the 20 hot mills in Farrell and a number at New Castle are trying it out. It is known as the three-part or Cleveland system.

Instead of rolling the iron four times as formerly, it is now rolled only three times. It has been established that the system is faster.

Work is progressing on 20 new hot mills at the Farrell and New Castle works and these will use the new system.

"(3) New Hot Mills Planned.—A Sharon, Pa., dispatch Jan. 15, 1917, stated that this company planned the erection of five more hot mills at its Shenango Works in New Castle, in addition to the ten mills authorized in Fall of 1915. This will make 45 hot mills at the Shenango works, the largest in the world.

The Shenango plant held this distinction previously, but the McKeesport Tin Plate Co. built a plant with 40 mills.

When the improvements are finished at the New Castle and Farrell works

there will be 95 hot mills in the two valleys, with an annual disbursement of over \$4,000,000 in wages.

AMERICAN SHIPBUILDING CO.

"(1) Initial Dividend.—On March 29, 1917, directors declared a dividend of 1½% on the common stock. This is the first declaration since 1911.

AMERICAN SHIPBUILDING CORP., SPOKANE, WASH.

"(1) Contracts.—On March 8, 1917, it was announced that this company had taken contracts for eight ships, costing \$2,400,000.

AMERICAN SILVER CO.

"(1) Extra Dividend.—On Jan. 10, 1917, this company distributed to its shareholders of record Dec. 30, 1916, the regular quarterly dividend of 1½% and an extra of 2%.

AMERICAN SMELTERS SECURITIES CO.

"(1) Bonds Stricken from List.—Announced Jan. 2, 1917, that the New York Stock Exchange had stricken from the list this company's 6% debentures, due 1928.

"(2) Bond Conversion.—It was stated Jan. 3, 1917, that practically all of the \$1,265,000 American Smelters Securities Co. will be converted into common stock of American Smelting & Refining. The bonds were called for redemption on Feb. 1, with the option of converting them until Jan. 2.

On account of the difficulties of securing deliveries of bonds held abroad it has been impossible to hold foreign bondholders strictly to the letter of the conversion privilege. When the foreign owned bonds are received it is believed they will show the conversion privilege has been exercised by practically all holders.

"(3) Bonds.—It was stated Jan. 22, 1917, that between \$4,000,000 and \$5,000,000 of the American Smelters Securities Co. were understood to have been taken over by the syndicate which underwrote the conversion. The bonds were called for conversion into American Smelting & Refining common stock, par for par, on Jan. 2, or for redemption at 105 on Feb. 1.

The syndicate, headed by Kuhn, Loeb & Co., which underwrote the conversion of the bonds, obligated itself to take the bonds at the redemption price of 105 and convert them into stock. Conversion by the holders of the bonds was proceeding satisfactorily until the break in the market in December carried the price of Smelting common below 105. Holders of between \$4,000,000 and \$5,000,000 were thereby influenced to hold their bonds for redemption and these bonds were taken over by the syndicate.

Approximately \$4,500,000 of the bonds were retired through the sinking fund, leaving about \$10,500,000 to be converted into Smelting common. This would increase the amount of common stock outstanding to around \$61,000,000.

"(4) Bond and Stock Exchange Offer.—See American Smelting & Refining Co.—Item No. 5.

"(5) Comment on Bond and Stock Exchange Offer.—See American Smelting & Refining Co.—Item No. 7.

"(6) Opposition to Mortgage Predicted.—On Jan. 25, 1917, the "Boston News Bureau" said that the proposition to retire the pfd. "B" stock of this company, of which there is \$30,000,000 outstanding, by an issue of a like amount of Smelting Co. bonds, is likely to meet with serious opposition on the part of holders of Smelters Securities "A" stock, who do not take kindly to the scheme of putting a lien ahead of them.

The proposed exchange would seem to mean that ahead of Smelters "A" will be placed a \$30,000,000 mortgage and the "A" holders want to know why they are not consulted, and propose to find out—in the courts, if necessary, it was stated.

JANUARY 1 TO APRIL 30, 1917

—Feb.

¹(1) Position of "A" Stock.—See American Smelting & Refining Co.—Item No. 2.

²(2) New Officers.—It was announced Feb. 8, 1917, that Joseph Glendenning and John K. MacGowan had been elected Vice-Pres. of this company.

³(3) Admitted to List.—It was announced Feb. 15, 1917, that \$20,000,000 of this company's Central Trust Co. of New York receipts for 5% series B cumulative pfd. stock had been admitted to the list of the New York Stock Exchange.

⁴(4) Stock Deposits.—It was announced Feb. 23, 1917, that a majority of holders of \$30,000,000 American Smelters Securities Co. pfd. stock had deposited their holdings under plan for exchange at par for \$30,000,000 Series A first mortgage 30-year 5% gold bonds of the American Smelting & Refining Co. An extension of time limit for deposit until March 14 has been made.

—Mar.

¹(1) Absorption Discussion.—See American Smelting & Refining Co.—Item No. 1.

²(2) Bond Exchange Plan Operative.—See American Smelting & Refining Co.—Item No. 10.

—Apr.

¹(1) Part of Series "B" Pfd. Stock to Be Retired.—See American Smelting & Refining Co.—Item No. 8.

• AMERICAN SMELTING & REFINING CO.

¹(1) Garfield Smelter Enlargement.—On Jan. 3, 1917, it was stated that largely as a result of the increased activities at the milling plants of the Utah Copper Co., the Garfield smelter of American Smelting & Refining Co. will be materially enlarged. This work will not be finished until well into 1917, but when completed the plant will have a capacity for handling daily 6,000 tons of ore.

The original capacity was 2,500 tons of ore per day, but this was later increased. Original cost estimates were greatly exceeded, it being necessary to spend several million dollars more than had been planned. Now the Garfield smelter stands as one of the best in the world.

The work constitutes only a small part of the extensive improvement and expansion program which the Guggenheims have under way at their many plants located throughout the country. Fully \$8,000,000 was expended on improvements during 1916, while another large sum will be required to finish the work already started.

²(2) Bond Conversion.—See American Smelters Securities Co.—Item No. 2.

³(3) In Chemical Field.—On Jan. 11, 1917, it was stated that this company had taken steps to enter the field of chemical manufacture on a large scale. It has been a producer of sulphuric acid for a few years, but will enlarge its operations so as to become a producer of a variety of chemicals.

Appropriations have been made to cover the necessary expenditures for 1917. It has acid plants at Salt Lake and these will be greatly enlarged as part of the new plans.

It is planned to make the company as well known as a chemical producer as it is in the metal smelting and refining field.

Entrance of the company into this field is the latest departure in the management's scheme of diversifying its interests. Less than a year previously it took its place as a producer of refined tin, the first effort of that kind in the United States. Heretofore all tin had been imported. At present the company is engaged on the enlargement of its tin plant at Perth Amboy.

All indications are that 1917 will establish a new high record of earnings for the company.

With increased facilities, nearly all the plants of the company having been in 1916, or still being, in process of ex-

pansion, earnings of the company will be correspondingly increased. It, as early estimates indicate, the last half of 1916 shows fully .20% on the common, the showing for 1916 complete will be better than 30%.

⁴(4) New Stock.—See American Smelters Securities Co.—Item No. 3.

⁵(5) Bond and Stock Exchange Offer.—Announcement was made Jan. 22, 1917, that this company's directors had approved an issue of \$30,000,000 Series A first mortgage 30-year 5% gold bonds to be offered in exchange, par for par, for the American Smelters Securities Co. B stock. This issue as planned is only for exchange purposes and is not an added obligation, as the B stock carried 5% dividends guaranteed by the Smelting Co.

The plan will be declared operative only in case of its acceptance by holders of a sufficient amount of stock to justify the Refining Co. in effecting the exchange. Holders of the B stock desiring to participate in the exchange are asked to deposit their stock on or before Feb. 20 with the depository, the Central Trust Co., 54 Wall Street. Transferable receipts will be issued for the stock deposited and in case the exchange has not been consummated by June 30, holders of the receipts will be entitled to return of the deposited stock.

Kuhn, Loeb & Co., through whom the pfd. B stock was sold, recommended the exchange and have accepted the offer for their own holdings which are substantial.

Earnings of the Smelting Co. for 1916 applicable to the interest on the new bonds were equivalent to 14 times such interest.

⁶(6) Statement by President.—In a letter to holders of the B stock, Pres. Daniel Guggenheim, of this company, it was announced Jan. 22, 1917, said:

"The American Smelting & Refining Co. is the owner of all the common stock, and the guarantor of all the Series B preferred stock, of the American Smelters Securities Co. In furtherance of a plan for the more economical administration of the properties of the two companies the Refining Co. desires to acquire the Series B preferred stock of the Securities Co.

"To that end, it has prepared, in co-operation with Kuhn, Loeb & Co., a plan for exchange of that stock for an equal par amount of first mortgage 5% bonds of the Refining Co., plus such cash payment as may be necessary to adjust accrued dividends and interest.

"Said plan will be declared operative only in case of its acceptance by holders of a sufficient amount of stock to justify the Refining Co. in effecting the exchange."

⁷(7) Comment on Bond and Stock Exchange Offer.—On Jan. 24, 1917, the "Wall Street Journal" said that in offering to exchange an issue of \$30,000,000 of 5% bonds under a new mortgage, the first to be placed on its properties, this company had taken another step toward the elimination of the American Smelters Securities Co. The first step in this direction was taken when the Smelters Securities 6% debentures were called for conversion or redemption, and which will result in conversion, through the underwriting of the conversion by a banking syndicate, of the \$10,500,000, or thereabouts, of the \$15,000,000 issue not taken by the sinking fund into common stock of the Refining Co.

Exchange of its bonds for Securities Co. B stock will give the Refining Co. ownership of that issue. With the debentures retired and all the common stock of the Securities Co. already in the treasury of the Refining Co., there will remain outstanding of the Securities Co.'s capital obligations in the hands of the public only the \$10,649,000 of the A stock.

It is not necessary for shareholders of the company to register their approbation of this measure. A provision in the company's charter makes it possible for a mortgage to be placed on the property by the action of the directorate without reference to the shareholders.

In the official announcement of the bond exchange offer, it is stated that earnings of the Refining Co. for the year 1916, partly estimated, which would be applicable to the new bonds, was equivalent to 14 times the interest. Inasmuch as the annual interest charge of \$30,000,000 5% bonds would amount to \$1,500,000, the earnings of the Refining Co. in 1916 applicable to the bonds was fully \$21,000,000.

That is, estimated balance for dividends on the various classes of the Smelting Company's stocks in 1916 was \$21,000,000. Deducting from that figure \$6,000,000 for dividends on the American Smelting & Refining Co. pfd. and the Securities Co. pfd. A and B stocks, there would remain for the Refining Co. common \$15,000,000. That would be equivalent to \$30 a share on \$50,000,000.

⁸(8) Strike Settled.—It was announced Jan. 25, 1917, that the strike which had been in force for two weeks at the Perth Amboy refinery of this company had been settled and the men had returned to work.

—Feb.

¹(1) Resumption Plans for Mexico.—It was announced Jan. 30, 1917, that this company is taking steps toward resumption of operations at its Mexican plants. Some of its American forces have been sent into Mexico to make preparations to reopen its Monterey smelter, and should that prove successful the smelter at Matehuala will next be put in operation.

This is the first time in a year that there has been any real prospect of resumption of activities at the company's plants in the Mexican republic. At the close of 1915, after a shutdown of several months, an effort was made to operate the Smelting Co.'s Mexican plants, but this had to be abandoned almost before the plans were well started.

Negotiations are under way to make provision for resumption of railroad service so that supplies, especially coal, may be taken into the plants. Adjustment of taxation matters is also being taken up.

The Monterey plant has capacity for turning out about 460,000 tons of lead yearly and has a copper furnace in addition to reduce the matte. The Matehuala plant is a copper smelter with annual capacity of 300,000 tons.

While it will take many months to get the Mexican properties in full running order, if conditions are found to make reopening of them feasible it is of great significance to shareholders that the effort is to be made.

Under normal conditions the company could draw \$5,000,000 net a year from Mexico, equal to 10% on the \$50,000,000 common stock.

²(2) Position of Securities Co. "A" Stock.—On Feb. 1, 1917, the "Boston News Bureau" said: "With the plan of American Smelting & Refining Co. for issuing its own series A 5% first mortgage bonds in exchange for 5% pfd. B stock of American Smelters Securities Co. consummated, steps may be taken to acquire the 6% A stock of the Securities Co. by a somewhat similar process.

"Partly at least for its guarantee of the 5% dividend on the B stock of the Securities Co., the American Smelting & Refining Co. has always held the entire \$30,000,000 common stock issue of the Securities Co., the American Smelting & Refining Co. has been receiving 4% dividends on its \$30,000,000 Securities Co. common stock.

"In issuing \$30,000,000 of its own bonds for \$30,000,000 pfd. B stock of the Securities Co. the Refining Co. in no way interferes with the priority of the American Smelters Securities Co. pfd. A stock. The Refining Co. does not and never did guarantee the dividends of the Securities Co. A stock. These dividends have been met from earnings of the Securities Co. from its own properties and will so continue to be paid.

"It is expected that an offer will be made to the pfd. A shares of the Securities Co. possibly through an issue of

JANUARY 1 TO APRIL 30, 1917

American Smelting & Refining Co. series B 6% bonds.

"When the method of financing the Refining Co. a dozen years ago through the American Smelters Securities Co. was arranged, the Guggenheim Exploration Co., which had turned over some of its properties to the new concern, received some of the latter's securities in payment. The Exploration Co. in turn sold a large block of both the pfd. A and B stock of the Securities Co. abroad, where, to a large extent, it still remains.

"The pfd. B stock, about to be exchanged for Refining Co. bonds, went very largely to Holland, where a Dutch holding company issued bearer certificates against it. The A stock went into the hands of French investors, of which, it is understood, some has since returned to the United States."

(3) New Officers.—It was announced Feb. 8, 1917, that Joseph Glendenning and John K. MacGowan had been elected Vice-Pres. of this company.

(4) Stock Deposits.—See American Smelters Securities Co.—Item No. 4.

(5) Operations Resumed in Mexico.—It was announced Feb. 23, 1917, that mining operations in Mexico, suspended nearly a year previously, had been resumed by this company.

Three lead furnaces have been blown in at Monterey, and plans completed for starting two copper furnaces.

The company withdrew its men from the Monterey and Matehuala smelters early in March, 1916, when the hostility of the population toward Americans, under the Carranza Government, became so intense that it was deemed expedient to close down mining operations and withdraw the men from the smelters.

The three lead smelters at Monterey have an annual capacity of 400,000 tons.

—Mar.

(1) Absorption Discussion.—On March 1, 1917, the "Boston News Bureau" said that this company's plan for issuing \$30,000,000 first mortgage "A" bonds for American Smelters Securities Co. pfd. B stock will become effective shortly after March 14, to which time an extension has been made for further deposits of the B shares.

A majority of the B stock several weeks previously had been lodged with the depository, but under a New York Stock Exchange ruling, covering the listing of the certificates of deposit, it was necessary to extend time 30 days.

With the pfd. B stock, or a large part of it at least, lodged in the treasury of the American Smelting & Refining Co., the management of the latter can go ahead with plans for absorbing the pfd. A stock, and upon completing that task may proceed to completely wipe out the corporate existence of the American Smelters Securities Co.

(2) Earnings Discussion.—It was stated March 7, 1917, that the forthcoming annual report of this company, is expected to show between \$30 and \$35 a share earned for the common stock. The rate of earnings is understood to be nearer \$40 a share. The directors of the company meet in April and it is expected that the dividend rate on the common stock will be increased.

(3) Production Increase.—It was announced March 9, 1917, that early in the Summer of 1917 this company would have smelting and refining capacity to handle approximately 1,200,000,000 lbs. of copper yearly. In 1915 the company refined 551,798,000 lbs. of copper, whereas in 1917 production of copper will run close to the full capacity of the plants. Operations in full for about three-fourths of the year are indicated by the advance sales already made.

Increased capacity, together with larger output of ores from the mines will give the company in 1917 the largest earnings in its history. Higher prices for silver will be an important factor in the case of this company, which is now producing close to 100,000,000 ounces yearly.

(4) Report, Year Ended Dec. 31, 1916, shows consolidated statement of earnings as follows:

	1916	1915
Net earnings.....	\$22,574,527	\$14,472,812
Total income.....	28,117,831	18,245,731
Net income.....	22,152,250	13,053,304
Bal. after pfd. divs.	16,158,992	7,051,460
Surp. after com. divs.	13,018,416	5,050,380

(5) Earnings on Stock.—It was stated March 11, 1917, that this company's 1916 balance after pfd. dividends of \$16,158,992 is equal to 29.75% on \$54,290,000 common stock, compared with 14.06% on \$50,108,000 common stock in 1915.

(6) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$23,442,295, compared with \$19,560,438 Dec. 31, 1915.

(7) Mexican Operations.—A Monterey, Mexico, dispatch, March 12, 1917, stated that renewal of mining and smelting operations in Northern Mexico was becoming general.

American Smelting & Refining Co.'s large smelter there recently re-opened. Simon Guggenheim and Edward Newhouse, with C. L. Baker, general manager of the company's Southern department, arrived there on an inspection trip of company's properties. They started arranging for the reopening of the Matehuala smelter in the State of San Luis Potosi.

The company plans to operate its own trains between Laredo, Tex., and Monterey, with the promise of the exercise of vigilance by the Mexican authorities.

(8) Statement by President.—It was stated March 13, 1917, that Pres. Guggenheim, commenting on the 1916 operations of this company, said in part: "The high prices for metals recorded in the last semi-annual report, which were therein mentioned as being the cause of a largely increased production of ore and bullion for Smelting & Refining, have continued, with a few exceptions, and have even exceeded the prices of the earlier part of the year. The smelting and refining operations of the company have correspondingly increased. Wages and cost of fuel and material have continued to advance. The scarcity of all materials needed for construction and operation, together with the unequalled congestion on the railroads of the country, have united to make the continued working of your smelting and refining plants most difficult.

"The Board of Directors is pleased to report, however, that, at the close of the year under review the tonnage being handled and the refined metals produced were never equalled in the life of the company.

"The policy of the company continues to favor enlargement and extension of its operations.

"The Board of Directors, after due examination and deliberation, extending over the past two years, has decided to enter into the mining and smelting business in the Republic of Chile.

"The book value of ore, bullion and factory products on hand and in transit on Dec. 31, 1916, less treatment charges accrued but not earned, was \$105,254,065 as compared with \$58,582,143 on Dec. 31, 1915, an increase of \$46,671,922.

"The increase in value of materials and supplies of \$1,266,423 was due to increased stock required, to the enlarged operations, and to the increased cost of material.

"The increase in cash of \$2,300,000 was made, notwithstanding an increase of \$5,000,000 in value of metal stocks and materials carried. The increase in accounts and bills receivable of \$8,489,837 is only the necessary increase caused by the larger business done and its advanced values.

"The total receipts from the sale of metals and manufactured products of \$316,602,866 compares with the receipts from the same sources in 1915 of \$210,603,470, and in 1914 of \$183,146,077. The directors are especially pleased with the increased receipts from manufactured products from \$1,103,228 in 1915 to \$16,304,914 in 1916."

(9) Comment on 1916 Report.—On March 14, 1917, the "Wall Street Journal" said that the earnings of this company in 1916 were the largest in the company's history, notwithstanding the Mexican disturbances, which caused a heavy reduction in the results of the company's operations in that country.

From the surplus account the directors made two special appropriations: the first, \$3,136,550, to the credit of property account and miscellaneous items; the second, \$6,000,000, charged to reserve for enlargement and extension.

A comparison of the annual report with that for the six months ended June 30, 1916, shows gross earnings of \$13,229,059 for the first six months of the year, against \$14,883,773 for the last six months. Net earnings were \$11,145,694 for the first period, as compared with \$11,006,556 during the second.

From the gross income of the second six months were deducted the increased income tax on the earnings of the entire year, and the special appropriations for employees' bonuses, pension fund and welfare work.

(10) Bond Exchange Plan Operative.—On March 20, 1917, this company announced that the plan to exchange its first mortgage 5% bonds for the Series B 5% pfd. stock of the American Smelters Securities Co. had been declared operative. About 80% of the outstanding \$30,000,000 stock has been deposited under the exchange plan, and the offer is still held open, subject to withdrawal without notice.

(11) Earnings, 1917, Estimated.—On March 21, 1917, the "Wall Street Journal" said that this company's record 1916 earnings of \$29.75 per share on the \$54,290,000 common stock outstanding Dec. 31, 1916, in all probability would be surpassed by those of 1917. The earnings of 1916 would have been equivalent to \$32.24 per share on \$50,108,000, the amount outstanding Dec. 31, 1915, in which year earnings were \$16.80 per share, surpassing the previous record of \$13.91 made in 1907. These earnings compare with an average rate of \$9.99 per share on \$50,000,000 common stock since the company began operations in April, 1899.

Full operations of the company's Mexican properties in normal times mean \$5,000,000 available for the common stock dividends. Under present abnormal conditions twice this might be realized. In 1915 and 1916 the company received no income from this source.

The American Smelting & Refining Co.'s earnings throughout its history have been steady and large, and in face of heavy charges for extensions and improvements of property during two years have made vigorous upward strides.

The resumption of operations in Mexico and the policy of increasing the diversity of product, together with rising prices for the products, should insure still higher figures. At the same time the common stock has a book value approximately \$50 a share greater than the current market price of the stock.

(12) Tacoma Smelter to Be Enlarged.—On March 26, 1917, Simon Guggenheim, chairman of the Board of Directors, was quoted as saying that he does not look for a drop in price of copper after the war. He announced that the Tacoma Smelter would be increased in size to make the plant the second largest in the United States. At present 50 ore boats a month call at the Tacoma smelter from Alaska and South America.

(13) To Enlarge Garfield Plant.—Announcement was made on March 27, 1917, by C. W. Whitley, general manager of this company's plant at Garfield, Utah, that work of enlarging the plant would commence at once. It is the intention to increase the capacity of the Garfield plant 40%. The American Smelting intends to treat a large tonnage of copper ore coming from mines in Arizona, Idaho, Nevada and Utah, which it is unable to handle at present.

(14) Plants Overtaxed.—On March 29, 1917, Murry Guggenheim, chairman of the board, was quoted as saying that

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

the smelting plants throughout Utah were overtaxed to meet the mining output.

—Apr.

*(1) **Plant Enlargement.**—It was stated April 3, 1917, that this company's Tacoma plant, with a capacity of 6,000 tons of copper per month, would have a capacity of 7,500 tons a month when enlargements are completed early in July. Part of this output will be supplied to the United States Government at approximately 16 cents a pound, half the current market price. Ample supplies of ore are in sight. During May more than 23,000 tons of ore are due from the west coast of South America. Shipments from that source now average 10,000 tons monthly.

*(2) **Directors Re-elected.**—Announced April 4, 1917, that at the annual meeting of this company retiring directors were re-elected. Vice-Pres. Bush said that there was no present plan to dissolve the company.

*(3) **Appropriations Ratified by Stockholders.**—It was announced April 4, 1917, that the stockholders of this company at their annual meeting unanimously ratified the appropriations made by the executive committee during 1916 for bonuses and welfare work, and also the plan for life insurance for the company's employees recently announced.

*(4) **Statement by Vice-President.**—It was stated April 4, 1917, that at the annual stockholders' meeting of this company Vice-Pres. Bush said that the welfare of the country and of the company's employees was indivisible from the welfare of the company. The company will do all it can to aid the nation in war, and the salaries of its employees who go to fight for the country will be continued for the duration of the war and their places in the company held open.

The Mexican Government has been anxious to facilitate the resumption of the company's operations in Mexico, and, while it had no rolling stock to offer the company, it made no increase in freight rates and left taxes unchanged. Stockholders were warned that the increase in expenses of the Mexican Government would result in such increases soon and that the company would gladly aid in the prosperity of Mexico.

It is planned to open the plant at Matehuala by the middle of April and a month later to open at Aguas Calientes. It will be impossible to resume operations at Velardena and Chihuahua while present conditions prevail.

*(5) **Revision of Smelting Contract Sought.**—See Federal Mining & Smelting Co.—Item No. 2.

*(6) **Government Purchases Silver.**—On April 17, 1917, the United States Treasury Department ordered purchased from this company 200,000 ounces of silver at \$0.74125 per ounce, for delivery at Philadelphia, and 200,000 ounces at \$0.7525 for delivery at San Francisco.

*(7) **Making Brass Discs for Government.**—On April 19, 1917, the "Boston News Bureau" said this company had a contract with the United States Government for the manufacture of brass discs. The Baltimore plant, originally a sheet copper mill, but now one of the largest refineries in the country, will turn out this product.

At their Selby plant on the Pacific Coast these interests have a shot tower for the making of shot for shotgun cartridges. The American Smelting Co. does not make the cases, but fills them with shot of its own production.

At a cost of \$750,000 there has been built a sulphuric acid plant with daily capacity from one unit of 125 tons of acid.

The present output of the electrolytic tin plant of the American Smelting & Refining Co. is 600 tons monthly, but this will be increased to 1,200 tons by the end of August.

*(8) **To Exchange "A" Stock for Bonds.**—On April 28, 1917, this company sent out a circular to the holders of the 6% Series "A" accumulative pfd. stock, which embraces a plan for the exchange of "A" stock for an equal par

amount of first mortgage 5% bonds of the Refining company, plus a cash payment of \$7.50 a share. This company is co-operating with Kuhn, Loeb & Co. in carrying out the plan. Stockholders desiring to accept the offer of exchange are requested to deposit their stock certificates on or before May 19, 1917. The American Smelting & Refining Co. is the owner of all the common stock of the American Smelters Securities Co., and has arranged to retire a very large part of the Series "B" pfd. stock of the American Smelters Securities Co.

● AMERICAN SNUFF CO.

*(1) **Report, Year Ended Dec. 31, 1916,** shows net earnings amounting to \$1,899,680, compared with \$1,701,334 in 1915, an increase of \$198,352. Surplus, after payment of pfd. dividends of \$237,163 and common dividends of \$1,320,000, amounts to \$342,513, an increase of \$200,002 over 1915.

*(2) **Earnings on Stock.**—It was stated Feb. 16, 1917, that this company's 1916 net of \$1,662,513, after pfd. dividends, is equal to 15.11% on \$11,000,000 common stock, compared with 13.29% earned on the same stock in 1915.

*(3) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$2,398,541, compared with \$2,056,023 Dec. 31, 1915.

AMERICAN SPINNING CO., GREENVILLE, S. C.

*(1) **Capital Decreased.**—In December, 1916, this company filed notice of a decrease in capital stock from \$600,000 to \$525,000.

● AMERICAN STEEL FOUNDRIES.

*(1) **New Gross and Net Records.**—It was stated Jan. 6, 1917, that this company's gross and net for the Dec. 21 fiscal year established new high records.

It is likely that the year will show profits between \$16 and \$17 per share on the \$17,184,000 outstanding stock.

American Steel Foundries is in fine financial condition and so well covered with working capital that it probably will prove practical to call for payment some time in 1917 the entire balance of the first mortgage 6% bonds. These bonds are redeemable at par either on April 1 or Oct. 1, and may be called on either date. Present outstanding balance is \$1,651,500.

Getting rid of these 6s would leave outstanding only the debenture 4s, of which \$2,040,500 comprised the issue as of Dec. 1, 1917. These bonds were issued originally to pay up accrued dividends, and the company probably will not hurry to pay them off even if it has the funds.

*(2) **Earnings, 1916, Estimated.**—On Jan. 24, 1917, the "Boston News Bureau" said that earlier estimates of profits for this company's \$17,184,000 stock for its Dec. 31 year of \$16 per share were too low. The company will probably disclose profits of not less than \$20 per share, making it far the best 12 months the corporation ever enjoyed.

The first munitions contract was finished Nov. 1 on schedule time. It was a satisfactory piece of work, both to the company and to the British Government. The second contract is coming along in good shape and will be finished in all probability by March 31.

The first quarter of the new fiscal period, therefore, will include substantial war profits. Beyond that the company has no war business on its books.

But it does carry at present 50% more railroad and general equipment orders than at any previous time in its history, and can run full blast up to the last quarter of 1917 on equipment business alone.

In the late December quarter production was about 50-50 as between regular domestic and munitions work.

American Steel Foundries will have another big year in 1917, but it seems only fair to state that, barring receipt of further war orders, net cannot mount

to the heights attained in 1916. At the same time 12% or 15% would be a most satisfactory margin of protection to the present 5% dividend rate.

—Feb.

*(1) **Report, Year Ended Dec. 31, 1916,** shows: 1916 1915
Gross ----- \$4,108,823 \$313,242
Net profit ----- 3,968,570 30,565
Surp. after chgs. 3,418,513 \$213,435
†Deficit.

*(2) **Earnings on Stock.**—It was stated Feb. 1, 1917, that this company's 1916 net profit of \$3,968,570 is equal to 23.21% on \$17,184,000 capital stock, as compared with .0017% on the same stock the previous year.

*(3) **Comment on 1916 Earnings.**—On Feb. 2, 1917, the "Wall Street Journal" said this company's income statement for 1916 shows that earnings for stock during the closing three months were almost as large as the combined profits of the previous three quarters. Up to Sept. 30 the company reported net profits after charges of \$1,744,130, while last quarter profits were \$1,673,927.

Last quarter profits were equal to \$9.74 a share on the \$17,184,000 stock, or at the annual rate of \$38.96. Not only was 1916 net far in excess of any previous year, but it was arrived at after unusually large deductions for depreciation and a heavy sinking fund account. Depreciation deductions were \$739,414, against \$204,083 in 1915, \$231,456 in 1914 and \$313,926 in 1913.

Steel Foundries completed its first large shell order in the latter part of November and expects to close its second and larger order in March. It is understood that practically its entire steel capacity is sold up throughout 1917, and its railway equipment orders run well into the third quarter of the year.

American Steel Foundries is one concern that has more than justified expectations from its war orders. When the first of these was taken it was hoped that net profits therefrom would make 1916 earnings between 17% and 20% on the stock, while the actual net was 23.21%.

*(4) **Earning Rate.**—It was stated Feb. 15, 1917, that this company is understood to be earnings at the rate of fully \$50 a share.

In the closing quarter of 1916 the company reported profits of \$1,673,927, equal to \$9.74 a share, and nearly half of these were made in December. January earnings are believed to have been about as large as December's, and the rate attained in these two months should be kept up, if not bettered, in February and March.

Earnings for the first quarter of 1917 may be estimated at \$750,000 a month, or, for the three months, close to \$14 a share on the \$17,184,000 stock.

Current munitions orders will be completed about the end of March, and some recession in the earnings rate may be anticipated after that date. But American Steel Foundries has its equipment capacity booked up until well into the second quarter and it is also credited with having made large sales of steel billets to the Allied Governments for delivery over the greater part of 1917.

—Mar.

*(1) **Earnings, 1917, Estimated.**—On March 5, 1917, the "Boston News Bureau" said that this company likely would have another successful year in 1917. The company in January earned at the rate of \$12 per share for the quarter, or nearly 50% per annum on the \$17,184,000 stock.

In the fiscal 12 months to Dec. 31 the corporation had profits of 23.2% for the stock.

Directors are confident that 1917 will eclipse this showing and if all goes smoothly that the close of 1917 will see a stock balance of a full 30%.

The March quarter will naturally be the largest of the year. The second shell order will be finished April 30 and after that the company will probably make no effort to secure further shell orders.

On the other hand, the volume of

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

domestic equipment orders on the books is unprecedented. On the basis of orders in hand or in sight it is expected that the company can earn between \$400,000 and \$500,000 net per month when war work is finally out of the way.

***(2) Earnings Statement, Year Ended Dec. 31, 1916, shows:**

	1916	1915
Oper. earnings...	\$4,842,237	\$517,325
Bal. aft. chgs...	3,718,975	30,565
Surp. after reserve & divs.	3,160,175	219,574

***(3) Earnings on Stock.**—It was stated March 9, 1917, that this company's 1916 balance after charges of \$3,718,975 is equal to 21.64% on the \$17,184,000 capital stock, after sinking fund provision, but before deducting debenture retirement reserve, compared with .0017% earned on same capitalization in 1915.

***(4) Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$3,651,670, compared with \$1,448,413 Dec. 31, 1915.

***(5) Comment on 1916 Report.**—On March 12, 1917, the "Boston News Bureau" said that one of the features of this company's operations in 1916 was the expansion in gross sales. The company in 1915 produced but \$10,024,870 of products. At that time it was feeling the equipment depression and had no war orders. In 1916, however, gross sales were more than three times this total, the exact figures being \$31,361,005, an increase in a single year of \$21,336,135, or 212%.

In 1915 American Steel Foundries made a manufacturing profit before allowing for depreciation of 7.05%. In 1916 the ratio doubled to 15.4%. This is a decidedly satisfactory level for this class of product and illustrates the effect which war orders had in expanding profits per dollar of gross.

The company in 1916 charged off very heavily for depreciation. The total charge of \$739,414 was \$535,331 greater than the previous year, this difference being equal to 3.1% additional on the \$17,184,000 stock.

American Steel Foundries made a heavy cut into its bonded debt during 1916. The 6% bonds and the 4% debentures were reduced by \$717,000. Further than that Pres. Lamont states that stockholders have been asked to abstain from more than the current 5% dividend with the idea of calling in and retiring the balance of the 6% bonds amounting to \$1,558,000.

This will probably be done some time during 1917. Such action would leave the company with but \$2,060,800 4% bonds on which interest charges would be but about \$82,000 per annum.

If American Steel Foundries can ultimately wipe out its entire funded debt it will save an annual interest and sinking fund obligation of \$750,000 equal to within ½% of the present dividend rate. In the lean years bound to come this would spell the difference between dividends and no dividends.

Adherence to this policy is what is keeping the dividend rate down to 5%, despite the fact that 1917 promises to be as big and probably a bigger year than the 21.2% earned for the stock in 1916. In fact some estimates place the probable 1917 balance as high as 28% or 30%.

***(6) Directors Re-elected.**—Announced March 22, 1917, that at the annual meeting of stockholders of this company retiring directors were re-elected.

—Apr.

***(1) Earned 12% on Stock in March Quarter.**—On April 24, 1917, the "Boston News Bureau" stated that it understood that in its March quarter American Steel Foundries produced a balance of profits equal to nearly 12% on its \$18,184,000 stock. This was after the three months' proportion of charges and sinking fund requirements.

Profits for the quarter of 12% compare with actual net for the shares in all of 1916 of 23.2%, so that if the full year were to do as well as the March

quarter, share earnings in 1917 would more than double the previous year.

It is morally certain that American Steel Foundries in 1917 will earn more for its shareholders than in any previous twelve-month in its career.

The company is likely to undertake shell work for the United States Government.

AMERICAN STEEL & WIRE CO.

***(1) Extension.**—It was stated Jan. 6, 1917, that this company had completed plans for the erection of a nail mill to cost \$40,000. It will be the largest addition to the plant at Worcester, Mass., since the New Jersey corporation took it over in 1899. At that time it was known as the Riverside Mills of the Worcester Wire Co.

***(2) Bond Mortgage.**—Announcement was made at Birmingham, Ala., Jan. 13, 1917, that this company had filed a mortgage in the Probate Court there to secure an issue of \$5,000,000 first mortgage 5% 30-year bonds dated Nov. 1, 1916. The New York Trust Co. is trustee.

At the offices of the United States Steel Corp., of which the American Steel & Wire is a subsidiary, it was stated that the bonds were issued against construction work already executed and financed by the holding company, and that the bonds would be held in the corporation's treasury and not offered to the public.

—Mar.

***(1) Price Advance.**—It was stated March 5, 1917, that this company had announced an advance of \$4 a ton in price of all wire products to become effective at once.

***(2) Navy Order for Nets.**—Reported on March 30, 1917, that a contract for 100 nets had been awarded to this company by the Navy Department. The nets will be 1,500 feet long, 30 feet wide, made of steel ropes and having 12-foot meshes. Each one will cost \$1,881. The company promises to begin delivery in three weeks, delivering 10 every week.

AMERICAN STORES CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

***(1) Amalgamation Completed.**—See Acme Tea Co.—Item No. 2.

***(2) Incorporated on March 29, 1917,** in Delaware, with a capital of \$24,000,000, to conduct stores for the selling of all kinds of food products. Incorporators: F. R. Hansell, Geo. H. B. Martin, S. C. Seymour, Robert P. Spurgeon and J. Vernon Plimm, Philadelphia, Pa.

—Apr.

***(1) New Company Formed.**—On April 2, 1917, Chandler & Co., Inc., Philadelphia, announced the formation of this company, incorporated under the laws of Delaware, with a capitalization of \$3,000,000 1st pfd., \$1,500,000 2d pfd. and 126,064 no-par common shares. Associated with Chandler & Co. in the transaction are Counselman & Co., of Chicago.

The American Stores Co. owns a controlling interest in the common stock of the Acme Tea Co. and will acquire outright the properties, assets and goodwill of the four other Philadelphia chains, viz.: Robinson & Crawford, the Bell Co., Childs Grocery Co. and the George M. Dunlap Co. Samuel Robinson, senior partner of Robinson & Crawford, will be Pres. of the American Stores Co.

The American Stores Co. is a natural evolution of the chain store idea, as it has found expression in Philadelphia. Officials state that all the companies involved in the American Stores are going concerns, with a large and profitable business, and that the move can be attributed solely to the recognition on the part of all concerned that a highly efficient method of food distribution is dependent upon the introduction of economies in management and the elimination of duplicate costs.

All told, the companies operate 1,223 retail stores in eastern Pennsylvania, southern New Jersey, northern Delaware and Maryland, cater to more than

1,000,000 customers, and aggregate annual business said to approximate \$60,000,000, which is expected to be increased during the current year.

The American Stores Co. will manufacture all of its own bread. Heretofore only the Acme and Bell companies have maintained bakeries, although the Childs Co. has a new model bakery nearing completion.

***(2) Stock Offering Planned.**—It was announced April 2, 1917, that an offering would be made of \$3,000,000 of this company's 1st pfd. stock at 97½ with interest from April 1, 1917. Purchasers will have the privilege of taking 40% additional of the par value of their pfd. stock in common of no par value. It was stated that there would be no public offering of these issues until the week of April 9.

***(3) Stock Oversubscribed.**—Announcement was made at Philadelphia April 5, 1917, by Chandler & Co., Inc., that the issue of \$3,000,000 is pfd. stock of this company, offered at 97½, had been three times oversubscribed.

***(5) Stock Offering.**—Announcement was made April 11, 1917, of the offering by Chandler & Co., Inc., of New York and Philadelphia, and Counselman & Co., of Chicago, of \$3,000,000 7% cumulative convertible 1st pfd. stock of this company at 97½. The shares may be converted up to 1927 into common stock, 1½ shares of common for one share of pfd. An annual sinking fund of 2% has been provided for the retirement of the stock at 115.

The new company owns a controlling interest in the Acme Tea Co. and will acquire Robinson & Crawford, the Bell Co., Childs Grocery Co., and George M. Dunlap & Co., operating 1,223 retail stores.

***(6) Officers and Directors Elected.**—A Philadelphia dispatch April 20, 1917, stated this company had elected the following officers: Pres., Samuel Robinson; Vice-Pres., Robert H. Crawford, Wm. Crowe, George M. Dunlap, George R. Pelouze and John Eagleson. E. J. Flanagan, of the Bell System, was elected Sec'y, and Wm. M. Robinson, Treas.

Directors were elected as follows: Samuel M. Clement, Jr., Joseph Gillan, Samuel Robinson, Robert H. Crawford, D. P. Childs, George M. Dunlap, Jr., John Eagleson, Geo. R. Pelouze, J. K. Trimble and F. W. Bacon, Chandler & Co., Inc., and Charles Counselman, of Chicago.

***(7) Gross Earnings, Three Months Ended March 31, 1917,** of the five companies comprising the merger, according to a compilation by Chandler & Co., Inc., amounted to \$15,398,815, which compares with \$11,699,800 for a similar period of 1916, an increase of \$3,698,955, or about 31.61%.

***(8) Listed on New York Curb.**—The New York Curb Market Association April 26, 1917, announced the listing of 150,000 common shares of this company, no par value.

AMERICAN STRAWBOARD CO.

***(1) Control Sold.**—It was announced Feb. 6, 1917, that O. C. Barbour had bought 3,481 shares of this company at \$75 each, thereby obtaining control.

AMERICAN SUGAR REFINING CO.

***(1) Year to Dec. 31 Successful.**—On Jan. 12, 1917, the "Boston News Bureau" said that the most successful year in its modern history was the earning record of this company during the fiscal year ended Dec. 31. Back in the old days, before any facts or figures whatever were divulged concerning American Sugar, it is understood that in one year profits reached the \$19,000,000 net mark in 12 months, or at the rate of \$1,500,000 net monthly.

The 1916 profits did not reach this total, but with this single exception, which belongs to the non-historical past of American Sugar, the 1916 year was the best the company ever had.

It is understood that all of the \$5,000,000 deduction in surplus necessitated by payment of unearned common dividends in 1913, 1914 and 1915

JANUARY 1 TO APRIL 30, 1917

was more than made good and that several millions additional were added to surplus.

American Sugar common now has the largest book value of any time in the history of the corporation.

American Sugar's beet sugar investments represent very substantial equities not represented on the books at all. Probably these equities are conservatively not less than \$10,000,000 and less conservative figures might place the balance at \$15,000,000. This \$10,000,000 would be equivalent to better than \$22 per share on the \$45,000,000 common stock.

The strong 1916 record will not manifest itself in any extra distribution to the common.

(2) Labor Troubles.—On Jan. 26, 1917, the "Boston News Bureau" said that this company continues to be annoyed by labor troubles. Despite its exceedingly liberal treatment of employees a strike started at the Brooklyn refinery on Jan. 23. A portion of the men remained loyal and the refinery is running on part time operations.

During 1916 American Sugar increased the pay of its general labor at this refinery 33½%. Further than that, it agreed to make further increases in 1917 of 8% and 10%, payable in spaced periods, making a total of between 42% and 44% increase in hourly wages within a year.

Besides these direct wage advances the company voluntarily created a \$1,000,000 pension fund and extended sick benefits.

Its Brooklyn refinery, however, has been a persistent labor trouble maker for the past two years.

—Feb.

(1) Damage Suit Dismissed.—It was announced Feb. 2, 1917, that a decision had been handed down by the United States District Court for the Southern District of Louisiana dismissing the suit brought against this company by Mrs. Anette B. Callouet et al, claiming triple damages to the amount of \$1,674,995 under the Sherman law.

Suit was brought by heirs of Mrs. E. P. Burgueres, and was one of a number of suits against this company which have been pending for some time in the United States District Court for the Eastern District of Louisiana.

Action was dismissed on the ground that the claim under the Sherman law is not heritable or assignable. As there are a number of other suits brought by heirs or assignees, the decision is regarded as extremely important.

(2) Decision Against State.—It was announced Feb. 15, 1917, that Judge Kelby, of the New York Supreme Court, had handed down a decision in favor of this company in the suit brought by the Attorney-General of the State of New York, asking for a decree to vacate certain grants to land under the waters of the East River, forming part of the land on which the large Brooklyn plant of the company stands.

The decision of Judge Kelby is in accord with the previous decision rendered by Judge Manning and finds that the complaint of the State does not show any cause of action against the company. The decisions of Judge Kelby and Judge Manning establish the absolute right of the company to the property.

(3) President's Statement About Conditions.—On Feb. 20, 1917, Pres. Earl D. Babst, of this company, made the following statement regarding conditions in the sugar trade:

"We greatly deprecate the publicity being given to sensational stories as to the refined sugar supply, which are calculated to advance the price of sugar unnecessarily to consumers. There are ample supplies of raw and refined sugar on hand and in transit throughout the country to take care of normal consumption. We are operating all of our refineries and expect so to continue. The sensational reports now being put out bear the earmarks of clever publicity work. It would seem as if they

were being circulated by Western labor agitators as an aid to their present program of labor agitation at our refineries.

"As is well known, American Sugar Refining Co. has been selling large quantities of sugar at a quarter to a half-cent a pound below existing market prices, and is now taking care of its normal trade at all points. Its deliveries to the domestic trade up to this date are greater than for the same period of 1916."

—Mar.

(1) Report, Year Ended Dec. 31, 1916, shows net earnings from operation and other sources amounting to \$13,703,443, compared with \$8,184,720 in 1915, hence an increase of 121%. The profit from operations alone increased from \$2,901,465 to \$9,756,379.

In 1915 the company showed only 5.43% on its \$45,000,000 common stock, necessitating the withdrawal of funds from surplus to pay the full 7% on the common. Counting the depreciation charges in 1916 the same as in 1915, the American showed 21.7% on its common stock. The company made heavy depreciation charges and also set aside additional extraordinary reserve funds, and after this allowance showed 11.48% on its common stock.

The withdrawal from surplus to pay the full dividend on the common stock in 1915 amounted to \$701,992. In 1914 there was a withdrawal of \$1,198,630. In 1913 there was a withdrawal of \$3,196,195 to make up the deficit. The total deficit for the three lean years was \$5,096,817. The 1916 report shows, consequently, that this entire deficit of the three years was made up in 1916, and even then there remained a balance of \$534,000.

After allowing for the extraordinary reserves, and after paying the 7% on the \$45,000,000 pfd. and the 7% on the equal amount of common stock, the company actually returned \$2,019,909 to the surplus fund.

Technically, however, the deficit was fully made up, for the special reserve fund represents actual cash which will be used for the development of particular branches of the industry.

Liquid assets, as of Dec. 31, amounted to about \$81,000,000, and current liabilities amounted to about \$2,000,000, leaving net liquid assets of about \$72,000,000. The company had cash on hand amounting to \$22,717,453, compared with \$15,624,806 on Dec. 31, 1915. Total assets were \$129,979,775, compared with \$122,061,875 a year previously.

The report reveals that the company disposed of its entire holdings of stock in the Menominee River Sugar Co. It retains its holdings in six beet sugar companies.

The turnover of the company amounted to about \$200,000,000. The manufacturing profit on this was 4½ cents on each dollar of turnover.

(2) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Total income	\$13,703,433	\$6,184,721
Bal. after chgs.	8,319,881	4,512,509
Surp. after divs.	2,019,909	701,992
Deficit.		

(3) Earnings on Stock.—It was stated March 14, 1917, that this company's 1916 net of \$8,319,881 is equal to 11.48% on \$45,000,000 common stock, after provision for full dividend requirements on the \$45,000,000 pfd. stock, compared with 3.91% earned on the same amount of common stock in 1915.

(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$18,348,711, compared with \$16,328,802 Dec. 31, 1915.

(5) Statement by President.—It was stated March 14, 1917, that Pres. Earl D. Babst, of this company, in his annual remarks to stockholders, said, in part: "By reason of its great food value and comparative cheapness sugar is attracting probably greater attention in the markets and economic systems of the world than in any period of its long history."

"The disappearance of the world's

surplus supply, the tightening of embargoes, the control of mercantile shipping in military interest, and especially the recent centralization of buying in the Royal Commission on Sugar Supply of England, are but a few developments of the year.

"The purchase and distribution of sugar, both raw and refined, not only for the United Kingdom, but also for the Allied governmental commissions of France and Italy, have been placed in the hands of the English Royal Commission, which naturally is exercising great influence through shipping control over the sugar operations of the world.

"In this connection it should be recalled that the United States transports in ships from the tropics of both hemispheres the raw material for three-quarters of its sugar supply. One-half of the raw sugar needed to supply this country originates in foreign countries beyond seas.

"The battle lines of Europe enclose two-thirds of the sugar production of the continent. England, France and other foreign countries, heretofore largely dependent on the Central Powers, have turned to Cuba and other sources which ordinarily supply the United States.

"Your company and the other cane refiners, therefore, are called upon to safeguard the sugar supply of the United States not only in competition with each other, but also in competition with foreign refiners and especially with these powerful governmental commissions, served by their nationalized shipping.

"No better illustration could be given of the excess of sugar refining capacity in the United States than the ease with which this large foreign demand has been met. In fact, so large is this excess capacity that the United States could refine annually with profit at least a million tons of sugar for export.

"The American Sugar Refining Co. has 18,949 stockholders, of whom about one-half are women. About 55% of the stock is held in the New England States, 41% in the North Atlantic States and the rest is scattered. There can be no danger of foreign liquidation in the stocks of this concern, for the amount held in 18 foreign countries is equivalent to only three-eighths of 1% of the \$90,000,000 outstanding."

(6) New Director.—It was announced March 14, 1917, that Nathan C. Kingsbury, Vice-Pres. of the American Telephone & Telegraph Co., had been elected a director of this company, succeeding Henry C. Mott, who had declined reelection. Mr. Mott will continue as head of the raw sugar department.

The other retiring directors, Earl D. Babst, Charles H. Allen and George H. Franzler, were re-elected.

Total stock voted was 612,593 shares, the largest representation voted at a stockholders' meeting in many years.

(7) Officers Re-elected.—Announced March 14, 1917, that at a meeting of directors of this company the officers were re-elected.

(8) Statement by Director.—On March 24, 1917, a director of this company was quoted as saying: "The year 1916 was one of extraordinary difficulty for all cane sugar refiners. It required the nicest kind of diplomacy and careful judgment to thread one's way through the maze of perplexities which obscured clear vision last year."

"It looks as if 1917 would be an easier year. The factor of a 3,500,000-ton crop in Cuba has ceased to exist. The Cuban crop will decline very materially below even 3,000,000 tons. Latest official estimates of 2,900,000 tons will be scaled 100,000 to 300,000 tons more before the grinding season is at an end. I look for very high prices for raw sugars this Spring and Summer and with it continued advances in refined. Even a novice can appreciate the fact that it is a comparatively simple matter to make money on an advancing raw material market."

(9) Price Advance.—On March 28, 1917, the company announced an advance in the price of granulated 25 points to 7.25 cents.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

—Apr.

(1) Suits Settled.—A New Orleans dispatch April 6, 1917, stated the settlement of 189 suits brought against this company by Louisiana planters under the Sherman anti-trust law in November, 1913. The claimants in the suits had sought treble damages, totaling \$163,000,000. It was reported that the settlement amount, agreed upon at a conference between the officials and representatives of the planters and cane growers, was between \$600,000 and \$700,000.

According to the statement issued, certain trade regulations agreeable to both refiners and planters were decided upon, and the company will establish a trade laboratory at New Orleans along the lines of the one operated in New York.

Settlement of these suits, it was said, brings to an end virtually all the litigation against the American Sugar Co. pending in State and Federal courts at New Orleans for several years. The Custer suit of the State of Louisiana still is pending, but negotiations for its withdrawal have been started.

In the suits just settled the planters charged the sugar company was operating as an illegal combination in restraint of trade and alleged unfair methods and price-fixing.

(2) Suits Under Anti-Trust Law Settled.—Stated on April 9, 1917, that this company had settled the 189 suits brought against it by Louisiana planters under the Sherman anti-trust law for an amount said to be between \$600,000 and \$700,000. The suits when filed were for damages totaling \$163,000,000.

(3) Settlement in Louisiana Good News for Stockholders.—On April 21, 1917, the "Boston News Bureau" said stockholders of American Sugar had every reason to be gratified at the settlement of legal troubles in Louisiana.

Probably never in the history of American corporations has so complicated or so apparently hopeless a legal tangle been adjusted outside of court as this settlement which has at last been worked out.

It is not alone that American Sugar is relieved from the onus of 185 out of 189 damage suits aggregating over \$160,000,000, but the agreement which the company and the planters have made is one leaving good feeling on both sides.

(4) Large Extra to Be Received from Great Western Holdings.—On April 23, 1917, the "Boston News Bureau" said: "American Sugar will receive a handsome extra from its holdings of Great Western Sugar common. This company is probably the most prosperous beet sugar company in the country."

"American Sugar now owns about 51,400 shares of Great Western common. The \$10 cash extra just declared on this stock will give American Sugar \$510,000 in cash, a sum equal to \$1.10 per share on its own \$45,000,000 common stock."

"Including the regular cash dividend and probable extras this year it seems likely that American Sugar in 1917 will earn very close to half of its common dividend on its return from its investment in Great Western common. Strictly speaking, this cannot be called a return on the investment, for American Sugar does not carry its Great Western common at anything on its books. Any income is, literally speaking, just so much of an extra profit."

"Great Western Sugar can amply afford this \$10 extra cash dividend just declared. The company has \$10,544,000 common outstanding and cash and cash resources are understood to be in the vicinity of \$12,000,000."

"This company has just done the right thing by voting to subscribe to \$2,000,000 of the new Government 3½% bonds when they are issued."

AMERICAN SUMATRA TOBACCO CO.

(1) New Director.—Announced Jan. 30, 1917, that L. Toro, Pres. of the Porto Rico-American Cigar Co., had been elected a director of this company.

—Apr.

(1) Status.—It was stated April 4, 1917, that new interests, including Hailgarten & Co., of New York, had turned attention to the stock of this company. It is planned to list the \$1,000,000 and the \$6,800,000 common on the New York Stock Exchange.

American Sumatra has outstanding \$1,250,000 three-year 5% gold notes, due in 1919, and \$1,000,000 1% pfd. stock, which is paying regular dividends.

The company is in 1917 earning at the rate of \$12 per share on its \$6,800,000 common (par \$100).

Dividends could be started at once on the common, so far as earnings are concerned, but the management prefers to use surplus profits to cut down the floating debt.

The company is in good cash position. Its working capital is \$1,000,000 in excess of par for its notes and pfd. stock.

AMERICAN SURETY CO.

(1) Dividend Increased.—Announced March 20, 1917, that this company had declared a quarterly dividend of 1½%, payable March 31 to stock of record March 24. Three months previously a dividend of 1¼% was declared.

AMERICAN TELEPHONE & TELEGRAPH CO.

(1) Bonds Listed.—Announced Jan. 10, 1917, that the New York Stock Exchange had listed this company's \$80,000,000 temporary 30-year 5% collateral trust bonds, due Dec. 1, 1946.

(2) Earnings Bell Operating Companies, November:

	1916	1915
Gross	\$23,305,003	\$20,086,303
Net after taxes	6,445,434	5,534,720
11 months' gross	240,836,856	213,824,643
Net after taxes	66,684,576	58,309,946

(3) Operating Statistics Nov. 30, 1916:
Miles wire owned, 19,637,485 18,290,000
Bell stat. owned, 6,480,832 5,922,637
Total stations, 9,782,803 9,074,930

(4) Earnings, 1916, Estimated.—On Jan. 10, 1917, the "Boston News Bureau" said, in part:

"One effect of general prosperity throughout the United States in 1916 was to cause the share earnings for American Telephone stock to break into the highest ground reached under the present management."

"American Telephone for 1916 earned a balance for its approximately \$400,000,000 capital stock of 13% in round figures. The final figures will tend to increase rather than lower this preliminary estimate. In 1915 a similar calculation would show a balance for the then \$380,477,000 of stock of 11.8%. In 1914 American Telephone was feeling the depression which was everywhere prevalent as well as the prostrating first effects of the war. Its share profits dropped to 10.5% in that year."

"A balance of 13% for a company like American Telephone is an undoubted safe margin of profit, especially when the liberal allowances made for depreciation and maintenance are taken into consideration."

"In 1916, American Telephone will probably show slightly better than \$50,000,000 expended for depreciation alone, against \$44,888,000 in 1915, and \$34,942,000 no longer ago than 1912."

"The expenditures for maintenance will also run very heavy and may be approximated at \$37,000,000, against \$31,171,000 in 1915."

(5) Control of Competition Held as Illegal.—It was announced at Chicago, Jan. 22, 1917, that Judge Dwyer, of the Circuit Court, had ruled that it is against law and public policy for this company to hold a controlling interest in the Central Union Telephone Co., a competing company which operates in Illinois, Indiana and Ohio.

The decision was given on a petition filed by representatives of minority interests in the Central Union Co. seeking an accounting and asking that control by the American company be declared illegal.

(6) Listed in Philadelphia.—Announced Jan. 23, 1917, \$26,600 additional stock of this company had been listed on the Philadelphia Stock Exchange.

—Feb.

(1) Bonds Listed in Chicago.—Announced Jan. 30, 1917, that the Chicago Stock Exchange had listed \$80,000,000 of this company's 30-year 5% collateral trust gold bonds.

(2) Copper Assets Valuable.—It was stated Feb. 5, 1917, that each cent advance in the price of copper adds at least \$5,000,000 to the value of this company's assets. At current prices for the red metal, its copper alone is worth \$85,000,000 more than the figures at which it is carried on the books.

The same statement is true of its other physical installations, including the enormous amounts of lead. In copper and lead alone the Bell system has tonnages which it would cost \$225,000,000 more than book value to reproduce at existing prices.

At the same time, the company has a lot of assets not capitalized, including patents and other intangibles, upon which commissions and courts have ruled it has a right to earn. These would bring the value of its total assets up to at least \$1,400,000,000.

A reflection will show that if but 4% were to be earned on this body of assets the result would be a net of \$56,000,000, which exceeds substantially the entire interest and dividend charges of the system, including the dividend on American Telephone stock.

If the amount paid in taxes by the company and by the security holders were deducted from the dividend and interest paid, it would reduce the rate paid on the property and assets of this privately controlled corporation to far less than the rate paid on the most favored Government issues.

(3) Bonds Listed in Philadelphia.—It was announced Feb. 8, 1917, that the Philadelphia Stock Exchange had listed \$80,000,000 of this company's \$80,000,000 30-year 5% collateral trust gold bonds, dated Dec. 1, 1916, with authority to substitute on the list permanent engraved bonds on official notice of their issuance in exchange for temporary bonds.

(4) Admitted for Trading at Boston.—It was announced Feb. 8, 1917, that the Boston Stock Exchange had admitted for trading \$80,000,000 of this company's 30-year 5% bonds, dated Dec. 1, 1916.

(5) Bonds.—It was stated Feb. 8, 1917, that in connection with the listing on the Boston Stock Exchange of the new issue of \$80,000,000 American Telephone & Telegraph Co. 5% collateral trust bonds, the company reported the exact division of collateral securing these bonds as follows: 109,000 shares New England Tel. & Tel. Co.; 344,620 shares New York Tel. Co.; 122,087 shares Southern Bell Tel. & Tel. Co.; 233,770 shares Southwestern Tel. & Tel. Co., and 136,000 shares Pacific Tel. & Tel. Co. pfd.

	1916	1915
Dec. gross	\$2,609,654	\$2,128,848
Net after taxes	743,002	607,971
12 months gross	28,041,579	23,553,298
Net after taxes	13,576,767	11,232,117

—Mar.

(1) Report, Year Ended Dec. 31, 1916, shows earnings of parent company as follows:

	1916	1915
Gross	\$50,932,051	\$46,809,354
Net	44,743,376	41,117,487
Bal. after int.		
chgs.	38,012,277	34,618,637
Surp. after divs.	6,831,000	5,518,046

(2) Earnings on Stock.—It was stated March 12, 1917, that this company's 1916 balance after charges of \$38,012,277 is equal to 9.61% on \$385,635,619, compared with 9.09% earned on \$380,477,000 capitalization in 1915.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$70,002,166, compared with \$76,130,948 Dec. 31, 1915.

JANUARY 1 TO APRIL 30, 1917

¹(4) Earnings, Subsidiaries, Year Ended Dec. 31, 1916, compare as follows (all duplications, including interest, dividends, and other payments to American Telephone & Telegraph Co. by associated holding and operating companies excluded):

	1916	1915
Gross	\$270,400,892	\$239,909,649
Net after taxes	75,617,639	66,181,767
Surp. after chgs. & divs.	22,078,589	15,189,049

¹(5) Combined Balance Sheet, subsidiaries (duplications excluded), as of Dec. 31, 1916, shows a profit and loss surplus of \$262,006,150, compared with \$223,401,663 Dec. 31, 1915.

¹(6) Operating Statistics, 1917.—It was announced March 12, 1917, that this company had reported the number of telephone stations in the United States as 9,847,192, an increase of 695,971, of which 577,380 were owned by the Bell companies and 118,591 were Bell connected stations. Of the total number of stations in the system 6,545,490 were owned and operated by Bell companies and 3,301,702 by local, co-operative and rural independent companies or associations.

Total mileage of wire in use for exchange and toll service was 19,850,315 miles, of which 1,344,770 were added during the year. 93% of the total wire mileage is copper wire, 11,468,525 miles, or 58% of mileage, including 160,160 miles of toll wire, is in underground cables, and this percentage is steadily increasing. The underground conduits represent a cost of \$101,100,000 and the cables in the conduits \$121,900,000, a total in underground plant of \$223,000,000.

Net amount added to plant and real estate by all the companies constituting the system during the year was \$66,224,728; total for 17 years, \$796,048,900.

During the year \$84,906,000 was applied out of revenue to current maintenance and depreciation, an increase of \$8,846,000, as compared with 1916. Current maintenance increased \$3,752,000, averaging 3.9% on average plant in service, compared with 3.7% in 1915.

Provision for depreciation was \$49,983,000, an average of 5.6% of the cost of plant and an increase over 1915 of \$5,064,300.

Plant which originally cost about \$44,000,000, but which had reached its limit of serviceable life, was removed and replaced by new and improved construction, or sold, as compared with \$42,000,000 in 1915.

In round figures, operating revenues of the Bell System were \$264,000,000, an increase of \$30,151,000, or 12.9% over last year. Of these revenues, depreciation and maintenance consumed \$84,556,000, an increase of \$8,797,000 over 1915, or 11.6%; traffic expenses consumed \$53,749,000, an increase of \$7,963,000, or 17.4%; commercial expenses \$25,699,000, an increase of \$2,116,000, or 9.0%; general and miscellaneous expenses, \$11,902,000, an increase of \$853,000, or 7.7%; taxes assignable to operations, \$14,916,000, an increase of \$1,915,000, or 14.7%.

"Total gross income," using the term officially provided by the Interstate Commerce Commission, was \$79,353,000, an increase of \$9,787,000, or 14.1% over 1915. Out of this, \$22,114,000 was paid for interest, rents, etc., leaving \$35,160,000 for dividends, and over \$22,000,000 to be carried into surplus.

¹(7) Listed in Philadelphia.—It was announced March 12, 1917, that an additional \$35,400 of this company's stock had been placed on the regular list of the Philadelphia Stock Exchange.

¹(4) President's Comment on Quarterly Report.—In connection with the quarterly earnings statement of this company for the three months ended March 31, 1917, Pres. Theodore N. Vall said in part: "The effect on the Bell Telephone system of the continuing extraordinary business activity throughout the country is shown in the figures submitted herewith. The first two months show increases in telephone operating revenues of \$5,763,000, and in net income of \$632,000, as compared with the same months of 1916. The increase in number of stations, both owned and connecting, was over 200,000 and probably nearly 300,000 during the first quarter of the year, making the total number at April 1 about 10,150,000.

"It is not expected, however, that this rate of increase in stations will be maintained through the year. Coincident with the increase in stations there has been a very heavy traffic, both toll and exchange, which taxes our facilities to the utmost, in spite of the unusually large construction program announced in the annual report, and now well under way.

"In addition to the unprecedented commercial requirements the Bell system is actively assisting the Government in its military preparations.

"But the importance to the country of our comprehensive telephone service is so great that we shall spare neither efforts nor expense to meet the demands on us, first for military preparedness and next for the urgent commercial service.

"While the demands of the Government in time of necessity are paramount, the Government and all its officials recognize the importance to the country of an efficient service to the public, particularly in these times, and will co-operate with the company in its efforts to maintain regular service."

¹(5) Listed in Philadelphia.—On April 16, 1916, \$53,100 additional of this company's stock was placed on the regular list of the Philadelphia Stock Exchange.

¹(6) Station Growth 100% Greater Than 1916 Increase.—On April 18, 1917, the "Boston News Bureau" said that during the March quarter there was a growth in this company's stations of 300,000, or at the rate of over 1,200,000 additional stations a year. During all of 1916, which was a big station year, the expansion was 577,000 of new stations, and the previous year the gain was 392,000 stations. In other words, in the March quarter the station expansion was over 100% greater than the 1916 gain and 200% larger than the 1915 gain.

American Telephone set up an estimate for 1916 construction requirements of \$90,000,000, the largest sum for new construction of any year in its history, almost 50% larger, in fact, than in 1916 and nearly three times the \$32,803,000 expended in 1915.

In January and February the subsidiary system increased its gross by \$5,763,000, or at the rate of \$34,578,000 per annum. This contrasts with a gain in total income in 1916 of \$30,150,925, a prospective increase of about \$4,500,000 over the 1916 gain. However, it is likely that gross income during the balance of 1917 will show a larger actual and higher percentage of increase.

AMERICAN THERMOS BOTTLE CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows this company earned a net income of \$318,634 after making liberal charges for depreciation of plants and investments. This was equivalent to 31.8% on the outstanding stock. Dividends amounting to \$80,000 were paid, leaving \$238,634 to be carried to the surplus account. The total surplus as of Dec. 31, 1916, was \$739,433.

AMERICAN TIN & TUNGSTEN CO.

¹(1) Incorporated on Jan. 18, 1917, in Delaware, with a capital of \$1,500,000, to engage in the business of mining for metals and minerals. Incorporators: Herbert E. Latter and Norman F. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

—Apr.

¹(1) Listed on New York Curb.—On March 29, 1917, the New York Curb Market Association listed 1,500,000 shares of the stock of this company, par \$1.

AMERICAN TIRE FILLER CO., MOUNT VERNON.

¹(1) Incorporated on Jan. 12, 1917, in Washington, with a capital of \$300,000. Incorporators: R. S. Wick, Fred Matson, of Mount Vernon, and W. J. Michelet, of Portland, Ore.

AMERICAN TIRE & RUBBER CO.

¹(1) Capital Increased.—On March 20, 1917, the company filed notice at Columbus, O., of an increase in capital from \$500,000 to \$1,000,000.

• AMERICAN TOBACCO CO.

¹(1) Sales, 1916, Estimated.—It was stated Jan. 25, 1917, that sales of this company and its subsidiaries for 1916 amounted to approximately \$120,000,000. This is an increase of about \$12,000,000 over 1915.

Sales of the American Tobacco Co. proper were in excess of \$68,500,000, a gain of more than \$8,000,000 over the figures of the previous year. This means that the loss in gross in 1915, as compared with 1914, was made up with about \$1,000,000 additional.

Sales of the parent concern in December increased about \$700,000 over December, 1915.

The company's cigarette sales for 1916 were approximately 6,500,000,000 cigarettes, an increase of 1,500,000,000 cigarettes over 1915. Exclusive of new brands, the American Tobacco Co. is manufacturing 23,000,000 cigarettes a day. This is an increase of about 30,000,000 cigarettes a week over the rate of production in January, 1916.

—Feb.

¹(1) Earnings, 1916, Estimated.—On Feb. 9, 1917, the "Wall Street Journal" said that early estimates regarding this company's earnings for 1916 net probably would have to be revised slightly downward. It is good opinion that net for the 12 months, after liberal allowances for depreciation and pd. dividend, will be equal to about 23% for the common stock, as compared with 20% in 1915. This would mean an increase in net of about \$1,200,000.

There is still a possibility that another item will be added to income account, which will mean a difference of about \$400,000, bringing the net increase for the year up to about \$1,500,000. The latter figure will be directly in line with the earlier forecasts, which were 24% for \$40,242,400 common stock.

Coupon elimination has practically made up losses resulting from increased costs in other departments, which have been felt by all tobacco manufacturing companies in this country in the year just closed.

The American Cigar Co., the cigar subsidiary of American Tobacco, earned about 13% for its \$10,000,000 common stock in 1916. This is slightly better than the showing for 1915. Of the \$10,000,000 American Cigar Co. common outstanding, the American Tobacco Co. owns \$7,000,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

(2) Pfd. Stock Reduction Planned.—It was announced Feb. 24, 1917, that stockholders of this company on March 14 would vote on retiring \$25,989,400 par value of the issued pfd. stock and reducing the authorized pfd. from \$80,000,000 to \$54,010,000. This action is proposed because the amount to be retired is now held in the treasury, "having been received and exchanged, principally in 1912, the pfd. stock of the Liggett & Myers Co. and the pfd. stock of the P. Lorillard Co. at par for preferred of the American Tobacco Co."

—Mar.

(1) Sales, Two Months, 1917.—It was stated March 8, 1917, that sales of this company in January and February increased \$2,200,000 over the same two months in 1916. Continuance of this rate of increase over the full year would mean an increase in sales in 1917 of better than \$12,000,000 and would bring the strictly tobacco business of the American Tobacco Co. up to \$80,000,000 in 1917.

January and February also showed a very appreciable gain in net.

The annual report for 1916, to be issued the second week in March, probably will show in the neighborhood of 23% for the \$40,242,400 common stock, as compared with 20% in 1915. In view of the rapid increase in costs in all lines of tobacco goods manufacture the gain over the 1915 figures cannot be considered other than a remarkable one.

In 1916 the total sales of the American Tobacco Co. and its various subsidiaries, including the makers of tobacco accessories, amounted to about \$120,000,000. This represents an increase of about \$12,000,000 over the 1915 business.

The company earned about 13% for its common stock in 1916, or slightly better than the 1915 result. Comment on the increasing costs in the cigar manufacturing business was made in the American Cigar report.

The American Cigar Co. showed an increase in net in January of the current year over January, 1915, almost as large as the increase net of the American Tobacco Co. proper.

(2) Report, Year Ended Dec. 31, 1916, shows income account as follows:

	1916	1915
Net earnings....	\$8,600,339	\$8,463,483
Bal. after chgs. & pfd. divs....	9,136,076	8,071,813
Surp. after com. dividends....	1,087,596	23,333

(3) Earnings on Stock.—It was stated March 14, 1917, that this company's 1916 balance after pfd. dividends of \$9,136,076 is equal to 22.70% on \$40,242,400 common stock, compared with 20.05% earned on the same stock in 1915.

(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$37,081,533, compared with \$35,993,939 Dec. 31, 1915.

(5) Directors Re-elected.—Announced March 14, 1917, that at the annual meeting of this company retiring directors were re-elected.

(6) Pfd. Stock Retirement.—It was announced March 14, 1917, that at a special meeting of this company stockholders voted to retire \$25,989,400 of the pfd. stock, thus reducing the authorized pfd. stock from \$80,000,000 to \$54,010,600.

The reason for the reduction is that \$25,989,400 pfd. stock issued is now held in the treasury of the company, having been received in exchange for the pfd. stock of Liggett & Myers Tobacco Co. and P. Lorillard Co.

(7) Pfd. Stock Decreased.—Announced March 19, 1917, that this company had filed with the Secretary of State of New Jersey a notice of a decrease in the preferred stock of \$25,989,400. This leaves the total preferred at \$54,010,600. The common totals \$100,000,000.

—Apr.

(1) Cost of Excess Profit Tax Figured by Experts.—On April 24, 1917, Dow, Jones & Co. stated that American Tobacco Co. experts figured that the excess profit tax on the 8% basis would cost the company \$118,000 in 1917. This is equal to only one-fourth of 1% one the \$40,242,400 common stock outstanding.

On the same basis the tax would cost the United Cigar Stores Co. only \$50,000, or less than one-fifth of 1% on the \$27,000,000 common.

The estimate given above on the American Tobacco Co. does not take into consideration any excess internal revenue tax which undoubtedly will be imposed.

One thing is practically certain, however, and that is the consumer will pay the tax.

AMERICAN TOY CORP.

(1) Incorporated on Feb. 7, 1917, in Delaware, with a capital of \$250,000, to manufacture metal specialties and toys. Incorporators: Arthur W. Britton, Samuel B. Howard and Louis H. Gunther, all of New York City.

AMERICAN TRANSATLANTIC CO.

(1) Dividend.—Announced Jan. 18, 1917, that this company had declared a dividend of 30% on the \$2,500,000 capital stock.

(2) Statement by Company.—On Jan. 18, 1917, this company issued the following statement:

"This is the steamship company organized in 1915 for a general shipping business. Eleven ships were acquired and granted American registry under the act of Congress of August, 1914. Subsequently four of these ships were seized by Great Britain and are still held awaiting prize court adjudication.

"The remaining seven ships have been operated as general cargo carriers throughout the last year between the United States, Mediterranean, and South American ports."

AMERICAN TYPE FOUNDERS CO.

(1) Dividends.—Announced March 15, 1917, that this company had declared regular quarterly dividends of 1 1/4% on pfd. and 1% on common stocks, both payable April 14 to stock of record April 10. A 2% scrip dividend was also declared. This will be used in connection with subscriptions of stockholders to \$1,000,000 of debenture bonds to be issued later and sold for purpose of retiring bills payable of company.

(2) Bond Issue Authorized.—Right to Subscribe.—Announcement was made March 26, 1917, that the company had authorized issuance of \$1,000,000 6% sinking fund gold bonds, due May 1, 1937.

Holders of common stock of record March 20 are offered right to subscribe to the new bonds at par to the extent of 25% of their holdings.

In addition to the regular quarterly cash dividend, a scrip dividend of 2% has been declared on the \$4,000,000 common stock of record March 20, which scrip in addition to the redemption expressed on its face entitles holder to privilege of having the same receivable by company at its face value in payment of 8% on account of any subscription at par to the new bonds, remaining 92% of such subscription to be in one cash payment or in instalments as provided.

(3) Circular to Shareholders.—A circular issued to shareholders in March, 1917, said in part: "Notwithstanding the ease with which the requirements of the company for its growing business have been met, your directors feel that conservative financing would be better served by funding the larger part of its indebtedness in form of bonds at a fixed rate of interest protected by a sinking fund payable annually and extinguishing the debt by gradual retirement of the bonds, rather than by relying upon short time notes and bank loans, subject to the frequently changing conditions of the money market.

"These bonds will not increase the indebtedness of the company nor materially increase its interest charges, but will largely reduce the floating indebtedness now carried in the form of

commercial paper. Net profits the last fiscal year were \$361,113 in excess of all interest charges.

"There has been an increase in volume of our sales, business of the first six months of our current fiscal year showing an increase of more than 15% over sales of the corresponding months of the last fiscal year to \$909,178."

"This stability and the soundness of our condition is evidenced by fact that our indebtedness as shown in last annual report was only 28.61% of our corporate property. Corporation has paid \$5,508,649 in dividends upon preferred and common stocks, and has retired \$555,000 of its earlier bonds by operation of its sinking fund and accumulated a surplus amounting at end of the last fiscal year to \$909,178."

AMERICAN UTILITIES CO.

(1) Report, Year Ended Jan. 31, 1916.—Shows gross income of \$54,675, with net income of \$34,929. Profits on sales of securities in the year were \$103,401, which, with the surplus of \$36,186, Feb. 1, 1916, made gross surplus of \$174,517. From this was paid \$42,000 in dividends, and \$32,517 added to contingent reserve, leaving surplus, Feb. 1, 1917, \$100,000.

AMERICAN VALVE & TANK CO.

(1) Incorporated in January, 1917, in West Virginia, with a capital of \$250,000. Incorporators: C. W. Evans, J. L. Hall, H. L. Ross and others.

AMERICAN VANADIUM CO.

(1) New President.—It was announced Feb. 21, 1917, that at a meeting of directors of this company J. Leonard Replogle was chosen Pres. to succeed James J. Flannery. Other officers and directors were re-elected. Mr. Flannery remains chairman of the board and retains a large interest in the company.

AMERICAN WATER WORKS & ELECTRIC CO., INC.

(1) Dividends Discussed.—It was stated March 16, 1917, that at a meeting of the board of this company consideration was given to, but no action was taken, on the matter of the payment of either current or accrued dividends on the 7% cumulative pfd. stock.

(2) Earnings, Three Months Ended Dec. 31, 1916, compare as follows:

	1916	1915
Water Wks. prop.	\$1,102,027	\$1,011,391
West Penn prop.	1,809,974	1,427,751
Total	\$2,912,001	\$2,439,142
Six mos. gross		
Water Works....	2,246,427	2,033,757
West Penn Trac.	3,408,919	2,701,389
Total	\$5,655,346	\$4,735,146

(3) Income Account, Three Months Ended Dec. 31, 1916, exclusive of West Penn Traction & Water Power Co.:

	1916	1915
Net earnings....	\$336,466	\$319,987

Prop. West Penn earn. not inc. above	311,000	282,000

—Apr.

(1) Plans for Merger of Controlled Companies Completed.—See West Penn Traction Co.—Item No. 1.

AMERICAN WEST AFRICAN LINE, INC.

(1) Change in Name.—Announced at Dover, Del., Jan. 27, 1917, that this company had filed notice of a change in name to Wadrop West African Line Co., New York.

AMERICAN WINDOW GLASS CO.

(1) Bonds.—Announced Jan. 4, 1917, that this company had set aside \$300,000

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

from its sinking fund for the purpose of repurchasing at 95 and interest its 10-year 6% bonds issued in 1912.

Tenders of the bonds will be received by the Commonwealth Trust Co., New York, up to and including Jan. 9.

AMERICAN WINDOW GLASS MACHINE CO.

1(1) Deferred Dividend.—Announced Jan. 23, 1917, that this company had declared a dividend of 12% on the pfd. stock on account of accumulated dividends.

—Apr. . . .

1(1) Extra Dividend.—Announced April 12, 1917, that this company had declared an extra dividend of 12% on its pfd. stock, on account of accumulated dividends. It is payable April 27 to stock of record April 20.

AMERICAN WOOLEN CO.

1(1) Unfilled Orders, Jan. 1, 1917.—On Jan. 15, 1917, Pres. Wood, of this company, announced that the total unfilled orders on the books, as of Jan. 1, 1917, amounted to over \$40,000,000. He stated the outlook for the woolen business is remarkably bright.

1(2) Earnings in 1917, Estimated.—On Jan. 17, 1917, the "Boston News Bureau" said that the announcement by Pres. Wood, of this company, that orders on the books amounted to over \$40,000,000 at the opening of the year was virtual assurance that 1917 would at least equal, if not surpass, the results of 1916, the best in the company's history.

It was only a few years previously that \$40,000,000 was considered a pretty fair turnover for the year for American Woolen. As it is, American Woolen is booked ahead for only the current season or into the Summer, and unless there is a complete revolution in the woolen and worsted business it stands to do a gross in 1917 of \$75,000,000.

The strong and encouraging phase of this enormous booking of curving orders is that it is all civilian business and practically all domestic. The story of cloth is that of shoes. Notwithstanding constantly advancing prices, the same pressure to buy continues, and retailers report that there is as yet no tendency to retrenchment on the part of the consuming public.

With Great Britain commandeering all British wool supplies and naming maximum prices on "tops"—thus restricting the United States to its own and South America's production, the wool situation is still coming in for considerable attention.

It is understood that American Woolen, in accordance with its practice, is "covered" on its raw material.

—Feb. . . .

1(1) Annual Meeting March 6.—Announced Feb. 6, 1917, that the annual meeting of this company would be held at Springfield, Mass., March 6, at noon. Transfer books close Feb. 20 and re-open March 7.

1(2) Goods for Fall Delivery Withdrawn.—It was announced Feb. 7, 1917, that as a precautionary step this company had withdrawn all its lines of goods for the fall delivery. The decision was construed as a move to clear the way for probable large clothing orders from the United States Government in the event of war.

1(3) Notes.—See Ayer Mills.—Item No. 1.

1(4) Dividend Discussion.—On Feb. 21, 1917, the "Boston News Bureau" said it was understood that the executive committee of this company would recommend to the full board at the dividend meeting in March that the current dividend of 1 1/4% be designated as a regular quarterly payment.

When directors inaugurated dividends on the common stock in 1916 with a 1 1/4% declaration it was simply labelled "a dividend," the idea being that although quarterly payments were con-

templated, the future was so uncertain as to raise a question as to the advisability of naming it quarterly at the very outset.

American Woolen has had two years of unparalleled prosperity, having earned in 1915 and 1916 nearly \$30 a share for its junior issue, notwithstanding large expenditures for depreciation and new equipment out of earnings. At the same time it has corralled a number of small, profitable mills and greatly increased its capacity, so that to-day it is a comprehensive woolen and worsted mill organization.

Disregarding its big equity in the Ayer Mills, American Woolen has plants carried at over \$45,000,000. In addition it has net quick assets of \$25,000,000, or a total book valuation of \$70,000,000. Applying the \$40,000,000 pfd. at par against this valuation there is obviously a book asset value of \$150 a share for the \$20,000,000 common stock.

Subject to change by final figures, American Woolen earned close to \$18 a share for its common stock in 1916. In 1915 it earned nearly \$12. In 1917 it will earn at least the average of the last two years, or \$15 a share.

As for peace conditions, so far as investigation can prove, Europe is not likely to be a serious competitor for 18 months after the war.

—Mar. . . .

1(1) Earnings, 1916, Show Large Increase.—On March 1, 1917, the "Boston News Bureau" said that the earnings statement of this company for the 12 months ended Dec. 31 would prove sensational. Net earnings for 1916 were well in excess of \$8,000,000, or over \$3,000,000 greater than in 1915 and 50% larger than the previous record total of \$5,798,000 in 1909.

After payment of pfd. dividends the balance for the \$20,000,000 common stock was in excess of \$5,250,000, or the equivalent of better than \$17.50 a share. A year previously the balance for the junior issue was under 12%, and in 1909 on \$30,000,000 common, earnings were equal to 10.6%. In other words, American Woolen earned \$5.50 more for its common in 1916 than in any other year of its 18 years' existence.

These profits are based on an inventory taken "at cost and under" by all of the 50 plants under the American Woolen wing.

After a special depreciation charge in addition to that regularly charged out of current earnings, and after the payment of \$1,000,000 in common dividends, American Woolen was able to add to surplus \$2,000,000, thereby increasing profit and loss surplus to \$11,250,000.

At the same time the net quick assets increased to over \$26,000,000, which represents a gain of \$3,500,000 during the year. Notwithstanding the additions to property account which American Woolen is constantly making and which brought the Bradford Woolen Mill, of Kentucky, into the fold in 1916, working capital has always been a source of solicitude with the company. At the opening of the year it was equal to better than \$65 a share on the pfd. stock.

1(2) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net profits-----	\$8,210,761	\$5,160,295
Bal. after chgs.		
& pfd. divs.---	3,063,818	1,280,685
Surp. after com.		
dividends ----	2,063,818	1,280,685

1(3) Earnings on Stock.—It was stated March 6, 1917, that this company's 1916 balance after pfd. dividends of \$3,063,818 is equal to 13.31% on \$20,000,000 common stock, compared with 6.40% earned on the same stock in 1915.

1(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$11,268,939, compared with \$9,305,121 Dec. 31, 1915.

1(5) Statement by President.—It was announced March 6, 1917, that Pres. Wm. M. Wood, of this company, in his annual remarks to stockholders, said, in part: "A very marked improvement

was recorded in 1916 over 1915 in the total volume of business of the company. This business showed an increase of over 40% and there is every reason to expect another prosperous year in 1917. At the beginning of the present year there were \$40,550,000 of unfilled orders on the books and at the present time there are over \$52,000,000. This is the result not only of reduction of European competition, subsequent to the war, but also in greater part, to increased purchasing power of the people of the United States.

"An extraordinary increase in the cost of raw materials and large volume of business are responsible for increase in indebtedness as shown in report. Prices on wool have increased from 50 to 65% over prices at the close of 1915, while the cost of dyestuffs has risen much higher.

"The needs of the company, for the coming season, however, have been anticipated by securing advance supplies. Despite the rapid advances made in American dyestuffs the domestic production is still far from meeting requirements of the wool manufacturing industry.

"A promising export trade has developed in certain lines of staple goods during the past year, and American Woolen is now directly represented in five South American countries, and in Cuba, besides having selling connections in many of the other markets of the world.

"During the year, American Woolen purchased the plants of the Bradford Mills in Louisville, Ky., for the spinning of worsted yarns. All the mills of the company are free from leases, bonds, and mortgages of any kind, maintained at the highest point of efficiency, and fully protected by insurance.

"The liquidation of the New Jersey company is substantially complete, and stock of the company, and dividends thereon, are tax exempt in that State."

1(6) Comment on 1916 Report.—On March 9, 1917, the "Boston News Bureau" said, in part: "The American Woolen Co. report for last year is probably the most romantic statement ever issued by an American textile company, net profits of \$8,200,000 representing the largest aggregate earnings ever accumulated in one year by a single textile organization in the world.

"The earnings of \$8,210,761 are over \$3,000,000 greater than in 1915 and over \$5,400,000 greater than in 1914, or, in other words, substantially greater than the combined showing of the two previous years. Compared with 1909, the previous best year profits are nearly \$2,500,000 greater.

"The wonderful success of American Woolen last year only serves to emphasize the record of its 18 years' history. In that period the big woolen company has earned a total of \$63,736,616 and has paid out in dividends \$39,409,245, leaving a balance of \$24,327,371—a sum over \$4,000,000 greater than the entire junior stock issue.

"Last year's showing alone should be sufficient explanation of the directors' decision to place the common stock upon a regular \$5 dividend basis. The balance for the \$20,000,000 common was equal to \$27.05 a share before depreciation and after the extraordinary charge of \$2,346,942 the balance is equal to \$15.31 a share, or the equivalent of three years' common dividends. There is little doubt that a fresh balance of as much more will be shown this year, which means six years' dividends earned in 24 months.

"On the financial side the improvement in American Woolen is striking, working capital now totalling over \$26,500,000, a gain of over \$3,000,000 during the year and an improvement of nearly \$4,700,000 in two years.

"American Woolen starts the new year in the best condition of its history. It has the largest unfilled orders on record at a single time, \$52,000,000, and the largest supply of wool to care for them. Unless the second half year shows an extraordinary slump, 1917 should be another record-breaking year."

JANUARY 1 TO APRIL 30, 1917

(7) Government Order.—Announcement was made March 21, 1917, of the receipt by this company of an order from the United States Government for \$1,600,000 worth of overcoatings for the army. It calls for 425,000 yards of the highest grade melton at \$3.54 a yard, with final delivery five months from the date of the order.

—Apr.

(1) Heavy Army Orders Predicted.—On April 5, 1917, the "Boston News Bureau" said that the quick response of this company's shares to the prospect of active war between the United States and Germany obviously reflected the general belief that a call for 500,000 men, with successive increments if necessary, would mean heavy army orders.

It has been recognized in New York trade circles that—regardless of war—as soon as Congress got down to business the army and its equipment would come in for considerable attention. Estimates of Government buying range from \$6,000,000 to \$10,000,000.

To this date in 1917 American Woolen has accepted orders from the Government to the amount of nearly \$3,500,000. These include the overcoating order of 600,000 yards at \$3.54 (\$2,124,000); a smaller overcoating order of 175,000 yards at \$2.32 (\$406,000), and 180,000 blankets at \$5.09 (\$916,200), making a grand total of \$3,446,200.

The task of equipping the army and the militia is bound to fall largely upon this company.

(2) Government Order.—Reported on April 5, 1917, that this company had received its first share of the Government business in the shape of an order for about \$1,500,000 of overcoatings for the army. It calls for 425,000 yards of the highest-grade melton at \$3.54 a yard with final deliveries about five months from date. The company still has to hear from the Government blanket order, which calls for 150,000 blankets upon which it bid \$5.09 a blanket.

(3) Unfilled Orders at Record Rate.—It was reported April 11, 1917, that the unfilled orders of this company at the close of business March 31 were in excess of \$68,000,000, the largest aggregate of forward business in its history.

In the succeeding ten days enough additional business was secured to bring up the total of unfilled orders to nearly \$70,000,000.

In the entire 1909 year American Woolen handled less than \$2,000,000 of business.

Early in March, the time of the annual meeting, the company had \$52,000,000 of orders, indicating that incoming business has been at the rate of \$4,000,000 a week. At the opening of 1917 orders were only \$40,000,000, though the Spring selling season was well under way at that time.

It is practically a foregone conclusion now that American Woolen, for the first time, will enter in 1917 the ranks of American corporations doing \$100,000,000 gross per annum. Its development of the export field in Canada and in South America has given it an international importance, which the scope of \$100,000,000 operations heightens.

(4) Wages of All Employees Increased.—Announcement was made by this company April 24, 1917, of an increase in wages of employees of all its mills. The advance in no case will be less than 5%.

(5) Dividends Not Affected by Wage Increase.—Pres. Wm. Wood, of this company, in speaking of the latest wage advance, told a representative of the "Daily News Record" at Lawrence, Mass.: "This means at least \$1,500,000 increase in our payroll per year, and will affect considerably more than 30,000 employees."

"We make the increase out of regard for the high cost of living, and in accordance with our policy to grant increases whenever we see a chance, before being asked. The lowest paid help will receive the greatest benefit."

"Recent Government orders, added to an enormous civilian business, have crowded our capacity so that we are asking some customers to release us from contracts. They are responding

patriotically. As things are, the increase should not affect our 5% dividend on the common stock, and certainly does not endanger our 7% pfd. dividend, which we have never missed in 18 years."

"As for after the war, we are taking our chances with other manufacturers."

• AMERICAN WRITING PAPER CO.

(1) New Control.—On Feb. 8, 1917, the "Boston News Bureau" said that control of this company had passed to new interests. In November it was announced that American Writing Paper was no longer controlled by the First National Bank of New York interests. Their holdings were sold at a figure many points above the current market level to the new interests. As a matter of fact, the First National Bank had lost actual control of the company in the open market before it started private negotiations. What it did was to sell the balance of its ownership to the new interests. These interests have since acquired sufficient additional stock to give them, if not an actual, at least moral control of the property.

It is understood that the new group includes Ladenburg, Thalmann & Co., with whom will be associated James Wallace, of the Central Trust Co.; Henry Evans, of the Continental Insurance Co., and the two sons of the late Anthony Brady. It is not improbable that Galen Stone, of Hayden, Stone & Co., will also acquire a personal interest in the property and later go on the board.

American Writing Paper undoubtedly will be refinanced by these new owners when the proper time arrives, it was stated.

(2) Report, Year Ended Dec. 31, 1916, stated that as a result of the disappearance of the great depression which existed in the paper trade in former years, operations of this company during 1916 proved very satisfactory, with gross sales the largest in the history of the company, both in point of tonnage and value.

The increased income and profits of the year made it possible to appropriate larger amounts for improvements and betterments, approximately \$200,000 for improvements being charged to operating expense during the year. This expenditure is represented by permanent additions to the plant which already have paid for themselves in increased production and decreased cost.

The annual cash sinking fund and bond interest requirements were taken care of at maturity. During the year \$321,000 par value of bonds were purchased for the sinking fund. Bonds now held in the sinking fund amount to \$3,127,000 par value.

There were also purchased during the year \$101,000 of bonds to be held in the treasury and used as directors may determine. Bonds in the treasury in addition to sinking fund now amount to \$1,501,000 par value.

As of Dec. 31, 1916, the aggregate amount of bonds in the sinking fund and company's treasury amount to \$4,628,000 par value.

During 1916 numerous changes were made in the methods of manufacture, which the management believes will be efficient and economical.

These changes, together with the prospects of continued profitable business, should result in satisfactory returns for the year 1917, it was stated.

(3) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$4,065,122	\$1,273,034
Surp. after chgs.	2,524,378	†126,955
†Deficit.		

(4) New Directors.—It was announced Feb. 8, 1917, that the following had been elected to the Board of Directors of this company: Henry Evans, James N. Wallace, Frank M. Tait, Galen L. Stone, J. K. Branch, James D. Callery, Parmely W. Herrick, Otto Marx, W. C. Lorse, Harry B. Lake and Frederick B. Van Vorst.

The above, together with Walter T. Rosen, of Ladenburg, Thalmann & Co.,

and Milton H. Marcuse, Pres. of the Bedford Pulp & Paper Co., of Richmond, represent the new interests which have acquired a large holding in the securities of the company.

Walter T. Rosen was elected a member of the executive committee. Arthur C. Hastings will continue as Pres.

(5) Comment on Annual Report.—On Feb. 10, 1917, the "Boston News Bureau" said: "The new interests in American Writing Paper have been prompt and frank in disclosing their identity. They have made their investment only after most painstaking study of the company's physical condition and careful study of its business prospects."

"The point is not generally appreciated that a company with \$10,000,000 normal gross income and a fixed charge of \$1,000,000 starting it in the face year after year could not go after business as aggressively as a corporation with a fixed charge of but \$400,000 and gross income of \$12,000,000 to \$14,000,000. And this promises to be the company's ultimate alignment."

"American Writing Paper fulfilled predictions in 1916 by earning a balance of 20.2% for its \$12,500,000 pfd. after deducting full interest and sinking fund charges. And this was after absorbing \$250,000 of construction costs in operation."

"Excellent as were the results, they do not measure up to the expectation of friends of the company for 1917. This year it is felt that American Writing Paper should be able to maintain at least the earning pace established for the December quarter. During that period the company earned net for the stock almost \$1,000,000, or at the rate of better than 30% for the preferred."

(6) Statement by Director.—On Feb. 10, 1917, Henry Evans, of New York, a new director, in speaking of the outlook of this company under the control of the new interests, was quoted as saying: "I believe that American Writing Paper pfd. stock is a purchase and that the company has a bright future. There are back dividends of 128% on this issue, and while the stock may not be as quick to respond to earnings as was Mercantile Marine pfd., still the possibilities are there. I expect to see them realized."

(7) Directors.—Announced Feb. 27, 1917, that at the annual meeting of this company the following directors were elected for a term of three years, from May 1, 1917: Henry Evans, J. N. Wallace, G. B. Holbrook, H. B. Lake, Henry Marcuse, C. J. Schmidlapp and Edwin Packard. There was 116,068 shares represented in person or proxy. All actions taken by directors during 1916 were unanimously approved by stockholders.

—Mar.

(1) Earnings, 1917, Estimated.—It was stated March 10, 1917, that this company in 1917 likely would produce a balance for the \$12,500,000 pfd. substantially better than the \$2,500,000 earned in 1916. The company began 1917 in most satisfactory manner. January net profits were 110% greater than the same month of previous year.

Plans are being informally considered to give the business the last refinements of organization and increased efficiency.

(2) Earnings, 1917, Estimated.—On March 23, 1917, the "Boston News Bureau" said that this company is practically certain to exceed in 1917 the performance of 1916, when a balance of 20% was earned for the \$12,500,000 pfd. stock.

The expectation is that the company can reasonably count upon net profits for the stock after all charges of \$3,500,000. This would be equal to 28% on the pfd.

AMERICAN ZINC CO.,
HELENA, MONT.

(1) Sale.—See Empire Zinc Co.—Item No. 1.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

● AMERICAN ZINC, LEAD & SMELTING CO.

¹(1) Gas Contract Valuable Asset.—On Jan. 22, 1917, the "Boston News Bureau" said that a rumor was current that this company had struck oil. Literally, this is not correct, but figuratively speaking, the company may be said to have "struck oil" in that the natural gas contract which it made a year or more previously with the Osage Indians promises to develop into a most valuable asset.

The contract in question covers the lease of 180,000 acres of presumable gas lands, upon which the company guaranteed to expend not less than \$100,000 to determine whether gas in commercial quantities existed. The gas has been found and is probably now being piped to the Caney and Dearing plants of the American Zinc Co., where gas for fuel is essential for commercial operation.

The American Zinc Co. guarantees to take not less than 15,000,000 feet of gas per day at a price of 3 cents per thousand feet. This is a very low figure and compares with a price of 6 or 8 cents which other natural gas distributors are charging to commercial users. A price of 30 to 35 cents per thousand feet is charged to domestic consumers. At the time the contract was made with the Osage Indians it was regarded by the directors as a master stroke of good business, insuring as it does the permanency of the Caney and Dearing smelters. An official of the company recently casually remarked that the contract was probably worth \$5,000,000 to the company.

—Feb.

²(1) Earnings in 1916.—On Feb. 21, 1917, the "Boston News Bureau" said that against predictions that this company for the year 1916 would show net profits of at least \$9,000,000, it was able to state that the actual operating excess of income over outgo, including bond interest, was \$9,273,000.

The real operating profits of the company for the 12 months of 1916 showed a balance equal to \$45 per share on 193,000 shares of common stock, after \$6 per share on 80,000 shares of pfd. stock outstanding in the hands of the public.

The company is in very strong financial position with net quick assets at the end of the year amounting to \$4,300,000. Furthermore, the company has made sales which guarantee net profits for the first six months of 1917 of around \$2,500,000, or well over \$10 per share after charging out the full year's pfd. stock requirements of \$480,000.

—Mar.

³(1) Dividends.—Announced March 20, 1917, that this company had declared a dividend of \$1 on the common and the regular quarterly dividend of \$1.50 on the pfd. stock, both payable May 1 to stock of record April 24. The previous common dividend was paid Feb. 1, 1917.

²(2) Report, Year Ended Dec. 31, 1916, showed net profits amounting to \$9,307,967, an increase of \$4,014,089 over 1915.

—Apr.

⁴(1) Directors Re-elected.—Announced April 12, 1917, that at the annual meeting of this company retiring directors were re-elected.

²(2) Net Profits Quarter Ended March 31, 1917, were \$916,000, after liberal allowance for depreciation, etc. These earnings are equal to almost eight times present pfd. dividend requirement of \$6 per share on 80,000 shares and are at rate of \$16 on common after allowing for pfd. stock dividend.

First quarter profits in 1916 were \$2,255,000 and in 1915 \$320,251.

As against common stock earnings for the first quarter of 1917 at rate of \$16 per share the company is paying at rate of only \$4 per share on the Junior Issue. It is competent opinion company can do equally well for the ensuing three months, although at present there is uncertainty and unsettlement in mar-

ket for all metals, copper as well as spelter, stated the "Boston News Bureau" April 23, 1917.

AMES SHIPBUILDING & DRYDOCK CO.

¹(1) Large Contracts on Hand.—Announced from Seattle, Wash., on March 28, 1917, that this company had received contracts to build nine large steel steamships at a cost of more than \$11,000,000. Seven ships of 9,000 tons each for the Cunard line are among the bounts. Keels for the first three Cunarders will be laid during March, and the number of workmen at the plant will be increased to 3,000 as soon as possible. Seattle yards now have contracts to build fifteen large Cunard steamers.

AMETHYST MINING CO.

¹(1) Proposed Consolidation.—See Batchelder Mining Co.—Item No. 1.

AMHERST PLANOS, LTD.

¹(1) Proposed Capital Increase.—Stated on April 7, 1917, that on two different occasions the directors of this company had passed a by-law increasing the capitalization by \$25,000, bringing it up to \$525,000. The directors took this action first in March of 1916, and recently in the same month of 1917. The shareholders are now called for a special meeting to be held April 10. The notice calling the meeting takes particular pains to state that this is not a new issue, but it is the same as the one previously approved by the directors. The annual meeting of the company is to be held on the same day at an earlier hour.

Amherst Planos, Ltd., has done a large business at its factory in Amherst and its retail store in Halifax, but it has felt the war. The preferred dividend is considerably in arrears, though it is stated that the earnings are in a satisfactory state. The purpose of the new capital is not stated in the notice, but it has been understood for some time that the management of the company was proposing entering upon the manufacture of another instrument besides pianos.

AMPARO MINING CO.

¹(1) Extra Dividend.—Announced Jan. 24, 1917, that this company had declared the regular quarterly dividend of 3% and an extra dividend of 2%, both payable Feb. 10 to stock of record Jan. 31.

—Apr.

¹(1) Extra Dividend of 2%.—This company April 25, 1917, declared an extra dividend of 2%, in addition to the usual quarterly dividend of 3%, payable May 10 to stock of record April 30.

AMPCO ROLLING MILLS CORP.

¹(1) Incorporated on March 17, 1917, in Delaware, with a capital of \$1,000,000, to buy, lease, develop and control steel and bronze metal rolling mills. Incorporators: Edgar E. Warner, Peter Weber and A. E. Martin, Milwaukee, Wis.

AMSTON MOTOR CAR CO.

HELTON, CONN.

¹(1) Incorporated in April, 1917, in Connecticut, with a capital of \$3,000,000. Incorporators: Conrad D. Trubebach, Jas. T. Connor and L. R. Watkyns, all of Bridgeport, Conn.

● ANACONDA COPPER MINING CO.

¹(1) Production, December, 1916.—Announced Jan. 4, 1917, that this company in December produced 29,000,000 lbs. of copper, compared with 25,500,000 in November and 31,500,000 in October.

²(2) Comment on December Production.—On Jan. 5, 1917, the "Wall Street Journal" said that this company's December production of 29,000,000 lbs. registered the surprising increase of 3,500,000 pounds over November's output.

Were it not for the general cold weather which prevailed throughout the month, and Christmas intervening, when all the mines shut down for a full day, December production might have equalled if not exceeded October's output of 31,500,000 pounds.

³(3) Output, 1916.—It was stated Jan. 8, 1917, that the enlarged smelters of this company in 1916 produced 336,900,000 pounds of copper, which was a greater amount than can be claimed by any other individual mining company. This total represented a gain of 100,000,000 pounds over the 1914 output. In 1916 the output totaled 254,800,000 pounds.

Into the year's operations have been calculated the output coming from custom ores, although the Anaconda mines supply by far the greater part of the total. North Butte Mining Co. shipped ores yielding approximately 24,000,000 pounds of copper, so that there remained 312,900,000 pounds as the contribution of the Anaconda's own mines and the various small shippers and leasers selling ores to this company.

Prior to 1916 the best period for Anaconda was in 1912, when total output of its plants ran close to 300,000,000 pounds. The 1916 monthly yield varied from 33,300,000 pounds in April, to 23,200,000 a year previously.

At the top level, production was carried on at the rate of 399,600,000 pounds per annum, while a basis of 278,400,000 pounds was represented by the lower figure.

⁴(4) Smelter Site Bought.—A Butte, Mont., dispatch Jan. 8, 1917, stated that this company had purchased a smelter site on Spokane River near the city of Spokane, where an electrolytic zinc plant will be built for treatment of zinc ores from Douglas and other mines in Coeur D'Alene. The power will be furnished by the Washington Power Co., with which satisfactory arrangements have been made.

⁵(5) Development.—On Jan. 18, 1917, a telegram to the "Boston News Bureau" said: "At a depth of 2,800 feet Anaconda has encountered a body of ore in the Leonard mine showing the extraordinary width of 50 feet and carrying an average copper content of more than 5%. Part of the vein shows 7% copper, while some of it runs as low as 2%. The entire ore body, however, is of commercial grade."

"Another body of ore is now being opened on the same level between the Leonard and Tramway mines that promises to be equally good and even larger, as at one place it has a width of 150 feet and at another point a width of 100 feet. This body of ore averages 3½% to 4% copper."

⁶(6) Earnings, 1916, Estimated.—On Jan. 22, 1917, the "Boston News Bureau" said there would seem to be no good reason why this company for the 12 months just closed should not measure up to the prediction of Pres. Ryan, made in the middle of 1915, that profits for the period ending Dec. 31 would approximate \$45,000,000. This would be equal to a trifle less than \$20 per share on 2,331,250 shares.

A profit of 14 cents per pound on 322,000,000 pounds of copper would produce net earnings of \$46,500,000. This calculation assumes an average of 24 cents received for the copper and an average cost of 10 cents per pound after all miscellaneous revenues of every description are credited to operating expenses.

Under normal metal prices Anaconda is assured of a miscellaneous revenue of \$6,250,000, of which \$5,000,000 will be derived from securities of companies which it owns outright.

The production of copper from Anaconda's Butte mines during 1916 dated March 1, 1915; due March 1, 1918; amounted to approximately 332,000,000 pounds, an increase of 103,000,000 pounds over the output of 1915.

One of the most spectacular developments of 1916 was the success attendant upon the company's venture in the zinc producing industry.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

In addition to Anaconda's large quantities of low-grade zinc, such as can be treated by the electrolytic process, four of its 26 mines in the Butte district are distinctly zinc mines, some of them containing zinc of such a character as to permit of direct smelting.

(7) Operations Stopped by Snow.—A Butte, Mont., dispatch Jan. 30, 1917, stated that the inability of the Great Northern R. R. to handle ore trains between Butte and Great Falls on account of the heavy snowfall, causing congestion of ore at Butte, forced this company to close down seven of its largest mines Jan. 29 for two shifts. Mines closed down were West Colusa, East Colusa, Tramway, Pennsylvania, Leonard, Berkeley and Silver Bow.

Normal total production per day of these mines is about 5,000 tons.

(8) Brass-Making Plans Reported.—It was reported Jan. 29, 1917, that this company is considering embarking in the brass manufacturing industry and establishing a plant at Great Falls, Mont., where the new copper refinery and the electrolytic zinc reduction plant are situated.

At these plants copper and zinc, each of a purity of 99.55%, are produced. It is intimated that already interests are formulating plans for the establishment at Great Falls of large brass-producing works.

Brass manufacture requires an alloy of zinc and copper, containing 34 parts of zinc and 66 parts of copper. This brass, by reason of the exceptional purity of the copper and zinc, would command a high market.

—Feb.

(1) Development.—A Spokane, Wash., dispatch Jan. 30, 1917, stated that the purchase of a smelter site three miles below that city on the Spokane River for the establishment of a zinc concentrating plant by this company, and the making of a contract by the Anaconda Co. with the Washington Water Power Co. had been completed and work would go rapidly forward.

The new electrolytic plant of the Anaconda Co. will not only be in a position to handle output of the Douglas mine in the Pine Creek region, but also take thousands of tons of zinc ores from other mines in the Coeur d'Alenes.

(2) Production, January, 1917.—Announced Feb. 3, 1917, that this company in January produced 23,250,000 pounds of copper, compared with 29,000,000 in December and 25,500,000 in November, 1916.

(3) Comment on January Production.—On Feb. 3, 1917, the "Wall Street Journal" said that the falling off in this company's January production of 750,000 pounds, as compared with December's output of 29,000,000 pounds, was expected, in view of the extreme cold weather and violent storms which interfered with transportation facilities around Butte.

In the latter part of the month Anaconda had to shut off one-third of its mines for two shifts a day owing to heavy snow, blocking traffic between Butte and Great Falls. Despite the decrease in output the month's production of 23,250,000 pounds registered an increase of 5,050,000 pounds over that of January, 1916.

(4) This Company.—It was stated Feb. 6, 1917, that this company's directors, after Feb. 27, probably would make some announcement respecting the \$16,000,000 two-year 5% notes maturing March 1, and which were issued March 1, 1915, to acquire United Metals Selling Co. stock from Amalgamated Copper Co.

Anaconda is well fortified with cash to meet these notes. Estimating a 15-cent profit on 336,000,000 pounds of copper produced in 1916 would mean earnings of about \$50,000,000. Therefore, net after payment of \$16,318,750 in dividends would have approximated \$33,682,000 for the best year in Anaconda's history.

Treasury surplus after liberal allowances for other charges should have amounted to about \$30,000,000. This does not include profit and loss surplus of more than \$15,000,000 as of Dec. 31, 1915.

With production running through 1917 at the 1916 rate, and on the basis of even 25-cent copper, Anaconda should have no trouble in duplicating the 1916 performance and showing earnings of another \$50,000,000.

Anaconda should show a surplus this year of at least \$7,000,000, after liberal charges for betterments, depreciation, etc., assuming that the \$16,000,000 notes will have been retired and the dividend rate increased from \$2 to \$2.50 quarterly. This in itself would call for the payment of \$23,312,500. The note retirement would mean an interest saving of \$800,000 yearly.

(5) Earnings, 1917, Estimated.—On Feb. 22, 1917, the "Wall Street Journal" said that since the beginning of 1917 the earnings of this company had established a new high record, and if conditions in the copper industry continued satisfactory, the income in 1917 would be far in excess of what it was in 1916.

The 1916 earnings were in the neighborhood of \$45,000,000 after depreciation charges, and it is stated by interests in close touch with Anaconda that it is now earning at the rate of at least \$75,000,000 a year based upon prices at which copper is being delivered.

In 1916 Anaconda produced 332,000,000 pounds of copper. Its output in 1917 is expected to be as large, if not larger, than it was in 1916.

Anaconda is deriving a profit of more than \$5,000,000 a year from its output of something like 75,000,000 pounds of zinc annually.

If Anaconda earns \$75,000,000 in 1917 it will mean approximately \$32.50 per share, compared with an estimate of \$20 a share in 1916.

A profit of \$75,000,000, less an \$8 dividend, would mean a surplus of close to \$56,400,000, compared with an estimated surplus of \$28,700,000 in 1916. But in view of Anaconda's increased earnings, it is but reasonable to assume that dividends will be much larger in 1917 than in 1916. Anaconda is now paying at the rate of \$2 a share quarterly, and it is expected that the rate will be materially larger before the end of the year.

Anaconda has \$16,000,000 two-year 5% notes maturing on March 1, which were issued to acquire the United Metal Selling Co. stock, and in view of Anaconda's cash position it is believed these notes will be paid off.

The International Smelting & Refining Co. has turned out to be a very profitable investment. Earnings from this subsidiary are running at the rate of several millions annually. Enlarged Inspiration and Greene Cananea dividends will also add largely to Anaconda's income in 1917.

To summarize the situation, Anaconda's net earnings in 1916, while record-breaking, will appear small in comparison with 1917 earnings if there is no material falling off in copper consumption.

(6) Note Retirement.—It was announced at Boston Feb. 27, 1917, that directors of this company at a meeting voted to retire from earnings the \$16,000,000 two-year 5% notes due March 1, 1917. There will be no renewal.

These \$16,000,000 notes were issued March 1, 1915, to take over the holdings of the United Metals Selling Co., the Greene Cananea and Inspiration Consolidated Copper stock owned by Amalgamated Copper Co., and to furnish about \$6,000,000 cash for improvements at the two Anaconda copper treatment works in Montana and to construct the new zinc plant in Montana and the copper smelter at Miami, Arizona.

(7) Comment on Note Retirement.—On Feb. 28, 1917, the "Wall Street Journal" said that the action of this company's directors in voting to pay off the \$16,000,000 two-year 5% notes which mature March 1 was not unexpected. A saving of \$800,000 yearly interest charges is thus effected.

With a continuance of satisfactory conditions in the copper industry Anaconda in 1917 stands a good chance of earning about \$75,000,000. Output is expected to be as large, if not larger, than

the 332,000,000 pounds shown in 1916. Furthermore, various other sources of income will substantially increase the company's reserves.

Earnings of \$75,000,000 in 1917 will mean approximately \$32.50 a share, compared with estimated earnings of \$20 a share in 1916.

Yearly dividends at the rate of \$3 a share in 1917 would call for the payment of \$18,650,000, leaving a surplus of about \$56,350,000 compared with an estimated surplus of \$28,700,000 in 1916 after paying out \$16,300,000 in dividends.

Should the directors see fit to increase the yearly dividend to \$10 a share, surplus on Dec. 31, 1917, should approximate \$51,700,000, not counting in the 1916 surplus of about \$12,700,000 after the retirement of the \$16,000,000 notes.

—Mar.

(1) Note Retirement.—Announced Feb. 27, 1917, that directors of this company had voted to retire from earnings the \$16,000,000 2-year 5% notes, due March 1, 1917. There will be no renewal.

(2) Comment on Note Retirement.—On Feb. 28, 1917, the "Wall Street Journal" said: "Action of Anaconda Copper Co. directors in voting to pay off \$16,000,000 2-year 5% notes, which mature March 1, was not unexpected. A saving of \$800,000 yearly interest charges is thus effected."

"With continuance of satisfactory conditions in copper industry Anaconda this year stands good chance of earning about \$75,000,000, which would mean approximately \$32.50 a share, compared with estimated earnings of \$20 a share in 1916."

"Yearly dividends at rate of \$3 a share this year would call for payment of \$18,650,000, leaving surplus of about \$56,350,000, compared with an estimated surplus of \$28,700,000 in 1916 after paying out \$16,300,000 in dividends."

(3) Production, February, 1917.—Announced March 5, 1917, that this company in February produced 23,000,000 pounds of copper, compared with 28,500,000 in January, 29,000,000 in December and 25,500,000 in November, 1916.

(4) Comment on February Output.—It was stated March 5, 1917, that the falling off in this company's February output, as compared with January, was due to the loss of three working days and the stormy weather experienced around Butte, Mont. Violent snow storms interfered with the transportation of ores to the Great Falls smelter.

(5) Capacity Increased.—On March 21, 1917, it was stated that an important part in the increased capacity plan of copper smelting and refining interests in the United States had been taken by this company.

The Miami smelter, which the company controls through the International Smelting Co., has about completed the installation of a new reverberatory furnace which will increase capacity of the plant about 40% and will bring nominal capacity up to about 25,000,000 pounds of copper monthly.

This plant handles concentrates from both the Miami and Inspiration mills, the combined yield from which approximates 16,000,000 pounds, but which early in 1917 should have increased to at least 18,000,000 pounds as a minimum.

With the new equipment in full operation it is expected that the output of refined copper from Raritan will have been increased to between 33,000,000 and 40,000,000 pounds of copper monthly, or to approximately 480,000,000 pounds per annum.

The new capacity will do much in aiding an already strained position, as refiners have great difficulty in making their full deliveries according to schedule.

(6) West Colusa Mine Resumes.—On March 28, 1917, the West Colusa mine of this company, which was forced to suspend for several shifts in consequence of electric power wires starting a fire in the shaft, resumed operations, the blaze having been extinguished.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

—Apr.

(1) Production Increasing.—It was stated April 2, 1917, that this company's production had again returned to high levels. Output is running at the rate of 1,000,000 pounds a day, or 365,000,000 pounds a year.

Production figures in March of 31,300,000 pounds registered an increase of 6,300,000 pounds over February, 3,050,000 over January, and were only 200,000 pounds under October's output of 31,500,000 pounds.

Officers of the company are confident that the April, 1916, high record production of 33,000,000 pounds will be eclipsed before the Summer of 1917.

(2) Washoe Smelter Breaks Record.—It was stated on March 9, 1917, that the Washoe smelter of this company had broken all previous records in production of copper during March. Production for month was 27,638,399 pounds. Largest previous production in any one month was in October, 1916, when output reached 27,539,463 pounds. Figures apply to new copper alone. In addition, during March there was enough scrap copper consisting largely of anode tips, reshipped from Great Falls to Anaconda to be handled at Washoe plant while furnaces at Perth Amboy are being reconstructed.

The huge building program announced by Anaconda last Winter is well under way at the Washoe plant. Much time will of necessity elapse before the big new stack and the smoke treating plant can be completed.

(3) Black Placer Claim Purchased.—The "Boston Evening Transcript" April 20, 1917, said that this company had purchased the Black Placer claim, located on the Emma vein of the Butte Copper & Zinc Co. and situated between the Emma claim and Davis-Daly. The Black Placer embraces about 1/4 acres. The deal is said to involve \$100,000.

ANCHOR SHEET GLASS CO.

(1) Incorporated on March 28, 1917, in Delaware, with a capital of \$2,000,000, to manufacture sheet glass products of all kinds. Incorporators: D. H. Feitner, A. A. Icanhour and C. W. Barnett, Clarksburg, W. Va.

ANDERSON NATIONAL CONTAINER CO.

(1) Incorporated on Feb. 2, 1917, in Delaware, with a capital of \$5,000,000, to do a general utility business. Incorporators: Frederic B. Chandler, New York; Henry T. Frost, Poughkeepsie, N. Y., and Sidney A. McGraw, Tacoma, Wash.

ANDERSON SHIP BUILDING CORP., SEATTLE, WASH.

(1) Large Contracts Offered.—Announcement was made on March 27, company had received an offer of contracts for construction of six 8,800-ton steel steamships at total price in excess of \$8,000,000.

ANDES FINANCE DEVELOPMENT CORP., RICHMOND, VA.

(1) Incorporated on March 21, 1917, in Virginia, with a maximum capital of \$1,000,000, minimum \$1,000, par \$100. F. W. Abbott, Pres., and A. P. Taliaferro, Secy. and Treas., both of New York City.

ANDREWS (O. B.) CO.

(1) Capital Increase—Merger.—It was announced March 22, 1917, that this company had increased its capital stock from \$325,000 to \$500,000, and merged with Acme Mfg. Co. It will build an addition to its folding paper-box factory.

ANGLO-AMERICAN GYPSUM CO., PORTLAND, ME.

(1) Incorporated in January, 1917, in Maine, with a capital of \$1,500,000, to engage in a general mining, milling quarrying and real estate business.

ANGLO-AMERICAN MILL CO., OWENSBORO, KY.

(1) Capital Increased.—It was announced Jan. 29, 1917, that this company, manufacturer of flouring mills, had increased its capital stock from \$500,000 to \$850,000.

ANGLO-AMERICAN SHIPPING CORP.

(1) Incorporated on April 23, 1917, in Delaware, with a capital of \$1,000,000, to build and operate ships, boats, etc. Incorporators: Harry A. Bingham, Oradell, N. J.; Cornelius A. Cole, Hackensack, N. J., and Arthur R. Oakley, Pearl River, N. J.

ANGLO-SAXON PETROLEUM CO.

(1) New Company.—See Tampico-Panuco R. R.—Item No. 1.

ANGUS POWER CO., LTD.

(1) Incorporated on March 1, 1917, in Canada, with a capital of \$500,000, divided into 5,000 shares of \$100 each, to carry on the business of electricians, mechanical engineers and manufacturers, workers and dealers in electricity, motive power, heat, light, etc. Incorporators: Errol Languedoc, Jean Pierre Charbonneau, Ralph Erskin Allan, Wm. Taylor and Bruce Stuart Crombie. Chief place of business, Montreal, Que.

ANNISTON STEEL CO.

(1) Additions.—It was stated Feb. 15, 1917, that this company had installed four of its additional electric steel furnaces and early in 1917 would complete the other two. There will then be six electrical steel furnaces under the one roof, making it the largest plant of the kind in this country.

The output is consumed by the Anniston Ordnance Co. in the manufacture of shells for the French Government, and by steel merchants throughout the country. Both the steel and ordnance works were fostered by the Alabama Power Co.

ANSONIA CLOCK CO.

(1) New President.—Announced Feb. 19, 1917, that at the annual meeting of this company Russell A. Cowles was elected Pres. Mr. Cowles had purchased a controlling interest in the company from Arthur Curtiss, James and Cleveland H. Dodge. The company was founded by Alfred A. Cowles in 1878.

ANTONIA SILVER MINES, LTD.

(1) Status, April, 1917.—On April 21, 1917, the "Financial Times," Montreal, Que., said that Antonia Silver Mines, Ltd., is a company which was formed in 1912 to take over the Gavin Hamilton property, located two miles from Elk Lake. At that time the Gavin Hamilton Co. was insolvent and the new company was formed by bringing in outside capital and handing over to the shareholders of the defunct company shares in the new company in exchange for their stock in the Gavin Hamilton Co.

Although considerable work had been done on the property prior to 1912, nothing has been done since. There are at present a number of buildings on the property, a shaft 167 feet deep, and considerable cross-cutting and drifting at the 150-foot level has been done.

Although the mine gave considerable promise prior to 1912, it is still a prospect only. It is understood to be the intention of the company to recommence development work on the property in the Summer of 1917.

APEX MINING CO.

(1) Operations.—It was stated Jan. 29, 1917, that the diamond drill working on this company's property is down 535 feet. The cores show green schist, a formation highly encouraging to the engineer in charge.

The operations at the Apex have been delayed owing to water trouble. This has been overcome by a pipe line and more active development will follow. The shaft is dewatered and sinking will commence. It is the company's intention to put on another diamond drill as soon as possible.

APPALACHIAN POWER CO.

(1) Report, Year Ended Nov. 30, 1916, shows:

	1916	1915
Gross.....	\$783,634	\$607,936
Net after taxes.....	432,005	294,587

(2) Output, 1916.—It was stated Jan. 10, 1917, that for the year ended Nov. 30, 1916, the output of the company was 63,749,657 kilowatt hours, a gain of 17,970,527 kilowatt hours, or 39.3% over the preceding year.

—Apr.

(1) Report, Year Ended Dec. 31, 1916, shows net earnings of \$440,188, a gain of 40% over 1915; gross revenues were \$794,922 in 1916, an increase of 27% over 1915.

	1917	1916
(2) Earnings—		
Feb. gross.....	\$67,749	\$61,264

Net after taxes.....	358,166	348,227
Surp. after chgs.....	5,408	185,562

†Deficit.

For the year ended Feb. 28, 1917, no interest was charged to capital account, but in the year ended Feb. 28, 1916, there was \$148,472 so charged on account of construction. If this amount be deducted from interest charged against income there was a balance of \$80,910 after interest actually charged to income in the year, instead of the deficit of \$85,562. No interest has been charged to capital account since March, 1916.

(3) New Transmission System.—The "Richmond Times-Dispatch" April 22, 1917, stated that this company, Bluefield, W. Va., had decided to construct an electric transmission system between Norton, Fassersville, Wise and other towns and villages in the section near Norton, Va.

APPERSON BROS. AUTOMOBILE CO.

(1) New Factory Plans.—On Jan. 12, 1917, Vice-Pres. T. E. Jarrard, of this company, was quoted as saying: "The plans for our new factory give us an additional floor space of nearly 500,000 square feet. The new plant practically doubles the acreage of our buildings."

"The last of the new buildings is completed and we have succeeded in transferring all of the machinery from the old plant to the new. In this new group we have invested in the neighborhood of \$300,000, which represents additional machinery and the buildings themselves."

APSLEY RUBBER CO.

(1) Financial Statement, as of Jan. 31, 1917, compares with the previous year as follows:

	1917	1916

ARAB HORSE ASSOCIATION OF AMERICA.

*(1) Incorporated March 2, 1917, in Delaware, with a capital stock of \$500,000, to raise Arab and other horses suitable for any purpose. Incorporators: F. D. Buck, George W. Dillman and M. L. Harty, Wilmington, Del.

ARASTRAS GULCH MINING CO., GLOBE, ARIZ.

*(1) Incorporated in January, 1917, in Arizona, with a capital of \$600,000. Incorporators: Ed. W. Hargett and Phil H. Fuentes, both of Globe, Ariz.

ARCADIA MILLS.

*(1) Incorporated on April 18, 1917, in Massachusetts, with an authorized capital of \$2,000,000, all common shares, par \$100. Mill is to be located in Methuen, Mass. Incorporators: Wm. Whitman, of Brookline; A. T. Bradlee, of Newton; Wm. Whitman, Jr., of Simsbury, Conn.; N. A. Halett and F. E. Chamberlain, of Cambridge, Mass.

*(2) New Company to Take Over Arlington Cotton Goods Department.—See Arlington Mills.—Item No. 2.

ARCHIPELAGO COPPER CO.

*(1) Incorporated on Feb. 27, 1917, in Delaware, with a capital of \$2,500,000, to mine for and produce copper, gold, zinc, etc. Incorporators: Samuel B. Howard, Louis H. Gunther and Arthur W. Britton, all of New York.

ABDMORE-AKRON TIRE & RUBBER CO., ARDMORE, OKLA.

*(1) Incorporated in March 1917, in Oklahoma, with a capital of \$1,000,000. Incorporators: John C. Harmony, Fox Wood and Roy G. Wood.

ARGENTINE REPUBLIC.

*(1) Tenders Asked.—It was announced Jan. 30, 1917, that J. F. Morgan & Co. would receive tenders up to noon Feb. 14, at a price to be stated in the tender, for the amortization on March 1 of \$353,200 of the Argentine Government 5% internal gold loan of 1900. Tenders also will be received by the Banque de Paris et des Pays Bas in Paris, by Baring Bros. & Co., Ltd., in London, and by the Credito Publico Nacional in Buenos Ayres.

—Mar.

*(1) Offering of Notes.—States on March 29, 1917, that a syndicate comprising J. F. Morgan & Co., National City Co., Guaranty Trust Co., Kuhn, Loeb & Co., Lee, Higginson & Co. and Harris, Forbes & Co., had purchased and was offering \$5,000,000 Argentine Government notes due October 1, 1917, at 5% discount.

ARISTO CO. OF AMERICA.

*(1) Incorporated on Jan. 22, 1917, in Delaware, with a capital of \$1,000,000, to manufacture wall decorations and interior decorations of all kinds. Incorporators: Seymour E. Cox, E. W. Stembeck, Chicago, Ill., and Marion Luce, Oak Park, Ill.

ARIZONA-BUTTE CORP.

*(1) Incorporated on April 19, 1917, in Delaware, with a capital of \$1,000,000, to do a general business in mining, milling and refining of ores, metals, etc. Incorporators: Alva Collins, Romeyn Berry and John T. McGovern, New York.

• ARIZONA COMMERCIAL MINING CO.

*(1) Dividend Discussion.—On Jan. 12, 1917, the "Boston News Bureau" said that inquiry had arisen from Arizona Commercial stockholders as to why no

action had been taken by the directors on a dividend which some stockholders had thought would be paid Jan. 31.

The management stated that there never was any official assurance that the company was to pay quarterly dividends. Under pressure from some of the directors, "a dividend" of 50 cents per share was paid on Oct. 31, and so far as current earnings are concerned, the company could pay quarterly dividends at this rate, but it would be at the expense of working capital at a time when a well-supplied treasury is needed.

Underground developments continue of a most encouraging character, while earnings are running about \$50,000 a month, or a little over the equivalent of \$2 per share on 260,000 shares.

*(2) Operations.—It was stated Jan. 24, 1917, that at the Arizona Commercial mine 160 men are being employed and shipments are amounting to 180 tons daily, nearly one-half coming from the 10th level. The work of sinking the main Copper Hill shaft from the 14th to the 16th level is progressing favorably, a point 40 feet below the 14th level having been reached. The power plant is also giving entire satisfaction. Since September it has been carrying the entire load, as well as doing all of the pumping.

—Mar.

*(1) Expansion Plans.—It was stated March 1, 1917, that the management of this company plans to double production before the middle of 1917. At the present time the shaft is about 50 feet below the 15th level and a station has been cut at that level. Work will probably be finished to the 18th level early in March. This will be the bottom level. Here a station will be cut and a 500-gallon-per-minute electric pump will be installed and the work of cross-cutting for the vein prosecuted.

The work of cross-cutting on the 15th level will also be pushed. This will mean that the mine will be producing on the 8th, 10th, 12th, 13th, 14th, 15th and 16th levels. The management will also increase the capacity of the hoist through the installation of a large motor.

*(2) Annual Report, Year Ended Dec. 31, 1916, shows: Gross receipts, \$883,346, against \$439,412; operating income, \$463,750, against \$180,484 last year.

—Apr.

*(1) Production—

	1916	1915
Copper, lbs.—	4,178,474	3,592,274
Silver, oz.—	21,163	16,511
Gold, oz.—	305	282

*(2) Statement by President.—In connection with the annual report of this company Pres. Smith, it was announced April 2, 1917, said, in part: "The most important development work was the opening of ore east of the Budget Fault on the 10th level. Ore has been developed here a distance of 100 feet, and for 150 feet above. Indications are that this ore body extends well above the eighth level. Operations were started on eighth level in December, with a view to still further developing this ore.

"On the 13th level an important feature was the opening of an additional vein of high-grade ore in the hanging wall.

"Considerable new ore of smelting grade was opened up on the 14th level, but extraction very nearly kept pace with development work.

"Indications are that a large tonnage of ore will be developed east of the fault, but the general tenor of the ore will be more silicious than that heretofore produced.

"Indications are that the ore beneath the 14th level, on the west side of the fault, will be as good as that above it. Ore is exposed along the bottom of the 14th level drift for 400 feet, and the trend of the ore body points to a greater length along the vein as we go deeper.

"At this writing the shaft has been sunk to a point near the 16th level, and it is confidently expected that the development on the 15th and 16th levels will show large and favorable ore bodies."

*(3) New Director.—Announced April 11, 1917, that at the annual meeting of this company at Portland, Me., Charles Sumner Cook, of that city, was elected clerk and a director, succeeding Wm. A. Bradley.

ARIZONA COPPER CO.

*(1) Operations.—It was stated March 13, 1917, that benefits from the heavy expenditures started several years previously for the rehabilitation and enlargement of its plant had been accruing to this company and with the further improvements about completed greater returns should result. Production during February totalled 4,600,000 pounds of copper against 4,100,000 pounds in January.

At each of its concentrators the Arizona Co. has installed flotation equipment for the greater recovery of copper.

High copper prices resulted in record earnings for this company in its fiscal year which ended Sept. 30, 1916. A few figures have sifted through from Scotland, where the company is controlled, showing total gross profits of \$5,129,250 for the period. Common dividends required \$1,519,895 and pfd. \$122,685.

On the year's operations there was a surplus of \$3,162,945 before dividends; previous year's surplus was \$707,055 and final balance at the close of the last fiscal period was \$2,217,450 after all dividends and charges.

Production up to Sept. 30, 1916, was 34,100,000 pounds of copper, of which 18,078,000 pounds were sold as bessemer and 16,022,000 pounds were refined and marketed as electrolytic. This output represented only 7½ months' operations, as for 4½ months the property was idle on account of strike in the Clifton camp.

ARIZONA EXTENSION R. R.

*(1) Stock and Bond Issues Planned.—It was announced April 12, 1917, that this company had applied to the Arizona Corporation Commission for permission to issue \$4,000,000 stock and \$4,000,000 bonds, the proceeds to be used in construction work. The application indicates that the plans for a north and south railroad through Arizona have taken definite shape. The line is to run from Mesa to a connection with the Atchison, Topeka & Santa Fe near Clarkdale, which is the centre of a rich copper mining district.

Besides the main line, two short branch lines will be built, one to run to Jerome, seven miles, and another to Clarkdale, five miles. It is stated by the promoters, chief of whom is James S. Douglas, of Douglas, Ariz., that the special object in building this road is to give a direct transportation outlet to the rich United Verde Extension mine at Jerome. This property is owned by Mr. Douglas and associates. They are also building a large smelter near Clarkdale.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Route of the proposed road is through the Verde Valley, which is not only adapted for agricultural purposes, but is one of the richest cattle regions of the State. Skirting the valley are many copper mines, the development of which have been retarded by reason of the lack of shipping facilities.

The new line will connect at Mesa with the Arizona Eastern R. R., part of the Southern Pacific system.

ARIZONA POWER CO.

(1) Addition.—It was announced Jan. 2, 1917, that this company had let contracts for the construction of an additional steam generating station of 10,000 horsepower capacity, to cost, with transmission and distributing system, about \$1,000,000. The output of this station will supplement that which the company secures from its hydro-electric stations on the lower Verde River.

The transmission systems of the hydro-electric and steam stations will be connected and a transmission line will be built to Jerome to provide power for operation of mines and mills in that mining district.

—Mar.

(1) Earnings—	1916	1915

(4) Combined Income Account, Year Ended Dec. 31, 1916, of this company and its subsidiary, the Prescott Gas & Electric Co., follows:

	1916	1915
Gross revenue....	\$363,776	\$279,280
Net income.....	85,303	49,033
Profit and loss surp. for year.	63,070	33,750

(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$106,129, compared with \$133,058 Dec. 31, 1915.

(3) Favorable Change Reported by President.—In connection with this company's report for the year ended Dec. 31, 1916, Pres. F. S. Viele said that since the last report conditions in the district served had undergone a most favorable change. The United Verde Extension Copper Co. discovered a large body of high-grade ore at Jerome, which so stimulated mining operations and power consumption that the directors decided to develop the remaining power in Fossil Creek. In March, \$200,000 of 3½ year 8% notes were authorized for a second 1,500 horsepower unit, the balance to be paid out of surplus.

Present contracts call for more power than the hydro-electric plant can develop and part of the load is carried on the auxiliary steam plant. The largest monthly earnings in the history of the company were recorded in December, 1916, when they touched \$36,400.

A 6,000-kilowatt steam plant is being erected by the Arizona Steam Generating Co., a subsidiary organized for the purpose, and the physical properties have been leased to the Arizona Power Co. in return for the guarantee of the steam company's bonds, both principal and interest.

The earnings of the Prescott Gas & Electric Co. are steadily increasing, "thus offsetting any loss of revenue resulting from prohibition in Arizona."

ARIZONA STANDARD COPPER CO.

(1) Incorporated in January, in Arizona, with a capital of \$5,000,000, for the purpose of taking over and developing a group of claims located 14 miles east of Parker. Incorporators: T. J. Carrigan, T. Spillacy and O. M. Spence.

ARIZONA UNITED MINING CO.

(1) New Director.—It was announced Jan. 4, 1917, that at the annual meeting of this company in Philadelphia Earl Mendenhall, of Chandler Bros. & Co., was elected to the board, together with Alfred S. Miller, Alfred H. Miller, Alfred C. Harmer, Jr., David H. Ross, Wilson H. Brown, George E. Barnett, Charles B. Cox, William M. Houston, J. Wesley Allison, Frederick J. Petry, Guy M. Jones.

ARIZONA VERDE COPPER MINING CORP.

(1) Incorporated in February, 1917, in Arizona, with a capital of \$5,000,000. Directors: L. E. Turner and C. W. Hartman.

ARKANSAS VALLEY INTERURBAN RY. CO.

(1) Bond and Stock Issue Planned.—It was announced Jan. 5, 1917, that this company had applied to the Kansas Public Utilities Commission for authority to issue \$2,000,000 additional in bonds and \$900,000 additional in capital stock, for the purpose of making extensions into other counties, including Sumner, Butler, Cowley, McPherson, Marion, Rice, Saline and Dickinson, Kan.

(2) Bond Offering.—Announced at Philadelphia Jan. 25, 1917, that E. H. Rollins & Co. are offering \$900,000 first mortgage sinking fund 5½% bonds of this company at \$8.50, to yield 5.63%.

ARLINGTON MILLS.

(1) Operations.—It was stated Jan. 22, 1917, that this company is booking business of over \$2,000,000 a month, or at the rate of practically \$25,000,000 gross per annum.

The Lawrence mill is employing a full force of 7,500 hands and is running all departments, cotton and worsted, full time.

In the 1916 fiscal year Arlington did a gross business in excess of \$20,000,000 and earned better than \$25 a share on its \$8,000,000 capital.

The increase in the price of wool, yarns and cloth accounts in some measure for the extraordinary figures to which current business of the woolen mills is running.

—Apr.

(1) New Company for Cotton Business—Stockholders' Rights.—It was announced April 11, 1917, that owing to a decision of this company to separate its two classes of business, cotton and worsted, it would dispose of its cotton mill properties to interests closely identified with the management, both mills to remain under the selling house of William Whitman & Co.

The newly organized cotton mill will have a capital of at least \$2,000,000, possibly \$2,500,000. Its gross business probably will run about \$5,000,000 a year and net profits between \$400,000 and \$450,000. Present Arlington Mills stockholders will have the right to subscribe to one share of stock of the new mill for every four owned.

The decision to separate the two manufacturing departments was based upon the fact that they had no relation to each other and could be handled separately much more advantageously. In the early years of Arlington the cotton mill was an adjunct of the worsted department, but the latter now takes none of its product. The cotton mill manufactures exclusively mercerized yarns for outside customers.

Arlington stockholders would seem to be making a splendid trade. They sell to the new interests a 61,000-spindle cotton mill, part of which is from 20 to 30 years old, for \$2,000,000, or higher than replacement value and comparing with book value of \$1,327,840. The quick assets are to be conveyed as of a March 3 inventory.

The net effect of the trade will be to increase Arlington's cash capital by \$3,500,000, permit of a big reduction in loans and make it a much more self-sufficient financial unit. In fact, Arlington will have by the end of 1917 \$7,000,000 in working capital, or nearly \$90 a share in net quick assets with which to handle a gross of \$20,000,000.

With a plant worth \$10,000,000 it will have total assets of \$17,000,000, equivalent to \$212 per share on the \$8,000,000 capital stock.

(2) New Company to Be Known as Arcadia Mills.—On April 18, 1917, the "Boston Dily Advertiser" said the new company to take over the cotton goods department of this company would be known as the Arcadia Mills. Wm. Whitman will be Pres. The present management of the Arlington Mills will devote its entire attention to the worsted department, the management of the Arcadia Mills being entirely distinct from that of the Arlington Mills.

During the first quarter of 1917 gross sales of the Arlington Mills amounted to \$7,000,000, or at the rate of \$28,000,000 per annum. That compares with total sales of \$20,942,000 in 1916. Gross of the worsted department is running at the rate of between \$21,000,000 and \$22,000,000 a year.

(3) Wages of Employees Increased.—This company April 24, 1917, announced an increase in wages of all its employees "to equal that of its competitor." The American Woolen Co. on the same date had announced an increase which in no case would be less than 5%.

• ARMOUR & CO.

(1) Report, Year Ended Oct. 25, 1916.—Announcement was made Jan. 11, 1917, that the report of this company for the period showed net profits of 3.8% on a gross business or turnover of \$525,000,000. This gross compares with \$425,000,000 the previous year.

The company earned in the year \$20,100,000, or 20% on the capital stock. That is equivalent to 14.7% on the investment.

The capital stock, which is closely held, was increased in 1916 from \$20,000,000 to \$100,000,000 and a stock dividend was declared to cover the increase, resulting in a transfer from the surplus account to the capital account of \$80,000,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

¹(2) Balance Sheet, as of Oct. 28, 1916, shows a profit and loss surplus of \$36,833,117 compared with \$36,733,117 Oct. 28, 1915.

¹(3) Statement by President.—It was announced Jan. 11, 1917, that Pres. Armour's remarks to stockholders at the annual meeting of this company were in part as follows:

"Our fiscal year ended Oct. 28, 1916, was the most successful in our history, we having earned \$20,100,000, or 20% on our capital stock, equivalent to 14.7% on our investment.

"Gross business done during the year, \$525,000,000, based on the net profits, shows a return of 3.8% on our turnover. The greater increase in percentage of profit has been in subsidiary companies handling inedible products.

"We are now on a very high plane of values, and it will require great discretion and cautionary procedure in the conduct of our business to avoid a recurrence of the conditions of 1911, and the attainment of a normal plane of values without severe loss.

"Because of the ever-increasing demands for new capital expenditures in our business, which this year have been exceptionally large, and which promise to be as great if not greater during the next few years, your directors have adopted what we believe to be the wise policy of not increasing dividends and have declared the usual dividend disbursement of \$2,000,000, equivalent to 2% on our capital stock.

"We will maintain our former policy of putting back our surplus profits into our business.

¹(4) New Addition.—It was stated Jan. 16, 1917, that this company's packing plant at Spokane, Wash., would be enlarged by the construction of an addition to cost \$250,000.

¹(5) Application to List.—Announced Jan. 26, 1917, that the New York Stock Exchange had received application to list \$20,000,000 of this company's additional real estate and first mortgage 4½% 30-year bonds, due June 1, 1939.

—Feb.

²(1) Admitted to List.—It was announced Feb. 15, 1917, that an additional \$20,000,000 of this company's real estate first mortgage 4½% 30-year bonds had been admitted to the list by the New York Stock Exchange, making the total amount listed \$500,000,000.

—Apr.

⁴(1) Bonus Distribution to Employees.—On April 4, 1917, this company announced the distribution of a bonus of \$500,000 among 8,000 employees receiving \$1,800 or less annually.

⁴(2) Status (April, 1917).—On April 10, 1917, the "Wall Street Journal" said that this company was running a closer second to Swift & Co. in the volume of its business than most people comprehended. Swift's sales amounted to \$575,000,000 last year; Armour's \$525,000,000. The immensity of the Armour organization although not the largest may be appreciated from the fact that the company employs 45,000 persons; has plants aggregating 20,000,000 square feet of floor area and last year paid for animals the following sums: Cattle, \$116,077,000; sheep, \$17,528,000; hogs, \$112,624,000; calves, \$4,850,000, or a total of \$251,177,000.

Armour has an enormous by-products business. Its soap-making establishment, for instance, is one of the largest in the world. The Armour Glue Works has an annual capacity of 15,000,000 pounds. Of curled hair the Armour plants produce 7,500,000 pounds annually.

The Armour Leather Co. and its subsidiaries operate 20 plants for the tanning of belting, harness, sole and upper leathers and the processing of pig skins, sheep skins and raw wool. The recent addition of four new plants brings the total volume of hides treated to about 1,750,000 annually. In addition to consuming the greater part of Armour's domestic hides, the Armour

Leather Co. buys extensively in North and South America, China, New Zealand and Australia.

ARMOUR COPPER CO. (THE), FLORENCE, ARIZ.

⁴(1) Incorporated on April 12, 1917, in Arizona, with a capital of \$1,500,000. Directors: J. A. Armour and E. A. Williams.

ARMSTEAD MINES, INC.

²(1) Incorporated on Feb. 2, 1917, in Delaware, with a capital of \$1,000,000, to locate and develop mining claims. Incorporators: Herbert B. Latta and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

ARONHIME PACKING CO.

¹(1) Plant Completed.—It was announced Jan. 10, 1917, that this company, Bristol, Va., had completed its meat-killing and packing plant. Its building is a two-story concrete and brick 100x80-foot structure, costing \$15,000, and its equipment of machinery, costing \$20,000, has a daily equipment of 250 hogs and 50 cattle.

ARTILLERY FUSE CO.

²(1) Dividend.—On March 5, 1917, the "Wall Street Journal," in commenting on the dividend of 200% declared March 1 by this company to stockholders of record Feb. 28, said that the company had been working on a large British contract, now practically completed. The British are now having this work done in Canada, but the Artillery Fuse Co. has received another large contract from Russia, which will keep it busy for several months.

At the close of the war the plant, which employs between 3,000 and 4,000 men, will be equipped for other commercial purposes.

ART METAL CONSTRUCTION CO.

²(1) Report, Year Ended Dec. 31, 1916, shows the net values of the goods shipped as \$2,286,842, as against \$1,712,826 for 1915. The gross profits were \$778,299, against \$413,665, and the net profits were \$268,083, which compares with a loss of \$168,758.

The balance sheet as of Dec. 31, 1916, shows total assets of \$3,114,080, of which current assets amounted to \$1,680,067 with the plant and property value placed at \$1,131,080. The current liabilities amounted to \$448,814, capital stock issued \$857,120, debenture bonds \$303,300, and surplus account \$1,379,613.

ARUNDEL SHIPBUILDING CO.

¹(1) Organization Completed.—It was announced Jan. 3, 1917, that this organization had been completed by this company, recently incorporated in Maryland. It has an authorized capitalization of \$1,000,000, of which \$500,000 is common stock and \$500,000 is 6% 20-year sinking fund first mortgage gold bonds. At present the company plans the issue of \$225,000 stock and \$300,000 bonds. The main offices are at Fairfield, Md., and the officers are: Frank A. Furst, Pres.; Joseph J. Hock, Vice-Pres.; W. Bladen Lowndes, Sec.-Treas., each holding the same offices with the Arundel Sand & Gravel Co., of Baltimore.

The company purchased the Arundel Sand & Gravel Co.'s shipyards as the basis of its activities.

ARYANS PUBLISHING CORP. (THE).

²(1) Incorporated on March 16, 1917, in New York, with a capital of \$300,000, to act as publishers, printers and advertisers. Incorporators: J. R. Beck, W. C. Lane and T. Gilmartin, 5 Chambers St., New York.

ASBESTOS CORP. OF CANADA, LTD.

¹(1) Initial Dividend.—It was announced Jan. 27, 1917, that the directors of this company had declared an initial quarterly dividend of 1% on the pfd. stock, payable Feb. 15 to holders of record Feb. 1.

—Feb.

²(1) Report, Year Ended Dec. 31, 1916, shows profits of \$537,938, an increase of \$151,561, or about 40% over 1915, previously the best period in the history of the reorganized company.

After expending nearly \$30,000 more on betterments and renewals than in the previous year, and meeting the usual interest charges, the company had a net profit of \$215,476 to add to surplus, an increase of \$121,882, or about 130%. This surplus for the year represents earnings at the rate of 5.4% on the pfd. stock and brought the total surplus up to \$500,102, or better than 12% on the pfd.

The showing with respect to earnings, combined with the showing in the balance sheet, explains the recent decision of the directors to inaugurate dividends at the rate of 4% on the pfd. stock.

In current assets, exclusive of a liquid item of \$200,000 Dominion war loan bonds, the company shows a total of \$1,114,024, against which current liabilities total only \$111,058.

Cash holdings, despite the \$100,000 war loan purchase of the year and the buying in of \$263,000 bonds of the company, continue large at \$450,139.

ASHTABULA GAS CO.

⁴(1) Ohio Commission Rules for 10% Return.—The Ohio Public Utilities Commission April 27, 1917, in the appeals of this company against the 30-cent rate for natural gas fixed by the Councils of Ashtabula, Geneva and Conneaut, held in favor of the company, declaring that because of the hazardous nature of the business of producing and distributing natural gas, corporations in this form of public service should have a return of not less than 10% on their invested capital.

In deciding the cases the commission fixed a rate of 34 cents a thousand cubic feet with a service charge of 20 cents a month per meter. In the decision the commission said: "Those who engage in the venture of natural gas must get their money back within a few years or not at all, and those who enjoy the luxury must pay a sufficient sum to enable the producers to do so or capital will not be attracted to such ventures."

"The natural gas business differs," said the commission, "materially from that of any other which is classed as a public utility. Its production is in the nature of a mining venture. It can be produced only in limited areas and when once discovered it is only by continuous mining that the extent of the field can be ascertained and the supply maintained."

JANUARY 1 TO APRIL 30, 1917

ASSETS REALIZATION CO.

*(1) **Directors Re-elected.**—It was announced March 21, 1917, that at this company's annual meeting in Camden, N. J., five directors whose terms expired were re-elected. There were voted 71,000 shares out of a total of 99,900.

*(2) **Deficit Reduced.**—It was announced March 21, 1917, that at this company's annual meeting a statement to the stockholders showed that the surplus deficit had been reduced from \$4,236,079 on Dec. 31, 1915, to \$3,815,911 on Dec. 31, 1916. Assets of Dec. 31, 1916, are \$6,790,583.

ASSOCIATED BLUE BOOK PUBLICATIONS, NEW YORK.

*(1) **Capital Increased.**—On Feb. 8, 1917, the company filed notice at Albany, N. Y., of an increase from 2,500 to 10,000 shares and \$60,000 to \$287,000 working capital.

ASSOCIATED DRY GOODS CORP.

*(1) **Income Account Six Months Ended Dec. 31.**—Total profits, \$1,170,015; surplus, \$964,974.

*(2) **Balance Sheet,** as of Dec. 3, 1916, showed profit and loss surplus of \$964,974.

*(3) **Initial First Preferred Dividend.**—On April 9, 1917, directors declared an initial dividend of 1½% on its first preferred stock, payable Dec. 1, 1917, to stock of record Nov. 15.

*(4) **Comment on Initial Dividend.**—On April 10, 1917, the "Wall Street Journal" said that action of directors of this company in declaring an initial dividend at the rate of 6% on the first pfd. stock merely anticipated by three months the period when dividends on that issue would begin to accumulate; and, to a certain extent, indicated the dividend policy of the company.

When the corporation was formed last year as a reorganization of the Associated Merchants and United Dry Goods companies it was intimated by the organizers that it was hoped that earnings would justify the payment of dividends as soon as the operations were well under way. The first pfd. dividend, however, does not have any cumulative rights before December of this year and the declaration of an anticipatory dividend thus early may be taken to mean that no further dividend action is likely to be considered until the close of 1917.

Earnings for the half year ended December 31, 1916, as shown in the report just published, were more than sufficient to meet the dividend requirements on both classes of pfd. stock, but it is apparently the intention of the management to conserve these as far as possible. Earnings since the date of the report, or for the first three months of 1917, it may be considered practically certain, were as large, or larger, proportionately, than they were in the period covered by the report, as reports from the dry goods trade show a great prosperity.

The balance sheet of the company is a satisfactory one, its cash assets alone, \$4,554,427, being more than sufficient to cover its total current liabilities, \$3,006,603. President Reayburn says in the report that satisfactory progress is being made by Lord & Taylor, in which the company owns control, as well as in the Surety Coupon Co. and C. G. Gunther's Sons. In discussing trade conditions, he says: "Prospects for the pending spring business are for better results than for the same period last year."

ASSOCIATED GOLDFIELDS MINING CO.

*(1) **Operations.**—It was announced Jan. 30, 1917, that excellent headway is being made at this company's property. The deepest shaft is down 350 feet, and the men are working three shifts in 24 hours. The rich ore at the bottom of the shaft not only carries visible gold, but also considerable telluride.

ASSOCIATED OIL CO.

*(1) **Report, Year Ended Dec. 31, 1916.** showed net income of \$5,638,330, an increase of \$668,243 over the previous year. Surplus after charges amounted to \$1,611,215, compared with surplus of \$128,909 in 1915.

—Mar.

*(1) **Oil Land Purchase.**—It was announced Feb. 20, 1917, that this company had purchased 22,000 acres of oil lands in the Santa Maria field.

The properties consist of the following ranches, on which the company has purchased the mineral rights: Zaca, Quartel del Quarti, Wickenden, Pezoni and Ord-Pershine. All the properties, while not proven land, are along an oil belt.

In order to transport the oil that the Associated expects to develop on its new holdings, the company is preparing to increase from 4,000 to 25,000 barrels a day the capacity of its pipe line from Casmalia, in the heart of the field, to Gaviota, where it has a refinery and shipping facilities.

*(2) **Dividend.**—It was announced March 7, 1917, that at a meeting of this company's Board of Directors a dividend of \$1.25 was declared, payable April 16, 1917, to stockholders of record March 23.

—Apr.

*(1) **Officers and Directors Re-elected.**—Announced April 3, 1917, that at the annual meeting of stockholders of this company retiring directors of the parent and affiliated companies were re-elected. At a subsequent meeting of directors retiring officers were re-elected.

ASSURED MORTGAGE & INVESTMENT CO., CLEVELAND, O.

*(1) **Incorporated** on Jan. 28, 1917, in Ohio, with a capital of \$250,000. Incorporators: E. Dyble, Robb O. Bartholomew, Ed. W. Leeper, I. E. Arnold and Ralph L. Bailey.

ASTOR TRUST CO., NEW YORK.

*(1) **Merger with Bankers Trust Co.**—See Bankers Trust Co., New York.—Item No. 1.

*(2) **Special Dividend of 2½%.**—The Astor Trust Co. April 18, 1917, declared a special dividend of 2½%, payable April 21 to stock of record April 20. The disbursement is by way of adjusting the company's dividend prior to its merger into the Bankers Trust Co., effective April 23.

ATCHISON, TOPEKA & SANTA FE RY. CO.

*(1) **Rate Permit.**—It was announced Jan. 18, 1917, that this company had been authorized by the Interstate Commerce Commission to establish rates on ammunition from the St. Louis manufacturing district to gulf ports for export equalling those to New York. The change is expected to help relieve the car shortage.

*(2) **Complaint Dismissed.**—See California Packing Corp.—Item No. 3.

*(3) **Earnings.**—1916
December gross \$13,133,867 \$11,403,187
Net after taxes 3,303,329 4,031,400
6 mos. gross 77,507,625 68,979,779
Net after taxes 27,974,122 22,676,521

*(4) **Comment on December Earnings.**—On Jan. 27, 1917, the "Wall Street Journal" said, in part:

"That Atchison stock should have shown strength after the issuance of December figures was not surprising. To be able to charge off in a single month more than \$1,900,000 on account of a bonus to employees and still report a favorable comparison is a remarkable accomplishment.

"In December, Atchison's gross revenues showed an increase of \$1,730,680, or 16% better than for the same month last year. The inclusion in operating expenses of the greater part of the sum paid as a Christmas present to employees accounted for the decrease in net of \$728,071.

"The gain in gross for the six months of the fiscal year ended Dec. 31 was between 15% and 16%.

"Gross revenues for the fiscal year ending June 30 next are likely to reach \$145,000,000 and perhaps as high as \$148,000,000. To reach \$148,000,000 for the year, gross earnings for the second half of the fiscal period will have to show an increase of between 12% and 13% over the same period last year. Current gains would indicate that this certainly is possible."

—Feb.

*(1) **Tariff Suspension.**—It was announced Feb. 1, 1917, that the Interstate Commerce Commission has suspended from Feb. 1 and later dates until June 1, 1917, certain tariffs of the Atchison, Topeka & Santa Fe and other lines, which in many instances would increase from \$2 to \$4 per car the charge for switching grain or seeds at various points in Western trunk line territory.

The commission also suspended for the same period tariffs which provide for a new scale of class rates applicable on traffic between points in Texas and Oklahoma, which for certain mileages conform to the rates established by the Texas lines following the commission's decision in the Shreveport case.

It is also sought by the suspended tariffs to extend the application of the new scale to certain Kansas, Arkansas and Louisiana points.

The proposed rates are in many instances, in excess of the present Texas class rates.

*(2) **New Equipment.**—It was announced Feb. 18, 1917, that this company had completed plans for the purchase of over \$10,000,000 of equipment, to consist of 35 passenger, baggage, mail and express cars, 50 locomotives, 1,000 stock cars, 500 tank cars and 100,000 tons of steel rails.

*(3) **Earnings.**—1917
Jan. gross \$12,641,435 \$9,653,671
Net after taxes 4,193,629 2,382,909
7 mos. gross 90,149,060 76,633,450
Net after taxes 32,167,750 25,050,520

—Mar.

*(1) **Acquisition.**—It was announced Feb. 28, 1917, that a bill had been introduced in the Texas Legislature, authorizing this company to purchase and operate the Cross Plains & Santa Fe and the North Texas & Santa Fe railroads. These two lines have been taken over by the Panhandle & Santa Fe division of the Atchison system and the measure seeks to have the transaction legalized. The two newly acquired roads are situated in western Texas and were originally built by subsidiaries of the Atchison, Topeka & Santa Fe.

*(2) **Earnings.**—1917
Feb. gross \$11,591,596 \$10,644,431
Net after taxes 3,656,177 3,413,770
8 mos. gross 101,740,956 87,277,881
Net after taxes 35,823,927 23,473,291

*(3) **Car Order.**—On March 28, 1917, this road ordered 800 refrigerator cars from the American Car & Fdy. Co.

*(4) **Earnings Show Steady Increase.**—On March 30, 1917, the "Wall Street Journal" said that this road continued its march to another record year. February's gain of \$947,465 in gross, or 8.9%, compared with the corresponding period last year, brought the average to slightly over \$1,800,000, and there are monthly increases for the eight months no indications of any let-up. Weekly loadings in March are on the up grade, insuring another traffic gain for that month.

In the eight months ending February 29, Atchison earned about 10.1% on the \$218,854,000 common stock now outstanding. This estimate is determined on the company's statement for the eight months, with other income and interest charges based on the figures for the last fiscal year. And for the 12 months' period, a conservative estimate indicates a rate earned on the common stock of 15.1%. At the same time it is not to be expected that the results for the remaining months will come near

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

equaling the earlier months, as the road will now have to contend with a seasonable decline in traffic and volume of business.

Gross revenues for the eight months of the fiscal year totaled nearly \$102,000,000, or \$14,463,075 more than for the same period last year; and of this amount just about half has been saved for net operating income, this ratio being generally maintained through the year. The physical condition of the Atchison road is up to the highest standard, and operating expenses are therefore not heavily burdened with maintenance charges.

ATLANTA & ANDERSON RY. CO.

*(1) New Company Organized.—On April 26, 1917, the "Manufacturers Record" said that this company, which is to build the proposed electric interurban line from Atlanta, Ga., to Anderson, S. C., about 140 miles, had been organized at Atlanta with J. L. Murphy, Pres., and Mark Bolding, Sec'y. The Board of Directors, which includes the officers, consists of prominent stockholders who reside along the route, the other members being J. G. Craft, G. W. Westbrook, H. P. de la Perrie, I. H. Phillips, Wm. D. Bowers, W. B. Hardman, C. J. Hood, W. H. Smith, R. L. J. Smith, W. E. Simmons, Albert Howell, Jr., L. G. Greer and Hugh Howell.

It is planned that the road shall be in operation within two years.

The Atlanta & Anderson Ry. is designed to connect at Anderson with the Piedmont Northern lines, which run from there to Spartanburg, S. C., and planned to finally connect through to Charlotte, N. C., whence it is said a northern and eastern extension will finally be built to Norfolk, Va.

ATLANTA, BIRMINGHAM & ATLANTIC RY. CO.

*(1) Valuation Hearings Scheduled.—See Texas Midland R. R.—Item No. 2.

*(2) Physical Valuation Hearing Started.—Announcement was made at Washington Jan. 29, 1917, that the railroads' first attack, in what promises to be a long legal battle over methods pursued by the Interstate Commerce Commission in determining the physical valuation of railroad properties throughout the United States, had been made on that date in a hearing on the Commission's findings in the case of this company and the Texas Midland R. R.

Counsel devoted virtually the entire day to the first two of 42 points of contention raised. Charges were made that the Commission failed to obey the instructions of the law in making valuations and failed to include a great many items which it should have included.

Whether trackage rights of a railroad over connecting lines should be included and, if so, at what figure, was one of the points debated, counsel for the Texas Midland declaring that 14 miles in the road's main line had been omitted because the road did not own the property outright, but merely had leased trackage rights over this stretch.

—Feb.

*(1) Earnings, December.—Gross, \$366,616; net after taxes, \$110,543.

Six Months.—Gross, \$1,861,175; net after taxes, \$446,097.

*(2) Status.—It was stated Feb. 5, 1917, that this company, which began operations a little more than a year pre-

viously, as successor to the Atlanta, Birmingham & Atlantic R. R. Co., Georgia Terminal Co. and Alabama Terminal R. R. Co., gave a highly creditable account of itself in 1916 and demonstrated its possibilities in development of earning power.

Its management has been concentrating its attention upon increasing operating efficiency through heavier car and train loading and with eminent success. In the matter of train load it is setting up a standard for Southern systems. In 1916 the average load was 398 tons and in November it was as high as 470 tons.

In 1916 gross earnings were \$3,330,000, December results being partly estimated, compared with \$2,852,036 for 1915, an increase of \$487,024, or 17.1%. Net earnings were \$784,168, an increase of \$337,179, or 75.4%, over 1915.

December earnings were the largest for any month of the year. The ratio of operating expenses to gross was but 76.51% in 1916, compared with 84.33% in 1915.

Surplus after charges in 1916 was equivalent to approximately \$1 per share for the \$30,000,000 stock. This is the more remarkable when it is considered that in previous years Atlanta, Birmingham & Atlantic was never able to show other than a substantial deficit after charges.

Under the new company capitalization this was substantially reduced. Funded debt outstanding per mile of road is now \$14,561, and total capitalization per mile is \$61,683. Bonded debt per mile is exceptionally low, but total capitalization per mile is somewhere near the average for all American railroads.

Fixed interest charges amount to only \$204,500, or \$321 per mile of road operated. It requires \$200,000 additional, less interest on income bonds owned by the company, to meet the non-cumulative interest on the \$5,200,000 income bonds outstanding. The total interest charge which must be paid before common stock dividends does not exceed \$464,500 a year.

Atlanta, Birmingham & Atlantic is preparing for expansion and development of traffic. Its territory is one of great potentialities and it is believed that termination of hostilities abroad is likely to enhance its prosperity.

*(2) March Gross an Increase of \$70,836.—Crop Outlook Good.—On April 23, 1917, Dow, Jones & Co. said that gross earnings of Atlanta, Birmingham & Atlantic for March were \$342,235, an increase of \$70,836 over March, 1916, the largest gain for many months.

Interests identified with this road feel very much encouraged at the way in which earnings are expanding and at the efficiency in operation which has been attained.

With railroad earnings generally showing serious shrinkages, the performance of the Atlanta, Birmingham & Atlantic is most gratifying. The crop outlook in the southern part of Georgia, which is tributary to this road, is excellent.

ATLANTA & CHARLOTTE AIR LINE RY.

*(1) Bonds Sold.—Announced March 15, 1917, that J. P. Morgan & Co. had sold the \$4,000,000 5% bonds of this company, 1944, recently purchased. The bonds were sold at 99½.

ATLANTA MINES CO.

ATLANTIC COAST LUMBER CORP.

¹(1) Capital Increased.—On Feb. 27, 1917, this company, a South Carolina corporation, filed notice at Richmond, Va., of an increase in capital stock from \$1,200,000 to \$2,400,000.

ATLANTIC COMMUNICATION CO.

¹(1) Suit Decision.—See National Signaling Co.—Item No. 1.

● ATLANTIC GULF & WEST INDIES STEAMSHIP LINES.

¹(1) Earnings, October and Ten Months.—It was stated Dec. 30, 1916, that this company in 1916 earned \$683,572, an increase of \$454,304 over October, 1915, and an increase of about \$87,000 over September of 1916.

The net income for ten months ended Oct. 31 was \$6,993,699, an increase over the corresponding period of 1915 of \$4,596,121.

²(2) Stock Exchange Ruling.—It was announced Jan. 2, 1917, that the committee on securities of the New York Stock Exchange had ruled that after Jan. 15 only definite engraved stock certificates for this company's common and pfd. stocks would be for delivery.

³(3) Two Mallory Boats Chartered.—It was stated Jan. 2, 1917, that the Mallory Line of this company had signed a charter for two of its larger boats for a year. They will be used in South American trade, and charterers are paying very fancy prices. It is understood final net profits from chartering of these two steamers will be in the neighborhood of \$1,000,000 during 12 months' period covered by charter parties.

It is understood the two boats chartered, the Neches and Medina, are of 7,200 tons dead weight and that charters begin to be operative in one case Feb. 1 and in the other the second half of February and run for a full 12 months in each instance.

⁴(4) Earnings, 1917, Estimated.—On Jan. 18, 1917, the "Boston News Bureau" said if November and December gross earnings of this company show the average monthly gain of \$1,000,000 per month established during the ten months to Oct. 31, the full fiscal year will witness an increase in total income of at least \$12,000,000.

This would mean gross receipts for 1916 of \$32,000,000, a gain of 60% over the \$20,121,707 of total earnings in 1915. November net income will be good, materially larger in fact than the \$682,000 earned in October.

In its 10 months to Oct. 31 the company increased its gross by \$10,439,000, of which \$4,600,000, or about 46% was saved for net. This is a low percentage of saving. It shows how rapidly operating expenses have been increasing.

Atlantic Gulf has arranged to pay the Federal income tax of 2% on its own and subsidiary company bonds.

	1916	1915
⁵ (5) Earnings—		
November gross—	\$3,107,125	\$1,893,908
Net —————	1,033,247	454,180
Surp. aft. chgs.—	859,766	281,414
11 mos. gross—	30,079,496	18,397,783
Net —————	9,672,129	4,494,784
Surp. aft. chgs.—	7,553,565	2,679,063

—Feb.

¹(1) Earnings in 1916.—On Feb. 22, 1917, the "Boston News Bureau" said that this company's net profits in December dropped considerably from the \$859,000 earned in November. It is understood that December net was about \$350,000. This decline, however, is fully accounted for by two factors.

In December the company charged into operating expenses for that month some \$200,000 representing bonuses paid employees as offset to the increased cost of living. This \$200,000 was the entire year's distribution, but was charged out in a single month.

The repair fund in December contained a charge against operations of \$433,000. The average for the previous 11 months of the year was \$125,000, so that December repairs were increased some \$308,000 above what may be termed normal.

Final figures for 1916 will show that Atlantic Gulf earned 64% on its \$15,000,000 pfd. stock. Or there was a balance of about \$59 per share for the \$14,963,000 common after charges and pfd. dividends.

²(2) Dividend Discussion.—On Feb. 26, 1917, the "Boston News Bureau" said: "Failure of Atlantic Gulf directors to act on a dividend on the \$14,963,000 common seems to have created mild surprise. As a matter of fact, when the \$5 dividend, payable Feb. 1, was declared Pres. Stone stated rather emphatically that in his opinion the next dividend on the common would not come until six months later. Certain speculative interests have assumed that the \$5 distribution would be repeated quarterly."

"The management has never had it in mind to pay more than \$10 dividends yearly, and has hesitated to make even this distribution regular until the ability to maintain it is reasonably assured."

—Mar.

¹(1) Bonds.—On March 1, 1917, it was stated that Atlantic Gulf had reached the point where for 1916 and probably for 1917 as well, the net earnings of the parent organization will be sufficient to pay the 5% interest on its \$12,000,000 collateral trust bonds, plus the 5% dividend on the nearly \$15,000,000 pfd. stock. In 1916 the profits realized by the parent organization not only did this, but left a balance of \$4 to \$5 per share for the \$14,963,400 common.

What this means is that the \$3,210,100 of net profits after charges on subsidiary bonds, which the four operating companies earned in 1916, was all available for the common. This \$3,210,100 was equal to \$54.80 per share for the common. The final figures likely will show that the actual profits for the common in 1916 were slightly better than \$58 per share.

	1917	1916
² (2) Earnings—		
January gross—	\$3,122,042	\$2,008,170
Net —————	886,299	480,823
Surp. after chgs.—	746,008	327,165

³(3) Comment on January Earnings.—On March 24, 1917, the "Wall Street Journal" said that this company's January net earnings showed an increase of \$418,843 over January, 1916, and an increase of \$199,397 over December, 1916. The earnings are unusually large in view of the seasonal decline of business in January.

These earnings are exclusive of the Corporation, the Mexican Navigation earnings of the International Steamship Co., and the Atlantic Gulf & West Indies Co. These lines are not in the consolidation and make separate reports. It is understood that plans are under way to include them in the holding concern.

The big months in the coast trade are May, June, July and August, and it would not be surprising if earnings crossed the \$1,000,000 mark in 1917 in each of these months. The increase over January a year previously, in itself, represents nearly \$3 a share on the \$15,000,000 common stock. The company should earn between \$75 and \$100 a share on its common stock in 1917.

⁴(4) Dividend Discussion.—It was stated March 23, 1917, that no dividend was taken on this company's common stock at the meeting of the Board of Directors on that date. It is believed that action will be deferred until July. A dividend of \$5 a share was declared on

the common in November, but it was not specified whether the rate was quarterly, semi-annual or annual.

⁵(5) Report, Year Ended Dec. 31, 1916, shows consolidated income account as follows:

	1916	1915
Gross —————	\$35,175,369	\$21,400,474
Net —————	10,481,250	4,790,301
Surp. after chgs.—	8,234,667	2,663,478
Bal. after pfd., com and other dividends ———	6,688,116	2,663,478

⁶(6) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$14,670,083.

⁷(7) Earnings on Stock.—It was stated April 12, 1917, that this company's 1916 balance of \$7,485,672, after pfd. dividends, is equivalent to \$50.02 a share earned on 149,834 shares of common stock outstanding.

⁸(8) Statement by President.—It was announced April 12, 1917, that Pres. Galen L. Stone, of this company, in his annual remarks to stockholders said: "The business of your steamship lines has been extraordinary in many respects. The volume thereof has been greater than anybody could have foreseen."

"The coastwise business of the Clyde and Mallory lines has been relatively unsatisfactory; the business of the Porto Rico and New York & Cuba Mail Steamship companies has been exceptionally satisfactory."

"Notwithstanding the decreased net earnings of the coastwise lines, the combined net earnings of your corporation and its subsidiary companies, including estimated earnings from the Mexican Navigation Co., have amounted to a sum equal to approximately 65% on your outstanding pfd. stock, or 60% on your outstanding common stock. This result was attained after charging off expenses, interest, depreciation, insurance and all other operating charges."

It is interesting to note that thus far in 1917 the volume of earnings is substantially above that of the corresponding period of 1916. Profits for January show a decided improvement over those of the corresponding month a year ago. But because of a necessity of chartering at very high prices in order to take care of the business between this country and Cuba, which, thus far, has been irregular and to some extent disappointing, and because of the uncontrollable costs in nearly all directions, the net outcome of the business in 1917 is difficult to foresee.

⁹(9) Meeting to Vote on Merger.—It was stated April 12, 1917, that stockholders of this company at the annual meeting to be held in Kittery, Me., on April 24, would vote on the proposal to consolidate the present company with the Clyde, Mallory, Porto Rico and Cuba Mail Steamship companies. The Board of Directors approved such a merger on April 6.

This proposed consolidation is technical in the sense that the ship companies named are already controlled by the Atlantic Gulf Lines. The necessity of keeping separate reports will apparently be obviated when the formal consolidation has been authorized.

¹⁰(10) Comment on 1916 Report.—On April 13, 1917, the "Wall Street Journal" said: "In the calendar year of 1916, the most remarkable in steamship annals, the Atlantic Gulf & West Indies Steamship Lines and associated companies earned \$60 a share for their common stockholders and paid out \$5 in dividends on the common stock. This tells the story of conservative steamship management."

"Instead of paying out a big surplus in dividends the management strengthened its financial position and its earning capacity for the future. The various companies bought up their own bonds to the amount of \$1,936,000 and contracted for nine new ships of the latest design. Seven ships, costing \$2,700,000, were delivered and paid for out of earnings."

"Two more liners will be ready for delivery next October and two others early next year, and the money for them is waiting in the treasury. The

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

last set of two liners will cost \$1,250,000 each. Moreover, the management purchased during the year additional shares of the Mexican Navigation Co. at a cost of \$1,534,863.

"No form of securities was sold to the public to finance these undertakings and the liquid assets at the end of the year were \$3,865,948.

"The figures contained in the annual report indicate that the common stock of the Atlantic, Gulf & West Indies Lines earned only \$50 a share. These figures are exclusive of the returns of the Mexican Navigation Co. The actual earnings were approximately \$35 a share on the preferred, or \$80 on the common, after payment of the 5% on the pfd.

"The combined fleets of the lines in this coastwise shipping concern now have in operation 86 ships with a tonnage of 296,254. The fleets have in addition 20 tugs and 145 lighters. With the ships under construction the combined fleet will have 92 ships and a total tonnage of about 320,000."

"(7) Government Not Likely to Requisition Ships Soon.—On April 18, 1917, the "Boston News Bureau" said, in part:

"A little reflection will show that the Government could not possibly use at present nor for months to come all or any material part of the 500,000 or 600,000 tons of steamers represented in the Atlantic, Gulf and United Fruit fleets. The Government obviously has enough things to pay for besides paying charter on ships which it does not need, and which if it took it would have to tie up idle in harbors.

"As a matter of fact, Atlantic, Gulf would be able to spare ships to the Government faster than the national power could probably use them."

Surp. aft. com. divs.—	480,824	22,867

"(2) Earnings on Stock.—It was stated Feb. 23, 1917, that this company's 1916 balance after pfd. dividends of \$505,804 is equal to 33.72% on \$1,500,000 common stock, compared with 1.52% earned on the same stock in 1915.

"(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$223,763, compared with \$192,939 Dec. 31, 1915.

ATLANTIC PAPER & PULP CORP.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

"(1) New Plant.—It was announced March 12, 1917, that this company, Port Wentworth, Ga., had completed all arrangements for building a mill to manufacture paper and pulp.

"(2) New Plant Nearing Completion.—Reported from Savannah, Ga., on March 26, 1917, that by June 1 it was expected that this company would have completed its plant at Port Wentworth, Ga., and would be well at work before the summer is more than half gone.

Construction is now progressing, and the mill will comprise a group of buildings to include a digester-house 85 feet high and 56 feet long by 27 feet wide, together with other auxiliary structures covering an area approximately 300 x 300 feet, mainly of reinforced concrete construction.

ATLANTIC PETROLEUM CORP.

"(1) Incorporated on March 12, 1917, in Virginia, with a maximum capital of \$7,000,000. Officers: Horatio W. Turner, Pres. of Baltimore, and H. H. Chalkley, Secy.-Treas., Richmond, Va.

"(2) New Company.—It was announced March 12, 1917, that this company, incorporated with a capital of \$7,000,000 by Tulsa oil men, would immediately take over the Curtis & Aiken properties and the Burke-Hoffield Oil Co., with an acreage of about 75,000 and a production of 6,000 bbls. daily.

ATLANTIC POTASH CO.

"(1) Acquisition.—It was announced Jan. 25, 1917, that this company had bought the plant of the Northampton Portland Cement Co., Stockertown, Pa., for \$60,000 for the purpose of making fertilizer. The cement company had a bonded debt of \$249,000 and a stock issue of \$200,000.

ATLANTIC REFINING CO.

"(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Operat. profits—	\$9,371,258	\$5,381,903
Surp. after divs.	8,628,258	4,592,425

"(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$33,976,191, compared with \$25,347,935 Dec. 31, 1915.

"(3) Earnings on Stock.—It was stated Feb. 9, 1917, that this company's 1916 operating profits are equal to 187.42% on the \$5,000,000 capital stock, compared with 107.63% earned on the same capitalization in 1915.

"(4) Statement by President.—It was announced Feb. 12, 1917, that Pres. J. W. Van Dyke, of this company, in his report to stockholders, said:

"In common with the other industries of the country, the Atlantic Refining Co. had a prosperous year in 1916. This prosperity came at a most opportune time, as it has made it possible to finance business extensions and plant improvements which were considered vital to the future welfare of the stockholders' interests. These extensions have been particularly in the construction of tank steamers and efforts to provide a crude oil supply.

"To carry forward these movements the directors caused to be organized, under the laws of Delaware, the Atlantic Oil Shipping Co. and the Atlantic Oil Producing Co., and purchased the stocks of the new corporations for the Atlantic Refining Co. The first named concern at this time has two new tank ships in commission and producing revenue, and has contracted for the construction of five additional ships to be delivered in the current year. The fleet thus provided will represent an aggregate investment of about \$3,855,000.

"The Atlantic Oil Producing Co. has not as yet been very active, but has acquired a controlling interest in a producing property on the Panuca River, State of Vera Cruz, Mex., from which it subsequently expects to secure a supply of heavy Mexican crude for

the Atlantic Refining manufacturing plants in the United States."

ATLANTIC SAFE DEPOSIT CO.

"(1) New Director.—Announced Jan. 11, 1917, that at the annual meeting of this company retiring directors were re-elected and Otto Sartorius was elected to the board in place of S. Duncan Leverich, deceased.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,834,249, compared with \$1,447,344 Dec. 31, 1915.

¹(3) Statement by President.—It was announced Feb. 13, 1917, that Pres. W. J. Webster, of this company, in his annual remarks to stockholders, said, in part: "Gross business for 1916 was by far the largest in the history of the company. While some of the increase was due to the manufacture and sale of chemical products, not ordinarily a large factor in its normal business, there was a substantial increase in regular commercial business. It was found advisable during the year to acquire by purchase a black powder plant in order to take care of business in western Pennsylvania.

"The company now owns six dynamite and seven black powder plants. With the purchase of the black powder plant in western Pennsylvania there was acquired a plant for the manufacture of blasting supplies, a new departure for the company.

"Of the 2,213 stockholders as of Dec. 31, last, 480 were employees."

¹(4) Extra Dividend.—Announced Feb. 20, 1917, that this company had declared the regular quarterly dividend of 2% and an extra of 3% on the common stock, both payable March 10 to stock of record Feb. 28.

—Mar.

¹(1) Directors and Officers Re-elected.—Announced March 20, 1917, that at the annual meeting of this company retiring directors were re-elected and at the subsequent meeting of directors retiring officers were re-elected.

**ATLAS STEEL CASTING CO.,
BUFFALO, N. Y.**

¹(1) Capital Increase.—On Feb. 21, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$400,000.

ATWATER (WM. C.) & CO., INC.

Surplus	948,613

Total	\$5,344,533
-------	-------------

*For establishment and introductory expenses, representing the good-will of those companies.

†Represented by tangible assets of those companies, net of their liabilities (which were \$118,961).

During 1916 cash dividends of \$225,000 were paid prior to closing of the company's books.

AUTOMATIC ELECTRIC CO.

¹(1) Extra Stock Dividend.—Announced Jan. 15, 1917, that this company had declared the regular quarterly dividend of 1% cash and an extra stock dividend of 10%, payable Feb. 1 to stock of record of that date.

**AUTOMATIC ELECTRIC CROSSING
GATE CO., PHILADELPHIA.**

¹(1) Incorporated on April 21, 1917, in Delaware, with a capital of \$500,000, to manufacture safety devices for use on railroads. Incorporators: F. R. Hansell, Geo. H. B. Martin and S. C. Seymour, Philadelphia.

AUTOMATIC MONEY MACHINE CO.

¹(1) Incorporated in March, 1917, in Maine, with a capital of \$1,000,000, to make tabulating, sorting and registering machinery.

**AUTOMATIC SPRINKLER CO. OF
AMERICA, LTD.**

¹(1) Change in Name.—On April 5, 1917, this company filed notice in Canada of a change in name to the Automatic Sprinkler Co. of Canada, Ltd.

**AUTOMATIC SPRINKLER CO. OF
CANADA, LTD.**

¹(1) New Name.—See Automatic Sprinkler Co. of America, Ltd.—Item No. 1.

**AUTOMATIC TOP SALES
CORP. (THE).**

¹(1) Incorporated on Jan. 6, 1917, in New York, with a capital of \$500,000, to manufacture auto vehicles, motors and machinery. Incorporators: B. M. Dawson, T. H. Smith and D. Wood, 10 Wall Street, New York.

AUTOMOBILE INSURANCE CO.

¹(1) Capital Increase Planned.—It was announced at Hartford, Conn., Feb. 9, 1917, that this company's directors had voted to increase the capital stock from \$1,000,000 to \$2,000,000.

**AUTOMOBILE SECURITIES CORP.,
LAKE COUNTY, IND.**

¹(1) Capital Increased.—On Jan. 24, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$10,000 to \$1,000,000.

**AUTOMOBILE SNOW ATTACHMENT
CO., FRYEBURG.**

¹(1) Incorporated in February, in Maine, with a capital of \$500,000, to manufacture, repair and deal in motor vehicles and parts.

**AUTOPED CO. OF AMERICA, INC.,
DOVEL, DEL.**

¹(1) Incorporated on Jan. 26, 1917, in New York, with a capital of \$1,000,000, to deal in autos, electric and other motors. Representative: Conrad Hubert, Thompson Avenue, Queens, N. Y.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

AUTO SALES CO. OF CANADA, LTD.

¹(1) Incorporated on March 31, 1917, in Canada, with a capital of \$250,000, divided into 2,500 shares of \$100 each, to acquire, maintain and operate buildings, etc. Incorporators: Alexandre Lacoste, Thomas John Shallow, Joseph Henri Gerin-Lajoie, Alexandre Gerin-Lajoie and Joseph Emile Cote. Chief place of business, Quebec, Que.

AVERY CO.

¹(1) Dividend Resumed.—Announced Jan. 17, 1917, that this company had declared an annual dividend of 7% on the common stock, payable Feb. 1 to stock of record Jan. 27. The last previous payment was 2½% on Nov. 15, 1915.

—Feb.

¹(1) Report, 11 Months Ended Nov. 30, 1916, shows net of \$771,831 after interest, an increase of \$328,109 over 1915.

AXLE LUBRICATING CO.

¹(1) Merger.—See Journal Lubricator Co., Inc.—Item No. 1 (under New Incorporations).

AYER MILLS.

¹(1) Note Sale.—Announcement was made Feb. 19, 1917, that this company had sold to Brown Bros. & Co. \$1,000,000 construction and equipment 3-year 5% notes, due March 1, 1920. Proceeds will be used in refunding similar amount of 4½% notes, due March 1.

The new notes are being offered at par. They are guaranteed principal and interest by American Woolen Co.

For the year ending June 30, 1916, the Ayer Mills reported a large surplus over fixed charges and could have paid off the \$1,000,000 notes. Directors, however, decided to refund in order to meet the higher prices of wool and other raw materials due to war conditions affecting them and to care for the large orders on hand and pending.

BABCOCK, HINDS & UNDERWOOD, INC., BINGHAMTON, N. Y.

¹(1) Incorporated on April 2, 1917, in New York, with a capital of \$300,000, to deal in hardware, advertising devices and act as contractors, builders, printers and publishers. Incorporators: H. J. and J. H. Underwood and C. B. Babcock, Binghamton, N. Y.

• BABCOCK & WILCOX CO.

¹(1) Report, Year Ended Dec. 31, 1916, as read at the annual meeting, shows surplus at the end of 1916 amounted to \$4,689,418, compared with \$3,476,677 at the close of 1915. This increase of about \$1,200,000 indicates that net earnings during 1916 approximated \$2,250,000, equivalent to \$15 per share on the \$15,000,000 capital stock.

Unfinished business on the company's books at the close of 1916 amounted to \$12,761,894, compared with \$4,655,288 at the close of the previous year.

The balance sheet shows that cash on hand, \$115,794, compared with \$631,039 in 1915, but inventory account shows an increase from \$2,976,347 to \$6,402,813. Current liabilities include \$2,466,749 in accounts payable and \$200,000 in bills payable, which are offset by accounts and bills receivable amounting to \$4,571,033.

The report also states the depreciation for the year amounted to \$276,250. The company completed a new building at the Barberton works and under an arrangement with its subsidiary, the Hudson Metal Products Co., was reimbursed for the cost of this building and equipment.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$4,689,418, compared with \$3,476,677 Dec. 31, 1915.

¹(3) Dividend Rate Increased.—Announced on March 9, 1917, that the company had increased its dividend rate from 7% to 8% for the year, payable in quarterly instalments of 2% on 10th of April, July, October and January next to holders of record on the last day of the preceding months, respectively.

BADGER BAG & PAPER CO.

¹(1) Sale.—See Union Bag & Paper Corp.—Item No. 1.

BADGER BRASS MANUFACTURING CO.

¹(1) Plant Sale.—It was reported Jan. 31, 1917, that the plant of this company at Kenosha, Wis., one of the largest automobile and bicycle lamp manufacturing plants in the United States, had been sold for \$400,000 to the C. M. Hall Lamp Co., of Detroit.

The deal was made by J. F. Hartz, Pres. of the purchasing company, and William F. Ankiam, Sec. & Gen. Mgr. The business will be carried on from central offices at Detroit. The merger makes the Hall Company the largest concern of the kind in the world. Business of the consolidated companies for 1916, it is estimated, will be in excess of \$2,000,000.

BAKER (WALTER) & CO., LTD.

¹(1) Stock Dividend.—It was announced Jan. 25, 1917, that this company had decided to increase its capital stock from \$2,750,000 to \$8,250,000 and to issue \$5,500,000 new stock to stockholders as a 200% stock dividend. This dividend is for the purpose of harmonizing capital and assets and represents the enlargement of capital investment from earnings prior to March 1, 1913.

In 1915 the company paid 8% regular and 8% extra in dividends.

BAKER ESTATE, INC. (THE), BROOKLYN, N. Y.

¹(1) Incorporated on Jan. 15, 1917, in New York, with a capital of \$300,000, to engage in realty, agency, brokerage, construction and managerial business. Incorporators: A. L. W. L. and F. M. Baker, 330 Westminster Road, Brooklyn, N. Y.

BAKER, MURRAY & IMBRIE, INC., MANHATTAN, N. Y.

¹(1) Capital Increased.—On Feb. 28, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$500,000.

BAKER & WILLIAMS, MANHATTAN, N. Y.

¹(1) Capital Increased.—On March 31, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$400,000 to \$800,000.

BALBACHT-HORNBECK MINES SYNDICATE, INC. (THE).

¹(1) Incorporated on Jan. 17, 1917, in Delaware, with a capital of \$750,000, to do a general mining business. Incorporators: Leopold Balbacht, Gottfried Schruher and Frederick I. Dansungberg, all of New York.

BALD HILL MINING CO., SPOKANE, WASH.

¹(1) Incorporated on Dec. 29, 1916, in Washington, with a capital of \$1,000,000. Incorporators: Albert C. Smith, Garfield Methven, Leopold Stadler, E. N. Winslow and Bernard T. Ulrich.

BALDWIN COTTON MILLS.

¹(1) Capital Increase.—It was announced March 15, 1917, that directors of this company, Chester, S. C., had voted in favor of an increase of the capital stock from \$400,000 to \$700,000, of which \$300,000 is to be pfd. stock and \$400,000 common. New equipment to the extent of 9,000 spindles and 150 looms will be added, all contracts having been awarded.

BALDWIN HARBOR REALTY CO., MANHATTAN, N. Y.

¹(1) Capital Increased.—On Jan. 18, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000,000 to \$1,500,000.

• BALDWIN LOCOMOTIVE WORKS.

¹(1) Production in 1916.—It was stated Jan. 8, 1917, that the announcement by

this company that the output of locomotives in 1916 amounted to 1,989 forecast a favorable report of earnings in the annual report in February. With the exception of the 1913 production, amounting to 2,025 locomotives, 1916 showed the largest total since 1907. On account of the increased size and higher prices for locomotives, gross sales will run considerably over 1915, and probably will be the largest in the history of the company.

Of the total of 1,989, 949, or 47.7%, were for export. Indications are that there will be a surplus for the year, after payment of the 7% pfd. dividend, considerably above the 1915 figure of \$1,427,816, which amounted to 7.14% on the \$20,000,000 common stock.

The average price received for locomotives in the last few years has increased almost 50%, amounting to \$50,000 or \$60,000, as compared with \$35,000 and \$40,000 a few years previously.

On the completion of the munition work the plants at Eddystone now under lease to the Eddystone Ammunition Corp. and the Remington Arms Co. of Delaware, will revert to the Baldwin Locomotive Works. The Baldwin Co. had planned additions to the Eddystone plant and the new buildings now used by the munitions companies were designed with a view to their future use in the manufacture of locomotives.

The Baldwin Co. could use the new plants to advantage now, as locomotive orders on the books are the largest in the history of the company.

The new plants will not be available for locomotive work in 1917, and if the demand for munitions continues after the end of the war, as seems possible, the new plants will be kept on that work.

¹(2) New Orders.—It was stated Jan. 9, 1917, that this company had received orders for 50 consolidation type locomotives and 75 of the 2-6-2 type for the British War Office. It also has received new orders for seven locomotives for different small companies.

¹(3) Orders for Locomotives.—Announced Jan. 15, 1917, that this company had received orders for nine O-60 type locomotives for the Southern Pacific and four for different firms.

¹(4) Earnings, 1916, Estimated.—It was stated, at Philadelphia, Jan. 17, 1917, that this company's annual statement would show about \$1,000,000 surplus after pfd. dividends. This would be equivalent to about 5% on the common stock. It is evident from this that Baldwin's war contracts have not been very profitable. When the stock was selling above 100, estimates of earnings ranged from \$40 to \$75 a share on the common.

—Feb.

¹(1) New Orders.—It was stated Feb. 7, 1917, that this company had received orders for locomotives as follows: Ten 2-10-2 type for Seaboard Air Line Ry. and nine for different firms.

¹(2) Locomotive Orders.—It was announced Feb. 13, 1917, that this company had received orders for 50 Mikado type locomotives for the Northern Ry. of France, 12 2-10-2 type and seven Pacific type for the Texas & Pacific Ry. and two 0-40 type for Worth Bros., Coatesville, Pa.

¹(3) Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross sales.....	\$59,219,058	\$22,083,011
Net incl. oth. inc.	10,505,063	3,510,383
Surp. after chgs.	2,619,496	2,827,816
Divs. after pfd.	1,219,466	1,427,816

¹(4) Earnings on Stock.—It was stated Feb. 19, 1917, that this company's 1916 surplus of \$1,219,466, after pfd. dividends, is equal to 6.1% on \$20,000,000 common stock, compared with 7.13% on the same stock in 1915.

¹(5) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$8,085,303, compared with \$4,865,837 Dec. 31, 1915.

JANUARY 1 TO APRIL 30, 1917

(5) Statement by President.—It was announced Feb. 20, 1917, that Pres. Alba B. Johnson, of this company, in his annual remarks to stockholders, said, in part: "During the entire year the plant has been operated as nearly to its maximum capacity as was consistent with the extraordinary conditions affecting both labor and materials brought about by the war in Europe. Contracts for locomotives and other regular work were completed and shipped amounting to \$33,005,024, and contracts for shells and other special work amounting to \$25,614,033, making a total production of every kind of \$58,619,057.

"The construction of the new pier at Eddystone and the dredging of the river surrounding it, have been completed.

"The eventual utilization for locomotive construction of the buildings now leased to the Eddystone Ammunition Corp. and the Remington Arms Co. of Delaware, when vacated by them, will release corresponding space in the Philadelphia shops.

"The Southwark Foundry & Machine Co. has developed a successful business in constructing hydraulic machinery, internal combustion engines, and similar machinery.

"The large volume of locomotive business has necessitated the construction of an additional machine shop, a superheater shop and an extension to the smith shop at Eddystone. The demand for locomotives has required the withdrawal of special work from all the locomotive shops, and the machining of shells has accordingly been concentrated in a building. The aggregate cost is \$1,567,752. An extension of the foundry at Eddystone is under construction, but no part of its cost is included in the accounts of 1916.

"In addition to the buildings constructed for rental the expenditures for real estate, buildings and machinery for the year aggregate \$11,443,488. There has been charged against the operations of the year, for maintenance and renewals, \$2,230,971.

"On May 1 the second payment of \$200,000 for the benefit of the sinking fund was made to the trustees of the first mortgage bonds, making a total including accrued interest of \$419,550 in the sinking fund.

"The total sales of Standard Steel Works Co. for the year 1916 were \$14,449,849 and the net profits \$1,327,338. After providing for the sinking fund payment of \$200,000 and dividends of \$300,000, the balance remaining is \$327,338.

"Of the \$5,000,000 Standard Steel Works Co. bonds originally issued, \$1,800,000 have been cancelled by the provisions of the sinking fund, leaving the amount outstanding \$3,200,000."

(7) Additional Locomotive Orders.—It was announced Feb. 23, 1917, that this company had received orders for locomotives as follows: 35 Mikado type for Illinois Central R. R.; 20 Pacific type and 36 2-10-2 type for Lehigh Valley R. R.; and one 0-6-0 type for Carnegie Steel Co.

—Mar.

(1) Annual Meeting—New Director.—It was announced March 1, 1917, that at the annual meeting of this company J. Wilson Bayard was elected a director in place of Charles D. Norton. Other directors were re-elected.

John Luntz, of Baltimore, a stockholder, said that in his opinion a dividend should be declared on the common stock. He asked an explanation of several items in the annual report, which were explained by Pres. Johnson. This was ruled out of order. He also offered a resolution to annul the by-laws so as to provide for a representation on the Board of Directors, six representing the pfd. and six the common stock. Mr. Luntz objected to a reserve for losses shown in the balance sheet, claiming that it was out of proportion to the losses actually suffered.

In reply to a question by Mr. Luntz, Pres. Johnson explained that the Southwark Foundry & Machine Co. had been

purchased after a full investigation by a committee appointed by the directors. The meeting was attended by about 25 stockholders.

(2) New Orders.—See Philadelphia & Reading R. R. Co.—Item No. 3.

(3) New Orders.—It was announced March 8, 1917, that this company had received orders for 25 0-6-0 type and seven Pacific type for the Union Pacific R. R.; five 2-8-2 type for the Philadelphia & Reading, two 0-8-0 type for McKeesport Connecting R. R., three consolidated type for the Cuba Cane Sugar Corp., and one 0-6-0 type for the Public Service Electric Corp. of Newark, N. J.

(4) New Orders.—It was announced March 13, 1917, that this company had received orders for 10 Mikado type locomotives for the Nashville, Chattanooga & St. Louis Ry., and six for different companies.

(5) Locomotive Orders.—Announcement was made on March 27, 1917, that this company had received orders for the following locomotives: One 0-6-0 type for Swift & Co., St. Joseph, Mo., and one 0-6-0 type for Wyandotte Terminal Railroad Co.

(6) May Benefit by Government Munition Business.—On March 28, 1917, the "Wall Street Journal" said that strength and activity in Baldwin were apparently based on the expectation that the company might benefit in munitions orders if this country became engaged in the war. Nevertheless, it would seem that the company's operations in such a case would be limited to the making of shell bodies, as under the present arrangement regarding rifle production at the Remington plant, and shrapnel production at Eddystone, Baldwin would get but a small share in the profits of these plants.

Rumors of a large cash distribution in the near future are characterized by insiders as absurd. It is pointed out that the company has been a heavy borrower, and the directors would not consider the payment of dividends until these loans have been liquidated, or at least, nearly so.

Baldwin is in an excellent position in respect to its regular business, the manufacture of engines. It is now sold up to the end of December and could easily secure business for more distant delivery if it cared to contract that far ahead. All this business has been taken at prices that should yield a substantial profit.

—Apr.

(1) Locomotive Order.—Stated on April 9, 1917, that an order for 9 Mikado locomotives in addition to 7 Mallet, had been placed with this company by the Carolina, Clinchfield & Ohio Ry.

(2) Eddystone Status.—See Eddystone Ammunition Corp.—Item No. 3.

(3) New Orders Received.—On April 21, 1917, this company received orders for seven Santa Fe type locomotives for the Chicago & Eastern Illinois R. R. and four different types for small concerns.

(4) Russian Order.—A Philadelphia dispatch April 20, 1917, stated that this company had received the bulk of the large locomotive orders recently placed in the United States by the Russian Government. The orders to be filled by the Baldwin Company on this contract aggregate \$11,000,000.

BALLOW SAFETY RAIL JOINT & NUT CO.

(1) Incorporated on Feb. 2, 1917, in Delaware, with a capital of \$1,000,000, to manufacture and sell Ballow safety rails, joints, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

BALTIMORE & CUMBERLAND VALLEY RY.

(1) Merger Planned.—See Western Maryland Ry. Co.—Item No. 1.

BALTIMORE DRY DOCK & SHIPBUILDING CO.

(1) New Plant at Baltimore Planned.—This company, stated "The Iron Age," April 26, 1917, has completed plans for the construction of a shipbuilding plant on the water front at Baltimore, which will eventually cost about \$3,500,000, and from which it is expected to turn out eight wooden ships a year. The site covers about 20 acres and has a waterfront of more than 600 feet. Pres. Holden A. Evans stated that about \$2,000,000 will be spent at once if a project of the city does not interfere, and later \$1,500,000 will be expended.

BALTIMORE GAS APPLIANCE & MANUFACTURING CO.

(1) Initial Dividend on Common.—Announced Feb. 6, 1917, that this company had declared an initial dividend of 1% on the common stock, payable March 1 to stock of record Feb. 24.

(2) Status.—It was stated Feb. 7, 1917, that this company, which had just declared an initial dividend of 1% on the common stock, had been paying regular dividends on the pfd. since organization, this rate being 6% to 1916 and 7% since that time.

The company is affiliated with the Consolidated Gas, Electric Light & Power Co. of Baltimore, having been organized five years previously by interests identified with that corporation. The present management of the electric and gas company had discovered that all the gas stoves and gas appliances in use in Baltimore were manufactured outside that city, although sales of these products were large in Baltimore territory.

The company was started in 1913, and in that year did a business of \$257,000, which in 1916 had increased to almost \$500,000 a year, compared with \$269,000 in 1915.

Power for the operation of the plant and a large part of the gas for fuel and heating is furnished by the gas and electric company. In 1916 the company sold 43,728 gas appliances, as compared with 24,692 in 1915.

The company sells its products to more than 600 gas companies in the United States, and for 1917 it is stated that it already has on its books orders for more ranges and water heaters than it shipped in the full year of 1916.

• BALTIMORE & OHIO R. R. CO.

1 (1) President Reviews 1916.—In a statement issued Jan. 1, 1917, Pres. Daniel Willard, of this company, said in part:

"The situation during 1916 may be summed up as a somewhat paradoxical one in respect to the railroads. Gross earnings exceeded the record in any previous year; expenses also mounted to their highest peak as a result of increased cost of materials and supplies, higher rates of pay to transportation workers, advances in taxes, and charges incident to compliance with the edicts of authorities in matters of national and State regulation.

"It is hardly to be expected that the earnings of the carriers will be increased to any appreciable extent in 1917 with their present plant capacity, but if business demands continue and if the roads are able to enlarge their facilities correspondingly, then the ratio of increase should be continued.

"The present inability of the railroads to furnish all the empty cars desired for loading is not due entirely to lack of equipment.

"A serious problem directly affecting the car supply, is the inability to have cars unloaded and reloaded promptly after they have reached their destinations.

"The enlargement of terminals will depend largely upon the point of view of the roads individually. In respect to the relations between the public and the carriers, the review, as well as the outlook, may be considered promising."

2 (2) Embargo West of Pittsburgh.—It was stated at Connelleville, Pa., Jan. 11, 1917, that this company had declared an embargo on all freight west of Pittsburgh, except engine fuel, Government freight and perishable goods.

3 (3) Embargo at Baltimore.—On Jan. 12, 1917, this company announced, effective at midnight, an embargo on all export freight through the port of Baltimore. It was explained by the traffic department of the company that the embargo became necessary as a matter of protection and in order to prevent a serious congestion which would interfere with the operation of the road. The embargo, it was said, would not likely be of long duration.

4 (4) Equipment Orders.—It was stated Jan. 10, 1917, that this company had placed two equipment orders for cars which will cost approximately \$3,500,000. They cover 2,000 steel hopper cars to be delivered in 1917, and 1,000 of them will be built by the Standard Steel Car Co. at its Curtis Bay plant, near Baltimore, while the other 1,000 will be built by the Pullman Co., Pullman, Ill.

The company says that the cars to be built at Curtis Bay will be composite steel hoppers, and that the contract for this equipment was made necessary by the plans for the road's future traffic requirements. It recently ordered 40 locomotives from the Baldwin Works, and these, together with the cars, represent an expenditure of about \$4,500,000.

5 (5) Embargo on Explosives.—It was announced Jan. 16, 1917, that this company had declared an embargo on shipments of explosives consigned or to be reconsigned to or by way of St. George Lighterage, Staten Island, N. Y.

This is in addition to the embargo placed on all export business by the company the previous week.

6 (6) Cereal Embargo Lifted.—It was announced Jan. 16, 1917, that this company had lifted its embargo on shipments of wheat, corn and oats for export via Baltimore from points east of Chicago Junction, O.

7 (7) Higher Rates Sought.—It was announced at Charleston, W. Va., Jan. 16, 1917, that this company had filed a petition with the Public Service Commission of West Virginia for permission to advance its intra-State passenger rates from two cents a mile, as prescribed by the laws of West Virginia, to at least 2½ cents a mile. Feb. 27 was fixed as the time for a hearing.

The Baltimore & Ohio Co. operates in 32 of the 55 counties of the State, with a total of 1,132 miles of track, that being about one-fourth of the total mileage of the company.

—Feb.

3 (1) Earnings—	1916	1915
Dec. gross.....	\$9,544,592	\$9,164,762
Net.....	2,865,327	2,626,428
6 months gross.....	61,340,505	56,040,304
Net.....	18,361,612	18,201,912

2 (2) Telegraph Contract Upheld.—It was announced Feb. 19, 1917, that Judge Mayer, of the Federal District Court at New York, had granted a decree overruling the decision of the Interstate Commerce Commission regarding the contract for an exchange of service between this company and the Western Union Telegraph Co. The commission's decision, which was overruled, declared the contract was contrary to law because some of the services rendered were off the companies' lines.

The contract was made in 1887 for a term of 50 years, and provided that telegraph messages should be exchanged for railroad transportation up to \$10,000 a year, and that half rates should be charged above that amount.

Judge Mayer said in his decision that an amendment to the Interstate Commerce act permitted the exchange of service between railroad and telegraph companies, both on and off their lines.

3 (3) Fined for Breaking Law.—Announced at Philadelphia Feb. 21, 1917, that before Judge Dickinson in the United States District Court a verdict for \$1,000 had been returned in favor of the Government against this company for alleged violation of the 28-hour law by allowing cattle to remain in cars longer than 28 hours without food or water.

—Mar.

3 (1) Earnings—	1917	1916
January gross.....	\$9,772,353	\$8,444,287
Net after taxes.....	2,646,118	2,048,976

2 (2) Comment on January Earnings.—On March 2, 1917, the "Wall Street Journal" said that this company's earnings for January showed a gain of \$1,328,065, or 15%, in gross, and a gain in net of \$597,141, or 29%. Maintenance expenses were \$140,000 greater than in January, 1916, while transportation expenses, which have recently been the bugaboo of railroad men in Eastern territory, increased only \$546,233, or less than half the gain in gross.

In December the gains were only \$238,900 in gross and \$159,711 in net, before deducting taxes. In November gross gained \$17,527 and net decreased \$79,189.

Combining the January figures with those for the six months ended December, the gross earnings for the seven months to Jan. 31 show a gain of \$6,628,206, or 10.3%, and the net a gain of \$750,841, or 3.7%.

3 (3) Hearing on Fare Raise Request.—It was announced at Charleston, W. Va., Feb. 27, 1917, that a hearing had been begun there before the West Virginia Public Service Commission on the petition of this company for permission to advance its passenger rates in West Virginia from 2 cents a mile to at least 2½ cents a mile. The company claims to have been operating at a loss under the rate prescribed by the State two-cent-fare law.

4 (4) Sued by U. S. Express Co.—It was announced March 6, 1917, that suit had been brought in the Supreme Court by the United States Express Co. against this company to recover damages for \$950,360, alleged to have been sustained since Jan. 1, 1913, the date the parcel post went into effect, because, it is alleged, the defendant company had not given to the plaintiff the exclusive express business over that railroad under a 30-year contract, dated Aug. 17, 1887.

5 (5) New Pier Opened.—It was announced at Baltimore March 6, 1917, that the new \$2,500,000 steel and concrete coal pier of this company at Curtis Bay, had been opened for traffic. This structure is the largest of its kind in the world, having a capacity of 12,000,000 tons of coal a year and a maximum capacity of 7,000 tons an hour. It is operated solely by electricity.

6 (6) Application to List.—It was announced March 12, 1917, that application had been made to the New York Stock Exchange to list \$2,000,000 additional of this company's first mortgage 50-year 4% bonds, due 1948.

7 (7) Chairman Murray Dead.—Announced March 14, 1917, that Oscar G. Murray, chairman of the Board of Directors of this company, had died on that date.

8 (8) Bonds Admitted to List.—Announced March 14, 1917, that the New York Stock Exchange had listed \$2,000,000 additional first mortgage 4% bonds of this company, due 1948, making the total amount authorized to be listed \$82,000,000.

3 (9) Earnings—	1917	1916
February gross.....	\$8,665,656	\$8,325,177
Net.....	1,824,190	1,936,638
2 mos. gross.....	18,438,009	16,769,464
Net.....	4,470,309	3,985,614

10 (10) Equipment Trusts to Be Issued.—Stated on March 29, 1917, that arrangements were being made by this company to put out \$10,000,000 of equipment trusts. It is expected that Kuhn, Loeb & Co. and Speyer & Co. will head the underwriting syndicate that will take the issue. Official announcement is expected within the next two or three days.

—Apr.

1 (1) Equipment Certificates Issue Planned.—It was announced at Columbus, O., April 2, 1917, that this company had made application to the Ohio Utilities Commission for authority to issue \$10,000,000 equipment certificates, to run ten years and bear interest at 4½%. Proceeds are to be used in buying equipment, including 40 locomotives, 2,000 steel cars, and 5,000 other cars. The issue only covered 80% of cost of equipment, on account of it being an emergency affair.

2 (2) Equipment Trust Sale.—Announcement was made April 2, 1917, that Kuhn, Loeb & Co. and Speyer & Co. had purchased \$10,000,000 Baltimore & Ohio equipment trust 4½% certificates maturing in annual installments during 10 years. The entire amount was sold privately.

3 (3) Higher Rates Reported as Necessary.—It was stated April 3, 1917, that statistical statements and calculations made by the management of this company had been submitted to the Interstate Commerce Commission to show that unless the road is allowed to increase its freight rates practically all of its surplus applicable to the dividend on the common stock may disappear by the end of 1917. This shows the severity with which the operation of the eight-hour law will fall on this road, with the additional cost of material and other necessary expenses added.

In the last six months of 1916 the company earned a surplus applicable to dividends of approximately \$7,000,000, but it is contended that this cannot be maintained in the face of the high cost of all that the company uses and the greater sum it must pay its trainmen.

4 (4) New Line Over Potomac Assured.—See Washington & Newport News Short Line.—Item No. 1.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

⁴ (5) Earnings—	1917	1916
March gross.....	\$9,602,768	\$9,269,711
Net	1,468,807	2,187,544
3 mos. gross.....	28,130,774	26,039,175
Net	5,939,115	6,173,169

The large increase in operating expenses and consequent decrease in net is due mostly to the adjustment of the wages of trainmen to meet the eight-hour day and the back pay due them under this law from Jan. 1, 1917.

BALTIMORE PUMP CO., BALTIMORE, MD.

²(1) Incorporated in March, 1917, in Maryland, with a capital of \$600,000, to manufacture steam pumps. Incorporators: Wm. H. Dempsey, Jr., Eustis H. Thompson and Herbert B. Stimpson.

• BALTIMORE TUBE CO.

²(1) Earnings at 26% Rate.—It was announced Feb. 8, 1917, that this company, which began business on Jan. 25, 1916, reported earnings from sales of \$860,000 for the period ended Dec. 31, and a net profit of \$683,000, equivalent to 26% on the stock. Charles S. Morse, Pres., stated that the capacity is sold for the first six months of 1917 and that the outlook for future business is satisfactory.

In a statement issued June 16, 1916, the management reported that earnings for the first five months were at the rate of 55% on the common stock. In the later months of the year the ratio dropped to 28%, owing to the rapid increase in the cost of labor and supplies.

²(2) Report, 11 Months Ended Dec. 31, 1916, shows sales profits amounting to \$879,741. Net profits for this period was \$663,324 after deduction of the following: Miscellaneous taxes, \$69,648; depreciation, etc., \$64,519, and \$82,250 reserved for contingencies. Dividends amounting to \$78,125 were paid on the pfd. stock and \$118,125 in dividends was paid on the common stock.

BANKERS COMMERCIAL CORP., NEW YORK.

²(1) Capital Increased.—On March 30, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$1,000,000.

BANKERS TRUST CO., NEW YORK.

²(1) Merger with Astor Trust Co.—Capital Increase.—At a special meeting of stockholders of the Bankers Trust Co. April 17, 1917, it was voted to merge the Astor Trust Co. into the Bankers Trust Co., to increase the number of directors of the Bankers Trust from 22 to 30, and to amend the by-laws accordingly.

As a subsequent meeting stockholders also voted to increase the capital stock of the Bankers Trust Co. from \$10,000,000 to \$11,250,000, such increase being for the purpose of effecting an equitable conversion of Astor Trust stock into Bankers Trust stock.

²(2) Capital Increased.—On April 20, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$10,000,000 to \$11,250,000.

BANKERS TRUST CO., ST. LOUIS.

²(1) Railroad Bonds.—A St. Louis dispatch Feb. 14, 1917, stated that Leon W. Quick, receiver for Bankers Trust Co., had repurchased San Antonio, Uvalde & Gulf R. R. bonds from J. T. Milliken for \$786,000 and sold them to L. S. Mitchell for \$1,000,000. These are the bonds which Milliken bought Dec. 15 under 90-day agreement that if Quick could not redeem them they would become Milliken property. Bonds formed the chief asset of the defunct Bankers Trust Co.

Mitchell, who is associated with the Pres. of National Bank of Commerce, is believed to be contemplating selling them to a syndicate, composed in part of stockholders of the defunct Bankers Trust Co.

BANKERS UNDERWRITING CORP.

²(1) Incorporated on Jan. 23, 1917, in New York, with a capital of \$2,000,000, to engage in realty, stock, bond and auditing business. Incorporators: R. P. and R. E. Monahan and R. E. Barber, 2011 Morris Ave., Bronx, N. Y.

BANK OF COMMERCE, CLEVELAND, O.

²(1) Merger.—See Citizens Savings & Trust Co.—Item No. 1.

—Feb.

²(1) Merger.—See Union National Bank.—Item No. 1.

BANNER TIRE & SUPPLY CO., CLEVELAND, O.

²(1) Capital Increased.—On March 28, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$250,000 to \$400,000.

BARBROOK OIL & GAS CO.

²(1) Incorporated in January, 1917, in Oklahoma, with a capital of \$1,000,000. Incorporators: E. S. Horn, J. B. L. Brookins and A. W. Sipe, Jr.

BARDEEN PAPER CO.

²(1) Officers.—It was announced Feb. 2, 1917, that at the annual meeting of this company at Otsego, Mich., the following officers and directors were elected: Pres., George E. Bardeen; Vice-Pres., S. B. Monroe; Sec'y, Mrs. George E. Bardeen; Treas., C. A. Peck. Directors, G. E. Bardeen, Mrs. G. E. Bardeen, M. B. McClellan, C. A. Peck, A. B. Connable, J. W. Thompson, George D. Cobb, S. B. Monroe and W. E. Kidder.

BARE WIRE CO. (THE), INC.

²(1) Incorporated on April 11, 1917, in New York, with a capital of \$500,000, to deal in wire, cables, waterproof and insulated wire. Incorporators: J. S. Keith, G. F. Waterbury and E. W. Moore, 10 East 43d St., New York.

BARKWELL-FARR CO.

²(1) Initial Dividend.—Announced Jan. 1, 1917, that this company, Cleveland, had declared an initial dividend of 1½%. This is the first dividend on the stock as fixed under the recapitalization plan. It is for the quarter ended Dec. 31 and is payable Jan. 10, 1917, to holders of record Dec. 31.

BARLEY MOTOR CAR CO., STREATOR, ILL.

²(1) Removed.—It was announced March 22, 1917, that this company would be moved to Mansfield, Ohio, where a new company has been organized and incorporated with a capital stock of \$1,000,000 under the name of the Halladay Motor Car Co. to manufacture pleasure cars. It will occupy the plant formerly used by the Baxter Stove Co.

BARNES-KING DEVELOPMENT CO.

²(1) Report, Year Ended Dec. 31, 1916, shows net profits of \$96,338, against \$147,968 in 1915. It was stated the decrease was caused by a shrinkage in tonnage values at the North Moccasin property and an increased loss at the mines near Marysville, Mont. At the close of the year the company had a balance of \$109,120, consisting of \$34,726 cash on hand and \$74,394 bullion in transit.

BARNEY & SMITH CAR CO.

²(1) New Director.—Announced March 8, 1917, that Charles Boldt, of the Charles Boldt Glass Co., had been elected a director of this company, Dayton, O.

• BARRETT CO.

²(1) Coke By-product Contracts.—It Colorado Fuel & Iron Co.—Item No. 2.

—Mar.

²(1) Stock Offering Planned.—Underwritten.—It was stated March 3, 1917, that the sale of this company's additional pfd. and common stocks, as planned, is to provide funds for new

JANUARY 1 TO APRIL 30, 1917

construction, and for new working capital. Under the terms of the stock increase about \$5,500,000 will be raised.

A special meeting of the stockholders has been called for March 18 to increase the authorized amount of pfd. stock from \$5,000,000 to \$12,500,000, and the common stock from \$15,000,000 to \$25,000,000.

Pfd. stockholders will be given the right to subscribe to 30% of their holdings in new pfd. stock at par, and the common stockholders the right to subscribe to 20% of their holdings in common stock, and 10% in new pfd. stock.

The offering has been underwritten by a syndicate headed by Montgomery, Clothier & Tyler.

(2) Annual Meeting March 27.—It was announced March 3, 1917, that the annual meeting of this company would be held March 27. Stockholders of record March 6 are entitled to vote.

(3) Earnings, 1916, Estimated.—It was stated March 3, 1917, that, based on the official estimates for the year, this company for the six months ended Dec. 31, 1916, exceeded by about \$350,000 those of the first half of 1916, which aggregated \$2,783,453, and were equivalent to 22 1/4% on the \$11,298,200 of common stock then outstanding. Net for the last half of 1916 showed approximately 20% earned on the \$15,000,000 of common stock outstanding, after deducting dividends on the \$5,000,000 of 7% pfd. stock issued.

The result of the full year's operations was officially estimated to show approximately 37% earned on the common stock. With the income from the one-third interest in the Benzol Products Co., the balance for the year before reserves should show close to 40% for the junior issue outstanding. This compares with 21.19% earned in 1915 after paying dividends on the \$2,500,000 of pfd. stock then issued.

The Barrett Co. succeeded the American Coal Products Co., which owned virtually all of the \$5,000,000 capital stock of the Barrett Mfg. Co. In changing the title to the Barrett Co. the value of the good-will accompanying the name of Barrett was preserved.

The company in addition to manufacturing roofing and road materials has been supplying the coal tar crudes.

(4) Stock Subscription Terms.—It was announced March 6, 1917, that subscription to this company's new common stock would be paid for on the following terms: 25% April 6, 1917; 25% June 30, 1917; 25% Sept. 30, 1917; and 25% Dec. 31, 1917. New pfd. stock will be paid for as follows: 25% April 6, 1917; 25% July 15, 1917; 25% Oct. 15, 1917; 25% Jan. 15, 1918. Subscription rights will accrue to stockholders of record March 19 and right to subscribe will expire April 6.

(5) Stock Increase Authorized—Stockholders' Rights.—It was announced March 16, 1917, that stockholders of this company at a special meeting authorized an increase in the pfd. stock from \$5,000,000 to \$12,500,000, and the common from \$15,000,000 to \$25,000,000.

Preferred stockholders have the right to subscribe to 30% of their holdings in new pfd. stock at par, and common stockholders the right to subscribe to 20% of their holdings in common stock, and 10% new pfd. stock.

(6) Report, Year Ended Dec. 31, 1916, shows gross earnings amounting to \$9,547,604, an increase of \$2,894,965 over 1915. Net profits were \$4,256,623, representing a gain of \$1,766,665 over the previous year. Profits applicable to the common stock were \$3,914,808, equal to 32.1% on the \$12,089,100 common stock issued, compared with 21.44% earned on \$10,726,700 common stock in 1915. Pfd. dividends totaling \$333,249 were paid during the year.

(7) Income Account, Year Ended Dec. 31, 1916, of this company, formerly American Coal Products Co., compares as follows:

	1916	1915
Gross	\$9,547,604	\$6,652,639
Bal. after pfd. dividends	3,914,809	2,307,236
Surp. after com. dividends	1,097,283	1,007,304

(8) New Directors.—At the annual meeting of stockholders on March 28, 1917, the following new directors were elected to the board: Theodore Roosevelt, Jr., Ralph Esau, J. H. Fulton, Isaac B. Johnson and D. T. Perry, to succeed A. T. Pery, W. H. Rankin, William M. Orr, E. J. Steer and W. A. Forman. The retiring 17 directors were re-elected.

—Apr.

(1) Expiration of Rights.—It was stated April 4, 1917, that the right to subscribe to the new issues of common and pfd. stock of this company expires on April 6. There has been buying by persons who intend to exercise this right, which accounts for the strength of the stock.

The company is doing a large business and a large proportion of present contracts are war orders, and this business is likely to increase as the company supplies some of the basic materials that are used in the manufacture of explosives.

(2) Admitted to List.—Announced April 7, 1917, that the New York Stock Exchange had admitted to the list this company's subscription receipts for pfd. and common stock, 25% paid and full paid.

(3) Profit-Sharing Plan.—Announced April 7, 1917, that stockholders of this company had authorized the amendment of the charter so that the profit-sharing plan may be put through by the directors each year without special authorization of the stockholders. The distribution for 1917 will be made as usual toward the latter part of the year.

(4) Status.—It was stated April 6, 1917, that this company, the legal successor to the American Coal Products Co., would be one of the important chemical producers to whom the United States Government naturally would turn in order to get the chemical base materials from which such high explosives as trinitrotoluol and picric acid are derived. If war orders materialize they are bound to exert a most stimulating influence upon the course of 1917 profits.

The 1917 earning balance for the Barrett Co. was equal to 32.1% on the \$12,089,100 common against 21.1% on \$11,298,000 common in 1915. The earning record in 1916 was outwardly disappointing. During the first half of 1916 the company earned fully 24% on its common. Apparently the second six months produced a common stock balance of only 8%.

This falling down is believed to have been more apparent than real. It is believed to be accounted for by failure to take down any dividends from certain important subsidiaries including Benzol Products Co., in which it has a 33 1/4% interest, and also to excessively large charges against income for betterments extensions and depreciation.

Current prospects are that the Barrett Co. will earn very close to 40% on its common in 1917. This percentage may be somewhat reduced by the fact that \$5,500,000 new pfd. and common stocks are issuing and as of Dec. 31, 1917, will be fully outstanding.

In 1917 stockholders will receive cash dividends on their common of 17%. This includes a 10% extra declared in December and made payable in January. The regular rate on the common is 7%.

(5) Sale of Processes.—See National Aniline & Chemical Co., Inc. — Item No. 1.

BARRICK KENTUCKY OIL & GAS CO.

(1) Incorporated on April 5, 1917, in Delaware, with a capital of \$1,000,000, to carry on the business of an oil company. Incorporators: Emanuel Barrick, Chas. R. Adams and J. Norton Adams, Philadelphia, Pa.

BARTLETT HAYWARD INTERURBAN RY. CO.

(1) Bonds.—It was announced Jan. 2, 1917, that this company, a subsidiary of Cities Service Co., had called for

payment at 102 and interest \$250,000 first mortgage 6% bonds due July 1, 1934, and has sold to Edward V. Kane & Co., of Philadelphia, \$350,000 first mortgage sinking fund 6% bonds, dated Jan. 1, 1917, and due Jan. 1, 1947.

The new bonds are a first lien on all property of the company which has a replacement value well in excess of the new bond issue. The company serves, without competition, a population of 20,000 with electric railway and electric light and power service, 80% of the revenues coming from electric light and power. Earnings have increased 40% since 1912 and the sinking fund will retire 90% of the bonds by maturity.

BARTLETT HAYWARD CO.

(1) Financial Condition.—It was stated March 19, 1917, that this company, incorporated under the laws of Maryland, had filed with the Massachusetts Secretary of State a statement of its financial condition, dated Dec. 31, 1916, which compares as follows:

	1916	1915

BASIO STEEL CO.

(1) Acquisition.—It was stated Jan. 26, 1917, that this company, a subsidiary of De Forest Sheet & Tin Plate Co., had purchased a 152-acre tract adjoining its present property, on which to build an open-hearth plant.

—Feb.

(1) Status.—On Feb. 1, 1917, Pres. Wade A. Taylor, of the Deforest Sheet & Tinplate Co., issued the following statement about the company's subsidiary, the Basic Steel Co.:

"The Basic Steel Co. is an Ohio corporation formed in 1909 and is a subsidiary of the Deforest Sheet & Tinplate Co., the officers being Wade A. Taylor, Pres. and Treas., and Charles S. Thomas, Vice-Pres. and Sec'y. At the time of its organization the Basic Steel Co. acquired some acreage adjacent to the property of the Deforest Sheet & Tinplate Co., this being held as a site for a steel plant to be built when needed by the Deforest Sheet & Tinplate Co.

"The purchase of land made by the Basic Steel Co. last week comprises all of the 152-acre Heaton tract which fronts upon the Erie R. R. up to Deforest Junction, making a total frontage now owned by the Basic Steel Co. and the Deforest Sheet & Tinplate Co. of about 1 1/2 miles, running along the Erie R. R. and B. & O. tracks and extending in a transverse direction from the Erie R. R. tracks to the Mosquito Creek, a distance of about one mile, which gives the two companies ample room for future development and extension.

"It has not been definitely decided just when work will be started on the steel plant, as this depends upon some other matters now being rounded out, but the Deforest Sheet & Tinplate Co. requires about 80,000 tons of raw steel per annum for its present finishing mills, over one-third the production of which is consumed normally by its pressed steel department, and which must be open-hearth grade.

"The Deforest Sheet & Tinplate Co.'s annual meeting does not occur until

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

May, hence no statement has been made public, but its net profits for 1916 were over 95% of its capital stock. Dividend disbursements, however, have been confined to its regular rate of 1% monthly."

BASTIAN BROS. CO., ROCHESTER.

¹(1) Capital Increased.—On Feb. 23, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$600,000 to \$850,000.

BATAVIA RUBBER CO.

¹(1) Capital Increased.—On Feb. 26, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$875,000.

BATCHELDER MINING CO.

¹(1) Proposed Consolidation.—It was reported on April 7, 1917, that New York and Denver capitalists proposed to form a consolidation of seven of the largest mines in Mineral County, Colo. It was stated that leases for a twenty-year period had been executed in Denver to Gerald Hughes and others. The properties, situated along the Amethyst and Commodore veins, are to be extensively developed and mills erected for the treatment of ores at an outlay of approximately \$1,000,000.

Properties included in the proposed consolidation, which is to be consummated in the near future, are the Batchelder Mining Co., the Commodore Mining Co., the Last Chance Mining Co., the New York Chance Mining Co., the Volunteer Mining Co., the Amethyst Mining Co., and the property of the Creede Mines and Milling Co.

BATES AEROPLANE CO.

¹(1) Incorporated on April 14, 1917, in Delaware, with a capital of \$500,000, to manufacture airplanes of all kinds. Incorporators: Samuel B. Howard, L. H. Gunther and Geo. V. Reilly, all of New York.

BATOPILAS MINING CO.

¹(1) Retiring Directors Re-elected.—On April 17, 1917, at this company's annual meeting, retiring directors were re-elected.

BATTEN (GEORGE) CO., INC.

¹(1) Incorporated on Feb. 23, 1917, in New York, with a capital of \$1,000,000, to deal in general advertising. Incorporators: J. V. L. Wyckoff, W. H. Johns and G. Batten, Montclair, N. J.

BATTERY PARK NATIONAL BANK, NEW YORK.

¹(1) New Director.—Announced Jan. 9, 1917, that at the stockholders' meeting of this bank Frank A. Dillingham was added to the board. All retiring directors were re-elected.

BAY COUNTIES POWER CO.

¹(1) Bonds Drawn for Redemption.—It was announced March 14, 1917, that this company, a subsidiary of Pacific Gas & Electric Co., had drawn for redemption at 100% and interest, on April 1, 1917, \$135,000 of its outstanding second mortgage bonds.

BAY STATE FISHING CO.

¹(1) Initial Dividend.—Announced April 11, 1917, that this company had declared an initial dividend of 2% on the \$3,000,000 of common stock, payable June 1.

BAY STATE STREET RY. CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows gross of \$10,410,806, net after taxes of \$1,969,960 and surplus after charges of \$328,908.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$328,908.

¹(3) Stock and Bond Issue Planned.—It was announced Feb. 21, 1917, that this company had filed a petition with the Massachusetts Public Service Commission for authority to issue \$700,000 par value 1st pfd. stock, and bonds on mortgage of the Boston & Northern Street Ry. Co. to the amounts of \$272,000 and \$250,000 par value, to pay for improvement in reconstruction of track and other permanent improvements. The company also petitioned for right to issue \$242,000 bonds on mortgage of Old Colony Street Ry. and \$170,000 par value on mortgage to the Boston & Northern Street Ry. to pay current debt.

—Apr.

¹(1) March Gross Receipts increased \$47,000, or 6% over the same month in 1916. This compares with a gain of \$23,800 and \$39,000, respectively, in February and January over the corresponding months of 1916.

¹(2) Pres. Points Out Problems Confronting Company.—Pres. Sullivan, of this company, in a personal message to employees April 16, 1917, in "Triangle Talks," the organ of the road, said: "People cannot be persuaded to invest money in an enterprise that does not promise to pay a fair interest and insure safety of the investment. The public service commission has authorized us to sell \$2,500,000 worth of 6% notes, but there is no market for them at present."

"Maintenance costs have increased from \$785 per track mile in 1901 to \$1,633 in 1914. In 1915 we paid in wages \$4,419,768. In 1916 we paid \$4,911,223, an increase of 11%. It will cost us nearly \$300,000 more for coal this year than it did a year ago. Material costs have gone skyward."

"The increased revenue over 1915 was only \$458,077, whereas increased operating expenses amounted to almost twice as much—\$867,128."

"There are 33,000 privately owned automobiles in the territory served by us. Let us assume that each car takes ten cents per day (a conservative estimate) out of the income of the Bay State, and we find an annual loss of \$1,200,000. The 'jitneys' take from us \$290,000 annually."

¹(3) \$1,212,000 New Securities Authorized.—By an order issued April 26, 1917, the Massachusetts Public Service Commission authorized this company to issue new securities amounting to \$1,212,000, including 4,800 shares 1st pfd. stock at \$100 per share, \$170,000 Boston & Northern Street Ry. 50-yr. 4% bonds to pay floating indebtedness and \$155,000 of these bonds for construction and equipment of railway and purchase of property, \$242,000 Old Colony Street Ry. bonds for paying floating indebtedness, and \$156,000 for construction and equipment and purchase of property.

BAY TERMINAL R. R. CO., TOLEDO, O.

¹(1) Capital Increased.—On Feb. 10, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$100,000 to \$300,000.

BEATRICE CREAMERY CO.

¹(1) Extra Dividend.—Announced Jan. 25, 1917, that this company had declared the regular quarterly dividend of 2½% on the common stock, payable Feb. 12 to stock of record Feb. 6, and an extra of 10%, payable to stock of record March 2.

—Feb.

¹(1) Report, Year Ended Dec. 31, 1916, shows a surplus of \$176,542, after payment of dividends and allowance for depreciations. The total surplus amounts to \$1,800,616.

—Mar.

¹(1) Balance Sheet, as of Feb. 28, 1917, shows cash amounting to \$423,663; total current assets \$2,548,015; total current liabilities \$470,137; surplus and undivided profits \$1,711,866, and total assets and liabilities of \$8,614,084. The company reports a surplus after paying preferred and common dividends of \$159,792.

BEAUMONT MANUFACTURING CO.

¹(1) Extra Dividend of 2½%.—On April 23, 1917, the "Daily News Record," New York, stated that this company, Spartansburg, S. C., had declared an extra dividend of 2½%, payable May 1 on common stock of \$310,000. This places the stock on a 15% annual basis. D. L. Jennings was elected Pres. at the annual meeting; J. R. Reynolds, of New York, Vice-Pres., and B. W. Isom, Sec'y.

¹(2) Extra Dividend of 2½%.—This company, Spartansburg, S. C., April 24, 1917, declared an extra dividend of 2½%, payable May 1 on the common stock of \$310,000.

BEAVER CONSOLIDATED MINES, LTD.

¹(1) Development.—It was announced Jan. 31, 1917, that in the 1,600-ft. level at Cobalt, Ont., a vein showing a width of four inches of high-grade ore had been pierced on that date.

—Apr.

¹(1) Report, Year Ended Feb. 28, 1917, showed that although the production of silver decreased from 746,310 ounces in 1915 to 556,964 ounces in 1916, the profits were increased from \$128,929.67 in 1915 to \$236,582.16 in 1916. This gain was due to the higher price obtained for the white metal.

¹(2) Directors Tell of Ore Discovery.—In issuing the report of this company for the year ended Feb. 28, 1917, the directors made the following statement about the discovery of ore:

"The past year has brought most interesting changes to your mine. A very important discovery has been made—the discovery of high-grade ore at the great depth of 1,600 feet. We might mention that this is the lowest depth at which values have been found in the Cobalt camp."

"A year ago the main shaft had reached a depth of 1,400 feet. During the year the shaft was continued to the

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

lower contact, the station cut at the 1,800-foot level, and cross-cutting both east and west of the shaft uncovered a number of veins. Drifting on the vein west of the shaft brought us into silver veins.

"This vein is from six to eight inches wide in silver and on both sides of the vein for a distance of about four feet the wall rock is heavily impregnated with leaf silver.

"(3) Report, Year Ended Feb. 28, 1917, according to the "Financial Times," Montreal, Que., showed a total production of 568,964 ounces of silver, a new low record for many years, comparing with 746,310 ounces in 1915-16; 900,000 in 1914-15; 762,698 in 1913-14; 689,921 in 1912-13, and 750,950 in 1911-12. As a result of the high price of silver, gross earnings showed an increase as compared with the previous year amounting to \$499,090, against \$351,124 in 1915-16. Net profits after deducting war taxes and operating and administrative charges were \$236,582, which compared with \$128,929 a year ago; \$234,768 two years previously; \$206,718 three years previously; \$188,332 four years previously, and \$223,087 five years previously.

It will be noted that the profits were the second highest for the period covered. They work out at the rate of 11% on the outstanding capitalization, as against 6% a year previously. Dividends amounted to 3% against 6% the previous year.

The surplus at credit of profit and loss account is now \$639,821, as against \$176,425 previous year.

Liquid assets have increased from \$442,555 to \$607,074 during the year, while current liabilities are only \$22,621, against \$27,071 a year previously. The surplus at credit of profit and loss account is now equal to practically 32 cents for each of the 2,000,000 shares.

BECKER MILLING MACHINE CO.

"(1) Initial Dividend on Preferred.—Announced Feb. 7, 1917, that this company had declared an initial dividend of 1% on the pfd. stock, payable March 1 to stock of record Feb. 20. The company was incorporated in December, 1916.

BECKERS (W.) ANILINE & CHEMICAL WORKS, BROOKLYN, N. Y.

"(1) Acquisition.—Announcement was made on April 5, 1917, that this company had for a consideration of \$2,250,000 acquired the assets of the Standard Aniline Products, Inc., of Manhattan, with plants at Wappinger Falls and Newburgh, N. Y.

"(2) Merger Reported.—See Schoellkopf Aniline & Chemical Works, Inc.—Item No. 1.

"(3) Merger Plans.—See National Aniline & Chemical Co., Inc.—Item No. 1.

"(4) Operation Plan Under Merger.—See National Aniline & Chemical Co.—Item No. 3.

BEDFORD CORDAGE CO.

"(1) Officers.—It was announced March 1, 1917, that at the annual meeting of this company Francis A. Bryant was elected Pres. W. Wallace Totten was chosen Sec'y. Other officers were elected as follows: Treas., Cortes W. Cavanaugh; Clerk, Charles S. Kelley, Jr.; Directors, Francis A. Bryant, Cortes W. Cavanaugh, W. Wallace Totten, John Duff and Charles S. Kelley.

BEER, SONDHEIMER & CO., INC.

"(1) Incorporated Feb. 23, 1917, in New York, with a capital of \$1,250,000, for the purpose of quarrying, mining and dealing in zinc, copper, lead, iron, nickel, gold, silver, gas, oil, coal and timber. The company is a consolidation of Beer, Sondheimer & Co., Inc., and the Pendennis Metals Corp.

BEE SPRING LAND & MINING CO. OF KENTUCKY.

"(1) Merger Completed.—See Kentucky Rock Asphalt Co.—Item No. 1.

BELDING-PAUL-CORTICELLI, LTD.

"(1) Deferred Dividends.—Announced Jan. 8, 1917, that directors of this company had declared a dividend of 3% on account of accumulated dividends on the pfd. stock, amounting to 24%.

"(2) Earnings in 1916 Set New Record.—On Jan. 9, 1917, the Montreal "Gazette" said that when the final figures for the year ended Nov. 30 are complete this company will be able to show a surplus equal to about 10% earned on its common stock, after allowing for a full year's pfd. dividend.

This would be by far the best showing the company has yet made, and, in conjunction with an improved financial position, explains the action of the board of directors in declaring a dividend of 3% on account of dividend arrears on the company's pfd. shares. These arrears amounted on Nov. 30 to 24%, or \$211,314.

A 10% surplus on the common, after pfd. dividend, would mean net profits after charges of about \$135,000, or in excess of 15% on the pfd. stock alone, against 7.1% the previous year and 4.9% in 1914.

—Feb.

"(1) Report, Year Ended Nov. 30, 1916, it was announced Feb. 8, 1917, show gross profits of \$225,126, against \$120,474 in 1915. After providing for interest, sinking fund, depreciation, profits, tax and bond discount, the company showed net earnings of \$135,984, against \$18,128 the previous year.

Net as shown, after allowing for a full year's dividend on the pfd. stock, would represent slightly better than 10% on the company's common stock.

Current liabilities were reduced from \$448,955 to \$352,822, while current assets were increased from \$1,015,284 to \$1,054,740; the surplus representing working capital rose to \$701,918, against \$568,329 the previous year, and \$500,876 at the end of 1914.

The general improvement in earnings and position explains the decision of the directors since the close of the company's year to pay off 3% on account of dividend arrears amounting to 24%, and gives reasonable hope for further payments through the current year.

"(2) New Director.—Announced Feb. 8, 1917, that at the annual meeting of this company the retiring directors were elected, with the addition of D. R. Kennedy, Sec'y, who succeeded F. Paul, deceased.

—Apr.

"(1) Extra Dividend on Account of Back Dividends.—This company April 18, 1917, declared a dividend of 1% on account of back dividends, in addition to the regular quarterly dividend of 1% on the pfd. stock, payable May 15 to stock of record May 1.

BELL AUTOMOBILE CORP.

"(1) Incorporated on April 13, 1917, in New York, with a capital of \$500,000, to deal in automobiles, tools and act as mechanical and electrical engineers. Incorporators: J. Bell, P. J. M. Sullivan and T. Tilleston, 19 Liberty St., New York.

↑Increase. ↓Decrease.

—Apr.

"(1) Rate Reduction Ordered.—An order issued on April 5, 1917, by the Public Service Commission directed this company to reduce its charges in the State a million dollars annually. The commission says the income from all the lines in the State rather than the income from any particular community must be made the basis of the charges. The company is also directed to install measured service instead of unlimited service in Philadelphia and Pittsburgh. The reduction in Philadelphia will total approximately \$450,000 a year and in Pittsburgh \$300,000 a year.

BELLUM CO. (THE), DOVER, DEL.

"(1) Incorporated in March, 1917, in Delaware, with a capital of \$1,500,000, to trade in coffees, teas, spices, baking powder, etc.

BELMONT CASKET MANUFACTURING CO., BELLAIRE, O.

**BELUAN COAL CO.,
SMITHFIELD, O.**

* (1) Capital Increased.—On Jan. 5, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$150,000 to \$300,000.

BELVARD OIL & GAS CO.

* (1) Merger.—See Southern West Virginia Oil & Gas Co.—Item No. 1.

**BENEDICT COAL CORP.,
ALEXANDRIA, VA.**

* (1) Incorporated on Feb. 15, 1917, in Virginia, with a maximum capital of \$300,000; minimum, \$50,000; par value, \$100. Chas. H. Sehnider, Pres., New York City; Paul Dulaney, Sec'y, Washington, D. C.

BENNETT SALT CO., LTD.

* (1) New Company Organized.—It was stated March 14, 1917, that extensive salt deposits found at Anse La Butte, within five miles of Lafayette, La., would be developed by this company, New Orleans, which had been organized with a capital of \$350,000. Drills have passed through 3,438 feet of pure rock salt, and are still in salt. An estimate of the deposit is over 500,000,000 tons.

Located on the Southern Pacific R. R. and with water transportation facilities also, this deposit is well located.

The Benners Salt Co.'s officers are: Harry A. Benners, New Orleans, Pres.; Gabe S. Wegener, Chicago, Sec'y, and James L. Nelson, St. Louis, Treas.

BENNETT, LTD.

* (1) Incorporated on Jan. 18, 1917, in Canada, with a capital of \$300,000, divided into 3,000 shares of \$100 each, to manufacture and deal in fibre and fibrous material, hides, leather, etc. Incorporators: Richard Tuson Heneker, Henry Noel Chauvin, Harold Earle Walker, John Noel Beauchamp and Hugh Wylie. Chief place of business, Village of Chamby Canton, Que.

BENNETT MINING CO.

BERIZZI BROS CO., NEW YORK.

* (1) Capital Increased.—On Jan. 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$400,000.

BERKEY & GAY FURNITURE CO.

* (1) Stock Issue Authorized.—It was announced Feb. 10, 1917, that at the annual meeting of this company, Grand Rapids, Mich., an issue of \$200,000 pfd. stock was authorized. When the Oriel Cabinet Company's business was ac-

quired by the Berkey & Gay Co. the capital stock was made \$1,000,000, of which \$900,000 was paid in. It is planned to devote the pfd. stock issue to the retirement of \$100,000 worth of the common stock in addition to reducing the outstanding indebtedness, the capital stock to be \$900,000 common and \$200,000 pfd.

BERKSHIRE HILLS PAPER CO.

* (1) To Enlarge Plant.—At the annual meeting of the stockholders of this company Feb. 9, 1917, it was announced that the officers and directors at a previous meeting had voted to double the capacity of the plant by adding a second unit. Plans have been adopted for the work.

**BERLINGER, STRAUSS &
MEYER, INC.**

* (1) Incorporated on Feb. 27, 1917, in New York, with a capital of 2,000 shares, \$100 each; 2,000 shares no par value, to carry on business with \$210,000, in neckwear. Incorporators: A. Beekman, I. H. Meyer and B. M. Strauss, 30 West 23d Street, New York.

**BERNERS MINING CO.,
TACOMA, WASH.**

* (1) Incorporated on April 3, 1917, in Washington, with a capital of \$500,000. Incorporators: Horace H. Smith and Geo. A. Elmer.

BERRY & KELLER OIL CO.

* (1) New Well.—It was announced Jan. 27, 1917, that this company had brought in a new well, No. 17, on its lease in the north end of the McKittrick field, with a production of 70 barrels a day. The company has spudded in well No. 18 and is making good progress with the drilling.

**BERWIND WHITE COAL MINING
CO.**

* (1) Indicted by Federal Grand Jury.—On April 9, 1917, the Federal Grand Jury returned indictments against another combination of coal companies under the Sherman anti-trust law charging conspiracy in putting up the price of coal unduly. Among those indicted are the Berwind White Coal Mining Co., the Chesapeake & Ohio Agency Co., the West Virginia Pocahontas Coal Sales Corp., the New River Coal Co., the Pocahontas Fuel Co., William C. Atwater & Co., Inc., John E. Berwind and 32 other coal companies and individuals.

The indictment charges a combination among suppliers of smokeless bunker coal at Hampton Roads supplying 80% of coal for ocean-going vessels coaling at ports located there. Further, that upwards of 3,000 vessels coal there annually, taking from 80 to 4,000 tons each and the concerns indicted and the individuals who are officials of such concerns, combined during the past three years to eliminate competition among themselves by fixing a uniform minimum price from time to time and uniform terms in connection with the sale and contracting for sale of the coal in question. The indictment names 21 corporations and 19 individuals, 12 of the corporations and 10 of the individuals being included in a previous indictment concerning the so-called smokeless fuel combination.

BESSEMER LIMESTONE CO.

* (1) Merger Planned.—It was stated Feb. 23, 1917, that this company and the Metropolitan Brick Co., the former of Youngstown and the latter of Canton, Ohio, would consolidate. The former company is capitalized at \$1,000,000 and has large quarries at Hillsville, Pa. It is said it will retain its limestone business, but the brick business will merge with the Canton concern, the latter being capitalized at \$750,000.

* (2) Sale.—See Metropolitan Paving Brick Co.—Item No. 1.

BESSEMER MOTOR TRUCK CO.

* (1) Incorporated on April 24, 1917, in Delaware, with a capital of \$2,000,000, to manufacture motor vehicles of all kinds. Incorporators: C. L. Rimlinger, M. V. Haywood, Wilmington, Del., and Clement M. Egner, Elkton, Md.

BETHLEHEM STEEL CO.

* (1) Note Offering.—On Feb. 19, 1917, the Guaranty Trust Co. and the Bankers Trust Co., New York, announced the offering at 98½ and interest, to yield about 5.75%, \$50,000,000 2-year 5% secured gold notes of this company, the principal operating company of the Bethlehem Steel Corp. The notes are dated Feb. 15, 1917, and due Feb. 15, 1919. The issue is subject to allotment.

The notes are in coupon form, in denominations of \$1,000, \$5,000 and \$10,000, interchangeable; registrable as to principal only. They are exempt from the Pennsylvania State tax of 4 mills, if held and owned by residents of Pennsylvania. The Guaranty Trust Co. of New York is trustee.

The collateral securing the notes consists of \$37,600,000 short-term British notes maturing before Feb. 15, 1919, and \$25,000,000 Bethlehem Steel bonds.

The issuance of \$50,000,000 2-year notes will bring the Bethlehem Steel Corp. debt up to over \$130,000,000. Present funded debt of the Bethlehem Steel Co. is \$60,790,000, and, including bonds of all its subsidiaries, the total debt of Bethlehem Steel Corp. is \$81,469,000. Total of \$130,000,000 debt will compare with about \$75,000,000 stock on the issuance of the new shares.

Bethlehem Steel recently issued \$31,942,000 of purchase money and improvement 5s in connection with the acquisition of the Pennsylvania-Maryland Steel Co. These are secured on property purchased, following about \$17,000,000 outstanding bonds. Of the \$80,000,000 bonds authorized under this mortgage, \$16,949,000 are reserved for refunding, so that the mortgage is practically closed.

Under Bethlehem Steel's first lien and refunding mortgage only about \$25,000,000 more bonds can be issued for improvements.

* (2) Subscription Books Closed.—At noon on Feb. 23, 1917, the Guaranty Trust Co. of New York and Bankers Trust Co., managers of syndicate which had been offering for sale Bethlehem Steel Co. two-year 5% notes, announced that subscription books had been closed and that the entire \$50,000,000 of notes offered had been subscribed for.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

• BETHLEHEM STEEL CORP.

¹(1) Dividends for 1917, Estimated.—On Jan. 3, 1917, the "Wall Street Journal" said that although this company's stockholders are still arguing for a larger division of profit and for a division of certain certificates so that they can be handled better in the share markets and as collateral, it might just as well be assumed that Mr. Schwab will have his way.

Official opinion, however, in Bethlehem Steel circles is that in 1917 stockholders will get at least \$60 per share, or 10% upon the earnings being withheld from the stockholders. It is probable that the present quarterly payment of \$7.50 per share will be doubled.

From the years 1915, 1916 and 1917 Bethlehem Steel should earn at least \$600 per share. In 1915 it earned \$110 per share; in 1916 it cannot show less than \$300 per share, and in 1917 it should not earn less than \$200 per share from orders now on the books of the concern.

For 1916 everything possible will be charged off. In December earnings of Bethlehem Steel were figured by the officials at higher than any figures that have ever yet been mentioned, above \$70,000,000. All construction on ordnance work must be charged out; all taxes and war taxes and all possible depreciation, so that it is yet too early to say whether the net earnings for the common stock will be figured down to nearly \$55,000,000 or below \$50,000,000, but the net earnings cannot be figured below \$300 per share on the common stock.

Wages and materials, including coke, have been advancing and expiration of steamship charters caused the company to lose some of its advantages in its Cuban ores and forced the buying of Lake Superior ores.

Bethlehem has \$50,000,000 of foreign war orders on its books, \$20,000,000 of orders from the United States Government and also \$125,000,000 of strictly commercial business, a total of nearly \$200,000,000 of orders for 1917.

The company has sold its entire capacity for shell steel, 200,000 tons, for the year 1917, and for the last of it received 5½ cents a pound, or \$110 a ton. But the average price should not be figured above \$100 a ton.

If coke and wages were on the former basis, there would be nearly \$15,000,000, or \$100 a share, for Bethlehem Steel in this order alone.

¹(2) Special Meeting, Jan. 16.—It was announced Jan. 4, 1917, that a special meeting of this company had been called for Jan. 16. It is understood that the questions of increasing the dividend and declaring an extra cash dividend is under consideration.

¹(3) Projectile Bids.—See Hadfields, Ltd.—Item No. 1.

¹(4) Reduction to Government Offered.—It was announced Jan. 6, 1917, that this company had offered a 10% reduction in the price of steel to the United States Government, so that the Navy Department can build the four new battle cruisers authorized by Congress within the \$16,500,000 limit set for each vessel.

¹(5) Extension Plans.—It was announced at Baltimore Jan. 9, 1917, that plans of this company to make great extensions at Sparrows Point, including a wire mill and a tube and pipe mill, had been disclosed before the Maryland Public Service Commission during the hearing of the application of the Patapsco & Back River for an order authorizing the company to begin construction of the road and to issue \$500,000 of par value capital stock.

A total of six and four-tenths miles will constitute the length of the road, which will be in the form of a loop and will cost approximately \$15,000 a mile for construction. A heavy roadbed has been planned with 100-pound rails. Thirty locomotives alone will be needed to operate the road.

While the new line was projected largely to facilitate the Bethlehem's local plants, its service will also be open for other traffic.

¹(6) After-War Policy Outlined.—On Jan. 13, 1917, it was stated that Pres. E. G. Grace had outlined the company's preparedness policy for peace in an address before the Terrapin Club of Philadelphia. He said in part: "We are now working on a construction program involving an outlay in the next few years of more than \$100,000,000—probably the largest construction program ever undertaken by a single industrial corporation."

"When that program is completed, instead of Bethlehem being primarily and largely an ordnance company, as it is to-day, our twenty-five component parts will consist of twenty parts commercial manufacture, four parts shipbuilding and only one part ordnance making."

"In 1915 we employed 23,000 men; now we have some 70,000 men on our payrolls."

"In 1915 our total payroll was \$22,500,000; in 1917 it is at the rate of \$72,000,000 a year, or \$6,000,000 a month."

"The average earnings of each wage earner were a little over \$300 in 1915, whereas our figures for 1916 show average earnings of nearly \$1,200 per man, an increase of more than 30%."

"When the war is over, and this country is confronted with world competition, what is the effect on this industrial situation to be? What preparations are we making to protect our markets, let alone to capture world markets?"

"If Europe is to be permitted to dump her surplus products on our markets after the war, without protection being extended to our own people, the results will be disastrous."

These statements followed a discussion by Mr. Grace of the difficulties which Bethlehem was experiencing in manufacturing munitions for the United States Government. He spoke of the armor plate contracts and the fact that statesmen at Washington declared "that we have been 'robbing' the Government, although the figures show that the Navy had, for 20 years past, paid less for armor than the navy of any of the other great powers."

Referring to the recent bid for 16-inch shells, Mr. Grace said: "I am unable to state the basis upon which the English bid was made. It should be remembered, however, that this bid was for a specific shell, samples of which are being sent over for test—a test not yet made."

Mr. Grace stated that the attitude of the Bethlehem Steel Corp. toward the United States Government had been inspired by a sense of patriotism.

¹(7) Retrenchment.—A Baltimore dispatch Jan. 15, 1917, stated that Charles M. Schwab had made a change in the plans for the \$50,000,000 improvement programme of the Penn-Mary Steel Co. at Sparrows Point. It was learned that there would be delay in practically 25% of the original programme, but that the entire plan as outlined for Baltimore by Mr. Schwab would be eventually carried out.

A contract involving several hundred thousand dollars for the erecting of the superstructure of the smithing works at Sparrows Point has been cancelled, along with the announcement to the contractor that the Bethlehem Co. would retrench for the present.

¹(8) Programme Not Changed.—On Jan. 16, 1917, it was stated that cancellation by this company of contracts for certain parts of the work on its extension programme at Sparrows Point did not mean any change in the programme. Pres. E. G. Grace said that the Bethlehem's entire plan, involving an outlay of \$100,000,000, would be carried through eventually, but that it was deemed advisable to postpone part of the work for the present so as to permit a more harmonious development.

Mr. Grace refused to comment on the awarding of the United States Navy shells to Hadfields, Ltd., of England.

¹(9) Bonds.—On Jan. 18, 1917, it was stated that the funded debt of this company is \$80,790,000. Including bonds of all its subsidiaries, the total debt of

the Bethlehem Steel Corp. is \$81,469,000. Sale of over \$50,000,000 new bonds would make the corporation's debt over \$130,000,000, or \$100,000,000 more than the present authorized amount of stock.

In connection with the acquisition of the Penn-Mary Steel Co., Bethlehem Steel recently issued \$31,942,000 of purchase money and improvement 5s. These are secured on the property purchased following about \$17,000,000 of outstanding bonds. Of the \$80,000,000 bonds authorized under this mortgage \$16,949,000 are reserved for refunding, thus practically closing the mortgage.

Under Bethlehem Steel's first lien and refunding mortgage only about \$25,000,000 more bonds can be issued for improvements. To do the contemplated new financing, therefore, a new issue likely will be created.

¹(10) Stock Increase Plan.—On Jan. 21, 1917, it was stated that the plan of this company, as prepared for the meeting of the directors at 2:30 p. m. on Jan. 22, would increase the authorized issue of common stock to \$80,000,000, of which 200 shares would be allotted to shareholders as a bonus and 100 shares at par. The plan would bring the stock down to a figure within the reach of all and make it more desirable collateral for lenders of money.

There would be outstanding \$59,632,000 common stock, as the amount of common stock outstanding totals \$14,908,000. On the new common capitalization the annual dividend obligation at \$10 a share would amount to \$5,963,200. On the stock the company is paying \$30 a share annually, or \$4,472,400. Therefore, the company would increase its common dividend obligation by \$1,490,800 annually.

On a basis of a \$30 dividend the yield to the owner of stock at \$430 a share is slightly less than 7%. By paying in an additional \$10,000 the shareholder would receive 300 shares of new stock. The market valuation, plus the \$10,000, would give the shareholder 400 shares of stock, which would cost him, providing he paid \$430 a share for the old stock, \$53,000.

A \$10 annual dividend on the new stock would be equivalent to \$40 a share on the old stock, so that an investment of \$53,000 would yield approximately 7.48%.

To yield 7%, the same as shareholders are receiving on the basis of \$430 a share, the new stock would have to sell around \$140 a share.

¹(11) Stock Dividend.—On Jan. 23, 1917, following a meeting of the Board of Directors, it was announced that this company had declared a stock dividend of 200%, and at the same time authorized the sale of \$15,000,000 new stock at par. When the action of the directors is formally ratified at a special meeting for the purpose on Feb. 14 the corporation will have a total outstanding issue of common stock amounting to \$80,000,000, upon which dividends of 10% a year are to be paid. The present common stock capital is \$15,000,000. Dividends of 30% were paid upon the issue in 1916.

¹(12) Statement by Board.—On Jan. 23, 1917, the Board of Directors of this company authorized a statement in which it said:

"As appears from the Comptroller's report of earnings, given out to-day, the earnings of the corporation for the past calendar year are \$61,717,329. After deducting the interest charges of \$3,772,575, and charging off \$14,350,785 to depreciation and depletion the aggregate net addition to surplus is \$43,593,968, making the total surplus as of Dec. 31, 1916, \$89,370,198. The orders on hand at the beginning of the present year aggregate approximately \$193,500,000, exceeding those of a year ago by about \$18,000,000."

"The policy calls for a larger capital and increased capital resources. Having this in view, the board has adopted the following plan:

"To increase the common capital stock by \$45,000,000."

JANUARY 1 TO APRIL 30, 1917

"To convert a portion of the accumulated profits into permanent capital, by distributing \$30,000,000, par value, of the new common stock pro rata among the common stockholders as a stock dividend.

"To offer to the common stockholders the privilege of pro rata subscription to the remaining \$15,000,000, par value, of this common stock, at par.

"The new common stock will be the same in all respects as the existing common stock, except that it will not have voting powers.

"It will be seen that upon the completion of the proposed issue of \$45,000,000 of new stock the corporation's assets will be increased by \$15,000,000 of cash, and it will have outstanding four shares of common stock for every share of common stock now outstanding.

"The board declared a quarterly dividend of 10% upon the existing common stock of \$15,000,000, payable April 2, 1917, to stockholders of record at 3 P. M. on March 15, 1917, and adopted a resolution declaring that, in case of the increase of the common capital stock to \$60,000,000 by the issue of \$45,000,000 of additional common stock as proposed, the regular dividends upon the \$60,000,000 of common stock for the next succeeding three quarterly periods of the year will be at the rate of 10% per annum. The board deems it wise to defer until the end of the year its decision as to the advisability of an extra cash dividend from the profits of war orders.

"A special meeting of the stockholders to authorize the necessary amendment of the corporation's charter to effect the proposed increase of the common capital stock from \$15,000,000 to \$60,000,000 is being called for Feb. 14, 1917. Upon the increase becoming effective, the common stock dividend of 200% will be paid, and the remaining \$15,000,000 of new common stock will be offered to the stockholders for subscription at par. Subscription warrants, covering the right to subscribe at par for the new common stock, will then be mailed to the common stockholders.

"While the earnings and the proceeds of the \$15,000,000 of new common stock about to be offered to the stockholders are deemed sufficient for all capital requirements, the board, desiring to make adequate provision for the future without calling too heavily upon the stockholders, has determined that it would be advisable to provide in due course for the creation of a new first and refunding mortgage which shall authorize, under suitable restrictions, the issue of bonds as may be necessary from time to time for refunding operations and for extensions and additions and other capital purposes, in so far as provision therefor shall not be made from earnings or by the sale of stock. Authority for the creation of this mortgage may be asked of the stockholders at the annual meeting in April."

It appears from the preliminary statement of Bethlehem Steel that the surplus applicable to the common stock was approximately \$329.

(13) Underwriting Syndicate.—On Jan. 23, 1917, C. M. Schwab, Chairman of the Board of Directors of this company, announced that the banking firm of J. & W. Seligman & Co. were forming a syndicate to underwrite the purchase of the \$15,000,000 of new Class B common stock.

The commission for the syndicate in offering the stock to shareholders at par is 2%. In addition, there is a commission of 2% on all stock not subscribed for and a commission of 1% to the bankers for organizing the syndicate. In the event that stockholders do not ratify the plan at the special meeting the syndicate will receive a commission of 1% and the bankers a commission of 1/2 of 1%.

(14) C. M. Schwab Retains Control.—When asked, Jan. 23, 1917, whether the reason for the company's new stock not having any voting power was the

desire to retain control in the hands in which it now lies, Chairman C. M. Schwab said: "Control is in my hands and those of my associates."

Mr. Schwab was asked whether the pfd. stock would participate in any way, and replied that that was impossible.

(15) Book Value of Stock.—On Jan. 24, 1917, it was stated that on the basis of the Dec. 31, 1916, surplus of about \$69,000,000, the present book value of each share of Bethlehem common stock is a little over \$50.

By the sale at par of one share of new stock for each existing share of common stock, there will be added in cash to this book value \$100, making a total of \$600.

As there will be four shares of new stock for every share of present stock, the book value of each share of new stock will be one-quarter of the above amount, or about \$165.

(16) Working Capital.—On Jan. 24, 1917, Charles M. Schwab, chairman of this company, said that with the \$15,000,000 received from the sale of \$15,000,000 additional stock the company will have a working capital of approximately \$100,000,000; also that action to be taken in April on a new bond authorization will be formal, as no additional funds are needed at this time. Such a bond issue will be used largely for refunding purposes and construction if additional money for new buildings and acquisition is required.

The new common stock authorized will amount to \$60,000,000 and pfd. stock \$15,000,000, a total of \$75,000,000, or \$25,000,000 less than the working capital.

The bonds now outstanding will approximate \$81,000,000, which, added to the capital stock of \$75,000,000, gives a total of \$156,000,000. The working capital is equal to nearly 65% of the total capitalization, in bonds and stock, of Bethlehem.

The Bethlehem Steel Corp. in 1916 reported a surplus available for the common stock of over \$288 a share, which is equal to \$71.50 a share on the new common stock. As the company will pay only \$10 a share on its new common stock, it is evident that profits during the year were equal to more than seven times the dividend called for by the new common stock.

Should Bethlehem Steel show a surplus of, say \$30,000,000, available for the common stock in 1917, that amount would be equal to five times the regular common dividend of \$10 annually on the new stock.

The above figures give a good idea of the strong financial position of the Bethlehem Steel Corp. and its ability to maintain a dividend of \$10, or \$6,000,000 annually on the new stock.

(17) Bond Notice.—It was announced Jan. 26, 1917, that this company had issued a statement that no sale of bonds in the early future is contemplated. The company is simply taking advantage of the assemblage of stockholders at the forthcoming annual meeting in April to obtain the necessary authority for a mortgage in order that bonds may be available for issue when the time comes.

(18) Rights Admitted to Dealings.—Announced Jan. 29, 1917, that the New York Stock Exchange had admitted to dealings this company's rights.

(19) Tangible Assets for Common.—On Jan. 29, 1917, it was stated that when this company has its capital readjusted there will be tangible assets for the new common of between \$140 and \$145 per share. This will be increased by \$40 per share during 1917, if current expectations are realized, so that by the year's end the company should have quick assets and property values for its common of between \$180 and \$185 per share.

Bethlehem Steel has been making extraordinary charges against its munitions plants. At the close of 1916 it is understood that the entire plant investment in munitions works had been

written off the books with the exception of one department.

Bankers who are friendly to the new shares point out that the nearly \$15,000,000 charged against 1916 earnings for depreciation was equal to 60% of the amount charged off by the Steel Corp. for a similar purpose in any single year in its history.

(20) Admitted to List.—It was announced Jan. 30, 1917, that the New York Stock Exchange had admitted to the list this company's class B common stock, when issued.

—Feb.

(1) Opposition to Capital Increase.—Opposition on the part of stockholders to the plans for increasing the capital stock of this company was made public on Feb. 12, when Vice-Chancellor Lane filed in the New Jersey Court of Chancery at Trenton an order, granted Feb. 10, requiring the company to show cause in Newark Feb. 17 why an injunction against the increase should not be issued. Announcement was made by the company of a request, on the part of counsel Feb. 13, for the dismissal of a temporary restraining order to prevent the voting of the increase by the stockholders at their meeting Feb. 14.

The complaint was made by the General Investment Co., a Maine corporation, which owns 100 shares of the common stock.

In the application for the order the corporation was named, as well as all the members of the Board of Directors and the brokerage firm of J. & W. Seligman & Co. of Manhattan, which was to underwrite the new project of the steel corporation.

The complaint of the General Investment Co. sets forth that Bethlehem has a surplus of \$69,370,198 due from increased profits on war orders. It is the intention of the corporation to distribute \$30,000,000 in stock dividends and \$15,000,000 in a new class of common stock to be offered for sale to stockholders at \$100 a share, but without voting power.

The complaint charges that the \$15,000,000 stock issue is to be marketed by J. & W. Seligman & Co., for which, it is alleged, they are to get a commission of \$450,000 if the plan goes through and \$225,000 if it fails.

The General Investment Co. contends that the commissions are too large, that there is no provision in law for the authorization of common stock without voting power, and that the issuance of the new stock is intended to keep the present stockholders of the corporation in control.

The complaint also charges that the directors of Bethlehem Steel are members of the underwriting syndicate and personally interested in the profits to be made.

A financial statement of the company attached to the complaint says that at the beginning of 1917 the orders on hand amounted to \$193,500,000, of which \$117,500,000 was domestic business and the remainder for export.

Export orders amounted to \$17,500,000 worth of steel bars and \$58,500,000 worth of guns and other munitions.

(2) Permission for Meeting Granted.—In the Chancery Court of Newark, N. J., Feb. 13, 1917, Vice-Chancellor Lane granted permission to stockholders of this company to hold a meeting Feb. 14 to vote on the increase of capitalization of \$30,000,000 to \$75,000,000.

Vice-Chancellor Lane stated he would also permit holders to execute all papers necessary to the plan, said papers to be held by the officers of Bethlehem Steel Corp. until further hearing on Feb. 17 on the order to show cause why the recapitalization plans should not be allowed.

(3) Capital Increase Voted by Stockholders.—It was announced Feb. 14, 1917, that stockholders of this company at a special meeting authorized amendment of the by-laws to permit increas-

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

ing the capitalization from \$30,000,000 to \$75,000,000. Out of 149,080 shares of pfd. stock outstanding, 128,370 were voted for the resolution and 450 against. Out of 148,620 shares of common stock outstanding, 112,156 were voted for and 125 against amendment.

On a motion to elect Chairman Charles M. Schwab acting Chairman of the meeting, owing to the absence of Pres. Grace, C. H. Venner objected. The by-laws state that in the absence of the President the Vice-Pres. will take the chair. On a motion by Mr. Schwab, Vice-Pres. Johnson was then elected chairman of the meeting.

At the calling of the roll Venner wished to know if the stock books of the company were at hand, and learning that such was not the case stated that under the corporate laws of New Jersey, the meeting could not be held unless the stock books were on hand, and moved for an adjournment until Saturday at noon. This motion was overruled and stock books sent for.

On the production of the stock list from the corporate office the meeting was resumed. Venner objected to the absence of the stock ledger in the New York office, which was sent for.

There were present at the meeting in person or proxy 127,740 shares of preferred and 113,661 shares of common stock.

Protest was made against the recapitalization plan by Venner, holder of 100 shares of common, and also by representatives of M. B. Schera, 25 shares, and the Paterson Safe Deposit & Trust Co., 450 shares.

The meeting was adjourned until noon Feb. 17.

(4) C. M. Schwab Guaranteed to Retain Control.—On Feb. 14, 1917, C. M. Schwab was quoted as saying at the special meeting of stockholders on that date:

"There is one thing we have never made public, which I think should be made public at this time, and that is, that the reason we have made such a large amount of money in the past few years was because of the contracts I made while in Europe, and these contracts could not have been made if I had not guaranteed the control would not pass from my hands."

Mr. Schwab added: "Business of the Bethlehem Steel Corp. is very large and more capital is needed, therefore a bond issue in the future will be called upon. I called together a meeting of the large stockholders to arrange for some plan, and the present plan was urged upon me."

Personally, he said, he did not care whether the recapitalization plan went through or not. He said by large stockholders he meant Harriman, 12,000 shares, Untermeyer, 8,000 shares, etc. He continued: "The best financial advice has approved of this plan and thought it was all right."

(5) Stock Exchange Ruling.—Announced Feb. 16, 1917, that the New York Stock Exchange had ruled that this company's common stock would sell ex-rights or ex-stock dividend until further notice.

(6) Acquisition.—It was announced at Pittsburgh Feb. 16, 1917, that the Pittsburgh By-Products Coke Co. had sold to the Bethlehem Steel Corp. the Lehigh Coke Co. which the By-Products Co. purchased only a few days previously from the Deutsche Bank of Berlin, Germany. The Pittsburgh By-Products Coke Co. is said to have paid \$7,000,000 for the property from the German interests which for years had owned and controlled it.

(7) Limestone Purchase.—It was announced Feb. 16, 1917, that the limestone quarries of the New Jersey Lime Co., at McAfee and Hamburg, had been purchased by this company at a chancery sale for \$72,838. The purchase price covers two trust mortgages issued by the lime company.

There is one issue of bonds amounting to approximately \$80,000, of which the Fidelity Trust Co. of Newark is trustee. These were not satisfied.

The sale was conducted on complaint of the Commonwealth Title Insurance & Trust Co., trustee.

The company, organized in 1901, had been idle three years, owing to lack of capital.

(8) Capital Increase Approved.—Announcement was made Feb. 17, 1917, that Vice-Chancellor Lane, in the Chancery Court at Newark, N. J., had dismissed the application of the General Investment Co., of which H. C. Venner is Pres., praying for a temporary injunction to restrain this company from proceeding with its plan to increase the capital stock from \$30,000,000 to \$75,000,000. This involves the payment of a 200% stock dividend. The court ruled against C. H. Venner on all points.

Vice-Chancellor Lane decided that it is within the rights of the corporation to issue common stock known as Class B stock without a voting privilege; that the corporation also has the right of control in its present management, there being no question of bad faith involved.

The Vice-Chancellor also stated, as to the question of directors participating in the syndicate agreement, that the complainant purchased his stock immediately after announcement was made of the corporation's plan, but that application for an injunction was not filed until Feb. 8, immediately prior to the stockholders' meeting.

(9) Notes Sold to Syndicate.—It was announced Feb. 18, 1917, that in order to complete its Russian munitions contracts, about which difficulties and delays had arisen, this company had sold to a syndicate headed by the Guaranty Trust Co. and the Bankers Trust Co., New York, \$50,000,000 two-year notes, backed by \$60,000,000 collateral, of which \$40,000,000 are British short-term notes and \$20,000,000 Bethlehem Steel 5% bonds.

An official statement said that no question of quality had been involved, but that the matters at issue had to do solely with deliveries, which were complicated by changes in specifications while the work was in progress.

A greater part of the loan will be self-liquidating as the British Treasury notes mature prior to the maturity of the company's notes.

Mr. Schwab, in a personal statement, said that the settlement of this controversy disposed of the only matter in connection with Bethlehem Steel's business which was giving it any concern. From now on, he asserted, the Russian Government would get shells regularly, while Bethlehem would be protected by the settlement of specifications and a new schedule of deliveries and payments.

The settlement, Mr. Schwab said, would not affect the 1916 profits, as the profits of the Russian contract had not been included. The notes, he said, did not constitute any part of Bethlehem's scheme for permanent financing.

Mr. Schwab added that the Bethlehem Co. had no hesitation in making this large investment in British short-term notes because he regarded them as as good as gold. The only question was one of conversion into cash, accomplished by the transaction with the trust companies.

(10) Note Issue.—See Bethlehem Steel Co.—Item No. 1.

(11) New Director and Vice-Pres.—It was announced Feb. 24, 1917, that Grayson M. P. Murphy, Vice-Pres. of the Guaranty Trust Co., New York, had been elected a director of this company to take the place of Wm. M. Barnum, resigned.

W. F. Hartman, Asst. Treas. of the Bethlehem Steel Co., has been elected a Vice-Pres. of the Bethlehem Steel Corp.

—Mar.

(1) Improvements.—It was announced March 1, 1917, that this company had completed plans for the rounding out of its structural steel department at a cost of \$1,000,000.

(2) Statement by Representative.—On March 3, 1917, the "Wall Street Journal" quoted a representative of this company as saying: "The Bethlehem Steel interests will not only subscribe to all the stock to which they are entitled by their holdings of the old capitalization, but will add to their holdings, as they have been heavy buyers of the 'rights.' There was no reason for the decline in the 'rights' and stock other than some shareholders saw a quick profit and took it."

(3) Status.—On March 2, 1917, it was stated that there was no other explanation of a late weakness in Bethlehem Steel than the existence of rights which are always bear factors in a declining market, and the reported liquidation of a block of 4,000 shares. Steel men say that Schwab is still the wizard in the steel world and is building up Bethlehem faster than he built up the Carnegie Works and the United States Steel Corp.

Bethlehem's cash position is very strong. Twenty-one million dollars was recently received through the house of Morgan. From earnings in 1917, from new stock and the \$50,000,000 notes, Bethlehem should have \$100,000,000 of new money, not more than one-fourth of which can be expended in 1917 in new construction.

(4) Orders for 1917.—It was stated March 5, 1917, that this company would produce more steel in 1917 than in any previous year in its history. Orders on the books will keep Bethlehem's mills busy for the remainder of 1917.

Deliveries of steel will be made upon a much higher-priced basis than in 1916.

Foreign orders on the books of the Bethlehem Steel Corp. are not near as large as in 1916, most of the bookings being made up of commercial steel.

The wider profit on this commercial steel in 1917 is expected to more than equal the profit realized on war business in 1916. In connection with foreign orders the Russian shell contract involving \$50,000,000 will net Bethlehem Steel a profit of at least \$10,000,000, and the fulfillment of this order will liquidate Bethlehem's recent note issue of \$60,000,000.

The fact that Bethlehem's earnings in January and February were in excess of the average for 1916, or say between \$5,000,000 and \$8,000,000 a month, indicates profits of at least \$60,000,000 for the current year.

If the steel business continues prosperous, there is every reason to believe that the balance available for common dividends for the two years 1916-1917 will be equal to close to \$150 a share on that issue, or more than \$40 a share in excess of the price at which the "B" stock is selling.

In view of this, it would seem that the decline in Bethlehem Steel shares was not justified by any adverse change in condition. As a matter of fact, Bethlehem Steel's earning power is greater, and its production larger, than it was when the stock sold at \$700 a share.

(5) Extension Contract.—It was announced at Newton, N. J., March 7, 1917, that this company had awarded a contract for buildings to be erected at McAfee, N. J., at a cost of \$350,000. It also has arranged for a spur of the Lehigh & Hudson R. R., three-quarters of a mile long, to be run to the plant when completed.

(6) Rail Order.—See Pennsylvania R. R. Co.—Item No. 11.

(7) Move Against Stock Increase Denied.—It was announced Nov. 7, 1917, that permission to file a supplemental bill of complaint against this company had been denied Clarence H. Venner, Pres. of the General Investment Co., by Vice-Chancellor Lane in the Chancery

JANUARY 1 TO APRIL 30, 1917

Court in Newark, N. J. The purpose of the supplemental complaint was a new move to interfere with the recent action of the Bethlehem Corp. in increasing its capital from \$30,000,000 to \$75,000,000.

(8) Merger of Subsidiary Completed.—See American Iron & Steel Mfg. Co.—Item No. 1.

(9) Earning Rate.—It was stated March 15, 1917, that net earnings of this company are averaging between \$5,000,000 and \$6,000,000 per month. So far earnings have been above the average of 1916, when the balance available for dividends was equal to \$74 a share on the present stock. If \$74 a share is earned this year, it will mean \$148 a share for the two years, or \$33 more than the present actual market value of the "B" stock.

Interests identified with Bethlehem do not understand the wide margin between the "A" and "B" stocks. The "A" stock sold ex-dividend March 15 at \$132 a share, and the "B" stock \$113, a difference of \$17. There is no difference between the two classes of stock, except in voting power.

Beginning in June, both classes of stock will receive the same dividends, \$2.50 a share quarterly. There are bankers who say that the fact that the "A" stock gives Schwab and his friends control strengthens the position of the "B" stock.

(10) Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Total income.....	\$61,717,309	\$24,821,408
Net aft. chgs.....	43,593,968	17,762,812
Bal. after pfd. divs.....	42,550,408	16,719,252
Surp. after com. divs.....	38,091,808	16,719,252

After deducting expenditures for ordinary and extraordinary repairs, taxes, etc.

(11) Earnings on Stock.—It was stated March 17, 1917, that this company's 1916 balance after pfd. dividends of \$42,550,408 is equal to 286.30¢ on \$14,862,000 common stock, compared with 112.49¢ earned on the same stock in 1915.

(12) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$8,870,198, compared with \$6,273,390 Dec. 31, 1916.

(13) Statement by C. M. Schwab.—It was announced March 17, 1917, that Charles M. Schwab, of this company, in his annual remarks to stockholders, pointed out that the large increase in depreciation over that provided for in any past year, and in excess of that which will be necessary in future and normal times, had been made in order to write off during the life of the contracts machinery installed for war orders, so that the balance sheet of the corporation may be conservative, even if it shall be found impossible to utilize such machinery for other purposes.

Mr. Schwab said in part: "Since the last annual report Penn-Mary Steel Co., a subsidiary of Bethlehem Steel Co., has acquired the properties and assets of Pennsylvania Steel Co. (of Pennsylvania), Maryland Steel Co., and Pennsylvania Steel Co. (of New Jersey). While the titles to these properties were acquired by Penn-Mary Steel Co., active operations have been conducted by Bethlehem Steel Co. and their earnings during the part of the year in which they were operated by Bethlehem Steel Co. are included in figures given in the consolidated profit and loss account.

"Near the close of the year negotiations were concluded for the acquisition of properties of American Iron & Steel Manufacturing Co., of Lebanon and Reading, Pa., and properties of Lackawanna Iron & Steel Co., a small subsidiary of Lackawanna Steel Co., at Lebanon, Pa.

"Purchase price of American Iron & Steel Mfg. Co. was \$6,600,000, which was paid in bonds of Penn-Mary Steel Co., secured by a mortgage upon real estate and plants acquired and guaranteed by Bethlehem Steel Co. The acquisition of properties of American Iron & Steel Mfg. Co. adds to products of

your corporation railroad spikes and track bolts so that it now manufactures a complete line of accessories for railroad track work.

"The purchase of the Lebanon properties of Lackawanna Iron & Steel Co. is of less magnitude. These properties consist of two blast furnaces and by-product coke ovens.

"Since the close of the fiscal year, Bethlehem Steel Co. has purchased all the capital stock of Lehigh Coal Co., which operates a large by-product coke oven plant adjacent to the plant of the Bethlehem Steel Co., from which the latter company has derived its principal supply of coke. Contract of purchase contemplates the transfer of the properties to a new company organized for the purpose and payment of the purchase price principally in purchase money mortgage bonds of such new company.

"Probably the most important step taken since the last annual report has been the maturing of plans for the development of the financial structure of your corporation so that it might be more nearly commensurate with the size and importance of the physical properties which have resulted from the phenomenally rapid growth of the last few years.

"Expenditures for the introduction of economical methods in the properties recently acquired will yield liberal returns and some of the properties offer striking opportunities for development of new lines of business that promise exceptional profits. The past success of your corporation has been due to an important extent to the fact that it has in the past taken advantage of such opportunities for the introduction of economies and diversification of products.

"The continuance of such a policy (which is possible to its fullest extent only by the authorization of an increase in the funded debt limit), is essential to the growth and development of your corporation along the lines which its history has demonstrated to be wise. For this reason, while there exists no immediate necessity for financing capital expenditures, the consent of stockholders to a proposed mortgage or pledge of assets is to be asked for at the annual meeting April 3, 1917.

"The issue since the close of the fiscal year of \$50,000,000 two-year notes of Bethlehem Steel Co. constitutes no part of any programme for permanent financing, but was made to provide for extraordinary requirements of munition contracts including a large contract under which Bethlehem Steel Co. receives \$37,600,000 British notes which are pledged or are to be pledged as received to secure two-year notes.

"Your corporation enters 1917 with an even greater volume of business on its books than at the beginning of 1916, thus insuring full operations in all plants and departments throughout the coming year.

"The issue since the close of the fiscal year of class B common stock and the issue of two-year notes have furnished your corporation and its subsidiary companies with an exceptionally large cash balance, which your officers and directors consider a wise provision, in the face of present unsettled conditions in this country and in the world's finances."

(14) Bonus System.—It was stated March 17, 1917, that Chairman Charles M. Schwab, in the annual statement to stockholders of this company, took opportunity to describe at length the bonus system, which he credited as an important factor in Bethlehem's success. It is understood that E. G. Grace, Pres. of the corporation, received \$1,000,000 in bonuses in 1916.

"The terms of the system as applied to general officers," he said, "have always been fixed, with the approval of the Board of Directors, by Mr. Schwab, who has never participated therein. The consistent adherence to this principle is regarded by your directors as one of

the principal causes of the efficiency of your corporation's organization, and the enthusiasm and esprit de corps in every department which have rendered possible the remarkable achievements and growth of the last two years."

(15) Comment on 1916 Report.—On March 20, 1917, the "Wall Street Journal" said that from the viewpoint of earnings the annual report of this company was even more favorable than the extraordinary showing of \$286.30 a share for the common indicates.

The company's depreciation charges might be called excessive, amounting to \$14,350,786, equal to nearly \$100 a share on the old common stock.

In 1916 the depreciation charges of the United States Steel Corp. were only \$32,700,000, equal to 9.8% net earnings, compared with Bethlehem's ratio of depreciation to earnings of over 23%.

In addition to the \$14,350,786 charged against income for depreciation, the Bethlehem charged against operations a total of \$12,497,000 for extraordinary improvements, repairs, etc., equal to \$83.30 a share on the old common.

The total charges for replacement, depreciation, etc., were \$26,848,700, equal to \$178.70 a share on the old common stock. In the preceding year the total charges for the foregoing purposes were only \$13,483,000, equal to less than \$90 a share on the old common.

It is evident from the above that had not such liberality been shown in the matter of depreciation, the balance available for the common would have run close to \$350 a share on the old common.

The Bethlehem statement seems to justify the record price of \$700 a share reached in 1916. Current quarter's earnings are expected to show at least \$72 applicable for the old common. This would mean that since Jan. 1, 1915, a period of two years and three months, Bethlehem had earned for its old common \$468.48 a share, equal to \$117.12 a share on the new common stock.

In the balance sheet it is found that in 1916 there was deducted from property account \$46,947,728 for "reserve for depreciation, relining of furnaces, etc.," leaving net property account as \$151,983,860. This seemingly conservative property valuation and excess current asset are equal to par for the pfd. stock and all bonds outstanding and \$140 a share on the new common.

Earnings since Jan. 1, 1917, will give at least additional \$15 a share, making \$153. Bethlehem Steel, in fact, is adding at the rate of at least \$15 a share to the book value of its new common stock each quarter.

Bethlehem's appropriations from surplus for new construction in 1915 and 1916 amounted to \$60,000,000, equal to \$100 a share on the new common stock.

(16) Comment on Earning Power and Production.—On March 23, 1917, the "Boston News Bureau" had the following: "Bethlehem Steel Corp. will produce more steel this year than in any previous year in its history. Orders on the books at present will keep Bethlehem's mills busy for the remainder of 1917. Deliveries of steel will be made upon much higher priced basis than last year. Billets are now quoted at \$65 a ton, against \$35 a year ago, plates at \$5 per 100 pounds, compared with \$2.75 a year ago, beams \$3.25, compared with \$2.25 a year ago, and other finished material shows proportionate advances. Foreign orders on books of Bethlehem Steel Corp. are not near as large as last year, most of present bookings being made up of commercial steel. Wider profit on this commercial steel this year is expected to more than equal profit realized on war business in 1916. In connection with foreign orders, the Russian shell contract involving \$50,000,000 will net Bethlehem Steel a profit of at least \$10,000,000, and fulfillment of this order will liquidate Bethlehem's recent note issue of \$60,000,000.

"The fact that Bethlehem's earnings in January and February were in excess of the average for 1916, or say between

JANUARY 1 TO APRIL 30, 1917

\$5,000,000 and \$6,000,000 a month, indicates profits of at least \$60,000,000 for the current year. If the steel business continues prosperous, there is every reason to believe that balance available for common dividends for two years, 1916-1917, will be equal to close to \$150 a share on that issue, or more than \$40 a share in excess of price at which the "B" stock is now selling. In view of this it would seem that decline in Bethlehem Steel shares was not justified by any adverse change in condition. As a matter of fact Bethlehem Steel's earning power is greater and its production larger than it was when the stock sold at \$700 a share."

(17) Earnings, January and February, 1917.—For the two months the company showed net profits of approximately \$11,000,000, or at the rate of \$68,000,000 a year. This was at the rate of \$110 a share per year on the new stock.

(18) Earnings Comment.—Announcement was made on March 26, 1917, that earnings of this company were running above the average of last year, notwithstanding that the company is now working largely on domestic business. Bethlehem "B" common stock, selling at \$133.50 a share, with earnings at the rate of \$110 a share on the \$60,000,000 common, looks out of line.

Deducting the \$100 paid in, and adding the premium on the "A" stock, Bethlehem Steel "B" stock, at \$133.50 a share, is selling on a basis equal to \$43 a share for the old common stock, or \$257 below the high record of \$700 a share. Net earnings in January and February were at the rate of \$440 a share annually on the old common stock.

(19) To Build Ore Ships.—Announcement was made on March 27, 1917, that this company would build ten of the largest ore ships afloat. They will each be 900 feet long and carry 18,000 tons of ore. The first ship will be launched in April and tried out. If satisfactory the remaining nine ships will be copied after the initial vessel. The cost of building the ways for one of these boats will be \$1,500,000.

(20) Purchase of Limestone Quarry.—Announced on March 28, 1917, that this company, which recently purchased the limestone quarries at McAfee, N. J., in accordance with its policy to control all facilities from which its mills are supplied, has just arranged for the purchase of the quarry at Steelton, Pa., from the C. W. Cumbler estate. The quarries have been the property of the Pennsylvania Steel Co. since the plant was located here. This company had a contract with the late George W. Cumbler whereby he operated the quarries and furnished the company with stone. When Mr. Cumbler died in 1904 the quarries were put in charge of his executors.

—Apr. . . .

(1) Shipbuilding Adding to Profits.—It was stated April 2, 1917, that the boom in the shipbuilding industry is adding millions of dollars in profits to the earnings of this company, offsetting any loss that might be incurred in the falling off of foreign munitions contracts. Bethlehem is taking from 40 to 50% of the shipbuilding contracts placed, and it is safe to say that this about represents its capacity to the total shipbuilding capacity of the United States.

As Bethlehem supplies everything from the hulls to the guns, and its profits on material entering into the construction of ships must be enormous, shareholders are confident that before the end of the year common shareholders will receive an extra or extra dividends.

(2) Retiring Directors Re-elected.—It was announced April 3, 1917, that at the annual meeting of stockholders of this company Harry Bronner, C. Austin Buck, Allan A. Ryan and Charles M. Schwab were re-elected directors for a term of three years. All other current business before the meeting was approved by stockholders, with Mr. Verner objecting to every motion with the

exception of the motion to adjourn. The meeting was adjourned to reconvene Thursday, May 3, at 12 o'clock.

Directors have been authorized to issue bonds not to exceed \$200,000,000. Pres. Grace, in explaining the proposed blanket mortgage, intimated that it was the expectation of the directors to eventually do away with the holding company and to consolidate all the Bethlehem properties into one concern. Business on the books of Bethlehem Steel Corp. is larger than at any previous time in its history, according to Charles M. Schwab, who said that the total volume was certainly over \$250,000,000, and probably nearer \$300,000,000.

(3) Underwriting Agreement Ratified.—Announcement was made April 3, 1917, that stockholders of this company had approved and ratified the action of the directors in making an agreement with J. & W. Seligman & Co. to underwrite the \$15,000,000 Bethlehem Steel common stock.

Mr. Cravath, of the law firm of Cravath & Henderson, said he had informed the directors that the contract with Seligman firm was lawful and proper; that in view of objections by Mr. Verner at the previous meeting they thought it proper to put it before the stockholders at this meeting.

The following participated in the underwriting: C. M. Schwab, \$1,500,000, and received as his commission \$30,000; Harvey Fisk & Son, \$200,000, and received \$4,000; W. C. Sheldon & Co., of which firm G. R. Sheldon is a director, \$150,000, and received \$3,000, and Allan Ryan & Co., \$75,000, and received \$1,500.

(4) Chairman Schwab on Bonus System.—It was stated April 3, 1917, that to the stockholders of this company Chairman C. M. Schwab made the following statement relative to the bonus system: "During the last six years, ending Dec. 31st, I have had a good opportunity of seeing the benefit to employees and to the business of the bonus system, and I became convinced that the great prosperity of Bethlehem Steel was due to it. It has been a good many years since I have been in control of steel manufacturing property. Thirty years ago when I managed the Homestead Works I introduced the bonus system, and when I became Pres. of the Carnegie Works practically the same system was introduced. The Carnegie bonuses aggregated sometimes as high as 49%, whereas the bonuses given to Bethlehem Steel employees never averaged higher than 8%.

"Comment has been made to the size of last year's and the present year's bonus, amounting to 'nearly 8%', and some suggestions made that same should be reduced in time of high wages and great prosperity. If I were one of the men and was asked to have my bonus decreased in times of prosperity, I would certainly expect it to be increased in times of adversity."

Mr. Schwab stated that when the United States Steel Corp. was formed he was asked to work there for a very large salary as Pres. "I said to Mr. Morgan that I have never worked for a salary in my life, as I do not think it would be in my interest to work for a salary. Mr. Morgan and his associates agreed with me, and I believe that it is to the best interests of Bethlehem Steel Corporation to continue the present bonus system, and I ask you all your hearty and unqualified support of the plan."

(5) Mentioned in Penn Seaboard Deal.—See Penn Seaboard Steel Corp.—Item No. 1.

(6) Bonds.—It was stated April 12, 1917, that the authorization of \$200,000,000 bonds of this company does not mean that they are to be issued at once. Charles M. Schwab, chairman of the Bethlehem Steel Corp., stated none of the bonds will be issued for a year at least. Thereafter they will be sold from time to time if the construction plan of the Bethlehem Corp. requires such action.

(7) Wage Increase Effective May 1.—This company issued notice April 14, 1917, that beginning May 1 a 10% in-

crease in wages would be given the men. The number of men involved is in the neighborhood of 50,000.

These workmen are located at Bethlehem, Redington, Titusville, Lebanon, Reading, Steelton, and New Castle, Del. This is the fifth wage increase granted by the company since August, 1916, making 50% in all.

(8) Employees' Bonuses from Earnings After Fixed Charges.—On April 19, 1917, Dow, Jones & Co. said that at the last annual meeting of this company Charles M. Schwab made the statement that bonuses to Bethlehem Steel employees averaged approximately 8%. Mr. Schwab did not qualify his statement with an analysis of how bonuses were arrived at, but it is learned that employees' bonuses are based on earnings after fixed charges and depreciation.

As the net income of the Bethlehem Steel Corp. in 1916 was \$43,594,000, bonus payments last year must have amounted to approximately \$3,500,000. Mr. Schwab receives no salary from the Bethlehem Steel Corp. and none of the officers receive a salary in excess of \$10,000 annually.

The bonuses paid by the Bethlehem Steel Corp. theoretically, are not real bonuses, but only salaries which are very small items in periods of depression. It is evident from this that the Bethlehem Steel Corp.'s costs are much lower in periods of depression due to the fact that officials and heads of departments are compelled to accept very small returns for their labor.

(9) Net Earnings for March Quarter Estimated at \$17,000,000.—On April 24, 1917, the "Wall Street Journal" said that net earnings of this company applicable to dividends ran close to \$17,000,000 in the first quarter of the current year. Taking into account the extraordinary proposed Government tax, it is probable that the amount remaining for dividends in the first quarter was close to \$15,000,000.

Deducting the pfd. dividend and the balance available for the common would be \$14,950,000, equal to \$24.92 a share, or at the rate of \$99.68 per share a year.

The special depreciation deductions which will be made at the close of 1917 may cut down earnings available for dividends considerably, but at the rate Bethlehem has been going since the first of the year it is safe to predict larger profits available for dividends in 1917 than in 1916, unless the steel industry undergoes a radical change for the worse.

Bethlehem Steel, in fact, earned its entire year's dividend of \$10 a share on the common stock two and a half times over in the first quarter.

(10) Canada Orders 2,500 Tons of Steel for Piers.—See Dominion Bridge Co.—Item No. 3.

(11) Order for 250,000 Boxes of Tinplate.—Dow, Jones & Co. April 24, 1917, stated that the Bethlehem company had taken orders recently for over 250,000 boxes of tinplate, for shipment during last half of 1917, against prospective output of the 12 additional mills which it is building at Sparrows Point. This makes total sales of 500,000 boxes of tinplate that Bethlehem Steel Co. has made for shipment during third and fourth quarters of 1917.

The first 12 mills will be in operation by July 1, or possibly somewhat sooner. Prices were fixed against sales of first lot of 250,000 boxes the middle of April and are understood to have been considerably higher than the \$7.50 per base box fixed by American Sheet & Tin Plate Co. Sales in past two weeks have been made at \$8.50 to \$9 per base box, and in some instances even higher prices have been charged. Other independent manufacturers of tinplate have made sales at \$9.50 to \$10 per base box.

BETTENDORF CO.

(1) Capital Increased.—It was announced March 15, 1917, that this company, Bettendorf, Iowa, manufacturer of car frames, steel cars, etc., had in-

JANUARY 1 TO APRIL 30, 1917

sued \$1,500,000 for increased working capital, which was authorized at a meeting of the directors Feb. 28.

BEVERAGE SPECIALTIES CORP.

*(1) Incorporated on April 13, 1917, in Delaware, with a capital of \$500,000, to manufacture instruments and devices for the dispensation of food products. Incorporators: S. B. Howard, L. H. Gunther and A. W. Britton, New York.

BEVERLY HILLS UTILITIES CO.

*(1) Sale of Property Planned.—This company and the Southern California Gas Co. on April 10, 1917, filed an application with the California Railroad Commission for authority for the former to sell to the latter its entire gas distributing plant and system in Beverly Hills, Los Angeles County, and its franchise, for \$18,500, for the Southern California company to issue promissory notes for that amount in payment of the property and for a certificate of public convenience and necessity for the exercise of rights under the franchise. The original cost of the system was \$21,828.

BIARD PNEUMATIC TOOL CO., KANSAS CITY, MO.

*(1) Incorporated in April, 1917, in Missouri, with a capital of \$250,000, to manufacture metal-working tools. Incorporators: F. W. Lukins, A. M. Biard and J. F. Haskell.

BIG BASIN OIL CO., SPOKANE, WASH.

*(1) Incorporated on April 19, 1917, in Washington, with a capital of \$300,000. Incorporators: Andrew Prader, Frank C. Descent, F. L. Cary and George K. Stocker.

BIG BUTTE COPPER CO.

*(1) Incorporated in April, 1917, in Arizona, with a capital of \$1,500,000. Directors: Geo. L. Reed, Geo. C. Runer, Harry Shumate and Ed. Shumate.

BIG COTTONWOOD CONSOLIDATED MINING CO.

*(1) Stock Assessment.—It was announced that at a meeting Jan. 2, 1917, an assessment of 1 cent per share was levied by this company against all holders of record on that date, payable at any time up to Feb. 3.

BIGELOW-COOPER CO., BAY CITY, MICH.

*(1) Capital Increased.—On March 8, 1917, the company filed notice at Lansing, Mich., of an increase in capital stock from \$150,000 to \$250,000.

BIGELOW-HARTFORD CARPET CORP.

*(1) Dividend Increase on Common Predicted.—On Jan. 10, 1917, the "Boston News Bureau" stated that the fiscal year to Dec. 31 was the best this company ever enjoyed. The earning situation is so strong that it is not unlikely that the holders of the \$8,050,000 common stock, which has been paying 5%, will receive an increase in the regular rate to 6% at least. The next dividend on the common is payable Feb. 1, and if an increase is made it will be authorized some time in January.

Bigelow-Hartford operates plants at Clinton, Mass., and Thompsonville, Conn., and sells its own goods direct. The 1916 volume of sales is understood to have averaged over \$1,000,000 per month.

This corporation was promoted by Boston bankers in 1914. The \$5,500,000 pfd. is a 6% cumulative issue and has the distinction of having more than \$100 per share in net quick assets. The Jan. 1, 1916, figures showed a net working capital of \$6,088,000. This amount has been increased by the strong earnings of the last 12 months.

*(2) Increased Dividend on Common.—Announced Jan. 25, 1917, that this company had increased its common dividend rate from 5% to 6%, thus reflecting good times in the carpet industry.

*(3) Comment on Increased Dividends.—On Jan. 27, 1917, the "Boston News Bureau" said that good times in the textile industry and in the carpet line in particular had been reflected by an increase in this company's common dividend rate from 5% to 6%. There is \$8,050,000 of this issue outstanding and the increase to 6% adds one more to the list of Massachusetts tax exempt 6% stocks.

In its Dec. 31 year Bigelow-Hartford enjoyed the greatest prosperity in its history. Gross sales are understood to have reached \$13,000,000. Net profits were large enough to make this new 6% rate very conservative.

BIG HORN GOLD MINING CO.

*(1) Suit Instituted.—Alleged misrepresentations as to the value of property of this company, a South Dakota corporation, are set up in a petition filed in United States District Court on March 26, 1917, by the Big Horn Gold Mining Co. against J. Edward Sohn, R. J. H. Archibale, C. C. Archer, James M. Walker, H. Lee Early, Frank Kinney, Edward F. Walter, W. L. Brown, E. H. Franz and Frank J. Nieman, all of Cincinnati; D. A. Coulter, Franklin, Ind.; C. O. Lodwick and H. M. Babb, Chicago, Ill.; M. W. McIntire, Newport, Ky., and Wilson Hahn, residence unknown to the plaintiff.

The suit is instituted in the name of the gold mining company by Charles Fickert, Clinton Corbley, C. L. Munsey, Louis E. Bauer, John Mitchell, Charles A. Lohmiller and A. B. Walker, composing the company's new Board of Directors, which succeeded the old board, alleged to have been composed of the defendants named in this case.

Judgment for \$250,000 is asked against the defendants by the plaintiffs, who aver this sum represents the loss to stockholders of profits which would have been yielded to them had property represented to have been possessed by the company under the representations of the defendants actually owned by or under lease to the company.

It is declared under representations the company owned four leases on gravel deposits of an estimated value of from 50 cents to \$4 a cubic yard; that water supply for mining this gravel was inexhaustible; that mining operations could be continued ten months of the year; that the company owned property 2,000 feet wide by four miles long, together with the mineral rights to 50 acres in close proximity, and that a plant and equipment had been installed giving the company a capacity of from 2,500 to 3,000 cubic yards of gravel a day, persons were induced to subscribe to the stock of the company.

These representations were false, it is charged, in that while such gravel deposits, etc., are located at a place called Lillooet, on Alexander Creek, in the Cascade Mountain Range, 50 miles from Lytton, South Central British Columbia, Canada, none of this property was owned or under lease to the plaintiff company. The defendants named, it is averred, were directors of the company from 1903 to 1917.

BIG MUNDY OIL CORP.

*(1) Incorporated on March 21, 1917, in Delaware, with a capital of \$2,000,000, to produce and distribute petroleum and its products. Incorporators: Archie Giden, Ralph H. Waddell and Abraham A. Giden, all of New York.

BIJUR MOTOR LIGHTING CO., MANHATTAN, N. Y.

*(1) Capital Increased.—On April 25, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$850,000 to \$2,000,000.

BILLINGS & SPENCER CO.

*(1) Extra Dividend.—Announced March 24, 1917, that this company had declared the regular quarterly dividend of 2% and an extra of 3%, payable April 2 to stock of record March 28.

BILLOWE ALLOYS CO.

*(1) Incorporated on Jan. 25, 1917, in Delaware, with a capital of \$2,000,000, to buy, sell and deal in and with gold, silver, copper, etc. Incorporators: Sidney A. McGaw, Tacoma, Wash.; Jas. A. Gray, Jr., and Geo. N. Deas, New York.

BILTON MACHINE TOOL CO.

*(1) Successor to Merged Companies.—See Standard Manufacturing Co.—Item No. 2.

BILTON OIL & GAS CO.

*(1) Incorporated on Feb. 7, 1917, in Delaware, with a capital of \$1,500,000, to drill for and market oil and natural gas. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

BINGHAM CENTRAL RY.

*(1) Change in Control.—See Ohio Copper Co.—Item No. 1.

—Apr.

*(1) Sale of Control.—See Ohio Copper Mining Co.—Item No. 2.

BINGHAM COALITION MINES.

*(1) First Report Shows Profit.—On April 23, 1917, the "Boston Daily Advertiser" said: "The first report of Bingham Coalition Mines, dated April 2, 1917, shows a total estimated profit from July 1, 1916, of \$27,074. During the first four months of that period net losses were shown, since when there has been a steady increase in profits. Gross revenue to date was \$40,276.

"Work was begun on the Liberal ground, but was abandoned because of accidents and lower ore values. Work was transferred to the Julian tunnel, from which all subsequent shipments of ore have been made.

"These shipments have averaged from \$24.13 to \$69.24 per ton, and have netted from \$883 to \$3,850 per lot. The latest returns, since the date of the report, show \$7,000 net from two cars."

BINGHAM & GARFIELD RY. CO.

BINGHAM MINES CO.

*(1) Report, Year Ended Dec. 31, 1916, shows net earnings of \$119,847, an increase of \$24,382 over 1915. Including dividends received from its holdings of Eagle & Blue Bell stock, the total net income for the year was \$185,760. The company carried \$149,781 to surplus, bringing the total balance of surplus on Dec. 31, 1916, up to \$400,224. Total earnings for 1916 were \$283,490.

JANUARY 1 TO APRIL 30, 1917

The report says: "It is worth recalling that the company assumed a total indebtedness of \$1,480,789 in 1909 and begins the year 1917 without any bonded or floating indebtedness, besides having purchased and paid for the property of the Victoria Consolidated Mining Co., adjoining that of the Eagle & Blue Bell.

—Mar.

(1) Operating Results, February, 1917.—It was stated March 6, 1917, that in February this company operated at a profit of approximately \$17,000, against \$15,000 in January, and \$5,600 in December. Eagle & Blue Bell, which is controlled by Bingham through ownership of 73% of the outstanding stock, earned approximately \$40,000 in February, against \$35,000 in January and \$14,600 in December. Victoria Consolidated, all the stock of which is owned by Bingham, in February showed a profit of approximately \$20,000, against \$10,000 in January and \$9,800 in December.

On the February basis of operations Bingham, including its equity in Eagle & Blue Bell, is earning at the rate of \$5.50 a share per annum.

BINGHAMTON LIGHT, HEAT & POWER CO.

(1) New Plant Nearing Completion.—Announcement was made on March 28, 1917, that the new power plant of the company had been roofed over and that the installation of the boilers and other equipment was well under way. A 5,000-kw. turbine has been ordered for November delivery, and when this is installed the station will have an installed capacity of 10,500 kw.

—Apr.

(1) Stock and Bond Issue Permit Sought.—This company April 27, 1917, petitioned the New York Second District Public Service Commission for authority to issue \$407,000 in first refunding mortgage 5% 30-year gold bonds, under an existing mortgage, and \$174,100 6% cumulative pfd. stock.

BIRMINGHAM, ENSLEY & BESSEMER RY. CO.

(1) Petition Against Sale Denied.—See Birmingham Ry., Light & Power Co.—Item No. 1.

—Apr.

(1) Properties Transferred to Tidewater Ry.—On April 25, 1917, the reorganization committee for the holders of securities of this company issued a notice that the properties had been transferred to the Birmingham-Tidewater Ry. Co. under an order of sale and the stock of the latter company had been transferred to the Birmingham Ry., Light & Power Co., a subsidiary of American Cities Co., controlled by United Gas & Electric Corp.

This transfer of stock was made on consideration of the guaranty of the Birmingham-Tidewater bonds by Birmingham Ry., Light & Power Co.

The committee announced that on surrender of the certificates of deposits for the old bonds, issued by the reorganization, holders of the certificates will receive first mortgage 30-year 5% bonds of the Birmingham-Tidewater Ry. Co. to an amount equal to 50% of the face value of the Birmingham, Ensley & Bessemer bonds deposited and cash to the amount of the interest on the new bonds for the year 1916.

BIRMINGHAM FUEL & IRON CO.

(1) Coke Orders from Mexico.—See Corona Coal Co.—Item No. 1.

BIRMINGHAM RY., LIGHT & POWER CO.

(1) Petition Against Acquisition Denied.—It was announced at Birmingham, Ala., Feb. 27, 1917, that the Federal Court there had denied the petition of the City of Birmingham asking the court to enjoin the absorption of

the Birmingham, Ensley & Bessemer Ry. Co., a subsidiary of American Cities Co. The decision of the court permits the acquisition of the company and will enable the litigation connected with the receivership and reorganization of the Bessemer, Ensley & Birmingham to be concluded and the plans of the reorganization committee carried out.

—Mar.

(1) Note Offering.—It was announced March 24, 1917, that E. H. Rollins & Sons are offering at 100 and interest, to yield 6%, \$1,200,000 6% notes of this company, dated April 1, 1917, due April 1, 1919.

(2) Note Issue to Be Authorized.—Announced on March 30, 1917, that a special meeting of the shareholders of this company, a subsidiary of American Cities Co., controlled by United Gas & Electric Corp., had been called for April 26 to authorize an issue of \$2,000,000 in notes to cover the cost of taking over and consolidating the Birmingham, Ensley & Bessemer Ry., which was recently bought through a reorganization committee. The notes will be for two years and bear 6% interest.

—Apr.

(1) Special Meeting April 26.—Announced April 4, 1917, that a special meeting of stockholders of this company would be held at Birmingham, Ala., April 26, to authorize the issue of \$2,000,000 of 6% two-year notes. It is said that the proceeds will provide for the expense of taking over the "Tidewater" railway, which was recently approved.

(2) Stock of Birmingham-Tidewater Ry. Acquired.—See Birmingham, Ensley & Bessemer R. R.—Item No. 1.

BIRMINGHAM & SEAMAN CO., CHICAGO.

(1) Capital Increased.—On March 30, 1917, the company filed notice at Springfield, Ill., of an increase in capital from \$100,000 to \$400,000.

BIRMINGHAM-TIDEWATER RY. CO.

(1) Birmingham, Ensley & Bessemer Properties Taken Over—Stock Transferred.—See Birmingham, Ensley & Bessemer R. R.—Item No. 1.

BISCHOFFSHEIMER (E.) & SONS, INC.

(1) Incorporated on Jan. 3, 1917, in New York, with a capital of \$300,000, to deal in silk and textiles. Incorporators: H. Bischoffsheimer, L. and A. M. Wimpfheimer, 25 Waverley Place, New York.

BISHOP LIGHT & POWER CO.

(1) Report, Year Ended Dec. 31, 1916, shows gross revenue of \$15,831 and net income of \$2,890.

(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$29,518, compared with \$26,628 Dec. 31, 1915.

BLACKBIRD GOLD MINING CO., SEATTLE, WASH.

(1) Incorporated on March 28, 1917, in Washington, with a capital of \$750,000. Incorporators: James W. Edmunds and Robert M.C. Redpath.

BLACK DIAMOND CO., COLUMBUS.

(1) Capital Increased.—On Dec. 27, 1916, the company filed notice at Columbus, O., of an increase in capital stock from \$120,000 to \$325,000.

BLACK LAKE ASBESTOS & CHROME CO.

(1) Bonds.—Announcement was made Feb. 10, 1917, by Robert F. Massie, managing director of this company, of a decision to pay 2% for the six months ended Dec. 31, 1916, which is at the rate of 4% per annum on the \$1,191,500 second mortgage 6% non-cumulative income gold bonds of the company. These bonds were issued in exchange for a like amount of bonds of the Black Lake Consolidated Asbestos Co., upon payment by the holders of an assessment of 10% at the time of the reorganization in September, 1912. This is the first return to the bondholders.

In addition to these second mortgage bonds there is an authorized issue of \$250,000 6% first mortgage 20-year sinking fund bonds, but these are held in treasury.

—Mar.

(1) Report, Year Ended Dec. 31, 1916, shows income of \$77,788.25. Expenses of \$14,133 make the net profits \$63,654. The company is in a strong financial position, having quick assets of \$180,830, made up principally of cash, call loans, Anglo-French war bonds and Canadian war bonds.

BLACK LAKE CONSOLIDATED ASBESTOS CO.

(1) Bonds.—See Black Lake Asbestos & Chrome Co.—Item No. 1.

BLACK MOUNTAIN & CLINCHPORT RY.

(1) New Railroad.—On Jan. 2, 1917, \$1,000,000 was reported as subscribed for the construction of the road, which will extend from Clover Fork, near Harlan, and pass through the Black Mountain section of Harlan County, Ky., and on through the "Pocket" section of Lee County, Va., terminating at Clinchport, Va., 24 miles, where connection will be made with the Norfolk & Western, the Virginia & Southwestern and the Carolina, Clinchfield & Ohio railways.

BLACK STEEL & WIRE CO., AUGUSTA, ME.

(1) Incorporated in March, 1917, in Maine, with a capital of \$600,000, to manufacture and deal in steel, wire, and wire products.

BLACKSTONE OIL CO., BOSTON, MASS.

(1) Incorporated in January, 1917, in Massachusetts, with a capital of \$1,000,000. Pres., Albert H. Waitt, Newton; Treas., Wendell P. Bosworth, Brockton; Clerk, Annie B. Inkle, Brockton.

(2) To Reduce Stock Par Value.—It was announced Jan. 22, 1917, that on account of the special meeting of the stockholders of this company, to be held at Pawtucket, R. I., Jan. 29, the stock transfer books would be closed from Jan. 24 to 28, inclusive.

The purpose of the meeting is to reduce the par value of the common stock

JANUARY 1 TO APRIL 30, 1917

form \$100 to \$50 a share in conformity to the usual par of Rhode Island securities. For this purpose permission will have to be obtained from the General Assembly of the State, but no difficulties are expected on that score.

The pfd. stock, which still remains at \$100 par, will receive two votes per share after the reduction of the common. These securities are non-taxable in Rhode Island and are closely held by local interests.

BLEECKER STREET & FULTON
FERRY B. B. CO.

*(1) Sale of Stock of New York Rys. Co. Planned.—See New York Rys. Co.—Item No. 2.

BLISS (E. W.) CO.

*(1) Extra Dividend on Common.—Announced March 12, 1917, that this company had declared an extra dividend of 11¼% and the regular quarterly dividend of 1¼% on the common stock; also the regular quarterly dividend of 2% on the pfd., all payable April 2. Books close March 2 and reopen April 2.

*(2) Report, Year Ended Dec. 31, 1916, shows net earnings after pfd. dividends of \$10,465,321, equivalent to \$418.61 a share on the 25,000 shares of common stock outstanding, compared with \$5,432,101, or \$217.28 a share, earned on the same amount of common stock in 1915.

This statement of earnings shows that 1916 was the best year that the Bliss Co. ever experienced, 1915 having been the previous record year. Earnings on the common stock were the largest published by an American company. They even exceed the showing made by the Bethlehem Steel Corp. of \$286 a share on the common stock, and that of \$268 a share earned by the Scovill Mfg. Co. on its capital stock.

(3) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net earnings	\$10,565,321	\$5,532,101
Bal. after pfd. divs.	10,465,321	5,432,101
Surp. after com. divs. & prem. on bonds retired	6,296,691	5,182,101

*(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$13,721,839, compared with \$7,425,148 Dec. 31, 1915.

*(5) Comment on 1916 Report.—On March 20, 1917, the "Wall Street Journal" said that 1916 was a record year for the Bliss common stockholders, as dividend payments on the junior issue amounted to \$4,093,750, or 327¼%, compared with \$250,000, or \$10 a share, paid in 1915.

The balance sheet disclosed some remarkable changes during 1916, the principal among which was the wiping out of the \$5,643,483 which was shown on the 1915 report as being received as advance payments on contracts not completed. During 1916 all this work was finished and delivered, with the result that the item does not appear in the 1916 report. Another change was the paying off of the \$748,800 6% bonds, leaving the entire capitalization of the company at \$1,250,000 8% pfd. and \$1,250,000 common stock.

The only liability which the company has, outside of the capital stock, is \$3,782,218 in accounts payable and accrued salaries. On the current assets side the company shows cash, advance payments and inventories totaling \$10,166,935, leaving working capital at \$6,384,717. This analysis of working capital does not include outside investments amounting to \$2,330,264, compared with \$872,066 in 1915.

Cash item in the report showed a decrease of \$3,280,157, which was mainly due to the large cash payments which were made to the common stockholders. The real estate, building and equipment item was increased by \$846,871, while inventories increased \$2,421,065, from \$4,416,461 to \$6,837,526.

*(6) Book Value of Stock.—On March 23, 1917, the "Wall Street Journal" said, in part: "When the big foreign munition orders were being placed in this country several years ago, the common stock of the E. W. Bliss Co. was one of the securities to which the title of 'war bride' was attached."

"With a few others, the Bliss stock still retains the title, the reason being that the company successfully and profitably completed the orders which it received. A glance at the annual report for 1916 confirms this statement. After paying off \$748,800 in bonds at 110 and 8% dividend on the \$1,250,000 pfd. there remained \$10,465,321 for the 25,000 shares of common stock, of \$418.61 a share, compared with \$217.28 a share in 1915 and \$36 a share in 1914.

"The stock was quoted around \$40 a share before the war orders arrived. It has since sold at \$700 a share and is now around \$800 a share.

"There are several reasons for the Bliss stock maintaining its high price. Dividends on the common stock in 1916 amounted to \$163.75 a share, against \$10 in 1915. The book value of the stock has increased materially and is now placed at \$531.21 a share, against \$281.20 in 1915.

BLISS OIL & REFINING CORP.

*(1) Incorporated on Feb. 6, 1917, in Delaware, with a capital of \$3,000,000, to produce and sell crude oil and its products. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Harty, Wilmington, Del.

BLOCK (PAUL), INC., NEW YORK.

*(1) Capital Increased.—On April 3, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$100,000 to \$1,200,000.

BLOOMINGTON & NORMAL RY. &
LIGHT CO.

*(1) Capital Increase.—On Jan. 10, 1917, it was announced that this company,

Bloomington, Ill., controlled by the Illinois Traction Co., had filed at Springfield, Ill., notice certifying to an increase in the capital stock of the company from \$1,650,000 to \$1,900,000. The company is reported unofficially to have \$1,200,000 of common stock and \$450,000 of 6% cumulative pfd. stock outstanding.

BLUE DIAMOND COAL CO., LTD.

*(1) Incorporated on Dec. 22, 1916, in Canada, with a capital of \$1,500,000, divided into 15,000 shares of \$100 each, to purchase and lease coal fields. Incorporators: Reginald Herbert Montague Temple, Archibald James Reid, George Norman Limpricht, Wm. Bowler and Frederick Charles Allen. Chief place of business, Toronto, Ont.

BLUE MONSTER COFFEE CO.

*(1) Incorporated in January, 1917, in Arizona, with a capital of \$2,000,000. Directors: J. H. Morgan and N. G. Marshall, Prescott, Yavapai County, Ariz. Principal place of business within Arizona, Jerome, Yavapai County.

BLUE NOSE PLACER MINING CO.,
EUREKA, CAL.

*(1) Stock Issue.—It was announced Jan. 10, 1917, that the California Commissioner of Corporations had issued an order permitting this company to issue 15,000 shares each to Donald McPherson, L. D. Graeter and H. C. Nelson, 7,500 shares to Lee Harris and 3,750 shares each to Emil Franks and L. D. Hinds, in exchange for five placer mining claims, comprising approximately 100 acres, on the Klamath River, 25 miles north of Sommersbar, Siskiyou County, and to sell 19,995 shares at par, 25 cents per share, to net the company not less than 80% of the selling price, the proceeds to be used for development of the claims.

BOOK BEARING CO.

*(1) Sale.—See Standard Parts Co.—Item No. 1.

BOISE E. R.

*(1) Sale at Auction, Jan. 10.—It was announced Jan. 4, 1917, that this company's property, ordered sold by the United States Department of the Interior, would be offered at auction at Boise, Idaho, Jan. 10.

BOLIVAR OIL CO., LTD.

*(1) Incorporated on Jan. 23, 1917, in Delaware, with a capital of \$5,000,000, to produce and dispose of petroleum, natural gas, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

BOLIVIA TIN CORP.,
PORTLAND, ME.

*(1) Incorporated in March, 1917, in Maine, with a capital of \$1,200,000, to engage in mining, milling and preparing for market tin, copper, gold and silver.

BON AIR COAL & IRON CO.

*(1) Sale.—It was announced Feb. 2, 1917, that this company's property at Nashville, Tenn., would be sold April 2, 1917, under foreclosure of the general mortgage of 1904, securing an issue of \$505,000 5% bonds. The property will be offered in parcels, subject to the undisturbed lien of the following mortgage bonds: Buffalo Iron Co., \$202,000 6s; Bon Air Coal & Iron Co., to New York Trust Co., \$777,500 6s; Bon Air Coal, Land & Lumber Co., \$162,000 6s.

—Apr.

*(1) Sold.—Announcement was made April 2, 1917, that this company's property had been bought in at receivers' sales by a committee representing the second mortgage bondholders for \$329,502, the purchasers assuming the prior mortgages, together with accumulated interest, making the total valuation \$1,384,423.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Holders of the second mortgage bonds, who are purchasers of the property, will pay an assessment of probably ever 50% with which to pay the back interest, as well as the sinking fund of the prior mortgages.

BONBRIGHT & CO., INC.

NEW YORK.
 (1) Incorporated on Jan. 20, 1917, in New York, with a capital of \$500,000, to act as stock and bond brokers. Incorporators: W. P. & H. Bonbright and O. B. Griswold, 14 Wall St., New York.

—Mar.

(1) Capital Increased.—On March 13, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$650,000.

BONNOT CO., CANTON, O.

(1) Capital Increased.—It was announced March 1, 1917, that this company had increased its capital stock from \$100,000 to \$500,000, necessitated by the growth of its business.

BLUE DICK MINING & MILLING CO. (THE).

(1) Incorporated on Feb. 10, 1917, in Delaware, with a capital of \$1,000,000, to carry on a general mining business in all its branches. Incorporators: F. R. Hansell, Geo. H. B. Martin and S. C. Seymour, Philadelphia, Pa.

BOONTON HOSIERY CO., INC., NEW YORK.

(1) Capital Increased.—On April 7, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$350,000.

BOOTH FISHERIES CO., WILMINGTON, DEL.

(1) Report, Year Ended Dec. 31, 1916, showed net earnings of approximately \$1,600,000, an increase of \$557,229. After allowing for interest charges and pfd. dividends, etc., earnings on the common stock amount to 14%.

Gross sales for 1916 amounted to \$25,000,000, against \$20,000,000 the previous year.

(2) Dividend on Common Predicted.—On Jan. 13, 1917, the "Wall Street Journal" said that at a meeting to be held in January directors are expected to inaugurate dividends of 1% quarterly on the common stock.

(3) Incorporated on Jan. 16, 1917, in Washington, with a capital of \$7,000,000. Incorporators: F. M. Shive, S. E. Robinson and Harry W. Davis.

(4) Change in Name.—Capital Increased.—Announced at Olympia, Wash., on Jan. 16, 1917, that this company had filed notice of change in name to the Consumers' Fish Co., and of capital increase to \$20,000,000.

Power of attorney was filed, naming W. T. Chutter, of Seattle, agent of the Consumers' Fish Co.

(5) Dividends.—It was announced Jan. 30, 1917, that this company had declared a dividend of 2% on the common stock for 1916, payable March 1 to stock of record Feb. 15; also quarterly dividend of 1% on the common, placing stock on 4% annual basis, and the regular quarterly dividend of 1% on the pfd. stock, payable April 1 to stock of record March 20.

—Mar.

(1) Annual Meeting, April 10.—It was announced March 6, 1917, that the annual meeting of this company's stockholders will be held April 10, 1917, at which holders of record March 22 will be entitled to vote.

(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net profits	\$1,659,295	\$1,042,770
Bal. after chgs.	1,006,352	348,657
Surp. after pfd. dividends	792,082	168,652

(3) Earnings on Stock.—It was stated March 21, 1917, that this company's 1916 surplus of \$792,082 is equal to 15.84% on \$5,000,000 common stock.

(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,439,963, compared with \$635,806 Dec. 31, 1915.

(5) Acquisition.—It was reported on March 14, 1917, that this company had purchased the sardine plants of the Lubec Sardine Co. in Belfast, Me., and at Lubec and North Lubec, the company recently purchased the large Grady factory at Eastport. It is also announced that the Booth company will probably build a cold storage plant in Belfast, Me., at an approximate cost of \$50,000.

—Apr.

(1) Resignation of Director.—Expansion.—Stated on April 10, 1917, that J. L. Stack had retired from this company's directorate. The vacancy will not be filled at present. The company is pushing expansion of its cold-storage business, and has just completed a large plant in St. Louis at a cost of \$800,000. A plant will be built in Detroit, and it is contemplated to erect a storage warehouse in Buffalo in two years.

(2) Special Meeting Called for May 21.—Directors of this company on April 20, 1917, issued a call for a special meeting of stockholders May 21. Holders of record April 30 will be entitled to vote.

(3) Recapitalization Reported as Planned.—On April 19, 1917, the "Journal of Commerce," New York, said: "It is reported that the directors of the Booth Fisheries Co. have under consideration a plan to recapitalize the company. According to rumor, new common shares of no par value will be issued in exchange for the present \$5,000,000 junior stock, consisting of 50,000 shares of the par value of \$100 each in the proportion of two shares of new for one share of old. It is understood that the company's assets in excess of its debentures and pfd. stock are worth \$10,000,000."

(4) Change in Number and Par Value of Shares to Be Recommended by Directors.—On April 25, 1917, the "New York Times" said: "The Board of Directors of the Booth Fisheries Co. will recommend to the common stockholders of record April 30 that, at a special meeting of the common stockholders to be held May 2, they shall change the number and par value of the authorized common stock shares from 100,000 shares, par value \$100 each, to 500,000 shares of no par value."

BORDEAUX (CITY OF).

(1) Bonds.—It was announced Feb. 5, 1917, that Kuhn, Loeb & Co., as managers of the syndicate which underwrote the \$80,000,000 6% three-year bonds of the cities of Bordeaux, Lyons and Marseilles and offered them at 98 to yield 6.75%, had issued a statement to syndicate members requesting an extension of the syndicate from Feb. 20, the date on which it expires, to Oct. 31, 1917.

Only about 53% of the bonds have been sold, leaving approximately 47% on the hands of the underwriters. The bankers state that they will deliver the unsold portion of the bonds on or before Feb. 13, but anyone desiring them to carry their proportionate share can obtain such accommodation on the basis of prevailing interest rates; not less than 3%, however.

—Apr.

(1) Bonds Listed in New York.—The New York Stock Exchange announced April 19, 1917, that it had admitted to the list City of Bordeaux, France, \$12,000,000 temporary 6% three-year bonds, due Nov. 1, 1919.

BORDEN CO., WARREN, O.

(1) Capital Increased.—On Jan. 31, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$150,000 to \$250,000.

BORDEN (RICHARD) MANUFACTURING CO.

(1) Dividend Increased.—Announced at Fall River, Mass., March 22, 1917, that this company had declared a dividend

of 5%, payable April 2 to stock of record March 21. Its usual rate formerly was 1½%, and more recently 2%. For the preceding two quarters 5% each was paid.

BORDEN'S CONDENSED MILK CO.

(1) New Company to Handle Farm Products Dept.—See Borden's Farm Products Co., Inc., Wassaic, N. Y.—Item No. 2.

BORDEN'S FARM PRODUCTS CO., INC., WASSAIC, N. Y.

(1) Incorporated on April 24, 1917, in New York, with a capital of \$17,500,000, to deal in fresh milk and all manufactured forms of milk, confectionery and farm products. Incorporators: S. F. Taylor, W. N. Gladding and A. W. Millburn, 108 Hudson St., New York.

(2) To Handle Borden Farm Products Dept.—An official of Borden's Condensed Milk Co., April 25, 1917, in explaining the incorporation of this new company, stated that after May 1 it would take over the business handled by the farm products department of the old company. This includes the business in fluid milk, cream, butter, eggs and the wagon business of the Borden organization.

BORDER CITY MANUFACTURING CO.

(1) Stock Dividend of 20%.—The "Daily News Record," New York, April 19, 1917, said this company, Fall River, Mass., had declared a cash dividend of 2% and a cash dividend of 20%.

BOSSERT CORP. (THE), FRANKFORT.

(1) Incorporated on Feb. 14, 1917, in New York, with a capital of \$1,100,000, to deal in iron and steel products. Incorporators: J. S. Pierce, G. A. Kernan and G. H. Brown, Utica, N. Y.

BOSS MANUFACTURING CO.

(1) Plant to be Enlarged.—A Kansas City, Mo., dispatch April 12, 1917, to the "Boston Evening Transcript" said that this company, capital \$2,000,000, with 24 glove and mitten plants, scattered over the United States, had decided, instead of establishing a 25th plant in another city to double the output of its Kansas City plant.

The company's plant there makes cotton gloves exclusively, turning out from 18,000 to 20,000 dozen pairs a week. The output in the new plant will be 40,000 dozen pairs a week.

BOSTON ACME MINES CORP.

(1) Incorporated on Feb. 2, 1917, in Delaware, with a capital of \$10,000,000, to do a general mining business. Incorporators: Fred B. Hovey, E. Randolph Foder and Margaret Zopf, all of Chicago.

BOSTON & ALBANY R. R.

	1916	1915
(1) Earnings—		
Nov. gross	\$1,893,716	\$1,645,461

Net after taxes	6,330,617	4,450,623
Surp. after chgs.	2,196,303	634,024

(2) Earnings, 1916, Estimated.—On Jan. 15, 1917, it was stated that this company during the 1916 calendar and fiscal year should show about \$21,643,000 gross and \$2,352,000 net, after all charges and dividends. Such a result would be equivalent to a return of about 8.90% on the "operating investment," or the cost of the road and equipment, as figured by New York Central, and would amount to 0.94 of 1% on the lessee's stock outstanding Dec. 31.

In 1915 \$17,605,000 gross and \$781,000 surplus was earned. In 1914 there was \$16,491,000 gross and \$934,000 deficit.

²(2) New Switching Engines Ordered.—A Boston dispatch April 21, 1917, stated that this company had made arrangements to add 18 switching engines to its motive power. These will be the largest used in New England.

BOSTON CONSOLIDATED GAS CO.

¹(1) Output, January, 1917.—It was announced Feb. 2, 1917, that the gas output of this company for January was 580,541,000 cubic feet, an increase of 10.9% over the same month in 1916. January output compares with 582,902,000 cubic feet in December, the largest month in the 1916 year.

BOSTON CREEK GOLD MINING CO., LTD.

¹(1) Distribution to Stockholders.—See Newray Mines, Ltd.—Item No. 1.

BOSTON ELEVATED RY.

¹(1) Gross Receipts, December, 1916, it was stated Jan. 4, 1917, showed an increase of \$129,700, or 8.28%, over November.

¹(2) No Increase in Fare.—It was announced Jan. 11, 1917, that the commission dealing with this company's financial condition had decided not to recommend to the Massachusetts Legislature an increase of fares to six cents. Commission will include in final report certain advantageous figures which will tend to help the company rehabilitate its finances. It will also recommend a special appropriation by which the Public Service Commission may make an exhaustive study of the company's condition in addition to what has already been made.

—Feb.

¹(1) Dividend Discussion.—On Feb. 2, 1917, it was stated that the ruling of the Interstate Commerce Commission, changing the fiscal year of railroads and street railways to correspond with the fiscal period likely would express itself in this company's dividend.

For two years it has been the Elevated policy to pay three dividends at the full rate of 6%, or 1½% each quarter. In the final quarter, or the three months to June 30, as much was paid as was earned. This has amounted to 1% for two years.

It would seem, therefore, that the dividend of Elevated some time during the following six months might be but 1% for one of the ensuing two quarters. Barring that, the distribution for the 12 months from June 30, 1916, to June 30, 1917, would be the full 6%, which is more than the company will probably earn.

January was a good month for the company's gross receipts. There was a gain in income of \$122,000, or 8.2%. Next to the December increase of \$123,000, or 8.26%, this is the largest monthly increase of any month during the period from July 1, 1916.

¹(2) Equipment Order.—On Feb. 12, 1917, it was announced by Pres. Matthew C. Brush that this company had

placed an order for \$2,000,000 worth of cars for use on its elevated, surface and subway lines. More cars would be added, he said, if the recommendations of the commission appointed by the Legislature are adopted.

—Mar.

¹(1) Fortunate Coal Contract.—On March 23, 1917, the "Boston News Bureau" had the following: "So many heavy burdens have been piled upon Boston Elevated during the last ten years and especially during the past five that it is gratifying to find an important instance where the property and its earnings have been beneficiaries.

Boston Elevated in 1917, and for that matter for two years following 1917, will have the benefit of an unusually favorable coal contract made in 1915 for a five-year period. Because of this contract the company's coal will not cost it any more this year than in strictly normal times. If Boston Elevated were compelled to renew its contract for 1917 supplies at going prices it would involve something over \$800,000 additional expense and would probably immediately measure itself in the passing of all dividends on the stock. Boston Elevated is one of the very few street railways in the East which is thus comfortably fixed for its 1917 coal supplies.

—Apr.

¹(1) Report on Relief Bill Favorable.—It was announced at Boston April 11, 1917, that the committee on metropolitan affairs had voted to report favorably the Boston Elevated "relief" bill, which provides for return to the company of deposit with the Commonwealth of \$500,000; purchase of Cambridge subway by Commonwealth, to enable the Elevated to provide additional cars and otherwise improve its service, authorizing establishment of enclosed areas, stations or shelters for convenience of transfer passengers; abolition in part of special compensation tax imposed upon the company and a further investigation of affairs of the company and a study of needs of the metropolitan district for additional rapid transit facilities.

BOSTON & LOWELL R. R. CORP.

¹(1) Statement About Consolidation Plan.—See Boston & Maine R. R.—Item No. 3.

¹(2) Boston & Maine Plan Approved.—Announced March 23, 1917, that this company had voted in favor of the Boston & Maine reorganization plan. The plan goes to stockholders for consideration at a special meeting.

BOSTON & MAINE R. R.

¹ (1) Earnings—	1916	1915
Nov. gross-----	\$4,533,916	\$4,210,042
Net after taxes--	1,079,946	1,062,360
6 mos. gross-----	24,204,398	21,374,211
Net after taxes--	6,978,382	5,991,179

¹(2) Earnings on Stock, Five Months.—It was stated Jan. 4, 1917, that during five months to Dec. 1, 1916, this company's net income was \$689,000 more than for the corresponding 1915 period. On its common stock the road shows \$2,679,000, or 6.78%, earned after all leased line rental and pfd. dividend charges.

There is to date no let-up in traffic offering the road. Gains in gross continue. For the first three weeks of December these gains approximated \$300,000, or 10%—on top of a corresponding 13% gain over 1914 recorded in the corresponding 1915 period. Passenger revenues are averaging 25% to 30% ahead of those a year previously.

In November, for the first time in a long while, the road showed a decrease (\$58,000) in final net, as contrasted with 12 months before.

December, however, made a comparative gain.

Deliveries to the road of 60 engines ordered from American Locomotive Co. have been started.

¹(3) Receivership Upheld.—It was announced at Boston Jan. 5, 1917, that the receivership of this company had been

sustained by the Federal Court there, pending final determination of the questions of law involved. This ruling followed a hearing of five weeks, in which minority stockholders had opposed a continuance of the temporary receivership.

Upon the facts as presented, the court held that the receivership was justified, that the directors had been actuated by honorable motives in assenting to the creditors' petition for receivership filed by the Intercontinental Rubber Co., of New Jersey, and that the financial condition of the road was what the directors claimed it to be.

Judge Morton said that Asa P. French, counsel for certain other minority stockholders, had requested permission to file a brief on the questions of law involved. Pending the court's determination of the questions raised by Mr. French, Judge Morton said he would reserve his decision regarding the permanency of the receivership until later, but that the facts showed the receivership was proper.

¹(4) Reorganization Legislation Planned.—It was stated Jan. 11, 1917, that plans were being made for introducing a bill for passage by the New Hampshire Legislature to permit reorganization contemplated for this company's system. Federal Trustee Carpenter stated that he expected a statute could be secured at this session to enable the financial revamping, which, it has been declared, was a purpose in mind in seeking the receivership of the road.

Representative Frost, of Somerville, has introduced into the Massachusetts General Court an order directing the State Treasurer to find out at what price this Commonwealth could purchase the majority stock of Boston & Maine from the Federal trustees and also bills designed to give State aid to the road.

As yet the trustees have never publicly named any price at which they would sell the stock, under the New Haven dissolution decree.

¹(5) Hearing Jan. 25.—Announced at Boston Jan. 17, 1917, that the United States Circuit Court of Appeals had set Jan. 25 as the date for hearing Boston & Maine minority stockholders' petition seeking to have action of District Court appointing a receiver disapproved so far as Maine and New Hampshire properties are concerned.

¹(6) Petition to Pay Interest.—See Connecticut River R. R.—Item No. 1.

—Feb.

¹(1) Brief in Support of Receivership Motion.—It was announced at Boston Jan. 31, 1917, that this company had filed in the United States District Court there a brief in support of its motion to make the receivership permanent. It contends it had a right to enter into an arrangement with a creditor to bring receivership proceedings and to bear a part of all the expenses. It further contends that the question of whether a receiver should be asked for a receivership extended was a matter for consideration of directors, not stockholders.

² (2) Earnings—	1916	1915
Dec. gross-----	\$4,768,023	\$4,260,093
Net after taxes--	1,232,347	1,096,861
Surp. after chgs.	204,306	171,152
6 mos. gross-----	28,942,421	25,634,304
Net after taxes--	8,648,161	7,464,755
Surp. after chgs.	2,962,105	2,239,823

¹(3) Report, Year Ended Dec. 31, 1916, shows surplus after all charges, including leased line rentals, of \$4,787,979, equal to 11.64% on common stock after pfd. dividend requirements. This compares with \$1,779,000 for 1915.

¹(4) Basis of Billard Settlement.—See Metropolitan Steamship Co.—Item No. 1.

¹(5) Move to Restrain Receiver.—It was announced at Boston Feb. 16, 1917, that Attorney Crocker, for the minority stockholders' protective association of the Boston & Maine, had filed a motion in the United States District Court, in which the receivership proceedings are

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

pending, asking that the receiver be directed to restore to the road all money paid out in interest on bonds of the Worcester, Nashua & Rochester R. R., and that he also be directed not to pay out any more interest on those bonds. The motion is in line with the contention of the minority stockholders that these bonds are not valid obligations of the Boston & Maine.

(6) Report, Quarter Ended Dec. 31, 1916, as filed with the Public Service Commission of Massachusetts, compares as follows:

	1916	1915
Gross	\$14,129,512	\$12,900,046
Net after taxes	3,544,358	3,228,074
Surp. after chgs.	1,039,331	959,519

(7) Adverse Report on Minority Bill.—It was announced at Concord, N. H., Feb. 20, 1917, that an unfavorable committee report on a bill which would prohibit railroad directors applying for the appointment of a receiver, or assenting to such application until the Public Service Commission had found the road insolvent within the meaning of the Federal bankruptcy act, had been presented to the Senate. Passage of the bill was advocated by the Boston & Maine minority stockholders' protective association, which had opposed the appointment of a receiver for the Boston & Maine system.

(8) Financial Statement, as of Dec. 31, 1916.—It was stated Feb. 23, 1917, that this company's balance sheet as of Dec. 31, 1916, according to the quarterly return just certified to as showing "the exact financial condition of the company," indicates a profit and loss surplus of \$2,965,237 and a total corporate surplus of \$4,625,090 on that date.

It also indicates \$10,445,158 cash and time drafts and deposits. The latter are practically cash.

Another feature of the report is that it records current liabilities of \$24,266,150, or only \$2,458,903 in excess of current assets, whereas the New Haven's statement for the same date shows current liabilities of \$37,527,462, or a \$9,454,678 excess of working liabilities aside from the \$18,000,000 Navigation Co. notes.

(9) Receivership Made Permanent.—On Feb. 26, 1917, it was announced at Boston that the receivership of this company had been made permanent on that date by Judge Morton, of the Federal District Court, who stated there was no foundation for the charges of fraud made against the Board of Directors by minority stockholders.

The protesting minority interests were characterized by the court as "a comparatively small but contentious group, who appear to have resorted to charges of 'fraud' or of 'breach of duty' in an effort to obscure the exact nature of their real complaint."

"The case presents to my mind," said Judge Morton, "nothing but an acute difference of opinion upon a matter of business policy and action between the directors and the owners of an overwhelming majority of the stock on one side, and a comparatively small and contentious group of minority stockholders on the other."

The road has been in temporary receivership, with James H. Hustis, its Pres., acting as receiver since Aug. 29. Receivership was brought about through petition of the Intercontinental Rubber Co. of New Jersey, a creditor, to which the road's directors assented.

—Mar.

(1) Decline in Earnings.—It was stated March 1, 1917, that although this company expanded its gross business in January by over a quarter million dollars above those of 1916, the result after charges probably will be a deficit, against \$109,000 surplus for January, 1916.

Coal supply is becoming an increasingly serious matter. Outlays for coal have amounted to about 13% of aggregate operating expenses of Boston & Maine, but are increasing to 26%. Its coal difficulties are in common with other roads.

Should war be declared the coal problem will be tremendously more complex.

Boston & Maine for the first three weeks of February recorded a decided drop in gross from the corresponding 1916 period. Freight earnings were off 16%, and passenger revenue was 15% ahead. Total gross was 6% behind.

(2) Earnings—

	1917	1916
January gross	\$4,518,279	\$4,205,961
Net after taxes	901,295	974,258
Def. after chgs.	148,024	1109,539
Surplus		

(3) Official Statement About Consolidation Plan.—It was announced that at the close of a meeting of the Board of Directors of this company Wednesday, March 14, 1917, the following statement was issued:

"On March 3 last committees representing the Connecticut River, Fitchburg, Boston & Lowell and Concord & Montreal railroads submitted to the Pres. and Board of Directors of the Boston & Maine R. R. a plan of reorganization and consolidation of the Boston & Maine R. R. system, which, in their judgment, would be promotive of the best interests of the industries of New England, of the stockholders of the several corporations and of the public generally.

"This plan was considered by the Boston & Maine board at a meeting held on Tuesday, March 6, and at several adjourned meetings that have been held since that date, and as a result certain modifications have been made in the plan as originally presented.

"At a meeting of the board held Wednesday a vote was taken expressing the views and position of the Boston & Maine board. This vote was communicated to the leased lines Wednesday. Neither the plan nor the vote will be made public at this time. When and if a plan is adopted it will be submitted to the stockholders for their approval.

"Pres. Hustis, because of his position as temporary receiver, did not sit in at the meeting of the board at which matters of reorganization were discussed."

(4) Reorganization Plan Adopted.—A Concord, N. H., dispatch March 17, 1917, stated that Pres. Benjamin A. Kimball, of the Concord & Montreal R. R., had announced that a plan of reorganization for the Boston & Maine R. R. had been adopted finally by the directors of the Boston & Maine and its principal leased lines.

The new plan, with certain recommendations of the Concord & Montreal directors, was prepared for transmission to the stockholders during the week of March 18.

(5) New Plan.—It was announced March 19, 1917, that the new Boston & Maine reorganization plan provides for formation of a new corporation and issue of \$12,324,000 new stock to be sold for cash, \$7,394,400 of which 1st pfd. and \$4,929,600 convertible pfd.

It will issue in lieu of old pfd. stock \$3,149,800 pfd. stock, and in lieu of common stock \$39,505,100 common stock. It will also issue to leased lines 1st pfd. stock share for share, dividends same rates as present rentals.

Stock issued for cash, amounting to \$12,324,000, will be offered for subscription to stockholders. On payment of \$30 assessment stockholders receive \$18 in 1st pfd. and \$12 in convertible pfd. Pfd. stockholders are entitled to subscribe for \$15 par 1st pfd. and convertible pfd. in proportion of \$9 of 1st pfd. and \$6 of convertible pfd. Purchase syndicate, comprising J. P. Morgan & Co., Kidder, Peabody & Co. and Lee, Higginson & Co., will be formed to underwrite issue.

Purchase syndicate agrees to assume subscription of any common stockholder who pays syndicate \$5 per share or assigns to syndicate 20% of his common stock. It also agrees to assume subscription of any pfd. stockholder who pays \$2.50 per share or assigns 10% of his holdings to syndicate.

Stockholders who do not subscribe or procure subscription will receive 70-100 share new common, and pfd. stockholders will receive 85-100 pfd.

(6) Plan Approved by Fitchburg R. R. Directors.—See Fitchburg R. R.—Item No. 2.

(7) Plan Approved by Boston & Lowell.—See Boston & Lowell R. R. Corp.—Item No. 2.

(8) Effect of Eight-Hour Law.—See New York, New Haven & Hartford R. R.—Item No. 5.

(9) Reorganization Plan Favored.—Stockholders of the Concord & Montreal R. R. at a special meeting at Concord, N. H., on March 27, 1917, voted in favor of the Boston & Maine reorganization plan. Total vote cast was 48,465 shares; in favor, 42,437; opposed, 6,028. Concord & Montreal is leased to the Boston & Maine.

Net after taxes	242,648	854,693
Def. after chgs.	661,342 (Surp.)	9,193

—Apr.

(1) Minority Reorganization Plan.—On April 1, 1917, the Boston & Maine Minority Stockholders' Protective Association made public a plan for the reorganization of the system which is in the hands of receivers.

The minority plan calls for a new company to take over the property, paying for it in shares of pfd. and common stock. Stockholders in leased lines would lose the dividends of 8, 9 and 10%, which they have been receiving under the leases in some cases, and would receive pfd. stock entitled to cumulative dividends of 5%.

In behalf of their plan the minority stockholders assert that it would reduce the fixed charges of the system by \$4,000,000, would avoid all underwriting commission, and prevent assessment of stockholders, while giving the corporation extensive credit and stockholders early and substantial dividends. They state that the reduction of \$4,000,000 in fixed expenses would be accomplished without reducing the aggregate of dividends paid to stockholders by more than \$700,000. Borrowing capacity for future development, they say, would be about \$82,000,000, under the provisions of existing law.

The proposed new company would be called the Boston & Maine R. R. Co., and would take over the franchises of the Boston & Maine R. R. and the leased lines it operates. Its pfd. stock would be entitled to 5% cumulative dividends before the common stock received any, and after the common had also received 5% both kinds would participate equally in further dividends.

Pfd. stock would have no voting power, but could be converted share for share into common stock within three years.

(2) Reorganization Bill Passes New Hampshire House.—It was announced April 12, 1917, that this company's reorganization bill had been passed by the New Hampshire House of Representatives without a dissenting vote. The bill was sent from the House to the Senate.

(3) Reorganization Bill Passed by New Hampshire Senate.—The New Hampshire Senate April 18, 1917, passed by a vote of 19 to 3 the bill providing for the reorganization of this company.

(4) Receiver's Report, Six Months Ended March 1, 1916.—Receiver Hustis, of this company, April 20, 1917, filed in the Federal District Court at Boston a report on the first six months of his receivership. It shows a cash balance March 1 of \$7,902,695. Receipts, including cash balance of \$8,634,163 on hand when he was appointed receiver Aug. 29, amount to \$50,587,375. Total disbursements for six months period amounted to \$42,684,680.

(5) Extension of Reorganization Time Favored by Senate Committee.—The Massachusetts Committee on Railroads

JANUARY 1 TO APRIL 30, 1917

April 18, 1917, reported to the Senate a bill to extend by two years the time within which this company may avail itself of the first seven sections of the reorganization act, extending the time to July 1, 1919.

BOSTON & MONTANA DEVELOPMENT CO.

“(1) President's Report, 1916.—It was stated April 11, 1917, that Pres. W. R. Allen, of this company, in his annual report to stockholders said that operations during 1916 indicated clearly the necessity of a concentration flotation, and because of this the Boston & Montana Milling Co. was organized in October. An agreement was entered with the General Engineering Co., of Salt Lake City, for the supervision of construction.

Samples tested from the Idanha vein showed the value of the crude ore to be \$23.41 per ton, with proper railroad transportation; the cost of mining and milling, etc., is placed at \$7.70 per ton, leaving a net operating profit of \$15.71 per ton. Pres. Allen added that financing and a contract for the construction and completion of the entire line are being considered by the Southern Montana Ry., subsidiary of the Boston & Montana Development Co.

“(2) Balance Sheet, as of Jan. 1, 1917, compares with same date previous year as follows:

Assets—	1917	1916
Real estate, etc.	\$14,368,809	\$11,863,865
Treasury stock—		2,908,904
Additions and improvements—	96,316

Stock accounts—		37,045
Total	\$15,029,763	\$15,115,851

BOSTON MORRIS PLAN CO.

“(1) First Annual Meeting.—It was announced Jan. 18, 1917, that reports made at first annual meeting of this company, which opened in June, 1916, showed that in its first six months the company did more business than any other Morris Plan Co. in the United States during the corresponding period of its existence.

The Boston Morris Plan Co. shows a more rapid development and a larger volume of business than any Morris Plan Co. ever organized. The fact that it has more than \$500,000 outstanding in small loans and that the losses have been nothing, were cited as facts showing that the plan is successful.

BOSTON & MONTANA DEVELOPMENT CO.

“(1) Work Started on Railroad.—It was announced Jan. 6, 1917, that construction work had been started on a 35-mile railroad running from Divide, Mont., on the Oregon Short Line, to the Elkhorn properties of this company. The Boston & Montana Co. is constructing a 500-ton mill.

—Feb.

“(1) New Director.—It was announced Feb. 15, 1917, that John D. Pope, former engineer of the North Butte Mining Co., had been elected a director of this company. Mr. Pope recently was named manager of the property. Mr. Pope stated that the success of the Boston & Montana Development Co. seemed assured and added that he expects the development to become one of the largest in the Northwest.

BOSTON MORTGAGE BOND CO.

“(1) Extra Dividend.—Announced Jan. 4, 1917, that this company had declared

the 15th regular quarterly dividend of 1½% and an extra dividend of 2% for 1916, both payable Jan. 15 to stock of record Jan. 1.

BOSTON & NORTHERN STREET RY. CO.

“(1) Mortgage.—See Bay State Street Ry. Co.—Item No. 3.

BOSTON, REVERE BEACH & LYNN RY.

“(1) Report, Quarter Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross	\$224,176	\$203,637
Net after taxes—	18,833	14,119
Deficit aft. chgs.	6,208	11,063

BOSTON RUBBER SHOE CO.

“(1) Financial Statement.—On April 18, 1917, this company, incorporated under the laws of Massachusetts, filed with the Massachusetts Secretary of State a statement of its financial condition, dated Dec. 31, 1916, which compares as follows:

Assets—	1916	1915
Real estate	\$998,700	\$998,700
Machinery	393,579	393,538
Merchandise	1,738,671	1,950,574
Cash and debts receivable	4,518,588	4,248,870

Total	\$7,710,381	\$7,652,525
Liabilities—		
Capital stock	\$5,000,000	\$5,000,000
Accts. payable—	198,967	154,178
Floating debt—	400,000	600,000
Reserves	218,059	218,659
Surplus	1,892,753	1,679,686
Total	\$7,710,381	\$7,652,525

BOSTON TALKING MACHINE CO.

“(1) New Receiver.—It was announced Feb. 10, 1917, that Wm. Shaw McCallum had been appointed receiver for this company, succeeding E. Fred Aldrich, deceased.

BOSTON-VIRGINIA TRANSPORTATION CO.

“(1) Bond Retirement Planned.—On Jan. 25, 1917, it was stated that the reason for the strength in this company's stock is an announcement which will immediately be sent out by Pres. Stoddard, in which he advises of a plan to fund the accumulated dividends on the \$400,000 7% pfd. stock through an issue of \$100,000 additional pfd. The additional issue will be offered stockholders for subscription at par in proportion to present holdings, and will be underwritten by the pfd. stockholders, consisting of Pres. Stoddard and his family.

BOSTON WHARF CO.

“(1) Report, Year Ended Dec. 31, 1916, shows a balance to credit of profit and loss of \$398,671, compared with \$366,822 in 1915.

“(2) Balance Sheet, as of Dec. 31, 1916, shows cash amounting to \$241,484; accounts receivable, \$57,640; total assets and liabilities, \$8,922,179.

BOSTON & WORCESTER STREET RY. CO.

“(1) Stock and Bond Issue Permitted.—The “Boston Daily Advertiser” April 21, 1917, said this company had petitioned the Massachusetts Public Service Commission for permission to issue 2,700 new pfd. shares, bringing the total pfd. stock to 7,272 shares, par \$100, and the total authorized capital to \$2,752,200. Permission was also asked to issue \$40,000 first mortgage bonds to pay for permanent improvements.

BOSTON WOVEN HOSE & RUBBER CO.

“(1) Capital Increase Planned.—It was announced Feb. 1, 1917, that this company had completed plans for doubling the authorized common stock from

\$2,000,000 to \$4,000,000. It is the purpose to issue only \$1,000,000 during 1917 at \$100 a share, which at the present price of \$300 would mean a right worth about \$66. The company has authorized and outstanding \$750,000 pfd. and \$2,000,000 common stock.

“(2) Stock Increase Authorized.—It was announced Feb. 20, 1917, that at a special meeting of stockholders of this company the authorized issue of common stock was increased from \$2,000,000 to \$4,000,000. It is the intention to issue \$1,000,000 of the new stock at par.

—Mar.

“(1) Stockholders' Rights.—It was announced March 6, 1917, that this company is offering to holders of common stock of record March 10, other than trustees of Boston Woven Hose Securities Co., and to record holders of trustees representing such common stock, right to subscribe to one share of new common at \$100 per share for each two shares now owned.

This will increase common stock from \$2,000,000 to \$3,000,000. Right to subscribe expires April 10 and stock must be paid for on or before April 16 or at option of subscriber, one-half on or before April 16 and one-half on October 16.

“(2) Statement by Treasurer.—It was announced March 6, 1917, that in connection with the offering of \$1,000,000 new stock of this company, Treas. Sprague said:

“It is eight years since the stockholders of the company have been asked for any cash for increased capital.

“In 1909 the stockholders paid into the treasury \$450,000, at which time the common stock was increased to \$750,000 and the annual business of the company amounted to a little over \$3,000,000. Since that date (1909) the common stock has paid 12% dividends and in addition has been increased to \$2,000,000 with surplus of \$1,220,116 entirely from earnings. New buildings of reinforced steel and concrete equipped with the latest machinery, including a power plant costing \$500,000, have been added to meet the demand of the constantly increasing business and paid for from earnings.

“The large increase in the company's sales in 1916, the equally large increase in the present fiscal year beginning Sept. 1, 1916, seems to make probable a business for the current year of \$7,000,000, an increase in sales of over \$1,000,000 a year in each of the past two years.

“As the company has always paid spot cash for its merchandise, the requirements for this large volume of business are such that the directors deem it wise to add to the permanent capital of the company at this time instead of further financing it by increasing its floating indebtedness.

“(3) Status.—It was stated March 7, 1917, that this company with prospective gross sales in 1917 of \$7,000,000, has become one of the important Boston manufacturing concerns. The 1916 sales exceeded \$6,101,000. The company does not issue an income account, but it is figured that net earnings in 1916 were about 40% on the \$2,000,000 common stock, after pfd. dividends. In other words, the company earned its 12% regular dividend more than three times.

During the fiscal year which ended Sept. 1, 1916, \$322,710 was spent out of earnings on new buildings and machinery, and \$750,000 was transferred from surplus to capital account.

Boston Woven Hose has been declaring “extras” with considerable regularity. The right of \$63 in connection with the issue of \$1,000,000 new common stock follows extra cash dividend of 60% in 1915, 25% in 1914 and 25% in 1912, besides the regular 12% rate.

BOTHAMLEY CHEMICAL & EXTRACT CO.

“(1) Taken Over.—It was stated on March 15, 1917, that this company, Perth Amboy, N. J., had been acquired by a

JANUARY 1 TO APRIL 30, 1917

new company to be known as the United Dyes Corp., capitalized at \$500,000. Extensions and increased operations are planned.

B. O. T. MANUFACTURING CO.

(1) Sold to Canadian Brass Mfg. Co.—See Canadian Brass Manufacturing Co.—Item No. 1.

BOTTENFIELD TIRE CO., CLEVELAND, O.

(1) Capital Increased.—On Jan. 23, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$400,000 to \$500,000.

BOUND BROOK WOOLEN MILLS, BOUND BROOK, N. J.

(1) Capital Increased.—It was announced April 17, 1917, that this company, manufacturer of dress goods, suitings and cloakings, had increased its capital stock from \$200,000 to \$300,000.

BOWEN ROLLING BEARING CO., DETROIT, MICH.

(1) Capital Increased.—On Feb. 13, 1917, it was stated that this company had decided to increase its capital stock from \$300,000 to \$600,000.

BOWSER (S. F.) & CO.

(1) Capital Increased.—It was announced April 5, 1917, that this company had increased its capital stock from \$800,000 to \$1,250,000.

BOYNE CITY, GAYLORD & ALPENA RY.

(1) Reorganization—Bond Issue Is Planned.—It was stated Feb. 2, 1917, that tentative plans had been prepared for the reorganization of this company by the Michigan Trust Co., of Grand Rapids, Mich. The plan calls for a bond issue of \$800,000. The company has operated the road as receiver. It is planned to fill in a gap in order to give Northeastern Michigan another cross-State line and an almost direct road between Grand Rapids and Alpena.

(2) Bonds.—It was announced Feb. 16, 1917, that the tentative reorganization plan for this company calls for an \$800,000 issue of 1st mortgage 5% 20-year bonds with a first lien on the line as projected from Boyne City to Alpena, Mich., covering about 100 miles. The road runs from Boyne City to Atlanta and about 15 miles west of there; east of Alpena the road runs about 25 miles, making a nine-mile gap, which will be completed. The Michigan Trust Co., Grand Rapids, Mich., is receiver.

(2) Bonds.—It was announced Feb. 16, 1917, that the tentative reorganization plan for this company calls for an \$800,000 issue of 1st mortgage 5% 20-year bonds with a first lien on the line as projected from Boyne City to Alpena, Mich., covering about 100 miles. The road runs from Boyne City to Atlanta and about 15 miles west of there; east of Alpena the road runs about 25 miles, making a nine-mile gap, which will be completed. The Michigan Trust Co., Grand Rapids, Mich., is receiver.

BOYNTON OIL & GAS CO.

(1) Incorporated on Jan. 13, 1917, in Delaware, with a capital of \$1,000,000, to locate and develop oil and gas lands. Incorporators: John H. Mosler, Chas. Frances, R. A. Patterson, N. E. Reynolds and H. A. Wilson, all of Muskogee, Okla.

BRADEN COPPER CO.

(1) Combined Earnings, Four Months Ended Dec. 31, 1916, of this company and the Braden Copper Mines Co., shows: Gross operating revenue, \$2,711,365; net operating profit, \$1,368,241; net income, after taxes, interest and miscellaneous charges, \$1,111,298; profit and loss surplus, \$1,658,629.

(2) Report, Year Ended Dec. 31, 1916, shows the combined statement of earnings of this company and the Braden Copper Mines Co. as follows: Gross operating revenue, \$12,648,111; net operating profit, \$7,590,455; net income, after taxes, interest, miscellaneous charges, \$6,287,434.

(3) Combined Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$5,478,705.

(4) Efforts in 1916 Directed Toward Maxim Output, States Pres. Potter.—In connection with the annual report of this company, Pres. Wm. C. Potter, April 25, 1917, stated that during 1916 the efforts of the management have been directed toward obtaining the maximum

output of copper, together with the completion of plans for plant extensions to 10,000 tons per day, and the inauguration of actual construction work, which is now actively under way. During the year 51,230 feet of development work has been done in the mine, which has added very greatly to the tonnage of ore previously reported as in sight and partly developed.

Production in 1916 amounted to 42,153,270 and the average net price realized for copper during the year was 26.35 cents a pound. The average net cost was 8.03 cents a pound.

In an estimate made Nov. 17, 1916, 219,680,000 tons of ore of an average value of 2.19% copper were reported, comparing with 86,445,616 tons of an average value of 2.88% of copper as of Jan. 1, 1915.

This shows an increase in positive ore of 65,454,410 tons and a corresponding increase in copper contents of 1,213,288 tons. This is equivalent to an increase of 62.3% of the gross copper contents of the ore actually in sight in 1915.

With the exception of \$3,500 par value of the second lien collateral trust 5-year 7% convertible bonds, and \$500 par value collateral trust 10-year 6% convertible bonds of the Braden Copper Mines Co., all of these issues have been converted into stock of the company; and the remaining bonds, above mentioned, have been called for payment under the terms of their indentures and funds are on deposit with the trustees with which to redeem them.

BRADEN COPPER MINES CO.

(1) Production, December, 1916.—Announced Jan. 8, 1917, that this company in December produced 4,716,000 pounds of copper, compared with 4,419,000 in November, 4,048,000 in October and 2,970,000 in September. December, 1916, production was 3,828,000 pounds.

—Feb.

(1) Production, January, 1917.—Announced Feb. 5, 1917, that this company in January produced 4,798,000 pounds of copper, compared with 4,716,000 in December and 7,080,000 in November, 1916.

(2) Tenders Asked.—It was announced Feb. 5, 1917, that tenders are being invited by the Bankers Trust Co., New York, trustee, for sufficient 15-year 6% sinking fund gold bonds of this company to exhaust \$500,000 in the sinking fund. The tenders will be received until noon Feb. 16.

—Mar.

(1) Production, February, 1917.—Announced March 6, 1917, that this company in February produced 3,450,000 lbs. of copper, compared with 4,798,000 in January, 1917, and 2,842,000 in February, 1916.

—Apr.

(1) Production, March, 1917.—Announced April 8, 1917, that this company in March produced 5,942,000 pounds of copper, compared with 3,450,000 in February and 4,798,000 in January, 1917.

(2) Earnings, Four Months Ended Dec. 31, 1916.—See Braden Copper Co.—Item No. 1.

(3) Report, Year Ended Dec. 31, 1916.—See Braden Copper Co.—Item No. 2.

(4) Combined Balance Sheet, as of Dec. 31, 1916.—See Braden Copper Co.—Item No. 3.

BRADLEY LUMBER CO.

(1) Capital Increased.—Announced Jan. 24, 1917, that this company, Warren, Ark., had increased its capital stock from \$50,000 to \$400,000.

BRADLEY RUG CO.

(1) Stock Increased.—It was announced March 1, 1917, that this company, which is building an addition to its plant, had increased its stock from 250 to 500 shares (par value \$100). The company's authorized capital also includes 1,000 common shares of \$10 par value.

BRAINARD & ARMSTRONG CO.

(1) Addition.—It was announced at New London, Conn., Jan. 9, 1917, that this company had prepared plans for the erection of an addition, 180 feet long, to its plant.

BRANCH BANK CORP.

(1) Incorporated on Jan. 25, 1917, in Delaware, with a capital of \$1,000,000, to manufacture automatic banking devices. Incorporators: Fred. S. Abraham, E. S. Carr and E. A. Biggs, all of Chicago.

BRANDRAM-HENDERSON, LTD.

(1) Initial Dividend.—Announced Dec. 28, 1916, that this company had declared an initial dividend of 3% for the year on the common stock, payable Feb. 15. The regular dividend on the pfd. was also declared. The common stock of the company amounts to \$1,250,000, of which \$970,000 is issued. The company was organized on its present basis in 1906.

(2) Report, Year Ended Nov. 30, 1916, showed net profits for the period were \$223,575, and the balance from the preceding year \$215,064, making a total of \$438,639 available for distribution. This is an actual gain of \$47,887 in profits for the year and \$56,406 in the amount available for distribution. Bond interest, dividends, reserves, etc., took \$380,174, compared with \$77,992 in the preceding year.

As compared with the net profits of \$175,689 in the preceding year, the figures compare favorably with the profits of 1914 at \$180,475, \$163,261 in 1913, and \$123,007 in 1912.

The surplus credited to profit and loss was \$349,464, compared with \$215,064 the previous year.

(3) Statement by President.—It was announced at Halifax, N. S., Jan. 25, 1917, that Pres. George Henderson, of this company, in his statement to stockholders at the annual meeting, said, in part: "Owing to competition and the adoption of different methods of manufacture, the profit on munition orders has become very small during the past few months."

"We feel, however, that owing to the equipment we have, we would desire to continue the work, if for no other reason than that of patriotic assistance in the war."

"During the year \$150,000 preferred stock remaining in the treasury was sold at a good price. H. H. Camp, Sec.-Treas. of the Steel Co. of Canada, Hamilton, was added to the board and an initial distribution of 3% on the common stock was ordered."

"The balance sheet shows \$1,712,265 of fixed assets, \$902,241 of current assets and deferred charges amounting to \$13,431, a total of \$2,628,567. The total surplus now stands at \$349,464."

BRAZILIAN TRACTION, LIGHT & POWER CO., LTD.

(1) Earnings, November and Eleven Months.—This company for November, 1916, reported total gross earnings of 6,943,000, an increase of 607,000 milreis over November, 1915, with net of 3,673,000 milreis, an increase of 233,000 milreis.

For the 11 months ended Nov. 30, gross was 75,229,000, an increase of 4,642,890 over the corresponding 11 months of 1915, with net of 41,867,000, an increase of 1,164,580 milreis.

(2) Comment on Dividend.—On Jan. 20, 1917, the "Wall Street Journal" said that the action of this company's directors in declaring the regular quarterly dividend of 1% on the common stock, payable March 1, came as a pleasant surprise to some of the stockholders who had thought no dividends would be paid for the year. Men acquainted with the affairs of the company believe that the present declaration assures the continuance of the stock on a 4% basis for 1917.

It was not any falling off in revenues with Brazilian Traction, Light & Power that caused the permanency of the dividend to be questioned, but that of the

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

rate of Brazilian exchange. Measured in milreis, the growth of earnings with the company has been large. If the rate of exchange were normal, there would be no difficulty in paying 6% on the common stock.

—Feb.

*(1) **Earnings, December and 12 Months.**—It was announced Feb. 14, 1917, that this company for December reported gross of 7,082,000 milreis, an increase of 555,000 milreis, with net of 3,833,000 milreis, a gain of 751,000 milreis, and the largest net gain of any month in the year.

For the 12 months ended Dec. 31, gross was 82,231,000 milreis, an increase of 5,197,890 milreis, with net of 45,730,000 milreis, a gain of 1,615,580 milreis over 1915.

—Mar.

*(1) **Earnings, January, 1917.**—It was stated March 15, 1917, that this company for January reported gross of 7,266,000 milreis, with net of 4,002,000 milreis, an increase of 161,000 milreis over January, 1916. The gross for January was larger than in any one month of 1916 and net was larger than in any but two months of 1916.

—Apr.

*(1) **Dividend on Common Passed.**—The directors of this company on April 20, 1917, passed the dividend which ordinarily would have been paid on the common stock June 1. The issue had been on a 4% per annum basis.

*(2) **Dividend Passed for a Year—Forecast of 1916 Earnings.**—On April 21, 1917, the "Globe," Toronto, Ont., said that in a circular issued by this company explaining the passing of the dividend on the common stock, it was stated that the gross earnings in the year 1916 exceeded those of the previous year by 7,823,000 milreis, and that the net earnings increased by 2,367,000 milreis. The circular does not give any of the actual results of the 1916 year, except an estimate that the net revenue of the company for the year after the payment of all fixed charges and expenses was \$3,654,000, or \$250,000 in excess of the net revenue for the year previous.

The pfd. dividend of the company requires \$600,000 and the common dividend on the 4% basis, \$4,250,000, so that without depreciation allowances, the company would have a balance of only \$600,000. There is in this fair argument in favor of the action of the directors in passing the dividend.

It is estimated that in the current year \$1,700,000 will be required for extensions and improvements.

The directors expect that the financial position of the company will be entirely retrieved in the course of one year. The floating indebtedness of the company and its subsidiaries, including the amount owing in respect of interest coupons and dividend warrants due but not presented for payment since the outbreak of the war, amounted to \$4,850,000 on March 31.

BRENNENS, LTD.

*(1) **Incorporated on March 21, 1917,** in Canada, with a capital of \$600,000 divided into 60,000 shares of \$10 each, to carry on a lumber business. Incorporators: Jas. Steller Lovell, Chas. Magee, Wm. Bain, Robert Gowans and John J. Dashwood. Chief place of business, Hamilton, Ont.

BREVOORT REAL ESTATE CO., MANHATTAN, N. Y.

*(1) **Capital Reduced.**—On April 18, 1917, the company filed notice at Albany, N. Y., of a reduction in capital stock from \$500,000 to \$100,000.

BREWER (C.) & CO., LTD.

*(1) **Increased Dividend.**—On Jan. 24, 1917, directors of this company announced that a monthly dividend of 2% would be paid for the quarter ending March 31, 1917. The regular rate had been 1½%. This makes the dividend for the period \$60,000 a month, a total of \$180,000 for the quarter.

BRIDGEPORT BRASS CO., BRIDGEPORT, CONN.

*(1) **Proposed Stock Increase.**—It was announced April 5, 1917, that this company planned to increase its capital stock from \$2,000,000 to \$5,000,000.

BRIER HILL STEEL CO.

*(1) **Liquidation of Acquired Property.**—See Western Reserve Steel Co.—Item No. 1.

*(2) **Stockholders' Meeting, Jan. 23.**—Announced Jan. 8, 1917, that stockholders of this company will meet Jan. 23 for the purpose of considering the declaration of a dividend.

*(3) **No Stock Dividend.**—It was stated Jan. 24, 1917, that at the annual meeting of this company announcement was made that no stock dividend would be declared. J. B. Kennedy was chosen to succeed E. L. Ford as a director. It was stated that the company would continue the usual 6% dividends, with extra payments from time to time.

The report of the company showed a net surplus of \$8,000,000 as of Dec. 31. Earnings in 1916 aggregated \$10,000,000.

*(4) **Net Surplus of \$8,000,000 for 1916.**—It was stated Jan. 26, 1917, that a net surplus of \$8,000,000 at close of 1916 was reported at the annual meeting of this company, after generous depreciation and maintenance allowances and two funds approximating \$2,500,000 had been created.

In one fund was placed an amount equal to dividend requirements of \$12,000,000 common and \$5,000,000 pfd. for one year and in another approximately \$1,000,000 to write off any loss from depreciation in raw materials due to sudden termination of the war.

Earnings in 1916 were about \$10,000,000.

Indications are that 1917 net will materially exceed this. Funds have been provided for retirement of \$2,051,000 bonds Feb. 1. These were to have run 10 years, but will have been out but two.

The corporation has bought a large acreage for housing employees.

—Feb.

*(1) **Extra Dividend on Common.**—Announced Feb. 16, 1917, that this company had declared the regular quarterly dividend of 1½% on the pfd. and 1¼% on the common; also an extra of 2% on the common; all payable April 1 to stock of record March 20.

—Mar.

*(1) **New Furnace Completed.**—It was announced March 22, 1917, that this company's No. 12 open-hearth furnace, Youngstown, O., had been completed, giving the company a total of twelve 100-ton open-hearth furnaces with an annual capacity of approximately 650,000 tons of ingots.

*(2) **New Plant Nearing Completion.**—It was stated late in March, 1917, that this company expected to put in operation about April 15 its new plant of 84 Koppers by-product coke ovens. The plant will make coke for the company's Grace and Tod blast furnaces.

—Apr.

*(1) **New Office Building.**—On April 12, 1917, this company announced at Youngstown, O., that it would erect a plant office building of four stories at an estimated cost of \$250,000. The city and plant offices will be consolidated in the new structure.

*(2) **New By-Product Plant Started.**—A Youngstown, O., dispatch April 14, 1917, stated that this company had started operation of its 84-oven by-product coke plant. The plant has a rated capacity of 850 tons for 24 hours, when working on a 16-hour coking basis. It will supply the two blast furnaces of the corporation there. A benzol plant of capacity sufficient to handle the by-products of the coke plant will be in operation about May 1.

*(3) **Extra Dividend on Common.**—This company April 16, 1917, declared the regular quarterly dividend of 1¼% and an extra dividend of 5% on its

common stock, also the regular quarterly dividend of 1½% on the pfd. stock, all payable July 1, 1917, to stock of record June 20.

BRIGHTON BEACH CO.

*(1) **Incorporated in January, 1917,** in California, with a capital of \$500,000. Directors: Ernest Pickering, H. H. Strong, K. A. Stone, William L. Connor and Clement D. Nye.

—Apr.

*(1) **Sale of 50,000 Shares Authorized.**—California Commissioner of Corporations H. L. Carnahan April 19, 1917, granted a permit to this company to sell 50,000 shares at 25 cents per share, the proceeds to be used for levelling and improving lands at Brighton Beach leased from the Los Angeles Harbor Commissioners for resort purposes.

The permit provides that subscriptions shall be taken contingent upon the sale of 32,000 shares on or before July 1. The lease is to be assigned to the company, present holders to receive 1,000 shares, and thereafter one share for each share sold for money in consideration of the transfer.

BRIGHTON MILLS, PASSAIC, N. J.

*(1) **Capital Increased.**—On Feb. 9, 1917, the company filed notice at Trenton, N. J., of an increase in capital stock from \$3,000,000 to \$4,500,000.

BRIGHTWOOD MANUFACTURING CO., NORTH ANDOVER, MASS.

*(1) **Capital Increased.**—In December, 1916, this company filed notice of an increase in capital stock from \$300,000 to \$500,000.

BRILL (J. G.) CO.

*(1) **Report, Year Ended Dec. 31, 1916,** shows a profit of \$93,257, a decrease of \$23,069, compared with the same period of 1915.

*(2) **Income Account, Year Ended Dec. 31, 1916,** compares as follows:

	1916	1915
Gross sales	\$6,180,895	\$4,403,116
Profit	93,257	280,299
Surp. after depreciation	93,257	116,326

*(3) **Earnings on Stock.**—It was stated Feb. 15, 1917, that this company's 1916 net profit of \$93,257 is equal to 2.0% earned on the \$4,580,000 pfd. stock, compared with 2.5% in 1915.

*(4) **Balance Sheet, as of Dec. 31, 1916,** shows a profit and loss surplus of \$1,146,193, compared with \$1,247,981 Dec. 31, 1915.

—Mar.

*(1) **Order Before Montreal Board of Control.**—See Montreal Tramways Co.—Item No. 1.

BRISCOE-HAMILTON OIL CO.

*(1) **Incorporated in April, 1917,** in Oklahoma, with a capital of \$250,000. Incorporators: G. N. Nance and T. C. Hamilton, Blackwell, and Leslie Scott, Atlanta, Kans.

BRISCOE MOTOR CAR CO.

*(1) **Order.**—It was announced March 9, 1917, that this company had placed an order with the All Season Body Co. for 5,000 bodies.

BRISTOL BRASS CO.

*(1) **Expansion.**—It was announced Feb. 9, 1917, that this company, Bristol, Conn., had completed plans for erecting two more factory buildings and 70 more houses for its employees.

BRITISH AMERICAN COPPER MINING & SMELTING CORP., SEATTLE, WASH.

*(1) **Incorporated on Feb. 21, 1917,** in Washington, with a capital of \$2,000,000. Incorporators: Arthur Bernstein, Adam Beeler, John J. Sullivan and E. M. Kennard.

BRITISH-AMERICAN OIL CO.

*(1) **Merger.**—See Wichita Independent Consolidated Oil & Refining Co.—Item No. 1.

JANUARY 1 TO APRIL 30, 1917

● **BRITISH-AMERICAN TOBACCO CO., LTD.**

¹(1) Report, Year Ended Sept. 30, 1916, shows: 1916 1915
Net profits— £2,733,362 £1,850,059
Surp. aft. divs.— 944,782 217,837

¹(2) Balance Sheet, as of Sept. 30, 1916, shows a profit and loss surplus of £2,092,938, compared with \$1,617,231 Sept. 30, 1915.

¹(3) Earnings on Stock.—It was stated Jan. 4, 1916, that this company's balance of £2,508,362, after pfd. dividends, Sept. 30, 1916, was equal to 30.51% on £6,254,320 ordinary stock, against 25.98% on the same stock the previous year.

¹(4) Statement About Bonus.—On Jan. 11, 1917, it was stated that Sec. A. B. Sturges, of the New York Curb Market Association, had sent out the following notice: "Shareholders at annual meeting of British-American Tobacco Co., held Jan. 11, passed a resolution adopting and amending the recommendation of the directors whereby the proposal to distribute certain ordinary shares of Imperial Tobacco Co. of Canada, Ltd., as a bonus to ordinary shareholders of British-American Tobacco Co., Ltd., was withdrawn.

"Holders of share warrants to bearer should therefore retain Coupon No. 61, and not deposit it with the company until further notice."

In explanation of the above notice the following may be quoted: "Since the issue of the report and the balance sheet, directors have had certain difficulties brought to their attention and have had advice of counsel thereon, and that they consider it would be inadvisable to distribute this bonus without alternation of existing articles of the association.

"It will, accordingly, be necessary to submit the matter to further meetings of the shareholders at which proposed alteration of the articles will be brought forward.

"We hope the delay thus entailed will merely delay the transfer of shares for a few weeks more and that that there will not be any disappointment in consequence."

—Feb. . . .

¹(1) Interim Dividend.—Announced Feb. 19, 1917, that this company had declared an interim dividend of 6%, free of tax. It is payable March 31.

¹(2) Comment on Dividends.—On Feb. 26, 1917, the "Wall Street Journal" said that the dividend of 6% declared on the ordinary shares of this company compared with 2½% declared in the same period a year previously.

The fiscal year of the British-American Co. closes Sept. 30. Sales during the first three months of the current fiscal year, or from Oct. 1, 1916, to Jan. 1, 1917, increased 25% over the corresponding period in the previous year.

This company is the largest individual manufacturer of tobacco products in the world. Its sales of cigarettes in 1916 amounted to at least 30,000,000,000 cigarettes, or at least 5,000,000,000 more than the entire output of the United States.

For the year ended Sept. 30, 1916, net earnings of the British-American Co., after deducting all charges, expenses for management and providing for income tax, amounted to £2,733,361, as compared with £1,850,059 in 1915.

Including the final dividend of 5%, dividends paid in the 1916 fiscal year amounted to 30%, as against 22½% for the year ended Sept. 30, 1915. Judging from the interim dividend of 6% just declared, dividends in 1917, despite the heavy war tax and other increased expenses, will be substantially more than the record total of 1916.

The British-American Co. has more than 50,000 employees. Over 80% of the employees in England now are women. Three years previously the payroll of the company did not include over 25,000 employees.

—Mar. . . .

¹(1) Letter About Stock Distribution.—On Feb. 16, 1917, the following letter was sent out from the London office of this company relating to the proposed distribution of shares of the Imperial Tobacco Co. of Canada, Ltd.:

"You will remember that in their annual report the directors said that the earnings justified a larger final dividend, but rather than pay the whole amount in cash the directors, with a view to conserving the liquid resources, recommended out of the holding of the company of the ordinary shares of Imperial Tobacco Co. of Canada, Ltd., a bonus distribution of one ordinary share of \$5 of the Canadian Co. in respect of every four ordinary shares of the company. In consequence, however, of a difficulty which subsequently arose, the proposal was withdrawn at the annual meeting on the 11th ultimo pending submission of proposed new Articles of Association for consideration at meetings to be called.

"Preparation of the new articles was being proceeded with when on the 24th ultimo an order in council was issued which had the effect of preventing the distribution of any shares of a company incorporated abroad (as the Imperial Tobacco Co. of Canada is) to any shareholders outside the United Kingdom or the sending of any certificates or transfers of any shares outside the country.

"Before taking any further steps to amend the Articles of Association, as indicated at the annual meeting, the directors therefore thought it well to approach the treasury on the question of the distribution, and to ask whether permission would be granted, and a reply has been received saying that the distribution would not be permissible without the consent of the Lords Commissioners of His Majesty's Treasury, and that they are not at the present moment in a position to say whether the shares in question are likely to be required by them under the Defence of the Realm Securities Regulations, and they fear, therefore, that they would not be justified in giving the licenses necessary to enable the company to effect the proposed distribution at the present time. Should the company, however, desire to make the distribution at a later date, they will give the matter renewed consideration if a further application is made to them in say three months' time.

"The directors, therefore, regret to say that they are at present unable to take any further steps with regard to the proposed distribution, and they would like to point out that as the Order in Council was issued on the 24th ultimo and the bonus distribution would not, in any event, have been made until the 31st ultimo, it could not have taken place, even if it had been approved of at the annual meeting, without the consent of the Treasury."

● **BRITISH CATTLE SUPPLY CO., LTD.**

¹(1) Incorporated on Feb. 12, 1917, in Canada, with a capital of \$2,500,000, divided into 25,000 shares of \$100 each, to deal in live stock and live stock products. Incorporators: Chas. Henry Mayhew, Thomas Edward Good, Samuel Hisey, Harry Talbot, Robert Henry McElroy, Chas. Robert McKeown and Nelson Monteth. Chief place of business, Toronto, Ont.

—Apr. . . .

¹(1) Capital Increased.—On April 12, 1917, notice was issued by the Secretary of State of Canada of an increase in capital stock of this company from \$2,500,000 to \$5,000,000. The increase consists of 25,000 shares of \$100 each.

● **BRITISH COLUMBIA COPPER CO.**

¹(1) Extensions.—It was stated at Princeton, B. C., Jan. 3, 1917, the construction of a 2,000-ton daily capacity mill and a 13-mile railway to connect the concentrator with the mines at Copper Mountain is contemplated by

this company, a subsidiary of the Canada Copper Corp., which owns and is operating the smelter at Greenwood. The betterments will cost approximately \$2,000,000. A 50-ton experimental plant has been installed to work out the treatment processes. A pumping station has been built on the Similkameen River to provide water for the test mill, which is 6,000 feet distant and 1,700 feet higher.

Approximately 11,000,000 tons of low-grade ore have been developed in a new porphyry property at Copper Mountain, according to an official report. The deposit averages 1.75% copper and about 20 cents in recoverable gold and silver values. It is estimated that a saving of 80% will be effected by the new mill. The 2,000-foot tunnel being driven has been advanced 1,400 feet since July 1.

The Copper Farm ore body was cut 1,000 feet in the Vancouver vein at 1,300 feet, while it is believed the Sunset vein, the principal body, will be tapped at the 2,000-foot point. About 20 feet is being driven daily.

—Apr. . . .

¹(1) Experiment Mill Started.—On April 21, the "Engineering & Mining Journal" stated that a 50-ton experimental mill had been started at this company's Copper Mountain development to determine treatment plan for that ore, of which over 10,000,000 tons averaging 1.75% copper have been developed.

● **BRITISH COLUMBIA**

ELECTRIC RY., LTD.

¹(1) Report, Year Ended June 30, 1916.—Announcement was made Jan. 2, 1917, that in the report of this company for the year ended June 30, 1916, it was stated that Sir Maxwell Aitken and J. Davidson had been elected to the board and Sir William Mackenzie also will become a member. R. H. Sperling, having accepted a commission in the army, resigned from the board.

While it was necessary in the fiscal year to transfer \$350,000 from the reserve funds in order to meet the cumulative perpetual preference interest, after transferring \$1,000,000 to the provision for renewals maintenance account from revenue, there are strong indications, it is stated, for an improvement in the immediate and prospective outlook in commercial and industrial conditions in the territory served.

Traffic returns recently have shown a marked improvement, and while passenger traffic is still suffering to some extent from "jitney" competition, the officials report that earnings from freight are showing large gains, and this class of traffic promises to become a steadily increasing profitable part of the business of the company.

The net earnings for the first four months of the fiscal year made a gain of \$150,000 over the corresponding four months of 1915, and the directors express the hope that the profits for the current fiscal year will be sufficient to cover the debenture interest and also the dividend on the cumulative preference stock, without having further to trespass on the reserve funds.

● **BRITISH BUTTE COPPER & ZINC MINING CO.**

¹(1) New Name.—See Meadow Lake Mining Co., of Boston, Mass.—Item No. 1.

● **BROADWAY CENTRAL BANK, NEW YORK.**

¹(1) New Director.—Announced Jan. 10, 1917, that at the annual meeting of stockholders Charles B. Toole was elected a director to succeed H. W. Armstrong, Jr., resigned. Francis Crave, formerly cashier, was elected Vice-Pres. and cashier.

BRODFELT MILLS.

• (1) Sold to Boubaix Mills.—See Boubaix Mills.—Item No. 1.

BROME LAKE ELECTRIC CO.

• (1) Taken Over.—See Southern Canada Power Co., Ltd.—Item No. 1.

BROMPTON PULP & PAPER CO., LTD.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

• (1) Initial and Extra Dividends on Common.—Announced at Montreal, Que., Jan. 22, 1917, that this company had declared an initial quarterly dividend of 1% and an extra of $\frac{1}{4}$ of 1% on its common stock, payable Feb. 7 to stock of record Jan. 31.

• (2) Financial Statement, as of Jan. 15, 1917, shows accounts and bills payable, including war tax, of \$220,346; cash on hand and accounts receivable, \$1,044,000.

The earnings for the 2½ months ended Jan. 15, 1917, over and above fixed charges, and pfd. stock dividends, are approximately \$335,867.

—Mar.

• (1) Listed in Montreal.—Announced March 21, 1917, that the stock of this company had been listed on the Montreal Stock Exchange. The company has a total authorized capital of \$2,000,000, of which \$2,000,000 is pfd. and \$7,000,000 common. Ahead of this stock is an issue of \$2,000,000 bonds.

—Apr.

• (1) Plants Running at Capacity.—The "Financial Post of Canada" April 21, 1917, stated that this company's treasury contained a sum far in excess of \$500,000, and that the plants of the company are running to their full capacity. The production of newsprint is not a large factor in the total output of the company. Consequently the edict of the Minister of Finance, to the effect that paper shall be sold to the Canadian publishers for 2½ cents a pound does not materially affect the company's earnings, which come from a very diversified output.

BROOKLYN ASH REMOVAL CO., INC., BROOKLYN, N. Y.

• (1) Capital Increased.—On March 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$319,500.

BROOKLYN BOROUGH GAS CO.

• (1) Dividend Passed.—Announced Jan. 23, 1917, that the regular semi-annual dividend of this company, due Jan. 20, had been passed.

BROOKLYN CITY R. R.

• (1) Notice to Stockholders.—It was stated Jan. 15, 1917, that stockholders of this company had been advised by official notice from Pres. Frank Lyman that the directors of the company expect to resume payment of the full 10% dividend per annum on July 15, instead of Oct. 15, as previously announced.

The statement says: "Since the completion of the payment of the current obligations of the company on account of the settlement of the suit on Oct. 23, 1913, the books show we now have \$168,000 in current cash and invested in real estate mortgages and securities. Your directors feel there should be a substantial increase in said amount of \$168,000 by adding thereto \$60,000 on April 1 from the quarterly rent of \$300,000 to be received on said date from the lessee, so as to bring the amount up to and over \$228,000 before resuming the payment of 10% dividends."

—Feb.

• (1) Dividend Rate.—On Feb. 10, 1917, the "Wall Street Journal" said that the strength in this company's stock was due to the official announcement that in July, 1917, the rate would be restored to the 10% basis, instead of in October, as had been previously planned.

Brooklyn City's dividend is guaranteed by Brooklyn Rapid Transit. In July, 1910, the rate was lowered from 10% to 8% to provide for the setting aside of a reserve fund for protection in the litigation by the Brooklyn Heights R. R., lessee, against the company.

This suit was compromised on Oct. 23, 1913, and under the terms of the compromise, the Brooklyn City had to pay \$900,000 cash, and \$750,000 in deferred payments of \$50,000 quarterly. The last payment was made Oct. 1, 1916.

• BROOKLYN RAPID TRANSIT CO.

• (1) December Gross Receipts Show Gain.—It was stated Jan. 5, 1917, that gross receipts of this company for December produced a comparative gain of \$138,700, or 6.3%. Average daily gain was better than \$4,470.

Brooklyn Rapid Transit had a most satisfactory year from the standpoint of gross earnings. During the six months to Dec. 31 traffic receipts increased \$754,000 and gain from other sources brought the total increase up to about \$770,000. This is a rate of slightly under \$130,000 per month and would seem to promise added income during the fiscal year to June 30, 1917, of about \$1,500,000, a figure which would compare with an increase of \$1,521,000 during the 1915-16 fiscal 12 months.

• (2) Status.—It was stated Jan. 23, 1917, that this company's surplus after charges for the six months ending December, 1916, although smaller than previously, provided for the proportion of dividend requirements with a balance to spare of \$522,025.

Action on the B. R. T. dividend is taken in the latter part of February and interests connected with the company say that no reduction in the 6% rate is contemplated.

January gross earnings are running better than 7½% ahead of a year previously and comparison of net earnings for the second six months of the current fiscal year should show improvement over that for the six months ending December.

Taxes, wage increases and additional interest charges on account of additional rapid transit lines placed in operation were directly responsible for the decline in surplus in the first half of the current fiscal year. Certain of the wage advances were made Jan. 1 a year previously, so that the showing in the current six months period in the matter of wage costs will not reflect such increases as in the last six months.

In the year to end June 30, 1917, if gross revenues continue according to present indications, B. R. T. should earn its \$4,487,318 dividend requirements, with a safe balance to spare.

The current fiscal year, on account of the fact that the earliest rapid transit additions to be put in operation have been the unproductive ones, represents, in the minds of the officials, the worst year that the company will have to face in its expansion program.

In the Fall of 1917 the Broadway, Manhattan, subway of the B. R. T. system will be placed in operation, and substantial earnings will result from this line. The company furnishes only the equipment on this subway, and interest requirements, therefore, will not be large.

Other units coming into operation henceforth will represent substantial additions to B. R. T.'s net earning power, so that officials will feel satisfied if 1917 will show dividend requirements covered, with \$500,000 to spare.

In the year ended June 30, 1916, the B. R. T. earned its 6% dividend, with approximately \$1,100,000 to spare.

• (3) Directors Re-elected.—It was announced Jan. 26, 1917, that at the annual meeting of stockholders of this company retiring directors were re-elected. The number of stockholders at the date of the meeting was 9,169, compared with 8,797 at the time of the annual meeting in 1916. The average holding is about 81 shares.

• (4) Report, Six Months Ended Dec. 31, 1916, shows:

	1916	1915
Gross	\$14,880,689	\$14,048,444
Net after taxes.	5,568,763	5,713,300
Surp. after chgs.	2,755,684	3,241,533

• (5) Statement by President.—On Jan. 26, 1917, it was announced that Pres. T. S. Williams, of this company, in a statement to stockholders about operations for the six months ended Dec. 31, 1916, said, in part, as follows:

"The surplus income for the system during these six months, after deducting taxes and interest, was \$2,755,684, a falling off of \$585,849 over the surplus income of the corresponding six months of 1915. In other words, although gross revenues during the period increased \$832,224, the net result was \$585,849 less income available for dividends. This showing is due to the largely increased amounts charged to taxes and interest—taxes showing an increase of \$391,206 (45.72%), and interest showing a net increase of \$441,312.

"Notwithstanding these additional burdens, the system's net income available for dividends was over \$500,000 in excess of the dividend requirements, at the rate of 6% per annum, for this period.

"It is reasonable to suppose that the operations for the remaining six months of the fiscal year will make a better relative showing. Part of the increase in wages became effective on Jan. 1, 1916, and appeared in last year's figures. Part of the increased taxes began to be absorbed in March of last year.

"Additional interest charges (substantially at the present rate) became effective in January a year ago, and are not likely to be materially increased during the current six months.

"If the passenger earnings continue to increase therefore at the present rate the system ought to show for the final six months of this fiscal year as good results, if not better, than those for the same period of 1916.

"The increase in our interest charge is due to new rapid transit properties placed in operation under our recent contracts with the city."

—Feb.

• (1) January Income of this company, it was stated Feb. 5, 1917, produced a gain of about \$5,700 per day, or a total of \$177,000 for the month. This compares with an increase of \$138,000 in December and an average monthly increase for the six months to Dec. 31, 1916, of \$139,000.

• (2) Dividend Discussion.—On Feb. 6, 1917, the "Wall Street Journal" said that the Brooklyn Rapid Transit 6% dividend question had been in the limelight for the preceding two weeks. The stock after seasoning out as a 6% issue seemed suddenly to have fallen into public distrust.

JANUARY 1 TO APRIL 30, 1917

Those who have studied the effect of the new subway situation on the company's net income are confident that 1917 and 1918 will see the drop in net due to the subway and rapid transit development. But they are confident that the 6% dividend rate can be continued. After 1918 earnings should begin to climb very rapidly.

Brooklyn Rapid Transit stock sold as low as 65%, the lowest level since 1908. The present 6% dividend rate was established in July, 1913. The company paid dividends at the rate of 5% from May, 1910, to that date. Quarterly dividends of 1% were paid from April, 1909, to May, 1910.

⁽³⁾ Dividend Rate.—See Brooklyn City R. R.—Item No. 1.

—Mar.

⁽¹⁾ Earnings Discussion.—On March 2, 1917, the "Boston News Bureau" said: "There has within the past few weeks been most substantial buying of Brooklyn Rapid Transit shares by interests who, after study of the situation, are reasonably confident that the 6% dividend can be continued. It is felt that the dip in net profits during the six months to Dec. 31 represents the greatest shrinkage in share balance that the company will experience and that from now forward there will be a slow but persistent upward swing in the balance for dividends. In the Dec. 31 six months net earnings decreased \$585,000, or more than 17% from the same period of the previous year."

"Brooklyn Rapid Transit gross has been rendering good account of itself, but increased wages, taxes and interest have eaten into net earnings."

"February income has been doing well. It is expected that this month will add \$125,000 of new gross."

—Apr.

⁽¹⁾ March Gross Shows Gain.—It was reported April 3, 1917, that March gross income of this company made a gain of \$150,000. This compares with an increase of \$125,000 in February and \$177,000 in January.

It establishes the gain for the March quarter at the rate of \$150,000 per month, against an average of \$139,000 monthly during the six months to Dec. 31, 1916.

⁽²⁾ Gain in Earnings.—Reported on April 9, 1917, that actual figures for this company in March showed a gain in gross of \$160,800 or slightly better than 7%. The average monthly increase in gross receipts for the March quarter was slightly above \$150,000. In the nine months of this fiscal year Brooklyn Rapid Transit has added about \$1,200,000 to its gross, a gain of about 5.8%.

⁽³⁾ Operating Results, Nine Months Ended March 31, 1917, compare as follows:

	1917	1916
Gross revenue	\$21,878,135	\$20,606,405
Net after taxes	7,467,427	7,005,978
Surp. after chgs.	3,572,090	4,172,448

BROUGH OIL & GAS CO., MARION, O.

⁽¹⁾ Incorporated in February, 1917, in Ohio, with a capital of \$400,000. Incorporators: W. Brough Brown, James B. Guthery, W. Hoiverson, J. H. Wetmore and Fred E. Guthery.

BROWN-LIFE-CHAPIN CO.

⁽¹⁾ Production.—It was announced Feb. 1, 1917, that this company is producing differential gears for automobiles at the rate of nearly 2,000 sets a day. Options for the purchase of the company secured by the United Motors Corp. are still in effect, but it is said to be uncertain when Alfred P. Sloan, Jr., and his associates will exercise the options.

BROWN TRANSIT CO., MENTOR, O.

⁽¹⁾ Incorporated on Jan. 3, 1917, in Ohio, with a capital of \$335,000. Incorporators: Harvey H. Brown, Chas. T. Pratt, Geo. W. Nichols, Wm. Wisner White and N. B. Snavely.

BROWNWALL GAS ENGINE CO.

⁽¹⁾ Dividend.—Announced Jan. 20, 1917, that this company, Holland, Mich., had declared a cash dividend of 10%. Plans to double the company's capacity were approved at the meeting.

BRUNNER MOND CO., AMHERSTBURG, ONT.

⁽¹⁾ New Plant.—It was announced March 22, 1917, that this company had plans prepared for a plant for the manufacture of alkali products to cost \$300,000. Gordon S. Rutherford is manager.

BRUNSWICK-BALKE- COLLENDER CO.

⁽¹⁾ Report, Year Ended Dec. 31, 1916, shows net earnings, after all deductions, of \$1,165,400. During the year dividends amounting to \$619,674 were paid. The surplus amounts to \$545,735.

BRYANT PAPER CO.

⁽¹⁾ Stock Dividend.—Announced Jan. 18, 1917, that this company had declared a stock dividend of 50%. In 1915 1% monthly and extras in July and December were paid, making a total of 20% for the 12 months.

The company has a capital of \$3,300,000, of which \$300,000 is 6% cumulative pfd.

BUCHAN COAL TIMER & MINERAL CORP.

⁽¹⁾ Incorporated March 2, 1917, in Delaware, with a capital stock of \$1,000,000, to purchase and develop 277,000 acres of land in West Virginia for minerals and oils. Incorporators: F. D. Buck, George W. Dillman and M. L. Harty, Wilmington, Del.

BUCHANAN ELECTRIC STEEL CO.

⁽¹⁾ Merger.—See Clark Equipment Co.—Item No. 1.

—Feb.

⁽¹⁾ Taken Over.—See Clark Equipment Co.—Item No. 1.

BUCKEYE HYDRO-ELECTRIC CO.

⁽¹⁾ Condemnation Proceedings.—It was announced at Athens, O., Jan. 5, 1917, that this company had filed condemnation proceedings in Athens County to secure 4,200 acres of farming land below the 700-foot level along Shade River, in Lodi and Carthage Townships.

It was stated that the company was ready to begin operations as soon as the land to be inundated by dams from which electric power is to be secured can be obtained.

BUCKEYE MINES CO., INC.

⁽¹⁾ Incorporated on March 6, 1917, in Delaware, with a capital of \$1,000,000, to do a general mining business in all its branches. Incorporators: Arthur W. Britton, Harry B. Davis and Samuel B. Howard, all of New York.

• BUCKEYE PIPE LINE CO.

⁽¹⁾ Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net income	\$2,082,068	\$1,523,801
Surp. after divs.	482,068	776,199

†Deficit.

⁽²⁾ Earnings on Stock.—It was stated Feb. 3, 1917, that this company's 1916 net income of \$2,082,068 is equal to 20.28% on \$10,000,000 capital stock, as compared with 15.23% earned in 1915.

⁽³⁾ Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$9,430,910, compared with \$8,948,842 Dec. 31, 1915.

BUCKEYE PORTLAND CEMENT CO., BELLEFONTAINE, O.

⁽¹⁾ Capital Reduced.—On March 2, 1917, the company filed notice at Columbus, O., of a reduction in capital stock from \$250,000 to \$25,000.

BUCYRUS CO.

⁽¹⁾ New Director.—Announced March 7, 1917, that at the annual meeting of stockholders of this company Andrew

Fletcher, Pres. of the American Locomotive Co., had been elected a director to succeed G. W. McGrath.

⁽²⁾ Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net earnings	\$312,589	\$159,760
Surp. aft. divs.	232,589	159,760

⁽³⁾ Earnings on Stock.—It was stated March 19, 1917, that this company's 1916 net earnings of \$312,589, after deducting operating expenses, taxes, depreciation, etc., are equal to 7.8% of the \$4,000,000 pfd. stock.

BUDD (ED. G.) MANUFACTURING CO., PHILADELPHIA.

⁽¹⁾ Bond Offering.—It was announced March 19, 1917, that Brown Bros. & Co., Philadelphia, are offering at 100 and interest, to net 6%, the unsold balance of an issue of \$1,000,000 first mortgage 6% serial gold bonds, maturing \$67,000 annually from Aug. 1, 1917, to Aug. 1, 1928, inclusive, and \$66,000 from Aug. 1, 1927, to Aug. 1, 1931, inclusive.

BUFFALO, ATTICA & ARCADE R. R.

⁽¹⁾ Operations Discontinued.—On March 8, 1917, the Supreme Court at Wyoming county, N. Y., appointed A. Conger Goodyear receiver of the property and directed him to discontinue operation of the mortgaged property, including the line of railway from Arcade to Attica, after March 10.

BUFFALO BOLT CO., BUFFALO, N. Y.

⁽¹⁾ Capital Increased.—On April 11, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000,000 to \$3,250,000.

BUFFALO CITY GAS CO.

⁽¹⁾ Offer to Bondholders.—On March 27, 1917, it was stated that Bondholders' Protective Committee for the first mortgage 5% 50-year gold bonds of this company had received an offer of 40% in cash of the face amount of the bonds, without interest, for all bonds deposited with the committee. Offer is conditional upon its prompt acceptance by the holders of two-thirds (face amount) of the entire issue. Purchasers offer to pay expenses of the committee, so there will be no deduction from the offering price of 40%.

In advising acceptance of this offer the Protective Committee points to the fact that the net earnings of the company are showing a slight decrease, despite an increase in gross, due to rising price of coal and labor. The committee believes conditions are not likely to grow better in the near future.

BUFFALO ELECTRIC CO.

⁽¹⁾ Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross	\$3,480,941	\$2,134,180
Net	1,226,007	788,935
Surp. after chgs. and divs.	387,572	245,928

BUFFALO MINES CO., LTD.

⁽¹⁾ Operations.—It was stated Jan. 22, 1917, that in addition to the estimated 1,288,375 ozs. silver in mine, the company estimates silver in sands at 1,600,000 ozs., silver in residues at 180,000 ozs., which, with 800,000 ozs. ore and bussion on hand, brings the total up to 3,868,375 ozs.

⁽²⁾ Statement by President.—It was announced Jan. 22, 1917, that in a report to stockholders Pres. Denison, of this company, said, in part: "Since the annual report issued last May important development of new ore-bodies has been made. Ore reserves at that time were estimated at 18,000 tons of 18 ozs. silver per ton. As of Oct. 31, 1916, ore reserves are estimated at 45,705 tons, averaging 25 ozs. silver per ton, and 8,000 tons averaging 18 ozs., a total of 1,288,375 ounces."

"Computed on the present price of silver this would equal a gross value of approximately \$1,000,000. The development of this ore in the past six months has occurred in territory not heretofore considered promising."

JANUARY 1 TO APRIL 30, 1917

"The entire milling and metallurgical practice has been changed, and during the reconstruction only a small output of silver has been obtainable. Notwithstanding scarcity of labor, high cost of machinery, however, we have paid from production since the war began the cost of experiments, of plant and development work, and, considering the increased value of silver bullion we have on hand, we have probably made enough to pay two years' regular dividends of 20% a year."

Surp. after chgs.....	62,024	80,356
12 months gross.....	1,678,673	1,532,863
Net after taxes.....	397,069	292,267
Surp. after chgs.....	603,096	382,722

—Feb.

	1916	1915
² (1) Earnings—		
Dec. gross.....	\$138,492	\$175,632
Net after taxes.....	44,913	65,473

6 mos. gross.....	855,561	858,338
Net after taxes.....	223,263	240,291

²(2) Comment on December Earnings.—On Feb. 6, 1917, the "Philadelphia News Bureau" said that although earnings of this company for December showed a decrease as compared with the corresponding month of 1915, due to unfavorable operating conditions, such as car shortage, excessive snow, etc., the showing for the 12 months is again much in advance of the year previous. The rapid growth in earnings since the property was turned over to the present management on Jan. 1, 1914, is shown in the following table:

	Years Ended Dec. 31,	
	1916	1915
Gross -----	\$1,678,672	\$1,582,863
Net -----	397,068	292,267
Surplus -----	603,095	382,722

The fact that the surplus reported is larger than net is due to the large non-operating income item, which has increased from \$104,004 in 1914 to \$507,533 in 1916. This is represented principally by the revenue from bonds of coal companies, which are owned by the Buffalo & Susquehanna.

The increase in operating income is attributed by interests close to the management of the road in part to better disposition of the traffic.

—Mar.

	1917	1916
² (1) Earnings—		
January gross.....	\$139,708	\$155,775

	1917	1916
² (2) Earnings—		
February gross.....	\$121,420	\$153,704
Net.....	21,680	46,800
Surp. after chgs.....	59,057	60,649
2 months gross.....	261,128	309,479
Net.....	51,686	95,548
Surp. after chgs.....	126,376	128,317

²(3) Income Account, Year Ended Dec. 31, 1916.—The company reports for the year 1916 total income amounting to \$899,462 after deducting operating expenses, taxes, etc., an increase of \$210,719 over preceding year. Surplus, after charges, amounts to \$608,551, an increase of \$225,829 over 1915. Allowing for 4% dividends on the preferred stock, the amount applicable to the common stock is equivalent to 14.95% on \$3,000,000 common stock outstanding.

—Apr.

²(1) Statement by President.—Pres. Darlow, of this company, in his annual remarks, it was stated March 31, 1917, said, in part: "The year opened with the company handling the largest tonnage of coal and coke in its history. After the first two months a shortage of labor at the mines and ovens, with the constantly recurring demands in respect to wages and working conditions, restricted the output. A shortage of box cars and embargoes on shipments to points on other railroads also had the effect of curtailing the revenue from the transportation of freight, which, however, for the year was \$148,937 more than in the previous year.

"The expenses were augmented by higher wages, the higher costs of fuel and other materials, and the repairs made necessary by flood damages.

"Maintenance of equipment expenses were 25.30% of the operating revenues. Included in these expenses are depreciation charges at the rate of 4% per annum on the original cost of the rolling stock."

• BURNS BROS.

¹(1) **Stock Issue Discussion.**—On Jan. 31, 1917, the "Wall Street Journal" said that directors of Burns Bros. are understood to be considering a plan for an issue of new common stock which will be offered stockholders at an attractive price. Cash received for this new stock will probably be used for retiring \$1,700,000 of 7% pfd. now outstanding. Strength in the common stock is due to a belief that the rights will be valuable.

Burns Bros. earned 10.03% for its \$5,500,000 common stock in the year ended March 31, 1915, after regular dividends on the pfd. Earnings in the current year will show a very appreciable gain over the previous year, despite the fact that the volume of business is probably running not over 5% above that of a year ago.

The company has been fortunate in the 1916-17 Winter, as a result of satisfactory weather conditions.

Sales of the company at this time of the year run up as high as 325,000 tons of coal a month. In the Summer, the average probably is not over 150,000 tons. There is very little profit at a distributive rate of 150,000 tons. Those in a position to know expect the sudden advance in coal prices in the Fall of 1916 will result in the consumer buying during the Summer months.

Naturally, this distribution of orders over the twelve months of the year, instead of six, will work to the interest of Burns Bros., whose yards are now doing capacity business. Sales on the 12 months' basis should gain very appreciably.

Burns Bros., as a corporation, has but a small stock interest in the Burns Bros. Ice Co.

Despite unsatisfactory weather the new ice company has more than broken even in its first year. This is considered very satisfactory.

Labor costs of Burns Bros. are now running from 16% to 18% above those of a year previously.

—Feb.

²(1) **Doubling of Common Stock Planned.**—It was stated Jan. 31, 1917, that according to plans, the directors of Burns Bros. contemplate doubling the amount of common stock, now \$5,500,000, and offering the new shares to the present common stockholders at 35. The proceeds will be used to retire the \$1,700,000 pfd. stock at 120.

Such an operation would give the company a total stock issue of \$11,000,000, all of one class. It is stated that the company's net earnings, after adequate reserve provisions, are running at the rate of \$1,100,000 annually, equivalent to 10% upon the capital readjusted as proposed. The common stock pays 5% dividends, and it is expected that the company would continue to pay not less than that rate.

²(2) **New Stock Issue Terms.**—On Feb. 1, 1917, a representative of this company was quoted as saying that it is planned that the pfd. stock shall be called for redemption at 120, according to the terms of the issue. At the same time the holders will be offered the privilege of converting it into common stock. The common stockholders, according to the same authority, are to be given a stock dividend of 25% to 30% but this is not to be payable upon the stock issued in exchange for the preferred stock.

He stated it is the plan to pay 6% cash and 4% stock dividends upon the new stock annually and is of opinion that all holders of pfd. stock will make the exchange. Those who did not would be paid off in cash at 120.

The plan is said to result from a revaluation of the company's assets and a desire to give the stockholders the benefit of accumulated surplus.

²(3) **Special Meeting March 12.**—It was announced Feb. 13, 1917, that at a special meeting of the directors of this company it was decided to call a special meeting of stockholders on March 12 to vote on the recommendation to increase the capitalization to \$12,000,000 stock, all of one class, par \$100. The present capitalization is \$2,000,000 pfd., of which \$1,700,000 is outstanding, and \$5,500,000 common stock, all of which is outstanding.

When the stockholders have approved the increase a stock dividend of 25% will be declared to present common stockholders, and the preferred stock will be retired at \$120 a share, it was stated.

—Mar.

²(1) **Financing Plan Approved.**—It was announced March 12, 1917, that stockholders of this company had approved the financial plan under which a stock dividend of 25% is to be distributed to common stockholders.

To provide for the stock dividends and \$2,000,000 of common stock, which will be offered to shareholders to retire a like amount of preferred, the directors approved an increase in the authorized common stock from \$7,500,000 to \$12,000,000.

²(2) **Extra Dividend.**—Announced March 12, 1917, that directors of this company had declared a dividend of 1½% and an extra of 1% on the common stock.

²(3) **Stock Increase Approved by Stockholders.**—It was announced March 13, 1917, that stockholders of this company, at a special meeting, authorized an increase in the common stock from \$7,500,000 to \$12,000,000.

This is part of the plan for 25% stock dividend to common stockholders.

²(4) **Capital Increased.**—On March 21, 1917, the company filed notice at Trenton, N. J., of an increase in capital from \$7,500,000 to \$12,000,000. Of the total \$10,000,000 is common and the remainder pfd.

²(5) **Stock Dividend.**—The Board of Directors at the adjourned regular meeting held by them on March 27, 1917, set aside \$1,375,000 of common stock to be distributed as a stock dividend to the holders of the common stock of the company, pro rata in the ratio of one share of said new stock to each four shares of common stock held by the holders of common stock of record at the close of business on April 30, 1917, such stock to be distributed and delivered to the stockholders on May 12, 1917.

Scrip will be issued in place of certificates for fractions of a share. No dividend will be paid on said scrip or fractions of a share represented thereby and said scrip will not be entitled to vote until scrip aggregating whole shares has been exchanged for certificates for whole shares. Action upon the contemplated increase of the quarterly cash dividend rate and declaration of quarterly stock dividends will be taken at the regular dividend meeting April 10, 1917.

—Apr.

⁴(1) **Common Dividend Increased—Stock Dividend.**—On April 10, 1917, the directors declared the regular quarterly dividend of 1¼% on the preferred stock, payable May 1 to stock of record April 20, and a quarterly dividend of 1½% on the common stock, increasing the annual rate from 5% to 6%, payable May 31 to stock of record May 21; also a stock dividend of one share to each 100 shares of common held on May 21, to be delivered on May 31.

⁴(2) **Dividends.**—Announced April 11, 1917, that this company had declared the regular quarterly dividend of 1¼% on the pfd. stock, payable May 1 to stock of record April 20, and a quarterly dividend of 1½% on the common stock, increasing the annual rate from 5% to 6%, payable May 31 to stock of record

May 21; also a stock dividend of one share to each 100 shares of common held on May 21, to be delivered on May 31.

BURNS BROS. ICE CORP.

²(1) **New Director.**—Announced Feb. 21, 1917, that at the meeting of stockholders of this company Wm. W. Cohen was elected a director.

BURRO MOUNTAIN COPPER CO.

⁴(1) **Taken Over.**—See Phelps, Dodge & Co., Inc.—Item No. 1.

BURROUGHS ADDING MACHINE CO.

¹(1) **Stock Increase Planned.**—It was stated on Jan. 20, 1917, that stockholders of this company had approved plans to increase the stock from \$5,500,000 to \$16,500,000. The new shares are to be distributed as a dividend to stockholders of record Feb. 1 on the basis of 2 shares of new for each share of old.

• BURT (F. N.) CO., LTD.

²(1) **Capital Increase Authorized.**—Announced at Toronto, Ont., Feb. 20, 1917, that stockholders of this company, after re-electing the retiring directors, authorized the increasing of the capital stock by the issuing of 7,500 common shares with a par value of \$750,000, thus doubling the common stock of the company. The authorized pfd. stock amounts to \$2,000,000. It is stated, however, that no immediate issue of common shares will be made.

• BUSH TERMINAL CO.

¹(1) **Application to List.**—Announced Jan. 15, 1917, that the New York Stock Exchange had received application to list \$131,400 additional common stock of this company.

¹(2) **Loan.**—It was announced Jan. 25, 1917, that a building and first mortgage loan of \$800,000, at 4½% for five years, had been negotiated by the M. Morgenstau, Jr., Co., for the erection of the new Bush Terminal Co.'s exhibition building at 130-134 W. 42d St., just off Broadway, New York.

The mortgage was made by the Dime Savings Bank of Brooklyn, and is probably the largest mortgage ever made by a Brooklyn Savings bank on Manhattan property.

—Apr.**• BUSH TERMINAL CO.**

⁴(1) **Report, Year Ended Dec. 31, 1916,** shows net income of \$939,624 after deducting interest charges, taxes and operating expenses. This is an increase of \$107,213 over net income of 1915. Deducting from net income pfd. dividends, sinking fund allowance, extraordinary repairs, etc., the balance is equal to 12.3% on \$5,253,125 common stock outstanding. Common dividends amounting to \$259,302 were paid during the year.

⁴(2) **Income Account, Year Ended Dec. 31, 1916,** compares as follows:

	1916	1915
Gross earnings—	\$1,955,237	\$1,632,107
Net incl. oth. inc.	939,624	832,411
Bal. aft. chgs. & pfd. divs.—	648,200	469,872
Surp. after com. divs. & loss on securities —	370,165	172,952

⁴(3) **Earnings on Stock.**—It was stated April 2, 1917, that this company's 1916 surplus of \$648,200 is equal to 12.3% on \$5,253,125 common stock outstanding.

⁴(4) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$2,737,938, compared with \$2,729,527 Dec. 31, 1915.

BUTLER BROS.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows net earnings of \$4,443,856 after expenses and charges, an increase of \$1,785,950 over 1915. Dividends amounting to \$1,875,000 were paid, against \$1,500,000 the previous year. Surplus after all deductions amounts to \$3,969,475, as compared with \$5,821,711 in 1915.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

The following directors were elected for three years: Homer Stillwell, Walter Scott and Frank S. Cunningham.

BUTLER IRON CO., CHICAGO.

¹(1) Capital Increased.—On Jan. 8, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$50,000 to \$2,000,000.

¹(2) To Build Plant.—It was announced Jan. 17, 1917, that this new company, capital \$2,000,000, planned to build near Poplar Bluff, Mo., a blast furnace, chemical plant and a concentrating plant, in connection with the development of 10,000 acres of iron ore land. The three plants are to cost about \$680,000.

The company has offices at Chicago and Pine Bluff. Its officers are: Pres., W. W. Mechling, formerly with Carnegie Steel Co. and Ford Steel Wheel Co., of Pittsburgh; Vice-Pres., M. H. Cutter, of M. H. Cutter & Co., Chicago; Treas., H. F. Landeck, Pres. of City National Bank, Oshkosh, Wis.; Sec., J. A. Massen, of Hollen & Massen, Chicago.

The directors are these officers and C. H. Wheeler, Gary, Ind.; W. E. Orthwein, St. Louis; E. P. Sedgwick, Treas. of Chicago Hardware Foundry Co., North Chicago, Ill.; Charles E. Temple, Grand Rapids, Mich.; B. F. Baker, Treas. of Kewanee Boiler Co., Kewanee, Ill.

BUTLER MFG. CO., KANSAS CITY, MO.

¹(1) Capital Increased.—It was announced Jan. 29, 1917, that this company, manufacturer of steel barrels, etc., had increased its capital stock from \$330,000 to \$430,000.

BUTTE BULLWACKER CO.

¹(1) Initial Dividend.—On April 9, 1917, directors declared an initial dividend of 1½ cent a share, payable May 1 to stock of record April 2. The disbursement is made from royalties from the Eastside Mining Co., which is operating on the Bullwacker property under a lease.

BUTTE-DETROIT COPPER & ZINC MINING CO.

¹(1) Expansion.—It was stated Jan. 4, 1917, that this company's mill had expanded operations to three shifts. The first car of flotation concentrates is ready to ship to the Anaconda electrolytic refinery at Great Falls. It runs 40% zinc, with high silver values and some copper.

The mill has been handling 75 tons daily in an experimental way. The station on the 1,000-level of the Ophir mine has been almost completely preparatory to beginning the work of cross-cutting to the vein at this level.

¹(2) Development.—It was announced on Jan. 20, 1917, by Managing Director Creden that this company's mill is making a 97% recovery on the zinc values in the ore received from the Davis-Daily property. Work on the cross-cut on the 1,000-ft. level of the Butte-Detroit Copper & Zinc Mining Co. is being pushed so that the mill may be supplied with ores from the Ophir mine.

—Apr.

¹(1) Concentrator to Have 400-Ton Daily Capacity.—On April 14, 1917, the "Boston Evening Transcript" said: "Five hundred tons of zinc concentrates are being shipped monthly from the Ophir concentrator of this company, with the prospect of a material increase within a short time, preparations for which are under way."

"The foundation for a second tube mill has been completed, and as soon as the concrete has set the base of the mill will be placed and the additional machinery will be installed. This second tube mill will give the concentrator a capacity of 400 tons daily."

• BUTTERICK CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Profits	\$410,305	\$458,139
Surp. aft. divs.	80,743	18,723

¹(2) Earnings on Stock.—It was stated March 19, 1917, that this company's 1916 net profits of \$410,305 are equal to 2.79% on the \$14,047,200 capital stock. The net profits do not include the Ridgeway Co.

¹(3) Consolidated Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,647,923, compared with \$1,662,631 Dec. 31, 1915.

—Apr.

¹(1) Directors Re-elected.—Announced April 4, 1917, that at the annual meeting of this company retiring directors were re-elected.

BUTTERMILK FALLS ELECTRIC CO.

¹(1) Sale Planned.—See Orange & Rockland Electric Co.—Item No. 1.

BUTTERWORTH-JUDSON CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

¹(1) Directors.—It was announced Jan. 9, 1917, that at the annual meeting of this company the following directors were elected: W. A. Bradford, T. L. Chadbourne, Jr., William B. Thompson, S. B. Fleming, John J. Watson, Jr., C. E. Mitchell, Guy E. Tripp, Nelson W. Runnion, Edward Spahr and G. A. MacIntosh.

There were represented approximately 67,000 shares of stock of both classes, out of 97,000.

¹(2) Special Meeting Feb. 9.—It was announced Jan. 24, 1917, that a special meeting of this company would be held Feb. 4 to determine whether the number of directors should be reduced from 11 to 8, the number of members of Executive Committee from 5 to 3 and the office of Chairman of the Board be abolished.

—Feb.

¹(1) Directorate Reduced.—It was announced Feb. 9, 1917, that at a special meeting of this company the number of directors was reduced from eleven to eight, and the office of chairman of the board was abolished.

Membership of the executive committee was reduced from five to three following the resignations of E. M. Davis and W. V. N. Powelson.

• BUTTE & SUPERIOR MINING CO.

¹(1) Production, December, 1916.—Announced Jan. 3, 1917, that this company in December produced 15,500,000 pounds of zinc in concentrates, an increase of 342,000 pounds over November. Production of silver was 315,000 ounces, against 312,000 ounces in November. Production of lead concentrates totaled 500 tons.

¹(2) Operations Resumed.—It was announced Jan. 29, 1917, that operations by this company had been resumed. The fire in the rock shaft was confined to scorched timbers. The loss was small.

—Feb.

¹(1) Production, January, 1917.—Announced Feb. 3, 1917, that this company in January produced 13,000,000 pounds of zinc in concentrate.

¹(2) Injunction Sought.—On Feb. 3, 1917, it was announced at Butte, Mont., that the Clark Montana Realty and Elm Orlu Mining Cos. had filed petition in the Federal Court, asking permission to file a supplemental bill against this company. A hearing on the petition was set by Judge Bourquin for Feb. 10.

Injunction is asked to restrain Butte & Superior from mining on Pyle Strand pending further development work by the Elm Orlu Co.

The court is also asked to award Elm Orlu Co. judgment against Butte & Superior for value of 60,000 tons of ore taken from disputed territory during past six months. This is about 20% of total output of Butte & Superior.

The bill asserts that Elm Orlu Co. has carried on sufficient development work since decision in original suit to prove that the Pyle vein apexes entirely in Elm Orlu ground and that it is a con-

tinuous, distinct vein, from 1,100-foot level to surface. It also claims that the Pyle and the Rainbow veins below junction point on the 1,100-foot level merge into one vein and that is the Pyle and not the Rainbow.

Under the original decision of the court the Elm Orlu lays claim to all of the vein below 1,100-foot level for a distance of 300 feet. This would leave Butte & Superior between 1,200 and 1,300 feet of easterly extension of vein, or about 80% of developed ore bodies of the big vein.

Should an injunction be granted, it would result in curtailing production of Butte & Superior Co. and cut it from 50,000 tons of ore per month to 40,000 tons until such time as the new shafts are completed, equipped and running. By that time, which will be about June 1, Butte & Superior will have additional ore bodies in undisputed territory developed and ready for working, so that its output can be maintained.

In the bill of Clark interests it is stated that since trial of original bill, Elm Orlu Co. has, as speedily as work could be done, prosecuted development of Pyle Strand, and in following it downward proved that the junction of the Pyle and Rainbow veins is at the 1,200-foot level of Black Rock mine.

The bill also states that Elm Orlu Co. has broken into the stopes of the Butte & Superior Co. and that from thence downward the said vein from which the defendant has been removing ore and is removing ore is the Pyle vein.

¹(3) Operations.—A Butte, Mont., dispatch Feb. 20, 1917, stated that work had been resumed by this company on the Butte-New York property under a contract by which former secures control of it. When work stopped two years previously drifting had been done on Col. Sells's vein on 1,200-foot level. Drifting on this vein will continue, and large bodies of zinc ore that have been located will be developed as rapidly as possible. New No. 2 shaft will be in operation to 1,600 level by April 1.

No. 3 shaft of Butte & Superior is now complete down to 1,600 level with exception of 60 feet. This three-compartment shaft will be equipped with new hoist and will be ready to operate June 1.

—Mar.

¹(1) Extra Dividend.—Announced March 1, 1917, that this company had declared the regular quarterly dividend of \$1.25 and an extra of \$1.25. The regular disbursement is unchanged, but the extra dividend of \$1.25 a share is a decrease of \$3.75 a month from the \$5 extra declared in December, 1916.

¹(2) Report, Quarter Ended Dec. 31, 1916, compares with preceding quarter as follows:

	4th Quar. Ended Dec. 31, 1916	3d Quar. Ended Sept. 30, 1916
Net value zinc...	\$2,445,877	\$1,731,670
Net value lead...	396,278	190,039
Inventories	650,000	
Misc. income	22,357	14,787

Total net val.	\$3,514,512	\$1,936,527
Costs, taxes, etc.	1,205,441	948,625

Profits	\$2,309,071	\$987,901
---------	-------------	-----------

Tonnage of ore treated established a new record, being 29,340 tons greater than the previous quarter. Decrease of costs in mining and milling is accounted for by differences as between two periods in wages schedules and supply costs.

¹(3) New Treatment of Ores.—It was announced March 7, 1917, that after two months' trial of a new process, this company had solved the problem of treatment of its ores by flotation process without using more than 1% oil. This was the limit set by the Supreme Court in the Hyde cases. Immediately after decision, D. C. Jackling, managing director of the company, offered a cash prize to any one solving problem.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

The process was first put into operation in December, 1916, but at first was not satisfactory.

*(4) Operating Results, 1916.—It was stated March 9, 1917, that this company's last quarterly report for 1916 permits a compilation of the year's results. Net profits, in quarterly periods, follow:

Three Months Ended—	Av. Price Spelter
March 31, 1916.....	\$2,554,939 10.1c
June 30, 1916.....	2,032,029 11.41c
Sept. 30, 1916.....	947,901 8.34c
Dec. 31, 1916.....	2,309,068 9.75c

Total \$8,873,937 11.4c

These profits compare with previous years, as follows:

Year Ended—	Per Share
Dec. 31, 1916.....	\$8,873,937 \$30.60
Dec. 31, 1915.....	9,125,947 33.47
Dec. 31, 1914.....	1,417,128 5.21

The net returns for the quarterly period ended Dec. 31, 1916, were unduly inflated by the inclusion of an item of \$850,000 to represent readjustment of metal inventories under-estimated in three previous quarters, so that the real profits for that quarter were nearer \$1,800,000.

Roughly speaking, it may be said the company earned \$30 per share on an 11½-cent spelter market.

*(5) Production Plans, 1917.—On March 16, 1917, it was stated that this company, with the lawsuit of the Minerals Separation Co. against it for infringement of patent pending in the courts, with the Elm Orlu Co., controlled by Senator Clark, seeking to take away a part of the ore bodies to which it has laid claim and from which it has mined many hundreds of tons of ore, is making plans that will enable it to continue to operate as the greatest zinc producing mine in the world no matter what may happen.

As soon as the Supreme Court decision in the case of the Minerals Separation Co. against Hyde was made public and it was learned that a limit had been set by the court defining where infringement of patent began, Managing Director D. C. Jackling set about to find a process that would come within the limitations set by the United States Supreme Court and enable the Jackling companies to avoid paying the royalty demanded by the Minerals Separation Co.

All through December various plans were tried out. A most substantial cash prize was offered to any person who would devise a process to meet the requirements and avoid the royalty.

For two months the company has been operating with a process that comes within the requirements of the Supreme Court decision for avoiding infringement of patent.

The expense is said to be comparatively small, although it is slightly larger than under the Minerals Separation Co.'s process and the results are not quite as good.

The output for February at the Butte & Superior mill was 43,500 tons of ore, from which was made 14,000 tons of concentrates and the zinc in concentrates amounted to 13,700,000 pounds. In January ore handled amounted to 49,000 tons from which 13,000 tons of concentrates were realized and 13,000,000 pounds of zinc in concentrates produced.

With a smaller tonnage in February, the zinc production increased 700,000 pounds, showing an increase in the efficiency of the new system of handling the ores.

*(6) Operations, February, 1917.—According to a report made to the Federal Court, this company, in February, treated 43,217 tons of ore by flotation at an average cost of \$5.55 per ton, and recovered 9,881 tons of concentrates worth \$50 a ton.

*(7) Estimate of March Production.—Preliminary estimates on the March, 1917, output of this company place the zinc in concentrates at approximately 14,500,000 pounds as compared with 13,500,000 pounds in February, a gain of

1,000,000 pounds. The present rate of milling at the Black Rock concentrator indicates the recovery of 15,000 tons of concentrates with a zinc content of from 48% to 49%. The concentrate tonnage in February was 14,000. The all-over output this month is estimated at 300,000 ounces as against 280,000 ounces for the previous month.

—Apr.

*(1) Production Comment.—On April 10, 1917, the "Boston News Bureau" said that the advanced estimates on the amount of zinc in concentrates produced by this company during March were 14,400,000 pounds. The February output was 13,500,000 pounds. This increase was due largely to a better showing in the class of ore. The tonnage in February was approximately 50,000 tons; that for March 51,000 tons. From this ore there was produced 14,900 tons of concentrates as against 14,000 tons in February. The zinc content in the concentrates for March averaged close to 49%.

The production of silver during March by Butte & Superior was 300,000 ounces, as compared with 280,000 ounces in February. There was also produced 300 tons of lead concentrates. During the past week D. C. Jackling, managing director, spent two days in Butte making a thorough examination of the properties and of the operations at the mill. In speaking of the latter, Mr. Jackling said: "Since last December the Butte & Superior mill has been using the amount of oil necessary to use to meet the requirements of the Supreme Court decision in the Hyde case, and avoid infringing on the patent of the Minerals Separation Co. The results have been very satisfactory.

"The Butte & Superior Co. was the first one in the United States to use the flotation process to good commercial advantage. Since we set the pace a large number of other companies have adopted it, until now it is very generally recognized as the most satisfactory method for handling ore. Our case is to come up on April 16 in the courts here and it would not be appropriate for me to make any comments in advance or outline in any way what our defense is to be."

*(2) Court Decision Reopens Case.—See Minerals Separation Co.—Item No. 1.

*(8) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross increase.....	\$13,141,551	\$12,087,117
Net incl., other income	8,873,448	9,125,948
Def. after divs.....	616,984	14,217,833

†Surplus.

*(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$5,610,722, compared with \$6,237,965 Dec. 31, 1915.

*(5) Earned \$30.57 a Share in 1916.—This company's 1916 net income of \$8,873,448 is equivalent to \$30.57 a share earned on 290,187 shares of capital stock, compared with \$33.47 earned on 272,097 shares in 1915.

*(6) President Tells of Gain in Income Offset by Increased Expenses.—Pres. N. Bruce MacKellie, of this company, the largest producer of zinc in the United States, in the annual statement April 21, 1917, told of the increased income of the company during 1916, but showed that operating expenses had advanced \$1,300,000 over 1915. He said: The average price received at East St. Louis was 12.63 cents a pound, compared with 13.05 cents, the average of 1915. Commenting on world conditions in the zinc market, he added:

"It is interesting to note that while England imported in 1914 115,899 tons of 'spelter in plates,' the amount imported during 1916 was 53,324 tons. It is quite evident that England is building smelting capacity to treat the ores from Australia and other allied possessions that formerly went to Germany and German-owned smelters in Belgium. "Assuming that England used as much spelter in 1916 as was the case in 1914, the production in that country must have increased approximately 60,

000 tons to account for the decrease in our exports to England."

*(7) Production of 626,803 Tons During 1916 Reported by Managing Director Jackling.—Managing Director D. C. Jackling, of this company, reported that ore mined in 1916 by the Butte and Superior amounted to 626,803 tons at an average cost of \$4.50 a ton, a price \$1.14 more than the year before. Ore reserves were increased and preparations were made to do much work along this line in the current year.

*(8) Produced 14% of Smelter in United States in 1916.—With an output approximating 150,000,000 lbs. in 1916, this company in that year contributed between 13% and 14% of the country's smelter production from domestic ores, said the "Boston News Bureau," April 26, 1917. The yield from this source in the United States was about 1,127,000,000 pounds. Including the ores imported from Australia, Canada, Mexico and other foreign countries for treatment in American smelters, the yield approximated 1,335,000,000 pounds.

Although but four years an active producer, Butte & Superior has made an enviable record in the matter of dividends, having paid since June, 1914, upwards of \$15,000,000.

Butte & Superior's revenue comes from the sale of zinc and lead concentrates, the product of its own mill. During the past two years it has received back the spelter derived from shipments to smelters of the American Zinc, Lead & Smelting Co. and the United States Smelting Co. and sold this spelter direct to consumers.

BYLLESBY (H. M.) & CO.

*(1) Acquisition.—See Norman Milling & Grain Co.—Item No. 1.

BYLLESBY (H. M.) & CO.

PROPERTIES.

	1916	1915
*(1) Earnings		
Nov. gross.....	\$1,530,472	\$1,384,174
Net after taxes.....	771,530	725,080
12 mos. gross....	16,945,851	15,434,134

*(2) Increase in Business.—On Jan. 5, 1917, it was stated that the gains in new business by these properties for December continued at a satisfactory rate. The week ended Dec. 29 showed net gains of 449 customers with 324 kilowatts lighting load and 179 horsepower in motors. New business for which contracts have been secured, but which had not been connected at that date, included 719 electric customers with 229 kilowatts lighting load and 667 horsepower in motors. Electric energy output for the week was 11,043,593 kilowatt hours, an increase of 13% over the corresponding week a year ago.

Increase in manufactured gas output for the same period was 15.1%.

BY-PRODUCTS COKE CORP.

*(1) Annual Meeting Feb. 27.—Announced Jan. 25, 1917, that the annual meeting of this company would be held Feb. 27. Books close Jan. 27 and reopen Feb. 28.

—Feb.

*(1) Extra Dividend.—Announced Feb. 1, 1917, that this company had declared the regular dividend of 1¼% and an extra of 1% a share.

*(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$2,473,345	\$780,724
Net	2,219,642	607,964

After deducting dividend payments, bonus to employees, and \$462,000 written off for depreciation, there remains a surplus of \$1,636,961.

—Apr.

*(1) Extra Dividend of 1% Declared.—This company April 26, 1917, declared the regular quarterly dividend of 1¼% and an extra of 1%.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

CABARRUS COTTON MILLS.

¹(1) **Capital Increased.**—It was stated Feb. 21, 1917, that this company, Concord, N. C., had increased its capital from \$500,000 to \$2,000,000.

CABIN CREEK CONSOLIDATED COAL CO.

¹(1) **Suit Filed.**—See Cincinnati, Hamilton & Dayton Ry. Co.—Item No. 3.

CABLE CO.

¹(1) **Capital Increase—Stock Dividend Planned.**—It was announced at Chicago, Jan. 22, 1917, that this company, manufacturer of pianos, had filed notice at Springfield, Ill., of an increase in its capital stock from \$2,000,000 to \$4,000,000. The new stock, it was stated, would be issued as a dividend on the \$1,000,000 capital stock.

CADY-LAFORD EXPORT CO., INC., MANHATTAN, N. Y.

¹(1) **Capital Increased.**—On Jan. 27, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$5,000 to \$250,000.

CAGE ENGINE SYNDICATE (THE), WILMINGTON, DEL.

¹(1) **Incorporated in April, 1917, in Delaware,** with a capital of \$250,000, to manufacture machinery and combustion engines. Incorporators: Geo. E. Townsend, Edward G. Cook and Julian C. Walker, Wilmington, Del.

CAIENS WOODWORKING CO.

¹(1) **In Bankruptcy.**—It was announced at East Hartford, Conn., March 14, 1917, that this company, Charles E. Lord, receiver, had filed a petition in bankruptcy. Charles D. Malony, Treas., lists the liabilities at \$78,554, of which \$59,887 is discounted paper, and \$9,390 is unsecured. The assets are estimated at \$92,179, of which \$40,000 is stock in trade and \$27,179 book accounts.

CALAMBA SUGAR ESTATE.

¹(1) **Initial Dividend.**—Announced Dec. 19, 1916, that the Calamba Sugar Estate, a Philippine property financed in San Francisco, had declared an initial dividend of 7% on its pfd. stock, payable Jan. 15 to stock of record Jan. 1. This stock is 7% cumulative, 21% in arrears at the end of 1916. The dividend declared is on account of these accumulations and it is understood that the remaining 14% will be declared in June for payment in July, 1917.

CALCO CHEMICAL CO.

¹(1) **Refinancing.**—It was announced Jan. 3, 1917, that this company, Bound Brook, N. J., which manufactures intermediate dyes and chemicals, has been refinanced by Swartwout & Appenzeller, through the issue of \$700,000 8% cumulative pfd. stock and \$250,000 notes. The introduction of approximately \$1,000,000 new money is expected to make the company one of the important factors in the trade.

Harry E. Ward, Vice-Pres. of the Irving National Bank of New York, who has been a director of the company for some time past, continues. Richard H. Swartwout, with Wellington E. Bull, of the firm of Swartwout & Appenzeller, have been elected directors. The management of the company will continue in the hands of Pres. R. C. Jeffcott.

Among those who have taken an interest in the new financing are some of the largest New York banking interests.

CALDWELL (R. J.) CO., INC.

¹(1) **Capital Increased.**—On March 23, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$400,000.

CALIFORNIA ALKALI CO.

¹(1) **Stock Issue Authorized.**—It was announced March 1, 1917, that this company, San Francisco, had received permission from Commissioner of Corporations H. L. Carnahan to sell 2,000 shares

of its pfd. stock for \$200,000, and to issue 15,000 shares of its common stock in consideration of the transfer to the company of secret processes and of services rendered in investigation, exploration and promotion of the company. Of the common shares, \$200,000, par value, is to be issued in connection with the sale of the pfd. shares, and a further \$200,000 par value, of the common will be placed in trust with the Anglo-California Trust Co. for the use and benefit of the company.

The common shares are to be held in escrow until the plant is completed and in operation.

—Apr.

¹(1) **New Plant Completed.**—It was announced April 5, 1917, that this company, recently organized, had commenced the erection of a plant to cost about \$500,000. R. G. Paddock is the company's agent.

CALIFORNIA COTTON MILLS CO.

¹(1) **Additions.**—It was announced at Oakland, Cal., Jan. 8, 1917, that 8,000 spindles and 150 looms, together with complementary machinery, are to be added to the equipment of this company, which operates 40,000 spindles and 450 looms. Approximately \$500,000 will be expended on the additions. The force of operatives will be increased from 1,200 to 1,450.

This concern has a capital stock of \$2,000,000. It produces cotton and jute goods.

¹(2) **Increased Dividend.**—Announced Jan. 11, 1917, that this company had increased the regular quarterly dividend from 1½% to 1¾%, the first dividend under the new rate being payable on that date.

—Mar.

¹(1) **Letter to Stockholders.**—According to an official circular letter to stockholders March 3, 1916, 1916 was the most prosperous year in the history of this company. In it attention is called to the decision of the Board of Directors to sell the remaining unissued stock, amounting to 3,402 shares. Sales for 1916 showed an increase of 65% over 1915, while profits from operations increased 75%.

CALIFORNIA DELTA FARMS, INC.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows net profits of \$363,629, equal to 4.49% on the \$8,100,000 capital outstanding.

CALIFORNIA DOOR CO.

¹(1) **Bonds.**—See Diamond & Caldor Ry. Item No. 1.

CALIFORNIA GOLD DREDGE MINES, PORTLAND, ME.

¹(1) **Incorporated in January, 1917, in Maine,** with a capital of \$12,000,000, to engage in a general mining and milling business and all things incident thereto. Pres., C. M. Drummond, Portland, Me.

CALIFORNIA & HAWAIIAN SUGAR CO.

¹(1) **Expansion.**—It was announced Feb. 3, 1917, that this company, San Francisco, Cal., would enlarge its Crockett refinery at an expense of \$2,500,000. The mining capacity of the plant will be increased from 900 to 1,300 tons a day.

CALIFORNIA HOTEL CO.

¹(1) **Incorporated in March, 1917, in California,** with a capital of \$2,000,000. Directors: D. M. Linnard, F. P. Flint and J. H. Schenck.

—Mar.

¹(2) **Bond Sale.**—It was announced at San Francisco March 15, 1917, that this company, operating the Huntington, Maryland and Green Hotels at Pasadena, Cal., had sold to S. W. Straus & Co. \$2,000,000 first mortgage 6% serial bonds, in denominations of \$5,000, \$1,000, \$500 and \$100. The bonds are dated March 15, 1917, and mature from May 1, 1918, to 1927, inclusive, being callable at 103.

It was stated an advance offering of the bonds would be made at once, although the formal offering would not be made for ten days or two weeks. The price is par.

CALIFORNIA LIVESTOCK CO.

¹(1) **Capital Decreased.**—In December, 1916, the company filed notice at Sacramento, Cal., of a decrease in capital stock from \$300,000 to \$125,000.

CALIFORNIA-OREGON POWER CO.

¹(1) **Report, Year Ended Dec. 31, 1916,** showed gross of \$421,836 and net of \$212,427. At the annual meeting the retiring directors were re-elected and the board organized with its former officers.

¹(2) **Operations.**—It was stated Jan. 23, 1917, that the first unit of the new hydro-electric station of the company on the Klamath River would be in operation in the Summer of 1917, and the installation of a second generating unit would be made later.

With the increase in the height of the dam the generating capacity of the station will be 36,000 horsepower. The unit now being installed will add 12,000 horsepower to the generating capacity of the company. In 1916 the connected power load increased 5,000 horsepower.

The sale of an additional 4,000 to 5,000 horsepower of the new capacity will provide a sufficient increase in earnings to cover all fixed charges and place the company in position to resume payment of interest coupons which bondholders have temporarily waived.

—Apr.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows a gross operating revenue of \$425,102, net operating revenue of \$105,215, and net corporate loss for the year of \$183,205.

¹(2) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss deficit of \$365,580.

• CALIFORNIA PACKING CORP.

¹(1) **Exchange of Stock.**—It was announced Jan. 11, 1917, that this company had received authority from the California Corporation Commissioner to issue 1,600 shares of pfd. and 1,400 shares of common stock in exchange for 2,000 shares of Alaska Packers' Association stock.

These 2,000 shares represent the stock that came in on the last call and give the holdings company 45,503 out of 67,508 shares, or slightly more than 70%.

¹(2) **Yearly Earnings of Controlled Co.**—See Alaska Packers' Association.—Item No. 3.

¹(3) **Complaint Dismissed.**—It was announced Jan. 15, 1917, that the California Railroad Commission had dismissed the complaint of this company against the Southern Pacific Co. and the Atchison, Topeka & Santa Fe Ry. Co.

The packing company asked reparation of \$8,203 of the Southern Pacific Co., and \$1,310 of the Santa Fe for alleged excessive rates on commodities moving to and from points in the San Joaquin Valley, saying that these rates were higher than the rates between San Francisco and Los Angeles.

—Apr.

¹(1) **Combined Profits for Initial Fiscal Period Ended Feb. 28, 1917,** of this company and the four predecessor companies absorbed in the merger, including the proper proportion of earnings of controlled companies, amounted to \$3,754,841. Deducting the proportion of the dividend, the balance earned on the common stock was equal to \$10.48 a share, and allowing for a full year's dividend on the 7% pfd. stock there would be \$9.36 a share for the common stock.

The fiscal years of the predecessor companies began at different dates, varying from Jan. 1, 1916, to June 1, 1916. While the period up to Feb. 28, 1917, is therefore more than 12 months, in some instances there is only one whole season's business comprised in

JANUARY 1 TO APRIL 30, 1917

the initial fiscal period of the California Packing Corp.

*(2) First Consolidated Balance Sheet, as of Feb. 28, 1917, shows a profit and loss surplus of \$975,433.

*(3) Pres. Armsby Tells of Increased Business.—In his annual address to stockholders April 17, 1917, Pres. J. K. Armsby said: "There has been a heavy and well sustained demand for our products throughout the year, and in spite of foreign complications and curtailment of transportation facilities, the amount of business done has greatly exceeded that of any preceding year. The remarkable demand of the domestic market has been a feature of the operation of the fiscal year.

"Dividends were paid by this company on its pfd. stock on Jan. 1, 1917, amounting to \$111,089.

"An independent appraisal of the various plants, equipment and ranches owned by this corporation has been made and the result shows an increase of \$1,081,757 over the book value.

"Attention is called to the exceedingly sound financial position of the corporation on Feb. 27, 1917, at which date the current assets amounted to \$6,522,444, while the current liabilities amounted to only \$1,247,000. This latter amount was more than covered by the amount of cash on hand at that date.

"The contingent liability of \$1,840,793, as shown by the balance sheet, is secured by bills of lading and, through the delivery of the goods and the payment of the drafts, has since been materially reduced."

*(4) Initial Quarterly Dividend of 50 Cents on Common.—This company announced April 25, 1917, that it had declared an initial dividend of 50 cents a share on the common stock for the quarter ended May 31. The dividend is payable May 15.

At the meeting of directors retiring officers were re-elected.

• CALIFORNIA PETROLEUM CORP.

*(1) New Well.—It was stated Jan. 15, 1917, that the first well on the new Bell Ranch property of this company had been brought in. It is tanking at the rate of 400 barrels a day. Allowing for settling of production, it is figured this well is good for 10,000 barrels a month. It is known as well No. 2, and is the one nearest the Union Oil Co.'s property. Production of the new well is double the expectation of the company's engineers who anticipated production of 150 to 200 barrels a well for the Bell Ranch field.

By the end of 1917 twenty wells will have been drilled, according to present plans, on this property, which is regarded as one of the most valuable pieces of new oil land in California.

—Mar.

*(1) Earnings Statement, Year Ended Dec. 31, 1916, of this company and subsidiary companies compares as follows:

	1916	1915
Gross	\$2,081,154	\$1,919,878
Net	1,511,658	1,354,107
Surp. after chgs., pfd. & com. divs.	318,229	149,156
†Deficit.		

*(2) Earnings on Stock.—It was stated March 5, 1917, that this company's 1916 surplus of \$318,229 is equal to 2.13% on \$14,877,005 common stock.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$579,980, compared with \$203,072 Dec. 31, 1915.

*(4) Comment on 1916 Report.—On March 7, 1917, the "Wall Street Journal" said that this company's report for 1916 showed that the usual full charges for depreciation and exhaustion were made during the year. Wells drilled on the old properties were completely written off, and 10% of all additions and betterments, including wells drilled on the new properties, was written off. Five cents a barrel on all oil produced was charged out of the earnings and de-

ducted from property account and an additional five cents a barrel was similarly charged out of earnings and set up as a special reserve.

The income account shows \$996,174, available for pfd. stock dividend after all depreciation charges and five cents a barrel for exhaustion. Dividends at the rate of 4% were paid on the pfd. stock, amounting to \$493,721. From the balance, \$502,453, the second five cents a barrel for exhaustion was deducted. The reason for separating the exhaustion charge into two amounts and charging one before the pfd. stock dividend and one afterward is that the first five cents a barrel is sufficient to amortize the pfd. stock, and consequently dividends on the pfd. properly come between that deduction and the deduction necessary for the amortization of the common stock.

The report of the corporation for 1916 is significant because it holds out promise of a better showing in the current year.

*(5) Earnings, 1917, Estimated.—On March 12, 1917, the "Wall Street Journal" said this company would earn close to \$7 a share on the \$14,877,000 common stock in 1917, according to estimates of officers of the company. They figure that net earnings available for pfd. stock dividends in 1917 will be \$2,050,000. The full 7% pfd. dividend would call for about \$864,000, leaving \$1,186,000 from which would be deducted the second 5 cents a barrel exhaustion charge, about \$185,000, leaving approximately \$1,000,000 available for common stock, or nearly \$7 a share.

This estimate is based on new factors such as high prices for oil, the increased price on the contract for tops and the development work in progress on the Bell Ranch.

Tabulating figures relative to the above, the following result is shown: Earnings for 1916 available for pfd. stock dividend, \$1,000,000; additional increased selling price of agency oil, \$600,000; additional increased revenue from tops contract, \$200,000; additional estimated half interest in net earnings of Bell Ranch, \$250,000; total estimated earnings available for pfd. stock, \$2,050,000.

There are other ways in which earnings may be increased.

CALIFORNIA RY. & POWER CO.

*(1) January Dividend Passed.—It was stated Jan. 9, 1917, that the January dividend on this company's prior preference stock had been passed. In October, 1916, the company reduced the annual rate on the issue to 4%. Previous to that time dividends were disbursed at the rate of 7% per annum.

—Mar.

*(1) Special Meeting March 29.—It was announced March 13, 1917, that this company had called a special meeting of stockholders for March 29, 1917, in New York City, for the purpose of taking action in regard to the proposed plan of reorganization of United Railroads of San Francisco, which involves the disposition by this company of its securities of United Railroads, including stock of the San Francisco Electric Rys. and the receipt of securities in such reorganization and for consideration of any other matters having to do with the proposed reorganization.

*(2) Amended Plan for San Francisco Financing.—See United Railroads of San Francisco.—Item No. 3.

*(3) Consumation of Alternative Plan Looked For.—It was announced March 29, 1917, that at a special meeting the stockholders of this company had authorized the directors to take measures looking toward a consumation of the alternative plan of caring for the United Railroads of San Francisco and the holders of its 4% bonds.

CALIFORNIA SOUTHERN R. R. CO.

*(1) Stock and Bond Issue Permit Sought.—This company April 3, 1917, filed an application with the California

Railroad Commission for authority to issue \$10,000 of first mortgage bonds, \$90,000 of second mortgage bonds and \$88,000 of capital stock, all at 80% of face value. On Nov. 19, 1916, the commission authorized the issue of certain stocks and bonds of the railroad company, the proceeds to be used for the building of a railroad from Blythe Junction to Blythe, Riverside County.

The former issue of bonds was not sufficient, and the railroad company wants the new issue of bonds authorized by the commission to cover the deficiency of \$134,400.

CALIFORNIA STEEL CO.

*(1) New Contract.—It was announced Feb. 1, 1917, that this company had entered into a contract with the Oahu Sugar Co., Honolulu, Hawaii, for the construction of a sugar mill.

CALIFORNIA TELEPHONE & LIGHT CO.

*(1) Merger Application.—It was announced at San Francisco Dec. 28, 1916, that this company, the Callistoga Electric Co. and the Callistoga Water Co. had filed applications with the California Corporation Commissioner for the telephone and light company to buy the systems of the other two companies, the Callistoga Electric Co. for \$24,400, and the Callistoga Water Co. for \$36,000.

The California Telephone & Light Co. asked the commission for permission to issue \$26,000 of its 6% bonds due in 1943, at 94% of par, to buy the plant of the Callistoga Electric Co., and \$39,000 of bonds at the same rate to pay for the property of the water company.

The Callistoga Electric Co. has been operating for more than three years in Callistoga and vicinity, in Napa County, Cal., distributing and selling electricity. The Callistoga Water Co. for nearly ten years has been distributing water in Callistoga and vicinity.

Neither the Callistoga Electric Co. nor the Callistoga Water Co. has any bonded indebtedness, and the applications say that they have no way to obtain funds for extending and improving their systems.

The California Telephone & Light Co. has a capital stock of \$10,000,000.

The Callistoga Electric Co. has a capital stock of \$25,000, of which \$13,500 is outstanding.

The Callistoga Water Co. has a capital stock of \$75,000, of which \$50,100 is outstanding.

	1916	1915
Nov. gross	\$11,677	\$10,628

Surp. after chgs.	25,670	25,050

—Mar.

*(1) Report, Year Ended Dec. 31, 1916, shows a gross operating revenue of \$131,498, a net corporate income of \$20,099, and a surplus as of Dec. 31, 1916, of \$29,779, compared with \$12,122 on Dec. 31, 1915.

CALIFORNIA TORRENS TITLE CORP.

*(1) Incorporated March 30, 1917, in California, with a capital of \$500,000. Directors: H. E. Thomas, W. M. Weaver and E. B. Drew.

CALIFORNIA TRONA CO.

*(1) Suit Won by Default.—A San Bernardino, Cal., dispatch Jan. 17, 1917, stated that this company had practically won by default its last action to clear title to the Seales Lake potash holdings, worth \$100,000,000. When the case was called in court before Judge H. T. Dewhurst, the defendants, H. E. Lee and others, failed to appear and Cecil H. Phillips, an attorney, who represented the defendants in the suit, was in court "merely as a spectator," he declared.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Although the new case was continued, owing to another action being in court the litigation of rival claimants to the property is regarded as ended.

CALIFORNIA WINE ASSOCIATION.

¹(1) Report, Year Ended Dec. 31, 1916, shows operating profits of \$669,184, leaving, after payment of \$280,510 interest, \$418,674 net profits. After payment of pfd. dividends amounting to \$85,578, \$333,088 remained for the \$4,754,000 common stock, or at the rate of 7.06%.

CALISTOGA ELECTRIC CO.

¹(1) Merger Application.—See California Telephone & Light Co.—Item No. 1.

—Feb.

¹(1) Reconstruction Time Extended.—It was announced Jan. 24, 1917, that the California Railroad Commission had issued an order extending until June 30, 1919, the time within which this company must reconstruct its existing system so as to comply completely with the State laws concerning the standardization of pole lines.

CALISTOGA WATER CO.

¹(1) Merger Application.—See California Telephone & Light Co.—Item No. 1.

• CALUMET & ARIZONA MINING CO.

¹(1) Dividend Meeting Jan. 19.—It was announced Jan. 13, 1917, that directors of this company would meet in Chicago Jan. 19 for dividend action.

Calumet & Arizona's production in December was 7,000,000 pounds. The smelter handled, in addition, 3,230,000 pounds from custom ores. Shattuck ore is handled at this smelter, as is a part of the ore from the United Verde Extension. Verde Extension has been supplying the Calumet & Arizona smelter with 50 tons a day, sending 200 tons daily to the Copper Queen smelter and 200 tons daily to the Humboldt smelter in western Arizona.

¹(2) Application to List.—Announced Jan. 17, 1917, that the New York Stock Exchange had received application to list \$6,500,000 of this company's capital stock.

¹(3) Production, 1916.—On Jan. 18, 1917, it was stated that this company's smelter produced in 1916 approximately 97,800,000 pounds of copper. This includes a considerable amount of copper from custom ores.

A number of small mines operating in New Mexico furnished about 3,650,000 pounds, while about 4,500,000 pounds came from ore shipped by the United Verde Extension Mining Co. The balance was from the Calumet & Arizona Co.'s own ores and from the Shattuck-Arizona.

With production from the New Cornelia property, which it controls, started by mid-year, Calumet & Arizona output from its own mines should by the end of 1917 show a material increase over the total of the preceding year.

¹(4) Extra Dividend.—Announced Jan. 22, 1917, that this company had declared a quarterly dividend of \$2 a share and an extra of \$1 a share.

¹(5) New Director.—Announced Jan. 22, 1917, that Walter Congdon had been elected a director of this company.

¹(6) Admitted to List.—Announced Jan. 25, 1917, that the New York Stock Exchange had listed \$6,424,620 of this company's capital stock, with authority to add on or before July 1, 1917, \$76,889 additional capital stock.

¹(7) To Enter 100,000,000-Lb. Banks.—It was stated Jan. 25, 1917, that with the commencement of operations at its New Cornelia property, planned for June, 1917, this company, owning 75% of New Cornelia, with have entered the 100,000,000-pound per annum ranks of copper producers.

The average cost of producing copper at the Calumet & Arizona property during 1916 was about one cent a pound higher than in 1915, when it was 7.4 cents a pound.

The cost of mining the New Cornelia ore will be low, as it will be a steam shovel operation, with practically no overburden.

The New Cornelia has been prepared to furnish a full quota of ore for the 5,000-ton leaching plant, which will be ready for operation in June.

On the basis of an 8½-cent cost and an average price received for its output of 25 cents a pound, it is estimated that Calumet & Arizona earned approximately \$11,550,000 in 1916. This was equal to \$18 per share, against \$9 disbursed in dividends.

The present smelting equipment will be increased through the installation of a new reverberatory furnace, now under way. So long as copper metal prices warrant, production will be maintained at the current rate estimated for 1916 at 70,000,000 pounds.

This, in addition to 36,000,000 pounds, a full year's output from the New Cornelia, would give the Calumet & Arizona Mining Co. a yield from its own mines of 106,000,000 pounds per annum.

¹(8) Status.—It was stated Jan. 25, 1917, that on Oct. 31, 1916, this company had a surplus of \$18,748,634, of which \$8,764,971 represented net earnings from ten months' operations up to that time, and the balance of \$9,983,663 was surplus brought forward from the previous year.

Income account for the ten months' period, compared with full year 1915, follows:

	10 Mos. 1916	Year 1915
Total earnings, copper, etc.	\$16,425,105	\$11,647,415
Miscel., includes interest	83,757	36,309
Total income	16,508,863	11,683,724
Expenditures	7,743,891	6,229,843
Net income	8,764,972	5,453,882

Earnings of the first ten months of 1916 were equal to \$13 per share, against \$9 a share in the entire 12 months of 1915.

There was an increase of nearly \$3,000,000 in investment account in the first ten months of 1916, due chiefly to the acquisition of \$2,770,000 bonds of New Cornelia Copper Co. Current assets increased from \$7,162,796 at the end of 1915 to \$8,500,000 at the end of October, 1916. Of this increase \$1,200,000 was due to cash. Copper, gold and silver in process were carried at \$3,767,000 at the later date, against \$3,688,841 on Dec. 31, 1915.

New Cornelia Copper Co. had a profit and loss balance of \$58,000. The Tucson, Cornelia & Gila Bend R. R. Co. showed net income of \$55,600 from operations in the ten months of 1916.

—Feb.

¹(1) Production, January, 1917.—It was stated Feb. 13, 1917, that production of this company's smelter in January was 4,064 tons of blister copper. Of this 2,946 tons was for the account of the company.

—Mar.

¹(1) Blister Copper Production, February, 1917.—Announced March 12, 1917, that this company in February produced 5,500,000 lbs. of blister copper.

¹(2) Admitted to List.—It was announced March 13, 1917, that the New York Stock Exchange had admitted this company's capital stock to the list.

¹(3) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross inc.	\$20,587,940	\$11,683,724
Net after taxes	11,156,835	5,453,128
Surp. after chgs. and divs.	5,377,709	3,447,324

¹(4) Earnings on Stock.—It was stated March 19, 1917, that this company's 1916 net of \$11,156,835 is equal to 173.65% on \$6,424,324 capital stock, compared with 88.4% earned on \$6,174,120 capital stock in 1915.

¹(5) Statement by President.—It was stated March 19, 1917, that Pres. Charles Briggs, of this company, in his annual remarks to stockholders pointed out

that copper production in 1916 totaled 74,898,788 pounds, silver production, 1,863,149 ounces and gold production 46,377 ounces. Precious metals per ton of refined copper from company's ores amounted to \$41.

Net cost of refined copper after deducting values of precious metals was 0.04 cents, and company received average price of 24.698 cents per pound for all copper delivered last year. Emphasis was laid on the fact that average selling price of copper sold in 1916 was considerably above this figure, but covered deliveries to be made in the first half of 1917. Dividends paid in 1916 totaled \$5,777,296.

There have been recovered 494,650 pounds of copper and 231 ounces of silver from New Cornelia experimental plant and from ores sold to Dec. 31, 1916.

Operations of Tucson, Cornelia & Gila Bend R. R. Co. were satisfactory.

A total of 162,703 more wet tons of ore were mined at the Bisbee properties in 1916 than in 1915, the company's best previous record. Total amount of development work done in 1916 was 125,282 feet, as compared with 93,788 feet in 1915. Amount of development work exceeded that of any other year by nearly six miles.

¹(6) Comment on 1916 Report.—On March 23, 1917, the "Boston News Bureau" said that this company's annual report is regarded as the best showing made since its organization. While the earnings per share are not the highest in the history of the company, the net earnings in total are far ahead of any other year. With an ore showing of 2,000,000 tons in sight, with \$17 per share in New Cornelia, with over \$2,500,000 in cash on hand and close to \$4,000,000 in copper, gold and silver in transit, notes receivable of over \$1,000,000 and other assets, the statement is worthy of careful study.

Calumet & Arizona was organized, financed and managed by Calumet people. Its continued operation upon a substantial, conservative basis and its regularity of dividend disbursements, along with its maintenance of a substantial treasury balance, places it in an enviable position among copper in—

—Apr.

¹(1) March Production.—In March, 1917, this company produced 5,528,000 lbs. of copper. The smelter turned out 8,586,000 lbs. of blister copper.

¹(2) Production, March, 1917.—This company, April 14, 1917, reported its March production as 5,528,000 lbs. of copper.

¹(3) Smelter Waste Utilized.—A Douglas, Ariz., dispatch to the "Boston Evening Transcript" April 13, 1917, said: "Perhaps one of the most important utilizations of what was formerly a waste product that has been inaugurated in the Southwest as a result of war conditions is that of manufacturing sulphuric acid from the fumes of the copper smelter of the Calumet & Arizona Co. situated here.

"This sulphuric acid annex has just been finished at a cost of nearly \$1,000,000. It has a daily capacity of 225 tons of the acid. The successful extraction and utilization of this formerly waste product by the Calumet & Arizona Co. will, it is stated, lead to the installation of other similar plants in the Southwest."

CALUMET & CHICAGO CANAL & DOCK CO.

¹(1) Balance Sheet, as of Jan. 1, 1917, showed profit and loss surplus of \$113,299, against \$129,801 last year.

• CALUMET & HECLA MINING CO.

¹(1) Development.—It was stated Jan. 4, 1917, that this company's conglomerate copper rock is running better than 30 pounds to the ton. In 1915 the conglomerate lode averaged 29.74 pounds; in the year before 26.38; in 1913, 27.85 and in 1912, 29.73.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

(3) Notes.—It was announced Jan. 6, 1917, that the Old Colony Trust Co., of Boston, had given notice to holders of this company's 4% gold coupon notes, series B, due Feb. 15, 1918, that all the outstanding notes will be paid and redeemed by it on the next semi-annual interest date, Feb. 15, 1917, at par and accrued interest.

(8) Financing.—It was stated Jan. 9, 1917, that the notes of this company called for redemption consist of 4% gold coupon notes to the amount of \$2,764,000. The notes are dated Feb. 15, 1900, and are not due until 1919. They are the last of four series of notes, to the amount of \$4,134,000, issued early in 1900 to finance the purchase from A. S. Bigelow of stocks of various mining companies.

Two of the series were paid in 1912 and one in 1913. The remaining \$2,764,000 have now been called for redemption on Feb. 15, 1917, and with this payment the company will be entirely free from debt.

(4) Production, December and 12 Months.—Announced Jan. 23, 1917, that this company in December produced 6,206,334 pounds of copper, against 6,513,338 in November.

During 1916 the production totaled 78,545,021 pounds, against 72,613,320 in 1915.

—Feb.

(1) Production.—Announced Feb. 19, 1917, that this company in January produced 6,576,868 lbs. of copper.

(2) Acquisition Probable.—See Tamarack Mining Co.—Item No. 2.

(3) Circular to Tamarack Stockholders.—See Tamarack Mining Co.—Item No. 3.

—Mar.

(1) Production, February, 1917.—Announced March 16, 1917, that this company in February produced 6,230,533 pounds of copper, compared with 6,576,868 in January, 1917.

(2) Acquisition Approved.—See Tamarack Mining Co.—Item No. 2.

—Apr.

(1) Tamarack Property Transferred.—See Tamarack Mining Co.—Item No. 1.

(2) Report, Year Ended Dec. 31, 1916, shows 76,762,240 pounds of copper produced, at cost of 11.63 cents a pound, and sold at an average price of 25.48 cents a pound. Rock yielded 22.53 pounds of copper per ton. During the year the company paid dividends amounting to \$75 a share on 100,000 shares. Surplus quick assets over current liabilities Dec. 31, 1916, were \$10,768,601.

(3) Comment on 1916 Report.—On April 14, 1917, the "Boston News Bureau" said, in part: "There is nothing sensational in the Calumet & Hecla annual report. To be sure it shows a rather large increase in the cost of producing copper—from 9.33 cents per pound in 1916 to 11.63 cents in 1916, an increase of 25%—but aside from this the operating figures do not show an noteworthy changes.

"The indicated profits are equal to \$100 per share—\$76 paid in dividends and \$25 per share increase in surplus, but this takes no account of an equity of over \$18 per share in the undistributed earnings of the subsidiaries in 1916. In addition, Calumet may be said to have an equity equal to \$36.50 per share in the surplus quick assets of the subsidiaries as of Dec. 31 last.

"Balance sheet shows notes payable of \$4,134,000, but these have since been paid. All indebtedness, therefore, in connection with the purchase of Bigelow shares has now been liquidated.

"Treatment of old sands is yielding a fine profit, especially on present copper market. These tailings last year yielded almost 7,000,000 pounds of copper from material which assayed 21 1/4 pounds per ton. Recovery was 9.02 pounds and cost, excluding smelting and selling, 4.39 cents. In truth, Calumet has a real mine in these tailings."

(4) Production, March, 1917.—This company, April 18, 1917, reported March

production as 7,306,144 lbs. of copper, compared with 5,528,000 the previous month.

(5) Profits in 1916 Equal to \$141 Per Share.—On April 18, 1917, the "Boston News Bureau" said the calculation that Calumet & Hecla earned \$100 per share in 1916 plus undivided equities in earnings of so-called subsidiaries, greatly understated the situation. Profits were nearer \$140 a share. The first estimate assumed that the balance sheets for the two years were made up on the same basis, whereas it is found that in that for Dec. 31, 1916, the company for the first time treated its note indebtedness—since paid—as a liability. There is practically \$4,000,000, or \$40 a share, of concealed earnings here which had not been included in former estimates of earnings. In spite of this, the profit and loss surplus increased \$2,500,000.

Arrived at in a more direct manner the profits for the year were: 71,350,000 pounds of copper sold at a profit of 13.8 cents per pound, \$9,882,000; 6,995,000 pounds "reclaimed" copper sold at profit of 19 cents, \$1,330,000; dividends from sub-companies, \$2,226,000; received from sale of Seneca Co. shares, \$672,000; total, \$14,110,000; equal per share on 100,000 shares, \$141.

This overtops all previous records in the company's history, a record made in the face of an extraordinary increase in operating costs.

CALUMET & SOUTH CHICAGO

RY. CO.

(1) Report, Year Ended Jan. 31, 1917, shows gross of \$518,869, being its proportion of the 40% of the residual receipts of Chicago Surface Lines going to Chicago City Ry. Co. under the unification ordinance. Total income of the company was \$544,733, with net income of \$278,433, or 2.78% of its capital stock. Dividends of 2 1/4%, or \$250,000, were paid, leaving, with the previous surplus of \$23,907 Feb. 1, 1916, a surplus Feb. 1, 1917, of \$57,190.

The balance sheet showed value of property, \$10,573,624; franchises, \$5,000,000, and current assets, \$180,187. Liabilities consisted of \$5,325,000; first mortgage bonds, \$377,621, and capital stock and surplus, \$10,067,190.

CAMBRIA COLLIERIES CO., TOLEDO, O.

(1) Incorporated in April, 1917, in Ohio, with a capital of \$5,000,000. Incorporators: Newton A. Tracy, Norman W. Reed, Thomas W. Hughes, Fred G. Zink and Chas. Weirich.

CAMBRIA IRON CO.

(1) Report, Year Ended Dec. 31, 1916, of this company, which is leased to the Cambria Steel Co., shows a net amount of \$1,647,022 expended for new property in 1916, and \$25,225,920 net for improvements since Dec. 1, 1898.

CAMBRIA STEEL CO.

(1) New Outlet.—It was announced Feb. 6, 1917, that this company is to have an outlet within 1917 for its recently purchased acreage of coal, as the Pennsylvania R. R. Co. plans to construct a six-mile road from Delmont to Saltsburg, Pa., at a cost of about \$700,000, the contract for which has been let.

(2) Extra Dividend.—Announced Feb. 15, 1917, that this company had declared a regular quarterly dividend of 1 1/4% and an extra of 1 1/4%, payable March 15 to stock of record Feb. 28. Books do not close.

—Mar.

(1) Rail Order.—See Pennsylvania R. R. Co.—Item No. 11.

(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$27,511,794	\$8,326,672
Net income	25,094,353	6,403,538
Surp. after divs.	22,056,853	2,703,538

After deducting all expenses incident to operation of the properties, including those for ordinary repairs and maintenance, approximately \$4,818,300 currently charged during the year to cost of production.

(3) Earnings on Stock.—It was stated March 20, 1917, that this company's 1916 net income of \$25,094,353 is equal to 55.7% on the \$45,000,000 outstanding stock, against 14.2% in 1915.

(4) Report Leased Company, 1916.—See Cambria Iron Co.—Item No. 1.

(5) Comment on 1916 Report.—On March 22, 1917, the "Boston News Bureau" said that this company's record of 1916 profits gave abundant testimony to the excellent bargain which Midvale made when it acquired control of this property. The net earnings before depreciation of \$27,511,794 compare with \$8,326,672 in 1915 and but \$3,115,832 in 1914. This is nine times the 1914 earning record and an increase of \$19,185,122, or 230% over the 1915 year.

The dividend balance after depreciation and charges of \$25,094,353 is 2 1/2 times the expectancy of earnings given out at the time \$81 per share was offered for the 900,000 shares of Cambria.

Measuring these Cambria 1916 earnings in terms of Midvale is rather interesting. It is understood that at present Midvale owns between 94% and 95% of Cambria's 900,000 shares of stock. The original offer to take over the stock at \$81 per share expired Feb. 19, 1916. Since then different lots have been picked up, but the current percentage of ownership is not far from 95%.

On this basis Midvale's equity in Cambria earnings in 1916 was about \$23,600,000. In other words, it would seem as if \$23,600,000 out of the \$35,020,488 which Midvale earned in 1916 after interest, but before depreciation reserves, was derived from Cambria operations. If this hypothesis be correct then 67% of Midvale's 1916 profits measure the success which Cambria achieved in 1916.

The Cambria purchase cost \$25,000,000 in Midvale stock and \$45,736,000 in 5% bonds, a total of \$70,736,000 par of securities. This investment earned 33% in 1916 and promises to earn nearer 50% in 1917.

CAMBRIDGE CO.

(1) Plant Enlargement.—It was announced Feb. 23, 1917, that this company, Cambridge, Pa., which makes steel bars of all shapes, is enlarging its plant. A continuous furnace for fourteen-inch and nine-inch mill is being installed and a building and a tract of land 100 by 400 feet near the plant have been purchased. It is expected that the Pennsylvania R. R. Co. will place a siding at Cambridge.

CAMBRO-CLINTON MINING CORP.

(1) Development.—It was announced Feb. 1, 1917, that Virginia property will be developed by this company, which has been incorporated at Richmond, Va. Capitalization is \$300,000. The officers are: Lewis C. Williams, Pres., and Cyrus W. Beale, Secy. & Treas.

CAMDEN IRON WORKS.

(1) Sale Planned.—It was stated March 9, 1917, that the receiver for this company had asked the Federal Court of Newark, N. J., for permission to sell the plant, alleging that the time is appropriate. The plant is earning \$1,000 a day on war orders and has advanced war orders of \$1,500,000. Objection was raised to such a sale by claimants on ground that liquidation would net only 30% on claims. The prospective buyer is said to be Walter Wood, of Philadelphia, owner of the Florence Iron Works.

CAMMEYER, MANHATTAN, N. Y.

(1) Capital Increased.—On March 8, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$425,000.

CAMPBELL (D. D.), INC.

(1) Incorporated on March 23, 1917, in New York, with a capital of \$350,000, to deal in dry goods. Incorporators: B. Hirschson, A. F. and D. D. Campbell, 225 4th Ave., New York.

JANUARY 1 TO APRIL 30, 1917

CAMPBELL TRANSMISSION CO.

¹(1) **New Company Organized.**—It was announced Feb. 19, 1917, that this company, capital \$250,000, had been organized and would locate at Buchanan, Mich. The citizens of the town subscribed for \$35,000 of the stock.

CAMPWELL, WYANT & CANNON FOUNDRY CO.

¹(1) **Expansion.**—It was announced March 18, 1917, that this company, Muskegon Heights, Mich., had completed plans for the erection of a new addition to its plant at a cost of \$100,000.

CANADA CEMENT CO., LTD.

¹(1) **Common on 6% Basis.**—Announced Dec. 30, 1916, that this company had declared a dividend of 1½% on the common stock for the three months ended Dec. 31, thus placing it on a quarterly basis and definitely on a 6% per annum basis. The usual quarterly preference dividend was also declared. The common is payable Jan. 16 to stock of record on Jan. 5, and the pfd. Feb. 16 to stock of record Jan. 31.

—Feb.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows a net profit of \$2,218,848, an increase of \$470,833, or 36% over 1915, the best 12 months previously reported.

After taking care of bond interest and preference stock dividend, there remained a balance of \$1,040,080, equivalent to 7.7% on the \$13,500,000 ordinary stock outstanding. There was thus a fair margin over dividend requirements on the 6% per annum basis instituted during the year, and one element of doubt and uncertainty which recurred in the stock market controversy of the year is eliminated.

Although the stock was placed on a 6% basis during the year, the total distribution out of 1916 profits was only 4½%, the first dividend of 3% declared in January, being charged against the earnings of 1915.

While three ordinary stock declarations, made during 1916 totaled 7½%, only two, the midsummer 3% and the quarterly 1½, in the Autumn, came out of that year's profits.

After charging up the 4½% to 1916 profits the balance remaining to carry forward was \$432,585, or slightly more than 3% on the ordinary shares.

¹(2) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$2,092,818, compared with \$2,065,232 Dec. 31, 1915, prior to deducting common stock dividend of 3%, declared out of 1915 earnings after close of the year.

—Apr.

¹(1) **New Company to Be Formed.**—On April 28, 1917, the Montreal "Daily Star" stated that C. C. Lapierre, of Montreal, had organized an independent cement company that will operate the property owned by the Canada Cement at Neuville, in the county of Port Neuf. This property was bought by the Cement Merger from the Eastern Canada, the price being a few hundred thousand dollars. The company had already started the building of a mill. The capital of the new company is \$1,250,000, and it is planned to have a daily production of 1,500 barrels per day.

CANADA COPPER CORP., LTD.

¹(1) **Extensions.**—See British Columbia Copper Co.—Item No. 1.

CANADA EXPORT PAPER CO.

¹(1) **Violation of Anti-Trust Law Alleged.**—See International Paper Co.—Item No. 1.

CANADA FOUNDRIES & FORGINGS, LTD.

¹(1) **Extra Dividend on Common.**—Announced Jan. 25, 1917, that this company had declared the regular quarterly dividend of 3% and an extra of 3% on the common stock, together with the regular quarterly dividend of 1½% on the pfd., all payable Feb. 15 to stock of record Jan. 31.

—Feb.

¹(1) **Report, Year Ended Dec. 31, 1916,** showed net profits, \$653,852, compared with \$332,056 in 1915, a decrease of \$178,204. It was stated that this would represent only a light part of the decrease had it not been that the company had decided to increase the acceptances of business from the Imperial Munitions Board of Canada. On one class alone, it was pointed out, the decrease in profits compared with what could have been made on the same business in the preceding year at the old scale of rates, would amount to around \$650,000, but the policy of expanding output to secure the best possible results resulted in a decrease of only \$178,204.

Including the interest on investments and the previous balance there was \$1,290,624 for treatment, and of this amount general expenses, including war tax, took \$249,942, which is almost the identical amount distributed to the shareholders, the common and pfd. distributions combined taking \$249,600. The balance carried forward, \$758,608, is an increase of \$122,836 over 1915.

¹(2) **Statement by President.**—It was stated Feb. 12, 1917, that Pres. W. M. Weir, in presenting the annual report to stockholders of this company, said: "Notwithstanding the present dreadful war and troubled state of the world in general, your directors look forward with confidence to the future. While they do not presume under existing conditions to predict the future business of this corporation, still, present indications for 1917 point to favorable results. Orders on hand at the beginning of the fiscal year 1917 were sufficient to keep your plants fully occupied for some months to come."

"Some idea of the expansion of the plant's operations may be obtained from the statement that the tonnage of forgings alone at one plant in 1915 amounted to 14,000 tons, or 28,000,000 pounds; while in 1916 the tonnage was 39,000 tons, or approximately 78,000,000 pounds, making an increase of 50,000,000 pounds in all during the year."

CANADA GLASS WORKS, LTD. (THE)

¹(1) **Incorporated** on Dec. 21, 1916, in Canada, with a capital of \$250,000, divided into 2,500 shares of \$100 each, to manufacture and deal in carboys or demijohns, bottles and cut glassware. Incorporators: Hammet Pinkey Hill, Alexander Christi Hill, Sara Florence MacDougall, Laura Jane Miller Whyte and Frances Amelia Heming. Chief place of business, Toronto, Ont.

CANADA MINES DEVELOPMENT CO., LTD.

¹(1) **Incorporated** on Jan. 11, 1917, in Canada with a capital of \$250,000, divided into 2,500 shares of \$100 each, to buy, lease, explore and develop mines and mineral lands. Incorporators: Jas. Houston Spence, Grant Cooper, Lillian Murray Heal, John Stewart Emery and Lillian Dillon. Chief place of business, Toronto, Ont.

CANADA PAPER CO., LTD.

¹(1) **New Director.**—It was stated March 3, 1917, that at a meeting of the Board of Directors of this company, F. J. Campbell, Gen. Mgr., had been elected a director to succeed Robert MacKay, deceased.

CANADA SOUTHERN RY. CO.

¹(1) **Bond Guarantee Permit Refused.**—See New York Central R. R. Co.—Item No. 3.

CANADA STEAMSHIP LINES, LTD.

¹(1) **Mortgage Plans.**—It was announced Jan. 9, 1917, that a special meeting of the holders of the 5% first mortgage debenture stock and bonds of this company had been called for Jan. 30 to consider modifications in the existing trust deeds. The plan is for

the ultimate redemption of underlying Richelieu & Ontario bonds and the closing out of that mortgage.

—Feb.

¹(1) **Dividends Resumed.**—It was announced Feb. 1, 1917, that this company had declared a dividend of 7% on the pfd. stock on account of arrears amounting to 12½%. The dividend is payable March 1.

¹(2) **Comment on Dividend.**—On Feb. 2, 1917, in commenting on the 7% dividend declared by this company, the Montreal "Gazette" said that it reduced the accumulated dividend arrears to 5¼%. That balance, barring some unforeseen setback, will be wiped out before the end of the current year, so when time comes to consider the 1917 dividend the only obligation facing the directors will be the 7% accruing for that year.

Further payments on arrears will probably be deferred until well on in the year. The 5¼% still owing may be taken care of in two payments in the second half of the year.

Net earnings from operation continue to be estimated at about \$4,000,000, against \$1,732,057 in 1915. The balance after interest, depreciation, etc. has been placed as high as \$2,500,000, which would be 20% on the preference stock.

—Mar.

¹(1) **Earnings Statement, Year Ended Dec. 31, 1916,** compares as follows:

	1916	1915
Gross	\$12,122,128	\$7,775,034
Net	4,059,545	1,732,057
Surp. after chgs.	2,392,028	682,151

¹(2) **Statement by President.**—In connection with the annual report of this company Pres. James Carruthers, of this company, it was stated Feb. 28, 1917, said, in part: "The improvement in the company's business noted in our last annual report has continued in a gratifying manner. Unprecedented developments in the world's affairs have given rise to many new and difficult problems in the management of your company."

"During the year three payments of 1½% were made in respect to deferred dividends on the preference shares of the company, and a further payment on March 1 of this year of 7% will leave a balance of 5¼% due, which, when paid, will wipe out all arrears to Dec. 1, 1916."

Total assets of the company grew from \$35,332,254 a year ago to \$37,918,358, of which surplus accounts for \$1,848,225. There is a striking increase in both fixed and current assets, cash in hand showing a large gain."

¹(3) **New Directors.**—It was announced at Montreal, Que., March 7, 1917, that at the annual meeting of this company W. E. Burke, general manager, and F. S. Issard, comptroller, were elected directors, replacing Sir H. Montagu Allan and Aemilius Jarvis.

—Apr.

¹(1) **Earnings Affected Only Slightly by British Order.**—On April 17, 1917, the "Montreal Daily Star" said that the new British order requisitioning all vessels under the British flag would not have any material effect upon the earnings of this company. Nine-tenths of the fleet are under charter of the French Government and are not available until February, 1918, at the earliest.

CANADIAN AEROPLANES, LTD.

¹(1) **New Plant.**—It was announced April 12, 1917, that rapid progress was being made on the erection of a new plant for this company at Toronto, Ont., to cost \$500,000.

CANADIAN BRASS MANUFACTURING CO.

¹(1) **B. O. T. Mfg. Co. Acquired.**—The "Financial Post," Canada, April 14, 1917, stated that this company, of Galt, had acquired the B. O. T. Manufacturing Co., Toronto. The company will have its principal office at Galt, the Toronto company becoming a branch. G. A. Dobbie is Pres.

JANUARY 1 TO APRIL 30, 1917

• CANADIAN CAR & FOUNDRY CO., LTD.

¹(1) Completion of Shell Orders.—It was stated Jan. 10, 1917, that this company had practically completed its contract for 5,000,000 Russian shells. The order was for 2,500,000 shrapnel and the same number of high-explosive projectiles. All the shrapnel had been shipped and the last of the other shells were about ready for shipment, only a few small parts remaining to be finished.

The company recently accepted orders to load shells being manufactured by the Bethlehem Steel Co. and the General Electric Co. This work was to be done at its plant at Kingsland. It also has a good deal of munition business for Great Britain, which is being filled at its plant in Canada.

¹(2) Dividend Discussion.—On Jan. 11, 1917, it was stated that the question of resumption of dividends on its \$7,250,000 pfd. stock will be taken up either at the February or March meeting of the directors, or as soon as final payments on the Russian contract are made. It is expected that the stock will then be replaced on a regular 7% basis and also that something may be done in regard to the accumulation of dividends on the issue, amounting to 17½%.

The Russian contract was not as profitable as had been hoped, due to delays and early difficulties with inspection. The British contracts, it is understood, proved entirely satisfactory, and a good return on the stock should be shown therefrom. The company is also believed to have a large amount of car business on its books.

¹(3) Shell Explosions Wreck Plant.—On Jan. 11, 1917, fire in the ammunition plant of this company near Kingsland, N. J., caused the explosions of hundreds of thousands of shells and the destruction of the factory, entailing a loss estimated at \$5,000,000. It is thought the fire started from a spark.

The destruction of shells and material at the Kingsland plant came as the climax of a long chapter of difficulties which the company met in filling its order from the Russian Government for 5,000,000 shells. The task was almost completed and the shipment of the last several lots would have brought the company the final payment for its work.

The contract, entered into in the spring of 1915, called for \$83,000,000.

In May, 1916, estimates of the total business on the company's books ran as high as \$150,000,000, and afterward several more munition contracts were received.

When the company obtained the \$83,000,000 order it formed the Agency of the Canadian Car & Foundry Co., Ltd., under the laws of New York State to keep the work distinct from other shell contracts taken by the parent organization in Canada.

There was trouble from the start. In the first place, the order was so big that much of it had to be sub-let among about fifty American and Canadian firms, and the equipment of these plants with the proper machinery demanded heavy advances of cash from the Canadian company. It was understood that the Russian Treasury advanced \$20,000,000, of which the bulk was passed on by the Canadian corporation to the sub-contractors.

The full order was to have been completed by April 1, 1916. In January, 1916, a sudden slump in Canadian Car & Foundry stocks brought attention to the company, and it was found that shell deliveries were far in arrears and that financing was causing the management many worries.

The company needed \$10,000,000 for working capital. After conferences between the officials, local bankers, and representatives of the Russian Government, it was arranged that Russia should advance \$1,500,000 immediately and more as manufacturing progressed. The Russian Munition Board also granted the company six months' additional time for completing the order.

¹(4) Insurance.—Underwriters of this company on Jan. 11, 1917, stated that they carried approximately \$2,000,000 fire insurance on the entire risk and contents, all important buildings of which were equipped with automatic sprinklers. The policies, it was stated, covered the fire and not the explosion hazard.

All buildings were one-story, metal on wooden studs, without sheathing, gravel roofs on joists, non-combustible floors. The raw stock consisted of machined shells and parts, together with black powder, smokeless powder and trinitrotoluol.

¹(5) Bond.—It was stated Jan. 11, 1917, that the company had given a bond of \$1,000,000 to cover damages that might be caused to the life and property of other citizens of Kingsland from an accident in the plant. This bond originally was only \$100,000, but was raised, it was reported, after the "Black Tom" explosion.

¹(6) Official Statement About Explosion.—It was announced Jan. 12, 1917, that the official statement of this company about the loss caused by the explosion and fire at their plant at Kingsland, N. J., placed it at \$16,750,000, of which \$750,000 was represented by the buildings and \$16,000,000 by their contents. Insurance will cover about \$3,000,000 of the loss and the rest will be a total loss, of which about \$6,000,000 will be borne by the company.

This statement is taken to mean that the balance of the loss, or nearly \$8,000,000, will be borne by the Russian Government, as a quantity of the shells in storage at the plant had been delivered to agents of that Government.

Russia had been negotiating with the company for the purchase of the plant, but it is not known whether the deal had been concluded.

Of the insurance, about \$2,300,000 was carried in the United States, \$503,500 being with the Globe & Rutgers, of New York.

Local officials of Kingsland said that they would oppose rebuilding of the plant.

Delaware, Lackawanna & Western shops, near Kingsland, were damaged to the estimated extent of \$35,000 and damage at plant of New York & New Jersey Brick Co. is placed at \$30,000.

¹(7) President's Statement About Explosion Loss.—This company's loss as a result of the explosion at Kingsland, N. J., Jan. 11, 1917, is under \$1,000,000, according to Senator Curry, Pres. of the company, who on Jan. 14, 1917, said that the statement given out on the night of Jan. 12 had not been authorized by him.

Senator Curry said that the total loss was estimated in the neighborhood of \$12,000,000. Of this amount approximately \$3,000,000 in finished high explosive shells had been turned over to representatives of the Russian Government. Insurance on the plant amounted to about \$3,250,000, leaving the estimated loss to be borne by the company in the neighborhood of \$750,000.

In another week, President Curry said, the full order for 5,000,000 shells would have been completed. Half the order, or 2,500,000 shrapnel, had been shipped to Russia and the high explosive shells were practically completed. Most of the loss was in shells and explosives. The cost of the Kingsland plant, including the land, was about \$750,000. Several powder magazines, a power house and one or two other buildings were still intact.

Nothing had yet been decided regarding rebuilding. A number of shell parts which had been made by other concerns for assembling at Kingsland were still in the hands of the manufacturers and the Russian Government might desire that Canadian Car complete these, or it might make other arrangements.

Canadian Car & Foundry, its President said, had more than sufficient money on hand to pay up all bills, even if nothing more were collected from the purchasers. In spite of the loss the

company will show a profit from the Russian contract.

Among the shells on hand at the Kingsland plant when the explosion occurred were a small number which, it is understood, were being loaded for the Bethlehem Steel Co. This is one of the matters that will have to be adjusted.

¹(8) Factors Affecting Loss.—It was stated Jan. 18, 1917, that whether or not this company's loss from the Kingsland explosion would be confined to \$750,000—approximately—at which its Pres. estimated it, would depend upon two factors. These are settlement of insurance claims for about \$3,250,000 and placing of liability for \$8,000,000 of finished shells handed over to representatives of Russian Government, but stored at the plant.

It is understood the money for them had not changed hands. Although in official quarters it is intimated there is no question as to the liability, it is not at all certain that the same view will be taken by the Russian representatives. Officers of the company say the insurance will be settled without cavil; but it is possible they are permitting themselves too sanguine a view.

Canadian Car & Foundry's contract was one of the first large orders placed in this country. It was signed about May 1, 1915, and involved 2,500,000 shrapnel and a similar number of high explosive shells at total cost of approximately \$83,000,000. Reports of further large orders from Russia were incorrect.

About 100 concerns, most of them in the United States, shared in the contracts, sublet at a price calculated to yield a fair profit to the major contractor, and the Canadian company erected the Kingsland plant to assemble and load the shells.

If the contract had been filled without hitch it is estimated, Canadian Car & Foundry's profit would have approximated \$16,000,000. But it soon became evident that several sub-contracting companies, as well as Car & Foundry Co. itself, were insufficiently supplied with working capital and various difficulties and delays occurred, considerably reducing profits.

If these matters are settled to satisfaction of the company, it is likely that the question of resumption of pfd. dividends may still be taken up early in 1917.

¹(9) Rebuilding Opposed by Citizens.—It was reported Jan. 20, 1917, following an announcement by agents of this company of a plan to rebuild the shell plant at Kingsland, N. J., destroyed Jan. 11, Mayor Clay, of Union Township, N. J., had declared that, if necessary, citizens would prevent by force of arms any attempt to rebuild. The Mayor also stated that he had been informed this company had sold its holdings to the American Can Co.

—Mar.

¹(1) Car Order.—It was stated March 13, 1917, that this company had closed an order for 2,000 cars of the character mentioned for the Russian Government, this being only one of a number of orders taken by the company for foreign governments in a year.

¹(2) To Complete Plant.—Announced on March 28, 1917, that this company would begin work again at Fort William, Ont. The plant can be completed in 90 days and operated in part as soon as material can be obtained. Operations will be started with 5,000 cars.

—Apr.

¹(1) Salvage Work.—It was stated April 6, 1917, that when the work of salvaging brass, steel and other material being carried on at Kingsland, N. J., by this company is completed, the last chapter of the story of what was one of the largest shell contracts placed on this side since the beginning of the war, a contract involving \$83,000,000, will have been written.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

After many difficulties and delays extending over nearly two years the company was just approaching the successful completion of the order when the plant was destroyed by fire and explosion. Completed and uncompleted shells to an estimated value of over \$8,000,000 were destroyed.

Under an agreement concluded some time after the disaster the company, it is understood, surrendered its claim for payment for these shells from Russia, hoping to make up its loss by the sale of salvaged material and from the proceeds of insurance.

About one-third of the insurance claims, amounting to approximately \$3,250,000, have been paid. The insurance was distributed among a number of companies. The fact that some companies have paid up is taken as establishing a precedent regarding the validity of the company's claims.

A full report will probably be made to stockholders early in 1917.

CANADIAN COAL PRODUCTS ENGINEERING, LTD.

*(1) Incorporated on Feb. 23, 1917, in Canada, with a capital of \$1,250,000, divided into 12,500 shares of \$100 each, to acquire coal fields, coal lands, etc. Incorporators: Archibald James Reid, Geo. Norman Limpicht, Wm. Bowler, Chas. Edward Buckley, Oliver David Cadotte, Frederick Chas. Allen and Harry Reeve Burrows. Chief place of business, Toronto, Ont.

CANADIAN CONSOLIDATED FELT CO., LTD.

*(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net sales.....	\$577,766	\$503,659
Net gain.....	4,150	148,965
Prev. surp.....	131,544	180,360
Sinking fund profit.....	1,200	150
Total surplus.....	136,894	131,544
†Deficit.		

Fixed assets are shown at \$640,915 in the balance sheet, and movable assets \$2,550,630, a total of \$3,191,546. Current liabilities are \$314,406 with a reserve of \$80,032 for bad debts, and surplus of constituent companies amounting to \$234,212, which, with its own surplus, makes a total of \$371,107.

CANADIAN CONSOLIDATED PRESS, LTD.

*(1) Incorporated on Feb. 23, 1917, in Canada, with a capital of \$1,000,000, divided into 10,000 shares of \$100 each, to carry on the business of printing, publishing, lithographing, engraving, advertising, etc. Incorporators: Duncan McArthur, Harold Ernest McKittrick, Jas. Aitchison, Archibald Thomas Struthers and Robert Elmer Fennell. Chief place of business, Toronto, Ont.

CANADIAN CONSOLIDATED RUBBER CO.

*(1) Bond Issue Planned.—It was announced Jan. 24, 1917, that a special meeting of the shareholders of this company had been called for Feb. 14 to vote on a resolution authorizing the creation of a first and refunding mortgage bond issue of \$8,000,000.

The issue, if ratified, will provide for the funding of various obligations of the company, including the paying off of bank loans and the retirement of the \$2,500,000 debentures that fall due towards the end of 1918. It will also provide for funds for future development.

There is outstanding a first mortgage issue of \$2,600,000, secured on the property of two subsidiaries, the Canadian Rubber Co. and the Granby Rubber Co. Bonds of the proposed new issue, it is believed, would be held against the retirement of that issue at maturity.

—Apr.

*(1) Report, Year Ended Dec. 31, 1916.—Report of this company, the Canadian subsidiary of United States Rubber Co., for year ended Dec. 31, 1916, showed net sales of \$12,064,695, an increase of \$4,572,548 over 1915. The 1916 business

was the largest in the history of the company.

Net profits were \$905,205, against \$584,978 in previous year. After paid dividends surplus was \$617,600, bringing total surplus to \$3,307,900.

Pres. W. H. Robinson said: "The Granby factory was reopened early in 1916 and a steady production from that factory enabled the company to bill an increased volume of export and other business. Some minor extensions were made at several factories and now there is ample factory capacity for further increased business provided sufficient workmen can be obtained."

CANADIAN COTTONS, LTD.

*(1) Outlook Bright.—Reported on March 24, 1917, that the outlook for 1917 continues bright with fall orders coming in in good shape, although not as briskly as in 1916, owing both to the trade being well stocked and also to a certain fear as to the course of cotton in the event of war changes, or a cessation of hostilities.

CANADIAN ELECTRIC & GAS HEATER CO., LTD.

*(1) Incorporated on March 13, 1917, in Canada, with a capital of \$250,000, divided into 2,500 shares of \$100 each, to manufacture and sell gas and electric stoves, heaters, etc. Incorporators: Chas. Joseph Eugene Charbonneau, Jean Charbonneau, Jas. Edward Coulin, Joseph Simeon Pilon and Philippe Morel. Chief place of business, Montreal, Que.

CANADIAN EXPLOSIVES CO.

*(1) Increased Dividend.—Announced Jan. 9, 1917, that this company had declared a quarterly dividend of 1½% on the common stock, payable Jan. 31 to stock of record Dec. 21. The last previous dividend was 1%.

CANADIAN FAIRBANKS-MORSE CO.

*(1) Report, Year Ended Dec. 31, 1916, shows profits, after providing for depreciation of plant and special equipment, and after providing for taxes payable under the business profits war tax act in respect of profits for the years 1915 and 1916, were \$636,620, and the surplus carried over from 1915, \$697,836, making \$1,334,466 available for allotment. From this was paid preference dividends, \$45,000, common dividends, \$160,000, and the surplus was carried forward of \$1,129,466.

CANADIAN GENERAL ELECTRIC CO.

*(1) Report, Year Ended Dec. 31, 1916, shows income account as follows:

	1916	1915
Gross profits....	\$2,225,912	\$1,219,513
Net profits.....	1,185,421	764,379
Surp. after divs.	405,577	66,357

*(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,112,696, compared with \$1,007,119 Dec. 31, 1915. The amount appropriated from this surplus for reserve fund in 1916 was \$500,000; in 1915, \$300,000, leaving a balance in 1916 of \$612,695, and in 1915 of \$707,119.

CANADIAN IRON FOUNDRIES, LTD.

*(1) Status.—It was stated March 16, 1917, that this company, which was incorporated on March 16, 1915, to take over as a going concern the business, property and assets of the Canada Iron Corp., in liquidation, and which made favorable progress during its first year's operations, had every prospect of doing even better during the current year.

In the first year of operation a net profit of \$186,189 was shown, before providing for interest and sinking fund on the "A" debenture, of \$22,695, leaving a balance of \$163,494.

Only about \$181,400 of "A" debentures are held by shareholders, and the "B" debentures, \$234,540 (exchanged to Sept. 30th), do not become a cumulative charge by way of interest until October, 1918.

The principal business of the company is the manufacture of cast iron pipe. The fact that other similar plants are engaged in munitions work has been to the advantage of the company, which has not engaged in any war work with the exception of the manufacture of car wheels for the British Government.

CANADIAN KIRKLAND GOLD MINES, LTD.

*(1) New Company.—It was announced March 12, 1917, that this company had been incorporated to take over and develop a group of claims south of the McCane, owned by George Tough and his associates in Teck township. Geological conditions are similar to those in the producing district. Several veins have been uncovered from which good assays have been received. The capital of the company is \$2,000,000.

CANADIAN LOCOMOTIVE CO., LTD.

*(1) Locomotive Order.—Stated on April 9, 1917, that an order for 50 Mikado locomotives for the Canadian Government Railways had been placed with this company.

CANADIAN MINING CORP., LTD.

*(1) Successor Co.—See Mining Corp. of Canada, Ltd. Item No. 1.

CANADIAN NIAGARA POWER CO.

*(1) Combined Income Account, Quarter Ended March 31, 1917.—See Niagara Falls Power Co.—Item No. 1.

*(2) Income Account, Year Ended June 30, 1916, compares as follows:

	1916	1915
Gross.....	\$35,476,275	\$25,912,106
Net.....	9,373,530	6,623,292
Def. after chgs..	243,127	2,265,283

*(3) Balance Sheet, as of June 30, 1916, shows a profit and loss surplus of \$3,497,052, compared with \$4,697,611 June 30, 1915.

*(4) Comment on Annual Report.—In commenting on the report of this company for the year ended June 30, 1916, the "Toronto World" on Jan. 13, 1917, said, in part:

"That another transcontinental railway system is rapidly coming into its own is strikingly illustrated by the annual report of the Canadian Northern Ry. System.

"The remarkable progress made during the past 12 months is likely to prove one of the spectacular achievements of the leading Canadian corporations, even in a year during which many Canadian companies have reported exceptional growth of business.

"During the year the system had under operation an average of 8,048 miles, as compared with an average of 7,266 miles, an increase of 770 miles, or 10.72% over the previous year.

"As was to be expected, a large part of the system's increase in freight revenue originated from the grain traffic. The system during the year carried a total of 131,978,809 bushels of grain, as compared with 58,575,520 bushels in 1915, an increase of 73,403,289 bushels, or 125.31 per cent.

"Operating expenses were \$26,102,744, compared with \$19,288,814, an increase of \$6,813,930, or 35.33%. A portion of this increase is due to the operation of Pacific Coast and the Northern Ontario divisions, which were operated for the first time during the course of the year.

"It is interesting to note, however, that the average distance a ton of freight was hauled increased from 204.08 miles to 288.46 miles, or 41.35%, with, of course, a marked advantage in operating results. The passenger train earnings per train mile increased from 87.409 cents to 93.379 cents, or 6.83%.

JANUARY 1 TO APRIL 30, 1917

(5) Montreal Station Contract.—It was announced Jan. 27, 1917, that this company had awarded the contract for the construction of the station in Montreal, and it is expected that the company's trans-continental trains will be operating through the three-and-a-quarter mile tunnel under Mount Royal by the middle of August. The station has been designed to fit into the scheme of the larger, permanent depot which is to be erected on the site.

(1) Pronounced Sound by Commission of Experts.—An Ottawa dispatch April 23, 1917, stated that a report completed on the Canadian Northern Ry. system by a special commission pronounced it as sound. The commission was composed of Edw. A. Loomis, Pres. of the Lehigh Valley R. R. Co., and Pres. John W. Platten, of the United States Mortgage & Trust Co. In their investigation they had the assistance of Coverdale & Colpitts, American railway engineers. In referring to the cost of the railway, the terms on which the capital was secured and the present value of the system, the commission stated:

"The capital now invested in the property appears to have been secured economically and expended wisely. The interest rate on the fixed capital has averaged only 3.93%.

"In our judgment, the railroad could not be duplicated for anything like its present cost."

It is now generally admitted that any financing to be undertaken by the company during the ensuing few years will have to be arranged in New York.

"We are unanimously of the opinion," says the report, "after many months' consideration of the subject, that the Canadian Northern Ry. undertaking is sound and that its soundness can be demonstrated at this time.

"About 5,911 miles of prairie lands are already so far developed as to warrant the prediction that they will carry the whole system in the comparatively near future. The Pacific, Northern Ontario and Eastern lines may develop more slowly, but can be made self-sustaining and profitable under a proper programme. The railway now has 9,513 miles of line practically completed and 948 miles under construction, which will make the total mileage of the system 10,461 miles.

"The entire transcontinental main line is well located and well built. As to grades and alignment, it is superior to its competitors."

CANADIAN PACIFIC LUMBER CO.

(1) Permit to Borrow.—On Feb. 24, 1917, the Toronto, Ont., "Financial Post" said: "By a plan which has just been authorized by the Supreme Court, the assets of the Canadian Pacific Lumber Co. stand a much better chance of being realized on to advantage than formerly. The receiver has been given permission to borrow \$250,000 at 3% discount, the certificates to bear interest at the rate of 6%. As soon as the issue is placed and the money is in hand, the bondholders who are in possession will be enabled to pay off all claims against the company and cover operating charges for the next three years."

—Apr.

(1) Syndicate Formed to Take Over Plant.—On April 21, 1917, the "Financial Post of Canada" stated that arrangements had been completed by F. W. Reynolds for the taking over of the mill and plant of this company by a Vancouver financial syndicate, with whom are associated M. J. Haney, of Toronto, who is Pres. of the company.

The Vice-Pres. is Richard P. Gough, C. A. Barnard, of Montreal, and J. F. M. Stewart, of Toronto, are associated in the company as directors.

The mill at Port Moody, at the upper end of Burrard Inlet, is situated on tidewater, and is adapted to advantageous shipping. It will be improved and operated to its fullest capacity.

(4) Statement of Stock Holdings.—On March 23, 1917, the "Boston News Bureau" said that in October, 1916, there were 49,287 holders of Canadian Pacific against 27,000 three years previously, an increase of 54.70%. Aggregate British and Canadian holdings decreased in percentage from 72.58 to 64.68%, while United States holdings increased from 10.42 to 22.12%.

Canadian purchases are believed likely to increase steadily. Both from sentimental reasons and through the high confidence in Canada's "premier security," the greater part of these purchases is made and retained as permanent investment.

In 1913 there were 3,400 Canadian shareholders of 12.68% of the stock; in 1916, 6,531 shareholders of 15.13% of it. Number of shareholders almost doubled in the period in which aggregate holdings increased 2.55%. At the same time, however average of holdings is higher than elsewhere, Canadian holders being 13.20% of total stockholders.

—Apr.

(1) New Director.—Announced April 11, 1917, that at the monthly meeting of directors of this company Senator Frederick L. Belque had been elected a director to fill the vacancy caused by the death of Robert Mackay.

(2) Report, 6 Months Ended Dec. 31, 1916, shows gross earnings of \$76,717,900. This includes earnings from the railway and from lake and ocean steamers. Expenses of operation were \$45,843,100. Net earnings were \$30,840,700. After deducting fixed charges of \$5,132,500 there remained a surplus of \$25,742,200.

(3) Bond Issue Postponed Because of United States Government Financing.—On April 18, 1917, Lord Shaughnessy, Pres. of this railroad, issued the following statement in connection with the postponement of the company's proposed bond issue:

"The proposed issue of collateral trust bonds by the Canadian Pacific Ry. was entirely at the instance and for the benefit of the British Treasury. The company would reap no benefit whatever, but felt it a duty to give such financial co-operation as was possible in present circumstances. Had the issue been made the company's loan of credit and cash to the exchequer of the empire would have appropriated \$250,000,000.

"The transaction has been postponed indefinitely because now conditions resulting from the entrance of the United States into the war have made other financial plans more desirable."

The bonds were to have been issued through J. P. Morgan & Co. at 97 and interest. The imminence of the new Government financing caused the postponement.

CANADIAN REIN DRIVE TRACTORS, LTD.

(1) Incorporated on Feb. 26, 1917, in Canada, with a capital of \$1,000,000 divided into 10,000 shares of \$100 each, to carry on the business of manufacturers of and dealers in tractors, motors, engines, carriages, machinery and agricultural implements of all kinds and of all materials. Incorporators: Henry Jasper Martin, Chas. Evans-Lewis, Thomas Neville Poole, Arthur Deane Parker and Edmund Hale Austin. Chief place of business, Toronto, Ont.

CANADIAN RUBBER CO.

(1) Bonds.—See Canadian Consolidated Rubber Co.—Item No. 1.

CANADIAN SHOVEL & TOOL CO., LTD.

(1) Incorporated on April 11, 1917, in Canada, with a capital of \$500,000, divided into 5,000 shares of \$100 each, to manufacture shovels, spades, scoops, mechanics, railway, field and mining tools. Incorporators: Wm. Arthur Holton, Frederick Skelton, Walter Ewart Skelton, Mark Baldwin Holton and Luther Janna Holton. Chief place of business, Hamilton, Ont.

CANADIAN STEEL FOUNDRIES, LTD.

(1) Addition.—It was announced Feb. 5, 1917, that this company had started work on an addition to its plant at a cost of \$500,000, including machinery. These improvements will double the capacity of the plant.

CANADIAN STEEL CORP., LTD.

(1) Building Delay.—It was stated Jan. 26, 1917, that this company would not go forward at once with its proposed big plant at Ojibway, opposite Detroit, owing to high prices of materials and other conditions. The corporation has a layout for 16 blast furnaces and had planned to build four in 1917.

CANADIAN WESTERN NATURAL GAS CO.

(1) Operation Results, Three Months.—It was announced March 5, 1917, that this company, which operates at Calgary, in the first three months of its fiscal year increased its earnings by \$34,348. The largest gain was in December when earnings amounted to \$121,972, an increase of \$21,880. In November there was a decrease of \$711,000, and in October an increase of \$13,177. At the end of the calendar year the company's available supply of gas was 174,800,000 cubic feet.

CANADIAN WESTINGHOUSE CO., LTD.

(1) Stock Increase—Rights to Shareholders.—Announced Jan. 23, 1917, that following the recent announcement of the increase of the authorized capital stock of this company from \$5,000,000 to \$10,000,000, the directors had decided to increase the paid-up capital by the immediate offering of \$1,250,000. Shareholders of record Feb. 1 have the opportunity to subscribe between that date and Feb. 15. Subscriptions will be for one share to every four shares now held. The new shares must be paid for by March 1.

(2) Extra Dividend.—It was announced at Toronto, Ont., Jan. 23, 1917, that this company had declared a dividend of 25%, payable March 1 to stock of record Feb. 1. The dividend may be used for payment for new shares, it being for the exact amount of the capital increase. It is practically a stock dividend, paid from accumulated profits.

CANADIAN WOOD MOLYBDENITE CO. (THE), LTD.

(1) Incorporated on March 20, 1917, in Canada, with a capital of \$1,000,000 divided into 100,000 shares of \$10 each, to carry on the business of mining and manufacturing molybdenite or any mineral, in all its branches. Incorpor-

CANISTER CO. OF NEW JERSEY,
 JERSEY CITY, N. J.
 (1) Incorporated on April 23, 1917, in New Jersey, with a capital of \$300,000, to manufacture and deal in cans, packages and receptacles. Incorporators: C. H. Jarvis, P. L. Nieser and John R. Turner, Jersey City, N. J.

CANTON CORRUGATING CO.
 (1) Absorption by Successor Co.—See Canton Metal Products Co.—Item No. 1.

CANTON ELECTRIC CO.
 (1) Merger Authorized.—It was announced Jan. 19, 1917, that the Ohio Public Utilities Commission had authorized this company to take over the Sunnyside Electric Co. of Wheeling, W. Va., and the Ohio Light & Power Co. of Newark, O., and form the Central Power Co., which was given permission to issue \$2,760,000 in capital stock, to be exchanged for the capital stock of the merged companies.

The Central Power Co. will operate the large plant now under construction on the Ohio River, near Wheeling, W. Va., and also the plants at Wheeling and Steubenville, Ohio.

CANTON METAL PRODUCTS CO.,
 CLEVELAND, O.

(1) New Company.—It was stated Jan. 17, 1917, that the business of the Canton Corrugating Co., Canton, O., would be taken over by a new corporation capitalized at \$1,000,000, to be known as the Canton Metal Products Co. Application for a charter for the new corporation has been made by its officers.

The Pres. and Gen. Mgr. will be Harry G. Bow, formerly manager of sales for the Berger Mfg. Co., at Canton, R. L. Kreighbaum, advertising and sales promotion manager of the Berger Co. for a number of years, will be Vice-Pres. and sales manager. H. L. MacKenzie, formerly manager of the jobbing department for the Berger Co., and for four years manager of the Canton Corrugating Co., will be Treas. J. B. Immler will be Sec'y.

A full line of pressed steel building materials, including such sheet-metal goods as roofing, siding, shingles, eaves trough, conductor pipe and reinforcing plates, will be manufactured. New buildings of modern type will be erected in addition to the plant of the Canton Corrugating Co. now taken over.

The new structures are to be completed about April 1, at which time it is planned to operate with about 500 employees.

The company controls a 6¼-acre site with railroad siding facilities. Executive offices will be maintained at Canton, O.

(2) Incorporated in January, 1917, in Ohio, with a capital of \$1,000,000. Incorporators: Harry G. Bow, R. L. Kreighbaum, J. B. Immler, H. L. MacKenzie and Ed. W. Stevens.

Vallance, Hamilton, Ont.

CARBON FUEL CO.

(1) Suit Filed.—See Cincinnati, Hamilton & Dayton Ry. Co.—Item No. 3.

• **CARBON STEEL CO.**

(1) Special Meeting to Consider Charter Change.—It was announced Jan. 4, 1917, that stockholders of this company had been notified of a special meeting to be held at the offices of the company on Jan. 15 to consider a plan to be submitted by the order of directors for transferring all the assets and business of the company to a corporation of the same name, organized under the laws of Pennsylvania. The company now does business under a West Virginia charter.

A special communication signed by Pres. Charles McKnight, sets forth reasons that make the change in the charter desirable. As the company is operated, holders of common stock cannot

receive dividends until a dividend of 8% per annum on the 1st pfd., and a dividend of 6% on the 2d pfd. stocks have been paid.

In view of the fact that the company did not begin paying dividends until the Fall of 1916, there cannot be made any dividend disbursement on the common until after Sept. 30, 1917, although the company has earned a sufficient amount to do so.

The Carbon Steel Co. has a capital of \$5,000,000, of which \$3,000,000 is common stock, \$1,500,000 is 2d pfd. and \$500,000 1st pfd. stock. The plan to be submitted to stockholders includes the creation of two classes of shares, instead of three, common stock and pfd. stock—and to this end the 1st and 2d pfd. stocks as such are to be eliminated.

(2) Rechartering Plan Before Stockholders.—It was announced at Pittsburgh, Jan. 15, 1917, that at a meeting of this company stockholders the plan submitted by the directors for a rechartering of the company under the laws of Pennsylvania was taken up and it was decided to issue a circular letter to all the holders of stock asking their opinion of the plan. If 95% of them approve the proposition it will be put into effect.

The common stock can participate. The replies to the circular letter are to be in by Jan. 29, to which date the meeting was adjourned.

(3) Reorganization Plan Abandoned.—It was announced at Pittsburgh Jan. 29, 1917, that at a meeting of directors of this company on that date the plan of reorganization was declared inoperative and abandoned. Pres. Charles McKnight was requested to notify all stockholders of this action.

At an adjourned meeting of the stockholders held earlier in the day the plan proposed was carried by an affirmative vote of 37,888 shares against a negative vote of 4,490 shares; but, inasmuch as the proposition called for the acceptance of 95% of each class of stock, the board decided to abandon the plan.

—Mar.

(1) Bond Retirement.—Announcement was made on March 23, 1917, that strength in this company's common stock was probably due to the announcement that the company would retire \$700,000 bonds on April 1. This will leave only \$343,000 of bonds outstanding and these do not mature until 1932.

Cash in the treasury on April 1, after paying for the bonds retired, it is estimated, will be \$900,000. The common stock earned \$86 a share in 1916 after allowing for all charges and heavy depreciation. The stock is still on a 6% basis and the company is committed to a policy of waiting until the fall before announcing extra disbursements on the common.

(2) Extra Dividend.—On March 27, 1917, directors declared an extra dividend of 2% on the common stock, payable May 22 to stock of record May 15.

—Apr.

(1) Legal Move Against Dividend.—A Pittsburgh dispatch April 4, 1917, stated that action had been taken in the United States District Court there to prevent this company from paying the dividend of 2% on common stock, the dividend to be for the fiscal year ended Sept. 30. The action was taken by Henrietta S. Kieth, of Pittsburgh, representing the 2d pfd. stockholders. A hearing was set for April 16.

CARDEN OIL CO.

(1) Stock Sold.—See Homa Oil Co.—Item No. 1.

CARDINAL COPPER MINES CO.,
 SPOKANE, WASH.

(1) Incorporated on March 9, 1917, in Washington, with a capital of \$1,500,000. Incorporators: Arthur E. Law, H. J. Cole, E. S. Campbell, H. G. Twomey, H. R. Von Dreathen, Frank Watson and E. F. Wann.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

**CAREY PRINTING CO., INC.,
MANHATTAN, N. Y.**

¹(1) Capital Increased.—On April 13, 1917, the company filed notice at Albany, N. Y. of an increase in capital stock from \$250,000 to \$500,000.

CARIBOU MINES & MILLS CO.

¹(1) Mill Closed for Winter.—It was announced Jan. 1, 1917, that this company's 100-ton mill at Caribou, Cal., had been closed for the winter on Dec. 20. Mill operations began in July. The mine had been idle for 30 years; it was once one of the most famous silver properties in Colorado. The main shaft is now down 1,000 feet and company will sink another 100 feet. Mill operations will be resumed about April 1, 1917.

CARLISLE MINING CO.

¹(1) Control Sold.—It was announced Jan. 24, 1917, that August Hecksher and associates had purchased the controlling interest in this company, of New Mexico. The deal is understood to have involved a large sum of money.

¹(2) Status.—On Jan. 24, 1917, it was stated that the mine of this company, located at Steeple Rock, New Mexico, was originally owned by Marshall Field, L. Z. Leiter and N. K. Fairbanks, Chicago capitalists. It was a famous producer of gold during the early eighties—with a production record of over \$6,000,000.

About 1887 the Carlisle was sold to a London exploration company, which worked it for several years afterward. As depth was reached the ores turned into a complex mixture of gold, silver, copper, lead and zinc, and at that time it was impossible by any known method to make a profitable separation of the minerals.

The Carlisle was closed down about 1890 and allowed to flood. The present owners have unwatered the mine and have discovered there a large tonnage of ore, all of which is now amenable to profitable treatment under improved metallurgical processes.

**CARLSON-WENSTROM
MANUFACTURING CO.**

¹(1) Initial Dividend.—Announced Jan. 10, 1917, that this company had declared an initial dividend of 25%, payable immediately. All the stock of this company is owned by the Carwen Steel Tool Co.

CARNATION COPPER CO.

¹(1) Incorporated on March 16, 1917, in Delaware, with a capital of \$1,500,000, to mine for gold, silver, copper and other ores and metals. Incorporators: Herbert E. Latta and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CARNEGIE GAS CO.

¹(1) Wells Good Producers.—It was stated Jan. 2, 1917, that in the new development in Springhill Township, Greene County, Pa., this company's wells on the George Ismlinger farm show good staying qualities. No. 1, drilled a little deeper, is producing 480 barrels, and No. 2, 100 barrels. Dec. 28, 1916, the market value of the production from these two wells is \$1,652 a day.

CARNEGIE STEEL CO.

¹(1) Shipping Coal by Water.—A Pittsburgh dispatch Jan. 10, 1917, stated that this company and other large industrial establishments of the Pittsburgh district were preparing to ship enormous quantities of coal from mines along the Monongahela River. Permits required from the Government had given some idea of the large movement in coal properties along the upper Monongahela River, and there are a number of deals that are being kept from the newspapers until final details are completed.

Several new mines are being opened to water transportation, and many others now operating at half capacity are preparing to push their output to the maximum.

¹(2) New Gas Production, Estimated.—It was stated Jan. 13, 1917, that approximately 9,000,000 feet of gas would be produced daily at the new by-product coke ovens to be constructed by this company at New Castle, Pa. The gas will be utilized at the open-hearth furnaces and tin plate mills.

¹(3) Iron Curtailment.—Announced on Jan. 25, 1917, that this company had 10 blast furnaces down and five banked as a result of inability to secure coke. This is a 30% curtailment, as the company has 51 blast furnaces.

¹(4) In New District.—A Youngstown, O., dispatch Jan. 30, 1917, stated that this company was moving into its new Youngstown district office, just completed at a cost of \$150,000.

Officials stated one or two of the bar mills being erected at the new town of McDonald would be ready for operation in August. Ten mills are under construction and completion of these units will follow as rapidly as possible. The entire plant will be completed within a year.

The layout for the McDonald plant calls for 30 bar mills.

—Feb.

¹(1) Fuel Shortage Closes Mills.—A Youngstown, O., dispatch Feb. 20, 1917, stated that the upper and lower Union Works of this company there, representing twelve bar mills and employing 2,000 men, had been closed down, owing to fuel shortage. The company also has three of its seven blast furnaces in the Youngstown district idle owing to fuel conditions. Most manufacturers are finding it difficult to secure fuel for operations.

¹(2) Additional Locomotive Orders.—See Baldwin Locomotive Works.—Item No. 7.

—Mar.

¹(1) Price Advance.—Announced March 8, 1917, that this company had advanced its prices on bars and shapes by \$7 a ton and on plates by \$15. The new prices are: Bars, \$3.35; shapes, 60 cents; plates, \$4.50. It was stated other mills would adopt the same prices.

—Apr.

¹(1) Niles Furnace Started.—A Youngstown, O., dispatch April 25, 1917, stated that this company was starting its Niles blast furnace, which had been idle since Dec. 5, 1916, when it was closed down owing to coke shortage. The stack has a daily capacity of 350 tons and will make Bessemer iron. This makes the entire seven corporation stacks in the Youngstown district in blast.

CARPENTERS BUS LINE CO.

¹(1) Stock Issue Authorized.—Announced Jan. 18, 1917, that the New York Second District Public Service Commission had authorized this company, Watertown, N. Y., to issue and sell at par 320 shares of its common stock, the proceeds to go for the purchase of vehicles and the development of the business.

CARPENTER STEEL CO.

¹(1) New Plant.—It was announced Feb. 14, 1917, that this company, Reading, Pa., manufacturer of tool, high-speed and alloy steels, had closed a contract for the erection of a modern steel storehouse and office along the main line of the New York, New Haven & Hartford R. R. at Hartford, Conn.

CARRIAGE FACTORIES, LTD.

¹(1) Report, Year Ended Nov. 30, 1916, shows total profits of \$46,334, against \$399,263 in 1915. After deducting head office expenses, etc., the profits were reduced to \$33,454, a decrease of \$266,770. After bond interest the profits available for dividends were \$4,144, against \$207,230 in 1915.

¹(2) Balance Sheet, as of Nov. 30, 1916, shows a profit and loss surplus of \$315,978, compared with \$352,391 Nov. 30, 1915.

This information, while not guaranteed, is believed to be correct.

CARTER CAR CO.

¹(1) Plant Sold.—See Olympian Motors Co.—Item No. 1.

CARTER, MACY & CO., INC.

¹(1) Initial Dividend on Pfd.—It was announced March 6, 1917, that this company had declared an initial dividend of 1½% on the 1st pfd. and 1½% on the 2d pfd. stock, both payable March 6 to stock of record March 1.

There are \$500,000 of each of these issues outstanding. The American International Corp. has a substantial interest in the company, represented in 1st pfd. and common stocks.

CARWEN STEEL TOOL CO.

¹(1) Initial and Extra Dividends.—Announced Jan. 10, 1917, that this company, Philadelphia, had declared an initial dividend of 2% and an extra of ½ of 1%, payable Feb. 10 to stock of record.

—Apr.

¹(1) Extra Dividend of ½%.—This company April 19, 1917, declared the regular quarterly dividend of 2% and an extra of ½%, both payable May 10 to stock of record May 1.

†Net after operating expenses and ascertained losses.

‡Net after depreciation, operating expenses, etc.

¹(2) Earnings on Stock.—It was stated March 19, 1917, that this company's 1916 surplus after pfd. dividends of \$497,221 is equal to 5.96% on \$8,300,000 common stock, compared with 7% earned on the same stock in 1915.

¹(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$4,061,719, compared with \$3,554,498 Dec. 31, 1915.

¹(4) Comment on 1916 Report.—On March 20, 1917, the "Wall Street Journal" said that the fact that this company's sales of \$13,047,256 for 1916 were somewhat less than in former years was largely due to a substantial falling off in the production of cereals, both in the United States and Canada. Another important factor in lowering the sales volume of 1916 was the shortage of metal product with which to supply the Spring trade, due to the great difficulty experienced in securing raw materials.

Earnings of the company for three years after making current provision for depreciation and other necessary reserves amounted to \$7,199,270, out of which the company paid interest and discount charges incidental to its bonded and other indebtedness of \$2,653,026, and pfd. stock dividends of \$2,551,500, also special appropriations to reserves of \$800,000, leaving the net surplus of \$1,194,744.

The amount of customers' instalment notes and accrued interest thereon was reduced from \$15,737,141 to \$2,970,312 during the fiscal year.

Payment of \$500,000 required under the trust deed as of Dec. 1, 1916, for retirement of the same amount of bonds was duly made, thereby reducing the bonded indebtedness to \$9,000,000, payable \$500,000 on Dec. 1, 1917, and Dec. 1, 1918, respectively, and \$1,000,000 annually thereafter in the years 1919 to 1924, inclusive.

CASEY-HEDGES CO. (THE).

¹(1) Directors.—It was announced Feb. 9, 1917, that at the annual meeting of this company the following officers and directors were elected: M. M. Hedges, H. Erdman, John S. Littleford, H. M. Levy, Thos. H. Johnson, James W. Bullock, J. P. Orr, C. E. Page, Alfred Hill and Frank Stimmel.

¹(2) Earnings, 1916, as shown in the annual report submitted Feb. 9, 1917, were \$181,268.

¹(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus and undivided profits of \$362,371.

¹(4) Extra Dividend on Common.—Announced Feb. 9, 1917, that this company had declared dividends of 6% on both the common and pfd. stocks for the year 1917 and an extra dividend of 2% was ordered payable to common stockholders March 1, 1917.

—Mar.

¹(1) Status.—It was stated March 19, 1917, that this company, Chattanooga, Tenn., incorporated under the laws of Ohio, with a capital of \$450,000 6% cumulative pfd. stock and \$450,000 common, par \$100, manufactures boilers, patent mechanical draft appliances, cast iron pipe, fittings, fountains, plumbers' supplies and specialties. The stock is listed on the Cincinnati Stock Exchange. Dividends on both the pfd. and common stocks are payable quarterly at a 6% per annum rate.

The statement of financial condition Jan. 1, 1917, made by a chartered accountant, shows total net assets of \$1,262,471. Against these assets there are no debts.

By-laws of the company provided that during the first four years, beginning Jan. 1, 1906, there should be set aside each year at least \$25,000 from the net earnings as a reserve fund available for pfd. dividends, any such payments out of this reserve fund to be replenished from first surplus earnings available. This \$100,000 was all set aside out of earnings of 1906 and 1907.

M. M. Hedges is Pres. and Gen. Mgr.; Thos. H. Johnson, 1st Vice-Pres.; John S. Littleford, 2d Vice-Pres.; Alfred Hill, Sec'y, and M. M. Hedges, Treas.

CASTNER ELECTROLYTIC CO.

CELLULOID CO.

¹(1) New Director.—At the annual meeting of stockholders on March 27, 1917, Wynant D. Vanderpool was elected

a director to succeed Charles F. Bassett, deceased. The retiring directors were re-elected.

• CENTENNIAL COPPER MINING CO.

¹(1) Production, December and 13 Months.—Announced Jan. 23, 1917, that this company in December produced 188,615 pounds of copper, against 155,506 in November.

During 1916 the production totaled 2,360,965 pounds, against 2,347,500 in 1915.

—Feb.

¹(1) Production.—Announced Feb. 19, 1917, that this company in January produced 163,841 lbs. of copper.

—Mar.

¹(1) Report, Year Ended Dec. 31, 1916, shows mining profits of \$276,546, or slightly in excess of \$3 a share from 1916 operations. Available profits in 1915 were \$142,439, or \$1.58 a share. The average price obtained for copper in 1916 was 25.02 cents a pound, as compared with 18.145 cents in 1915.

¹(2) Production, February, 1917.—Announced March 16, 1917, that this company in February produced 151,759 pounds of copper, compared with 163,841 in January, 1917.

¹(3) Assets Increasing.—It was stated March 21, 1917, that this company's No. 2 shaft had attained a depth of 4,290 feet, 182 feet below the 37th level, so that the depth is considerably greater than generally understood. No. 1 is just 4,000 feet deep. Centennial rock is carefully selected under ground so that there is practically no rockhouse discard, whereas four years previously the rockhouse discard was 6% of the tonnage hoisted.

The cost of production in 1916 was the highest in four years—13.44 cents. Excess of current assets is approximately half a million dollars, increasing at the rate of \$68,000 per month under existing copper contracts.

The company has paid two dividends, totaling \$180,000. These were paid in 1916, the only dividends ever paid by Centennial through many years of existence.

—Apr.

¹(1) Production, March, 1917.—This company, April 18, 1917, reported March production as 173,967 lbs. of copper, compared with 151,759 previous month.

CENTENNIAL MILL CO.

¹(1) Land Sold for Shipyard.—See Skinner & Eddy Shipbuilding Co.—Item No. 1.

CENTRAL AGUIREE SUGAR CO.'S

¹(1) Extra Dividend on Common.—Announced March 16, 1917, that this company had declared a regular quarterly dividend of \$2.50 a share and an extra of \$7.59 a share on the common stock, payable March 31 to stock of record March 26.

—Apr.

¹(1) Estimate of Earnings.—On March 31, 1917, the "Wall Street Journal" said that this company, the second largest Porto Rican sugar property, should earn rising \$70 a share on its \$3,000,000 stock in 1917. Last year net profits were just a shade under \$60 a share.

The company has already ground 200,000 tons of cane, which is about half the estimated crop. The sugar content has been running not far from 11%, so that for the full season the company should make about 42,000 or 43,000 tons of sugar. This will contrast with an exact output of 39,690 tons last year.

This year Central Aguirre is ahead of last year in every respect. The crop of cane is larger, sugar content greater and the price received for the sugar so far sold averages about one-half cent higher than last year. This company's selling policy wholly eliminates the element of speculation. The sugar is sold as produced, at the prevailing market price.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Central Aguirre stockholders are undoubtedly in line for a handsome extra cash disbursement at the June meeting of the board. The stock is on a regular 10% basis, in addition to which an extra of \$7.50 was declared a few days ago. In June last year the company declared a \$25 cash dividend, and prospective share earnings of \$70 or more would seem to promise another dividend of at least this amount before the fiscal year is concluded.

CENTRAL ARGENTINE RY., LTD.

¹(1) **Financing.**—On Jan. 15, 1917, it was stated that the financing of this company, which had been arranged in the United States, involved the purchase by a group of bankers headed by J. P. Morgan & Co., and including Kuhn, Loeb & Co., National City Co., Guaranty Trust Co., Lee, Higginson & Co., and Wm. A. Read & Co., of \$15,000,000 ten-year 6% convertible notes, convertible at any time after one year into Central Argentine ordinary shares at par.

While the ordinary shares are selling considerably below par, the conversion privilege, running as it does for ten years, may easily prove of considerable value, as during the last ten years the stock sold above 120 on the London Stock Exchange.

It is understood that the proceeds of the notes are to be utilized to retire what is practically an equivalent amount of short term indebtedness of the company outstanding in London represented by two issues of notes which are to be called in and paid off in accordance with the wish of the management to co-operate with the British Treasury in securing American exchange.

¹(2) **Status.**—It was stated Jan. 15, 1916, that the Central Argentine Ry. is as old as a large part of the railroads in the United States. It was organized in 1863 and operates about 3,300 miles of road, or not far from the mileage directly owned either by the New York Central or by the Pennsylvania R. R. (lines East of Pittsburgh), or the Union Pacific, half again as big as the Norfolk & Western and somewhat less than either the Illinois Central, the Baltimore & Ohio or the Louisville & Nashville.

The company's 4% debenture stock, which corresponds, as nearly as comparisons permit, to the first mortgage bonds in the United States, sold in London for years above par, at a time when there were very few 4% bonds of American railroads which were quoted at anything like so high a price.

—Mar.

¹(1) **Notes—Syndicate.**—It was announced March 14, 1917, that the \$15,000,000 10-year 6% convertible notes of this company would be offered at 100 and interest by a syndicate composed of J. P. Morgan & Co., National City Co., Lee, Higginson & Co., Kuhn, Loeb & Co., Guaranty Trust Co., and Wm. A. Read & Co. Notes are convertible at option of holder in New York or London, upon notice, any time after Jan. 31, 1918, into Central Argentine Ry. consolidated ordinary shares at par.

Principal and interest are payable in United States gold coin in New York, or, at holder's option, in sterling in London at fixed rate of \$4.85 to the pound. On six months' notice at option of the company the notes are redeemable in whole but not in part at 102 and interest on Feb. 1, 1922, or any interest date thereafter. Shareholders at a meeting in October, 1917, will pass on the conversion privilege; if not ratified, the notes are to be redeemed Jan. 1, 1918, at 102 and interest.

Proceeds will be used to retire £3,000,000 sterling notes outstanding. Company's total obligations, including the \$15,000,000 notes, aggregate \$90,659,527, while there are outstanding three classes of dividend-paying stock totaling \$188,055,114.

During ten years to June 30, 1916, net income averaged over four times fixed charges, while dividends averaged 5.6%

yearly were paid on the ordinary stock, of which the equivalent of \$136,988,000 is outstanding.

CENTRAL ARKANSAS RY. & LIGHT CORP.

¹(1) **Tenders Asked.**—Announced Jan. 10, 1917, that this company, a subsidiary of the Federal Light & Traction Co., is asking for tenders until Feb. 1, through the Columbia Trust Co., of New York, of sufficient of its first lien 15-year bonds to exhaust \$39,162 now available for the sinking fund.

CENTRAL CALIFORNIA GAS CO.

¹(1) **Note Issue Planned.**—It was announced Jan. 22, 1917, that this company had filed an application with the California Railroad Commission for authority to issue 32 \$1,000 notes, to bear interest at 7%, payable monthly, callable at 101 and accrued interest, and due in 1921, the proceeds of 12 of the notes being to acquire \$12,000 of the company's 6% bonds for its sinking fund, and the proceeds of the 20 remaining notes to pay a note dated May 21, 1915, at 6%, due one day after date, and issued to the Anglo-California Trust Co.

—Mar.

¹(1) **Request for Natural Gas Franchises.**—It was announced March 28, 1917, that this company had applied to the California Railroad Commission for approval of natural gas franchises in several towns and the authority to build a pipe line from the gas fields of Kern County. The high price of gas oil has made it imperative that the company either secure an advance in rates for artificial gas or substitute natural gas. It is said that the substitution will save consumers of the company \$100,000 a year. The company in five years will save, it states, two-thirds of the \$270,000 which the natural gas line will cost.

CENTRAL CALIFORNIA TRACTION CO.

¹(1) **Bondholders Asked to Reduce Interest Rate.**—Announcement was made on March 28, 1917, that effects of the jitney competition on California traction companies was seen in the letter sent to holders of the \$1,483,000 first mortgage bonds of Central California Traction Co. Holders of these bonds were asked to sign an agreement reducing the interest rate on them for the following three years from 5% to 2%, and also that bondholders waive all rights of foreclosure and the sinking fund provisions. The actual cause of the financial plight of the company is said to be the construction of the State highway between Stockton and Sacramento, the general utilization of automobiles by farmers for travel, and the use of motor trucks for freight transportation.

CENTRAL DAIRY CO.

¹(1) **Stock Increase Planned.**—Announced Feb. 20, 1917, that a special meeting of stockholders of this company had been called for Feb. 28 for the purpose of voting on an increase in capital stock from \$600,000 to \$1,000,000.

—Mar.

¹(1) **Capital Increased.**—On March 5, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$600,000 to \$1,000,000.

CENTRAL DYESTUFF & CHEMICAL CO.

¹(1) **Addition—Capital Increase.**—It was announced Feb. 7, 1917, that this company, Newark, N. J., had plans for

building a four-story addition to its plant, costing \$80,000. The company has increased its capital from \$250,000 to \$750,000, to provide for extensions.

CENTRAL FOUNDRY CO.

¹(1) **Capital Increase Planned.**—Announced Jan. 3, 1917, that this company, Anniston, Ala., had completed plans for increasing its capital by \$600,000.

¹(2) **Stock Issue Plan Approved.**—In a notice sent to stockholders, it was stated, Jan. 10, 1917, this company announced that at a special meeting the proposition to create a new issue of \$600,000 8% cumulative 1st pfd. stock was approved. A certificate of increase of capital stock has been filed with the Secretary of State of Maine, this giving effect to the action of the stockholders.

It is proposed to issue \$574,000 of the new 1st pfd. stock, and stockholders of record at the close of business Jan. 19 will be entitled to subscribe to this new issue in proportion to their holdings at par and accrued dividends, payment in full to be made on or before Feb. 3, 1917.

Appropriate subscription warrants will be mailed to each stockholder of record at the close of business Jan. 19. The stock books will not be closed.

—Mar.

¹(1) **Initial Dividend.**—Announced March 20, 1917, that Orin Root had declared a quarterly dividend of 2% on the 1st pfd. stock, payable April 15 to stock of record March 31. This is the first dividend paid on the new \$600,000 8% cumulative 1st pfd. stock authorized by stockholders Jan. 8.

—Apr.

¹(1) **Earnings, January and February, 1917.**—It was announced March 31, 1917, that this company's earnings for January and February, 1917, were \$228,000, or at the rate of \$1,368,000 a year, and compare with earnings for the entire previous year of \$700,000. These earnings represent substantially more than enough to pay a full year's dividends on the first pfd. stock.

¹(2) **January Earning Rate.**—It was stated April 4, 1917, that the January earnings of this company were at the rate of over 4% on the 2d pfd., and at that time pig iron was under \$30. Earnings in February were affected by freight embargoes and were much smaller than in January. The freight situation improved substantially, however, and March results reflected the freer movement of materials.

A Central Foundry subsidiary, the Coal & Iron Co., of which it owns the entire capitalization, has capacity of nearly 8,000 tons of pig iron a month, which can be manufactured at about \$10 a ton. In addition the company manufactures its own coke, of which it has a surplus of between 6,000 and 7,000 tons a month above requirements.

Earnings of the foundry business are understood to be running at the rate of between \$25,000 and \$35,000 a month.

¹(3) **Proposed New President.**—It was rumored on April 9, 1917, that de Courcy Cleveland, vice-president of this company, who for the past two years had been acting-president, would at the next meeting of the board be elected Pres. of the Central Foundries Co., the Central Iron & Coal Co., and the Central Radiator. Mr. Cleveland will succeed Waddill Catchings who resigned from that office to become associated with J. P. Morgan & Co. in that firm's purchasing department for the Allies and who recently was elected president of the Sloss-Sheffield.

¹(4) **Report, Year Ended Dec. 31, 1916,** shows consolidated income account of this company and Central Iron & Coal Co. as follows: Net, including other income, \$971,106; surplus after charges, \$675,710.

¹(5) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$524,340, compared with \$254,561 Dec. 31, 1915.

JANUARY 1 TO APRIL 30, 1917

⁴(6) Part of 1916 Production Sold at \$33 a Ton.—On April 19, 1917, Dow, Jones & Co. said this company had sold a large part of its 1916 production of pig iron at \$35 per ton, which represents practically the top price ever reached by Southern pig iron. Current shipments are running at a better rate than heretofore this year, as the freight situation since February has improved materially. Earnings in January and February were more than sufficient to cover full year's dividends on the 1st pfd. stock.

⁴(7) Officers Elected.—At a meeting of directors of this company April 25, 1917, D. C. Cleveland was elected Pres., R. R. Rust Vice-Pres., and F. D. Griffith Sec'y.

CENTRAL ILLINOIS LIGHT CO., PEORIA, ILL.

²(1) Capital Increased.—On Feb. 19, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$7,500,000 to \$20,000,000.

CENTRAL IRON & COAL CO.

⁴(1) Proposed New President.—See Central Foundry Co.—Item No. 3.

⁴(2) Consolidated Income Account, 1916.—See Central Foundry Co.—Item No. 4.

CENTRAL IRON & STEEL CO.

⁴(1) End of Receivership.—It was announced March 8, 1917, at Harrisburg, Pa., that this company is out of its financial difficulties, the receivers would be discharged and the following officers, recently chosen, would take charge: Robert H. Irons, Pres.; Francis J. Pall, Vice-Pres.; L. D. Perry, Sec'y and Treas.; J. M. Cameron, Vance C. McCormick, Charles L. Bailey, Jr., and Edward Bailey, directors.

CENTRAL JERSEY TRACTION CO., KEYPORT, N. J.

²(1) Incorporated on Feb. 1, 1917, in New Jersey, with a capital of \$900,000,

to operate a street railway. Incorporators: Francis A. Cater, James F. Schrader and Logan B. Gill, Philadelphia, Pa.

● CENTRAL LEATHER CO.

¹(1) Large Foreign Order Reported.—On Jan. 8, 1917, the "Boston News Bureau" said it was rumored that this company had taken another large order for sole leather for foreign account. As high as \$11,000,000 has been mentioned as the amount involved in this transaction.

Before the war Germany and Austria combined produced more sole leather than the United States. But since the outbreak of the war Germany has been unable to get any adequate supplies of hides, and it is figured by competent authorities that when peace comes Germany and Austria will want 4,000,000 to 5,000,000 hides to get their tanneries in operation.

Such a quantity would be difficult to obtain. Supplies of leather in Germany and Austria, it is believed, must be greatly depleted.

—Feb.

²(1) Position as Hemlock Producer.—On Feb. 16, 1917, the "Boston News Bureau" said a leading interest in the leather industry had stated that if this nation enters seriously into a preparedness campaign it is inevitable that Central Leather will be a decided beneficiary. Hemlock is more important to war purposes than either union or oak. Central Leather produces about 80% of all the hemlock sole leather made in the United States. On the other hand, its sole leather sales are about 55% of the total of all kinds of sole leather made in the United States. The company, therefore, has an especially favorable line-up so far as hemlock leather, the war commodity, is concerned.

Central Leather is understood to have closed its fiscal year Dec. 31 with a very large cash balance. This balance is believed to have been close to \$15,000,000, or better than \$35 per share on

²(2) Report, Year Ended Dec. 31, 1916, shows: 1916 1915
Net earnings.... \$17,289,713 \$8,465,104
Bal. after chgs. & pfd. divs.... 13,158,272 4,295,966
Surp. after com. divs. 9,882,946 2,707,928

²(3) Earnings on Stock.—It was stated Feb. 23, 1917, that this company's 1916 balance after charges and pfd. dividends of \$13,158,272 is equal to 33.14% on \$39,701,030 common stock, compared with 10.82% earned on the same stock in 1915.

²(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$20,383,668, compared with \$10,500,722 Dec. 31, 1915.

²(5) Report, Quarter Ended Dec. 31, 1916, compares as follows with corresponding quarter of 1915:

1916 1915
Net profits..... \$6,623,500 \$2,680,230
Surp. after pfd. divs. 16,040,768 2,097,498
After providing for interest on bonds.

Equal to 15.21% on \$39,701,030 common stock, against 5.23% earned in same quarter in 1915.

²(6) Statement by President.—It was announced Feb. 23, 1917, that Pres. Edward C. Hoyt, of this company, in his annual statement to stockholders, said, in part: "The company has no indebtedness except for current monthly accounts and dividends declared and unpaid. Current assets are in excess of current liabilities by the sum of \$69,687,942 and are \$37,351,792 in excess of the entire liabilities (including the bonds) exclusive of capital stock. The remaining \$8,000 outstanding debentures of the old The United States Leather Co., due May 1, 1913, were retired during the year.

"Current accounts receivable are in good condition, the estimated percentage of bad debts being about one-thirtieth of 1% of the amount of sales.

"I beg to call attention of the stockholders to the fact that while the financial condition of the company is satisfactory a greatly increased amount of money is required to operate at the present level of prices over what was necessary a year ago, our inventories at cost being about \$12,000,000 in excess of 1915.

"In conformity with the plan of the Board of Directors announced in their annual report for the year 1913, for the partial retirement of the outstanding bonds of the company at the date of maturity, April 1, 1925, \$1,000,000 of moneys derived from stumpage was during 1916 appropriated and invested in bonds of the company.

"Your directors, in view of the unusually large earnings during the last year have thought it wise to charge off additional depreciation of \$2,000,000 against plants and real estate.

"Leather in stores, lumber and other finished products which are valued at conservative market prices, show only a small increase in value over last year, the increase in prices being offset by a decrease in quantities.

"The high cost of hides, tanning materials and labor, the embargoes by the railroads, the scarcity of ocean tonnage, both for hides and leather, the restriction on shipment of hides by foreign Governments, all make the business difficult, and any forecast more or less uncertain; but your officers feel that the present average cost of stock in process and materials is sufficiently below market prices to safely guard the inventories except in case of an exceedingly serious setback to general business."

—Mar.

²(1) Directors Re-elected.—Announced Feb. 28, 1917, that at the annual meeting of this company's stockholders retiring directors were re-elected.

Out of a total of 729,757 shares of stock outstanding, 425,304 shares were voted with the management. There was no opposition.

²(2) Russian Leather Deal.—It was stated March 21, 1917, that this company is the leading factor among a group of tanners understood to have closed or to be on the verge of closing a contract for about 750,000 sides of sole leather for Russia. This is the largest single contract yet placed for sole leather in the United States and aggregates between \$11,000,000 and \$12,000,000 in value.

²(3) Expectation of Extra Dividend Not Realized.—On March 27, 1917, directors declared the regular quarterly dividend of \$1.25 a share on the common stock, payable May 1 to stock of record April 10.

No statement was obtainable to explain the failure of directors to declare more than the regular quarterly dividend of \$1.25 per share on the common stock. The general expectation had been that at least \$2 per share extra would be declared at the meeting, but even this conservative expectation was not realized. The company's earnings are sufficient to provide for large extra distributions, the latest figures, namely those for the quarter ending December 31, showing earnings at the rate of 63% on the common stock, while the amount earned during the past year was equal to \$33.14 per share on this issue. The earnings for the March quarter of 1917 will be published April 24.

—Apr.

²(1) Report, Quarter Ended March 31, 1917, shows earnings as follows:

1917 1916
Gross..... \$7,851,923 \$3,913,381
Net income..... 6,334,623 2,554,152
Surp. after pfd. & com. divs.... 5,255,630 1,574,411

²(2) Balance Sheet, as of March 31, 1917, shows a profit and loss surplus of \$25,639,297, compared with \$12,075,133 March 31, 1916.

²(3) Earnings in 1917 at Rate of 57.6% on Common.—On April 26, 1917, the "Boston News Bureau" said that this company's record for the 1917 March quarter confirmed the expectation of

JANUARY 1 TO APRIL 30, 1917

experts in the sole leather industry that the earnings for the first three months of 1917 would be on a practical parity with the final quarter of 1916. The company in the three months to Dec. 31, 1916, earned a balance of \$6,040,768, or 15.2% on its \$39,701,000 common. In the March three months the surplus for the junior stock was \$5,751,891, or 14.4%. These profits were at the rate of 57.6% for the full year, against actual profits in 1916 of 33.1%.

It is likely that the June and September quarters will hardly maintain the pace which was set in the March quarter. The June quarter is normally a period of considerable quiet in the shoe industry. Prices for leather are so high that only necessity will prompt buying.

At the same time there is hardly a doubt that Central Leather will have a sensational year in 1917. It has adequate supplies of hides and is selling in world markets. If the company fails to earn \$50 per share on its common in 1917 it will be a matter of general surprise.

Considerable comment has been created by the failure of directors to declare an "extra" at the meeting, April 24. Central Leather directors always move conservatively. At the same time a strong sentiment exists in the board in favor of reasonably liberal treatment of common shareholders. It is a safe assertion that sooner or later the common will receive substantial recognition. In 1916 the common received \$7 in dividends. It will do at least as well in 1917 and it may easily obtain as high as \$10 per share in dividends.

CENTRAL MAINE POWER CO.

1 (1) Acquisition.—It was announced Jan. 5, 1917, that this company had recently taken over the plant and distributing system of the Hartland (Me.) Electric Light & Power Co. and also the system of the Newport (Me.) Light & Power Co., which will be connected with the main transmission line running toward Moosehead Lake.

It is reported that the Central Maine Co. has also purchased the controlling interest in the Skowhegan Pulp Co., which would give it 4,011 horsepower out of 5,588 horsepower of the present development of the Skowhegan company on the Kennebec River. •

CENTRAL RY. OF CANADA.

4 (1) Receivership Refused—Time Extended.—On April 14, 1917, the "Financial Post of Canada" said: "The application for a receiver for the Central Railway of Canada, which has been in financial difficulties for some time, has been refused by the Exchequer Court, and the company has been given until July 1 to make headway with the scheme of arrangement with its creditors that has been before the same court for sanction."

"This scheme of arrangement is being vigorously opposed by a minority of the bondholders, who want a receiver appointed, but the majority are stated to have approved of the proposal. The consent of 72% of the bondholders has been secured, and the directors are quite confident that by the time the matter comes before the court again the consent of the full 75% necessary will have been obtained."

"The principal line projected by the company was from Montreal to Midland, a distance of 342 miles."

"The directors propose that the bondholders shall hold all interest coupons overdue and those to become due until Jan. 1, 1921, and that they shall receive first mortgage bonds for the total amount of these coupons on Jan. 1, 1921."

"The creditors of the company will be paid the amount due them by the company in 6% income bonds."

CENTRAL RY. SIGNAL CO.

2 (1) Incorporated on Feb. 20, 1917, in Delaware, with a capital of \$1,000,000, to manufacture railway signals of all kinds. Incorporators: Herbert E. Latner and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

• CENTRAL & SOUTH AMERICAN TELEGRAPH CO.

2 (1) Stock Dividend.—Announced Feb. 5, 1917, that this company had declared a stock dividend of 46%.

The new stock, representing surplus net earnings, will be issued April 1 and will carry the right to all dividends declared subsequent to the usual April dividend.

—Mar.

3 (1) Application to List.—It was stated March 3, 1917, that this company had made application to the New York Stock Exchange to list \$4,000,000 additional of its capital stock.

3 (2) Listed in New York.—It was announced March 14, 1917, that the New York Stock Exchange had listed an additional \$4,000,000 of this company's capital stock, making total amount authorized to be listed \$14,000,000.

3 (3) Report, Year Ended Dec. 31, 1916, shows: Gross receipts, \$3,360,580; operating expenses, taxes, etc., \$820,304; net receipts, \$2,540,285; dividends, \$574,260; surplus, \$1,966,025.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

*(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$7,303,988, compared with \$5,337,963 Dec. 31, 1915.

CENTRAL SUGAR CORP.

*(1) Status.—It was stated Jan. 9, 1917, that this company, incorporated Dec. 22, 1916, in New York, with a capital of \$3,000,000 7% cumulative pfd. stock, par \$100, and 80,000 shares of common, no par value, has no mortgage or bonded indebtedness and no mortgage can be placed on the real estate or plant without consent of two-thirds of the outstanding pfd. stock.

The corporation has acquired the sugar estate of "Central Fe" as of Dec. 6, 1916, free and clear of all encumbrances and ready for the beginning of the grinding season. The expenses of the past preparatory season are for the account of the vendor, and the new corporation will receive all the profits from the 1916-1917 crop.

The "Central Fe" plantation is located in the northern part of Santa Clara Province, in the central part of the island of Cuba. The corporation owns in fee simple 16,723 acres of land and has under long-term leases 15,966 acres, making a total of approximately 32,689 acres. This is ample to insure sufficient cane supply for a yearly production estimated at at least 350,000 bags of sugar.

The corporation owns a complete and modern factory with a present annual capacity of 200,000 bags of sugar and an ultimate capacity of 350,000 bags; eight miles of standard gauge railroad, fully equipped, and other buildings and plantation equipment. Both the factory and transportation system, it is stated, are susceptible of being increased to the 350,000-bag capacity at low cost, which, it is contemplated, will be effected without increase of capitalization.

*(2) Underwriting Syndicate.—It was stated Jan. 9, 1917, that the \$3,000,000 of pfd. stock of this company had been underwritten by a syndicate of bankers composed of Spencer Trask & Co., A. B. Leach & Co., Boettcher, Porter & Co., of Denver, and the Engineering Securities Corp. The subscription price to the pfd. is to be 92½, with the privilege of subscribing to the common stock at \$30 per share.

The management will be under the direction of the sugar department of the J. G. White Management Corp. Its directors include the following: Dr. Domingo Mandez Capote, P. B. Anderson, Charles J. Peabody, Acosta Nichols, P. G. Gossler, C. B. Campbell, H. S. Rubens, A. L. Mathews, H. P. Du Bois, J. G. White and Henry T. Oxnard.

Production of the plantation for the past three years has been as follows: In 1913-14, 93,829 bags; in 1914-15, 90,969 bags, and in 1915-16, 147,710 bags.

The estimated production for the future is as follows: 1916-17, 200,000 bags; in 1917-18, 250,000 bags, and in 1918-19, 350,000 bags. Profits for the past season were \$638,934, or \$4.31 per bag.

—Apr.

*(1) Initial Dividend on Preferred.—Announced April 6, 1917, that this company had declared an initial dividend of 2.33% on the pfd. stock, payable May 1 to stock of record April 14. The dividend is for the first four months of 1917 and at the rate of 7% per annum.

*(2) Initial Preferred Dividend.—Stated on April 9, 1917, that this company, which was recently organized and which is managed by the J. G. White Management Corp., had declared an initial dividend of 2.33% on its \$3,000,000 pfd. stock for the four months from Jan. 1 to May 1, this distribution being at the rate of 7%. The dividend is payable May 1 to stock of record April 14.

CENTRAL TRUST CO., NEW YORK.

*(1) New Officers.—Announced Jan. 18, 1917, that Frederick Straus and Clarence Dillon had been elected members of the Executive Committee of the Central Trust Co.

Milton Ferguson, Sec., was elected a Vice-Pres. He will continue to fill the office of Sec. in addition. William H. Ludlum and Stephen H. Tallman were elected assistant secretaries. Other officers were re-elected.

CENTRAL UNION TELEPHONE CO.

*(1) Control Held as Illegal.—See American Telephone & Telegraph Co.—Item No. 5.

—Feb.

*(1) Merger Planned.—It was announced at Fremont, O., Feb. 12, 1917, that the first steps toward the consolidation of this company and the Fremont Home Telephone Co. had been taken at a meeting of officials of both companies on that date. The Bell company will retain the long distance and the Fremont Home business.

CENTURY COAL & COKE CO., LTD.

*(1) Incorporated on Jan. 23, 1917, in Canada, with a capital of \$500,000, divided into 5,000 shares of \$100 each, to carry on in all its branches a coal and coke business. Incorporators: Charles Murphy, Harold Fisher, Stanley Gardner Metcalfe, Stanley Metcalfe Clark and Linda Bonell. Chief place of business, Montreal, Que.

CERRO DE PASCO COPPER CORP.

*(1) Production, December, 1917.—It was stated Jan. 6, 1917, that this company in December reported an output of 5,500,000 pounds of copper, compared with 5,700,000 in November, 6,000,000 in October, and 5,800,000 in September.

—Feb.

*(1) Production, January, 1917.—Announced Feb. 7, 1917, that this company in January produced 172,000 pounds of copper, compared with 5,500,000 pounds in December, 5,700,000 in November and 6,000,000 in October, 1916.

*(2) Application to List.—Announced Feb. 8, 1917, that the New York Stock Exchange had received application to list 1,000,000 shares of this company, without nominal or par value.

*(3) Extra Dividend.—Announced Feb. 14, 1917, that this company had declared the regular quarterly dividend of \$1 and an extra of 50 cents, payable March 1 to stock of record Feb. 23. The company declared an initial quarterly dividend of \$1 a share in February, 1916. This was continued in May, August and November, making a total of \$4 a share paid in 1916.

*(4) Comment on Extra Dividend.—On Feb. 15, 1917, the "Wall Street Journal" said that the action of this company's directors in declaring an extra dividend of 50 cents a share in addition to the quarterly disbursement of \$1 was not unexpected.

Earnings of the company are estimated to be running at the rate of more than \$15 a share, after deducting interest charges on the \$10,000,000 ten-year 6% convertible bonds. This would duplicate the 1916 earnings.

Production is running at the rate of 74,000,000 pounds a year, compared with 70,000,000 in 1916, 48,000,000 in 1915, and 42,000,000 in 1914. It is expected that the 1917 output will total about 75,000,000 pounds.

Cerro de Pasco's earnings in 1916, after deducting bond interest and sinking fund requirements, amounted to more than \$10,000,000. After dividend payments of \$2,666,664 there should have remained a surplus of about \$7,350,000.

Dividends in 1917 of \$6 a share would call for the payment of \$3,999,996, but even with this increase Cerro de Pasco stands an excellent chance with high copper prices of showing a surplus of about \$6,000,000 for the 12 months. The sinking fund applicable to the retirement of the \$10,000,000 convertibles is expected to total about \$11,000,000 on Dec. 31, 1917.

Bonds are convertible into stock at 30 a share Nov. 1, 1917, and callable thereafter at 105. If all the bonds are converted it will simply mean 1,000,000 shares of stock outstanding Jan. 1, 1918, and a cash and copper surplus of about \$24,000,000. This could be used as working capital or assume the form of a special disbursement to stockholders.

*(5) Admitted to List.—Announced Feb. 15, 1917, that the New York Stock Exchange had admitted to the list 666,666 shares of capital stock of this company without par value, with authority to add 333,334 shares in exchange for the outstanding 6% convertible 6s.

*(6) Financial Statement.—It was announced Feb. 15, 1917, that this company had filed with the New York Stock Exchange the following statement of its consolidated income account for the period from Jan. 1, 1916, to Oct. 31, 1916:

Sales, copper, silver, gold and ores.....	\$10,718,164
Rev. from Cerro de Pasco Ry.....	280,248
Miscellaneous receipts.....	256,079
Inventory.....	18,442,965
Total income.....	\$23,697,556
Operat. and adm. expenses.....	5,877,108
Custom ores.....	5,799,015
Inventory.....	3,148,859

Total expenditures.....\$14,824,977
Surplus.....8,872,579
†Copper in process estimated at 10.81 cents a pound; silver at 50 cents and gold at \$20 an ounce.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

²(7) Income, 1916, from Subsidiaries.—It was stated Feb. 21, 1917, that the 1916 income of this company, amounting to \$3,420,000, was derived from dividends received from its three operating subsidiaries, of which the Morococho Mining Co. was the heaviest contributor.

Operations at the Morococho mines have shown rapid growth, as a result of which blocking out of ore reserves has not kept pace with output.

The ore in the Morococho district runs high in copper values, as evidenced by the fact that the 1911 shipments of over 20,000 tons averaged 12.84% copper, while those in 1915 assayed 10%.

²(8) Application to List.—Announced Feb. 26, 1917, that this company had made application to the New York Stock Exchange to list \$10,000,000 of its 10-year convertible 6% bonds, due Nov. 1, 1925.

—Mar.

²(1) Listed in New York.—It was announced March 1, 1917, that the New York Stock Exchange had listed \$10,000,000 of this company's 10-year convertible 6%.

²(2) Production, February, 1917.—Announced March 7, 1917, that this company in February produced 5,352,000 lbs. of copper, compared with 6,172,000 lbs. in January, 5,600,000 lbs. in December and 5,700,000 lbs. in November.

—Apr.

²(1) Production, March, 1917.—This company's March production of copper was reported, April 14, 1917, as 6,074,000 lbs., against 5,352,000 lbs. in February and 6,172,000 in January.

²(2) Report, Year Ended Dec. 31, 1916, shows: Dividends from subsidiary companies, \$3,670,000; total income, \$3,673,528; net after taxes, expenses and interest on bonds, \$2,854,216; surplus after dividends, \$187,552.

²(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$391,652.

²(4) Earned \$4.28 on Capital in 1916.—This company's 1916 net income of \$2,854,216 is equivalent to \$4.28 a share earned on 666,666 shares of capital stock outstanding.

²(5) Consolidated Balance Sheet, Subsidiaries, as of Dec. 31, 1916, shows:

Assets—	
Cerro de Pasco Mining Co. property	\$14,711,752
Cerro de Pasco Ry. Co. equipment, etc.	3,381,959
Morococho Mining Co. prop.	10,204,868
Stocks of sundry companies	811,092
Items in course of adjustment	208,006
Materials and supplies	2,412,900
Accounts receivable	1,441,614
United Kingdom of Great Britain and Ireland 5½% notes	988,250
Copper, silver and gold on hand	3,147,520
Cash	2,549,544
Total	\$39,857,905
Liabilities—	
Cerro de Pasco Mining Co. stock outstanding	\$9,500,000
Cerro de Pasco Ry. Co. stock outstanding	2,850,000
Morococho Mining Co. stock outstanding	10,000,000
Accounts payable	944,315
Drafts in New York office	872,125
Drafts on letters of credit	861,289
Accrued wages	132,896
Reserved for United States taxes	175,157
Surplus	14,472,123
Total	\$39,857,905

²(6) Report for 1916 Called Disappointing.—On April 26, 1917, the "Boston News Bureau" said: "Notwithstanding the fact that its securities now have a public ownership and enjoy the privileges of the New York Stock Exchange, the Cerro de Pasco Copper Corp. and its management have not departed from the policy of secrecy with regard to many essential details of operation,

such as other copper companies put forth most fully, not only once but four times a year.

"As a holding company Cerro de Pasco Copper Corp. derives its income from dividends received from subsidiaries, but there could hardly be objection to detailing earnings, production and costs of operation at the two mines which contribute the metal product."

CERRO DE PASCO MINING CO.

²(1) Consolidated Balance Sheet, as of Dec. 31, 1916.—See Cerro de Pasco Copper Corp.—Item No. 5.

CERRO DE PASCO RY. CO.

²(1) Consolidated Balance Sheet, as of Dec. 31, 1916.—See Cerro de Pasco Copper Corp.—Item No. 5.

CERRO GORDO MINES CO.

²(1) Extra Dividend.—On March 29, 1917, directors declared the regular quarterly dividend of 2½% and an extra dividend of 2½%, payable April 16 to stock of record March 31. This is the same as three months previously.

CERRO GORDO MINES CO., CALIFORNIA.

²(1) First Annual Report, Year Ended Dec. 31, 1916, shows resources of \$1,178,971, and surplus of \$125,264, as of Dec. 31, 1916. Earnings to the end of 1916 were \$407,863; gross expenses, \$208,223, and net profit \$199,639.

CERTAIN-TEED PRODUCTS CORP.

²(1) Incorporated on Jan. 31, 1917, in Maryland, with an authorized capital of \$25,000,000, to deal in all roofing products and materials, felt, paper, paper pulp and rag stock products, wall and house materials, paints, oils, chemicals, minerals and petroleum, coal tar products, cements and plasters.

The seven directors named for the first year are George M. Grown and Charles C. Collins, both of St. Louis; Smith E. Allison, George W. Watson, William E. Rhine and John M. Lowrie, all of New York, and H. P. Stewart, of Philadelphia.

—Mar.

²(1) Officers.—It was announced March 6, 1917, that directors of this company at their first meeting for organization elected George M. Brown, Pres.; Smith E. Allison, of New York, J. S. Porter, A. Whittemore and J. F. Schladt, of St. Louis, Vice-Pres.; J. C. Collins, Sec'y-Treas.; C. W. Brown, Asst. Treas. and G. W. Watson, Asst. Sec'y.

²(2) Syndicate—Stock Offering.—It was announced March 8, 1917, that a syndicate, headed by William Salomon & Co. had underwritten \$3,500,000 7% cumulative 1st pfd. stock of this company for offering at 98½ and accrued dividend. The company has an authorized capitalization of \$10,000,000 7% cumulative 1st pfd. stock, \$5,000,000 7% cumulative 2d pfd. stock and 100,000 shares of common stock, without par value, of which amounts there are now outstanding \$3,500,000, \$1,925,000 and 60,000 shares, respectively.

²(3) Status.—It was stated March 8, 1917, that this company had been organized for the purpose of taking over the General Roofing Manufacturing Co. of St. Louis, the Mound City Paint & Color Co. of St. Louis, the Gregg Varnish Co. of St. Louis and the felt plant of the Lockport Paper Co. of Niagara Falls, N. Y. The company now ranks as the largest manufacturer in the world of prepared roofers and building papers, besides handling such other products as tarred felts, deadening felts, insulating papers, wall-boards, paints and varnishes.

George M. Brown, Pres., reports the following consolidated earnings of the properties, after allowances covering depreciation, but before deducting interest charges, which are now being eliminated, and including 6% a year on new cash capital:

Average annual net profits for the three years 1914-16, inclusive, \$599,254.

This is equal to approximately 2½% of the annual dividend on the new first pfd. stock.

Net profits for 1916, \$901,540, or more than 3.65 times the first pfd. stock annual dividend.

The 1916 earnings are equivalent to more than \$8.50 a share on the common, after allowing for the 1st and 2d pfd. stock dividends.

For 1917 Pres. Brown estimates net profits will be from \$1,250,000 to \$1,500,000, or, after allowing for pfd. dividends, the equivalent of \$14 to \$18 a share on the common stock.

²(4) Initial Dividend.—Announced March 14, 1917, that this company had declared an initial dividend of \$1.19 per share on both the 1st and 2d pfd. stocks, payable April 1 to stock of record March 20. These dividends cover the period from the organization of the corporation up to March 31 and are at the rate of 7% per annum.

²(5) Earnings, 1917, Estimated.—On March 21, 1917, the "Wall Street Journal" said that the net earnings of this company for 1917 are estimated at from \$1,250,000 to \$1,500,000. Net earnings in 1916 were \$901,540. After allowing for the 7% 1st pfd. dividend, which was earned over three and a half times, and deducting the regular 7% 2d pfd. dividend, the balance was equal to \$8.50 a share on the common stock in 1916.

The products of the company consist principally of prepared roofing, building papers, paints and varnishes, all of which are sold under the trade name of "Certain-teed." The company in 1916 did a business of about \$6,500,000, and is known as the largest manufacturer in the world of prepared roofing. There are about 35 manufacturers of prepared roofing of various kinds in the United States.

In manufacturing the company occupies the unusual position of making its goods in one continuous process from the raw material to the finished product, and all in the same plant.

CHACE MILLS.

²(1) Dividend Increased.—Announced March 23, 1917, that this company had declared a regular quarterly dividend of 4%, payable April 2, to stock of record March 22. For the last two preceding quarters it had declared 2% each.

CHALMERS MOTOR CO.

²(1) Statement by President.—On Feb. 26, 1917, Pres. Hugh Chalmers, of this company, was quoted as saying: "With \$5,000,000 recently added to our working capital, we are planning a production of 28,000 to 30,000 cars for 1917. This will keep our big Detroit plant working at full speed for the next 12 months.

"We have just achieved a record year's business, entirely independent of war profits or other outside considerations, and our manufacturing schedule will go through regardless of whether the European war is settled next month or next year."

CHAMPION COPPER CO.

²(1) Dividends.—Announced Feb. 2, 1917, that this company had declared a dividend of \$6.40 a share, making \$93.60 since Feb. 21, 1915, when dividends were resumed. The last previous payment, \$6.40, was made Dec. 4, 1916.

—Mar.

²(1) Dividend.—It was announced March 8, 1917, that this company had declared a dividend of \$6.40 a share, making \$100 since Feb. 21, 1915, when payments were resumed, following suspension from Oct. 15, 1913. The previous payment, \$6.40, was made Feb. 26, 1917.

Dividend disbursements of the company are usually distributed between the Copper Range Co. and the St. Mary's Mineral Land Co. as owners of 50,000 shares each. Champion paid \$56.20 in dividends in 1916 and \$31 in 1915.

JANUARY 1 TO APRIL 30, 1917

—Apr.

* (1) Dividend.—Announced April 4, 1917, that this company had declared a dividend of \$6.40 a share, making \$110 since Feb. 21, 1915, when payments were resumed following suspension from Oct. 13, 1913. The previous payment of \$6.40 was made March 28, 1917.

CHAMPION IRON CO., KENTON, O.

* (1) Proposed Reorganization.—Announcement was made late in March, 1917, that plans for the reorganization of this company were under way with a view of bringing in additional capital and increasing the volume of business. A step in the reorganization plans has been made in the appointment of W. W. Durbin as receiver of the company. R. W. Valls continues as manager of the plant and engineer. The company recently began the manufacture of electric traveling cranes, and has a large amount of business on its books.

CHANDLER MOTOR CAR CO.

* (1) New Directors.—It was announced Jan. 10, 1917, that at a meeting of directors of this company vacancies on the board caused by the resignation of James B. Bell, of Toledo, and James S. Dunstan, of New York, were filled by the election of John Sherwin, Pres. of the First National Bank of Cleveland, and Charles A. Otis, senior member of the banking firm of Otis & Co., of Cleveland.

The board as now constituted consists of F. C. Chandler, Pres.; W. S. M. Mead, Vice-Pres.; Samuel Regar, Treas.; J. V. Whitbeck, chief engineer; J. W. Prentiss, of Hornblower & Weeks; John Sherwin and Charles A. Otis.

* (2) Statement by Pres.—It was stated Jan. 10, 1917, that Pres. Chandler, of this company, had reported that the fiscal year of 1916, just closed, had been the most satisfactory one in the history of the company, that orders already booked for delivery of cars in 1917 indicated still greater prosperity for the company, and that for January, 1917, shipments would show an increase of approximately 100% over the same period a year ago.

—Mar.

* (1) Shipments, Two Months.—It was stated March 9, 1917, that shipments of this company during January and February, 1917, show an increase of 50% over the corresponding period of 1916. In the 12 months ended Dec. 31, 1917, the shipments of the company amounted to 13,000 cars.

* (2) Statement of Shipments.—Reported on March 27, 1917, that to March 10 this company had shipped 2,822 cars, as compared with 1,791 the previous year. Since the second week in January, following inventorying, Chandler's output has been steadily increasing until a weekly aggregate of 600 may soon be expected. It seems reasonable to expect an output of 4,300 cars for the first quarter of the year, invariably the poorest three months of the year.

Owing to the higher material costs this year, and the necessity of shipping bodies from Detroit by express, Chandler's per car profit of \$132 will probably not be achieved for the current quarter, but on a per unit basis of less than \$120 it should earn about \$500,000 to April 1. Based on the manufacturing schedule of the Summer and Fall months, earnings for the year should total at least \$3,000,000, or the equivalent of better than \$42 a share.

—Apr.

* (1) Statement to Stockholders.—It was announced April 2, 1917, that Pres. F. C. Chandler, of this company, in a statement to stockholders, said: "It is pleasing to be able to inform you that the business of the company for the first three months of the year 1917 shows an increase of 83% over the business of the corresponding quarter of 1916, and the net earnings for this period are between \$9 and \$10 per share on the outstanding stock. Present prospects indicate that shipments for the coming quarter will be largely in excess of those for the quarter just com-

pleted and earnings proportionately larger."

* (2) Record Shipment Made Week Ended April 14.—On April 27, 1917, the "Boston News Bureau" stated that this company made its record shipment of cars in the week ended April 14, amounting to 618 cars. In the first two weeks of April 1,173 cars were shipped, which indicates over 2,400 for the month, and at the annual rate of over 28,000 cars.

Shipments thus far are 82% ahead of a year previously. Assuming this same ratio of increase to obtain for the balance of 1917, Chandler would ship 23,000 cars in 1917. Assuming a profit of \$125 per car, retailing at \$1,395, against a profit of \$132 per car on the \$1,205 in 1916, Chandler stands to earn in 1917, on a 20,000 car production, \$2,500,000. In 1916 13,073 cars were shipped.

CHANDLER MOTOR CAR CORP.

* (1) Report, Year Ended Dec. 31, 1916, as issued by the company Feb. 13, 1917, shows a net profit of \$1,716,166, equal to \$24.51 per share of stock. The company paid cash dividends aggregating \$700,000 on the \$7,000,000 capital stock outstanding and added the balance of \$1,016,166 to surplus.

Gross profit from the sales of automobiles and parts, after deducting cost of labor, material and manufacturing expense, was \$2,401,802. Interest and other miscellaneous income was \$31,907, making total income \$2,433,709.

Selling, advertising and general expenses amounted to \$717,604, which left the balance of net profits at \$1,716,166.

* (2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,190,788.

* (3) Statement by President.—It was stated Feb. 13, 1917, that Pres. F. C. Chandler, of this company, in his annual remarks to stockholders said, in part: "New improved fireproof buildings have just been completed, which double the floor space and which will enable the company to take care of the increased production necessary to supply the growing demand for Chandler cars. For the current year, indications point to a very large increase in the sale of Chandler cars, which has been brought about to a large extent by the strong dealers' organization."

"Not only is this true of the United States, but the foreign business has shown a wonderful development and we look forward to a very large business from this trade."

"Orders on hand for delivery of cars during 1917 are 50% greater than our entire production of 1916."

* (4) Comment on Annual Report.—On Feb. 13, 1917, the "Boston News Bureau" said that the report of this company makes agreeable reading in that it actually makes good practically all of the early estimates as regards output and profits. The earnings of \$24.50 a share compare with an estimate of \$25 and output of 13,000 cars with the promised 15,000, the slight disappointment on the production end being similar to that of most motor companies in the closing months of 1916.

Net profits after depreciation of \$1,716,166 compare with \$933,217 in 1915, or \$13.33 per share before the enlargement of the Cleveland plant.

During the year Chandler increased its working capital by \$683,000 from \$1,902,000 to \$2,585,000. It is interesting to note that nearly 75% of Chandler's working capital is in cash, to the extent of \$1,800,000.

Chandler has just completed its new fireproof building, which doubles floor space and brings capacity up to 20,000 cars per annum. Orders on hand for 1917 delivery are stated to be 50% greater than the entire production of the year, which means 19,500 cars, or close to maximum possibilities.

With an advance of \$100 to \$1,395 in its popular six, Chandler should be able to maintain both quality and profit. On this year's production it likely will earn between \$25 and \$30 a share.

At least 12% can be counted upon in 1917, it was stated.

CHARCOAL IRON CO. OF AMERICA.

* (1) Net Profits, January, 1917, were given as \$112,949. The net surplus on Dec. 31 was \$909,551, and the January earnings bring the total at the end of January to \$1,022,500.

During January the company was barely able to move its product on pig iron made. The company has a large profit in the pig iron which it has in its yards and which, all having been sold, will move forward as soon as the railroad situation is straightened out.

—Mar.

* (1) Timber Purchase.—It was stated March 16, 1917, that the hardwood timber holdings of this company had been increased by the purchase of 53,000 acres in Chippewa, Luce, Gogebic and Ontonagon Counties, Mich., at a cost of about \$1,000,000. It is estimated there are 200,000,000 feet of lumber in the tract, which is the third acquired by the company since Jan. 1.

* (2) Initial Common Dividend.—On March 26, 1917, directors declared an initial quarterly dividend of 1½% on the common stock, payable April 15 to holders of record March 31.

* (3) Comment on Dividend Increase.—On March 28, 1917, "Financial America" was quoted as saying that the placing of this company's common on a 6% per annum basis was in line with the plan adopted by the directors as announced on Oct. 5, 1916, when it was stated that with the payment by April 1 of all back dividends on the pfd. stock disbursements on the junior issue would be inaugurated. The final installment of accumulated pfd. dividends is to be distributed on March 31, the 2% authorized to be paid on that date, making a total of 9% disbursed since Oct. 31, 1916, when the initial dividend of 1% was paid to the pfd. shareholders. Both classes of stock are now on a 6% per annum basis, the difference being that the pfd. dividends are payable semi-annually, the first regular disbursement being due on June 30, 1917.

The plan as already announced includes further action in the way of profit-sharing by the common shareholders. The stock dividend which it is understood will be authorized before the close of the first half of present calendar year, will necessitate the issuance of approximately \$565,000 of additional common stock, bringing the total outstanding up to about \$3,400,000.

There is little doubt that the 6% per annum rate can be maintained even with a much greater increase of capital. During 1916 net earnings, after all charges and after allowances for the full dividend accrued the pfd. stock, were equivalent to \$2.605 for each of the 283,935 shares of common stock outstanding, the par value of which is \$10. There was \$819,845 carried to surplus out of last year's profits, and this after reserves against depreciation and after writing off \$96,000 in initial plant costs.

Iron orders on hand as of Jan. 1, 1917, aggregated more than \$2,200,000, the bulk of which are understood to be booked at prices averaging 50% more than the 1916 output. The company's wood alcohol production approximates 1,500,000 gals. a year and current prices are almost double those paid for last year's output. Its contracts cover the entire 1917 capacity for acetate of lime and profits from the various wood oils currently obtained at nominal cost, it is estimated, will bring the total for the year up to and over \$2,000,000 as compared with \$1,162,880 in 1916. This would be equivalent to 60% on the common stock now outstanding and well up to 50% on the contemplated increased capitalization.

CHARLESTON INTERURBAN

**CHELSEA FIRE PROOF STORAGE
WAREHOUSE, INC.**

(1) Capital Increased.—On March 27, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$10,000 to \$250,000.

CHELSEA LIGHTERAGE CO., INC.

(1) Incorporated on Feb. 21, 1917, in New York, with a capital of \$250,000, to engage in a transportation and lighterage business. Incorporators: F. L. Latham, W. D. Potts and W. J. Doremus; Bowers & Sands, attorneys, 46 Cedar St., New York.

**CHENANGO SILK CO.,
BINGHAMTON, N. Y.**

(1) Capital Increased.—On Feb. 15, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$300,000.

CHENEY COPPER CO., LTD.

(1) Stock Offering.—It was announced Jan. 29, 1917, that Carroll, Felter & Co., W. O. Winsor and Frank J. Souther & Co., Boston, are offering at \$1 per share 500,000 shares of common stock of this company, capitalized at \$2,000,000. It has in its treasury \$1,000,000 in shares, fully paid and non-assessable, and has no bonded indebtedness. Registrar and transfer agent, Security Transfer & Registrar Co., New York.

CHEROKEE COPPER CO.

(1) Test Shows Favorable Results.—On April 21, 1917, the "Boston Daily Advertiser" said that this company's mill test of 92 tons of picked rock at the Baltic mill resulted in a production of 13,725 pounds of mineral, refining into 8,133 pounds of copper, equal to 87.81 pounds per ton of rock, or over 4%.

The copper has been sold at top prices. The shaft is still sinking in copper-bearing ground.

**CHEROKEE MINING CO.,
WILBUR, WASH.**

(1) Incorporated on March 27, 1917, in Washington, with a capital of \$1,500,000. Incorporators: Wm. Rakerstraw, Lloyd Harris and M. E. Bennett.

CHEROKEE OIL CO., DOVER, DEL.

(1) Incorporated on March 20, 1917, in Delaware, with a capital of \$1,750,000, to acquire oil and gas lands. Incorporators: M. M. Hiron, M. H. Camac and J. B. Bailey, Dover, Del.

—Apr.

(1) Capital Increased.—On April 9, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$1,750,000 to \$2,000,000.

**CHEROKEE REALTY CO.,
PITTSBURGH.**

(1) Incorporated on April 18, 1917, in Delaware, with a capital of \$350,000, to engage in a general real estate business. Incorporators: W. J. Casky, Dr. Torrice and A. F. Emmons, all of Pittsburgh.

• CHESEBROUGH MANUFACTURING CO.

*(1) Extra Dividend.—Announced Feb. 15, 1917, that this company had declared the regular quarterly dividend of 3%, also an extra of ¼%. Both are payable March 19 to stock of record March 1.

CHESTER & PHILADELPHIA RY.

*(1) Bond Offering.—It was announced Feb. 23, 1917, that Martin & Co., and Harper & Turner are offering jointly at 98½ and interest a block of this company's first mortgage 5% 30-year gold bonds of 1910, yielding over 5.10%. Authorized and outstanding capital stock is \$800,000. Bonds are callable all or part at any interest date on four weeks' notice at 105 and interest. Trustee, Real Estate Title Insurance & Trust Co. of Philadelphia.

*(2) Earning Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$347,199	\$144,068
Surp. aft. chgs. and taxes—	85,218	16,821

—Apr.

*(1) Earnings, Three Months Ended March 31, 1917:	1917	1916
January	\$36,669	\$17,883
February	36,069	17,562
March	42,107	22,907

Total \$114,866 \$58,353

The Chester & Philadelphia Ry. is operated under contract by the Philadelphia Rapid Transit Co. and receives 35% of gross income. Under this agreement the Chester & Philadelphia company's share of the earnings for the three months is \$40,303. The full year's interest on the bonds of this company amounts to \$30,000. In 1916 taxes and general expenses amounted to \$8,905. On this basis, therefore, the Chester & Philadelphia Ry. Co. for the three months of 1917 has already earned its entire year's expenses and interest charges.

CHESTER SHIPBUILDING CO., CHESTER, PA.

*(1) Contracts.—It was stated March 15, 1917, that this company had closed contracts for 18 large boats designed for use on the Pacific Ocean. It is estimated that the construction of these boats will require 78,000 tons of steel, including 52,000 tons of plates, and 26,000 tons of marine shapes. Less than half of the steel tonnage has been closed, but negotiations continue actively on about 30,000 tons for shipment over the second half of 1918. Value of ship contracts is placed at \$18,000,000.

• CHEVROLET MOTOR CO.

*(1) New Plant Planned.—It was announced Feb. 9, 1917, that this company had purchased 100 acres of land in Toledo, O., for the erection of a plant.

*(2) Operations.—It was stated Feb. 13, 1917, that the present status of this company indicated that in 1917 it would become the third largest factor in the automobile world, ranking next to Ford and Overland. It should pass Buick of its sister General Motors organization. Owing to the difficulty of obtaining raw materials ordered far in advance, Chevrolet's maximum production was not achieved in 1916, output totalling 70,000 cars, as against an expected 90,000.

Its daily output is now over 400 cars and in recent weeks the average has been close to 2,500 cars. Beginning with March the manufacturing schedule calls for 540 cars a day, and before Spring this figure is expected to reach the 600 mark.

The Oakland, Cal., plant accounts for about 10% of the weekly Chevrolet output, but as an all-the-year-round proposition this by no means measures its potentialities. Nor has the Flint plant yet reached the zenith of its enlarged capacity. And Fort Worth, Tex., will not be a contributor until March.

—Mar.

*(1) Report, Year Ended Dec. 31, 1916, shows net earnings from operations of \$4,845,071, after deducting costs of manufacture and expenses of selling and administration; net income, including dividends received, \$7,095,071, and increase in surplus for the current year of \$29,469,588.

*(2) Application to List.—Announced March 5, 1917, that application had been made to the New York Stock Exchange to list \$64,004,800 capital stock of this company.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$31,123,275, compared with \$1,653,636, Dec. 31, 1915.

*(4) Initial Dividend.—Announced March 19, 1917, that this company had declared an initial dividend of 3%, payable May 1 to stock of record April 30. While the rate was not declared officially to be a quarterly one, it is understood that dividends will be paid on the stock at the rate of 12% per annum. This makes the dividend rate of this company and of General Motors the same.

*(5) Statement by President.—It was announced March 19, 1917, that at the annual meeting of this company Pres. W. C. Durant stated that from Jan. 1 to March 10, 1917, the company shipped 21,875 cars, against 10,068 cars in the same period a year previously.

He predicted that the company would do well over \$80,000,000 of business in 1917, compared with \$33,000,000 in 1916. "In fact," he said, "we have for the five months following March 1, \$81,000,000 of business to look after, which is, of course, an impossible amount to handle. We have been cancelling for the past five months from 5,000 to 12,000 orders at the end of each month which we were unable to take care of. I refer to this to show how far we are from the saturation point."

"The security holdings of the Chevrolet Motor Co. include 450,000 shares of General Motors Corp. common stock, carried at \$134 a share, the bid price of December 30; 106,000 shares of United Motors at \$45 a share; 13,650 shares of Scripps-Booth at \$42, of which 2,450 shares are held by the Chevrolet Motor of Michigan.

"In exchange for the 450,000 General Motors common, 434,000 shares of Chevrolet were issued at par. At the price of \$134 for the General Motors shares, there is a profit in this transaction of \$16,900,000.

"During the year there was an increase in assets of \$73,722,087, of which \$63,614,300 were increase in securities of other companies, and \$8,104,787 were increase in asset from operations.

"Sales of cars in 1916 were 69,663, of which 50,048 were from sub-companies of the Chevrolet Motor, and 19,635 were from affiliated companies.

"Earnings from operation, exclusive of security holdings, were equivalent to 24.52% on the original \$19,754,000 capital stock of the Chevrolet Co. A total of \$3,613,521 was expended for construction and improvement to provide for increased output.

"The book value of the stock at the close of the year was \$148.63, and excluding patent account, contracts with affiliated companies, etc. (which item will be written off in the near future), was \$129.24. Net liquid assets in excess of total indebtedness were 106.45% on

the amount of stock outstanding Dec. 31."

*(6) Board of Directors.—It was stated March 19, 1917, that at the annual meeting of this company the following were elected as directors for the ensuing year: W. C. Durant, A. B. C. Hardy, W. C. Sills, Nathan Hofheimer, L. G. Kaufman, E. H. Campbell, R. H. Higgins, A. H. Goss, H. M. Barksdale, E. O. Wood, and J. T. Smith.

*(7) Comment on 1916 Report.—On March 20, 1917, the "Boston News Bureau" said that the first annual report of this company for a full 12-month period from Jan. 1 to Dec. 31, 1916, was another illustration of the enormous strides which it had made since its inception in the Fall of 1914. The actual operating earnings of \$4,845,071, compare with \$964,000 for the 12½ months preceding October, 1915, when it was publicly financed, and \$1,128,000 from operation in the 4½ months to Dec. 31, 1915.

From an untried experiment Chevrolet has become in 2½ years one of the leading automobile companies of the United States with a scheduled production of 150,000 cars for 1917, thereby ranking second only to Ford and Overland. Output for January and February totaled in excess of 19,000 cars, despite freight embargoes, and weekly production is increasing at a rate to insure a monthly output of 15,000 by Spring, 1917.

In 1916 Chevrolet on an output of less than 70,000 cars earned \$4,845,071, the equivalent of over \$24 a share on its \$20,000,000 operating capital. Were it not for the initial expenses incidental to launching and "tuning up" several units and the readjustments due to enlargement of capacity, profits would have been nearer \$6,000,000. With a probable increase in the per unit profit and a projected production of rising 150,000 cars Chevrolet is expected to earn in the current 12 months \$12,000,000, or \$60 a share.

It is to be borne in mind that both General Motors and Chevrolet are in a state of financial transition and that eventually it is the plan of the founder of both to merge them into one solid manufacturing automobile unit, with a capacity of 300,000 to 400,000 cars.

—Apr.

*(1) Pamphlet Report, Year Ended Dec. 31, 1916, shows income account, balance sheet and other features of which have been published.

The following information is presented by the comptroller of the company: "The Chevrolet Motor Co. owns the entire capital stock issues of the Chevrolet Motor Co. of Michigan, the Chevrolet Motor Co. of New York, Inc., the Toledo Chevrolet Motor Co. and the Chevrolet Motor Co. of Bay City. The operations of these companies are supervised directly from the offices of the holding company.

"In addition to its investment in subsidiary companies, the holding company has profit-sharing relations with the following affiliated companies: Chevrolet Motor Co. of St. Louis, Inc.; Chevrolet Motor Co. of Canada, Ltd.; Chevrolet Motor Co. of California and Chevrolet Motor Co. of Texas. The operations of the affiliated companies are supervised from the offices of the holding company, and its contracts with them increased the holding company's income by \$710,037 for the fiscal year. Nearly all of this additional income was received from only two of the affiliated companies, as Chevrolet Motor Co. of California did not begin operations until August, and Chevrolet Motor Co. of Texas had not commenced to assemble cars prior to Dec. 31.

"Aside from transactions covering the acquirement of stocks, the increase in net assets was \$3,707,787. The increase in real estate, plant and equipment amounted to \$3,526,516."

CHEVROLET MOTOR CO. OF CANADA, LTD.

*(1) Capital Increased.—It was announced April 13, 1917, that this company, Oshawa, Ont., had increased its capital stock from \$500,000 to \$1,500,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

CHICAGO & ALTON R. R.

(1) Earnings—	1916	1915

6 mos. gross	8,056,731	6,830,735
Net after taxes	2,278,791	1,769,036

(2) Mail Case Decision.—It was announced at Washington Jan. 15, 1917, that a decision in the so-called "divisor" case, involving the authority of the Postmaster-General to fix compensation for carrying the mails had been announced by the United States Supreme Court by an equally divided vote. It upholds the decree of the Court of Claims, which was against the railroads. The amount involved is estimated at \$35,000,000.

The cases were brought by this company and the Yazoo & Mississippi Valley R. R., with the New York, Ontario & Western, the Bessemer & Lake Erie and other eastern roads being intervenors and amici curiae.

The roads attacked the order of the Postmaster-General of June, 1907, charging the basis of railway mail pay as illegal and void.

—Feb.

(1) Interstate Commerce Decision.—It was announced Feb. 24, 1917, that the Interstate Commerce Commission had suspended from Feb. 25 to June 25, 1917, an item in rate schedules filed by this company providing for the cancellation of through rates on coal from mines located on the company's system in Illinois to Muscatine, Iowa, applicable via Burlington, Iowa, and the Muscatine, Burlington & Southern R. R., leaving no through rates in effect via this route. The commission in its ruling stated that the increase in rates on the interstate transportation of soft coal provided by the suspended item appeared to affect injuriously the interests of the public.

CHICAGO CITY & CONNECTING RYS.

(1) Report, Year Ended Dec. 31, 1916.—Announced Jan. 17, 1917, that the Chicago City & Connecting Rys. collateral trust reported for the year ended Dec. 31, 1916; gross of \$2,100,000; dividends of \$812,000, and surplus of \$24,022.

—Feb.

(1) Trustee Committee Re-elected.—It was announced Feb. 7, 1917, that at the annual meeting of this committee the trustee committee was re-elected. The gross revenues of the Chicago surface lines were larger and operating expenses lower in 1916 than in 1915, resulting in a favorable showing for the securities of this company, the holding company for the surface lines.

CHICAGO CITY RY. CO.

(1) Listed in Chicago.—Announced Jan. 17, 1917, that the Chicago Stock Exchange had listed \$1,700,000 first gold 5s of this company.

—Mar.

(1) Report, Year Ended Jan. 31, 1917. shows gross revenues of Chicago surface lines for the year of \$34,789,636, an increase of \$3,098,874, or 9.78% over the preceding fiscal year. The residual receipts, after operating expenses, etc., were \$13,046,114, divided \$7,827,668, or 60% to the Chicago Rys. Co., and \$5,218,445, or 40%, to the Chicago City Ry. Co.

The income account of the Chicago City Ry. Co. for the fiscal year ended Jan. 31, 1917, shows net earnings of \$1,602,422, an increase of \$736,633 over the previous year. Total income, including interest on capital investment and miscellaneous receipts, amounts to \$4,248,834, from which was deducted bond interest totaling \$1,617,792 and \$881,332, the city's proportion of net earnings, leaving net income of \$1,749,710, an increase of \$336,170 over 1915.

Surplus as of Jan. 31, 1917, amounts to \$187,903. During the year \$1,665,000 was distributed in dividends.

CHICAGO COLD STORAGE & WAREHOUSE CO.

(1) Capital Increased.—On Feb. 6, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$1,000,000 to \$3,000,000.

*(1) Statement by President.—In connection with the annual report of this company Pres. Prince said, in part: "The livestock receipts for 1916 show large increases in all kinds of animals. Previous records were broken as to the receipt of horses for any single day, month and year, the receipt of hogs for any single week, month and year, and the shipment of horses for any year.

"The total valuation of all receipts of livestock for 1916 was \$500,620,628, the largest in the history of the yards.

"In 1916 some 25 new concerns located or contracted to locate in the central manufacturing district or elsewhere on the tracks of the Junction Ry. During the year the Junction Railway handled from the district approximately 75,000 full carloads of freight, an increase of 31% over the previous year. In addition, it handled 220,000 tons of less than carload freight from the district, an increase of 15% over the previous year."

• CHICAGO, MILWAUKEE & ST. PAUL RY. CO.

	1916	1915
*(1) Earnings—		
November gross	\$10,220,049	\$9,908,928

5 months' gross....	50,200,150	45,190,596
Net after taxes....	16,524,685	15,846,591

*(2) Comment on November Earnings.—On Jan. 3, 1917, the "Wall Street Journal" said, that although this company showed an increase of \$311,120, or 3% in

gross earnings in November, substantially heavier operating expenses brought net operating income \$388,339 under the previous year's total. During the month over \$193,000 more than the previous year was spent on maintenance of equipment, and transportation costs increased \$492,247.

In the five months ended Nov. 30, St. Paul was \$5,009,555 ahead of the previous year in gross revenues, but net operating income was only \$878,064 ahead. Maintenance of equipment was \$905,134 larger than previous year, while transportation costs rose \$2,183,257.

*(3) Electrification Progress.—It was stated Jan. 15, 1917, that the final work on the last 25-mile stretch of electrified territory of this company is rapidly nearing completion. It is expected that the entire mountain division will be electrically operated before the end of January. Early in December the line from Harlowton to East Portal, 406 miles, was in operation for passenger and freight service.

Gangs of workmen have been concreting 1½-mile-long St. Paul Pass Tunnel through Bitter Root Mountains for some time. When that work is completed only a short time will elapse before the current is turned on in last unit.

Engineers say one of the most remarkable features of the installation is arctic breaking control to hold back trains on long-descending grades and to return power to line. Electrification will soon be completed, said Pres. Earling.

*(4) Electrification Authorized.—On Jan. 25, 1917, it was announced that at a meeting of directors of this company the electrification of 220 miles of the Puget Sound division, from Othello, in Washington, to the Pacific coast, was authorized.

It is understood that the management of the St. Paul has under consideration a plan calling for the issuance of an additional \$25,000,000 of its general and refunding mortgage bonds, probably bearing 4½% interest.

Net after taxes....	19,135,283	19,031,960

*(2) Bond Offering.—It was announced Feb. 1, 1917, that Kuhn, Loeb & Co. and the National City Co., New York, are offering at 96½ and interest, to yield about 4.68%, \$25,000,000 general and refunding 4½% bonds, series A, of this company, due Jan. 1, 1914. There are outstanding under this mortgage \$18,089,000 series A 4½s, and \$29,141,300 series B.

*(3) Equipment.—It was announced Feb. 3, 1917, that this company's construction plan calls for 3,750 cars to be built in the company's shops. Tacoma shops will build 1,000 gondolas and the Milwaukee shops 1,500 gondolas, 1,000 box and 250 ore cars.

*(4) Admitted to List.—It was announced Feb. 13, 1917, that \$25,000,000 additional of this company's general and refunding mortgage 4½%, series A, bonds, due 2014, in temporary form, had been admitted to the list by the New York Stock Exchange.

—Mar.

	1917	1916
*(1) Earnings—		
January gross....	\$8,351,113	\$7,645,037

*(2) Extension.—It was announced March 7, 1917, that contracts had been let by this company for constructing an extension of 33 miles on the Blackfoot branch from Clearwater to Lincoln, Mont., thereby completing half of the connecting link from Missoula to Great Falls, Mont.

*(3) Statement by President.—On Feb. 27, 1917, Pres. Earling, of this company, was quoted in an interview as saying that operating conditions were unfavorable in January, due to severe cold weather and heavy snows, which

blocked traffic at many points. This condition continued well into February, when the road experienced great difficulty. Temperatures were extremely low all over the West, accompanied by unusually heavy snow upon the mountains, especially the Cascades.

Mr. Earling added there were no extensive plans for additions or betterments to the St. Paul. The road is largely past that stage of its development.

Mr. Earling expressed opinion that there was no foundation for the charge of Pres. Griffin, of the Chicago Board of Trade, that Western roads were discriminating against hauling of grain and foodstuffs from points in and around Chicago. There is at present an embargo on grain shipments, but only because of railroad freight congestion in the East.

Net after taxes....	1,511,926	1,533,193
6 mos. gross.....	74,231,689	4,484,677
Net after taxes....	20,647,210	1,429,869
†Decrease.		

*(2) Comment on February Earnings.—

On April 7, 1917, the "Wall Street Journal" said that for the first time this company operated its road at a deficit during February. Unprecedented weather conditions, under which it was impossible at time to keep the line open for traffic on account of heavy snows accompanied by high winds, resulted in a deficit after fixed charges of \$153,187. Gross revenues for the month naturally fell off, showing a decrease of \$1,184,604 from the corresponding period the year before.

In the eight months the road reported a gain of \$4,484,677 in gross over the previous year, but that was more than offset by the increase in operating expenses. Increased cost of materials, fuel, and labor, in addition to the thousands of dollars expended in a vain endeavor to keep the line open to traffic during the severe weather, figured chiefly in the rise in operating cost. The following table shows the principal changes in operating expenses:

	1917	1916
Maint. of way....	\$7,318,872	\$6,295,523
Maint. of equip....	12,047,794	10,797,122
Transp. exp....	28,392,653	25,061,038

The transportation ratio in the eight months in 1917 was 38.2%, against 35% the previous year, due largely to high prices for materials, freight congestion and bad weather.

While March has shown improvement in car loadings, it cannot be said whether the results are from betterment in business or the accumulation of freight during the inclement weather in February. Pres. Earling is optimistic as to the prospects for the remaining months of the fiscal year, as the extreme west is prosperous and business is active.

*(3) Power Contract Completed.—See Washington Water Power Co.—Item No. 1.

*(4) Contract for Power.—On April 10, 1917, officials of this road announced that in addition to the contract for the purchase of energy from the Inter-mountain Power Co. for electrifying its Washington lines from Othello to the Cascades, the company had also signed a contract for energy for the electrification for the lines west of the Cascades, this power to be purchased from the Puget Sound Traction, Light & Power Co., which has a large amount of surplus power for sale. Eight substations will be erected in connection with the electrification of the Washington lines.

*(5) Increased Shipping Tariffs Suspended Until Aug. 21.—The Interstate Commerce Commission April 2, 1917, suspended until Aug. 21 tariffs which name increased switching charges at Minneapolis and St. Paul on carload

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

freight switched between industries on the lines of the Chicago, Milwaukee & St. Paul and the Minneapolis & St. Louis railroads. The proposed charge, except on inbound grain, is 1 cent per 100 pounds, subject to a carload minimum weight of 60,000 pounds. The present charge varies from \$1.50 to \$3 per car.

(6) To Build Railroad to Last Large White Pine Stand in United States.—On April 20, 1917, the "Post-Intelligencer," Seattle, Wash., stated that the extension of this company's railroad from its line at Elk River, Idaho, into the white pine belt tributary to the Clearwater River marked the opening of the last large stand of white pine in the United States. This particular section is commonly known as the Pierce City plateau. It embraces privately-owned timber to the extent of between 600,000 and 700,000 acres.

The railroad proposes to build down Elk River to the intersection of the north fork of Clearwater River, sixteen miles. Here the line turns east and follows the north fork of the Clearwater to a point known as Big Island, the distance being about eleven miles. At this point it is proposed to build a large dam in the north fork for the purpose of forming a storage reservoir and for generating electric power.

From Big Island the line will extend 53 miles to the Welppe country. The estimated stand of timber in the Clearwater basin is given as being 11,000,000,000 feet, of which 35% is Idaho white pine.

CHICAGO MOTOR BUS CO.

(1) Stock Issue Planned.—Announced April 11, 1917, that application had been made by this company to the Public Utilities Commission at Chicago for a certificate of operation and for permission to issue \$950,000 stock.

CHICAGO & NORTH MICHIGAN R. R.

(1) Branch Line Sold.—On March 20, 1917, the Williamsburg Division of this road, a branch of the Pere Marquette System, was sold at auction for \$525,000. William P. Phelps, Walton W. Cox, of New York, representing present holders of securities of the branch, were the purchasers. The sale was part of the general plan of reorganizing the system.

CHICAGO, NORTH SHORE & MILWAUKEE R. R. CO.

(1) Note Issue Authorized.—It was announced Jan. 25, 1917, that an issue of \$170,000 equipment gold notes of this company had been authorized by the Illinois Utilities Commission. The proceeds will be used to purchase 15 steel cars.

(2) Stock Issue Permit Sought.—It was announced Jan. 4, 1917, that this company had filed a petition with the Illinois Public Utilities Commission for authorization to issue 152,509 shares. Stock is to be sold to reimburse company for money expended during last five years in constructing extension, bettering and equipping road and secured by other issues of bonds, notes or stock.

(3) Stock Issue Authorized.—Announced Jan. 11, 1917, that the Wisconsin Railroad Commission had authorized an issue of \$15,250,950 new stock by this company.

(4) Improvements.—Announced Jan. 16, 1917, that this company had completed plans for expending \$1,700,000 for betterments.

(5) Equipment Trusts.—It was announced Jan. 24, 1917, that the Wisconsin Railroad Commission had granted this company authority to enter into on equipment trust agreement provid-

ing for the issuance of \$10,000,000 equipment trust certificates bearing 5% interest, payable semi-annually and issued in series maturing one-tenth annually. The Farmers' Loan & Trust Co. and Edwin S. Marston will be trustees.

—Feb.

(1) Stockholders' Rights.—It was stated Feb. 1, 1917, that the right to subscribe to 10% of new common stock of this company accrues to holders of pfd. and common stock of record March 1. The rights expire April 7, on or before which date payment for the new stock must be made. Warrants will be mailed to stockholders as soon after March 1 as possible.

(2) Earnings.—

(3) Stock Exchange Ruling.—On Feb. 5, 1917, referring to the announcement of this company that pfd. and common stockholders of record at the close of business March 1, 1917, would be offered the right to subscribe at par for new common stock to the extent of 10% of their holdings, the Committee on Securities of the New York Stock Exchange ruled that transactions in the pfd. and common stock on March 1, unless made specifically for cash, should be "ex" rights; that rights might be dealt in on and after Feb. 5, and that transactions in rights must be settled on March 20. After this date dealings shall be as in securities. The right to subscribe expires April 7.

(4) Locomotive Order.—It was announced Feb. 5, 1917, that this company had ordered 20 locomotives from the American Locomotive Co.

(5) Stock and Bond Issues Authorized.—It was announced Feb. 5, 1917, that the Illinois Public Utilities Commission had authorized this company to issue \$15,250,950 new stock, \$1,000,000 bonds and to make an equipment trust agreement providing for \$10,000,000 of equipment trusts, of which \$4,240,000 may be issued immediately.

(6) Application to List.—Announced Feb. 26, 1917, that this company had made application to the New York Stock Exchange to list \$15,250,950 additional of its common stock.

—Mar.

(1) Listed in New York.—It was announced March 1, 1917, that the New York Stock Exchange had listed an additional \$15,251,000 of this company's common stock.

(2) Earnings.—

(3) Equipment Trust Issue Authorized.—It was announced March 21, 1917, that the Illinois Public Utilities Commission had authorized this company to issue \$1,000,000 equipment trust gold certificates under its trust agreement and an additional \$900,000. The company will issue \$4,250,000 for the purchase of 77 locomotives, of which 12 are class "E", passenger, 25 class "J", Mikado, 25 class "M" one-switch and 15 class "M" two-switch, 1,000 gondolas and 500 wooden box cars. The additional \$900,000 is for 20 class "J" Mikado locomotives to cost \$45,000 each.

Of the \$10,000,000 equipment trusts of 1913, \$4,000,000 had been issued to June 30, 1916, leaving \$6,000,000 still to be used for equipment obligations.

(4) Report, Year Ended Dec. 31, 1916.—It was stated March 24, 1917, that this company had issued its report for 1916. The income account for the year compares as follows:

	1916	1915
Gross.....	\$97,978,844	\$83,754,447
Net income.....	20,368,924	14,702,578
Surp. after chgs., pfd. and com. dividends.....	9,269,734	3,594,477

(5) Earnings on Stock.—It was stated March 24, 1917, that this company's 1916 net income of \$20,368,924 is equal to

13.34% on \$152,577,149 pfd. and common stocks outstanding, as compared with 9.63% earned on the same amount of stock in 1915.

(6) Balance Sheet, as of Dec. 31, 1916, showed profit and loss surplus of \$47,941,323.

(7) Equipment Order.—On March 28, 1917, it was stated that this company had placed an order with the American Car & Foundry Co. for 2,000 steel under-frame Gondola cars, to cost over \$4,000,000.

(8) Earnings.—

	1917	1916
February gross.....	\$6,683,241	\$7,018,787

CHICAGO PNEUMATIC TOOL CO.

(1) Statement, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net profits.....	\$1,577,980	\$982,864
Net income.....	1,408,605	815,059
Surp. aft. fixed chgs. & divs.....	695,471	275,295

(2) Earnings on Stock.—It was stated Feb. 5, 1917, that this company's 1916 net of \$1,408,605 is equal to 21.71% on \$6,485,000 capital stock before deduction of depreciation and development allowance, as compared with 12.57% in 1915.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,836,849, compared with \$2,278,133 Dec. 31, 1915.

(4) Statement by President.—In connection with the annual report of this company, Pres. W. O. Duntley, it was stated Feb. 5, 1917, said: "Notwithstanding severe competition, the year 1916 was by far the largest in the history of the company, not only in regard to the volume of business secured, but in the net results obtained.

"The large increase in volume of business of the company has taxed the capacity of the plants. Necessary additions and improvements have been made at all of them, and their physical condition has been maintained at the usual high standard.

"To enable the company to meet the demands made upon it through the abnormal increase in business, and to meet the increased demand for material and the increase in payrolls, it was found necessary to borrow considerably more money, which is reflected in bills payable.

"The amount to borrowed is more than offset by the increase in the current assets, and the ability to pay bills promptly and take advantage as much as possible of discounts thereon.

"The foreign subsidiary companies are doing very well, considering the troublous times in Europe. Both of the European companies are under government control. It is still considered

STANDARD CORPORATION SERVICE

JANUARY 1 TO APRIL 30, 1917

advisable to permit them to retain their earnings for additional working capital.

"The general activity of the business of the company during the year 1916 extending into this year, together with the orders already on hand, gives us reason to expect good results for the year 1917."

CHICAGO RY. EQUIPMENT CO.

*(1) Report, Year Ended Dec. 31, 1916, shows:

Earnings—	1916	1915
Net	\$780,103	\$575,496
Surp. after div.	606,083	401,475

*(2) Orders, 1916.—It was announced Feb. 26, 1917, that the report of this company of the year ended Dec. 31, 1916, said: "The total number of cars ordered for the year was 185,000. Of this total only 55,000 were ordered during the first six months, as against 130,000 during the last six months; while of the latter nearly 100,000 were ordered within the last three months of the year."

"Naturally, earnings in this particular field have been relatively small. Yet it is gratifying to note that the company in 1917 started with a larger volume of 'railway business' on its books than in any previous year."

CHICAGO RYS. CO.

*(1) Chicago Rapid Transit Plan.—It was announced Jan. 23, 1917, that an immediate appeal to the Illinois Legislature would be made for legislation to permit the adoption of the plan proposed by the Chicago Traction Commission. The proposed legislation would permit the merging of the elevated and surface lines and authorize the city to grant franchises for more than 20-year terms and give the city authority to raise money with which to purchase the traction properties.

*(2) Revenues, 12 Months Ended Nov. 30, 1916.—It was announced Jan. 30, 1917, that Chairman Blair, of this company, had reported to the bankers' syndicate purchasing \$1,700,000 of the company's first mortgage bonds that for the 12 months ended Nov. 30, 1916, gross revenues showed a gain of \$2,917,148, or 9.2%, while there was an increase in net revenues of \$1,555,183, or 14.4% over the 12 months ended Nov. 30, 1915.

—Mar.

*(1) Franchise Bill.—It was announced March 9, 1917, that the transportation committee of the City of Chicago Council approved the bill providing for the "30-20-year" franchise for the surface and elevated lines, on the understanding that amendments may be made after introduction of the bill in the State Legislature. The bill provides for mandatory municipal ownership of the rapid transit system after 30 years. If the city defaults in its payments after that time the properties revert to the company for the balance of the 20-year period.

*(2) Earnings Comment.—On March 27, 1917, the "Wall Street Journal" said: "The Chicago Railways earnings the past two months have shown 4% to 5% increase, or the normal rate of increase, in spite of bad weather in February. An indication of results for the fiscal year ending Jan. 31 was afforded by the recent annual report of the Chicago City Railway and of the Chicago Surface Lines, comprising the two companies."

"Negotiations for merger of the surface and elevated roads are progressing as well as could be expected under the circumstances. The companies are paying more attention to State than to municipal legislation just now. Three bills pending in the General Assembly of Illinois provide for permission to merge the companies, home rule and authority for the city to grant a longer franchise term than 20 years, the term of the surface line ordinances of 1907."

"The excellent growth in local travel promises to continue in a progressive ratio because the city is growing rela-

tively more than the other Western cities as a whole, as industries tend to converge here, and the Chicago commercial area is expanding right along, which partially explains the city's increasing popularity as a convention centre. As the population increases, the number of rides per capita increases. Whatever turn the merger negotiations may take or, however they may terminate, it is understood that the proposed passenger subway project will be a component part of the proposition."

*(3) Balance Sheet, as of Dec. 31, 1916, showed profit and loss surplus of 767, against \$286,952 in 1915.

—Apr.

*(1) Questioned by Illinois Commission.—It was announced April 2, 1917, that this company had been asked by the Illinois Public Utilities Commission why it had reissued \$500,000 first mortgage bonds without permission of the commission.

*(2) Adjustment Income Bonds.—On April 6, 1917, this company announced that the full annual interest of 4% on the \$2,500,000 of adjustment income bonds would be paid May 1 from earnings of the fiscal year ended Jan. 31, 1917.

*(3) Income Bond Interest to be Paid.—On April 9, 1917, directors announced that full annual interest of 4% on the \$2,500,000 adjustment income bonds would be paid May 1, from earnings of fiscal year, ended Jan. 31, 1917.

*(4) Right of Utilities Commission to Regulate Car Service Upheld.—A Chicago dispatch April 20, 1917, stated that the right of the Illinois Public Utilities Commission to regulate street car service in Chicago regardless of the provisions of the contract ordinances of 1907 between the Chicago City Council and the surface lines was upheld April 19, 1917, by the State Supreme Court, in a decision handed down at Springfield.

The ruling was the most far-reaching in its effect on traction regulation in Chicago of any decision rendered by the high court of the State in recent years.

It takes the final authority in traction regulation out of the hands of the City Council and the Board of Supervising Engineers and places it under the State Public Utilities Commission.

The decision is a blow to the plans of the surface and elevated road companies to get a 50-year franchise under a merger by action of the Council and the Legislature. The whole question now goes to the Utilities Commission.

CHICAGO, ROCK ISLAND & PACIFIC RY.

*(1) Reorganization Deposit Notice.—It was stated Jan. 3, 1916, that the joint reorganization committee of this company had called attention to the fact that Jan. 5 is the last date upon which stock and debentures will be received for deposit under the plan.

A meeting of the Dutch stockholders of the company, representing about 85,000 shares, was held in Holland on

Dec. 29. It was voted to deposit their stock under the plan of the reorganization of the company.

*(2) No Debenture Withdrawals.—It was stated Jan. 4, 1917, that Jan. 3 was the last day on which debentures deposited previously with the Rock Island reorganization committee might be withdrawn. The committee announced that there had been no withdrawals. Upwards of 85% of the \$20,000,000 debentures have been deposited.

*(3) Must Restore Lake and Rail Rates.—It was announced at Washington Jan. 5, 1917, that an order had been entered by the Interstate Commerce Commission in effect commanding this company to restore its lake-and-rail rates over the Canada Atlantic Transit Company's line, on or before Feb. 12, 1917. Commissioner Harlan wrote the decision.

*(4) Debenture Deposits.—On Jan. 8, 1917, it was stated that over 90% of the \$20,000,000 debentures of this company had been deposited under the reorganization plan, and about 90% of the \$75,000,000 stock, including what was pledged for deposit and the Dutch holdings.

*(5) Restitution Petition.—A Chicago dispatch Jan. 9, 1917, stated that the petition filed in the Rock Island restitution case provided for purchase of \$5,000,000 worth of new 6% pfd. stock, cash payment of \$500,000 and payment of costs, which amount to about \$250,000, by the Reid-Moore interests.

*(6) Settlement Not Authorized.—On Jan. 9, 1917, it was stated that Federal Judge Carpenter, in Chicago, had declined to authorize the receivers of this company to accept a compromise settlement with the Reid-Moore interests on the ground that stockholders and debenture bondholders had not been notified of the pending adjustment. The court set Jan. 29 for further hearing.

*(7) Suit.—It was announced at Chicago Jan. 12, 1917, that a suit for \$23,000,000 against this company and its receivers had been filed in the Federal Court there on behalf of the Bankers' Trust Co. of New York. The suit grew out of the failure of the company to pay interest on gold debenture bonds.

Earnings—	1916	1915
November gross	\$6,925,250	\$6,336,346
Net after taxes	1,778,180	1,469,500
5 mos. gross	35,267,453	30,567,278
Net after taxes	10,200,412	5,905,033

*(9) Stock Exchange Ruling.—Announced Jan. 22, 1917, that the committee on securities of the New York Stock Exchange had ruled that on and after this date bids and offers of this company shall be considered as being for certificates of deposit, unless stock is specified.

*(10) Verdict Against Company.—It was announced at Chicago Jan. 23, 1917, that another step in the reorganization of this company, in the hands of a receiver since April, 1915, was taken when a jury before Judge Carpenter in the United States District Court returned a verdict awarding judgment for \$21,500,513 against the railroad in favor of the Bankers Trust Co. of New York.

No defence was offered to the suit which was agreed to as part of the process necessary to a reorganization of the railway company.

The Bankers Trust Co. was Trustee of a \$20,000,000 issue of 20-year 5% gold debentures of the railway. The suit was for the principal and interest due.

*(11) Operation of Plan.—On Jan. 23, 1917, N. L. Amster was quoted as saying: "From indications reorganization plan of Rock Island will be under way about April 1, and will be fairest and cleanest in railroad history. The road has earned its way out of receiver's hands and is prosperous."

*(12) Settlement Approved.—It was announced at Chicago Jan. 29, 1917, that settlement of the suit of minority stockholders of this company against Daniel

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

G. Reid and William H. Moore for \$7,500,000 had been approved by Judge Carpenter in the United States District Court.

The terms of the settlement include the purchase of \$5,000,000 of 6% pfd. stock of the railway company by Mr. Reid and Mr. Moore, the payment by them of \$500,000 and all the costs of the litigation.

—Feb.

*(1) Protection for Keokuk & Des Moines Stockholders.—It was announced at Chicago Jan. 30, 1917, that Federal Judge Carpenter in approving this company's settlement plan assured protection for the Keokuk & Des Moines Ry. stockholders.

*(2) Reorganization Plan Operative.—Payments Called.—On Feb. 1, 1917, the joint reorganization committee of this company announced that about 95% of the debentures and over 98% of the stock having assented to the plan, it had been declared operative on this date.

The committee called for payment on March 3, 1917, the first instalment of \$10 in respect of each share of stock deposited; second payment, \$10 per share, April 3, 1917, and the third instalment, \$20 per share, June 14, 1917. The payments must be made to the depository by which the certificates of deposit were issued, namely, the Bankers Trust Co., New York, or First Trust & Savings Bank, Chicago.

*(3) Statement by Reorganization Chairman.—In declaring operation of the reorganization plan of this company, Chairman Seward Prosser, of the committee, issued the following statement:

"The joint reorganization committee announces that the United States District Court at Chicago has authorized settlement of the suits brought by the receiver and the stockholders against certain directors of the railway company. Under the settlement order, an additional sum of \$5,500,000 is to be thus made available for reorganization purposes, which sum will be paid by the defendants.

"This \$5,500,000 will be applied to the purchase, for account of the defendants, of \$5,000,000 par value 6% pfd. stock, cumulative up to 5%, of the new company. This \$5,000,000 stock is additional to the \$20,000,000 6% pfd. stock issuable under the plan in exchange for debentures.

"It is stated in the reorganization plan that the committee proposes to sell, before declaring the plan operative, an amount of such first refunding bonds, at least sufficient to provide for the payment at maturity of \$12,500,000 face amount of first mortgage 6% bonds and the \$1,394,000 Choctaw serial collateral bonds falling due in 1917.

"The committee deems it advisable to defer such sale. It is unnecessary to sell these bonds so far in advance of the maturities to be refunded. When all receiver's certificates shall have been paid, it is deemed that more favorable arrangements for the sale of these securities may be obtained.

"An understanding has been reached with the Peabody committee as to the terms upon which it will withdraw the suit brought for the foreclosure of the first and refunding mortgage."

*(4) Property Condition.—Upon his return from an inspection trip over the property of this company, N. I. Amster was quoted as saying, in part:

"I am sure that most of the critics who have been claiming that the Rock Island is nothing but a couple of 'streaks of rust' would be greatly surprised to learn that its physical condition is as good as that of any of its

*(5) Earnings—	1916	1915

*(6) Suit.—See Colorado & Southern Ry. Co.—Item No. 1.

*(7) Committee's Statement About Legislation.—On Feb. 26, 1917, refer-

ring to the announcement that this company was introducing a bill in reference to pfd. stock, the reorganization committee made the following statement:

"Under the plan of reorganization the decision as to the incorporation of a new company or as to the use of the charter of the existing company is left to the committee. The committee has not yet made any decision in the matter, but has several possible courses in mind. The statutory provisions of Iowa are in many respects favorable to this reorganization, but lack any express permission to create pfd. stock, except under conditions which are not present in this reorganization.

"The committee has been informed that a bill might be introduced to give specific authority for the creation of pfd. stock, but the committee is not informed as to whether any such bill has thus far been submitted to the Legislature. The committee is advised by its counsel that a number of methods of incorporation are available to it in addition to the possibility of using the present charter."

—Mar.

*(1) Stock Exchange Ruling.—On March 2, 1917, referring to the notice of the joint reorganization committee of this company that \$10 per share had been called for payment on March 3 on all shares of stock of the company deposited with the Bankers Trust Co., the committee on securities of the New York Stock Exchange announced that beginning March 5 all deliveries of Bankers Trust Co. certificates of deposit for said stock shall be in first instalment paid certificates, proper adjustment being made for payment.

*(2) Admitted to List.—It was announced March 3, 1917, that the New York Stock Exchange had admitted to the list this company's Bankers Trust Co. certificates of deposit for stock first instalment paid.

*(3) Earnings—	1917	1916
Jan. gross—	\$6,765,530	\$5,565,150
Net after taxes—	1,352,894	1,014,727

*(4) Suit Against Reorganization Plan. See Colorado & Southern Ry.—Item No. 2.

*(5) Temporary Injunction.—It was announced at New York March 7, 1917, that Supreme Court Justice Newburger had granted a temporary injunction restraining the Bankers Trust Co. from proceeding in the Federal Court in Illinois to enforce a judgment for \$21,500,000 recovered against this company on Jan. 23, 1917, because the road defaulted on bonds of which the trust company is trustee.

The injunction was applied for by Henry L. Clark and other pfd. stockholders of the Keokuk & Des Moines Ry., leased by the Rock Island, which has a claim for about \$5,000,000 against the Rock Island for unpaid rental.

*(6) Comment on February Earnings.—On March 15, 1917, the "Boston News Bureau" said that this company's gross earnings in February suffered a slight relapse compared with 1915, after an increase of over \$1,190,000 in January. February gross, it is understood, was \$5,948,475, against \$5,995,163 in February, 1916, a decrease of \$46,688.

In the first two weeks of the month increases were shown. The shrinkage came principally in the third week and was due almost entirely to the extremely cold weather in the West and Southwest, making it impossible to handle traffic in the normal way.

In the first week of March gross increased \$65,000 over the corresponding week in 1916.

The first instalment of \$10 on the \$40 assessment on Rock Island stock has brought into the treasury about \$7,400,000. There has probably never been a railroad reorganization in which over 99% of the stock was deposited under the plan and in which the response on the first instalment of the assessment was so general.

The next payment of \$10 will be called for payment in April and the following one will not be due until June.

*(7) Interest Payment Authorized.—It was announced at New York March 21, 1917, that Judge Hough, in the Federal District Court, had made an order granting authority to Jacob M. Dickinson receiver for this company to make payments amounting to more than \$3,000,000, of which the largest item was \$1,898,820, for interest on the refunding mortgage bond issue. The receiver was also authorized to renew the Central Trust Co.'s loan of \$2,500,000, and also to renew series "A" of the certificates issued by him on April 30, 1916, and series "B," which were due March 10, 1917.

*(8) Reorganization Committee to Purchase Bonds.—See Consolidated Indiana Coal Co.—Item No. 1.

*(9) Excellent Showing of Earnings.—On March 29, 1917, the "Wall Street Journal" said that the strength in Rock Island stocks, particularly the certificates on which one subscription of \$10 had been paid, reflected the excellent showing of earnings which the system was making and the satisfactory progress which was being made in clearing up details.

If net earnings were to continue to gain at the rate at which they did up to January 31, the company, as reorganized, could, for the year to end June 30 next, show between 14% and 15% on the common stock, after allowing for full dividends on the new pfd. stocks.

For the company, as reorganized, the reorganization committee estimated surplus over charges and pfd. dividends for the year ended June 30, 1916, at \$1,504,000. The increase in net earnings for the seven months ended Jan. 31, 1917, was \$5,133,000.

It is probable, however, that earnings in the last five months of the year will not show as large gains as in the first seven months. In February there was a falling off in both gross and net earnings, as a result of the extremely cold weather and heavy snowfall in the West and Southwest, making it impossible to handle traffic in the normal way. In March, however, gross earnings have again been showing good increases.

The next payment of \$10 on the stock will be due in April and will bring another \$7,400,000 into the Rock Island treasury. The final instalment of \$20 is due in June. The working out of details in connection with a railroad reorganization, after the plan is once assured, naturally takes considerable time, but the clearing up of these matters has been progressing smoothly. Within three months the new company should be operating the property.

—Apr.

*(1) Listed in New York.—Announced April 3, 1917, that the New York Stock Exchange had admitted to the list this company's Bankers Trust Co. certificates of deposit for capital stock, second instalment paid.

*(2) Earnings—	1917	1916
February gross—	\$5,949,977	\$5,748,780
Net after taxes—	618,784	1,302,483
2 months gross—	12,705,507	11,313,931
Net after taxes—	1,971,678	2,317,210

*(3) Reorganization Committee Statement.—On April 12, 1917, in connection with the action of the Rock Island directors in calling a stockholders' meeting for June, 1917, the joint reorganization committee stated:

"Under the plan, it is optional either to reorganize under the present charter or to form a new corporation. In the former case, statutes require 60 days' notice of a meeting to authorize a stock increase. The committee deems it competitors, not excepting the Burlington or the Atchison.

"I went over the line from Chicago all the way to Santa Rosa, New Mexico, with Chief Operating Officer Ridgeway, and although I have always known that the road was in very good condition, I was agreeably surprised to find it in much better shape than anticipated. In fact, the only place that could be said to be not in first-class condition was that small section over which the company has trackage rights entering Kansas City, but which belongs to the Burlington.

JANUARY 1 TO APRIL 30, 1917

"Not many people realize, I believe, that the Rock Island is the only system west of Chicago that has hundreds of miles of track laid with 100-pound steel rails and that its main lines out of Chicago and Kansas City are as good, if not better, than those of any of its neighbors reaching the same points.

"It now seems reasonable to expect that the property will be out of receivership and in control of the stockholders within a very few months.

"It is gratifying to note that the earnings are still keeping the high pace set last year. In fact, I shall be greatly surprised if the present calendar year's gross and net does not far exceed the banner year of 1916.

"Estimates at hand for the first three weeks of this year show an increase in gross of about \$779,000 over last year, thereby setting a new high record. This is at the rate of about \$1,000,000 increase for the month of January.

"(4) Admitted to List.—Announced April 12, 1917, that the New York Stock Exchange had admitted to the list this company's new 7% pfd. stock "when issued," new 6% pfd. stock "when issued, and new common stock "when issued."

"(5) Injunction Against Sale of Assets Vacated.—An injunction granted at New York by Supreme Court Justice Newburger, restraining the sale of the assets of this company in the foreclosure of a \$20,000,000 bond issue, of which the Bankers' Trust Co. is trustee, was vacated April 20, 1917, by the Appellate Division of the Supreme Court. The suit was brought by Henry I. Clark and other stockholders of the Keokuk & Des Moines Ry., a subsidiary of the Rock Island, on the ground that the Rock Island had failed to pay for the rental of the road and that if the Rock Island road's property was sold under the foreclosure decree of the United States Court the Keokuk & Des Moines stockholders would be unable to realize on their claims.

The Appellate Division took the view that the injunction order restrained the action of the United States Court, and said: "The State courts cannot enjoin proceedings in the courts of the United States, nor the latter in the former courts."

The Keokuk & Des Moines stockholders have no remedy now unless they can find it in the Federal courts.

CHICAGO SCREW CO.

"(1) Site for New Buildings.—It was stated March 31, 1917, that this company had closed a contract in Chicago for the purchase of 20 acres, costing, approximately, \$250,000. Buildings costing in excess of \$500,000 will be erected.

CHICAGO STAGE CO.

"(1) Operation of Motor Buses in Chicago Planned.—On April 27, 1917, the "Wall Street Journal" said announcement had been made that this company, backed by New York Transportation Co., owning the Fifth Avenue Coach Co., had prepared plans to operate motor buses in Chicago.

Applications have been filed for about 60 miles of routes largely over Chicago's boulevard and park system.

The officers of the new company are: Richard W. Meade, Pres.; Samuel E. Morrow, Sec'y, and George L. Williams, Treas.

"In making our application," said Mr. Meade, "we have specified a 10-cent fare, have asked for a 20-year franchise, and have agreed to guarantee minimum payments to the municipal authorities of over \$2,700,000. This is along the lines of our recent proposals for additional routes in New York City."

CHICAGO MINING CO.

"(1) Incorporated on April 19, 1917, in Delaware, with a capital of \$1,000,000, to carry on the business of milling and mining, quarrying, refining and preparing for market gold, silver, copper, lead, zinc, etc. Incorporators: Samuel J. Cotter, Julius Kellerschön, Edward A. Separk, Chas. S. Power, Rupert T. Meade, John E. McCarthy and John T. Pearson, Duluth, Minn.

CHICO WATER SUPPLY CO., CALIFORNIA.

"(1) Report, Year Ended Dec. 31, 1916, shows operating revenue of \$34,058, net revenue of \$14,541, gross corporate income of \$14,688, and surplus after charges of \$12,170.

"(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$49,479, compared with \$41,379 Dec. 31, 1915.

CHIEF CONSOLIDATED MINING CO.

"(1) Report, Year Ended Dec. 31, 1916, shows cash on hand \$477,295, as against \$210,034 at the end of the previous year

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

The company during year paid out \$176,481 in dividends. Net value of ore sales was \$1,315,441, and net after all charges was \$630,823. In 1916 the company produced 18,439,133 pounds of lead against 8,232,006 pounds in 1915, and 1,739,004 ounces of silver, against 403,854 ounces in 1915.

CHIRUAHUA MINING CO.

¹(1) Directors Re-elected.—Announced Jan. 8, 1917, that at the annual meeting of stockholders of this company retiring directors were re-elected.

CHILDS CO.

¹(1) Report, Year Ended Nov. 30, 1916, shows.

	1916	1915
Gross	\$1,075,490	\$779,459
Surp. after divs.	608,403	481,309

¹(2) Balance Sheet, as of Nov. 30, 1916, shows a profit and loss surplus of \$759,117, compared with \$489,134 Nov. 30, 1915.

¹(3) Merger Planned.—See Acme Tea Co.—Item No. 4.

—Mar.

¹(1) Dividend Increased on Common.—Announced Feb. 28, 1917, that this company had declared the regular quarterly dividend of 1½% on the pfd. stock and a dividend of 1¼% on the common, both payable March 10 to stock of record Feb. 28. Books close March 1 to 10, inclusive. This is an increase of one-half of 1% on the common stock.

CHILDS GROCERY CO.

¹(1) Amalgamation Completed.—See Acme Tea Co.—Item No. 2.

CHILEAN TIN SMELTING CO.

¹(1) New Company.—It was announced April 11, 1917, that this company had been organized to establish a tin smelting plant at Arica, Chile, to treat Bolivian tin concentrates. The committee of engineers in charge is announced as Guillermo Yunge, Durevard Copeland and Richard Gabler.

Tin ingots, 99.75% pure, will be made. It is said that the smelter will have about 7,000 tons of 60% tin barilla from Liallagua Mines of Bolivia and should easily find 3,000 to 5,000 tons more from other producers. Construction work has been started.

CHILE COPPER CO.

¹(1) Production, December, 1916.—Announced Jan. 8, 1917, that this company in December produced 6,118,000 pounds of copper, compared with 4,098,000 pounds in November, 4,500,000 in October and 4,038,000 in September.

¹(2) Production, 1916.—On Jan. 9, 1917, it was stated that this company closed, with the end of 1916, its first full year as an operating property with an output of 45,114,000 pounds of copper. It was in May, 1915, that the Chile concentrator started on its productive career, while the first copper shipment was effected late in the following July.

Thus far the Guggenheims have not seen fit to take the stockholders into their confidence as regards earnings or as to prospective financing plans. It is understood, however, that operations have resulted in net profits of not far from \$1,000,000 a month, while for 1916 they were around \$7,500,000.

Heralded as the "world's largest copper mine," with ore reserves in excess of 700,000,000 tons, ambitious plans have been tentatively outlined from time to time which, in effect, provide for an ultimate milling plant capable of handling 30,000 tons of ore daily and producing at least 800,000,000 pounds of copper per annum.

This would be from its own ores, whereas the 1916 production of over 300,000,000 pounds came partly from custom material shipped to the Anaconda smelters by small leasers.

—Feb.

¹(1) Production, January, 1917.—Announcement was made Feb. 15, 1917, that this company in January produced 7,756,000 pounds of copper, compared with 8,636,000 in December, 1916.

¹(2) Comment on January Production.

—Feb. 16, 1917, the "Wall Street Journal" said that at first glance this company's surprising production in January would seem to be the highest monthly output on record, but it is pointed out that neither the figures for the last month of 1916 nor the first month of 1917 is a true indication of the company's operations. In December there was a very large quantity of copper on hand in the shape of cathodes, which was not included in the monthly output, as no copper excepting ingots or wire bars is considered in the production figures.

A great part of these December cathodes was turned into ingots in January, and included in the production for that month. At the end of January, there was still on hand an abnormal amount of copper in the shape of cathodes.

It is pointed out that a figure which can be considered as the true indication of the rate at which the company produced copper in January and December is a little over 6,000,000 pounds for each month.

This would indicate that Chile is producing at the rate of 72,000,000 pounds a year, compared with the 1916 output of 45,114,385 pounds.

—Mar.

¹(1) Production, February, 1917.—It was announced March 7, 1917, that this company in February produced 6,066,000 lbs. of copper, compared with 3,144,480 lbs. in February, 1916.

¹(2) Bond Issue Planned.—It was stated March 9, 1917, that this company had completed plans for an issue of \$35,000,000 bonds. The Guggenheim interests, according to the statement, have agreed to take half the issue, which will pay 6% and be convertible into stock at \$35 a share.

This new issue will give the Chile property a total capitalization of \$160,000,000, of which \$110,000,000 is stock, all issued save \$15,000,000. The company has outstanding an issue of \$15,000,000 of collateral trust 7s, convertible into stock at \$25 per share.

¹(3) Syndicate for Offering of Bonds.—Announcement was made March 11, 1917, that Eugene Meyer, Jr., & Co. were forming a syndicate to underwrite \$35,000,000 par value 6% convertible bonds of this company, which, subject to the approval of the stockholders, would be offered to shareholders at par. The bonds are to be convertible into stock at \$35 per share.

The proceeds will be used to pay off the floating debt of the company and the balance will be applied to the increase in the present plant from a plant capacity of 10,000 tons per day to the enlarged capacity of 27,000 tons of ore per day.

The existing first collateral trust 7s are to be paid off on maturity in 1923 and the new issue will become a first and only lien, at that time, on the stock of the operating company in Chile, all of which is owned by the Chile Copper Co.

The bonds are to run 15 years, are convertible at any time, the interest rate will be 6% and the bonds will not be callable except as a whole.

¹(4) Special Meeting April 16.—Stockholders' Rights.—It was announced March 12, 1917, that a special meeting of the stockholders of this company to authorize the issuance of new bonds would be held April 16.

Warrants representing the rights to subscribe to the new bonds pro rata will be issued to stockholders of record as of the close of business April 24.

Stockholders of record as of April 24 will have the privilege to subscribe for part-paid receipts at any time up to the close of business on May 29, at which time the first instalment of the subscriptions, 50%, is due and payable. The second instalment is payable one year later.

¹(5) Status.—It was stated March 12, 1917, that from the viewpoint of proven reserves of copper this company has

the largest copper mine in the world. In April, 1913, ore reserves were given as 95,637,000 tons, averaging 2.41% copper. Development work since then has increased the ore reserves to 364,000,000 tons, with additional probable reserves of 346,000,000 tons, a total of 700,000,000 tons.

With the present capacity of 10,000 tons a day, which means a production of 110,000,000 pounds annually, net profits on 4,400,000 shares, all present bonds converted, would amount to \$1.50 a share on a profit of six cents a pound, \$2 a share on a profit of eight cents a pound, and \$2.50 a share on a profit of ten cents a pound and \$3 on a profit of twelve cents a pound.

The earning power of the Chile Copper Co., based upon an annual profit of 6 cents per pound and on production of 300,000,000 pounds annually would be \$18,000,000. An 8-cent profit would give the company annual earnings of \$24,000,000; a 10-cent profit \$30,000,000, and a 12-cent profit \$36,000,000. On 5,400,000 shares this would mean \$3.33 a share on a 6-cent profit, \$4.44 on an 8-cent profit, \$5.56 on a 10-cent profit and \$6.67 on a 12-cent profit.

The Chile Copper Co. plans to increase its capacity to an extent which would enable it to handle from 50,000 to 60,000 tons of ore daily.

¹(6) Comment on Bond Issue Plan.—On March 16, 1917, the "Boston News Bureau" said that the decision of the directors of this company to issue \$35,000,000 convertible bonds with which to retire floating debt and increase plant capacity sufficiently to treat 27,000 tons of ore per day is a matter of far-reaching importance to the company's security holders. It means that the property has been developed to the point of supplying an enormous tonnage of relatively high grade ore, and it is axiomatic that the quicker a mine can be made to yield up its metal contents the greater is the "present value" of its securities.

The company's engineers having solved all metallurgical problems and corrected all preliminary treatment difficulties, a bold, aggressive policy has been inaugurated. Costs per unit of output will quickly recede as tonnage of ore treated is increased. Chile is conceded to possess the largest tonnage of unmined copper ore known to exist in the entire world.

In April, 1913 when the first bonds of the company were sold, the Chuquicamata deposit in Chile was estimated to contain 95,637,000 tons of 2.41% copper ore. The present proven ore reserves are 354,000,000 tons, with additional probable ore of 346,000,000 tons, a total of 700,000,000 tons, averaging 2.12%. This estimate, Consulting Engineer Hellmann says, is "very conservative," and will undoubtedly be exceeded.

Thirty-four years would be required, creating 27,000 tons per day, to exhaust the supply of oxidized ore alone—239,000,000 tons. At the end of this period there would still remain 361,000,000 tons, averaging 2.32% copper.

By increasing the ore production to 27,000 tons a day the earning power of the company will be increased 170%.

¹(7) Financing Plans.—On March 20, 1917, the "Boston News Bureau" said: "An authorization of \$100,000,000 bonds and an increase in capital stock from \$110,000,000 to \$135,000,000 will be sought by Chile Copper Co. from its stockholders next month. Calls have been sent out for special meeting to be held April 16, in Wilmington, Del., to act on financing.

"Of the proposed bonds \$35,000,000 will be issued and \$65,000,000 reserved for future disposition. The underwriting syndicate includes Guaranty Trust Co., Eugene Meyer, Jr., & Co., and Guggenheim Bros. The underwriting agreement fixes commission to be paid bankers at 6%.

"The annual meeting will be held the following day, April 17, in New York City for routine purposes. Books close March 26 and reopen April 18.

"Stockholders of record April 24 may

JANUARY 1 TO APRIL 30, 1917

subscribe pro rata for the \$35,000,000 new bonds at par and accrued interest, payable in two instalments of 50% each at time of subscription and on May 29.

—Apr.

*(1) **March Production.**—In March, 1917, this company produced 8,714,000 pounds of copper, compared with 6,056,000 pounds in February, and an average monthly production of 6,000,000 pounds in January and December.

*(2) **Comment on March Production.**—On April 8, 1917, The "Wall Street Journal" said that this company's production in March registered a remarkable increase, the 8,714,000 pounds being the highest on record, exceeding February's output by 2,658,000 pounds and March, 1916, production by 5,177,204 pounds.

If last month's figures are an index of production over the rest of the year Chile's 1917 output will be close to 100,000,000 pounds, compared with a 1916 production of 45,114,385 pounds, or more than double last year's output. According to interests in the company, it would not be surprising if production rose to a 120,000,000-lb. basis some time this year. March production was at the annual rate of 104,508,000 pounds.

*(3) **Capital Increased.**—Bond Issue Authorized.—A Wilmington, Del., dispatch April 16, 1917, stated that the financing plan of this company became assured when stockholders at a special meeting voted to increase the capital stock from \$110,000,000 to \$135,000,000, and at the same time authorized an issue of \$100,000,000 bonds.

It was further voted to issue \$35,000,000 6% convertible bonds, to be offered stockholders for subscription at par. These bonds shall be redeemable at 110 on any interest date after April 1, 1922, and convertible into common stock of the company at \$35.

There will be pledged the 10,000 shares of stock of Chile Exploration Co., subject to lien of the company's collateral trust agreement of 1913, securing outstanding 7% convertible bonds.

*(4) **Underwriting Syndicate**—Stockholders' Rights.—On April 16, 1917, the "Boston News Bureau" said that the new bonds of this company had been underwritten by a syndicate including the Guaranty Trust Co., of New York; Eugene Meyer, Jr., & Co. and Guggenheim Bros., for a commission of 6% of the principal amount of \$35,000,000. Stockholders of record April 24 may subscribe for their pro rata amount of bonds, payable in two instalments, 50% upon subscription and 50% May 29.

*(5) **Capital Increased.**—On April 17, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$110,000,000 to \$135,000,000.

*(6) **Listed on New York Stock Exchange.**—The New York Stock Exchange announced April 19, 1917, that it had admitted to the list Chile Copper Co. \$35,000,000 part-paid and full-paid receipts for collateral trust receipts 6% convertible bonds, series A, "when issued," to be traded in flat.

*(7) **Rights Admitted to Dealings on New York Exchange.**—The New York Stock Exchange announced April 19, 1917, that it had admitted to dealings Chile Copper Co. rights.

*(8) **Letter Sent to Stockholders about New Stock and Bonds.**—Sec'y C. K. Lipman, of this company, April 17, 1917, sent to stockholders a circular in reference to the increase in the company's authorized capital stock by \$25,000,000 and authorization of the issue of 6% convertible bonds to a principal amount not exceeding \$100,000,000.

These bonds are secured by pledge of entire stock of Chile Exploration Co., subject only to the existing lien of \$15,000,000 10-year 7% convertible bonds outstanding and pledge of such other property as may be provided for in the trust agreement.

Bonds to the amount of \$35,000,000, designated as "Series A," are subject to immediate issuance and sale. They will be payable April 1, 1932, and are redeemable at the company's option or on

any interest date after April 1, 1922, at 110% and interest, and will be convertible into stock at the rate of \$35 principal amount of bonds for \$25 par value of stock.

As soon as practicable warrants will be issued to stockholders of record as of April 24. Face amount of warrants to which stockholders will be entitled shall equal 35-95ths of the par value of stock. Fractional warrants can be used for subscription only by surrendering same on or before May 29.

Stockholders of record April 24 will be entitled to subscribe on or before May 29 for their pro rata share of the \$35,000,000 bonds. The purchase price will be payable in instalments, as follows: 50% upon subscription not later than May 29, 1917; and 50% on May 29, 1918. A syndicate, including Guaranty Trust Co., Eugene Meyer, Jr., & Co., and Guggenheim Bros. has unwritten the new bonds.

*(9) **Floating Debt Nears \$7,000,000.**—On April 21, 1917, the "Boston News Bureau" said that this company had a floating debt of between \$6,000,000 and \$7,000,000 which will be eliminated with part of the proceeds from sale of \$35,000,000 bonds now offered stockholders for subscription. It is understood that March earnings were approximately \$1,000,000.

Jointly with Braden Copper Co., Chile owns control of several steamers operating between Chile and the United States which take supplies to the property and bring back copper.

The output in March, approaching 9,000,000 pounds, was the heaviest yet reported for a single month.

It will not be long before capacity of the present plant has been reached as current shipments are between 7,000 and 8,000 tons or ore daily. This averages about 1 1/4% copper. There is a railway haul of more than 100 miles over the Antofagasta & Bolivia R. R. to get to tidewater. The Rothschilds own this road.

Chile Co. stock has been distributed into the hands of about 4,000 persons, whereas two years previously the stockholders numbered in the hundreds.

CHILE EXPLORATION CO.

*(1) **Production, January, 1917.**—It was announced Feb. 16, 1917, that the copper production of this company in January amounted to 7,756,000 lbs. The December output was announced officially as 6,636,000 lbs.

—Mar.

*(1) **Production, February, 1917.**—It was announced March 16, 1917, that this company in February produced 7,056,000 lbs. of copper, compared with 7,756,000 in January, 1917.

CHINA-AMERICAN MOTORSHIP CO., INC.

*(1) **Statement by Company.**—On Jan. 10, 1917, Pres. Melbourne Crisp, of this company, announced that, if his company is successfully financed before Feb. 1, 1917, it would be in a position to give out shipbuilding contracts to the value of over \$2,000,000.

He also stated that it had received from the foreign representative a request for three additional ships one with a capacity of 4,000 tons and the other two of 1,000 tons each.

CHINA (REPUBLIC OF).

*(1) **New Contract.**—See Siema-Carey Co.—Item No. 1.

CHINO COPPER CO.

*(1) **Production, November, 1916.**—Announced Jan. 3, 1917, that this company in November produced 6,906,024 lbs. of copper, compared with 6,921,081 in October and 7,397,204 in September.

*(2) **Profits in 1916.**—On Jan. 15, 1917, the "Boston News Bureau" said it is estimated that this company made net profits approximating \$13,000,000 from 1916 operations. This was a record-breaking total from which dividends of \$7,177,335, or \$8.25 per share, were paid, leaving almost \$6,000,000 to be brought

forward into the 1917 surplus account.

With a production, estimated at 76,000,000 pounds, Chino scored a gain of 10,000,000 pounds over the previous year's output. Its rate of production increased from 60,000,000 pounds per annum at the beginning of 1916 to about 80,000,000 pounds at the close, with prospects for further gains during the current year.

Considerable time and money were spent during the year in improving Chino's facilities, as well as enlarging them.

—Feb.

*(1) **Production, December, 1916.**—Announced Jan. 31, 1917, that this company produced in December 6,750,916 pounds of copper, compared with 6,906,024 in November, and 6,921,081 in October, 1916.

*(2) **Report, Quarter Ended Dec. 31, 1916,** compares with same quarter in 1915, as follows:

	1916	1915
Net profit.....	\$3,347,640	\$2,407,919
Surp. after divs.	1,254,028	1,591,787

Earnings for the fourth quarter are based on 28.34 cents per pound of copper, as against 25.61 cents, 27.49 cents, and 28.57 cents per pound for the third, second and first quarters, respectively.

*(3) **Statement by President.**—It was stated Feb. 10, 1917, that Pres. C. M. MacNeill, of this company, in his remarks to stockholders, said, in part: "The total amount of ore treated for the three months was 790,000 tons, being an average of 8,587 tons per day. Average copper content of the ore treated this quarter was 1.78% as against 1.89% for the previous quarter, 1.79% for the second quarter, and 1.87% for the first quarter of 1916.

"The recovery per ton of ore milled for the last quarter of 1916 was 26.05 pounds, as against 25.71 pounds for the previous quarter, 22.95 pounds for the second quarter and 22.77 pounds for the first quarter of 1916. There were produced 72,007 dry tons of concentrates, averaging 14.29% copper, as against 62,531 dry tons for the third quarter, averaging 16.48% copper.

"In addition to the copper recovered by milling, there were 24,925 pounds recovered from the precipitation plants at the mine, making the total production from all sources for the fourth quarter of 20,602,946 pounds, equivalent to 8,867,649 pounds per month.

"The cost per pound of net copper produced for the quarter, after allowing for smelter deductions and crediting all miscellaneous income, was 8.89 cents, as against 8.17 cents for the third quarter of 1916. The ore was not of quite as good concentrating character as for the previous quarter.

"The ore during this quarter, however, was somewhat higher in iron, resulting in a lower grade concentrate and a larger tonnage, so that most of the increased cost was due to the additional smelting charges, and in addition to that there were increased wages and a general rise in material costs, which fully accounts for the increased net cost per pound of copper."

*(4) **Earnings, Year Ended Dec. 31, 1916,** as compiled from the four quarterly reports, compare with the actual earnings of 1915 as follows:

	1916	1915
Net profit.....	\$12,517,875	\$6,688,729
Net after int.....	12,843,222	6,913,984
Depreciation ---	↑	257,265

Balance	\$12,843,222	\$6,656,719
Surplus	5,685,887	4,048,859

†Figures for 1916 not available.

*(5) **Earnings on Stock.**—It was stated Feb. 13, 1917, that this company's 1916 balance of \$12,843,222, after interest charges, is equal to \$14.76 a share on the 869,980 shares outstanding, compared with \$7.67 a share earned on the same stock in 1915.

—Mar.

*(1) **Extra Dividend.**—Announced March 1, 1917, that this company had declared a regular quarterly dividend of \$1.50

JANUARY 1 TO APRIL 30, 1917

and an extra of \$1 a share, payable March 31 to stock of record March 9.

*(3) **Production, January, 1917.**—Announced March 3, 1917, that this company in January produced 6,452,154 pounds of copper, compared with 6,750,916 pounds in December and 6,906,024 pounds in November, 1916.

*(3) **February Production.**—In February, 1917, this company produced 6,572,106 lbs. of copper, compared with 6,452,154 lbs. in January and 6,750,916 lbs. in December.

—Apr.

*(1) **Report, Year Ended Dec. 31, 1916,** shows income account as follows:

	1916	1915
Gross	\$19,219,767	\$11,383,777
Net	12,517,876	6,688,729
Surp. after chgs.	12,527,948	6,650,719
Bal. after divs.	5,350,613	4,046,859

*(2) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$13,963,873, compared with \$3,613,261 Dec. 31, 1915.

*(3) **Earnings on Stock.**—It was stated April 11, 1917, that this company's 1916 net profit of \$12,527,948 is equivalent to \$14.40 a share earned on 869,980 shares of capital stock, compared with \$7.65 a share earned in 1915.

*(4) **Production, 1916.**—It was stated April 11, 1917, that this company's gross production of copper in concentrates and 'earned surplus' therefore amounted to \$5,350,613. The total 'earned surplus' as of Dec. 31, 1916, aggregated \$13,963,873. The surplus from the sale of securities over par value remained at the same figure as the previous year, namely, \$2,995,252.

*(5) **Statement by President.**—In his annual remarks to stockholders of this company Pres. C. M. McNeil, it was stated April 11, 1917, said, in part: "After the payment of these dividends aggregating \$7,177,335, surplus amounted to \$5,665,828; reserve set aside for depreciation of plant and equipment amounted to \$315,213, and the net undivided profits for the year passed to earned surplus therefore amounted to \$5,350,613. The total earned surplus, as of Dec. 31, 1916, aggregated \$13,963,873. The surplus from the sale of securities over par value remained at the same figure as the previous year, namely, \$2,995,252."

"The total dividends paid up to and including the dividends paid in the year ended Dec. 31, 1916, amounted to \$13,875,330. The outstanding stock of the company remained the same, 869,980 shares. Recalculation of ore reserves as of Dec. 31, 1916, resulted in a total developed tonnage of 95,555,843, of an average value of 1.656% copper."

*(6) **Managing Director's Statement.**—It was stated April 11, 1917, that Managing Director D. C. Jackling, of this company, in his annual report to stockholders said, in part: "Improvements made in 1916 and the previous year at both mines and mills brought about betterments in operation which are reflected in practically every phase of the foregoing report. Tonnage handled was much larger than that for any previous year; mill recoveries were maintained even in the face of this increased tonnage, and production was for the year the largest in the history of the company."

"Physically and in every other respect the property is in excellent condition at this time. Betterments now in progress and which should be practically all completed during 1917 will add substantially to the tonnage capacity of the entire property, as well as permit the profitable use of some classes of ore that it has been impossible to commercialize through the use of present equipment and methods."

"The new tailings re-treatment plan will undoubtedly add substantially to production and profits for a number of years. All of these improvements when completed should add at least one-third to the property's producing capacity as compared to that of the year under discussion and proportionally, of course, to its earnings."

*(7) **Comment on 1916 Report.**—On April 12, 1917, the "Wall Street Journal" said

in part: "Chino Copper Co.'s average cost of net copper produced in 1916, after making deductions for smelter allowances, and after crediting precious metal values and miscellaneous income, was 8.7 cents a pound, compared with 6.75 cents in the previous year. The advance in the cost of mining Chino's ore, like the increases reported by other copper companies for last year, was due to increased metals, and amounted to 0.11 cent a pound; and miscellaneous income .45 cent, a total of 0.56 cent a pound."

"Recalculation of ore reserves as of Dec. 31, 1916, showing total developed tonnage of 95,555,843 of an average value of 1.656% copper, shows that Chino increased its reserves 5,555,843 tons last year. With a daily average mill capacity of 8,455 tons, the mine has a proven life of about thirty-two years. Development work up to the end of 1915 indicated that Chino then had a life of twenty-nine years."

"Of the 95,555,843 tons of developed ore remaining in and on the property at the end of last year 94,490,836 tons, averaging 1.655%, remain unmined. The remainder, amounting to 1,064,907 tons, consists of mixed sulphide and carbonate ore in stock piles, containing an average of 1.81% copper. This ore was stored because it was not amenable to concentration by methods regularly employed, but facilities for its treatment are being provided."

"Total amount of ore that has been developed and reported since beginning of operations, including that now reported, is 106,081,263 tons, averaging 1.604% copper. Ore added to reserve as a result of development for 1915 and 1916 averaged 1.35% copper."

"The Hurley mill and its accessories were originally built to handle 5,000 tons daily. Now it is estimated that the two new sections of the plant when completed, making a seven-section plant in all, will have a capacity of about 12,500 tons daily, corresponding to an increase of about 40% above the capacity of the present five-section plant."

*(8) **New Director Elected.**—At the annual meeting of this company April 20, 1917, J. M. Sully was elected to succeed B. Hochschild as a director.

*(9) **Production, March, 1917, 6,200,851 Lbs.**—This company, April 27, 1917, reported a production of 6,200,851 lbs. of copper in March, compared with 6,572,106 in February and 6,452,154 in January.

CHOYLES OIL CO., LTD.

*(1) **Sold.**—See Tampico-Panuco R. R.—Item No. 1.

CINCINNATI, BLUFFTON & CHICAGO R. R.

*(1) **Extension.**—It was announced Feb. 23, 1917, that J. M. Wilson, who recently bought this road at bankruptcy sale, will extend the line during 1917 and 1918, although the organization which will perform the work had not yet been formed.

CINCINNATI & COLUMBUS TRACTION CO.

*(1) **Revaluation and Sale Planned.**—It was stated Jan. 5, 1917, that the sale of the property of this company, which was scheduled to take place on Dec. 19 at an upset price of \$850,000, failed to be carried through on account of a lack of bidders. It is expected that the court will order a revaluation, and the property will again be offered for sale.

Were it not for the unsettled condition of the loop question and an interurban right of way into Cincinnati, it is said, the stockholders would be prepared to buy in the property at once.

The railway was placed in the hands of the Union Savings & Trust Co., Cincinnati, as receiver on account of flood damage in 1913.

CINCINNATI, FINDLAY & FT. WAYNE RY. CO.

*(1) **Receiver Appointed.**—It was announced at Cincinnati, March 12, 1917, that the New York Trust Co., as trustee of mortgage holders, had filed an appli-

cation for a separate receiver for this line and that Judge Hollister, of the United States District Court, had appointed J. B. Carothers to the position. Mr. Carothers is Asst. Gen. Mgr. of the Cincinnati, Hamilton & Dayton Ry. Co. The order directed Receivers Judson Harmon and Rufus B. Smith to turn the Cincinnati, Findlay & Ft. Wayne property over to Mr. Carothers at midnight March 15, 1917. The latter's bond was fixed at \$15,000.

This road had been operated by the Cincinnati, Hamilton and Dayton receivers since foreclosure proceedings were instituted against the Cincinnati, Hamilton & Dayton and subsidiary lines in July, 1914. For several months bondholders of the Findlay branch had been organizing and preparing to take over the operation of this line.

According to reports made to court by Receivers Harmon and Smith, the Findlay line had been operated by them, and they said also it had not been a paying part of the Cincinnati, Hamilton and Dayton system.

CINCINNATI GAS & ELECTRIC CO.

*(1) **Bond Offering.**—It was announced March 10, 1917, that A. B. Leach & Co. are offering \$4,500,000 of this company's first and refunding mortgage 5% 40-year bonds, maturing in 1956, at 99½, to yield over 5%. This company serves Cincinnati, O., and 15 adjacent communities.

*(2) **Bond Issue Authorized.**—Announcement was made March 16, 1917, that the Ohio Public Utilities Commission had authorized this company, which is operated by Union Gas & Electric Co., a subsidiary of Columbia Gas & Electric Co., to issue \$1,531,000 5% bonds to retire underlying issues.

*(3) **Sale of Bonds.**—Announced on March 30, 1917, that this company had sold to A. B. Leach & Co. \$1,936,000 of its first and refunding mortgage now first mortgage 5% forty-year sinking fund gold bonds. A. B. Leach & Co. report the re-sale of all bonds. Application has been made to list the new bonds on the New York and Cincinnati Stock Exchanges.

• CINCINNATI, HAMILTON & DAYTON RY.—(Rec.)

*(2) **Separate Receiver.**—See Cincinnati, Findlay & Ft. Wayne Ry. Co.—Item No. 1.

*(3) **Suit Filed.**—It was announced March 23, 1917, that Judson Harmon and Rufus B. Smith, receivers of this company, had filed three suits in United States District Court against as many coal companies, seeking recovery of demurrage charges alleged to have accrued on carloads of coal shipped from coal mines in West Virginia to the Cincinnati, Hamilton & Dayton docks at Toledo for Great Lakes points.

The defendants named are the Cabin Creek Consolidated Coal Co. of West Virginia; the Island Creek Sales Co., Cincinnati, and the Carbon Fuel Co. of West Virginia.

*(4) **Collateral to Be Sold at Auction.**—On March 26, 1917, Receivers Judson Harmon and Rufus B. Smith filed a report in United States District Court in the foreclosure proceedings of the Bankers Trust Co. vs. the Cincinnati, Hamilton & Dayton Ry., setting forth the Central Trust Co. of New York as trustee of \$11,557,000 in purchase money collateral trust 4% gold notes of the Cincinnati, Hamilton & Dayton Ry. had

JANUARY 1 TO APRIL 30, 1917

given notice it would sell at auction, through Adrian H. Muller & Son, New York, auctioneers, \$13,000,000 face amount first and refunding mortgage 4% gold bonds of the C. H. & D., which were given as security for the issue of the purchase money notes.

Court is informed the receivers have no money with which to pay the principal and interest on these purchase money notes and can do nothing toward preventing the sale of the bonds given as security when the same are offered in New York on April 25, 1917.

They say they are informed the bonds given as collateral security are worth much less than the face amount of the purchase money notes, and unless the court sees fit to instruct them otherwise, they will make no effort to prevent the sale or take up the purchase money notes by the payment of principal and interest due on them.

(6) Stock Dividend.—Announced Jan. 17, 1917, that this company had declared the regular monthly dividends of one-half of 1% on the pfd. and common stocks and one-half of 1% in common stock on the common stock, all payable March 1 to stock of record Feb. 15.

(7) Status of New Company.—See Empire Refining Co.—Item No. 2.

(8) Operations in Ohio.—It was stated Jan. 27, 1917, that Ohio natural gas subsidiaries of this company have had plans drawn for two new compressor stations, one to be located near Columbus and the other near Mansfield. A new natural gas line has been laid from the El Dorado, Kan., field to connect with the main pipe line and several large gas wells have recently been drilled in the El Dorado district.

The electric railway properties of Cities Service Co. made good gains in 1916 over 1915, gross having increased \$434,000 and net \$171,000 over the preceding year. The street railways of Toledo made a gain of \$280,000 in gross and of \$126,000 in net, while the electric railways controlled by St. Joseph Railway, Light, Heat & Power Co. increased gross \$41,000 and net \$25,000.

(3) Earnings on Stock.—It was stated Feb. 21, 1917, that this company's 1916 balance of \$8,313,833, after pfd. dividends, is equal to 41.41% earned on the common stock, compared with 16.26% for the 12 months ended Jan. 31, 1916.

(8) Stock Dividend on Common.—It was announced Feb. 21, 1917, that this company had declared the regular monthly cash dividends of 1/2 of 1% on its pfd. and common stock, and a monthly dividend of 1/2 of 1% in common stock on its common stock, all payable April 1 to stock of record March 15.

(4) Comment on January Earnings.—On Feb. 24, 1917, the "Wall Street Journal" said that this company for January broke all its former records for earnings. Gross for the month was \$1,854,449, compared with \$663,543 for January, 1916, while, after providing for taxes, expenses, interest and pfd. dividends, the balance for the common stock was \$1,546,353, compared with \$434,822.

The balance for the common stock for January was \$273,808, larger than for December, 1916, and was at an annual rate of 82% on the outstanding common stock.

Requirements for pfd. dividends were earned 4.29 times, compared with 2.52 times in the preceding year and, after providing for all dividend charges, there was a balance for the 12 months carried to profit and loss of \$7,574,298.

JANUARY 1 TO APRIL 30, 1917

er larger by \$2,866,864 than the gross income of the company in the 12 months ended Jan. 31, 1916.

In other words the balance carried to profit and loss in the 12 months ended Jan. 31, 1917, was over 60% greater than the entire gross income of the company for the preceding 12 months.

(5) To Vote on Stock Increase.—It was announced Feb. 23, 1917, that at the annual meeting of this company April 3 at Dover, Del., stockholders will be asked to approve the recommendations made by the board in the Fall of 1916 safeguarding the pfd. stock, and also to approve an increase in the authorized pfd. stock from \$60,000,000 to \$100,000,000, and in the authorized common stock from \$40,000,000 to \$50,000,000.

None of this new stock is to be issued at present, but as the outstanding pfd. is almost up to the authorized amount the board decided that it would be best to provide for additional authorized capitalization at the annual meeting.

(9) Stock Increase Planned.—It was announced March 23, 1917, that at this company's annual meeting on April 3, 1917, at Dover, Del., stockholders will be asked to approve recommendation made by the board in the Fall of 1916 safeguarding pfd. stock and also approve an increase in authorized pfd.

stock from \$60,000,000 to \$100,000,000, and in authorized common stock from \$40,000,000 to \$50,000,000. None of this new stock is to be issued at present.

—Apr.

(1) Stock Increase Authorized.—It was announced April 3, 1917, that stockholders of this company at a meeting at Dover, Del., had voted to increase the capital stock from \$100,000,000 to \$150,000,000. After the increase the company will have outstanding \$50,000,000 common and \$100,000,000 pfd.

(2) Dividend Policy.—Announcement was made April 3, 1917, that stockholders of this company had agreed that until there had been invested in the property from earnings a sum equal to the entire par value of the pfd. stock then outstanding there should be no dividends paid in cash on the common stock in excess of 6% unless the company should have purchased for a period of six months all pfd. stock that can be bought in the open market at 110 or less.

Until this provision shall have been complied with no surplus created by an increase due to the revaluation of assets already carried on the books will be used as a basis for the distribution of cash dividends on the common stock.

(3) New Directors.—Announced April 3, 1917, that at the annual meeting of this company J. C. McDowell, of Pittsburgh, and M. R. Bump, of New York, were elected new directors to succeed A. Bevin and C. T. Brown.

(4) Capital Increased.—On April 7, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$100,000,000 to \$150,000,000.

(5) Sale.—It was announced April 10, 1917, that this company had sold the Citizen's Gas, Electric Light & Heating Co., of Mt. Vernon, Ill., to the Southern Illinois Light & Power Co. The property was disposed of because of its isolated position from other properties of the organization, being the only one operated by Cities Service Co. in Illinois, while the new owners have several properties in the vicinity of Mt. Vernon. Cities Service took over the Mt. Vernon property in 1913 and since that time had increased its gross earnings 37% and its net earnings 208%.

†Equivalent to 48.37% on the common stock, compared with 18.78% for the 12 months ended March 31, 1916.

(7) Earnings, 1916, 48.37% on Common Stock.—This company's 1916 balance after pfd. dividends of \$10,213,988 is equivalent to 48.37% on the common stock, compared with 18.78% for the 12 months ended March 31, 1916.

(8) Subsidiaries Show Record Earnings in March.—On April 19, 1917, the "Wall Street Journal" said that subsidiaries of this company continued to keep up their record earnings. For March, 1917, income of the holding company from its operated properties and from other sources was \$1,721,481, an increase of \$1,081,701 over March, 1916. After providing for all expenses, taxes, and interest charges the surplus was \$1,689,944 for the month, a gain of \$1,113,950, with a balance applicable to dividends on the common stock of \$1,390,937, an increase of \$983,803, or 241%.

Earnings of the oil-producing and refining properties are now at a record point, and the refining companies are being operated to capacity.

For the three months ended March 31 gross income increased \$3,281,070 over the first three months of 1916, and, after

providing for expenses, taxes, interest and pfd. dividends, there was a balance for the common stock of \$4,298,118, a gain of \$3,011,686, or 234% over the three months ended March 31, 1916.

For the 12 months ended March 31 gross income was \$13,391,411, a gain of \$8,096,318, and the balance for the common stock was \$10,213,988, an increase of \$7,288,765, or 248% over the preceding 12 months, and equivalent to 48.47% on the common stock, compared with 18.78% for the 12 months ended March 31, 1916. Pfd. dividend requirements in the 12 months were earned 4.67 times and the combined surplus and reserves of the company April 1, 1917, were \$14,970,704.

(9) Committee Appointed to Consider Changing Par Value and Listing of Stock.—At a meeting of the directors of this company April 20, 1917, Pres. H. L. Doherty appointed a committee consisting of F. S. Terry, Frank W. Frueauff and Judge W. Foster, to consider the advisability of changing the par value of the company's stock and applying for listing it on the New York Stock Exchange. The committee was requested to report at the June meeting of the directors. No action was taken toward the declaration of an extra stock dividend.

The directors re-elected H. L. Doherty as Pres., with Frank W. Frueauff, E. M. Edgar, E. H. Johnston and Thomas I. Carter, Vice-Presidents; Paul R. Jones, Sec'y, and Louis F. Musil, Treas. An executive committee was elected, consisting of H. L. Doherty, Frank W. Frueauff, Warren W. Foster, Leslie M. Shaw, B. G. Tremaine, H. H. Scott and M. R. Bump.

(10) Rate Fixed by Commission for Subsidiary Ruled as Confiscatory.—See Kansas Natural Gas Co.—Item No. 1.

(11) 38% of Stock Held by Women.—On April 28, 1917, the "Wall Street Journal" stated that the total number of stockholders of this company is 11,183, of which 4,232, or 38%, are women. The women hold 16,122 shares of common stock, or 7% of the total outstanding, and 112,348 shares of pfd. stock, or 19%. The average common holdings are four shares, which indicates thrift, as that issue is now selling in the neighborhood of 288. The savings phase is also indicated by the pfd. holdings, the average being 86 $\frac{1}{2}$ shares per stockholder.

CITIZENS GAS CO., INDIANAPOLIS, IND.

(1) Stock at Auction.—It was announced Jan. 6, 1917, that this company, Indianapolis, Ind., would offer for sale at auction Feb. 5, 1917, 10,000 shares of its capital stock of the par value of \$25, the stock to be offered in lots of from 4 to 400 shares each. The stock sold will bear date of Jan. 1, 1917, and will bear accrued dividends at the rate of 10% a year from that date.

Proceeds of the new stock will be used for extensions and additions to properties.

—Feb.

(1) Report, Year Ended Dec. 31, 1916, shows gross of \$3,327,137, net after taxes of \$636,898, and total income of \$973,614, from which were paid \$375,409 leasehold rental, \$110,582 interest and \$4,366 special amortization, leaving net income of \$483,263.

The latter was equivalent to 88.06% on the stock, and in the year two semi-annual dividends of 5% each were paid and a special dividend of \$125,000, bringing up dividend disbursements on the stock to 10% annually from the organization of the company to Jan. 1, 1910. It is the policy of the company to pay off the accrued dividends since Jan. 1, 1910, to the present time at the earliest date permitted by the cash resources of the corporation.

(2) Balance Sheet, as of Dec. 31, 1916, shows cash of \$122,984, with accounts receivable of \$547,872. The company

JANUARY 1 TO APRIL 30, 1917

had accounts payable of \$251,214, reserves of \$371,818 and surplus of \$235,663.

²(3) Sales, 1916.—It was stated Feb. 1, 1917, that the sales of products of the company have been showing large gains. There was a gain of 9.17% gas sales over 1915 and of 23.94% over 1913. The maximum rate of 55 cents a thousand cubic feet is the lowest in the United States, and is only made possible by the large sales of other products. Of a total gross revenue in 1916 of \$4,250,000 but \$1,282,560 came from gas sales.

Coke sales were 443,916 tons, compared with 350,153 tons in 1915. Ammonia sales were 2,940,000 pounds, compared with 2,602,733 pounds in 1915. Coal tar sales were 4,723,000 gallons, compared with 4,107,000 gallons in 1915. Pintsch gas sales made a net profit of \$10,259, compared with \$9,862 in 1915. Benzol sales made a net profit of \$288,138, compared with \$128,226 in 1915, and in 1916 this was after making special reserve appropriations, which the business seemed to require because of its nature.

It was stated by officers of the company that those in closest touch in industries which use benzol products are now confident that the uses for them, after the present unusual demand created by the war has ceased, will still be great enough to make the business of producing them profitable.

The company has begun the manufacture of sodium ferro cyanide, and three months' operation of the plant showed net of \$26,345. While prices for cyanide will decline after the close of the war, it is believed the manufacture will still remain profitable.

In 1916 \$209,206 capital expenditures were made on the plants directly owned, and \$127,761 on those operated under lease. The capital expenditures for 1917 are expected to approximate those made in 1916. The betterments made in 1916 have so far been financed out of income and working capital, and it is now planned to reimburse the treasury for these expenditures by the issue and sale of \$250,000 additional capital stock.

This stock will be offered for sale, as required by the charter of the company, at public auction, Feb. 5. Any premium received above the par value of the stock will be carried to the reserve accounts of the company.

CITIZENS GAS & ELECTRIC CO., LORAIN, O.

¹(1) Lease.—See Lorain County Electric Co.—Item No. 1.

CITIZENS GAS, ELECTRIC LIGHT & HEATING CO.

⁴(1) Sale.—See Cities Service Co.—Item No. 151.

CITIZENS ICE & COLD STORAGE CO., TOLEDO, O.

¹(1) Capital Increased.—On Jan. 6, 1917, the company filed notice at Columbus, O., of an increase in capital from \$200,000 to \$400,000.

—Feb.

²(1) Capital Increased.—On Feb. 17, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$400,000 to \$500,000.

CITIZENS SAVINGS & TRUST CO., CLEVELAND, O.

¹(1) Merger.—It was stated Jan. 17, 1917, that arrangements had been practically completed in Cleveland for the absorption of the Bank of Commerce, the National Association, by the Citizens Savings and Trust Co. there.

Under the plan the Citizens Bank will increase its capital from \$4,000,000 to \$5,000,000 and take over the Commerce Bank. On the basis of the respective values of the stock of the two institutions, it will give in payment the \$1,000,000 of new Citizens stock, with any balance remaining on the actual value of the purchase to be paid in cash.

The combined resources of the two institutions will be \$100,000,000; combined deposits, \$83,000,000.

—Feb.

²(1) Merger.—See Union National Bank. Item No. 1.

CITRUS BELT GAS CO.

⁴(1) Report, Year Ended Dec. 31, 1916, of this company, operating in San Bernardino, Redlands, Colton and Corona, Cal., shows gross operating revenue of \$119,174, net corporate income of \$4,709 and surplus Dec. 31, 1916, of \$4,555.

CITY CENTRAL REAL ESTATE CO., LTD.

⁴(1) Capital Decreased.—On March 24, 1917, the company filed notice in Canada, of a decrease in capital stock from \$1,000,000 to \$100,000. The decrease consists of 9,000 shares of \$100 each.

CITY LAND & MORTGAGE CO., CLEVELAND, O.

⁴(1) Capital Increased.—On April 18, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$75,000 to \$250,000.

CITY RY. CO., LOS ANGELES, CAL.

²(1) Bonds.—It was announced Feb. 1, 1917, that this company had applied to the California Railroad Commission for authority to issue 303 bonds of a par value of \$303,000, and to deliver them to the Los Angeles Ry. Corp. in payment of moneys advanced and invested in the plant of the City Ry. Co.

The company stated that it had an investment of \$3,893,000 in its system before making the additional investment of \$303,433, and that it wishes to sell these additional bonds, the money for which was obtained from the Los Angeles Ry. Corp.

• CLAFLIN (H. B.) CORP.

¹(1) Balance Sheet, as of Nov. 30, 1916, shows: Assets—Merchandise inventory, \$4,742,428; accounts receivable, less reserve, \$5,077,913; notes receivable, \$71,209; cash, \$703,460; foreign account, \$24,381; Defender Manufacturing Co., \$809,769; real estate and buildings (less \$450,000 mortgage), \$752,377; store fixtures and delivery equipment, \$50,960; total, \$12,032,501.

Liabilities—Notes payable, \$1,800,000; accounts payable, \$1,608,070; reserve for taxes and interest, \$75,434; reserve, \$800,000; capital stock, \$6,000,000; net profit, \$1,948,996; total, \$12,032,501.

CLARK EQUIPMENT CO.

¹(1) New Company.—It was announced Jan. 5, 1917, that the Buchanan Electric Steel Co. and the Celfor Tool Co., both of Buchanan, Mich., had been consolidated.

A new corporation has been formed under the name of the Clark Equipment Co., and has taken over the properties of the other two companies. The new corporation is capitalized at \$2,000,000 pfd. and \$3,000,000 common. It will continue the business of the other two companies practically the same as in the past, but will make both companies much stronger.

—Feb.

²(1) Successor Co.—Announced Feb. 2, 1917, that this company had succeeded the Celfor Tool Co. and the Buchanan Electric Steel Co., of Buchanan, Mich.

CLARKSBURG CRUDE OIL CO.

²(1) Incorporated in February, 1917, in West Virginia, with a capital of \$250,000. Incorporators: E. H. Bell, Fenner Hart, Chester O. Davison and others.

CLAY COUNTY LIVE STOCK & FARM CO.

¹(1) Incorporated in January, 1917, in Florida, with a capital of \$1,500,000. Incorporators: Homer Grat, J. Beckenstern, R. B. Zinn and others, all of Charleston, W. Va.

CLAY COUNTY OIL & GAS CO.

²(1) Incorporated in March, 1917, in Oklahoma, with a capital of \$250,000. Incorporators: John B. Means, N. J. Gubser and Norman J. Curtis.

CLEAR WATER COPPER CO., SEATTLE, WASH.

¹(1) Incorporated on Jan. 2, 1917, in Washington, with a capital of \$1,000,000. Incorporators: John E. and Clark M. Burkheimer.

CLEGHORN BAR MINING CO.

¹(1) Stock Issue.—It was announced Jan. 5, 1917, that this company, San Francisco, had been permitted by the California Commissioner of Corporations to issue 55,000 shares to J. L. Porter, R. J. Pfister, G. C. Richards, P. E. Pfister and E. F. Dreger in exchange for three placer claims located on a bar on the middle fork of the Feather River, in Plumas County, and to sell 45,000 shares at par, \$1 a share, to net the company the full amount of the selling price.

With the proceeds the company proposes to develop the claims by draining the water from the bar by the construction of an eight-foot tunnel for a length of 2,000 feet, and to operate the ground with a steam shovel and dredger.

CLEVELAND-AKRON BAG CO.

²(1) Extra Dividend.—Announced Feb. 16, 1917, that this company had declared the usual quarterly dividend of 1½% and an extra of ¼% of 1%, payable March 31 to stock of record March 24.

CLEVELAND AUTOMATIC MACHINE CO.

²(1) Initial Dividend on Common.—Announced Jan. 25, 1917, that this company, an Ohio corporation, had declared an initial dividend of 1½% on its common stock, payable Feb. 15 to stock of record Feb. 1.

—Mar.

²(1) Order.—See Singer Manufacturing Co.—Item No. 1.

CLEVELAND BRASS & COPPER MILLS, INC.

²(1) Incorporated on March 8, 1917, in New York, with a capital of 10,000 shares \$100 each, 10,000 shares no par value, working capital \$1,050,000, to deal in brass, copper, other metals, their products, mine, explore, quarry, smelt and refine. Incorporators: H. S. Gould, B. F. Brusstar, S. H. Moore and J. H. Foster, Hydraulic Pressed Steel Co., Cleveland, Ohio.

—Apr.

⁴(1) Offering of Preferred Stock.—It was announced on April 7, 1917, that this company was making an offering of an unsold portion of \$1,000,000 of 7% pfd. stock, callable at 110, but with a feature providing an option for conversion into common stock. The latter issue is for 10,000 shares with no par value.

The company has secured a site of nine acres in Euclid village, Ohio, where it proposed to erect a modern brass rolling mill. There is no such industry in Ohio although the Cleveland district provides a market for 70,000,000 pounds of such product annually.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$6,378,039, compared with \$144,506 Dec. 31, 1915.

*(4) Earned \$14.98 a Share on Common in 1916.—This company's 1916 surplus after charges of \$7,552,736 is equivalent to \$14.98 a share earned on 470,533 shares of common stock, after allowing for full dividend requirements of 5% on the pfd. stock, compared with \$6.11 a share earned in 1915.

CLEVELAND CLIFFS IRON CO.

*(1) Stock Dividend.—Announced Jan. 8, 1917, that this company had declared a stock dividend of 35%, calling for the distribution of \$2,580,000 in new shares. A quarterly dividend of 2½% in cash also was declared.

—Feb.

*(1) New Pumping Plant.—It was stated Feb. 23, 1917, that plans had been completed whereby a large pumping plant is to be installed at the Athens Mine, Negaunee, property of this company. The pumping engine will be a motor-driven horizontal lift of 2,400 feet.

CLEVELAND ELECTRIC ILLUMINATING CO.

*(1) Bond Offering.—Announcement was made Feb. 7, 1917, that Spencer Trask & Co. are offering at 103 and interest, yielding about 4.80%, the small unsold balance of \$2,000,000 Cleveland Electric Illuminating Co. first mortgage 5% 30-year bonds.

The company has an authorized capitalization of \$30,000,000 first mortgage 5% bonds, \$1,000,000 6% cumulative pfd. and \$14,000,000 common stock, of which there are outstanding \$10,500,000 bonds, including the present issue of \$2,000,000, \$800,000 pfd., and \$9,763,500 common stock.

Common stock has received continuous dividends since 1902 and at rate of 8% yearly since 1904.

For the year to Nov. 30, 1916, interest on \$10,500,000 bonds was earned more than four times over.

CLEVELAND IRON CO.

*(1) New Vice-President.—It was announced Feb. 9, 1917, that Murray M. Duncan, Ishpeming, Mich., Gen. Mgr. of this company, had been appointed Vice-Pres.

CLEVELAND & MAHONING VALLEY R. R.

*(1) Sale Recommended.—See Erie R. R. Co.—Item No. 2.

—Apr.

*(1) Capital Increased.—On April 16, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$3,259,200 to \$6,111,000.

CLEVELAND, PAINESVILLE & ASHTABULA R. R. CO.

*(1) Bondholders' Protective Committee.—It was announced Jan. 12, 1916, that the Cleveland Trust Co., trustee of the first mortgage 5% bonds of this company, had notified holders of the bonds that no funds were deposited to pay the coupons maturing Jan. 1. A protective committee for the holders of the \$1,000,000 of these bonds is being formed in Cleveland.

Control of the company, which operates 27 miles of electric line between Painesville and Ashtabula, was acquired in June, 1906, by the Cleveland, Painesville & Eastern Railway Co.

In 1915 the company lacked \$25,295 of earning its interest charges, and for 1916 it is understood that only a small gain was made in revenues.

CLEVELAND RY. CO.

*(1) Citizens to Vote on Acquisition.—A Cleveland, O., dispatch Jan. 31, 1917, stated that Mayor Davis had announced he would recommend the calling of a special election to submit to voters a proposition to issue \$35,000,000 in bonds to take over the property of this company, which operates all city car lines, following the declaration by the company that service cannot be bettered if fare is to remain at three cents.

CLEVELAND REALTY MORTGAGE CO., CLEVELAND, O.

*(1) Capital Increased.—It was announced March 3, 1917, that this company had increased its capital stock from \$300,000 to \$500,000.

CLEVELAND SILVER BLACK FOX CO.

*(1) Capital Increase.—On Jan. 17, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$240,000 to \$350,000.

CLEVELAND, SOUTHWESTERN & COLUMBUS RY.

*(1) Report, Year Ended Dec. 31, 1916, showed gross of \$1,385,839, a gain of \$95,007 over 1915, while surplus after charges was \$137,543, an increase of \$90,850.

During the year the company earned 5.5% on its \$2,412,000 6% pfd. stock.

—Mar.

*(1) Earnings—		
January gross ..	\$113,030	\$103,305
Sur. aft. chgs.	11,134	12,689

*(2) Bonds Authorized.—On March 23, 1917, the Ohio Utilities Commission authorized this company to issue its first consolidated mortgage 20-year 5% bonds to the amount of \$201,836. The proceeds from this issue are to be used to reimburse the treasury for moneys not secured by the issue of stock, bonds or notes, and other evidence of indebtedness for the period Jan. 1, 1915, to Aug. 31, 1916.

CLEVELAND WIRE SPRING CO., CLEVELAND, O.

*(1) Capital Increased.—On April 2, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$200,000 to \$500,000.

CLEVELAND WORSTED MILLS CO.

*(1) Earnings, Year Ended Dec. 31, 1916, were reported as \$843,434, which is equivalent to 15% on the \$5,707,700 stock outstanding.

—Mar.

*(1) Comment on Annual Report.—On Feb. 27, 1917, the "Boston News Bureau" said: "Annual report of Cleveland Worsted Mills Co. shows a gross business for the last year of approximately \$7,700,000, and net profit of \$843,424. This is almost \$1,000,000 increase over the business done the previous record year, which was 1914. Dividends paid on the capital stock now outstanding, \$5,710,300, amounted to \$433,000. The net profits indicated that the 8% dividend was earned about twice over. High costs of materials and labor are responsible for a smaller net profit than would have been made under ordinary conditions."

CLINCHFIELD COAL CORP.

*(1) Extra Dividend.—Announced Jan. 24, 1917, that this company had declared the regular quarterly pfd. dividend of 1½%, and an extra dividend of 7% on account of accumulated dividends, payable Feb. 1 to stock of record Jan. 26.

CLINTON STREET RY., CLINTON, IOWA.

*(1) Bond Offering.—It was announced March 17, 1917, that Coffin & Burr, Boston, are offering at 98½ and interest, \$350,000, part of \$400,000 of first mortgage 5% gold bonds of this company. The bonds are dated 1906 and are due March 31, 1926, but are callable at 105. Interest is payable at the office of the Illinois Trust & Savings Bank, Chicago.

CLINTON WOOLEN MANUFACTURING CO.

*(1) Capital Increase.—Announced Feb. 24, 1917, that this company, Clinton, Mich., had increased its capital from \$100,000 to \$300,000.

CLIO VINDICATOR MINES, INC.

*(1) Incorporated on March 15, 1917, in Delaware, with a capital of \$1,000,000, to engage in a general mining business.

This information, while not guaranteed, is believed to be correct.

STANDARD CORPORATION SERVICE

JANUARY 1 TO APRIL 30, 1917

Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Horty, Wilmington, Del.

CLIPPER BELT LACER CO., GRAND RAPIDS, MICH.

¹(1) Capital Increased.—On Jan. 8, 1917, the company filed notice at Lansing, Mich., of an increase in capital stock from \$200,000 to \$500,000.

CLIPPS ELECTRICAL DISTRIBUTING CO.

¹(1) Proposed Acquisition.—Stock Increase.—On March 24, 1917, this company of Niagara Falls, N. Y., has applied to the New York Public Service Commission for the Second District for authority to issue \$13,200,000 common stock to be used to acquire all the common stock of the Hydraulic Power Co. of Niagara Falls and consent of the commission to merge the latter company with the new corporation.

• CLUETT, PEABODY & CO., INC.

¹(1) Increased Dividend on Common.—Announced Jan. 3, 1917, that this company had declared a dividend of \$1.50 on the common stock, payable Feb. 1 to stock of record Jan. 20. For the preceding year quarterly dividends of \$1.25 had been paid.

¹(2) Comment on Increased Dividend.—In commenting on the increased dividend declared by this company, the "Wall Street Journal" Jan. 6, 1917, said that the company's earnings have shown practically uninterrupted improvement since the incorporation four years previously. In 1913 they were equivalent to \$8.57 a share on the junior issue; in 1914, a period of severe business depression, \$5.17 a share, and in 1915, \$8.67. In the first six months of this year they were equivalent to \$6.48 a share, or at the annual rate of \$12.96.

Sales have shown a steady gain over those of the previous year, the turnover for the 11 months to Nov. 30 having been \$2,834,913, or 33 1/4% greater than in the corresponding period of the previous year. On the basis of these increased sales it may be expected that earnings for the second half of 1916 will be larger than those of the previous six months.

The net for the common stock for the year may be estimated at not less than \$2,400,000, or \$13.33 on the \$18,000,000 stock.

Cluett-Peabody may be regarded as a "peace stock," as its earnings are affected in no material way by the international situation.

¹(3) Income Account, Year Ended Dec. 31, 1916, compares, as follows:

	1916	1915
Net income.....	\$2,811,824	\$2,073,557
Surp. aft. divs....	1,421,824	821,224

¹(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$4,117,250, compared with \$2,695,458 Dec. 31, 1915.

¹(5) Earnings on Stock.—It was stated Jan. 19, 1917, that net of this company for common stock, after deducting \$490,000 for pfd., is equivalent to \$12.90 a share on the \$18,000,000 common stock.

¹(6) Statement by Chairman.—In connection with the annual report of this company, Pres. F. F. Peabody, it was stated Jan. 19, 1917, called the attention of stockholders to the generally good business conditions which were reflected in the company's sales, to which more than \$3,000,000 were added during the year. He added:

"The increased cost of all materials, coupled with the 10% increase in the earnings of our piece workers, necessitated an advance of 10 cents per dozen in the price of Arrow collars to the trade July 1, 1916. These conditions, together with the large increase in sales, requiring more stock to be carried, and the large stock of materials and supplies on hand purchased at considerably below to-day's market prices, are responsible for the increase in our bills payable. The amount owing is small for the volume of sales and the quick assets of the company."

"The bookings of collars, shirts and handkerchiefs for next spring's delivery show a substantial increase."

"The Canadian plant has fulfilled our expectations of better results and the outlook for 1917 is promising."

—Feb.

²(1) Comment on Annual Report.—On Feb. 10, 1917, the "Wall Street Journal" said: "Report of Cluett, Peabody & Co., Inc., for 1916 was in line with estimates of around \$13 a share on the junior stock, the balance reported on that issue being \$12.90 per share."

"Besides establishing a new high record for earnings, the company showed the largest proportionate net to gross in its history. On a total turnover of \$16,518,717 its net profits were \$2,811,824, or 17%, against a ratio of 15.7% in 1915, 11.4% in 1914, and 14.5% in 1913."

"The balance sheet shows a marked increase in current liabilities, which were \$2,008,258 on Dec. 31 last, against only \$64,455 a year previous. This is about offset, however, by an increase in current assets from \$6,651,185 to \$9,480,334."

"The increases in these items were undoubtedly due to the greater volume of business."

²(2) Profit-Sharing Plan.—It was stated Feb. 15, 1917, that this company is preparing a profit-sharing plan, details of which will be published April 10. This plan will affect employees, whether in the manufacturing or sales departments, and will date from Jan. 1, 1917.

CLYDE MOTOR TRUCK CO.

¹(1) Change in Name.—It was stated Jan. 12, 1917, that the name of this company, Farmingdale, L. I., had been changed to the Fulton Motor Truck Co. This change revealed the reason why the Champion Motors Co., of Fulton, Illinois and Cleveland, is known as such to-day, as this company had originally selected the name of its home city, but relinquished it before any announcement was made.

²(1) Readjustment.—On Feb. 2, 1917, announcement was made by Sec. C. M. Hendley, of this company, of the separation of large properties in West Virginia owned by this company and the Davis Colliery Co. The Roaring Creek & Belington R. R., formerly owned by the Davis Co. and leased to the Coal & Coke Ry., has been acquired by the latter, of which Charles D. Norton, of New York, is Pres. Other officers are retained.

The West Virginia Coal & Coke Co., Elkins, W. Va., a new corporation, of which John L. Kemmerer, of New York, is Pres., was formed to take over the coal lands and collieries of the Davis Co. and of the Coal & Coke Ry. The readjustment was effected mainly through the estates of Henry Gassaway Davis, deceased; Richard C. Kerens and Stephen B. Elkins.

COAL & IRON NATIONAL BANK, NEW YORK.

¹(1) New Directors.—Announced Jan. 9, 1917, that at the annual meeting of this bank the retiring directors were re-elected and John F. Birmingham, Pres. of the Delaware, Lackawanna & Western Coal Co.; William M. Hager, assistant to the Pres. and director of the American Car & Foundry Co., and Stanley P. Jadin, of O. H. Jadin & Sons, were added to the board.

COAL PRODUCTS CORP. OF AMERICA.

¹(1) Incorporated on Jan. 19, 1917, in Delaware, with a capital of \$5,000,000, to mine and sell coal and other minerals. Incorporators: Arthur W. Britton, Samuel B. Board and Louis H. Gunther, all of New York.

COAST COPPER CO.

²(1) Operations.—On Feb. 15, 1917, this company, organized to acquire and operate a group of mineral claims situated in Quatsino mining division, Vancouver Island, was reported from Trail, where the company has its head office, to be employing about 40 men in connection with the development of its copper property, which includes the Merry Widow and Old Sport groups, already partly developed by men connected with the Stewart Mining Co., of the Coeur d'Alene district of Idaho.

COAST COPPER HOLDING & MINING CO., LTD., SPOKANE, WASH.

¹(1) Incorporated on Jan. 19, 1917, in Washington, with a capital of \$1,500,000. Incorporators: W. E. Cullen and Walker B. Carroll.

COAST COUNTIES GAS & ELECTRIC CO.

²(1) Report, Year Ended Dec. 31, 1916, shows that the company earned 8.47% on its 2d pfd. stock after providing for payment of dividends on the 1st pfd. Gross for 1916 was \$364,408, compared with \$338,210 for 1915, while the surplus after operating expenses, taxes, bond and other interest, was \$83,385, compared with \$79,201 in the preceding year.

—Mar.

²(1) Directors and Officers Re-elected.—Announced March 21, 1917, that at the annual meeting of this company all retiring directors were re-elected and that the board reorganized with the former officers.

²(2) Report, Year Ended Dec. 31, 1916, shows gross was \$363,980, net \$167,740, and the surplus, after charges and depreciation, \$67,519, which, after providing for the dividend on the 1st pfd. stock, was equivalent to 6% on the original pfd. stock.

The balance sheet of Dec. 31, 1916, showed cash of \$11,336, and notes and accounts receivable of \$66,466; while notes and accounts payable were \$80,268, and other current liabilities \$31,042.

—Apr.

⁴(1) Income Account, Year Ended Dec. 31, 1916.—This company reported for the year, 1916, gross of \$363,665, with net of \$151,788, and a surplus for the year after deductions totaling \$34,269, of \$67,519. The company paid \$64,333 in dividends and the surplus January 1, 1917, after all miscellaneous additions and deductions, was \$28,645, compared with \$28,708 January 1, 1916.

COAST SHIPBUILDING CO., PORTLAND, ORE.

²(1) Incorporated in March, 1917, in Oregon, with a capital of \$400,000, to manufacture wooden ships. Incorporators: A. M. Sherwood, D. W. Green, C. E. McCulloch, J. B. Kerr and A. L. Mills.

COBB SHOCKLESS CROSSING CORP.

¹(1) Incorporated on Jan. 17, 1917, in New York, with a capital of \$1,250,000, to deal in merchandise, property, patents and inventions. Incorporators: R. Dugan, J. Ewen and C. A. Frank, 45 Broadway, New York.

This information, while not guaranteed, is believed to be correct.

COCH SAVINGS & LOAN ASSOCIATION, CLEVELAND, O.

* (1) Capital Increased.—On Jan. 12, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$500,000 to \$1,000,000.

COEBURN LIGHT & POWER CO.

* (1) Merger Planned.—See Old Dominion Power Co.—Item No. 2.

COEY MOTOR CAR CORP.

* (1) Incorporated on March 30, 1917, in Delaware, with a capital of \$1,000,000 to manufacture automobiles and all parts for same. Incorporators: C. J. Corroch, E. G. Deane and F. O. Scheeder all of Chicago.

COHN (MARTIN L.) CO., MANHATTAN, N. Y.

* (1) Capital Increased.—On Jan. 27, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$400,000 to \$500,000.

COHN-HALL-MARK CO., NEW YORK.

* (1) Capital Increased.—On Jan. 27, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$1,000,000.

COHOES ENVELOPE CO., INC., COHOES, N. Y.

* (1) Incorporated on April 23, 1917, in New York, with a capital of \$450,000, to manufacture envelopes, paper and stationery. Incorporators: S. L. Ames, C. V. Miller and R. M. Lackey, 150 Nassau St., New York.

COLE MOTOR CAR CO.

* (1) Increase in Production.—On Feb. 23, 1917, Gen. Mgr. A. F. Knobloch, of this company, was quoted as stating that the production would be increased from a basis of 5,000 per annum to 10,000 cars for 1917.

COLLIER OIL CO., LTD.

* (1) Incorporated on March 21, 1917, in Canada, with a capital of \$2,000,000 divided into 400,000 shares of \$5 each, to search for, prospect, examine and explore lands and places which may seem to the company capable of affording a supply of petroleum or natural gas, etc. Incorporators: Henry O. Savary, Lloyd H. Fenerty, Henry A. Chadwick, Francis O. McKenna and Wm. Needham Ream. Chief place of business, Toronto, Ont.

COLOMBIA OIL CO.

* (1) Incorporated on Jan. 10, 1917, in Delaware, with a capital of \$1,000,000, to carry on business of producing,

burning and selling crude oil, petroleum, etc. Incorporators: Wm. F. O'Keefe, Geo. F. Steigler and E. E. Wright, Wilmington, Del.

COLOMBIA PETROLEUM SYNDICATE, LTD.

* (1) Incorporated on Jan. 9, 1917, in Delaware, with a capital of \$5,000,000, to drill and bore for oil, gas, petroleum, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

COLONIAL SALT CO., CLEVELAND, O.

* (1) Capital Increased.—It was announced April 7, 1917, that this company had increased its capital stock from \$500,000 to \$650,000.

COLORADO FUEL & IRON CO.

* (1) Earnings, Quarter Ended Dec. 31, 1916, correspond with the corresponding quarter in 1915 as follows:

	1916	1915
Gross	\$9,157,817	\$5,800,093
Net	1,886,359	898,351
Surp. after chgs.	1,313,652	322,711

*** (2) Comment on Quarterly Earnings.**

—On Feb. 10, 1917, the "Boston News Bureau" said, in part: "Colorado Fuel & Iron stockholders, for the first time in 15 years, may now experience the ecstatic thrills which go with dividend expectations. The company in the quarter ended Dec. 31 last earned at the annual rate of \$15 a share on the common stock after pfd. dividends. As all of the accrued pfd. dividends have been cleaned up, and as the company had working capital on June 30 last of \$25,400,000, or just about equal to the gross earnings for that fiscal period, common dividends would ordinarily be expected to follow as a matter of course.

"Colorado Fuel, however, has a large bonded debt considering the amount of business transacted. There are \$45,000,000 of bonds, whereas up to the present year the gross turnover ranged from \$20,000,000 to \$25,000,000. Bonds and stock together exceed \$81,000,000.

"The fourth quarter's gross earnings were at the rate of nearly \$37,000,000 annually, and compared with the corresponding quarter of 1915, net profits showed a higher percentage. The surplus for three months figures down to 3.7% for the common and for the six months about 6.3%. The entire steel industry being sold so well forward, it would seem to be a reasonable expectation that the company can keep up at least this rate of earnings for the second half year, insuring common share earnings of 12.6% for the current fiscal year.

"This would compare with about \$6 last year and commodious deficits in the preceding two years."

* (3) Coke By-product Contracts.—It was announced Feb. 15, 1917, that the coke by-product of this company would be taken over and marketed by the Barrett Co. The contract is for a period of several years.

The Colorado Fuel & Iron Co. has also closed a contract with De Koppers Co. for the construction of a benzol plant to use in connection with its coke ovens.

Reports from Pueblo that the Barrett Co. plans to build a \$3,000,000 chemical plant to convert the by-products of the Colorado Fuel & Iron Co. into various chemicals were declared to be premature. The Colorado's ovens are not completed and will not be for several months, and the Barrett Co. has not made plans regarding construction.

—Apr.

* (1) Wage Increase.—On April 9, 1917, the company announced a 10% wage increase effective May 1 to 6,000 employees. Announcement follows that of 22 coal mines granting a 10% increase to 12,000 miners in Colorado.

* (2) Wage Increase.—A Denver dispatch April 11, 1917, stated that 6,000 employees of this company had been granted an increase of 10% in wages, effective May 1.

—Feb.

* (1) To Be Sold.—It was announced Feb. 7, 1917, that the Federal District Court, Denver, Colo., acting on a petition of the Central Trust Co. of New York, would enter a decree of foreclosure against this company for non-payment of principal and interest of \$10,000,000 bonds, due July, 1912. The road has been in the hands of a receiver since Dec. 13, 1912.

* (2) Foreclosure Decree Entered.—It was announced at Denver, Col., Feb. 12, 1917, that a decree of foreclosure had been entered against this company by Federal Judge R. E. Lewis, in favor of the Central Trust Co. of New York, trustee for the bondholders. If the railroad cannot make a payment on the principal or interest of a \$10,000,000 bond issue at a time to be set by Judge Lewis, sale of the road is to be made.

† Deficit.		

* (2) Sale April 21.—It was announced at Colorado City, Colo., March 10, 1917, that this company's property would be sold at foreclosure on April 21 by Special Master W. L. Dayton under the first mortgage of 1897, securing \$9,532,000 outstanding bonds. The upset price is \$500,000.

* (3) Deposit of Securities Urged.—It was stated March 17, 1917, that the reorganization committee of this company, headed by James N. Wallace, had completed a reorganization plan, and security holders are urged to deposit their holdings with the Central Trust Co. or the Swiss Bankverein in London before April 18. The sale of the property under foreclosure proceedings was scheduled for April 21.

2 mos. gross	218,633	225,478
Net after taxes	127,316	15,942
† Deficit.		

* (2) Abandonment of Reorganization Plan Probable.—The reorganization committee of this company announced April 18, 1917, that the plan would be abandoned by it unless it was advised that the court had agreed to postpone the sale set for April 21.

This plan provides that the owner of each \$1,000 bond may pay \$200 for improvements and developments when the road is reorganized by the new purchasers. In exchange, provided the bondholder shall have agreed to accept the committee plan, he will be given \$200 in 6% cumulative pfd. stock in the new company, together with \$900 in common stock.

Bondholders who do not ratify the committee's plan will be given \$100 in common stock in the new company and their \$1,000 bonds will be cancelled.

Bonds outstanding to date amount to \$9,532,000, of which the reorganization committee holds 55%. The plan was approved by the receiver.

* (3) Reorganization Plan Dropped by Committee.—On April 19, 1917, "Financial America" said: "The committee

JANUARY 1 TO APRIL 30, 1917

representing the 4% bonds of the Colorado Midland Ry., of which James N. Wallace is chairman, has definitely determined to abandon the plan of reorganization because the court has refused to postpone the foreclosure sale of the property scheduled for April 21. The court in which the transaction is now pending is in Colorado and the judge is Robert E. Lewis."

"(4) Sold at Auction for \$1,425,000.—This company's railroad, with all its appurtenances, was bought by A. E. Carlton, Spencer Penrose, C. M. MacNeill, E. P. Shove and associates, of Colorado Springs, at auction sale held at Colorado City April 21, 1917, by W. L. Dayton, Master in Chancery. The price paid was \$1,425,000.

"(1) Suit Filed.—It was announced at New York Feb. 20, 1917, that this company had filed in the Supreme Court a suit to restrain the reorganization committee of the Chicago, Rock Island & Pacific Ry. Co. from carrying its new plan into effect until it had made provision for the payment of a claim for \$5,980,485 alleged to be due in connection with the construction of the Brazos line in Texas, in which the two railroads were partners.

An application for a temporary injunction in the case would follow, it was stated.

"(2) Three Suits.—It was stated March 5, 1917, that in the three suits commenced by this company against Chicago, Rock Island & Pacific Ry. Co. to restrain reorganization committee of the latter from carrying its new plan into effect until it has made provision for payment of claims aggregating \$5,980,484, defendants differ in each of the actions.

In action No. 1, for recovery of half of the cost of construction of Brazos Line, which up to Nov. 1, 1914, amounted to \$11,034,602, and interest in default since May 1, 1915, defendants named are Chicago, Rock Island & Pacific Ry. Co.,

St. Louis, San Francisco & Rock Island Co. In action No. 2 defendants' names are Chicago, Rock Island & Pacific Ry. Co., Galveston Terminal Ry. and Trinity & Brazos Ry.

This suit is for recovery of defaulted interest on first mortgage gold bonds issued under deed of trust to Bankers' Trust Co. of New York, as trustee, amounting to \$1,106,000. In this action plaintiff demands judgment against defendants in sum of \$50,454 as defaulted interest, with interest on \$16,818 from Sept. 1, 1915, at 6%, and on \$16,818 from March 1, 1916, and on \$16,818 from Sept. 1, 1916.

Action No. 3 relates to Trinity & Brazos and is against that company and Chicago, Rock Island & Pacific Ry. Co. as defendants. This suit is for recovery of \$40,312, with interest, said to be due under an equipment lease agreement.

"(8) Dividend Resumed on 2d Pfd.—Announced March 14, 1917, that in addition to the dividend on the 1st pfd. stock, this company had declared a dividend of 2% on the 2d pfd., payable April 2 to stock of record March 20. The last previous dividend on the 2d pfd. stock was 2%, paid Oct. 1, 1913.

• COLTS PATENT FIRE ARMS MFG. CO., HARTFORD, CONN.

"(1) Capital Increase.—It was stated Jan. 22, 1917, that this company, Hartford, Conn., had a bill introduced in the State Senate authorizing the company to increase its capital stock from \$2,500,000 to \$10,000,000.

—Mar.

"(1) Extra Dividend.—Announced March 15, 1917, that this company had declared an extra dividend of 20% and the regular quarterly dividend of 4%, both payable March 31 to stock of record March 19.

"(2) Bill Authorizing Stock Increase.—On March 28, 1917, a bill authorizing this company to increase its capital stock to any amount not exceeding \$10,000,000 was approved by the Connecticut Senate and House of Representatives. This act will take effect when it is approved by a majority vote of stockholders at the coming annual meeting on April 2.

—Apr.

	1916	1915
Gross.....	\$6,847,670	\$2,827,323
Net.....	6,345,731	2,470,944
Surp. after divs.	4,770,731	1,897,027

"(2) Earnings on Stock.—It was stated April 2, 1917, that this company's 1916 net income of \$6,345,731 is equal to 253.82% on \$2,500,000 capital stock outstanding, compared with 98.83% earned on the same stock in 1915.

"(3) Stock Dividend.—It was announced April 2, 1917, that stockholders of this

company had voted to increase the capital from \$2,500,000 to \$5,000,000 and to give the new stock as a 100% stock dividend to shareholders. It was also decided to reduce the par value of the stock from \$100 to \$25, thus giving each stockholder eight shares of stock for each share held.

"(4) Comment on 1916 Report.—On April 5, 1917, the "Boston News Bureau" said: "To the group of successful munition producers must be added the name of the Colts Patent Fire Arms Co. In the fiscal session to Dec. 31 last, this company produced net profits of \$6,847,670, an increase of \$4,020,342, or 142% over the previous year. The actual balance for dividends of \$6,345,731 was equivalent to \$253 per share on the \$2,500,000 stock, against \$98 per share the previous year.

"Considering the fact that in two years this company has earned over \$350 per share for its stock, it is small wonder that directors have decided upon a 100% stock dividend, increasing the stock from \$2,500,000 to \$5,000,000.

"Colts Patent Fire Arms Co. has had immense machine gun orders like Marlin Arms. It has not made quite the spectacular success with quantity production of machine guns that Marlin achieved. But it is the holder of the patents and every gun Marlin makes is produced under direct license from the Hartford corporation.

"Colts Arms is understood to have had unfilled orders on hand at the end of December of about \$30,000,000. Even today these orders total about \$25,000,000. They will be increased by \$10,000,000 if machine gun contracts on which the company is now negotiating are closed.

"Colts Arms machine guns have been of splendid quality and have stood the severest tests on European battlefields. If this Government goes in for machine guns, Colt and Marlin are the two chief producers upon whom it must rely."

"(5) Expansion Planned.—It was stated April 5, 1917, that the vote to reduce the par value of this company's stock from \$100 to \$25 was carried by a majority of 17,355 votes to 85, and the stock dividend proposition of eight shares for one by an equally large ratio.

The report showed \$1,750,000 expended for new equipment during 1916 and \$530,000 for two new buildings. Average number of employees for 1916 was 2,411 and at end of the year payroll numbered 3,874.

An expansion of plants is under consideration. In addition to contracts for Colt's revolvers and automatic pistols for many European governments and for army and navy of the United States, the company is producing Colt machine gun of the Browning type, and is manufacturing Vickers-Maxim machine gun on a contract awarded by the United States Government for upwards of \$6,000,000. Duplication of this order is looked for.

"(6) New Building for Government Work.—On April 20, 1917, a Hartford, Conn., dispatch to the "Boston Evening Transcript" stated that this company, which recently occupied a new armory 500 feet long, was again forced to enlarge. Work has been started before plans have been drawn for another building which will run parallel with the south armory and will be 500 feet long by 171 feet wide. The building, which can be completed in a few months, will be devoted entirely to United States Government work.

COLUMBIA AXLE CO., CLEVELAND, O.

"(1) Capital Increased.—On March 12, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$35,000 to \$1,000,000.

COLUMBIA ENGINEERING WORKS, PORTLAND, ORE.

"(1) New Contracts.—Announced Dec. 28, 1916, that this company had secured contracts for nine wooden auxiliary vessels. Two new shipways have been constructed. The contracts total \$1,000,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

COLUMBIA GAS & ELECTRIC CO.

(1) Application to List Bonds.—Announced Jan. 17, 1917, that the New York Stock Exchange had received application to list \$13,488,500 of this company's first mortgage 5% coupon bonds.

(2) Earnings.—

	1916	1915
December gross	\$1,011,077	\$861,182
Net after taxes	403,126	422,284
Surp. aft. chgs.	388,767	135,836

12 mos. gross— 9,056,762 8,044,532
Net after taxes— 4,432,688 3,901,468
Surp. aft. chgs. 1,157,017 380,640

(3) Earnings on Stock.—It was stated Jan. 19, 1917, that this company's surplus after charges of \$1,157,017 for the 12 months ended Dec. 31, 1916, was equivalent to 2.3% on the outstanding capital stock.

(4) Comment on Earnings.—On Jan. 20, 1917, the "Wall Street Journal" said December earnings give a good idea as to future earnings, as in that month the company's production of gasoline from natural gas was over 800,000 gallons. December's surplus of \$388,767 is at an annual rate of \$4,665,084, or a little more than \$9 a share on the \$50,000,000 capital stock.

Production of gasoline at seven stations for the week ended Jan. 12, was 215,000 gallons, compared with 188,000 gallons for the previous week.

The new pipe line supplying natural gas to the Philadelphia company and the Hope Natural Gas Co. in Pittsburgh, has been placed in operation.

(5) Bonds Listed.—It was announced Jan. 24, 1917, that the New York Stock Exchange had listed \$13,488,500 of the first mortgage 5% bonds of this company. There is an authorized issue of \$25,000,000 of these bonds, of which \$20,258,500 have been issued and \$8,770,000 redeemed through the sinking fund, leaving outstanding the amount listed.

Net earnings of company applicable to the \$494,183 interest on these bonds for the 11 months ended Nov. 30, 1916, were \$1,395,686, and the surplus after paying interest on these bonds and other interest was \$660,467.

(6) Admitted to List.—Announced Jan. 26, 1917, that the New York Stock Exchange had listed \$13,488,500 first mortgage 5% bonds of this company.

(7) Gas Rates of Subsidiary Approved.—See Union Gas & Electric Co.—Item No. 1.

—Feb.

(1) Earnings.—

	1917	1916
January gross	\$1,119,796	\$916,874
Net after taxes	630,777	602,331
Surp. aft. chgs.	433,198	203,684

(2) Comment on January Earnings.—On Feb. 20, 1916, the "Wall Street Journal" said that this company opened the new year with a large gain in earnings. For January, gross was \$202,922, or 22% larger than in January, 1916; while total income increased \$237,073, or 44%. There was an increase of 1.1% in rentals and lease charges, and of 7.5% in Columbia Gas & Electric interest charges, leaving the surplus for the month \$433,198, an increase of \$229,514, or 112%, over January, 1916.

With the large gasoline production from the extraction stations of Columbia Gas & Electric and United Fuel Gas, and also the large increase in gas sales by the latter company, due to the contracts with the Philadelphia Co. and Hope Natural Gas Co., the earnings of Columbia Gas & Electric should show progressive gains throughout the current year.

—Mar.

(1) Earnings Statement, 12 Months Ended Jan. 31, 1917, shows:

	1917	1916
Gross	\$9,261,173	\$8,054,290
Net	5,499,150	4,415,903
Surplus	1,386,990	383,126

(2) Production of Subsidiary, February, 1917.—See United Fuel Gas Co.—Item No. 2.

(3) Tenders Asked.—Announced March 12, 1917, that this company, through the Columbia Trust Co., New York, is asking until April 16 for tenders of sufficient of its first mortgage 5% bonds

to exhaust \$127,410 now available for the sinking fund on this issue.

(4) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$9,058,252	\$8,044,532
Net after taxes	4,434,476	3,901,468
Other income	7829,328	514,179
Total income	5,263,803	4,415,648
Surplus	1,157,475	380,639

†Included in "other income" are the dividends received on the 51% stock held of United Fuel Gas Co., for 1916, but Columbia Gas & Electric's proportion of the undistributed surplus earnings of United Fuel Gas for the year of \$485,131 are not so included.

(5) Earnings on Stock.—It was stated March 16, 1917, that this company's 1916 surplus of \$1,157,475 is equal to 2.31% on its capital stock, compared with 0.71% in 1915.

(6) Consolidated Balance Sheet, as of Dec. 31, 1916, of this company and Union Gas & Electric Co. shows a profit and loss surplus of \$1,374,446, compared with \$1,113,773 Dec. 31, 1915.

(7) Bond Issue by Subsidiary Authorized.—See Cincinnati Gas & Electric Co.—Item No. 2.

(8) Operating Results, 1916.—On March 16, 1917, it was stated that this company in 1916 greatly improved its financial and earning position. In the way of improvement in financial affairs it increased its free working cash from \$843,842 to \$1,291,775 and entirely eliminated bills payable of \$1,690,447 in addition to reducing its funded debt by \$510,000. Its accounts payable were also reduced and surplus was increased by \$261,000. Its current assets rose from \$1,937,259 to \$2,701,553 and its current liabilities were reduced from \$3,472,419 to \$1,939,993.

From an earning viewpoint its gross revenues increased 12.6% over 1915, its total income increased 19.2% and the surplus for the stock was 204% larger than in the preceding year. The total income included only the amount actually received in dividends from United Fuel Gas Co. and did not include any of the undistributed surplus of that company for the year. The company had no floating debt at the close of the year and its cash holdings were within \$848,000 of its entire current liabilities. The increase in current and working assets for the year, after deducting current liabilities, was \$2,296,719.

The company issued \$367,500 of its first mortgage bonds and retired \$877,000. In addition \$197,000 of Cincinnati Gas Transportation bonds were redeemed, leaving \$3,608,000 of these bonds outstanding. Gas sales of Columbia Gas & Electric increased 12% in 1916, and 7,913,016,000 cubic feet of the amount distributed were purchased from United Fuel Gas Co.

Columbia Gas & Electric put in operation late in 1916 a station for the extraction of gasoline from natural gas, from which the output was 1,100,583 gallons, with gross sales of \$217,722. The total gas and oil acreage under lease was 269,825 acres with 202 producing gas wells.

(10) Statement About Dividends.—Following a meeting of directors of this company March 19, 1917, it was stated that the following statement was issued: "At the meeting of directors of the Columbia Gas & Electric Co., held Monday, the question of an initial dividend on the capital stock was discussed, and it was decided that the dividend policy of the company would be determined at the next meeting of the board, to be held in April, after the annual meeting of stockholders."

Stockholders' meeting was scheduled for March 31.

—Apr.

(1) Directorate Reduced—New Member. It was announced April 2, 1917, that at the annual meeting of this company the board was reduced from 25 to 15 members. R. G. Albizer, of Charleston, W. Va., was the only new director elected.

(2) New Oil Well for Subsidiary.—It was stated April 4, 1917, that activity in this company's stock was predicated on the bringing in of another good oil well on the Cabin Creek, W. Va., leases of the United Fuel Gas Co., a subsidiary, and also the large gains in earnings being reported by the latter company.

For February gross of United Fuel Gas was \$800,600, a gain of 79% over February, 1916, while the surplus after payment of all charges and interest was \$547,808, a gain of 96%. For the 12 months ended Feb. 28 gross was \$5,554,992, a gain of 71%, and the surplus after expenses, taxes and interest, was \$3,120,507, a gain of 155%.

The stock of the United Fuel Gas, 51%, is owned by Columbia Gas & Electric and 49% by Ohio Fuel Supply.

Directors of Columbia Gas & Electric are expected to meet in New York about the middle of April when it is anticipated that the dividend policy of the company will be announced.

(4) Initial Dividend of 1% Declared.—This company April 19, 1917, declared an initial dividend of 1%, payable May 15 to stock of record April 10.

(5) Stock Dividend Declared by Subsidiary.—See United Fuel Gas Co.—Item No. 2.

COLUMBIA MACHINE WORKS & MALLEABLE IRON CO., BROOKLYN, N. Y.

(1) Capital Increased.—On Feb. 8, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$900,000.

COLUMBIAN MANUFACTURING CO.

(1) Extra Dividend of 10%.—This company April 26, 1917, declared an extra dividend of 10%, in addition to the regular semi-annual dividend of 5%, payable May 1 to stock of record April 25.

COLUMBIA TRANSPORTATION SYSTEM.

(1) Steel Motor Boat Plant Planned.—A Portland, Ore., dispatch April 20, 1917, stated that a new company was being formed to construct a plant on the Columbia River, near there, for the building of all-steel motor boats. The company will be known as the Columbia Transportation System and will be incorporated with \$1,000,000 capital. A production of 300 boats is planned.

COLUMBIA WOOLEN MILL.

(1) Merger.—It was announced at Columbia City, Ind., Jan. 10, 1917, that Chicago capitalists had taken options on the common stock of this company. Their plans are for the formation of a four-mill combination. The other three mills are located at South Bend and Mexico, Ind., and in Michigan. Wm. Bradley Fisher, superintendent of the Columbia City Mills, will be superintendent of the corporation.

COLUMBUS BRICK & TERRA COTTA CO., COLUMBUS, O.

(1) Capital Decreased.—Announced April 7, 1917, that this company had decreased its capital stock from \$300,000 to \$165,000.

COLUMBUS BRONZE CORP.

(1) Incorporated on Dec. 29, 1916, in New York, with a capital of \$450,000, to engage in mining, milling, metals, founders and welders. Incorporators: L. H. H. Rose, H. W. Bennett and J. A. Sutter, East Ocean Parkway, Brooklyn, N. Y.

JANUARY 1 TO APRIL 30, 1917

COLUMBUS CHAIN CO.

¹(1) **Razing Purchased Rolling Mills.**—On April 24, 1917, the "Philadelphia Public Ledger" said that this company, which had purchased the entire plant of the West End Chain Works & Rolling Mills Co., in the western part of Philadelphia had begun razing the rolling mills. The Slatington Iron & Steel Co. has purchased a considerable amount of the machinery, which is being shipped to Slatington, and the remainder will be scrapped. The buildings will be razed, with the exception of one of the largest, which is to be used by the Chain Company in increasing the output of its plant.

COLUMBUS, DELAWARE & MARION CO.

¹(1) **Foreclosure Requested.**—A Columbus, O., dispatch Jan. 12, 1917, stated that the Cleveland Trust Co., as trustee of the first mortgage bonds of this company, had filed an answer and cross petition in the receivership proceedings of that company, asking foreclosure of the first mortgage.

This action indicates that the road will be sold under foreclosure and the receivership, which has lasted for almost eight years, ended. The trustee avers that the company defaulted in payment of interest of \$25,000 on \$1,000,000 first mortgage bonds, due Nov. 1, 1916.

The receiver of the company had paid practically all interest charges up to November, but the demand for improvements in 1916 caused the expenditure of all surplus earnings and no money was available to pay the interest maturing in November.

¹(2) **Bond Interest Ordered Withheld.**—It was stated Jan. 26, 1917, that Receiver West, of this company, had been ordered by the court not to pay interest on the second mortgage bonds due Feb. 1, the total interest being \$23,000. This action was taken in line with a motion by holders of the first mortgage bonds, on which interest was defaulted in November, 1916, that no interest be paid on the second mortgage bonds.

There are \$920,000 of the second mortgage bonds outstanding, and the holders of these are now expected to ask foreclosure and end the receivership, which has been in existence eight years.

—Mar.

¹(1) **Control Negotiations.**—It was announced Feb. 27, 1917, that interests represented by former Senator Joseph B. Foraker, of Cincinnati, are negotiating for the control of this company and its subsidiary properties and for the lifting of the receivership so that Eastern capitalists may effect a reorganization.

Under the new management the road will undergo a number of improvements. Among these will be the erection of a terminal power station.

Eli M. West, of Columbus, O., is the receiver of the John D. Webb properties.

COLUMBUS DRY GOODS CO., COLUMBUS, O.

¹(1) **Capital Reduced.**—On March 8, 1917, the company filed notice at Columbus, O., of a reduction in capital stock from \$250,000 to \$150,000.

¹(2) **New Vice-Pres.—Board Enlarged.**—It was announced Jan. 26, 1917, that at the annual meeting of this company Norman McD. Crawford was elected to the board and the stockholders approved an increase in the membership of the board from 12 to 15, and also in the number of Vice-Pres.

Mr. Crawford was elected a Vice-Pres., and in the absence of Pres. McMeen on a long sick leave will be acting Pres. All retiring directors were re-elected. Three vacancies on the board will be filled later.

¹(3) **Report, Year Ended Dec. 31, 1916.** showed net to have been \$1,432,275, compared with \$1,266,738 in 1915. The balance available for renewals and depreciation for 1916, after all charges and dividends, was \$329,228, compared with \$302,227 in 1915.

The company carried 82,575,057 passengers in 1916, compared with 76,216,526 in 1915.

At the close of 1916 the company had 25,081 consumers of electric light and power, an increase of 3,824 in the year.

At the meeting of stockholders resolutions were adopted in memory of Robert E. Sheldon, who was an officer and director for a number of years.

record of Jan. 10 and payment for the new stock is to be made in four payments of 25% each on Feb. 1, May 1, Aug. 1 and Sept. 1, 1917.

(3) Record Output for 1916, Estimated.—On Jan. 2, 1917, it was stated that this company in 1916 distributed more than 11,000,000 kilowatts of electric energy and for 1916 will far surpass this amount, which was the greatest amount of electric current ever sold by any one company in a year previous to 1916.

In December, 1916, for the first time in its history the company passed the 5,000,000 kilowatt hour mark in daily distribution, having in one day sold 5,176,527 kilowatt hours. The demand peak load for this one day on the stations of the company was 337,900 kilowatts, the highest in its history.

In 1916 the maximum output in any one day was 4,550,137 kilowatt hours. In 1915 the company added 28,863 new consumers to its lines, and it is expected that this record was also broken in 1916.

(3) Electric Power Gain, 1916.—It was stated Jan. 16, 1917, that this company in 1916 made the largest gain in electric power business in its history, new business taken in the year being more than double that in 1915. In 1916 the company made 3,122 power contracts of a total of 52,300 horsepower, and 30 of these contracts displaced large isolated power plants.

The company has been attaching a number of ice plants to its lines. In 1916 over 400,000 tons of ice were produced by plants using electric power.

—Feb.

(1) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Total income.....	\$23,064,765	\$21,000,925
Net after chgs. & taxes	4,399,413	4,629,482
Surp. after divs.	732,301	962,352

(2) Earnings on Stock.—It was stated Feb. 24, 1917, that this company's 1916 net of \$4,399,413 is equal to 9.59% on \$45,838,936 capital stock, compared with 10.1% earned on the same stock in 1915.

—Mar.

(1) Report, Year Ended Dec. 31, 1916, shows surplus, after expenses and charges, amounting to \$4,399,413, a decrease of \$230,049, compared with 1915. This surplus is equal to 9.59% on the \$45,838,936 capital stock, compared with 10.1% earned on same capitalization in 1915.

The report shows an increase of \$1,980,791 in gross revenues over the preceding year. The business of the company made a steady growth, approximately 40,000 customers being added to the lines of the company in 1916. These additional contracts represented a gain of over 90,000 kilowatts in power and lighting load. The maximum demand for any one day in 1916 was on Dec. 19, of 369,740 kilowatts.

Because of this large growth in business, the company has placed orders for 142,500 kilowatts of additional generating equipment, some of the new generating units to be installed in 1917 and the others in 1918, owing to the slowness of deliveries by the manufacturers. In 1916 the company reduced its maximum rate for lighting from 10 cents to 9 cents a kilowatt hour, resulting in a reduction of operating receipts for the last six months of 1916 on the basis of the same output, of approximately \$428,000 from the last six months of 1915, but the large gains in business much more than absorbed this reduction.

In 1916 Commonwealth Edison issued \$2,631,000 of first mortgage 5% bonds, these being the remainder of the \$10,631,000 bonds authorized by the Illinois Commission in 1915. In November the board authorized the issue and sale to stockholders at par of 10% of the issued amount of common stock. The connected business of the company Dec.

31, 1916, exclusive of electric energy supplied to other public service corporations, amounted to the equivalent of 13,845,933 50-watt lamps.

The company had \$2,127,551 cash on hand Dec. 31, 1916, in addition to \$5,998,830 of bills and accounts receivable.

Current liabilities consist of \$45,166 open accounts, \$725,060 accounts payable, \$710,516 accrued bond interest and \$1,167,847 taxes accrued. Dec. 31, 1916, the company had \$10,563,080 amortization and depreciation reserve and \$5,175,265 profit and loss surplus.

(2) Comment on Earnings and Production.—It was reported on March 24, 1917, that net earnings of this company had been slightly affected by the increase in the cost of coal in the previous months. The company consumes about 2,000,000 tons of coal a year, but 50% of this is produced in its own mines. Its own production can be largely increased. This condition of fuel supply places Commonwealth Edison in an independent position and its coal contracts have been made on quite a favorable basis. The company is now paying about 33 1/4% increase for its fuel over the average price paid last year and for 1916 the average increase in the cost of its fuel was between 10% and 15% over 1915. It is not believed that the cost of fuel will go higher than it now is.

COMMONWEALTH HOME BUILDING CO.

(1) Incorporated on Feb. 17, 1917, in Delaware, with a capital of \$500,000, to build houses. Incorporators: Harvey T. Fall, Chicago, Ill.; Harry C. Egan and Hecary M. Bitner, Gary, Ind.

COMMONWEALTH MINING CO.

(1) Development.—It was stated Jan. 3, 1917, that an entirely new body of lead carbonate ore, 10 feet wide, had been recovered from the property of this company. It assays \$30 per ton, it was stated.

—Mar.

(1) Incorporated on March 22, 1917, in Delaware, with a capital of \$500,000, to deal in minerals, ores, etc. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Herty, Wilmington, Del.

COMMONWEALTH MORTGAGE CO.

(1) Initial Dividend.—Announced Jan. 9, 1917, that this company, Minneapolis, had declared an initial regular pfd. dividend of 8%, payable to stockholders of record. The company has been in operation a little less than a year.

COMMONWEALTH OIL & REFINING CO.

(1) Incorporated Dec. 30, 1916, in Delaware, with a capital of \$600,000, to refine, market and distribute oil and its products. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

COMMONWEALTH POWER CO.

(1) Deal Approved.—See Milwaukee Electric Ry. & Light Co.—Item. No. 1.

COMMONWEALTH POWER, RY. & LIGHT CO.

(1) Additions.—It was announced Jan. 25, 1917, that this company, through its subsidiary, the Consumers' Power Co. of Maine, is constructing on the Manistee and Ausable Rivers two new additions to its power system in Michigan. At the Manistee Junction dam 23,000 h. p. will be in operation by December, 1917, and on the Ausable two plants of 12,000 h. p. each will be ready by June, 1918.

The company already has four plants on the river, with a total combined capacity of 60,000 h. p. often built so close together that the spillway from one plant empties into the pond of the dam below. Demand for power in this section increased 35% during 1916.

(3) Earnings on Stock.—It was stated Jan. 26, 1917, that this company's surplus of \$1,632,572, after charges and pfd. dividends, for the year ended Dec. 31, 1916, is equal to 8.8% on the common stock.

—Feb.

(1) Income Account, Subsidiaries, Dec. 31, 1916, shows combined earnings as follows:

	1916	1915
Gross.....	\$16,962,606	\$14,590,124
Net.....	8,587,986	7,624,445
Surp. after chgs. and divs. on subd. pfd. stocks	2,651,742	2,295,587

(2) Income Account, Holding Company, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross.....	\$3,458,729	\$3,081,887
Net after taxes.	2,651,742	2,295,587
Surp. after pfd. divs.....	1,632,572	1,335,587
Equivalent to 8.79% on common stock.		

(3) Earnings on Stock.—It was stated Feb. 1, 1917, that the \$1,632,572 surplus of this company for 1916 is equal to 8.79% on the common stock.

(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,237,188, compared with \$934,584 Dec. 31, 1915.

(5) Report, Year Ended Dec. 31, 1916, showed that of the total receipts of the company and subsidiaries 12.53% came from gas, with an increase of 4.87% in sales over 1915; 4.36% from sales of gas residuals and miscellaneous, with a main of 15.02%; 37.12% from electric light and power, with a gain of 20.10%; 2.74% from heating and water, with a gain of 14.12%; 25.20% from street railways, with a gain of 13.57%; 13.68% from interurban railways, with a gain of 18.08%, and 4.37% from freight, etc., with a gain of 36.96%.

charges, taxes and dividends on underlying pfd. stocks there was an increase of 11.38%, with a gain in net income of 15.61%.

Output of gas increased 11.10% in the year, and the average price per thousand cubic feet decreased 5.61%; output of electric current increased 29.82% and the average price per kilowatt hour, due largely to the great increase in power consumption, decreased 13.13%.

The number of revenue passengers carried on the street railway lines increased 13.60%, and on the interurban railway lines increased 12.60%. At the close of the year there were 86,635 gas meters in use, a gain of 7.62%, and 112,921 electric meters, an increase of 16.16%.

Jan. 1, 1917, the subsidiary companies had 6,227 employees, and \$1,919,000 of the convertible bonds had been converted into stock, thus increasing outstanding pfd. 19,190 shares and outstanding common 5,757 shares. The company has 3,531 pfd. shareholders, of whom 1,760 were women, and 2,639 common shareholders, of whom 1,083 were women.

In 1916 the company and its subsidiaries paid \$901,417 in taxes, an increase of 9.43% over 1915.

In 1916 the fourth hydro-electric development of 6,000 horsepower on the Au Sable River was completed. Approximately 18,000 horsepower was added in the year to the steam generating capacity of the company. As 35,000 horsepower of new business was taken in 1916, further large increases of generating capacity must be made, and

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

work is now under way on a 22,000 horsepower station on the Manistee River and a 12,000 horsepower station on the Au Sable.

In addition, 36,000 horsepower capacity is being added to the steam generating stations. Work will soon be started on a sixth Au Sable development of 11,000 horsepower.

A new transmission line 103 miles long is being built from the Manistee River to Grand Rapids. Four new gas plants are being built, two for water gas and two for coal gas.

†Decrease.
The balance after pfd. dividends for the 12 months was equivalent to 8.656% on the common stock.

The increase in operating costs was largely because of the high cost of coal owing to failure of operated companies to receive deliveries on contracts because of car shortages. Fixed charges of the company include dividends on outstanding pfd. stocks of the subsidiary companies, as well as taxes and interest charges.

The increase of 31.57% in operating expenses in February was due to the fact that in that month over \$100,000 more was paid for coal than in February, 1916, due in large measure to failure to receive deliveries of fuel on contracts.

Practically the same conditions prevailed in March as in the preceding two months of the year and the cost of

fuel, owing to the high price of coal, was in excess of \$90,000 more in March, 1917, than in March, 1916, resulting in the increase of 34% in operating expenses in March and 31% for the three months ended March 31.

COMMONWEALTH TIRE CORP.

¹(1) Incorporated on March 14, 1917, in Delaware, with a capital of \$2,500,000, to manufacture master aluminum tires of all kinds. Incorporators: Martin E. Smith, T. Morley Smith and Artemus Smith, Wilmington, Del.

COMPOUND BELTING CO., NEW YORK.

¹(1) Capital Increased.—On Jan. 10, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$150,000 to \$500,000.

COMPUTING-TABULATING-RECORDING CO.

¹(1) Report Year Ended Dec. 31, 1916, shows net earnings of \$1,206,853, an increase of \$516,159 over 1915. The net earnings are equal to 11.54% on the \$10,457,200 capital stock, compared with 6.64% earned on same capitalization previous year. During the year dividends to the amount of \$418,292 were paid.

¹(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

¹(1) Incorporated on Jan. 8, 1917, in New York, with a capital of \$1,000,000, to manufacture tobacco, match lights, pipes and smokers' articles. Incorporators: I. Radin, B. A. and N. A. Condax, 1,307 New York Avenue, Rosebank, N. Y.

CONEJO PARK MUTUAL WATER CO.

¹(1) Incorporated in February, 1917, in California, with a capital of \$250,000. Directors: R. B. Taylor, A. D. Laughlin, J. C. Dumbreck, Mollie Way and R. Glard.

CONIAGAS MINES, LTD.

¹(1) Report, Year Ended Oct. 31, 1916.—The annual report of this company, as made public Jan. 1, 1917, states that the combined output of the mine and smelter during the year exceeded \$4,500,000. The year's operations were satisfactory owing to the higher price of silver and the market for cobalt metal. The average price received for silver was 63.11 cents, as compared with 49.25 cents and 50.75 cents in the two previous fiscal years.

The silver mined and shipped during the fiscal year amounted to a little over a million and three-quarter ounces, as compared with about two million ounces the previous year.

The superintendent, F. D. Reid, reported a total of about 6,000,000 ounces of ore reserves on Oct. 31, in addition to which there is something under 1,000,000 ounces of silver estimated in the sand and slime tailings stacked up on the

property, which are estimated as of substantial value owing to recent discoveries in extraction by what is known as the oil flotation process.

During the year options on two promising gold prospects in the Porcupine district were taken, but work has not yet been carried sufficiently far to determine whether the directors are warranted in exercising the options on either of these properties. The dividend of \$200,000 declared as payable on Nov. 1, 1916, made a total return to the shareholders since incorporation in November, 1906, of \$8,440,000.

The total shipments of silver from this property aggregate about 24,000,000 ounces.

The company's ore was mined and concentrated during the year at the net cost of 15.24 cents per ounce, as compared with 13.618 cents per ounce for the previous year.

This cost included all overhead expenses, royalties and all other expenses exclusive of shipping, smelting, refining and marketing charges, which amounted to 4.27 cents per ounce of silver, as compared with 3.252 cents for the previous year.

It also included the cost of development of the Aganunco property, amounting to about one cent per ounce, but excluded an undetermined war tax.

CONNEAUT SHOVEL CO., CONNEAUT, O.

¹(1) Capital Increased.—On Feb. 7, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$150,000 to \$300,000.

CONNECTICUT AIRCRAFT CO.

¹(1) Government Order.—See Curtiss Aeroplane & Motor Corp.—Item No. 2.

CONNECTICUT BRASS CORP.

¹(1) Night Shift.—It was stated Jan. 4, 1917, that this company will work a night shift, starting Jan. 15. The heavy increase in domestic business necessitates working the plant to capacity.

¹(2) Brief Filed by Trustees.—It was stated Jan. 9, 1917, that in a brief filed by the trustees of this company with the Connecticut Public Utilities Commission protesting against an effort being made to force the company to extend its electric railway lines and new service, some of the difficulties confronting the corporation were pointed out.

The trustees state that they do not hold office in the same manner as do directors of street railway companies, but were appointed by the Federal Court to handle the affairs of the company until 1918. Under such circumstances the trustees do not feel that they should make arrangements for the permanent financing of the corporation, but have followed a policy of making all extraordinary expenditures out of current income, instead of doing permanent financing for capital account.

This has led the trustees to declare small dividends for two years, paying but 1½% in 1915 and but 1% in 1914. Under these circumstances the trustees do not feel that any extensions should be made, nor can they be made in the present financial condition of the corporation.

Almost \$4,000,000 of large expenditures have been approved or recommended by officials in 1916 and during the last five months of 1916 operating expenses increased 31.58% over the corresponding period of the preceding year, while gross revenues have shown a gain of only 13.74%, resulting in a decrease in net revenues of 14.30%, due entirely to the increase in the cost of labor and maintenance.

CONNECTICUT RIVER R. R.

*(1) Petition to Pay Interest.—It was announced Jan. 26, 1917, that Receiver Hustis, of this company, the stockholders of which are now in the dividend list, although its debt holders are getting no interest, had petitioned the United States District Court at Boston that, "in view of the solvency of that company," he be authorized to pay out to the owners of its bonds and notes the sums received from the Boston & Maine as interest thereon.

Interest had been paid to the Connecticut River road by the Boston & Maine as required by the lease, but as the lessor is in receivership, had not been turned over to its creditors. The

lease would have been broken if the Jan. 1 dividend had not been paid directly to the Connecticut River stockholders.

—Mar.

*(1) Statement About Consolidation Plan.—See Boston & Maine R. R.—Item No. 3.

CONNECTICUT SMELTING & FOUNDRIES CO.

*(1) Plans.—It was announced at Springdale, Conn., Feb. 26, 1917, that this company, organized under Delaware laws with capital of \$500,000, had completed plans for commencing work there upon a new building to stand near the plant of the Stamford Rolling Mills Co., of which the former company is a subsidiary. A brick and steel building to house the smelters and other apparatus is being erected for the smelting company.

The new plant will take care of the wastage of the rolling mills, re-smelting its by-product and taking such other business from plants in that vicinity as may come its way.

CONNECTICUT SMELTING & FOUNDRY CORP.

*(1) Incorporated on Jan. 3, 1917, in Delaware, with a capital of \$500,000, to conduct mills for the treating of metals, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CONNELLVILLE & STATE LINE RY.

*(1) Merger Planned.—See Western Maryland Ry. Co.—Item No. 1.

CONNSVILLE BLOWER CO., CONNSVILLE, IND.

*(1) Capital Increased.—It was announced March 8, 1917, that this company had increased its capital stock from \$400,000 to \$750,000.

CONSOLIDATED ARIZONA SMELTING CO.

*(1) Earnings, Quarter Ended Dec. 31, 1916, it was stated Jan. 25, 1917, amounted to \$292,289. Results by months showed: October, \$59,552; November, \$78,099; December, \$154,638.

—Mar.

*(1) Officer Resigns.—It was announced March 8, 1917, that Victor I. Cumnock, for many years director and Pres. of this company, had resigned on account of ill health.

*(2) Earnings Statement, Year Ended Dec. 31, 1916, shows net operating profits of \$859,015 and balance after bond interest and depreciation, \$613,877.

*(3) Earnings on Stock.—It was stated March 9, 1917, that this company's 1916 balance after fixed charges of \$613,877 is equal to 7.38% on the \$8,315,000 capital stock outstanding.

*(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$306,204, compared with a deficit of \$186,632 Dec. 31, 1915.

*(5) Board Enlarged.—It was announced March 8, 1917, that at the annual meeting of this company the Board of Directors was increased to nine members, and the following were elected: Alfred E. Curtis, Edwin S. Hooley, Frank A. Dillingham, Robert W. Kelley, John H. Flagler, Charles A. Kittle, Charles W. Hill, Edmund Pavenstadt, and Hubert E. Rogers.

*(6) Statement by Vice-President.—Vice-Pres. Charles A. Kittle, of this company, was quoted March 9, 1917, as saying that while the company owed \$290,000 to its directors two years previously, it now has a cash surplus of \$306,204. This improvement in the financial standing of the company, he stated, is all the more marked when it is considered that the policy of the directors in the matter of depreciation, new construction, etc., has been a liberal one, \$500,000 having been allotted to that account during the past two years. The company's working capital during the same time has been increased to \$500,000.

While at the close of 1916 ore reserves were about 150,000 tons, they had mounted to nearly 590,000 tons at the end of 1915. Production is running at the rate of 1,500,000 pounds of copper per month, compared with about 300,000 pounds in the corresponding period of 1915. Average price at which the company sold its copper in 1916 was 28.872 cents a pound. Producing cost was 13.9 cents a pound.

*(7) Production, 1916.—It was announced March 10, 1917, that this company's smelter in 1916 turned out 11,989,139 pounds of copper, 5,972 ounces of gold and 150,012 ounces of silver. This was about double the yield of the previous year. Of copper output 5,829,500 pounds came from the company's own mines, while 6,159,639 pounds constituted custom ores furnished chiefly by United Verde Extension Mining Co. and Swansea mines, as well as from concentrates bought from Stoddard Milling Co. and Randolph & Gemmill Development Co.

The company sold its copper at an average of 28.872 cents a pound and silver at 68½ cents an ounce. The cost of producing copper from its own domestic ores was 13.9 cents a pound, against 13.327 cents in 1915, and 13.927 cents in 1914. Crediting profits from custom operations, the average copper cost was somewhat reduced.

*(8) Officers.—It was announced March 15, 1917, that directors of this company had elected the following officers for the ensuing year: Charles A. Kittle, Pres.; Edwin S. Hooley, Vice-Pres.; Frank A. Dillingham, Vice-Pres.; Frank W. Thompson, Sec'y-Treas.; and R. G. Bolston, asst. Sec'y-Treas.

—Apr.

*(1) Dividends Reported as Warranted by Earnings.—On April 20, 1917, the "Wall Street Journal" said that affairs of this company were in strong enough shape to warrant the early inauguration of dividends. It is the present intention of the directors to start dividends early in May. The rate expected in the best quarters is 10 cents a share quarterly, or 8% on the par value of the stock per annum.

Earnings of the company are running at the rate of more than \$100,000 a month. Earnings in 1916 were large enough so that, after all debts had been paid off and a very liberal sum charged to depreciation, a surplus of \$300,000 available for the stock was carried into the current year. This surplus, together with earnings for the current year at the present rate, would give the company \$1,500,000 available for the \$3,315,000 capital stock, of par value \$5.

Production of Consolidated Arizona is steadily increasing. In March, 1917, the company turned out 1,750,000 pounds of copper. By the first of 1918, when improvements now under way have been advanced, the company will produce about 2,200,000 pounds a month, and completion of improvements will increase this capacity to nearly 3,000,000 pounds a month.

No new financing will be done to take care of extensions to capacity.

*(2) Shipments Indicate March Earnings as \$200,000.—On April 24, 1917, the "Wall Street Journal" said that shipments of this company in March had been at a rate indicating earnings for the period of \$200,000. This large increase is partly due to gradual lifting of the railroad freight embargo, which is said to have tied up nearly 2,000,000 pounds of the company's shipments.

CONSOLIDATED CAR-HEATING CO.

*(1) Statement by President.—On April 4, 1917, Pres. Nuckols, of this company, was quoted as saying: "Our attention has been called to the fact that one of the companies interested in steam heating of railway cars has sought to give the impression through publicity channels that the result of an interference pending in the Patent Office for years has been to give that concern a monopoly of the system of steam heating at atmospheric pressure steam, sometimes called the 'vapor system.'"

"The fact is that after many years'

JANUARY 1 TO APRIL 30, 1917

litigation in the Patent Office, based upon the applications of E. H. Gold (owned by the Chicago Car-Heating Co.), Edward E. Gold (owned by the Gold Car-Heating & Lighting Co.), and William P. Cosper (owned by the Consolidated Car-Heating Co.), the Commissioner of Patents decided that the claims in these applications covering the 'vapor system' broadly, were unpatentable, and that none of the three companies was, therefore, entitled to broad claims, covering the system of heating by steam at atmospheric pressure.

"In view of the decision of the Commissioner of Patents, in which all parties have acquiesced, the only patents relating to the 'vapor system' which can be issued are those covering mere details of construction. No one company can exercise a monopoly on the vapor method or system of heating railway cars."

CONSOLIDATED COKE CO.

*(1) Coal Land Purchased.—Eighty-eight acres of coal lands in Nicholson township, Fayette County, Pa., were sold April 13, 1917, by R. M. Fry, a local coal man, to the Consolidated Coke Co. for \$30,000. Mr. Fry purchased the coal tract from the Cover estate, paying \$72,000 for it.

CONSOLIDATED CO.

*(1) Merger.—See Chesapeake & Potomac Telephone Co.—Item No. 1.

CONSOLIDATED COPPERMINES CO.

*(1) Operations.—It was stated Jan. 15, 1917, that the old 50-ton concentrator on the Giroux property of this company had been remodeled, and was ready to begin operations on Jan. 1, but inability to secure delivery of fuel had caused a temporary postponement of operations. Pres. C. H. Boynton visited the property and it is expected that some arrangement will be made to start operations early in 1917. The company is considering erecting another 50-ton unit on the property.

*(2) Status.—It was stated Jan. 15, 1917, that this company owns 94% of the stock of the Giroux Consolidated Mines Co., which possesses 11 patented mine claims in the State of Sonora, Mexico. The other mineral property of the Consolidated Company is within the Robinson Mining District of White Pine Co., Nevada.

The Consolidated Co. recently strengthened its treasury position by the sale of \$300,000 of 15-year bonds from an authorized issue of \$350,000. The proceeds were used to pay off the company's floating debt and left a balance in the treasury of considerably in excess of \$100,000.

Estimates of ore developed and partially developed on all properties during the year ended April, 1916, were 25,867,850 tons, with an average copper content of 1.141.

*(3) Operations Resumed.—It was stated Jan. 27, 1917, that this company had resumed operations at the 500-ton oil flotation unit of the Giroux mill on Jan. 20.

Work on a new 500-ton unit is progressing, and it is expected to have this unit in operation on either April 1 or May 1.

—Feb.

*(1) President Resigns.—Announced Feb. 6, 1917, that C. H. Boynton had resigned as Pres. and director of this company.

—Apr.

*(1) Suit for Receiver Dropped.—See Utah Copper Co.—Item No. 7.

*(2) Net Earnings in March Over \$70,000.—On April 14, 1917, the "Boston New Bureau" said that after an eight-year up-hill struggle this company has entered the income-producing ranks as evidenced by the fact that in March net earnings of over \$70,000 were realized from all sources over and above all expenditures, including cost of construction, development and supplies.

The property includes, among others, the old Giroux mine.

March 4 marked the commencement of operations at the new 500-ton concentrating mill, but not until a fortnight later was full feed reached. By the middle of May a second unit of similar size will have been put in operation. The mill is equipped with Calow machines, the company having license from Minerals Separation Co. to use its flotation process.

Since the resignation from the presidency of Charles H. Boynton, Joseph B. Cotton, Vice-Pres., has been acting Pres. and has been directing the company's affairs.

The single unit of the mill has a nominal capacity of between 600 and 650 tons of ore daily. In April it is estimated that total treatment will approximate 15,000 tons. Recovery from the sulphide ores has been ranging from 80% to 92% with an average of about 84%.

The company now has money in the bank and discounts its bills.

• CONSOLIDATED GAS CO. OF NEW YORK.

*(1) Report, Year Ended Dec. 31, 1916, made public Jan. 22, 1917, showed an increase of 3.92% in sales during 1916, while in 1915 these sales amounted to a decrease of 5.02% from the previous year. Total gas sales, including the affiliated companies, increased in 1916 3.83%, compared with a decrease of 5.38% in 1915. Sales of electric current during the year, including sales to the Third Avenue R. R., the B. R. T. and the New York, New Haven & Hartford R. R., showed an increase of 13.49% over the previous year.

Taxes charged against earnings of the Consolidated Co. and its affiliated companies amounted to \$5,454,125, compared with \$4,440,111 in the previous year.

*(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross income.....	\$10,147,620	\$10,222,602
Surp. after fixed charges	8,654,464	8,502,857
Bal. after divs.....	1,667,309	1,765,244

*(3) Earnings on Stock.—It was stated Jan. 22, 1917, that this company's net after interest of \$8,654,464 for the year ended Dec. 31, 1916, is equal to 8.67% earned on \$99,815,500 capital stock, as compared with 8.52% on the same stock in 1915.

*(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$19,110,697, compared with \$18,008,736 Dec. 31, 1915.

*(5) Statement by President.—It was stated Jan. 22, 1917, that Pres. Geo. B. Cortelyou, of this company, in his report to stockholders for the year ended Dec. 31, 1916, said, in part:

"During the year \$5,032,811 were expended for additions and extensions of the producing and distributing plants of various companies. Expenditures on repairs and renewals were \$6,811,237, so that all the properties have been maintained at the highest possible point of operating efficiency, thus assuring the best results as to the quality of the gas and electric service, as well as to economy in the cost of production and distribution of gas and electricity.

"During the year Consolidated Co. and its affiliated gas companies installed 193,430 appliances, and there was surrendered to the companies 84,578 appliances, a net increase of 108,852 in the number of appliances in use, which have been installed by the companies, as against a net increase in the previous year of 90,396 and in the year 1914 of 61,570 appliances.

"It has been very difficult during the year to secure a regular or necessary supply of anthracite or bituminous coal. At times the Consolidated Gas and its affiliated companies have been obliged to draw heavily on their reserve stock. Many reasons have been given as accounting for the shortage, including wage troubles, strikes at the mines, inability to obtain miners and lack of transportation facilities, on the part of the coal railroads.

"Whatever may have been the real cause, the fact remains that the situation has been at times serious and, as far as can be ascertained, it is likely to continue so for some time to come.

"The combined gas sales of the Consolidated Gas Co. and its affiliated gas companies in Manhattan, Bronx and Queens Borough and in Westchester County increased 1,131,180,263 cubic feet more than 1915, or 4.01%, compared with a loss of 4.12% in 1915.

"No change has been made by the Public Service Commission for the First District in standard of quality of gas prescribed by the Legislature. In our own State the Public Service Commission for the Second District, which includes the entire State with the exception of New York City, has adopted the calorific standard for gas companies within its jurisdiction, including the Westchester Lighting Co.

"The policy of the city, adopted in 1915, of substituting nitrogen-filled electric street lights for incandescent gas lamps, resulted in a reduction in the consumption of gas for street lighting in 1915 of approximately 80,000,000 cubic feet, and in 1916 of approximately 139,500,000 cubic feet.

"Combined station output of Consolidated Gas Co. and its affiliated gas companies last year showed an increase of 4.85% over the previous year. Increase in the day output was 8.18% and in the night output 1.52%."

*(6) Directors Re-elected.—Announced Jan. 22, 1917, that at the annual meeting of stockholders of this company retiring directors were re-elected. There were represented by proxy 717,286 shares, as against 605,960 in 1915.

—Mar.

*(1) Information Sought by Public Service Commission.—It was announced March 4, 1917, that the New York First District Public Service Commission had sent a letter to Pres. Cortelyou, of this company, requesting further information as to disposition of proceeds from sale of \$25,000,000 convertible 6% debentures, which the commission authorized Dec. 1, 1914.

The letter stated that from annual report for 1915 it appeared that after providing for payment of short-term notes and other obligations there remained approximately \$9,000,000 of cash proceeds of the debentures for which the company had no immediate use, and that on or about Feb. 15, 1915, the company, principally through certain subsidiaries, loaned \$9,000,000 to National City Co. at interest rates varying from 2.8% to 3.05%.

A request was made to file with the commission, within a week, the contract or contracts governing these loans. If no formal contract was entered into, the commission asked that terms of the arrangement with National City Co. be stated.

*(2) Statement About Commission Letter.—On March 6, 1917, the "Wall Street Journal" said that officials of this company expressed surprise that the Public Service Commission should publish the letter to Pres. Cortelyou regarding loans to the National City Co. before the company had an opportunity to present its case to the commission.

"The Consolidated Gas Co. did not make any loans to the National City Co. through its subsidiary companies, as is alleged," said an official of the company. "The main purpose for which the funds, representing obligations of the Consolidated Gas Co. bearing 6% interest, were created, was the construction requirements of its various subsidiary companies, which have been financed by the Consolidated Gas Co. for the past 17 years.

"The Consolidated Gas Co. might have carried these funds at its own expense and loaned them to its subsidiary companies as they required them, but this would have been extremely bad financing. In anticipating these construction requirements, the Consolidated Gas Co., as stated, did so almost entirely in behalf of its subsidiary companies. It was highly proper, therefore, that the

JANUARY 1 TO APRIL 30, 1917

burden of carrying of the funds should be borne, in proportion to their respective requirements, by the companies for which they were acquired.

"The Consolidated Gas Co. loaned its own surplus funds to the National City Co. because it was able to obtain from that company a better rate of interest (at present 3½%), than it could obtain elsewhere, and for the reason its subsidiary companies made loans of their surplus funds to the same institution at the same rate."

—Apr.

*(1) Stock Affected by People's Gas Dividend Reduction.—See People's Gas, Light & Coke Co.—Item No. 2.

• CONSOLIDATED GAS, ELECTRIC LIGHT & POWER CO., BALTIMORE.

*(1) Revenue from New Contracts.—It was stated Jan. 2, 1917, that new industrial contracts made by this company during November will produce an estimated annual revenue of \$27,125.

The gain in industrial business by the Baltimore company since June 30, 1916, the beginning of the current fiscal year, will produce an estimated annual revenue of \$218,607.

*(2) Output, November, 1916.—It was announced Jan. 3, 1917, that the output of this company in November established new high records.

The electricity generated and purchased for the month was 24,294,770 kilowatt hours, which was 39.8% greater than for November, 1915. The maximum output for one day of 903,900 kilowatt hours is also a record figure, being 5.3% greater than the highest day in October. The October record was exceeded thirteen times during November, showing a very consistent increase.

*(3) Dividend Discussion.—On Jan. 17, 1917, it was stated that the strength in this company's shares is due to the fact that the question of placing the stock on an 8% basis is under consideration. The directors are scheduled to meet in Baltimore in February. The rapid development of manufacturing in the Baltimore district, including the plans of the Bethlehem Steel Corp. to spend \$50,000,000 for new construction, and the general increase in the consumption of gas and electricity, has resulted in record-breaking earnings.

*(4) Electric Customers, 1916.—It was announced Jan. 22, 1917, that this company had reported a net gain in electric customers during 1916 of 5,776. The net gain in electric customers in 1915 was 4,390 and in 1914, 4,230.

All branches made large gains in 1916. The increase in industrial power amounted to 71.8%; industrial fuel, 78%; general sales, electric, 88.4%; general sales, gas, 64.9%, and trucks, 59.6%.

*(5) Report, Quarter Ended Dec. 31, 1916, shows

	1916	1915
Gross	\$2,243,948	\$1,994,134
Net after taxes	1,120,797	1,025,461
Surp. after fixed charges	722,880	612,505

—Feb.

*(1) Application to List.—It was announced Feb. 3, 1917, that this company had made application to the New York Stock Exchange to list \$8,500,000 5% convertible notes due Nov. 15, 1921.

*(2) Output, January, 1917.—It was stated Feb. 7, 1917, that the gas output of this company in January showed an increase of 18.4% over January, 1916. The output for the 31 days was 503,181,000 cubic feet, an increase over the corresponding period of 1916 of 78,143,000 cubic feet.

On Jan. 31 the increase in the gas output of the Baltimore company since July 1, 1916, the beginning of the current fiscal year, was 14.2%. This growth is more than double the previous normal rate of increase.

*(3) Admitted to List.—It was announced Feb. 15, 1917, that \$8,500,000 of this company's 5% 5-year convertible notes had been admitted to the list by the New York Stock Exchange.

*(4) Operations, 1916.—It was stated Feb. 16, 1917, that for 1916 this company signed up 418 contracts for electrical industrial power, compared with 347 contracts in 1915, the horsepower involved being 29,760, compared with 25,373. The contracts taken in 1916 resulted in the closing down of 62 isolated electric plants of 9,245 horsepower, compared with 38 isolated plants of 5,850 horsepower in 1915.

The estimated annual amount of energy from all industrial contracts signed in 1916 was 32,364,947 kilowatt hours, compared with 29,354,480 kilowatt hours from the contracts taken in 1915.

Dec. 31, 1916, the total connected industrial electric load of the company was 153,874 horsepower, compared with 124,114 horsepower Dec. 31, 1915.

*(5) Increased Dividend on Common.—It was announced Feb. 21, 1917, that this company had declared a regular quarterly dividend of 2% on the common stock, payable April 1 to stock of record March 15. This is an increase of one-fourth of 1% over the previous rate.

*(6) Comment on Increased Dividend.—On Feb. 22, 1917, the "Wall Street Journal" said that the action of this company in reducing price of electricity and at same time increasing dividend rate from 7% to 8% annually reflects the strong financial position of the company and enlarged earning power. Earnings within the following few years are expected to show a continued increase, as the company has not yet begun to receive full benefits from big manufacturing development in the Baltimore district.

—Apr.

*(1) Gain in Revenue Since July 1 Estimated at \$346,741.—On April 19, 1917, the "Wall Street Journal" said: "The estimated annual revenue from new industrial power and fuel business secured by the Consolidated Gas, Electric Light & Power Co. of Baltimore during March, 1917, is \$47,850. The gain for the month in estimated annual consumption for new industrial contracts for electric service is 2,945,175 K.W.H.; and the estimated annual consumption from new contracts for industrial fuel is 16,339,800 cubic feet of gas."

"Since the beginning of the current fiscal year, July 1, 1916, the gain in estimated annual revenue from new industrial power and fuel contracts is \$346,741."

*(2) March Output 11.3% Greater Than in March, 1916.—On April 19, 1917, Dow, Jones & Co. stated: "For March, 1917, the output of gas by the Consolidated Gas, Electric Light & Power Co. of Baltimore was 11.3% greater than the output for March, 1916, making the increase for the first nine months of the current fiscal year 13.56%. The average increase in the gas output during March was about 1,500,000 cubic feet per day. The load factor was 0.45 for March, 1917, while for March, 1916, it was 0.44."

*(3) Earnings—

	1917	1916
March gross	\$2,270,975	\$1,955,758
Net after taxes	1,069,131	954,861
Surp. after chgs.	635,886	573,050

*(4) Report, Nine Months Ended March 31, 1917, shows:

	1917	1916
Gross	\$6,337,316	\$5,585,324
Net after taxes	3,011,349	2,730,961
Surp. after fixed charges	1,811,065	1,522,944
Bal. after divs.	854,590	697,093

• CONSOLIDATED INDIANA COAL CO.

*(1) Committee to Sell Bonds.—Reported on March 27, 1917, that the committee representing the 30-year sinking fund 5% gold bonds of this company had agreed to sell to the Joint Reorganization Committee of the Chicago, Rock Island & Pacific Ry. Co. the bonds deposited with it at 75 and interest from December 1, 1914, to May 1, 1917, the proposed date of payment.

The committee has deposited with it over 95% of the outstanding bonds, other than those held by the Rock Island, and the New York Trust Co., depository, will accept until May 1,

1917, further deposits of bonds so that all bondholders can participate in this sale.

As the expenses of the coal company committee have been assumed by the Rock Island committee there will be no deduction from the purchase price to the depositing bondholders. Bondholders not participating in this sale will receive only their distributive share in event of sale of the property under foreclosure proceedings.

• CONSOLIDATED INTERSTATE-CALLAHAN MINING CO.

*(1) Report, Quarter Ended Dec. 31, 1916, compares with previous quarter as follows:

	4th Quarter	3d Quarter
Gross income	\$999,025	\$981,064
Profit	755,887	413,695
Improvements	8,768	7,968

Surplus	49,646	405,727
	Lbs.	Lbs.

Total zinc shipped	15,830,100	16,968,836
Total lead shipped	1,286,670	1,454,562

• CONSOLIDATED MINES CO., SPOKANE, WASH.

*(1) Incorporated on March 8, 1917, in Washington, with a capital of \$500,000. Incorporators: F. R. Clark, G. W. Sommer, P. N. Clark and H. R. Moss.

• CONSOLIDATED MINING & SMELTING CO. OF CANADA, LTD.

*(1) Report, Year Ended Sept. 30, 1916.—It was stated Jan. 3, 1917, that the report of this company for the year ended Sept. 30, 1916, to be submitted at the annual general meeting of the shareholders Jan. 15, shows a substantial increase in profits, due to higher production and the keen demand for the metals produced.

Gross value of the metals produced was \$7,892,549, compared with \$6,898,744 in the previous year, an increase of nearly \$1,000,000; 3,088,199 pounds of zinc was produced, but as this is a new enterprise and as additions to the zinc plant are still incomplete, the surplus in this particular phase of operations were written off.

The company's profits for the year were \$996,496, after vigorous writing off for depreciation and development of properties.

*(2) Annual Report Shows Profits of \$996,496.—It was announced Jan. 22, 1917, that net profits of \$996,496 were realized by this company in the fiscal year ended Sept. 30, 1916, after writing off \$278,388 for depreciation and charging \$598,746, which was expended in development, to profit and loss account. Four dividends totaling \$776,337 were paid.

The Consolidated Co., controlled by Canadian Pacific, owns and operates the only zinc and copper refineries in the Dominion of Canada. Both refineries were started during 1916, the result being 4,446,080 pounds of copper and 3,088,199 pounds of electrolytic zinc. In addition, there was also recovered from 447,017 tons of ore smelted, 98,314 ounces of gold, 2,285,631 ounces of silver and 39,974,411 pounds of lead.

A sulphuric acid plant was also built and operated together with a hydrofluosilicic acid plant. The copper refinery has a daily capacity of 12 tons of refined copper, which is being increased to 17 tons per day.

• CONSOLIDATED MOTORS CORP., WILMINGTON, DEL.

*(1) Incorporated in March, 1917, in Delaware, with a capital of \$1,500,000, to manufacture motor vehicles.

• CONSOLIDATED OIL CO.

*(1) Sale.—See Reno Oil Co.—Item No. 1.

• CONSOLIDATED OIL & GASOLINE CO.

*(1) Incorporated on Feb. 14, 1917, in Kentucky, with a capital of \$2,000,000. Incorporators: W. E. Hancock and others.

JANUARY 1 TO APRIL 30, 1917

CONSOLIDATED OIL & GASOLINE CORP.

*(1) Incorporated on Feb. 19, 1917, in Delaware, with a capital of \$1,000,000, to carry on business of producing, refining, storing, piping of oils, etc. Incorporators: A. J. Kingsbury and M. H. Camac, Dover, Del.

CONSOLIDATED PRODUCTS CO., CLEVELAND, O.

*(1) Incorporated on Jan. 16, 1917, in Ohio, with a capital of \$250,000, to deal in motor trucks. Incorporators: W. E. N. Hamperly, John V. Hammersmith, Samuel Mollett, John J. Donahue and A. A. Hammersmith.

CONSOLIDATED TRUCK & TRACTOR CORP.

*(1) Incorporated on Jan. 24, 1917, in Delaware, with a capital of \$1,500,000, to manufacture and sell automobiles, engines, tractors, etc. Incorporators: Forrest M. Keeton, Zach C. Barber and Wm. E. Tarnsey, off at Detroit, Mich.

CONSOLIDATION COAL CO.

*(1) Stock Dividend.—Announced Jan. 10, 1917, that this company had paid the regular quarterly dividend of 1½% on the capital stock, payable Jan. 31 to stock of record Jan. 30, and a 5% stock dividend, payable to stock of record Feb. 2.

*(2) Earnings, 11 Months.—It was stated Jan. 11, 1917, that this company reported estimated earnings of \$830,145 for December, and actual earnings for the 11 months ended Nov. 30 of \$3,021,487. After deducting an estimated depreciation of \$521,375 for the year 1916, and a sinking fund of \$331,104, the total net earnings of the company are estimated at \$4,301,632.

Production is about 6,000 tons a day ahead of the previous year, in spite of the car shortage and the difficulty of getting men. While there are no labor troubles in the company's fields, a test showed that the men work eight hours a day for 41% of the time. Higher pay results in a decreased production per man, as a larger income does not seem to be an incentive to them.

*(3) Stock Increase Ratified.—It was announced at Baltimore Jan. 25, 1917, that stockholders of this company had ratified the recommendation of the directors that the authorized capital stock be increased from \$30,000,000 to \$45,000,000. Out of the increased capitalization will be paid a stock dividend of 5%, recently declared, the balance being reserved for the conversion of the bonds, which holders have the right to convert into stock at 105, and for corporate purposes.

—Mar.

*(1) Report, Year Ended Dec. 31, 1916, shows:	1916	1915

†Less adjustment of account of previous years.

*(2) Earnings on Stock.—It was stated March 21, 1917, that this company's 1916 balance after charges of \$4,075,556 is equal to 11.61% on \$35,107,380 capital stock, compared with 10.14% earned on \$25,000,000 capital stock in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$12,625,525, compared with \$10,160,617 Dec. 31, 1915.

*(4) Statement by President.—It was announced March 21, 1917, that Pres. J. W. Wheelwright, of this company, in his annual remarks to stockholders, said, in part: "The aggregate outstanding bonded debt of the company is \$34,253,500, exclusive of \$2,293,000 5% first and refunding mortgage bonds held in treasury, and \$1,000,000 of bonds of the Cumberland & Pennsylvania R. Co. issued under its mortgage of

April 1, 1891. The securities in the sinking fund of this mortgage, with the annual accretions, will provide ample funds for retirement of the bonds at their maturity.

"The total amount of coal mined by the Consolidation Coal Co. and its subsidiary companies in 1916 showed a total of 9,917,575 gross tons, as compared with 10,466,414 in 1915, a decrease of 548,839 tons. The total net tons mined amounted to 11,107,684 last year, comparing with 11,722,383 during the preceding year, a falling off of 614,699.

"In 1916 the company and its subsidiaries manufactured coke aggregating 112,018 tons. This compares with 89,197 tons in 1915, showing a loss of 22,821 tons.

"Coal mined by lessees of the company in 1916 amounted to 620,868 gross tons, as against 428,106 tons in the preceding year, an increase of 202,762 tons. The net tonnage also showed an increase of 103,893, being 583,372 tons in 1916, and 479,479 in 1915.

*(5) New Director.—It was announced March 21, 1917, at Baltimore, Md., that Frank Altschul, member of the New York and Paris banking house of Lazard Freres, had been elected a director of this company to fill a vacancy caused by the retirement of J. E. Watson. Other retiring directors were re-elected.

—Apr.

*(1) Application to List Additional Stock.—On April 9, 1917, application was made to list \$1,671,700 additional capital stock of this company on the New York Stock Exchange.

*(2) Application to List.—Announced April 9, 1917, that application had been made to the New York Stock Exchange to list \$1,671,000 additional of this company's capital stock.

*(3) Application to List in New York.—On April 16, 1917, this company made application to the New York Stock Exchange to list \$1,671,700 additional of its capital stock.

*(4) Additional Stock Listed on New York Stock Exchange.—The New York Stock Exchange April 26, 1917, announced the listing of \$1,671,700 additional capital stock of this company, making the total \$40,862,200.

CONSTANTINE HYDRAULIC CO.

*(1) Merger Planned.—See Michigan Gas & Electric Co.—Item No. 1.

CONSUMERS CO.

*(1) Directors.—It was announced at Chicago Feb. 21, 1917, that at the annual meeting of this company the following directors were elected: J. A. Patten, Dr. M. L. Harris, John Burnham, F. G. Logan, Wm. M. Clouze and Milton S. Florsheim.

*(2) Report, Year Ended Dec. 31, 1916.—It was announced Feb. 21, 1917, that this company, which supplies most of the ice used by Chicago householders, as well as coal, had in 1916, the best year in the company's history. After providing for all increased expenses and paying the pfd. dividend, the amount remaining for the common stock was \$136,430, against \$28,085 in 1915. The profits were equal to 2.27% on the common shares, against 0.46% in 1915.

The company also retired in 1916 \$50,000 debentures and added \$79,000 to the sinking fund. The property was maintained, according to the annual report, in the best physical condition.

CONSUMERS' FISH CO.

Practically the entire increase in operating expenses of 57% for March, as well as that of 71% for the three months, was due to the increased cost of fuel. Conditions in March were the same as in the first two months of the year in regard to coal supply and in that month over \$60,000 more was paid for coal than in March, 1916.

*** CONTINENTAL CAN CO.**

*(2) Earnings on Stock.—It was stated Feb. 5, 1917, that this company's balance of \$1,790,317, after pfd. dividends for 1916, is equal to 22.37% on \$8,000,000 common stock, as compared with 12.05% earned on the same stock in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$3,399,839, compared with \$3,009,622 Dec. 31, 1915.

JANUARY 1 TO APRIL 30, 1917

²(4) **Comment on Annual Report.**—On Feb. 7, 1917, the "Boston News Bureau" said that this company is another member of the group of industrials whose 1916 earning record has fulfilled expectations. The balance for the \$3,000,000 common in the fiscal year to Dec. 31 was equal to \$1,790,317, or 22.38%, against \$964,113, or 12.05%, in 1915 and but 4.8% in 1913.

What makes the Continental Can performance so satisfactory is that it measures purely domestic or normal line operations.

The company has kept religiously free from munitions orders and realized its entire 1916 gross and net from production of containers, of which it is the second largest manufacturer in the United States.

Continental Can now operates its own tinplate mill, from which it secures the greater portion of the approximately 2,000,000 base boxes of tinplate used yearly. This mill is expected regularly to show earnings equal to \$5 per share on the common, the present dividend rate. This mill was in operation about ten months out of the 1916 year.

At the end of 1916 the company had a net working capital equal to better than \$75 per share on the \$5,000,000 pfd. This pfd. is being whittled down at the rate of about \$165,000 yearly through sinking fund operations.

Now that the fiscal year is over and results definitely known it is not unlikely that directors will take up the long anticipated question of a 25% stock dividend on the common, bringing that issue up to \$10,000,000.

Such a procedure would be justified by earning power and prospects and would still enable the company to keep strong in working capital. In fact, an increase to a 6% dividend basis is regarded as not outside the realm of possibility.

Continental Can officials are confident of a successful year in 1917. In fact, common share profits of \$30 are considered as fairly well assured.

CONTINENTAL DOLLAR SHIRT SHOPS, INC.

²(1) Incorporated on March 16, 1917, in New York, with a capital of 2,500 shares, \$100 each, 40,000 shares, no par value, active capital \$450,000, to conduct haberdashery stores for men's and boys' furnishings. Incorporators: C. T. Mortimer, J. Mawha and F. A. Starg, 97 Franklin St., New York.

CONTINENTAL EXPORT & IMPORT CO.

²(1) Incorporated on March 30, 1917, in Delaware, with a capital of \$5,000,000 to do a general exporting and importing business, and to act as agents for American manufacturers. Incorporators: Henry C. Kelm, F. M. Kaufman, W. D. Bradfield, Justus C. Johnson, August Abele and J. Ford Hawes, all of Chicago, Ill.

CONTINENTAL FINANCE CO., PHILADELPHIA.

²(1) Incorporated on Jan. 28, 1917, in Delaware, with a capital of \$400,000, to conduct a general financial business. Incorporators: F. R. Hansell, Philadelphia; Geo. H. B. Martin and S. C. Seymour, Camden, N. J.

CONTINENTAL GAS & ELECTRIC CORP.

²(1) Report, Year Ended Dec. 31, 1916, showed gross of \$714,203, compared with \$668,589 for 1915; while net was \$250,452, compared with \$204,593. Expenditures for additions, improvements and acquisition of new properties in 1916 were \$902,108. The new plants acquired included 15 in Nebraska and three in Iowa.

In the year 105 miles of electric transmission lines were built, connecting the new properties with the central generating stations.

The company is now supplying electric light and power, gas, heat and ice to a population of 105,000 in Nebraska and Iowa.

CONTINENTAL INSURANCE CO.

²(1) Annual Report, made public Jan. 17, 1917, shows policyholders' surplus of \$22,303,583 on Jan. 1, 1917. Unearned premiums amounted to \$10,135,305, and losses in process of adjustment amounted to \$594,007.

Of its total resources, amounting to \$34,114,371, the Continental has \$28,945,764 invested in bonds and stocks. Its real estate is valued at \$1,000,000, while cash on deposit, etc., amounted to \$2,381,569. It does a fire insurance business.

²(2) **New Director.**—Announced Jan. 18, 1917, that George M. Reynolds, Pres. of the Continental & Commercial National Bank, Chicago, had been elected a director of this company.

CONTINENTAL MANUFACTURING CO., TACOMA, WASH.

²(1) Incorporated on Jan. 16, 1917, in Washington, with a capital of \$1,000,000. Incorporators: J. G. Morhwels and J. N. Wilbur.

CONTINENTAL MOTORS CO.

²(1) **Reorganization.**—It was announced Jan. 5, 1917, that stockholders of this company had approved a recommendation that a new corporation be formed to take over all of the assets. The new company will have a maximum capital stock of \$18,500,000, of which \$3,500,000 will be preferred and \$15,000,000 common.

Stockholders are to receive \$5 in cash and three shares of the new stock in exchange for each share of old stock.

CONTINENTAL MOTORS CORP.

²(1) **Stock Offering.**—Announcement was made Jan. 17, 1917, that Wm. P. Bonbright & Co. and Lee, Higginson & Co. are offering at 97½ and accrued dividend, par \$100, a new issue of \$3,500,000 7% cumulative pfd. stock of this company. Subscription books opened on this date and close Jan. 20. Transfer agents, New York Trust Co., New York, and Security Trust Co., Detroit. Registrars, Bankers Trust Co., New York, and Union Trust Co., Detroit.

²(2) **Status.**—It was stated Jan. 17, 1917, that this company had been formed under the laws of Virginia, and had acquired the entire property and business of the Continental Motors Co. with plants at Detroit and Muskegon. The new corporation has a capitalization outstanding of \$3,500,000 7% cumulative pfd. stock, par \$100; and \$14,522,580 common stock, par \$10.

The Continental Motors Corp. is the largest company in the United States manufacturing gasoline engines exclusively, and has a capacity of 160,000 gasoline engines a year.

Total net assets of the company, exclusive of good will, are \$7,907,023. Earnings in the year ended Oct. 31, 1916, were \$2,440,293.

²(3) **Stock Oversubscribed.**—On Jan. 17, 1917, William P. Bonbright & Co. and Lee, Higginson & Co. announced that the subscription books for the \$3,500,000 pfd. stock of this company had been closed, the issue having been heavily oversubscribed.

—Feb.

²(1) **Dividend Discussion.**—A Detroit dispatch Feb. 16, 1917, stated that interests connected with this company predicted that the common stock would be placed on a regular dividend basis about April 1.

While the fire at the plant of the Saxon Motor Co. had slowed the delivery of Continental motors to that concern for a few weeks, this would be made up when the Saxon Co. increased production to the normal basis. Continental Motor has a contract for about 40,000 motors with Saxon and the full amount will be taken.

—Apr.

²(1) **Production Rate Nearly a Motor a Minute.**—This company announced April 19, 1917, that its output is approaching the production of a motor a minute.

The company's average daily production of motors was 21% greater at the close of its last fiscal year than at the beginning of that year. To accomplish this result new buildings and improved machinery and equipment have been added.

Between June 30, 1915, and Oct. 31, 1916, \$2,048,968 was expended in plant enlargement, equipment and fixed assets. During this period the amount invested in inventories and supplies was increased \$2,405,327, thus adding to the total investment in plant, equipment and inventory accounts during the 16 months preceding the close of the fiscal year, \$4,454,293.

It was to provide additional working capital necessitated by the rapid growth of the company that the recent financing plan was adopted, according to the "Boston Daily Advertiser" April 19, 1917.

Net earnings for the past year are reported as \$2,448,752, as compared with \$1,222,128 for the year ended June 30, 1915.

CONTINENTAL OIL CO.

²(1) **Directors Re-Elected.**—Announced at Denver Jan. 19, 1917, that at the annual meeting of directors of this company retiring directors were re-elected. Operations during 1916 were the most profitable in the company's history, but no statement was made public.

—Apr.

²(1) **Acquisition.**—On April 9, 1917, the company announced that it had added to its oil properties by purchase of a Cushing lease yielding about 100 barrels per day of settled production. Gross earnings for the year ended Feb. 28, 1917, were \$268,548 and net earnings \$210,313. The above earnings show 70% on the total issue of 30,000 shares of pfd. stock and 28.6% on the 65,000 shares of common outstanding after deducting the 8% dividend for the pfd.

CONTINENTAL OIL INDUSTRIES CO.

²(1) Incorporated on Jan. 29, 1917, in Delaware, with a capital of \$2,500,000, to produce, refine and prepare for market petroleum, natural gas, etc. Incorporators: L. L. Cowan, R. Montgomery, Chicago, and H. F. Branstad, Eau Claire, Wis.

CONTINENTAL OIL & MINERAL CO.

²(1) **Stock Sale Authorized.**—It was announced Jan. 3, 1917, that this company, San Francisco, had been authorized by the California Commissioner of Corporations to sell the remaining 24,970 shares of its capital stock at par, \$1 per share, to net not less than 80, the proceeds to be used to reduce current indebtedness, and to continue the drilling of a well, now down 2,169 feet, on the company's property in Santa Clara County, Cal. The company has expended approximately \$70,000 and has two shallow wells producing a small amount of oil. The third well is being sunk with a view to exploring a deeper deposit.

CONTINENTAL PAPER BAG CO.

²(1) **Dividend Resumed on Common.**—Announced Jan. 31, 1917, that this company had declared a quarterly dividend of 1¼% on the common stock, together with the usual quarterly dividend of 1¼% on the pfd. payable Feb. 15 to holders of record Feb. 8. The last previous dividend on the common stock was paid in August, 1915.

CONTINENTAL REALTY CO.

²(1) **Deal Approved.**—See Milwaukee Electric Ry. & Light Co.—Item. No. 1.

CONTINENTAL REFINING CO.

²(1) **Initial Dividend on Pfd.**—Announced Jan. 10, 1917, that this company had declared an initial quarterly dividend of 2% on the pfd. stock, payable April 1 to stock of record March 1.

—Feb.

²(1) **Initial Dividend on New Common.**—It was announced Feb. 6, 1917, that an initial dividend of 6% had been declared on the new capitalization of the

JANUARY 1 TO APRIL 30, 1917

common stock of this company, payable one-half of 1% monthly on the 15th of each month to stock of record on the 10th of each month.

—Mar.

*(1) Dividend Increased on Common.—Announced March 13, 1917, that the directors of this company, of Oklahoma, had voted to increase the dividend on the common stock from 6% to 8% annually. The dividend is payable the 10th of each month to stock of record on the first. This places the common stock on the same dividend basis as the pfd.

*(2) Acquisition.—It was stated March 14, 1917, that this company, of Oklahoma, had acquired interests in 1,260 acres in the Bristow field, 160 acres in the Kellyville pool, and a substantial acreage in the Bixby pool area, in the Mid-Continent field.

*(3) Acquisition.—Announced March 20, 1917, that this company had acquired the right to use in Oklahoma the Lorch process for increasing the yield of gasoline from crude oil.

CONVERSE RUBBER CO.

*(1) Stock Dividend.—Announced April 3, 1917, that this company, of Malden, Mass., had declared a stock dividend of 350% to stockholders of record April 1. This means a bonus of \$375,000 to stockholders.

COOK (S. A.) & CO., MEDINA, N. Y.

*(1) Capital Increased.—On Jan. 22, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$350,000 to \$500,000.

COOK (N. B.) OIL CO., MANHATTAN, N. Y.

*(1) Capital Increased.—On April 16, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$50,000 to \$500,000.

COOS BAY COAL CO.

*(1) Stock Assessment.—Announcement was made Feb. 2, 1917, of an assessment of 45 cents per share on the capital stock of this company. Stock upon which the assessment remains unpaid March 9 will be advertised for sale. The company's office is at San Francisco. Its works are near Marshfield, Coos County, Ore.

COPLAND BREWERY.

*(1) Failure.—It was announced on March 27, 1917, that this company had closed its doors on that date. The company had been operating at a loss of \$2,000 a month since Sept. 16, 1916. The company is capitalized at about \$1,000,000.

COPPER QUEEN CONSOLIDATED MINING CO., NEW YORK.

*(1) Capital Increased.—On March 13, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$2,000,000 to \$50,000,000.

*(2) Merger Planned.—See Phelps, Dodge & Co., Inc.—Item No. 3.

—Apr.

*(1) Name Changed.—Capital Increased.—See Phelps, Dodge & Co., Inc.—Item No. 1.

COPPER RANGE CO.

*(1) New Treasurer.—Announced Jan. 20, 1917, that F. W. Payne was elected Treas. of this company, succeeding Frederic Stanwood, deceased. John R. Stanton, Pres. of the Mohawk and Wolverine companies, was elected to fill the vacancy on the Board of Directors.

—Feb.

*(1) Extra Dividend.—Announced Feb. 16, 1917, that this company had declared the regular quarterly dividend of \$1.50 and \$1 extra. The two previous declarations were \$1.50, \$1 extra and a special of \$1.

*(2) Report, Year Ended Dec. 31, 1916, shows net earnings of \$6,078,180, com-

pared with \$3,564,762 in previous year, \$484,600 in 1914, \$490,536 in 1913 and \$1,032,566 in 1912.

The 1916 net earnings were equal to \$15.40 a share, compared with \$9.27 a share in 1915, \$1.27 in 1914, \$1.25 in 1913, \$4.29 in 1912, \$2.04 in 1911 and \$3.38 in 1910.

*(3) Statement by President.—On Feb. 15, 1917, it was stated that Pres. Paine, in his annual remarks to stockholders, said, in part:

"The total production of copper from which this company's profits are derived, that is, Baltic, Trimountain and one-half of Champion, was 37,946,930 pounds. This is an increase over the previous year of 911,288 pounds.

"During the year \$337,371 was spent for construction, or about twice what was so spent in 1915. Five-eighths of a cent per pound of the cost of copper is represented by the construction expense. Detail of these expenditures is given later in the report. The main items are: The cost of new equipment at the stamp mills, representing further installations to obtain cheaper power and finer grinding; additional electrical equipment at the mines, and new dwellings for employees.

"An average price of 25.28 cents per pound was received for the year's output, which was all sold between October, 1915, and October, 1916. All sales subsequent to early last October have been made on account of 1917 production.

"The 1916 figures show net earnings for the Copper Range Co. of \$15.40 per share. Out of this amount, \$10 per share was paid in dividends and the balance added to working capital."

*(4) New Director.—It was announced Feb. 15, 1917, that Robert H. Gross had been added to the Board of Directors of this company.

—Mar.

*(1) Dividend.—See Champion Copper Co.—Item No. 1.

—Apr.

*(1) Earnings, Six Months, Estimated.—It was stated April 12, 1917, that record earnings were posted on the books of this company during the first quarter of 1917.

It is estimated that in the first half of 1917 Copper Range will earn about \$10 per share, or a full year's \$10 dividend requirements. Should the year-end surplus warrant, there will be an extra disbursement to stockholders, as was the case in December.

The Copper Range ownership of one-half of Champion has netted it \$960,000 thus far in 1917, or about \$2.40 per share on its own shares. An equal amount has gone to the St. Mary's Land Co. as owner of the other 50% of Champion shares. No distribution was made by Champion in January, but three dividends of \$0.40 per share each have since been paid.

The dissolution of the Trimountain Mining Co. has been ordered by the Michigan court, and the last 10 shares of Baltic Mining Co. stock have been rounded up. Copper Range soon will be an operating rather than a holding company.

*(1) Locomotive Orders.—See American Locomotive Co.—Item No. 3.

—Apr.

*(1) Report, Year Ended Dec. 31, 1916, shows: Gross revenues, \$2,911,207; operating expenses and taxes, \$1,142,536; operating income, \$1,768,671.

CORBIN COPPER CO.

*(1) New Director Elected.—At the annual meeting of this company April 17, 1917, Thomas S. Woods, of Newton, Mass., was elected to take the place of Thomas S. Byrne, of Butte, Mont. All the other directors were re-elected.

CORIELL, WILLIAMS & CO.,

NEW YORK.

*(1) Capital Increased.—On March 30, 1917, this company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$600,000.

CORNELL MILLS CORP.

*(1) Extra Dividend.—Announced March 22, 1917, that this company had declared the regular quarterly dividend of 2% and an extra of 2%, both payable April 2 to stock of record March 20.

CORN PRODUCTS REFINING CO.

*(1) Profits, 1916.—It was stated Feb. 5, 1917, that profits of this company for the year ended Dec. 31, 1916, after all charges including interest and depreciation, amounted to \$8,000,000, compared with an estimate of \$5,000,000 made by the company in the latter part of the year.

The regular pfd. dividend of 7% called for approximately \$2,100,000, leaving a balance of \$3,900,000 for the common, or 7.8% on that issue. During the year back dividends to the amount of 5% on the pfd. stock were paid off, leaving 14.88% unpaid. These remaining back dividends will be paid off as conditions warrant.

The Corn Products is doing a record business not only in earnings, but in production. In January its grind amounted to 3,750,000 bushels, or at the rate of approximately 130,000 bushels a day compared with normal average in past years of between 75,000 and 80,000 bushels daily.

The prosperity of the glucose industry is reflected in the fact that the entire grind of the country is now at the rate of 70,000,000 bushels a year, compared with about 50,000,000 in 1916.

Exports of the Corn Products Co. have been reduced about 25%, but this shrinkage has been more than taken up by home consumption. Therefore, interference with shipping would have less influence on the earnings of the Corn Products Refining Co. than would be the case if exports were running at record figures.

—Mar.

*(1) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Oper. prof.....	\$7,900,189	\$4,682,658
Bal. aft. chgs.....	\$6,083,746	\$3,168,360
Surp. after pfd. divs.....	2,961,922	1,677,024

*(2) Earnings on Stock.—It was stated March 6, 1917, that this company's 1916 balance after charges of \$6,083,746 is equal to 20.39% on the \$29,826,867 pfd. stock, compared with 10.62% earned on the same stock in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$13,306,248, compared with \$10,354,328 Dec. 31, 1915.

*(4) Comment on 1916 Report.—On March 8, 1917, the "Wall Street Journal" said that this company's 1916 report showed a remarkable gain in total income. That item amounted to \$8,281,600, almost double the \$4,906,375 total income in the previous year.

After deducting interest, taxes and depreciation, net income was \$6,084,764. This almost doubled the 1915 net and was equal to 20.39% on the \$29,826,867 preferred stock, compared with 10.62% earned in 1915.

This in itself came close to covering the full 7% dividend on the pfd. for the year and the 14.68% accumulated

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

dividends due on the major issue. Additions of \$2,951,922 made to surplus, after paying \$3,131,824 pfd. dividends, including \$1,491,345 in back dividends, raised the total surplus to \$13,306,248, compared with \$10,354,328 shown in the previous year.

Current assets totaled \$15,551,685 and current liabilities, \$3,972,743, leaving net working capital of \$11,579,542. Cash on hand amounted to \$2,566,975.

Should earnings continue at this rate over the rest of the year it will mean that on Dec. 31, 1917, there will be a balance equivalent to more than 12% on the common stock, after allowing for the full 7% dividends on the pfd. and a clearing up of all accumulations on that issue.

*(5) Dividends.—Announced March 23, 1917, that this company had declared a dividend of 5% on account of accumulations on the pfd. stock. The regular quarterly dividend of 1% on the pfd. stock also was declared. The dividends are payable April 16 to stock of record April 4.

Three months previously the company started paying off accumulated pfd. dividends with a declaration of 5%. It still has 9% pfd. accumulations to pay off.

*(6) Comment on Dividends.—On March 24, 1917, the "Wall Street Journal" said that earnings of this company were continuing at high records. In January and February, according to an authority, net profits after depreciation and interest charges, exceeded \$1,500,000, or at the rate of \$9,000,000 annually. In the full year 1916 the balance available for dividends was \$6,038,746, so that the increase in the first two months of 1917 was at the rate of nearly 50% above actual profits in the preceding year.

Regular pfd. dividends call for approximately \$2,088,000 annually, so that Corn Products Refining in the first two months of 1917 showed a surplus applicable to the common stock at the rate of approximately \$14 a share annually on that issue.

In view of the continued increase in earnings, it is safe to assume that all back dividends on the pfd. stock will be cleared up before the close of 1917.

—Apr.

*(1) Injunction Against Virginia Food Commissioner Sought.—This company April 14, 1917, filed a petition in the United States District Court in Richmond, Va., for an injunction against Food Commissioner Purcell, to restrain him from enforcing a ruling of his department prohibiting the sale of "Lassies" in Virginia.

This action was brought about by the claim of Commissioner Purcell that the label "Lassies" was misleading in that it conveyed the impression that the product was molasses, whereas it is a mixture of glucose and refiners' syrup. He further alleged that the label does not state, as is required under the Virginia law, that the product is a blend or compound of glucose and refiners' syrup.

In its petition the company declares that the product conforms to all national food laws and that the label now being used is accepted by the Government and all of the States, with the exception of Virginia.

*(2) March Business Largest in Company's History.—On April 26, 1917, the "Wall Street Journal" said this company established a new high record in monthly earnings and production in March. The company ground over 4,000,000 bushels of corn in that month. In 1916 the Corn Products Co. sold 230,000,000 pounds of Karo syrup and sales in 1917 are running ahead of 1916.

Although corn has been selling at record-breaking figures, there has been no advance in the price of syrup to the actual consumer, since the beginning of the European war. There has been no change in 1917 as the company covered its corn and tin can requirements in the latter part of 1916.

It is the intention of the Corn Products Refining Co. to pay off entire re-

maining back dividends on the pfd. stock in 1917.

*(3) Report, Quarter Ended March 31, 1917, compares as follows:

	1917	1916
Current profits.	\$3,673,215	\$1,474,029
Surp. after chgs.	2,972,009	1,055,634
Bal. after pfd. dividends ----	2,450,038	682,798

*(4) Earnings at High Levels.—On April 28, 1917, the "Wall Street Journal" said that this company's report for the quarter ended Dec. 31, 1916, shows that earnings are continuing at high levels, and running far ahead of expectations.

Net profits for the first three months of 1917 totaled \$2,450,038 after all charges, including preferred dividend of \$521,970. Net profits are running at the annual rate of \$9,800,000, compared with the 1916 net of \$6,083,746.

The surplus for the first quarter of \$2,450,038 is equal to \$3.85 a share on the common stock, after deducting the pfd. dividend of 1%, or at the annual rate of \$15.40 on the junior shares.

In the first quarter of 1916 the company reported a surplus of \$682,798, which was equal to \$1.50 a share on the common stock, after deducting the pfd. dividend, or at the annual rate of \$6 on the junior shares.

There are accumulations due on the pfd. shares amounting to 9½%, but it is expected that these will be cleaned up before the end of this year, thus paving the way for an initial disbursement on the common stock.

In its report the company points out that the dividend of 5% on the pfd. stock paid April 16 last on account of accumulated dividends, amounting to \$1,491,345, was disbursed from surplus and profits accrued prior to March 1, 1913.

The company also says: "Stockholders should realize that these unusually large profits are due to abnormal conditions and must not be regarded as an index to normal earnings."

CORONA COAL CO.

*(1) Coke Orders from Mexico.—A Birmingham, Ala., dispatch Jan. 2, 1917, stated that two new contracts for coke for Northern Mexico smelting interests had been closed by the Adler interests, which control the Corona Coal Co. and the Birmingham Fuel & Iron Co.

To help fill these contracts, old beehive coke ovens of the Pratt Consolidated Co. at Dora, Ala., for several years, will be placed in operation.

The Adler interests consummated a deal whereby they took over and operate the Townley mines of the Black Diamond Coal Co., at Townley, on the Frisco lines, in Walker County, between Carbon Hill and Jasper, Ala. The Townley mines will be developed so as to increase the output.

CORONA COAL & IRON CO.

*(1) Development.—It was announced at Birmingham, Ala., March 6, 1917, that this company is developing a mine in Walker County, Ala., north of Coal Valley, that will have about ten openings and will have, when in full operation, a daily production of between 2,500 and 3,000 tons. The equipment of the

new mine will cost more than \$250,000. The mine when in full operation will represent an investment of more than \$1,000,000.

CORONADO OIL CO., NEW YORK.

*(1) Capital Increased.—On April 4, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$1,000,000 to \$1,500,000.

CORONA GAS & ELECTRIC CO.

*(1) Report, Year Ended Dec. 31, 1916, shows gross operating revenue of \$28,012, net revenue of \$6,397, gross corporate income of \$7,484, and surplus after charges of \$6,430.

*(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$31,031, compared with \$24,600 Dec. 31, 1915.

CORONA SECURITY CORP.

*(1) Stock Dividend.—Announced Jan. 10, 1917, that California Commissioner of Corporations Carnahan had permitted this company to issue 5,700 shares as a stock dividend to present holders of 38,000 shares.

CORONET PHOSPHATE CO.

*(1) New President.—It was announced Jan. 24, 1917, that C. G. Memminger, who had been Vice-Pres. of this company, Coronet, Fla., since its organization, had succeeded A. A. Cowles as Pres.

CORPORATED FINANCING CO.

*(1) Incorporated in February, 1917, in Maryland, with a capital of \$300,000. Incorporators: J. Monroe Holland, Pres.; Chas. J. Boigiano, Sec'y and Treas.; Walter A. Frey, Vice-Pres. and Elmore B. Jeffery, Chairman of the Board.

CORPORATION OF FREDERICK

SCHOLES, MANHATTAN, N. Y.

*(1) Capital Increased.—On March 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$90,000 to \$300,000.

CORRECTIVE EATING SOCIETY, INC., NEW YORK.

*(1) Capital Increased.—On Feb. 21, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000 to \$250,000.

CORSON MFG. CO., LOCKPORT, N. Y.

*(1) Capital Reduced.—On Feb. 7, 1917, the company filed notice at Albany, N. Y., of a reduction in capital stock from \$650,000 to \$120,100.

* COSDEN & CO.

*(1) New Company Negotiations.—A report originating in Baltimore Jan. 3, 1917, stated that the formation of the largest independent oil company in the United States is under way. The company, according to present plans, will be built up around the Cosden Refining and Cosden Oil & Gas Co., and probably will include a number of the independent producers now in existence.

Recent presence of officials of the Cosden concerns in New York, including J. S. Cosden, has added to belief that plans for the combine are being worked out in New York.

The refining capacity of Cosden & Co. is approximately 30,000 barrels a day. The capacity will be increased to at least 50,000 barrels a day in the near future, giving the company close to the largest capacity of any single independent.

Cosden & Co. also have between 10,000 and 12,000 barrels of oil daily production, representing output of holdings which were not parted with when the Cosden Oil & Gas Co. was formed. This production, added to that of the Cosden Oil & Gas Co., gives the two companies an output of nearly 45,000 barrels a day.

The oil produced by the Cosden Oil & Gas Co. is largely from the Cushing

JANUARY 1 TO APRIL 30, 1917

pool and has been selling at a premium for some time because of its high gasoline content.

—Feb.

¹(1) **Sale.**—It was announced Feb. 5, 1917, that this company had closed a deal for the sale to Henry L. Doherty & Co., of New York, of a half interest in the Peerless Refining Co., of Cushing, Okla. The price was \$625,000, cash. The half interest of Cosden & Co. had been carried on its books at \$32,000.

Cosden & Co. have been interested in the Peerless Refining Co. for about 15 months.

²(2) **Extra Dividend.**—Announced Feb. 8, 1917, that this company had declared the regular quarterly dividend of 2% and an extra of 5%, payable Feb. 24 to stock of record Feb. 13.

³(3) **New Treasurer.**—See Cosden Oil & Gas Co.—Item No. 2.

—Apr.

⁴(1) **Merger Terms Agreed Upon.**—It was officially announced at Baltimore April 19, 1917, that the terms of consolidation of this company and Cosden Oil & Gas Co. had been agreed upon, the details to be given out later.

⁴(2) **Balance Sheet.**—As of Feb. 28, 1917. On April 20, 1917, Dow, Jones & Co. said: "The balance sheet of Cosden & Co., as of Feb. 28, shows current assets of \$3,197,179. Current liabilities aggregate \$2,134,845, leaving excess current assets of \$6,062,334, a total nearly \$500,000 in excess of the company's bonded debt. The outstanding capitalization of the company is \$5,752,870, and the value of its refineries, pipe line, tank cars, producing property, and investments is given in the balance sheet as \$9,145,000. The surplus of the company on Feb. 28 was \$3,657,230."

"The balance sheet indicates that the earnings for the last five months of 1916 were \$638,330 above all dividend payments. Adding to this the \$805,402 paid out in dividends, the total earnings for the last five months appear to have been \$1,443,732."

"The company issued a statement earlier in the year which showed net earnings for the first seven months of 1916 amounting to \$2,044,223."

"This would make total earnings as of Dec. 31, 1916, amounting to \$3,487,955, equal to 60.63% on the common stock."

• COSDEN OIL & GAS CO.

¹(1) **New Company Negotiations.**—See Cosden & Co.—Item No. 1.

¹(2) **Stock Issue.**—It was announced Jan. 11, 1917, that directors of this company had decided to issue approximately 431,881 additional shares of common stock and to offer them to stockholders at \$12.50 a share. The purpose of this issue is to reimburse the treasury of the company for large disbursements made by it in the discharge of obligations incurred in the purchase of property, to provide for further such payments in the near future, and for other corporate purposes.

This financing will largely relieve the company from the disbursement of considerable amounts of current earnings for capital purposes and leave a larger proportion of current earnings available for dividends.

It is officially stated the earnings of the Cosden Oil & Gas Co., based on the present price of crude oil, are running at the rate of more than 100% on the common stock (including the additional shares that are now being offered to stockholders) after deducting all fixed charges and the dividend requirements on the pfd. stock.

Plans call for offering the new stock to both the pfd. and common stockholders. Holders of a share of pfd. stock will be entitled to subscribe for substantially one-third of the amount to which the holder of a share of common stock will be entitled to subscribe.

Exact number of shares to which each stockholder will be entitled to subscribe cannot be fixed until the closing of the stock books, in view of the possibility of conversion of the company's bonds into common stock. Stock books

close on Jan. 18, 1917, and subscription warrants and fractional warrants are to be mailed thereafter to each stockholder of record on that date.

¹(3) **Bond Conversion Price.**—On Jan. 11, 1917, it was stated that as a result of the offering of 431,881 additional shares of common stock of this company at \$12.50 a share the conversion price for the company's 6% bonds had been lowered from 15 to 14.35.

—Feb.

²(1) **New Well.**—It was announced Feb. 1, 1917, that this company had drilled in a new well in the Cushing district of Oklahoma, flowing at the rate of 2,400 barrels a day.

²(2) **New Treasurer.**—Announcement was made Feb. 26, 1917, of the appointment of E. M. Rouzer, of Baltimore, as Treas. of this company, and of H. C. Williams, of Tulsa, Okla., as Treas. of Cosden & Co.

Both these positions were formerly held by John R. Cary, of Baltimore, who resigned also as director of Cosden & Co. to devote himself to charitable work.

Mr. Cary will be succeeded on the board of the latter company by C. I. Stralen of New York. Eugene Meyer, Jr., of New York, was elected director of the Cosden Oil & Gas Co. The meeting was held in Tulsa, Okla.

—Mar.

¹(1) **New Well.**—It was stated March 5, 1917, that this company had drilled a well on the Barnett Farm, in the Cushing district, flowing at the rate of 2,640 barrels daily.

²(2) **Extra Dividend.**—Announced March 7, 1917, that this company had declared a regular quarterly dividend of 2½% and an extra of 2½%, payable March 26 to stock of record March 14. This compares with 3¼% paid in the previous quarter.

—Apr.

⁴(1) **Merger Terms Agreed Upon.**—See Cosden & Co.—Item No. 1.

COSMOPOLITAN SHIPPING CO.

¹(1) **Incorporated** on Jan. 31, 1917, in Delaware, with a capital of \$1,000,000, to do a general ship brokerage business. Incorporators: Ansel M. P. Anderson, Samuel B. Howard and Arthur W. Britton, New York.

COSMOPOLITAN SHIPPING CO., INC., DOVER, DEL.

¹(1) **Incorporated** on Feb. 6, 1917, in New York, with a capital of \$1,000,000, to act as brokers, agents for shipowners, commissioners, etc. Representative: Jas. R. Munoz, 115 Broadway, Manhattan, N. Y.

COSTIKYAN CARPET CO.

¹(1) **New Plant.**—It was stated March 1, 1917, that this company, Lowell, Mass., had completed plans for the erection of its plant at an approximate cost of \$350,000. M. N. Costikyan is Pres. and Harold E. Wadley, Billerica, is Vice-Pres. The company has a capitalization of \$700,000.

COTTON HARVESTER MACHINE CO.

¹(1) **Incorporated** on March 27, 1917, in Delaware, with a capital of \$3,500,000 to manufacture cotton machinery of all kinds. Incorporators: Theodore F. von Dern, Edwin S. Merrill and Maurice Rubinger, all of New York.

COTTON (H. W.), INC.

¹(1) **Status.**—Announced Jan. 17, 1917, that this company, Woolworth Building, New York, recently incorporated with a capital stock of \$600,000, had taken over the business formerly conducted by H. W. Cotton in the Bush Terminal Building, Brooklyn. The plant there has 12,000 sq. ft. of floor space. The company is placing on the market a bench lathe and surface grinder and a bench grinder of cylindrical type for internal and external work. Part of the plant is devoted to the manufacture of special

and automatic machinery, also jigs, fixtures and gages as well as thread gages. H. W. Cotton is Pres.; William A. Courtland, Vice-Pres. and W. B. Morrell, Sec.

COWANVILLE ELECTRIC CO.

¹(1) **Change in Control.**—See Southern Canada Power Co., Ltd.—Item No. 1.

COWDEN OIL CO.

¹(1) **Incorporated** on Jan. 29, 1917, in Delaware, with a capital of \$500,000 to drill and operate for oil. Incorporators: Ferris Giles, K. M. Dougherty and E. Lynch, Wilmington, Del.

COWPER & METZGER CORP.

¹(1) **Incorporated** on Jan. 29, 1917, in Delaware, with a capital of \$1,000,000, to engage in a general investment brokerage business. Incorporators: W. B. Cooper, M. R. Jordan and F. W. Metzger, Cleveland, O.

• CRAMP (WM.) & SONS SHIP & ENGINE BUILDING CO.

¹(1) **New Vice-Pres.**—It was announced Jan. 25, 1917, that Henry S. Grove had presented his resignation as Pres. of this company to the directors, but the board prevailed upon him to reconsider his action and continue in the presidency "at least until the annual meeting in June." Mr. Grove agreed to do so.

H. B. Taylor, who had been Sec. to the Pres., was elected 2d Vice-Pres. and director, to succeed F. L. Hine, who resigned at the previous meeting of the board. The vacancy caused by the resignation of Albert Straus, of New York, was left unfilled.

—Feb.

²(1) **Bond Offering.**—Announced Feb. 1, 1917, that Wm. C. Williamson, Jr., Philadelphia, is offering \$250,000 of this company's consolidated mortgage 5% bonds, dated May 1, 1903, due July 1, 1923, at 99 and interest.

²(2) **Earnings Discussion.**—It was stated Feb. 23, 1917, that the annual report of this company, to be issued in March or April, likely would show about \$25 a share, compared with \$17 a share in the preceding year. It is believed dividends will be resumed on the stock in 1917. While earnings in 1916 were large, profits in 1917 are expected to eclipse all previous records.

That the shipbuilding industry is enjoying unexampled prosperity is evident from the fact that builders are inquiring of the steel companies for plates for delivery in 1919. Inquiries for ships for Europe are increasing.

One manufacturer says the shipbuilding companies will be kept busy for years after the war on account of the tonnage destroyed by submarines.

—Mar.

²(1) **Control.**—It was stated March 12, 1917, that control of a majority of stock of this company was still held by New York banking interests. If anything, these New York banking interests have added to their holdings, although transactions in the stock have been small, due to small floating supply. Several merger propositions have been submitted to majority interests of Cramp Co. without any definite decision being reached.

It is well understood that changes in personnel of the Cramp Co. will be made shortly, and that a plan which will give shareholders a good return on their investment is under consideration. The strong position of the company is reflected in the fact that contracts are being closed for ships for delivery in 1919. Some estimates of Cramp's earnings on its stock for the current calendar year run as high as \$40 a share.

²(2) **Profit on Government Contract.**—It was stated March 22, 1917, that this company had been awarded a contract for constructing two vessels for the United States Government at a cost of about \$6,000,000 each. That there will

JANUARY 1 TO APRIL 30, 1917

be a substantial profit in this business on a basis of 10% profit, is evident from the fact that the Cramp company will net a total of \$1,200,000, equal to \$20 a share on the 60,000 shares outstanding, it was stated. Distributed over a period of two and a half years, the time required to build ships, would mean \$8 a share annually on this Government contract alone.

It is estimated that Cramp Shipbuilding is earning at the rate of \$30 to \$35 a share on its stock.

²(8) Government Order.—See Union Iron Works.—Item No. 1.

³(4) Change of Control Probable.—It was stated March 23, 1917, that announcement might be made shortly of the outcome of negotiations looking toward the passing of control of this company. One proposition is under consideration by a prominent manufacturing corporation which is seeking control. As a matter of fact several offers have been made by different groups. Control of the 60,000 shares of stock is lodged with New York banking interests.

Government shipbuilding contracts closed by the Cramp Co. within the previous few weeks aggregated \$20,500,000 which based upon a 10% profit would mean \$2,050,000, equal to \$34 a share on the capital stock. Including merchant and Government ships and other work, the Cramp Co. is assured active operations for several years.

⁴(5) Passing of Control Denied.—On March 28, 1917, interests identified with the two large financial firms which had been most prominently mentioned in connection with the possibility of a change of control of this company said there was absolutely nothing in the published reports of negotiations looking toward that end. They also denied that control of the 60,000 shares of stock was lodged with New York banking interests. Apropos of this, the head of one of the financial firms referred to above was quoted as saying: "The company is owned entirely by the public. Some banking houses have held shares in the past, but they have been selling out and it is my opinion that the stock is now more widely held than ever before."

—Apr.

⁴(1) Earnings Discussion.—On April 5, 1917, the "Philadelphia News Bureau" said: "Considering the world-wide shortage in tonnage and the fact that shipping experts have within a week bid as high as \$225 for new tonnage contracts, it seems rather surprising that greater interest does not attach to the shipbuilding companies themselves. "One reason for this is, of course, that so many of the shipbuilding companies are either owned by larger corporations like Bethlehem Steel, or else, like Newport News, are ultra-close corporations."

"About the only large shipbuilding corporation in which the public has a speculative chance is Cramp Shipbuilding. This corporation will end its fiscal year on April 30 and the prospects are that the 12 months will disclose a balance above interest equal to about \$28 per share on the \$8,098,000 stock."

"In the 1915-16 year the company earned 17.8% for its stock against 10.6% in 1914-15."

"There is no denying the fact, however, that Cramp Shipbuilding, considering its miniature capitalization and immense prospects, has failed to make good in the big way which was at one time hoped."

⁴(2) Pres. Grove to Retire.—A Philadelphia dispatch April 14, 1917, stated that Pres. Henry S. Grove, of this company, had decided definitely to retire in June.

⁴(3) Election of Temporary President Planned.—On April 21, 1917, the "Philadelphia News Bureau" said: "It is expected that arrangements will be completed by the time of the June meeting of the Cramp Shipbuilding Co. stockholders for the election of L. S. Waring to the Board of Directors of the company."

"Mr. Waring is a member of Chandler Bros. & Co., and is in charge of their New York office. He is regarded as spokesman for the interests which some months ago were reported to have acquired a majority stock ownership in Cramps."

"Plans are also on foot to elect a temporary Pres. to succeed H. S. Grove, who will resign the presidency of Cramps at the June meeting. The new interests desire to induce a certain man of national prominence, considered one of the most capable industrial organizers in the country, to take the presidency, but it is feared that his duties will probably prevent his accepting the office for some time to come."

"It is because of this that a temporary Pres. is being considered. It is said that the American International Corp., when it made its investment in the New York Shipbuilding Co., turned down Cramps as changes in management to effect a more elaborate expansion program would not be considered at that time."

⁴(4) Dividends and Financing to Be Discussed at Meeting.—Dow, Jones & Co., April 27, 1917, stated: "A meeting of Cramp Shipbuilding interests is expected to be held in the near future at which the question of resuming dividends on the stock will be discussed. There will be some new financing in connection with retiring notes, etc., but this new financing will tend to reduce rather than increase fixed charges. The fiscal year of the Cramp Co. ends on April 30, 1917."

CREEDE MINES & MILLING CO.

⁴(1) Proposed Consolidation.—See Batchelder Mining Co.—Item No. 1.

CRESCENT BOXBOARD CO., SEATTLE, WASH.

¹(1) Incorporated on Jan. 10, 1917, in Washington, with a capital of \$300,000. Incorporators: A. H. Dougall, Jr., and Chas. A. Riddle.

CRESCENT CITY SLAUGHTER HOUSE CO.

¹(1) Sale.—See Morris & Co.—Item No. 1.

CRESCENT INSULATED WIRE & CABLE CO., NEW YORK.

⁴(1) Proposed Enlargement of Plant.—It was announced April 5, 1917, that this company was planning to enlarge its plant at Trenton, N. J., to provide increased capacity. The capital of the company was recently raised from \$250,000 to \$1,000,000.

CRESCENT PIPE LINE CO.

²(1) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net	\$193,072	\$187,269
Surp. aft. divs.	13,072	7,269

²(2) Earnings on Stock.—It was stated Feb. 13, 1917, that this company's 1916 net income of \$193,072 is equal to 6.43% on \$3,000,000 capital stock, against 6.24% on the same capitalization in 1915.

²(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$362,684, compared with \$349,613 Dec. 31, 1915.

CRESCENT TRANSIT CO., MENTOR, O.

²(1) Incorporated on Jan. 30, 1917, in Ohio, with a capital of \$450,000, to conduct a steamship line. Incorporators: Wm. Wisner White, W. C. Richardson, T. P. Howell, T. H. Garry and E. M. Crowe.

CRESSON CONSOLIDATED GOLD MINING & MILLING CO.

¹(1) Development.—It was stated Jan. 4, 1917, that this company, of Cripple Creek, Col., enjoys the novel distinction of more than earning its munificent dividend rate of 10 cents per share monthly, and extras, and is besides adding more ore than is being extracted.

Blocked out ore has shown an increase over extraction every month since the new management assumed

charge in September, and now stands at about four years' supply ahead of new development and extraction.

—Apr.

⁴(1) N. Y. Curb Market Warns Against Fraudulent Certificates.—The New York Curb Market Association on April 17, 1917, sent a warning to members telling of the existence of fraudulent certificates purporting to have been issued by this company and discovered by authorities of the association.

The fraudulent certificates have seal affixed, are dated 1902, but are minus the name of the transfer agent or registrar of the company. Valid certificates issued at New York bear the name of the Columbia Trust Co. as transfer agent and the Franklin Trust Co. as registrar. Those issued at the company's office in Colorado Springs bear name of Colorado Title & Trust Co. as registrar and must be exchanged for New York certificates at the transfer department of the Columbia Trust.

CROCKER-WHEELER CO.

¹(1) Common on 8% Basis.—Announced Jan. 13, 1917, that this company had declared the regular quarterly dividend of 2% on the common stock, placing it on an 8% basis. The dividend is payable Jan. 15. The regular quarterly dividend of 1% was also declared on the pfd. stock, payable Jan. 15. Books closed Jan. 5.

—Mar.

²(1) Earnings Statement, February, 1917.—It was stated March 14, 1917, that the February statement of this company shows an increase in surplus of about 7%, bringing the total surplus to more than \$850,000. The net earnings were larger than during any February since the organization of the company.

—Apr.

⁴(1) Extra Dividend.—Announced April 3, 1917, that this company had declared an extra dividend of 1%, in addition to the regular quarterly dividend of 2%, for the quarter ended March 31. The regular dividend of 1% was declared on the pfd. stock.

⁴(2) Record Earnings Made in First 1917 Quarter.—On April 18, 1917, the "Philadelphia Public Ledger" said this company, Ampere, N. J., made record earnings for the first quarter of 1917. The dividends on both classes of stock were earned for the year, and a substantial amount added to the surplus, which is near the million mark. At the present rate the profits, after paying dividends on the pfd. stock, represent \$44.17 per share for the year. The "book value" of the common stock on March 31, after setting aside the dividend for the pfd. stock, which is callable at 108, is \$151.43 per share.

CROCKETT (J. B.) CO., INC.

⁴(1) Incorporated on April 16, 1917, in New York, with a capital of \$650,000 to manufacture autos, airplanes, agricul-

This information, while not guaranteed, is believed to be correct.

tural implements and machinery. Incorporators: J. H. Stewart, H. Preston Coursen and I. W. Henry, 149 Broadway N. Y.

CROMPTON & KNOWLES LOOM WORKS.

*(1) Balance Sheet, as of Dec. 31, 1916, shows profit and loss surplus of \$600,000, compared with \$500,000 in 1915.

CROSSBY PETROLEUM CO. (THE).

*(1) Incorporated on April 6, 1917, in Delaware, with a capital of \$500,000, to drill for and produce oil and its products. Incorporators: Paul E. Britsch, Brooklyn, N. Y.; Arthur R. Oakley, Pearl River, N. Y., and Cornelius A. Cole, Hackensack, N. Y.

CROSS PLAINS & SANTA FE R. R.

*(1) Sale.—See Atchison, Topeka & Santa Fe Ry. Co.—Item No. 1.

CROWELL PUBLISHING CO.

*(1) Stock Offering.—It was announced March 14, 1917, that William P. Bonbright & Co., Inc., had purchased and were offering a block of \$500,000 of 7% cumulative pfd. stock of this company. The proceeds will be used for the development of Every Week, and for additions to the property.

The Crowell Publishing Co. now publishes The Woman's Home Companion, The American Magazine, Farm and Fireside and Every Week.

CROWELL & THURLOW STEAMSHIP CO.

*(1) Refinancing Probable.—On Feb. 14, 1917, the "Boston News Bureau" said that this company is seriously considering a financial revamping of its capitalization, to bring it more into line with earnings.

With only \$1,000,000 stock outstanding, par \$100 per share, the company is undoubtedly greatly under-capitalized, it is stated. As an alternative to too large a stock dividend, it is barely possible that bonds may be issued to stockholders. Directors meet in March for quarterly dividend action. It is officially indicated that the \$12.50 dividend in January does not necessarily mark the size of future quarterly payments.

Earnings for 1917 of the eight Boston steamers belonging to the company, according to latest estimates, will equal more than \$300 per share.

—Mar.

*(1) Extra Dividend.—Announced March 8, 1917, that this company had declared the regular quarterly dividend of 2½% and an extra of 10%, payable March 31.

CROWN OIL CO.

*(1) Incorporated on March 29, 1917, in Delaware, with a capital of \$3,000,000 to drill and bore for oil and dispose of same. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

*(2) New Company—Stock Issue.—It was announced April 10, 1917, that this company, incorporated in Delaware with a capital of \$3,000,000, divided into 3,000,000 shares, with 2,000,000 shares in the treasury, par \$1, fully paid and non-assessable, had been organized with the following officers: Pres., Dr. A. Gatiliff, Pres. Gatiliff Coal Co., and of Cumberland College, Kentucky; 1st Vice-Pres., James A. Wallace, Cashier Farmers' Bank, Estill, Ky.; 2d Vice-Pres., Benj. V. Hole, oil operator and railroad contractor, Burlingame, Cal.; Secy., Charles D. Pratt; Treas., Wm. P. Williams; Joseph D. Purdy, E. L. Stephens, Thomas B. Crary and Donald Woodward.

The company, which is an oil-producing company, owns and controls under lease 51,273 acres in Kentucky, located in Estill, Whitley, Jackson, Leslie, Grayson, Wolf, Lee, Laurel and other counties. It is negotiating for other acreage in Oklahoma. It originally was a consolidation of the Trinit Oil & Gas

Co. and the Tellico Oil & Gas Co. of Kentucky. Its intention is to bring together under one management further holdings in the Irvine and other fields in Kentucky, thus reducing operating expenses to a minimum.

Less than 1% of the holdings so far have been developed. The company has three drilling rigs under contract and plans to increase this number to six. Present production is estimated in excess of 300 barrels daily. A circular states dividends are being paid at the rate of 1% monthly. Current earnings are reported as equivalent to four times dividend requirements.

For the purpose of acquiring more property and increasing operations directors have authorized the issuance of 500,000 shares of treasury stock. The shares are traded in on the New York Curb.

*(3) Production Increased to 550 Barrels Daily.—On April 18, 1917, it was announced by officers of the Crown Oil Co., of Kentucky, that they had acquired an additional acreage of 100 acres in the heart of the Irvine pool with a production of over 200 barrels daily from three wells, giving this company a total production to date of about 550 barrels.

Less than 1% of the company's holdings are developed to date. The oil produced grades as Somerset and is sold to the Cumberland Pipe Line, whose lines run right through the Crown Oil Co. property, at \$2.18 per barrel, giving an income of about \$1,200 per day.

The same day it was announced that two new wells, one running at 9 barrels per hour, and one at 22 barrels per hour, had been brought in on Leonard Ross Farm, which lies immediately between two of the Crown Oil Co. leases. A contract has been let for drilling three wells on these two leases which probably will be brought in within a month, augmenting the considerable production of this company.

*(4) Extra Dividend of 1%.—On April 18, 1917, officers of this company announced that on account of the acquisition of increased production directors had deemed it advisable to declare an extra dividend of 1% for May. This places the stock on a 2½% dividend-paying basis, they stated.

● CROWN RESERVE MINING CO., LTD.

*(1) Dividend Resumed.—Announced Jan. 5, 1917, that this company had declared a dividend of 5%, payable Jan. 15 to stock of record Dec. 28, 1916. This is the first dividend declared by this company since August, 1915.

*(2) Option.—It was announced Jan. 4, 1917, that the O'Donald group of claims comprising approximately 190 acres of mining land, situated between the Boston Creek gold mine and the Boston Hollinger property, had been placed under option to H. J. Stuart, representative of this company.

The option price is well up in six figures. A force of men have already commenced surface work and erection of camp buildings, preparatory to carrying on an extensive development campaign.

*(3) Report, Year Ended Dec. 31, 1916, It was stated Jan. 24, 1917, showed gross profits from mining amounted to \$191,822.34, while mining and milling costs totaled \$188,849.06, leaving a net profit of \$2,974.

The revenue from investments, the chief of which is the Porcupine-Crown stock, amounted to \$145,414. Costs of administration were \$22,487, and dividend disbursements accounted for \$88,441. Silver on hand was estimated at 2,498 ounces.

CROW'S NEST PASS COAL CO.

CRUCIBLE CLAY CO.

*(1) Incorporated on Feb. 15, 1917, in Delaware, with a capital of \$2,000,000, to acquire lands containing oil, clay, coal, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

● CRUCIBLE STEEL CO. OF AMERICA.

*(1) Projectile Bids.—See Hadfields, Ltd.—Item No. 1.

*(2) President Ramsey Dead.—Announced Jan. 11, 1917, that C. C. Ramsey, Pres. of this company, had died in the Allegheny General Hospital in Pittsburgh on this date. He had been ill for six weeks, a victim of lobar pneumonia.

*(3) Deferred Dividend.—Announced Jan. 16, 1917, that this company had declared a dividend of 2% on the pfd. stock on account of back dividends, payable Feb. 28.

*(4) New President.—Announced Jan. 16, 1917, that Herbert Du Puy, formerly chairman of the Executive Committee, had been elected Pres. of this company to succeed Mr. Ramsey, deceased.

—Feb.

*(1) New Addition.—It was stated Feb. 14, 1917, that this company had completed plans for the erection of a new one-story addition to its plant at Harrison, N. J., at an estimated cost of \$400,000.

*(2) Deferred Dividend.—Announced Feb. 16, 1917, that this company had declared the regular quarterly dividend of 1¾% on the pfd. stock and a dividend of 1¾% to apply on deferred dividends, payable March 31 to stock of record March 16.

*(3) Shell Contract.—See Midvale Steel & Ordnance Co.—Item No. 2.

*(4) New Director.—Announced Feb. 24, 1917, that T. Hart Given, Pres. of the Farmers' Deposit National Bank of Pittsburgh, had been elected a director of this company to fill the vacancy caused by the death of C. C. Ramsey.

—Mar.

*(1) Deferred Dividend.—Announced March 17, 1917, that this company had declared a dividend of \$2 a share on the pfd. stock, on account of back dividends, payable April 28 to stock of record April 16.

—Apr.

*(1) Extra Dividend on Pfd.—This company on April 16, 1917, declared an extra dividend of 3% on account of back dividends on the pfd. stock payable May 10 to stock of record May 6.

This compares with 2% declared on that account in March and brings the total in 1917 on account of back dividends to 10½%, reducing the amount owing on account of back dividends to 6%.

CRUSE SYNDICATE, LTD.

*(1) Taken Over.—See Trinidad Central Oilfields, Ltd.—Item No. 1.

CRYSTAL GLASS CASKET CO.

*(1) Incorporated on March 9, 1917, in Delaware, with a capital of \$1,000,000, to manufacture and sell caskets, vaults, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CRYSTAL OIL CO.

*(1) Extension.—It was announced Jan. 19, 1917, that this company, affiliated with the Sinclair Oil & Refining Corp., had placed a contract to lay 500 miles of pipe line from Ardmore, Okla., to Houston, Tex., costing \$5,000,000. It is to be completed in 1917.

Sinclair interests have secured a concession to exploit 1,000,000 acres of supposed oil lands in Costa Rica.

● CUBA CANE SUGAR CORP.

*(1) Reports Favorable at Annual Meeting.—It was stated Jan. 8, 1917, that

JANUARY 1 TO APRIL 30, 1917

stockholders of this company at the annual meeting received favorable reports on the prospects for 1917. Leandro Rionda, general manager of the combine, stated that the new crop, while late, was in a flourishing condition and that the grinding was proceeding at a good rate. He estimated that the crop for the new season, exclusive of the Stewart mill, would be 3,500,000 bags, or about 400,000 greater than the previous season. Including the Stewart plantation, the output, he estimated, would be 4,000,000 bags.

One of the stockholders who inquired as to the safety of the 7% dividend on the \$50,000,000 pfd. stock was informed that this dividend was amply secured on the basis of any price for sugar which prevailed in past years. Albert Strass, Chairman of the Board, pointed out that in the first year of operation the corporation earned a surplus which could have been paid out on the common stock.

Transportation facilities are being taxed to the utmost, but the arrival on the island of new rolling stock is expected to relieve the situation.

The Cuba Cane Sugar Corp. owns its own freight cars and has purchased 200 new cars for delivery in 1917.

Shipping contracts have been made at advantageous rates for 2,000,000 bags.

The Board of Directors was reduced at the meeting from 24 to 22 members. Two resignations occurred during the year and the remaining directors were re-elected. The shares voted were 608,449, out of a total of 1,000,000.

Jan. 12, 1917, was fixed as the date for the directors' reorganization meeting.

—Mar.

¹(1) Locomotive Orders.—See Baldwin Locomotive Works.—Item No. 3.

¹(2) Damage in Cuba Slight.—It was stated March 20, 1917, that an interest identified with the Cuban sugar industry had reported that the damages to the property of this company as a result of the revolution in Cuba had been slight. All the plants of the company, with the exception of one, are in operation.

¹(3) Forecast of Earnings.—On March 27, 1917, the "Wall Street Journal" said that this company was almost certain to experience a year of record profits in 1917. The expectation of a 4,000,000-bag crop will hardly be realized. On the other hand, some of the pessimistic reductions in output to 2,500,000 bags will be materially exceeded.

At the moment it looks very much as if Cuba Cane could count upon a minimum crop this grinding season of 3,500,000 bags. On this basis and assuming the very low profit of \$5 per bag the corporation would show total net of \$17,500,000, against \$14,729,087 in 1916. Deducting \$6,000,000 for preferred dividends, depreciation and dead season expenses would leave a balance of \$23 per share for the 500,000 shares of common.

On the basis of a profit of \$6 per bag, which many judges feel is likely to be the minimum showing for the year, Cuba Cane would earn \$32 per share for its common. In 1916 Cuba Cane earned \$19.70 per share of common, so that with \$23 earned this year the company in two years would have piled up a common share balance of \$42.70, which is practically the current market quotation for the shares.

As a matter of fact, the common had a book value of \$28 per share at the close of 1916, and this promise to be enhanced by \$25 more this year to a total of over \$50 per share by December 31 next. The revolution has inflicted only the slightest property damage to this big sugar combination for the reason that the great majority of its 17 centrals are outside the troubled zone. Had everything gone smoothly a 4,000,000-bag crop was a possibility. For 1918 the management expected 4,000,000 bags, but these figures, too, are likely to have to be somewhat scaled down.

—Apr.

¹(1) Prices Better.—It was stated April 2, 1917, that this company is getting an

average of one-half cent per pound higher prices for its raws than a year previously. When Cuba Cane was formed it was found that previous owners of individual centrales had sold futures heavily at rather low prices. Consequently Cuba Cane's average selling price in 1916 was not especially good and was below what many other sugar producers realized. In 1917 average selling price should be enough higher to at least offset increased cost of production.

¹(2) Crop Estimate—Dividend Discussion.—On April 13, 1917, the "Boston News Bureau" said that production had progressed to a point where this company's officials are reasonably sure of a crop this grinding season of between 3,500,000 and 3,600,000 bags. This is 10% to 12% less than expectations formed at the close of the 1916 season. But considering the plethora of adverse factors which have interrupted Cuban production in 1917, it is a highly favorable record.

If realized it would mean a crop 400,000 bags larger than the 3,174,000-bag production of the 1916 year. This increase is 100,000 bags less than the anticipated increase that was to flow from the purchase of the big Stewart property.

If Cuba Cane produces a 3,500,000 to 3,600,000-bag crop it should earn between \$24 and \$30 per share. The lower figure contrasts with a balance of \$19.70 for the common in 1916 and is after allowing \$1,000,000 for dead season expenses.

It has been highly significant that Cuba Cane common shares have held so firm all through the recent market troubles. The inauguration of common stock dividends some time during the Summer of 1917 is not unlikely.

CUBA DEVELOPMENT CO.

¹(1) Incorporated on April 17, 1917, in Delaware, with a capital of \$1,000,000, to deal in and with stocks, bonds, etc. Incorporators: Herbert E. Laiter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CUBAN INDUSTRIAL ORE CO.

¹(1) Incorporated on Feb. 19, 1917, in Delaware, with a capital of \$1,000,000, to carry on business of mining. Incorporators: Herbert E. Laiter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CUBAN OIL CO.

¹(1) New President.—Announced March 12, 1917, that Louis E. Waring had been elected Pres. of this company, succeeding Dr. C. Hayes, deceased.

CUBAN PORTLAND CEMENT CO.

¹(1) Construction Work.—It was stated Jan. 23, 1917, that construction work on this company's plant at Mariel, Cuba, is progressing satisfactorily.

A recent visit to plants of the concerns manufacturing the various materials and machinery which will be used in the Cuban Portland Cement plant showed that little, if any, delay would be encountered in connection with deliveries as promised.

The present outlook is that the plant will be in operation in the Summer of 1917.

A good organization of experienced cement engineers and operators is on the ground and the work is being pushed as rapidly as possible, with comparatively little inconvenience, notwithstanding the present scarcity of labor in Cuba.

—Apr.

¹(1) Initial Financial Statement.—This company, incorporated under the laws of Massachusetts, filed with the Massachusetts Secretary of State April 12, 1917, an initial statement of its financial condition, dated Dec. 31, 1916, which follows:

Assets—	1916

CUNARD STEAMSHIP CO., LTD.

(1) Contracts.—See Sun Shipbuilding Co.—Item No. 1.

—Apr.

(1) Proposed Steamship Orders.—Reported on March 30, 1917, that this company was planning to place orders in the United States for 114 passenger steamers to cost \$120,000,000.

CURTISS AEROPLANE & MOTOR CORP.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

(1) Note Offering by Syndicate.—It was stated Jan. 19, 1917, that a syndicate, composed of William Morris Imbrie & Co., Bertron, Griscom & Co. and A. B. Leach & Co., would offer for sale Jan. 22 \$2,000,000 of this company's first and convertible serial 6% notes, maturing from 1918 to 1922.

For 1916 the net profits were at the rate of approximately 17 times the interest requirements of this issue. These notes are followed by an equal amount of 10-year debentures and by pfd. and common stocks, with a combined market value of approximately \$8,000,000.

—Feb.

(1) Merger Plan Reported.—See Wright-Martin Aircraft Corp.—Item No. 4.

—Mar.

(1) Merger Discussion.—See Wright-Martin Aircraft Corp.—Item No. 2.

(2) Government Order.—It was announced March 12, 1917, that the United States had taken the first step toward the formation of a dirigible airship navy when the Navy Department bought 16 of the non-rigid type. The contracts were awarded as follows: Curtiss Aeroplane & Motor Co., Buffalo, three, with power plants, for \$122,250; Connecticut Aircraft Co., New Haven, two for \$84,000; Goodyear Tire & Rubber Co., Akron, O.; nine for \$380,000; and B. F. Goodrich Co., Akron, two for \$83,000.

(3) Merger Plans Abandoned.—See Wright-Martin Aircraft Corp.—Item No. 3.

—Apr.

(2) Government War Orders.—The "Wall Street Journal" April 24, 1917, stated that this company had received another large order from the British Government. A deal is on for a \$50,000,000 order from the United States Government.

CURTISS SECURITIES CO., NEW YORK.

(1) Capital Increased.—On Feb. 1, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$10,000,000 to \$15,000,000.

CUSHING OIL & REFINING CO.

(1) Incorporated on March 14, 1917, in Delaware, with a capital of \$3,000,000, to engage in boring for and refining of oils and metals of all kinds. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

CUSHING PEMETA OIL & GAS CO.

(1) Incorporated on Jan. 18, 1917, in Delaware, with a capital of \$1,200,000, to produce and sell pemeta. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Horty, Wilmington, Del.

DALLAS ELECTRIC LIGHT & POWER CO.

(1) Sale Planned.—Announced April 12, 1917, that plans had been prepared by J. F. Strickland for the organization of a corporation to acquire the Dallas Electric Light & Power Co. plant and properties at \$4,400,000. The municipal franchises provide for \$1,000,000 expenditure for improvements and extensions within 18 months, and \$1,000,000 additional within 42 months thereafter.

DALLAS & WACO RY. CO.

(1) Bondholders' Protective Committee.—It was announced Feb. 6, 1917, that a protective committee for the Dallas & Waco first 5s had been formed by holders who are afraid that without concerted action they may not obtain proper recognition in the pending reorganization.

Holders of the issue are invited to deposit bonds with the Equitable Trust Co., New York. Theodore H. Banks, Vice-Pres. of the American Exchange National Bank, New York, is chairman of the committee.

DALLEMAGNE CHIMNEY CONTROL CORP.

(1) Incorporated on March 19, 1917, in New York, with a capital of \$300,000, to deal in devices for extinguishing sparks, arresting, collecting and utilizing soot and clinders, controlling and utilizing smoke, vapors, gases and fumes. Incorporators: M. Hotchner, B. J. Von Jenny and J. S. Zelaya, 446 Central Park West, New York.

DAMASCUS BRAKE BEAM CO.

(1) Common on 10% Basis.—Announced Jan. 19, 1917, that this company had declared a dividend of 10% on the common stock for 1917, payable in quarterly instalments April 1, July 1, Oct. 1 and Jan. 2, 1918.

DANBURY-BREWSTER LUMBER CO.

(1) Two Companies Purchased.—On April 18, 1917, this company completed a deal whereby it acquired the business and property of the Peck-Burkett Lumber Co., Danbury, Conn., and also the business and property of John H. McQuay, Brewster, N. Y.

DANLEY MACHINERY EXCHANGE, SEATTLE, WASH.

(1) Change in Name.—Notice was filed at Olympia, Wash., Dec. 31, 1916, of the change in name of this company to the Washington Machinery & Equipment Co.

DAN-MAR CORP. (THE), MANHATTAN, N. Y.

(1) Capital Increased.—On March 19, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$25,000 to \$350,000.

JANUARY 1 TO APRIL 30, 1917

DANVILLE KNITTING MILLS.

⁽¹⁾ Capital Increased.—Announced March 14, 1917, that this company, Danville, Va., had increased its capital stock from \$300,000 to \$650,000.

DARBONNE LUMBER & OIL CO.

⁽¹⁾ Incorporated on April 14, 1917, in Delaware, with a capital of \$1,000,000, to deal in and develop timber and oil lands. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

DARLING CONSOLIDATED MINES CORP., PHOENIX, ARIZ.

⁽¹⁾ Incorporated in February, 1917, in Arizona, with a capital of \$1,275,000. Incorporators: Clarence E. F. Hiltrick, Geo. F. Baright, Ed. B. De Witt, Fred. J. Groehl, Joseph P. Caples and Paul Morse Richards.

DATE CORP. OF AMERICA (THE).

⁽¹⁾ Incorporated in February, 1917, in Nevada, with a capital of \$1,000,000. Directors: C. Barkheim, L. C. White and C. A. Strong.

DAVIDSON GOLD MINES, LTD.

⁽¹⁾ New Strike.—It was announced at Toronto, Ont., Feb. 19, 1917, that a number of directors of this company had gone to the Porcupine camp of this company to inspect the new discovery made on the 100-foot level and which appeared to be one of the most important developments in the history of the company.

Confirmation was received of the favorable nature of the find, further wires from the mine manager stating that from six to seven inches of high-grade ore had been cut and that it was very spectacular and evidently carried values of several thousand ounces of gold to the ton. Development is now proceeding in order to prove the extent of the vein.

—Mar.

⁽¹⁾ Diamond Drilling Planned.—It was stated March 21, 1917, that the management of this company had completed plans for a diamond drilling campaign for the purpose of exploring the property at depth. Down to the 300-foot level the ground has been proved to be rich in milling ore, and at several levels crosscutting and drifting has opened up large and extensive veins.

—Apr.

⁽¹⁾ Producing Basis Reached.—This company, said the "Toronto World" April 14, 1917, had been developed so rapidly since it had been taken over a year previously that it practically had reached a producing basis.

A surface vein 400 feet long and 12 to 15 feet wide of spectacular values proved to persist on development. A shaft was driven down to 317-foot level and crosscutting on 100-foot, 200-foot and 300-foot opened up the vein. On the 100-foot level the vein had widened to 20 feet, carrying ore ranging in value from \$10.80 to \$312.

On the 200-foot level the vein was 40 feet wide and ranged in value up to \$30. The most gratifying results came from the 300-foot level, where the vein had widened to over 100 feet.

DAVIS COLLIERY CO.

⁽¹⁾ Readjustment.—See Coal & Coke Ry.—Item No. 1.

DAVIS COAL & COKE CO.

⁽¹⁾ Operating As Independent Co.—It was announced at Baltimore March 15, 1916, that this company had been formally severed from the Western Maryland and on that date commenced operations as an independent corporation. A. W. Galloway has been elected Pres., he having held the position for years. E. P. Stewart was elected Sec'y & Treas., and Carl F. Diller Asst. Sec'y. John M. Dennis was elected a director.

The Western Maryland will continue to handle the bulk of the coal output of the Davis Coal and Coke Co.

DAVIS-DALY COPPER CO.

⁽¹⁾ New Hoist in Operation.—It was stated Jan. 10, 1917, that this company, after months of waiting, finally had installed and had in operation its new hoist that will mean a great increase in production and earnings.

On Jan. 3 the last load of ore was dumped at 6 o'clock from the old hoist. A force of 100 carpenters, mechanics, rope men, shaft men and others began the work of dismantling the old hoist. For 24 hours the men worked, changing shifts at the end of each four hours in order that there should be no delay.

On Jan. 4 the new hoist was ready to operate, and raise the first car of ore from the 2,500-ft. level to the surface. The change was made just one day later than Gen. Mgr. Credon predicted.

The new hoist is designed to handle the following loads: 7,000 pounds of rock, 8,300 pounds of skip and cage, 8,000 feet of rope, total rope pull, 23,300 pounds. Depth, 4,000 feet. Hoisting speed, 2,000 feet.

Instead of approximately 100 tons per day, the Davis-Daly can now hoist 500 tons of ore. It is planned to hoist 200 tons of zinc ores per day, which will be handled at the Ophir mill, and 300 tons of copper ores, which will be sent to the Washoe smelter.

⁽²⁾ Hesperus Vein Development.—A Butte, Mont., dispatch Jan. 11, 1917, stated that development of the Hesperus vein at 2,400 level of the Colorado mine of this company had opened richest ore body ever encountered in the mine and probably one of richest strikes made in district in years.

In northwest cross-cut vein shows width of 11 feet, assaying 32% copper and 20 ounces of silver. In southeast cross-cut it shows four feet of face, assaying 10% copper. Drift on 2,400 level has been extended 170 feet on 2,500 level. Large body of ore averages 12% copper.

—Feb.

⁽¹⁾ Operations.—It was stated Feb. 5, 1917, that this company had ordered 50 additional mine cars. A third cage car will be added to each of the two shafts. Leaders have begun work at the Fly-mouth shaft.

The body of glance and bornite ore opened Jan. 9 on the 2,400-foot level still is in evidence 9½ feet, averaging 24% with as many ounces of silver.

⁽²⁾ Report, Quarter Ended Dec. 31, 1916, shows total receipts for the period were \$146,822 and total expenses \$142,595, leaving a credit balance of \$4,227.

During the quarter, development work totaled 1,208 feet, comprising 534 feet of drifts and 674 feet of crosscuts.

—Mar.

⁽¹⁾ Operations.—It was announced March 6, 1917, that the installation of the skips at this company's new hoist had been completed and that production of the Colorado would be largely increased during March, 1917. The company will send about 200 tons of zinc ores per day to the Butte-Detroit reduction plant and about 500 tons of copper ores per day to the Washoe smelter. Earnings are now running over \$50,000 per month above all expenses and this will soon enable the company to pay all its present indebtedness.

⁽²⁾ Improvements.—It was stated March 22, 1917, that this company had started two new compressors which would enable it to increase output at Colorado mine immediately to 200 tons per day of copper ores in addition to 50 tons per day of high-grade zinc ores. Zinc ores are running 15% to 18% zinc. Operating profits for February were estimated at \$35,000, as against \$25,000 in January. March operating profits were placed as close to \$50,000.

—Apr.

⁽¹⁾ Shipments.—It was stated April 3, 1917, that at the Colorado mine of this company shipments of copper were averaging 170 tons per day. The shipments of high-grade ores to the Butte Detroit mill are running from 50 to 75 tons per day. The latter ores are run-

ning from 15% to 18% zinc. During March ten cars of concentrates averaging over 50% zinc were shipped from the Butte Detroit mill, as the output of the Davis-Daly mine. Two new air compressors have been installed and put into operation at the Colorado mine.

The operating profits for February were over \$35,000, as against \$25,000 earned in January.

⁽²⁾ Operating Profits, March, Estimated.—On April 13, 1917, an estimate of the final figures for March placed this company's operating profits for March at \$58,000, against \$35,000 in February and \$25,000 in January. Shipments of high-grade ore from the mine continue.

⁽³⁾ Operations Extended.—On April 17, 1917, the "Boston Daily Advertiser" said that the opening up of the Hibernia property, belonging to this company, would be started in 1917. The plan will embrace sinking to the 100-foot level, with crosscutting at that level and also at the 500-foot level.

It is believed that the Hibernia may yet prove the richest producer of the Davis-Daly, as it is located directly on the Rainbow lode.

DAVIS MILLS CORP.

⁽¹⁾ Increased Dividend.—Announced Jan. 17, 1917, that this company had declared a regular quarterly dividend of 3%, payable March 24 to stock of record March 10. The last previous quarterly dividend was 1½%, followed by an extra of 2%.

—Apr.

⁽¹⁾ Stock Dividend Recommended.—Directors of this company April 16, 1917, voted to recommend to the stockholders an increase in capital to \$1,875,000 from \$1,250,000 by a stock dividend of 50%. The regular quarterly dividend of 3% in cash was declared. It is payable June 23.

DAVISON CHEMICAL CORP.

⁽¹⁾ Bond Issue for Developing Cuban Properties.—A Baltimore dispatch on March 13, 1917, stated that definite steps had been taken by the Board of Directors of the Davison Chemical Co. for financing the development of the Cuban properties owned by it. Money for this purpose is to be raised through the issuance of \$2,500,000 10-year 6% sinking fund convertible bonds. The primary security for the bonds will be the Cuban and Florida properties. The bonds will be further secured by the unconditional guarantee of the Davison Chemical Co. The Davison Chemical Co.'s existing property at Curtis Bay will be free from liens and free from debt of all kinds, save an amount about equal to its inventory bills receivable and other current assets.

The sinking fund will be \$125,000 annually, together with \$1 per ton on all ore, making about \$275,000 annually. The bonds will be convertible for a period of five years into the Davison Chemical Corp. stock at \$60 per share.

These bonds will be offered to the stockholders of the Davison Chemical Corp. The entire amount of bonds or such part as stockholders do not take has been underwritten by the Mercantile Trust & Deposit Co., of Baltimore.

⁽²⁾ Charge of Fraud in Reorganization.—In a bill of complaint filed in the Circuit Court at Baltimore, Md., on March 26, 1917, eleven stockholders of the Davison Chemical Co. asked that the company be forced to disclose financial arrangements of the increase in capital stock made in 1913 and of the incorporation of the Davison Corporation in New York State. They alleged a false inflation of share values and a fraudulent scheme of reorganization.

The bill declares that "the initial step in the gigantic and progressive scheme perpetrated upon the investing public by the manipulation of the stock of the company" was taken in calling a meeting of the stockholders of the Davison Chemical Co. on April 14, 1913, for the purpose of increasing the company's capital stock.

JANUARY 1 TO APRIL 30, 1917

A decree is sought to prohibit the Davison company from guaranteeing in any manner the bonds of the Davison Sulphur & Phosphate Co., to require a statement under oath of the cost and value of that company and the profit made and to be made by the officers of the company. The court is asked to require the company to disclose in detail every contract and agreement made with Kissel, Kinnicutt & Co., Dominick & Dominick, Ladenburg, Thalmann & Co. and Robert Garrett & Sons in the flotation of 110,000 shares of the stock of the corporation on the market and the issuance of 40,000 of the corporation's shares to the holders of 21,000 shares of the company's stock.

The complainants want to know in detail the entire assets of the corporation, their cost to the company and the method by which the corporation's assets of approximately \$5,000,000 were inflated, at the time of the marketing of the 110,000 shares, to \$11,950,000. They ask that a receiver be appointed for the Maryland assets of the corporation, if that should be necessary for the protection of the complainants' interest.

—Apr.

*(1) New Director.—Announced on April 5, 1917, that A. H. S. Post, Pres. of the Mercantile Trust & Deposit Co., had been elected to the board and to the executive committee of this company. The Mercantile Trust recently bought the issue of \$2,500,000 of 10-year bonds this company issued on its Cuban property and brought the company in close identity with the Davison Company and a place on the board was provided.

DAVOL COTTON MILLS CORP.

*(1) Extra Dividend.—Announced Jan. 22, 1917, that this company had declared an extra dividend of 3%, payable on demand to stockholders of record Jan. 18.

DAYLIGHT CINEMA CORP.

*(1) Incorporated on Feb. 8, 1917, in New York, with a capital of \$250,000, to engage in a motion picture film and theatrical business. Incorporators: J. P. Robertson, A. R. Brissel and A. R. Grossman, 263 West 112th St., New York.

DAYLIGHT EQUIPMENT CO.,
WILMINGTON, DEL.

*(1) Incorporated.—On April 13, 1917, in Delaware, with a capital of \$600,000, to manufacture automobiles and parts. Incorporators: F. D. Buck, M. L. Horty and K. E. Longfield, Wilmington.

DAYTON ADDING MACHINE &
TIME LOCK CO., DAYTON, O.

*(1) Incorporated on March 5, 1917, in Ohio, with a capital of \$2,000,000. Incorporators: Geo. L. Baker, R. M. Wack, M. A. Fanning, R. L. Blagg, J. A. Dewald and others.

DAYTON AIRPLANE CO.,
DAYTON, O.

*(1) Incorporated on April 11, 1917, in Ohio, with a capital of \$500,000. Incorporators: Edward A. Deeds, Harry E. Talbot, Chas. F. Kettering, Harold E. Talbot, Jr., and Orville Wright.

DAYTON COAL & IRON CO.

*(1) Sold.—Announced March 16, 1917, that this company had been sold to Francis C. Gary and associates, of Minneapolis, for \$400,000, with the agreement that the purchaser spend \$100,000 on improvements before the court grants the deeds.

*(4) Statement by President.—It was announced Feb. 26, 1917, that Pres. Tait, of this company, in his annual statement to stockholders, said: "The last year has been an abnormal one in many respects, and particularly noticeable in the large increase in operating expenses of the company, brought about chiefly by the high cost of coal and materials."

"It is not expected that the company's business will be adversely affected by the return of more normal industrial conditions in 1917, and it is confidently predicted that the business of 1917 will be satisfactory."

"During the past year the company added 11 towns and villages to its connections, so that now it supplies some 36 communities. The number of customers increased 3,989 during the year and the load went up 16,511 horsepower. The greater part of this was in the industrial power end, which increased from 28,985 connected horsepower to 30,950, while the total kilowatt-hours generated by the company rose from 44,138,552 to 72,790,810."

D. & C. CO.

*(1) Incorporated on Jan. 20, 1917, in Delaware, with a capital of \$500,000, to manufacture the by-products of sugar, rice, etc. Incorporators: Ferris Giles, K. M. Dougherty and E. Lynch, Wilmington, Del.

DEALERS' CEMENT CORP.

*(1) Incorporated on March 27, 1917, in Delaware, with a capital of \$3,500,000 to mine for cement, lime and limestone. Incorporators: M. L. Gatchell, L. A. Irwin and Harry W. Davis, Wilmington, Del.

DEARBORN TRUCK CO., CHICAGO.

*(1) Capital Increased.—On Jan. 9, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$300,000 to \$550,000.

DEATH VALLEY R. R. CO.

*(1) Stock Issue to Retire Bonds.—It was announced Feb. 9, 1917, that the

California Railroad Commission had authorized this company to sell 292 shares of its capital stock of a par value of \$100 each, to Borax Consolidated, Ltd., of London, England. The proceeds are to retire 60 of the company's outstanding bonds of a par value of \$100 sterling each. This is on a basis of \$4.87 a pound.

DE BARDELEBEN COAL CO.

*(1) Development.—It was stated Jan. 17, 1917, that this company would develop 3,000 acres of coal land, near Tuscaloosa, Ala. Three drifts began to produce coal Jan. 1, reaching an output of 100 tons daily for the first week. The plant is equipped with coal washer and facilities for loading coal aboard boats and barges. All shipments from this point will be by water. The coal is destined for consumption at New Orleans and Mobile, principally for steamship bunkering.

D. & C. CEREAL CO., INC.,
WILMINGTON, DEL.

*(1) Incorporated on March 29, 1917, in New York, with a capital of \$500,000, to deal in corn, sugar, feeds, rice, sorghum, sago, wheat and vegetables. Representative: E. Elsworth, 185 Madison Ave., New York.

DEEP LEVEL GOLD MINES CO.,
SEATTLE, WASH.

*(1) Incorporated on March 8, 1917, in Washington, with a capital of \$250,000. Incorporators: L. S. Brockway, J. W. Mays, John W. Cover, E. A. La Fountain and A. T. Schmidt.

DEERE & CO.

*(1) Income Account, Year Ended Oct. 31, 1916, compares as follows:

	1916	1915
Gross	\$4,783,081	\$3,904,987
Net	4,117,995	3,248,024
Surp. aft. chgs. & pfd. divs.	1,470,000	600,020

*(2) Balance Sheet, as of Oct. 31, 1916, shows a profit and loss surplus of \$7,434,035, compared with \$5,964,037 Oct. 31, 1915.

*(3) Earnings on Stock.—It was stated Jan. 16, 1917, that the report of this company for the year ended Oct. 31, 1916, showed earnings on the common stock equal to 7.9%, against 3.2% the previous year.

*(4) Statement by President.—In connection with the report of this company for the year ended Oct. 31, 1916, Pres. Wm. Butterworth said the increase in profits was due to increased sales, the improvement in terms upon which goods were sold, good collections, and economies. Mr. Butterworth added that owing to the high prices of raw materials, particularly steel and allied products, the company had been forced to increase the selling price of its products.

The report indicates marked improvement in ability of farmers to liquidate their indebtedness. The company's figures show that within the year there was a decrease of \$1,237,500 in the amount of debentures, bonds and mortgages. Notes payable dropped from \$5,892,573 to \$78,673, a decrease of \$5,813,899. Accounts payable were reduced from \$2,428,901 to \$1,719,649, a difference of \$709,251. The total decrease in the three items was \$7,760,650.

DEFENDER TIRE & RUBBER CO.

*(1) Incorporated on March 22, 1917, in Delaware, with a capital of \$2,000,000, to manufacture and deal in rubber tires, tubes, etc. Incorporators: F. R. Hansell, Geo. H. B. Martin and S. C. Seymour, Philadelphia, Pa.

DEFIANCE MINING CO.

*(1) Incorporated in December, 1916, in Arizona, with a capital of \$5,000,000. Directors: Grant Smith, J. A. Phillips, W. E. Williams and William Shore.

DE FOREST SHEET & TIN
PLATE CO.

*(1) Earnings on Stock.—Announced Jan. 28, 1917, that this company had

JANUARY 1 TO APRIL 30, 1917

earned 95% on its stock in 1916, during which period it consumed 80,000 tons of steel in finishing mills.

²(2) Explanation of Decline in Price of Stock.—During April, 1917, the stock of the company on the New York Stock Exchange experienced a severe decline, receding from a high price of 151½ on Jan. 19 to 127½ on April 9. At the price of 127½ the stock was at the lowest it ever sold since the dividend rate was raised to 9% in 1907. Between 1901 and 1904, when the stock was on a 7% basis, the lowest price reached was 106, and in the period between 1897 and 1900, when the dividend rate was 5%, the lowest price touched was 93.

No official statement has been issued to account for the present decline, but the explanation given the most general credence in the Street is the falling off in current earnings and the consequent jeopardizing of the 9% dividend rate. There are a number of reasons why net revenues should fail to measure up to the figures of the previous year, but the outstanding features are the embargoes recently placed on certain classes of freight, a general shortage of the necessary rolling stock to handle the business being offered and the operation of the Adamson eight-hour law, which has made necessary considerable additions to labor costs.

The report for the year ended Dec. 31, 1916, has not yet made its appearance, but estimates place the earnings on the capital stock in the neighborhood of 14%. Since the close of the calendar year, earnings have fallen off considerably, the statement for February showing a decline in operating income after taxes of over \$523,000 and for the two months ended Feb. 28 a decline of nearly \$900,000.

Annual fixed charges are estimated to be in the neighborhood of \$5,000,000. Were the earnings to continue at the rate of January and February, the total for the new calendar year would be less than \$3,000,000. However, it is well known in financial circles that the figures for January and February cannot be taken as a criterion, as earnings for those months are normally the smallest of the year, totalling only 12.93% of a full year's operating income.

Figuring the earnings for the first two months of the year on the seasonal variation shown over a period of five years would bring the total operating income, after the deduction of taxes, up to over \$3,700,000. To this must be added the income from the coal department, which amounted in the year ended Dec. 31, 1915, to \$1,243,971 and income from securities and hire of equipment. These latter items in the year ended Dec. 31, 1915, amounted to \$1,777,827.

It is therefore evident that if current earnings continue to show the declines at present being exhibited it may be necessary for the coal department to come to the rescue if the 9% dividend rate is to be maintained.—[Ed.]

²(3) Annual Report, Year Ended Dec. 31, 1916.—Gross (R. R.), \$28,634,426, against \$23,787,519 last year; net, (R. R.), \$7,766,876, against \$8,283,774 last year; gross (coal), \$15,758,765, against \$15,800,677 last year; net (coal), \$123,303, against \$776,038 last year; total income (all sources), \$9,143,405, against \$10,986,942 last year; surplus after charges and dividends, \$333,102, against \$2,246,170 last year.

²(4) Earnings on Stock.—The balance available for dividends, \$4,158,372 is equal to \$9.78 a share earned on 425,030 shares of capital stock, compared with \$14.28 a share earned in 1915.

²(5) Balance Sheet, as of Dec. 31, 1916, showed profit and loss surplus of \$21,046,651, compared with \$20,711,152 last year.

²(6) President's Remarks to Shareholders.—In conjunction with the annual report Pres. L. F. Loree said in part: "The so-called 'full-crew' laws in effect in Pennsylvania since July 15, 1911, and in New York since Sept. 1, 1913, added \$172,859 to the operating expenses of the year, without obtaining any service to the public or the company. Of this total \$42,975 was incurred by reason of the Pennsylvania statute and \$129,883 was due to that of New York. The total compares with \$143,561 and the respective items with \$36,859 and \$106,701 in 1915. The total statute-compelled waste resulting from these laws was to Dec. 31, 1916, \$612,321. Although a supposed relation to safety is the sole excuse for those laws it is a well-established fact that barely 2% of the total casualties on railroads could be even remotely affected by the number of men in the train crews.

"Engineering parties representing the division of valuation of the Interstate Commerce Commission have been engaged in field work connected with the valuation of your railway property since July 1, 1916. Your own valuation department is co-operating fully with the Government and is taking all proper measures to facilitate a just valuation. The cost of this inquiry to this company during the year 1916 was \$123,750, and during the four years 1913 to 1916 it caused a total expenditure of \$198,313.

"Governmental appropriations for this work for the period to end with June 30, 1917, aggregate \$9,300,000. In a recent statement to the Appropriations Committee of the House of Representatives the director of valuation of the Interstate Commerce Commission said that with annual expenditures of \$3,500,000 the field work could be completed in the year 1920, making a total cost on June 30, 1920, of \$19,800,000. (These figures as to cost and time compare strangely, it may be remarked in passing, with the original official estimates of 'not less than \$1,750,000,' as the total cost, and eighteen months as the probable duration of the work.)

The cost to the railroads to June 30, 1916, was \$9,525,781, of which \$5,102,340, or 53.56%, was expended during the last year of the period. The annual cost to the railroads is rapidly increasing for the reason, among others, that the public authorities in charge are very ingenious in finding ways to force the railroads to bear the heavier burdens of cost. At the minimum, the cost to the railroads of this work will be double that of the Government, or not less than \$39,600,000. This would give a total cost of \$59,400,000, a sum which is pretty certain to be considerably exceeded."

²(7) President Comments on Stock Decline.—On April 10, 1917, it was announced that Pres. L. F. Loree, of this company, had issued a statement regarding the drop in the stock. He said:

"The newspapers indicate the stock selling is due to the publication of operating revenues and expenses for January and February as filed with the Interstate Commerce Commission. These reports include only the returns from rail operations.

"The net earnings of the company for the two months January and February, after deducting fixed charges against the railroad department, indicate a deficit of \$177,401. Including the income from investments and the coal operations of the company and its subsidiaries there was a surplus over fixed charges of \$184,794.

"The railroad gross earnings for the two months decreased \$374,000 on account of abnormal weather conditions and the inability of important connecting lines freely to accept freight by reason thereof. In March gross earnings were the greatest for any single month, being 25% higher than the average for the two months January and February, though some freight is still held back by embargoes.

"There would seem to be no reason for any concern as to the future earning capacity of the Delaware & Hudson Co. and its ability to maintain its established dividend which does not apply with equal force to practically all other lines in trunk line and official classification territory."

²(8) Comment on 1916 Report.—On April 13, 1917, the "Wall Street Journal" said that higher labor and material costs were chiefly responsible for the comparatively poor showing of this company in 1916, when share earnings amounted to but 9.78%, the lowest in recent years. Gross revenues of the railroad increased satisfactorily, \$2,846,907, equal to 11.97% over 1915, and gross of the coal mining department decreased only \$101,911. Expenses, however, made serious advances, totalling \$3,287,469 for the railroad and \$403,666 for the coal department, with the final result of a surplus for dividends of \$4,158,372, compared with \$6,071,440 in 1915.

The reduction of anthracite rates by the Interstate Commerce Commission, effective April 1, 1916, caused a decline in revenue from coal traffic on this railroad in 1916 of \$270,440, and gross from the coal business increased but 4.04%. Merchandise traffic increased 22.30%.

Notwithstanding the satisfactory volume of business handled, the final results for the year suffer in comparison with previous years.

The explanation of the decline in coal department profits is a decrease of 914,387 tons in anthracite production, an increase in wages and reduction in working hours under the new agreement in the Pennsylvania fields.

The principal item in the smaller other income was a debit to car hire account of \$454,052, against a credit in 1915 of \$142,489. This was a development common to practically all eastern carriers, and resulted from the traffic congestion along the Atlantic seaboard.

The expense account of the railroad consumed 68% of gross, against 62.32% in 1915, and 66.60% in the poor year of 1914. This was a high ratio, though it should be added that in 1916 accounts is included \$355,016 for depreciation of

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

equipment under the new methods of the company, against which there was no corresponding charge in 1915. Excluding this item, however, operation expenses showed an increase of 19.78%, compared with an increase in gross of 11.97%, and consumed 68.97% of gross revenues.

In the detailed expenses, there was an encouraging increase of \$1,267,537 in maintenance of equipment, but higher prices of materials account for \$388,204, and higher wages for \$235,619 of this increase. In fact, it is officially stated that the year's total operating expenses were \$1,189,622 greater than they would have been at the wages and prices of 1915.

One of the striking items in transportation expenses, playing an important part in advancing the transportation ratio to 35.7%, was a fuel bill for locomotives of \$2,244,972, an increase of \$567,191, or 33.9%.

Delaware & Hudson in 1916 showed the effects of combating the elements of increased labor and materials costs, which are running over into 1917 with aggravated force.

DELAWARE INVESTMENT CO.

(1) Incorporated on Jan. 25, 1917, in Delaware, with a capital of \$1,000,000, to deal in and with investments of all kinds. Incorporators: Wm. F. Doughty, Chas. E. Norlin and Ralph Kirby, New York.

—Feb.

(1) Suit by Government.—Proceedings by the United States Government against this company came to trial Feb. 6, 1917, in the Federal District Court at New York. United States District Attorney John C. Knox charged that the defendant company had departed from the published tariffs by granting concessions to the Delaware, Lackawanna & Western Coal Co.

Douglas Swift, representing the railroad company, contended that the tariff did not provide for the assessment of demurrage charges on boats lying at the company's lighterage station.

(2) Rivalry for Control.—See Frontier Electric Ry. Co.—Item No. 1.

(3) Government Suit Dismissed.—It was announced Feb. 8, 1917, that the United States Government's action against this company, on a charge of having departed from its tariffs in favor of the Delaware, Lackawanna & Western Coal Co., in violation of the Interstate Commerce law, had been dismissed by Judge Sessions of the Federal District Court at New York on the ground that the evidence did not justify the action.

The proceeding was based on the alleged failure of the defendant company

to collect demurrage charges from the coal company.

(4) Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross	\$51,580,899	\$44,798,731
Net incl. oth. inc.	24,647,158	19,916,519
Surp. after chgs.	16,200,148	10,963,140
Bal. after divs.	7,756,068	2,510,060

(5) Earnings on Stock.—It was stated Feb. 20, 1917, that this company's 1916 surplus of \$16,200,148, before dividends, is equal to 38.31% on \$42,277,000 capital stock, compared with 25.93% earned on the same capitalization in 1915.

(6) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$46,987,405, compared with \$39,231,387 Dec. 31, 1915.

(7) Statement by President.—In connection with the annual report of this company, Pres. W. H. Truesdale, it was stated Feb. 20, 1917, said, in part: "The year 1916 will doubtless be conspicuous in the business annals of our country for many years to come by reason of the great and widespread activity and prosperity in all lines of business and industry which continued throughout the year.

"The railroads have all been severely taxed to perform the transportation service required of them in handling the business of the country, and their earnings have been larger than in any previous year. This company has enjoyed its share of the prevailing prosperity; its gross earnings show an increase of 15.17% over 1915. The earnings from the transportation of coal increased \$1,111,237, notwithstanding that the rates of freight on anthracite coal from the mines to many points were reduced by the Interstate Commerce Commission, effective April 1, 1916.

"The tonnage of coal produced from Lackawanna collieries and washeries was larger than in any year in its history, aggregating 9,428,462 tons, as increase of 663,205 tons.

"The business and earnings of the company from the transportation of miscellaneous freight would have been larger during the last year had it been possible to make prompt deliveries at points of destination. The shortage of ocean vessels at all seaport ports, congestion at connecting lines and embargoes against deliveries to them existed more or less throughout the year.

"The war conditions in Europe and the demand from this country for foodstuffs and munitions of war of all kinds have constituted the chief cause for this increase in freight traffic and present indications are that this condition is likely to continue throughout the coming year.

"The Lackawanna enjoyed an increase of 22% in express earnings as a result of the shipping of large amounts of commodities by express that would have gone by freight, except for the urgency of the demand."

(8) New Vice-President.—Announced Feb. 23, 1917, that E. M. Rine, general superintendent of this company, had been elected 1st Vice-Pres., to succeed E. E. Loomis, who has been made Pres. of the Lehigh Valley R. R. Co.

(9) Earnings—	1917	1916
January gross.....	\$4,434,677	\$4,223,317
Net after taxes.....	1,419,558	1,551,926

—Mar.

(1) Comment on 1916 Report.—On March 3, 1917, the "Wall Street Journal" said that Pres. Truesdale, of this company, in his report to stockholders modestly admitted "this company has enjoyed its share of prevailing prosperity" and earnings of \$42.40 a share in 1916 left little to be desired by fortunate holders of the stock of this unique railroad.

Notwithstanding there has been charging off to income for betterments between 3% and 6% per annum on its stock for many years, profit and loss surplus as of Dec. 31, 1916, stood at \$46,987,405, equal to 111% on the \$42,277,000 stock issue. A special corporate surplus of \$20,316,120, equivalent to another 48% on capital stock, represents

additions to property charged to income since July 1, 1907.

Gross earnings in 1916 totaled \$51,580,899, largest in history of the road, and a gain over 1915 of \$6,794,168, or 15.17%. Gain was in all departments and due to widespread activity and prosperity in all lines of industry throughout the year.

Earnings from transportation of freight other than anthracite increased \$4,487,247, or 23.94%, a striking showing when it is remembered that in 1915 increase in this item was \$3,069,530 over 1914.

Lackawanna leads the country's railroads in earning power, and surplus of 42.4% on its capital stock in 1916, before charging off for additions and betterments, compares with 29.8% in 1915, 31.4% in 1914 and 38.4% in 1913. Capital improvements charged to income during the year amounted to \$1,701,967, equal to 4.1% on the stock.

A note of warning is sounded by Mr. Truesdale in his report, calling attention to increase in expenses compared with volume of business done, and to indications that expenses in early months of 1917 show signs of increasing further. He says "the year 1916 will doubtless be conspicuous in the business annals of our country for many years to come" by reason of its prosperity and activity.

The hint is conveyed to Lackawanna stockholders that they should not expect a 1916 every year, but the average railroad stockholder will have little sympathy for his Lackawanna brethren should their profits "slump" to a beggarly 30%, as in 1915 and 1914.

DELAWARE R. R.

(1) Report, 1916.—A Dover, Del., dispatch Jan. 13, 1917, stated that at the annual meeting of this company, at which directors were re-elected, gross earnings for 1916 were shown as \$500,416, an increase of \$2,881, as compared with 1915. Net was \$472,430, an increase of \$805.

Balance transferred to credit of profit and loss was \$17,180, a decrease of \$1,893, as compared with 1915. Dividends amounting to \$406,262 were paid during 1916.

DELOHERY HAT CO.

(1) Government Hat Contract.—This company, Danbury, Conn., April 23, 1917, received a contract to furnish 60,000 dozen service hats for the United States Army. The company is a bidder for a contract to supply 200,000 more hats of the same type and quality, according to the "Daily News Record," New York.

DELPHOS ELECTRIC LIGHT & POWER CO.

(1) Improvement Plans.—It was announced Feb. 16, 1917, that this company, owned by Hooper, Kimball & Williams, of Boston, had completed plans for making improvements to cost \$100,000. A concrete sub-station, 45 miles of new wire, line equipment and a coal-conveying system are among the improvements.

DELTA SHIPBUILDING & DRY DOCK CORP., NEW YORK.

(1) Incorporated in February, 1917, at Dover, Del., with a capital of \$5,000,000, to build and operate steamships, tug boats, etc. Incorporators: Percy B. Gibbons, James A. Gray and George N. Deas, all of New York.

DEMPSEY OIL ENGINE CORP.

(1) Incorporated on April 27, 1917, in New York, with a capital of \$500,000, to manufacture oil engine devices. Incorporators: A. W. Britton, S. B. Howard and L. H. Gunther, 28 Nassau St., New York.

JANUARY 1 TO APRIL 30, 1917

**DENNETT & PRINCE CO.,
BOSTON, MASS.**

¹(1) Incorporated on Feb. 26, 1917, in Massachusetts, with a capital of \$300,000, 3,000 shares of \$100 each, to manufacture leather. Directors: Nathan W. Dennett, Pres.; Fred. A. Prince, 109 Beach St., Boston, Treas., and C. R. Zehringer.

DENNIS SALT & LUMBER CO.

¹(1) Report and Dividend.—It was announced Jan. 1, 1917, that the annual report of this company of Grand Rapids, Mich., showed a profit earning of 13% on its capital stock and a 10% dividend had been declared. The following officers were elected: Pres., A. L. Dennis; Vice-Pres., John Murray; Secy., E. L. Crossman; Treas., Henry Idema. Directors, Charles B. Blair, D. M. Waters and John A. Covode.

DENTOLA CO., INC., NEW YORK.

¹(1) Capital Increased.—On Jan. 22, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$250,000 to \$1,000,000.

**DENVER GAS & ELECTRIC
LIGHT CO.**

¹(1) Operations.—It was stated Jan. 10, 1917, that this company, a subsidiary of Cities Service Co., has been making an active campaign for the sale of gas for industrial purposes, and the campaign is proving successful. In every case where other fuel has been displaced by gas installation the company has had to prove greater efficiency and economy in the use of gas over the displaced fuel.

The Denver Rock Drill Co. installed gas instead of oil for its hardening furnaces after exhaustive tests, and the company had put in a 4-inch main to furnish the 100,000 cubic feet of gas required monthly for the furnace. Several other industrial plants have installed industrial gas appliances.

In December, 1916, the Denver Gas & Electric Light Co. sold \$1,565 of industrial fuel appliances, compared with sales of \$875 in December, 1915, and \$601 in December, 1914.

—Mar.

¹(1) Stock Sale.—Offering.—Announcement was made March 1, 1917, that this company had sold to Henry L. Doherty & Co. \$1,500,000 6% cumulative pfd. stock, which is being offered by the latter at 95 and accrued dividends.

Proceeds from the sale of this stock will be used to retire the \$900,000 outstanding bonds of Lacombe Electric Co., a predecessor corporation, and for extensions and improvements to the properties of the issuing company. Dividends on the stock will be paid on the first of each month.

Denver Gas & Electric Co. supplies artificial gas, heat and electric lighting and power to Denver, Colo., and the investment in the company is said to be largely in excess of the outstanding bond and pfd. stock issues. Substantially all the \$10,000,000 common stock of Denver Gas & Electric Light Co. is owned by Cities Service Co.

¹(2) Contract.—On March 16, 1917, it was stated that the extent to which chemical manufacturing companies are using electric energy is shown by the fact that the Western Chemical Co. has increased its power contract with this company to 2,000 kilowatts. The first contract to supply this plant with electric energy was made only a year previously.

• DENVER & RIO GRANDE R. R. CO.

¹(1) Stricken from List.—Announced Jan. 2, 1917, that the New York Stock Exchange had stricken from the list the Denver & Rio Grande and Utah Central R. R. 1st Mtg. 4% bonds.

¹(2) Office of Chairman Abolished.—It was announced Jan. 4, 1917, that at the meeting of this company's Board of Directors E. T. Jeffery, chairman of the board, resigned, and the board amended the company's by-laws abolishing the office of chairman.

Arthur Coppel, of Maitland, Coppel

& Co., who is ranking Vice-Pres. of the Denver & Rio Grande, in the absence of the Pres., will automatically assume the duties formerly performed by the chairman, call and preside at meetings of the board, etc. H. U. Mudge, Pres. of the company, will continue to make his headquarters in Denver.

5 mos. gross	11,877,365	11,503,444
Net after taxes	4,626,083	4,191,268

¹(4) Cash Removal Prohibited.—It was announced at New York Jan. 6, 1917, that an order had been signed by Judge Learned Hand, of the Federal District Court, restraining this company from removing about \$2,000,000 in cash from the jurisdiction of the court. The action was taken in the interest of the Equitable Trust Co., New York, which has foreclosure suits pending against the Rio Grande and the Western Pacific Railroads. The order was asked for on the eve of signing a decree in foreclosure and action was taken without notice to the Rio Grande Co. Judge Hand said:

"The giving of such notice might and probably would result in the removal of the money, or a considerable part thereof, before the hearing on the motion for preliminary injunction."

¹(5) Restraining Order Upheld.—It was announced Jan. 13, 1917, that after hearing arguments on an application by this company to vacate an order tying up nearly \$3,000,000 in cash belonging to the company, in a foreclosure proceeding begun by the Equitable Trust Co., Judge Learned Hand of the Federal District Court in New York continued the restraining order and directed the railroad to file an answer to the suit. The action was taken a week previously without notice to the railroad company, on an application which said that the road had guaranteed the interest of bonds of the Western Pacific Ry., that default had been made in the payment, and that the railroad had removed a large amount of its cash from the jurisdiction of the court.

George W. Murray, in behalf of the trust company, said he believed that officers of the D. & R. G. road, when they removed bonds and unplugged securities worth millions from New York City in April and deposited them with the International Trust Co., of Chicago, had in mind the Equitable suit and other suits begun and threatened against the company.

Since the bringing of the present action, Mr. Murray, said, the Denver & Rio Grande officials had diverted income amounting to \$2,300,000, by placing it in Chicago. He said this money was to be used for equipment and not for the payment of interest.

John McAllister, representing the railroad company, told the court that new equipment, consisting of 1,500 cars and 10 locomotives, had been ordered, and that delivery could not be guaranteed without the deposit of collateral to insure payment.

¹(6) Amended Order Filed.—It was announced Jan. 16, 1917, that Judge Learned Hand in the United States District Court in New York City had amended a former order made on Jan. 5 restraining the removal from the jurisdiction of his court funds amounting to upward of \$3,000,000, said to belong to the Denver & Rio Grande R. R.

The supplemental order of this date permits the withdrawal of amounts for current expenditures in connection with the running of the business of the road and continues the injunction upon the \$3,000,000 fund until Feb. 1.

The order involves the withdrawal of a few thousand dollars only.

—Feb.

¹(1) Injunction Proceedings.—It was announced at New York Feb. 16, 1917, that in the suit of the Equitable Trust Co. of New York against this company, its officers and directors, Judge Hand of the United States District Court had continued his inquiry into the history

of the case. He is hearing testimony as to why a temporary injunction granted against the removal from this jurisdiction of about \$3,000,000 should not be made permanent.

The temporary injunction was granted on Jan. 5, on an ex-parte application restraining the removal or any use of the funds of the Denver & Rio Grande, which might be applicable to the payment of the accumulated interest or principal of the bonds of the Western Pacific, which have been guaranteed by the Denver & Rio Grande.

Several modifications of the original order have from time to time been made for the purpose of liberating sufficient funds for current expenses of the company in this district. These allowances have not exceeded \$150,000 of the \$3,000,000 covered by the original injunction.

John M. Milburn for the Denver & Rio Grande Co. and Franklin Cutcheon for the Equitable Trust Co. of New York, are submitting a great mass of documentary evidence in order to illuminate the court as to the relative claims, Judge Hand, when the testimony is all in, will reserve his decision for the submission of briefs.

¹(1) Stock Increase.—It was announced Feb. 5, 1917, that the stockholders of this company had voted to increase the capital stock from \$25,000,000 to \$35,000,000. At this meeting retiring directors were re-elected.

¹(2) Rights.—It was announced Feb. 6, 1917, that stockholders of this company of record Feb. 23 would be permitted to subscribe at par for 15% of their holdings in new stock. Warrants for fractional shares of stock in the hands of stockholders upon which the owner is

entitled to subscribe must be presented on or before April 2. These warrants will be mailed March 5, together with warrants for full shares and multiples.

Stockholders who elect to pay in installments will receive transferable purchase certificates upon first payment, and these certificates must be returned for endorsement with the other payments. 50% is due April 2, and 25% on July 2 and Oct. 1, respectively; payments to be made at the Bankers Trust Co., New York.

Holders of debenture bonds, series of 1925, convertible into stock on or before Feb. 28, 1917, will be entitled to subscribe to 15% of the par value of the bonds so converted and will receive subscription warrants. The issue of stock is subject to the approval of the Michigan Railroad Commission.

¹(3) Capital Increased.—On Feb. 6, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$25,000,000 to \$35,000,000.

¹(4) Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross	\$10,066,786	\$7,759,932
Net	3,795,693	2,948,713
Surp. after chgs....	2,717,413	1,848,658

¹(5) Earnings on Stock.—It was stated Feb. 19, 1917, that this company's 1916 surplus of \$2,717,413 is equal to 13.21% on \$19,812,900 capital stock, compared with 13.67% carried on \$13,515,200 capitalization in 1915. This percentage is figured before allowing for depreciation reserve on subsidiary company and other reserves.

¹(6) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,906,185, compared with \$1,558,001 Dec. 31, 1915.

¹(7) Statement by President.—It was announced Feb. 19, 1917, that Pres. Alex. Dow, of this company, in his annual remarks to stockholders, said, in part:

"We look for increased business in 1917. The only uncertainty is as to the possible effect of peace in Europe upon business in the United States—if peace shall come during the year.

"There is no uncertainty about the present high price of coal and operating supplies. These prices if permanent would require an increase of our selling prices. We do not, at this time, propose any change in our rates for electric service, but we will consider raising the price for steam supply after mid-Summer.

"Abnormal costs and conditions of construction work in 1917 will have to be dealt with as best we may, because we must provide for the demands of the public. It should be remembered, however, that we have done much construction work in the past during periods of low prices.

"The output for the year increased from 393,129,850 kilowatt hours in 1915 to 546,925,300 in 1916—a growth of 39.2%. Transmission lines were extended to the villages of Capac and Plymouth, which were formerly lighted by municipally owned plants, and the company purchased the plant belonging to Northville, which had previously been operated under lease.

"The company now serves five cities, 75 incorporated and unincorporated villages, as well as residential sections and Summer resorts, having altogether a population of 900,000.

"The appraisal of the company's property by the Michigan Railroad Commission has been completed, and while varying from the company's estimates in matters of detail, is in such accord that the total estimates were within one-third of 1% of each other. The company will hereafter report all property additions or withdrawals from the service to the commission."

DETROIT UNITED RY.

⁴(1) Stock Increase Plan.—Of the increase of \$12,500,000 in the capital stock of this company to be authorized at the annual meeting in February, officials of the company on Jan. 3, 1917, stated that \$2,500,000 will be offered in 1917 to stockholders at par. This would be in the ratio of one share of the new stock to each five of the present stock and on the basis of the present price of Detroit United stock, rights would be worth between $\frac{1}{4}$ and $\frac{1}{2}$.

It is probable that announcement of the right to subscribe to the new stock will be made within a short time after the annual meeting.

⁴ (2) Earnings—	1916	1915

Surp. aft. chgs.....	2,606,883	1,740,626

⁴(3) Earnings on Stock, Estimated.—It was stated Jan. 4, 1917, that for the 12 months estimates are that after providing for all deductions for depreciation and reserves, Detroit United earned for 1916 over 16% on the stock, on which dividends at a 7% rate are now being paid, but which it is expected will be increased to an 8% rate in 1917.

⁴(4) Earnings, 1916, Estimated.—On Jan. 30, 1917, the "Wall Street Journal" said that while the complete annual report for 1916 of this company will not be issued until February, it is known that it will show that the company earned a surplus for dividends of approximately \$2,840,000, or 22.76% on the \$12,500,000 capital stock. Dividends in 1916 were 6% at the opening of the year and later raised to 7%. The amount paid out in dividends was \$843,750, so that a large amount was left above dividend requirements.

In addition to their dividends, stockholders in the current year will have valuable rights, as at the annual meeting Feb. 6 the authorized capital stock will be increased from \$12,500,000 to \$25,000,000. Subsequently the board will authorize the issue of \$2,500,000 of this new stock for subscription by stockholders at a par in the ratio of one share of the new stock for each five shares now held.

All the proceeds from the sale of this stock, and of that to be issued in the future, will go into betterments, improvements and extensions of the system of the company.

In 1916 the company constructed 23½ miles of new track on its city system, but was not enabled, owing to the scarcity of materials and of common labor, to carry out its full construction plans for the year.

Detroit United Railway now operates 874 miles of track, an increase of 35½ miles over a year previously, with 41 miles additional not completed. In 1916 the company ordered 330 new cars of all kinds and for 1917 is now placing orders for 150 double truck city cars and eight most modern interurban cars.

In the year large investments were made in real estate, among these being the purchase of land for the new city terminals and for rights of way for its interurban lines and also added another unit to its million dollar car shops at Highland Park.

The traffic statistics for 1916 will show car mileage of over 53,500,000 miles, or 7,000,000 miles increase over 1915, with more than 460,000,000 passengers of all classes carried, compared with 382,193,758 passengers in 1915. The new belt line, over 14 miles in length, reaches all the important industrial plants of Detroit. A passenger can now ride a distance of 18½ miles in Detroit for one ticket on the seven tickets for a quarter fare.

—Feb.

⁴(1) Stockholders' Rights.—It was stated Feb. 6, 1917, that at the annual meeting of this company the stockholders approved an increase in the capital stock from \$12,500,000 to \$25,000,000. The board took action offering \$2,500,000 of the new stock to stockholders of record Feb. 16 at par in the proportion of one share of the new stock for each five now held. Warrants for subscriptions will be mailed and subscription rights will expire March 29.

⁴(2) Report, Year Ended Dec. 31, 1916, shows net income after charges, but before depreciation, amounting to \$2,880,792, an increase of \$920,030, or 46.9% over 1915, and equal to 23% earned on the capital stock against 15.6% the previous year.

After setting \$800,000 aside to reserve for depreciation and paying the year's dividends, there remained a balance of \$1,237,042, or just a little short of 10% of the total capital. This balance was transferred to surplus account, bringing it up to \$7,871,462, or the equivalent of 73¢ per share of capital stock.

It was announced from Detroit after the meeting that the stockholders gave approval to a recommendation by the directors that the company's author-

ized capital stock be increased from \$12,500,000 to \$25,000,000, the proceeds from sale of new stock to be used in providing funds for improvements, betterments and future extensions of lines.

⁴(3) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross.....	\$16,036,669	\$13,235,551

⁴(5) Stock Exchange Ruling.—On Feb. 8, 1917, in referring to the announcement of this company that stockholders of record at the close of business Feb. 15 will be offered the right to subscribe at par for new stock to the extent of 20% of their holdings, the New York Stock Exchange had ruled that transactions in the stock of that company on Feb. 16, unless paid specifically for cash, shall be "ex-rights"; that rights may be dealt in on and after Feb. 13, and transactions in rights must be settled on March 8, after which date dealings shall be as in securities.

The right to subscribe expires March 29.

⁴(6) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross.....	\$16,036,669	\$13,235,551

⁴(2) Dividend Increased.—Announced April 4, 1917, that this company had declared a quarterly dividend of 2%, payable June 1 to stock of record May 16. This is an increase of $\frac{1}{4}$ of 1% over the previous declaration.

DETROIT VALVE & FITTINGS CO.

⁴(1) Capital Increased.—On Jan. 26, 1917, the company filed notice at Lansing, Mich., of an increase in capital stock from \$500,000 to \$1,500,000.

⁴(2) Merger Planned.—It was announced Jan. 29, 1917, that stockholders of this company and the Detroit Brass Works would meet on Feb. 10 to act on a plan for consolidation.

It is planned to increase the authorized stock of the Valve company from

JANUARY 1 TO APRIL 30, 1917

\$500,000 to \$1,500,000 and distribute a 30% dividend in stock to the shareholders. It is also planned to enlarge the capital of the Brass company from \$400,000 to \$500,000, giving the shareholders a 10% dividend in stock.

—Feb.

¹(1) **Plant Enlargement.**—It was announced Jan. 29, 1917, that this company, manufacturer of malleable iron fittings, carburetors and automobile parts, Wyandotte, Mich., is enlarging its plant by an addition half the size of its factory. Its capital stock has been increased from \$500,000 to \$1,500,000.

²(2) **Merger Plan.**—It was stated Feb. 2, 1917, that this company and the Detroit Brass Works, which are controlled by the same interests, would be merged. The former operates a plant at Wyandotte and the latter one in Detroit. The capital stock of the Detroit Valve & Fittings Co. will be increased from \$500,000 to \$1,500,000. Present stockholders will receive a 30% stock dividend. The capital stock of the Detroit Brass Works will be increased from \$400,000 to \$500,000, prior to the merger, and a stock dividend of 10% will be declared.

The merger plan is for the exchange of the shares of the Detroit Brass Works for an equal number of shares of the Detroit Valve & Fittings Co. After payment of the stock dividends and completion of the exchange of shares approximately \$310,000 par value of the new stock of the Detroit Valve & Fittings Co. will remain unissued and will be retained for the present in the company's treasury, as a provision against future needs.

The Detroit Brass Works was established in 1892 and incorporated in 1893. The company has paid regular cash dividends, which were at the rate of 12% for two or three years following 1911, but the company was placed on a 6% basis after distribution of a 100% dividend in stock.

The Detroit Valve & Fittings Co. was incorporated in December, 1908, and since 1914 has paid cash dividends regularly at the rate of one-half of 1% a month, equivalent to 6% a year.

Edgar B. Whitcomb is Pres. and Treas. of both companies.

³(3) **Statement, Year Ended Dec. 31, 1916.** showed gross earnings as \$139,035.97, of which, after allowance for depreciation, reserves and dividends, \$91,721.21 was carried to surplus, increasing accumulated surplus on Jan. 1, 1917, to \$214,284.25.

The company's balance sheet on that date shows total resources of \$791,739.51, increased from \$670,484.21 at the beginning of the previous year. Quick assets, of which \$168,753.38 were in the form of accounts receivable and \$240,099.90 in inventory, amounted to \$433,226.42 and plant investment was \$358,513.09. Accounts and bills payable aggregated \$86,455.26.

⁴(4) **Merger—Stock Dividends.**—It was announced Feb. 10, 1917, that plans for the merger of this company and the Detroit Brass Works had been given complete approval at special meetings of stockholders of the two companies.

The title of the new company is the Detroit Valve & Fittings & Detroit Brass Works. Its authorized capital stock is placed at \$1,500,000, of which about \$1,000,000 will be issued and approximately \$400,000 retained in the treasury. The shares have a par value of \$10.

The manufacturing plant in Wyandotte operated by the Detroit Valve & Fittings Co. and the plant of the Detroit Brass Works will be continued in operation by the new corporation.

The stockholders voted to increase the number of directors from five to seven. The directors elected are: E. B. Whitcomb, O. B. Benjamin, F. L. Uhl, E. D. Bronner and H. C. Monroe, Detroit; A. L. Hansen, Monroe; B. P. Corey, Petrolia, Ont.

The directors elected officers as follows: Pres., E. B. Whitcomb; Vice-Pres., O. F. Benjamin; Treas., A. L.

Hansen; Secy., F. L. Uhl; Asst. Secy., W. E. Ganley; Asst. Treas., D. M. Hamilton.

Preliminary to merging the two corporations, each distributed a stock dividend to its stockholders Feb. 1. Shareholders of the Detroit Valve & Fittings Co. received 30% in stock, which at its par value represents a distribution of \$150,000. The distribution by the Detroit Brass Works was 10% in stock, equivalent at par value to \$40,000.

The policy of the new corporation will be to maintain regular cash dividends at the rate of $\frac{1}{2}$ of 1% each month, making such extra distributions as may seem desirable in the form of stock.

DETROIT VALVE & FITTINGS & DETROIT BRASS WORKS.

DETROIT-WYANDOTTE MOTOR TRUCK CO.

¹(1) **Report, Year Ended Dec. 31, 1916.** shows a surplus of \$84,439. The volume of business handled was approximately that of 1915.

DEVINE (E. C.) & CO., INC., MILLBROOK, N. Y.

¹(1) **Capital Increased.**—On April 19, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$10,000 to \$40,000.

DEVORE (F. W.) & C. T. REYNOLDS CO.

¹(1) **To Be Taken Over.**—See Devore & Reynolds Co., Inc.—Item No. 1.

DEVORE & REYNOLDS CO., INC.

¹(1) **New Company.**—It was announced at Albany, N. Y., April 6, 1917, that articles of incorporation had been filed for this company, formed for the purpose of purchasing the business of F. W. Devore and C. T. Reynolds and the F. W. Devore & C. T. Reynolds Co., subject to debts, etc., paying \$4,000,000 therefor by issuing 40,000 shares of non-assessable stocks. Capital, \$5,000,000. The company will manufacture and deal in paints, varnishes, artists' materials, brushes, and products incidental to the business. Incorporators: E. H. Reynolds, G. A. Meyer and J. S. Page, 119 East 56th Street, New York.

DEVONIAN MINERAL SPRING CO., NEW YORK.

¹(1) **Incorporated** on Jan. 5, 1917, in Delaware, with a capital of \$1,000,000, to acquire and distribute water from mineral wells, etc. Incorporators: James W. A. Wilmore, Jas. A. Gray, Jr., and Geo. N. Deas, all of New York.

DEXTER YARN CO.

¹(1) **Capital Stock Increased.**—On March 27, 1917, this company filed notice at Providence, R. I., of an increase in capital stock from \$250,000 to \$500,000.

DIAMOND & CALDOR RY.

¹(1) **Bond Issue Planned.**—It was announced Feb. 17, 1917, that this company had filed with the California Railroad Commission an application for authority to issue \$90,000 bonds at not less than 90% of par. The railroad operates in El Dorado County, Cal. Ten years previously it issued \$240,000 of bonds, of which \$90,000 were deposited with a trustee and still remain unsold. It is these bonds that are now desired to be disposed of to gain funds for the further development of the railway's equipment and to repay money advanced by the California Door Co.

—Mar.

¹(1) **Bond Issue.**—It was announced Feb. 24, 1917, that the California Railroad Commission had authorized this company to issue \$90,000 first mortgage 5% 20-year sinking fund gold bonds, at 90% of face value, and of the proceeds to pay \$50,000 to the California Door Co. for indebtedness, \$24,970 for 22 logging cars and \$15,000 for a

locomotive. The railway owns a narrow-gauge line of railway from Diamond Springs to Caldor, El Dorado County, 32 miles.

The California Door Co. owns most of the stock, and furnishes 99% of the traffic. It ships over the road 13,000,000 feet of lumber a year, and is installing facilities to cut 5,000,000 more feet.

DIAMOND MATCH CO.

¹(1) **Dividends on 8% Basis.**—Announced Jan. 25, 1917, that this company had declared an extra dividend of 1% and a regular quarterly dividend of 2%, thus placing the issue on an 8% per annum basis. Previously it had been on a 7% basis. Both dividends are payable March 15 to stock of record Feb. 28.

—Mar.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows earnings as follows:

	1916	1915
Gross	\$3,925,806	\$2,284,564
Bal. after chgs.	2,630,120	1,205,009
Surp. after divs.	1,315,325	74,410

²(2) **Earnings on Stock.**—It was stated March 14, 1917, that this company's 1916 balance after charges of \$2,630,120 is equal to 15.53% earned on the \$16,985,100 capital stock, compared with 7.10% earned on the same stock in 1915.

³(3) **Balance Sheet,** as of Dec. 31, 1916, shows a profit and loss surplus of \$520,055, compared with \$454,730 Dec. 31, 1915. These figures are after \$1,250,000 written off for patents, rights, trademarks, etc., compared with \$500,000 written off for the same purposes in 1915.

⁴(4) **Status.**—It was stated March 24, 1917, that recent buying in this company's shares was based on the theory that the 8% dividend on the \$16,985,000 stock did not measure all that stockholders may reasonably expect to receive.

The war has hurt Diamond Match from the chemical standpoint. In a commercial way it has been a stimulus in that it has reduced and cheapened the foreign competition, especially importation of Swedish matches. Diamond Match is to-day freer from troublesome competition than at any time in its long career.

The net earnings of 1916 of \$2,925,806 showed an increase of \$1,641,242, or better than a 70% gain over the 1915 figures. After charging off \$700,000 on account of special reserves and allowing for depreciation there remained a balance of \$15.50 per share for the stock, against \$7.46 per share in 1915. Never in its career has the company earned as high even as \$3,000,000 net in a single year, and the \$3,925,806 in 1916 promises to be closely duplicated in 1917.

There is some reason to doubt whether Diamond Match directors will go back to the 10% rate which ruled from 1896 to 1908. But there may be some extras during the forthcoming two years.

DILWORTH OIL & REFINING CO.

(1) Incorporated in April, 1917, in Oklahoma, with a capital of \$1,000,000. Incorporators: J. E. Utterback and W. A. Doty, Newkirk, Okla., and M. R. Diggs, Chicago.

DIM-O-LITE SWITCH CO.

(1) New Company.—It was stated Jan. 12, 1917, that the above is the name of a new Monroe, Mich., company which soon would place upon the auto accessory market an electric light dimmer. The members of the company are Lee Winters and D. M. Leonard, the claim of the switch, on which the patent is pending, being the invention of Mr. Winters. The Dim-O-Lite switch is specially designed for use on Ford cars.

DISBROW MOTORS CORP. (THE).

(1) Incorporated on March 1, 1917, in New York, with a capital of 2,500 shares, \$100 each, 10,000 shares, no par value, to carry on business with a working capital of \$300,000 in motors, engines, machinery, autos and accessories. Incorporators: W. H. Byers, J. J. Curl and L. A. Disbrow, 1,926 East 79th St., Cleveland, O.

DISTILLERS' SECURITIES CORP.

(1) Earnings Discussion.—On Jan. 11, 1917, the "Boston News Bureau" said that despite its market price the monthly earnings of this company for its \$30,843,000 stock continue extremely gratifying. It is understood that officials of the company are confident that if corn does not average the company above 90 cents per bushel it can show average net profits through the current fiscal year to June 30, 1917, of at least \$500,000 per month. Such an earning power would mean profits at the rate of between 16% and 17% for the stock, or within \$12 per share of its current market quotation.

The market price of Distillers has very plainly discounted the passing of the current \$6 dividend. The establishing of this high rate of return for a stock which had in years past shown its ability to cope with nothing better than a \$2 dividend was undoubtedly a mistake. Even Distillers' directors would probably admit that the \$6 rate was rather ill considered.

At the same time, with earnings running at the pace which prevailed during the first half of the current fiscal year, the six months ended Dec. 30, there is no question that the \$6 distribution can be continued during the ensuing six months and during all of 1917.

The company during the 1916 fiscal year cancelled \$2,000,000 of its bonds and has since purchased and holds ready for cancellation another \$1,000,000, bringing its bond issue down to \$11,380,000. This may easily be written down to a flat \$11,000,000 this fiscal year.

Distillers is also consolidating into itself many of its 20 or 30 operating subsidiaries. The parent company ultimately will become the sole operating company. This procedure not only simplifies things, but it will save in taxes and expense a sum equal to at least \$1 per share on the stock.

Many are confident that even when the present alcohol contracts are worked off the company will be able to maintain dividends at a rate of \$3 to \$4 per share for several years at least.

If the expectations of Distillers' officials are made good, the company will have a very large post-war demand for its alcohol from European countries.

—Feb.

(1) Bonded Debt.—On Feb. 27, 1917, the "Boston News Bureau" said that whatever may be thought of the wisdom of continuing \$6 dividends on this company's \$31,435,000 stock, the fact remains that the management has been steadfast in its determination to reduce its bonded debt.

It is understood that the company holds in its treasury \$2,000,000 of its 25-year 5% bonds of 1927. During 1916 some \$2,000,000 of these bonds were thus bought in and retired. The second instalment of \$2,000,000 will probably be

canceled before the current fiscal year ends, June 30, 1917. That would reduce the outstanding total of these bonds to about \$10,350,000, against \$14,800,000 at the high point.

It would also mean that the company had between \$3,000,000 and \$4,000,000 in net working capital above the par of its bonds.

The company, however, has become principally a denatured alcohol producer. Every plant it owns is grinding out denatured alcohol to the limit of capacity and profits on this business are running \$300,000 to \$400,000 per month.

—Mar.

(1) Letter to Stockholders About Distilling Co. of America Dissolution Plan.—In a letter to stockholders of this company, dated March 3, 1917, Charles H. Stoll, attorney, of 42 Broadway, New York, advises extreme caution and gives his opinion as to the probable effect on their stock of the proposed dissolution of The Distilling Co. of America.

The attorney in the letter stated that he found he Distillers Securities Corp. is a holding company, owning 311,003 1/2 shares of pfd. and 456,002 1/2 common of The Distilling Co. of America—about 99 1/2% of all the stock. These shares are pledged as collateral to an authorized issue of \$16,000,000 of 25-year bonds, due 1927.

The annual report of the Distillers Securities Corp., dated June 30, 1916, shows, in the composite balance sheet, net current assets of \$12,925,435, outstanding bonds of the Distillers Securities Corp. amounting to \$12,925,435 and of the American Spirits Mfg. Co. amounting to \$1,200,000. These current assets are the combined current assets of the Distillers Securities Corp., The Distilling Co. of America and of all the subsidiaries, composing the working capital of the business.

It is pointed out that if the assets of The Distilling Co. of America, mainly stocks of subsidiaries, are sold, as planned, the receipts must be used by the mortgage trustee in purchasing bonds, for which the trustee may pay 105. Thus, if the working capital is used to buy the various working plants the mortgage would not be fully satisfied and the most valuable alcohol plant, the Great Western Distillery, standing in the name of the American Spirits Mfg. Co., would remain subject to a prior mortgage of \$1,200,000. This, if the dissolution plan is carried out, might cause the company to find itself without working capital, an unsatisfied mortgage on all its plants and an additional unsatisfied mortgage of \$1,200,000 on its most productive alcohol plant. Added embarrassments are the guarantees of The Distilling Co. of America, running 40 years, on the pfd. shares of the U. S. Industrial Alcohol Co., and the Cuba Distilling Co. shares, now subject to litigation.

The letter suggests that proxies be sent to James F. McNamara, trust officer of the Metropolitan Trust Co.; Alex. P. White, of the General Fireproofing Co., and Mr. Stoll, authorizing them to vote for a postponement of further action until a complete plan is worked out and submitted for the stockholders' approval either at an adjourned meeting or at the forthcoming annual meeting, March 21. (See issue of March 2, page 8, of this Service.)

(2) Dividend Discussion.—On March 8, 1917, the "Wall Street Journal" said that the weakness in this company's stock, which sold down to 18 1/2, as compared with high of 54 1/2 in 1916, reflected uncertainty as to the continuation of dividends on 6% basis by directors at their meeting in March.

Dividends were put on this basis in May, 1916, the company having paid no dividends for two years previous, 1% in 1913 and 2% from 1909 to 1912, inclusive. As result of war orders the company earned \$10.30 per share on \$32,303,233 capital stock outstanding for fiscal year ended June 30, 1916. During the year before war Distillers earned \$2.28 per share.

The company's plants are running at full capacity on alcohol orders for pow-

der manufacturers. Monthly profits are said to be at the rate of \$300,000 to \$400,000.

(3) Proxies Sought by Chairman.—It was stated March 13, 1917, that Alvin W. Krech, chairman of the Board of Directors of this company, had sent a letter to the stockholders requesting their proxies in the name of Julius Kessler, A. G. Hodges and M. A. Holsinger, to be voted at the annual meeting on March 21 in order, it is stated, to insure the continuance of the existing management. A statement of the results of operations for the six months ended Dec. 31, 1916, which will be submitted to the stockholders, will show net earnings for that period of \$1,324,593.

(4) Income Account, Six Months Ended Dec. 31, 1916, compares as follows:

	6 Mos. Ended Dec. 31, 1916	12 Mos. Ended June 30, 1916
Gross profits....	\$2,159,915	\$4,806,755
Net after chgs. and taxes....	1,324,593	3,327,094
Surp. after divs.	399,082	2,842,546

(5) Earnings on Stock.—It was stated March 19, 1917, that this company's net profit of \$1,324,593 is equal to 4.10% earned in six months on \$32,282,181 capital stock, compared with 10.68% earned in the fiscal year ended June 30, 1916, on \$31,435,681 capital stock.

(6) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$8,889,928, compared with \$8,490,486 June 30, 1916.

(7) Two Directors Elected.—It was stated March 21, 1917, that after a postponement of three hours necessitated by a fight over proxies submitted by C. H. Stoll, attorney for S. M. Rice, former head of this company, the stockholders at the annual meeting at Jersey City, N. J., elected John K. Hodges and H. J. M. Cadeza as directors.

Mr. Stoll asserted that he represented 400 shareholders with 40,000 shares of stock. He said that Levi Mayer, general counsel of the Distillers' Securities Corp., had sold more than \$600,000 of pfd. stock of the Distilling Co. of America to the Distillers' Securities Corp.

Efforts are being made to wipe out the former company to escape double taxation. Mr. Mayer admitted that he had received \$70 a share for 5,600 shares, representing cost, plus 3% interest.

(8) New Officers.—Announced March 22, 1917, that the directors of this company had elected the following officers for the ensuing year: Alvin W. Krech, Chairman of the Board; Julius Kessler, Pres.; H. J. M. Cadeza, Vice-Pres.; Thos. A. Clark, Treas., and M. A. Holsinger, Sec'y. The following executive committee was elected: Alvin W. Krech, W. H. Kiernan and John K. Hodges, with the Pres. ex-officio.

(9) Official Statement.—After the meeting of directors of this company March 22, 1917, the following official statement was given out: "At the annual meeting held Wednesday by unanimous vote of 263,484 shares, the annual report was approved. The stockholders thus confirmed the policy of the management, which considers it for the best interests of the company to continue to purchase from time to time the outstanding bonds to the extent of net earnings, and the surplus of the company will, with due regard to the rights of the stockholders to receive from time to time a net portion of net earnings in the shape of dividends, comfortably justify."

"Since the present management took hold it has already acquired \$4,033,000 of its bonds. Notwithstanding the unparalleled abnormal high price of corn (being about twice the normal price), the net income of the company beginning Jan. 1, 1917, March being estimated, is on a basis of over 8% on its stock."

"In view of the heavy discount at which the bonds are selling and the great saving in interest that will be effected, the management regards it as

JANUARY 1 TO APRIL 30, 1917

conservative business to continue purchasing bonds, though in doing so the dividend be reduced for the time being.

"By purchasing the bonds which are selling at a substantial discount—and which bear 5% interest—the company is effecting not only a great saving in interest payments, but is constantly decreasing the liabilities of the company, which are a charge on the assets ahead of the stock.

"All of the alcohol plants of the company are running at full capacity."

(10) Dividend Reduced.—Announced March 22, 1917, that this company had declared an annual dividend of 2%, compared with a previous rate of 6%. It is payable quarterly on April 18, July 18, Oct. 18 and Jan. 18.

(11) Comment on Earnings, 6 Months Ended Dec. 31, 1916.—On March 22, 1917, the "Boston News Bureau" said, in part: "In its six months to Dec. 31 Distillers Securities earned a balance for its \$32,282,000 stock of \$1,324,593, equal to 4.1%, or at an annual rate of 8.2%. This compared with share profits in the fiscal year to June 30, 1916, of 10.3%.

"If Distillers were to actually earn but 8.2% for the current fiscal year the result would be disappointing enough. It ought to be able to earn more than that from its alcohol contracts alone.

"In the first half of its 1916 year Distillers earned a balance of but \$541,775, equal to less than 2% for the stock. And yet for the full 12 months net for the shares was equal to 10.3%. The second half year is normally better than the first half and there is reason to expect that history will repeat itself in 1917.

"It is worth noting, however, that during the half year to Dec. 31 last the amount charged against earnings for additions, maintenance and repairs was \$238,771, against \$231,771 in all of the 1916 fiscal year. Here is an increase running at the rate of nearly 1% on the stock.

"Distillers Securities now has in its treasury \$2,033,038 par of its bonds, which, if cancelled, would bring its bonded debt down to \$10,735,610, of which \$10,493,102 would be in the hands of the public. Against these bonds is a balance of working capital of \$12,957,044."

(12) Comment on Dividend Reduction.—Commenting on the reduction in dividend by this company the "Wall Street Journal" March 23, 1917, said, in part: "The reduction of Distillers' Securities dividend from a 6% to a 2% basis caused little surprise. The stock had been selling around 20 recently, where it yielded 30%, as compared with a high of 64½ in April and May last year. In the middle of the latter month the stock was put on a 6% basis; no dividends were paid during 1914 and 1915; 1% was paid in 1913, and 2% from 1909 to 1912, inclusive.

"While the company earned an average of \$4.29 per share on an average amount of \$32,082,527 stock outstanding during the 14 years ended June 30, 1916, its average earnings during the years 1908 to 1913, inclusive, were \$1.91 per share. In 1916 it earned \$10.30 per share, and for the six months ended Dec. 31, 1916, \$4.02, the equivalent of \$8.04 for twelve months.

"The directors do not fear prohibition, for 37 States must go dry before a constitutional amendment is possible. They believe that the movement will never gain a foothold in the industrial States and that 'bone-dry' laws will drive certain of the 22 dry States wet next Fall."

(13) Injunction Order Filed.—See Distilling Co. of America.—Item No. 5.

(14) Dissolution of Distilling Co. of America Enjoined.—On March 23, 1917, Vice-Chancellor Lane filed an opinion in the Court of Chancery enjoining the dissolution of the Distilling Co. of America. The complaint was filed by Joseph H. Allen and the U. S. Industrial Alcohol Co. The court held that dissolution of the company would amount to turning over the assets of the company, valued at about \$66,000,000, to the Distillers' Securities Corp.

—Apr.

(1) Plant Placed at Disposal of Government.—Stated on April 7, 1917, that an offer had been made to and acknowledged by the State Department, placing at the disposal of the United States Government for war purposes the plants of this company as well as its facilities for producing alcohol, thus assuring an ample supply of this essential to meet the requirements of the Government for the manufacture of explosives. This offer, coming as it does at a time when enormous demands, due in a great measure to pre-prohibition purchasing, are being made for the company's product, is especially significant from the viewpoint of industrial patriotism that has distinguished many recent announcements of similar nature.

The Distillers company controls at least 100 separate and distinct establishments for the distilling and handling of grain spirits chiefly used in the manufacture of beverages for which purpose there is stated to be a decided preference for this class of distillate. These plants are located in different sections of the country, and although several are not now in operation owing to "dry State" restrictions, they represent a capacity for producing approximately 800,000 proof gallons of alcohol per day, making available an annual supply of about 110,000,000 gals.

DISTILLING CO. OF AMERICA.

(1) Order Against Dissolution Continued.—On March 1, 1917, Vice-Chancellor Lane at Newark, N. J., continued an injunction against the proposed dissolution of this company, a New Jersey corporation capitalized at \$66,000,000, and denied an application for dismissal of a bill seeking a permanent injunction. Joseph H. Allen, a pfd. stockholder, objected to the proposed dissolution. The injunction will continue in force until suits against the Distilling Co. are settled.

(2) Letter About Dissolution Plan.—See Distillers Securities Corp.—Item No. 1.

(3) Proxies Sought.—See Distillers' Securities Corp.—Item No. 3.

(4) Distillers' Securities Corp. Meeting.—See Distillers' Securities Corp.—Item No. 7.

(5) Injunction Order Against Dissolution Filed.—It was announced at Trenton, N. J., March 22, 1917, that Vice-Chancellor Lane had filed an opinion in the Court of Chancery enjoining the dissolution of this company. Joseph P. Allen and the United States Industrial Alcohol Co. filed the suit against the dissolution and Samuel M. Rice filed a complaint for the appointment of a receiver in case the dissolution was permitted.

The court held that the dissolution of the company would amount to turning over the assets of the company, valued at about \$66,000,000, to the Distillers' Securities Corp.

(6) Dissolution Enjoined.—See Distillers Securities Corp.—Item No. 14.

DIVIDEND COPPER SYNDICATE.

(1) Listed on New York Curb.—On April 19, 1917, the New York Curb Market Association listed 2,000,000 of this company's shares, par value \$1.

DIXIE SECURITIES CORP.

(1) Incorporated on March 30, 1917, in Delaware, with a capital of \$1,000,000 to deal with securities of all kinds. Incorporators: Harry Emmons, Forrest H. Emmons and Kenneth L. Emmons, Wilmington, Del.

DIXON (JOSEPH) CRUCIBLE CO.

(1) Extra Dividend.—Announced Jan. 2, 1917, that this company had declared an extra dividend of 20% and the regular semi-annual dividend of 2½%. During 1916 the company paid 5% in regular dividends and extra dividends of 45%, making 50% for the year.

—Mar.

(1) Addition.—On March 22, 1917, it was stated that this company, Jersey City, N. J., manufacturer of graphite products, would build a three-story addition to its plant to cost \$250,000.

—Apr.

(1) Report, Year Ended Dec. 31, 1916, shows surplus of \$4,976,870, indicating net earnings applicable for dividends after all charges of \$3,767,404, equal to over \$188 per share on the \$2,000,000 capital stock outstanding. Approximately \$412,000 was paid out of earnings for improvements, and the company is understood to be erecting a new addition to its plant, which will cost approximately \$250,000.

The annual meeting time is April 18.

DODD-SIMPSON PRESS, LTD.

(1) Incorporated on March 16, 1917, in Canada, with a capital of \$600,000 divided into 60,000 shares of \$10 each, to carry on generally the business of printing, advertising, engraving and publishing in all its branches. Incorporators: Gerald A. Coughlin, Francis G. Bush, Herbert Jackson, Geo. E. Drennan and Alexander G. Yeoman. Chief place of business, Hamilton, Ont.

DODGE MANUFACTURING CO., MISHAWAKA, IND.

(1) Earnings Statement, Year Ended Dec. 31, 1916, shows net sales of \$2,894,813 and net earnings of \$646,637. The company reported more unfilled orders on its books for power transmission equipment than at any previous time in its history. The unfilled orders at Oneida alone reported as equivalent to approximately 25% of the total shipments in 1916. In his statement to shareholders Pres. Mix predicted a substantial increase in volume of business in 1917. Assets total \$4,239,772, with cash of \$385,539.

(2) Purchase Ratified.—Announced March 10, 1917, that stockholders of this company had ratified the purchase of the Oneida Steel Pulley Co. and the Keystone Steel Pulley Co., Oneida, N. Y.

(3) Acquisitions.—Reported on March 26, 1917, that this company had acquired the properties and products of the Oneida Steel Pulley Co. and the Keystone Steel Pulley Co. of Oneida, N. Y. The Dodge Steel Pulley Corp. was formed to control the two Oneida companies and will be a subsidiary of the Dodge Manufacturing Co. The sale and distribution of products of the corporation will be under the supervision of the Dodge Sales & Engineering Co., Mishawaka, Ind.

—Apr.

(1) \$285,000 Preferred Listed in Chicago.—The Chicago Stock Exchange governors announced April 19, 1917, the listing of \$285,000 pfd. stock of this company.

DODGE STEEL PULLEY CORP., SYRACUSE, N. Y.

(1) Capital Increased.—On Feb. 28, 1917, the company filed notice at Albany, N. Y., of an increase in shares from 10 to 10,000 shares, capital stock from \$550 to \$560,000.

(2) New Subsidiary.—See Dodge Manufacturing Co.—Item No. 3.

DODO MANUFACTURING CO.

(1) Incorporated on Feb. 24, 1917, in Delaware, with a capital of \$300,000, to manufacture carpet sweepers and other implements. Incorporators: Samuel B. Howard, Geo. V. Reilly and Arthur W. Brinton, all of New York.

DOE RUN LEAD CO.

(1) Merger Planned.—See St. Joseph Lead Co.—Item No. 1.

DOLLY VARDEN MINES CO., CHICAGO.

(1) Capital Increased.—On March 3, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$350,000 to \$1,200,000.

JANUARY 1 TO APRIL 30, 1917

DOME EXTENSION MINES CO., LTD.

^{*(1)} Merger Discussion.—See Dome Mines Co., Ltd.—Item No. 2.

DOME LAKE MINING CO.

^{*(1)} Report, Year Ended Dec. 31, 1917, shows gross revenue of \$18,664 and expenditures of \$111,451, leaving a deficit of \$92,787.

^{*(2)} New Directors.—It was announced Feb. 16, 1917, that at the annual meeting of this company the Board of Directors was increased. A. A. McKelvie, Thomas McCamus, C. L. Sherrill, George Taylor, S. S. Ritchie, F. L. Papst and S. J. Dark were elected.

—Apr.

^{*(1)} Capital Increase Authorized.—On April 15, 1917, the "Financial Times," Montreal, said this company had authorized an increase of 50% in the capital. The increase is from \$2,000,000 to \$3,000,000. The par value of the stock is \$1.

• DOME MINES CO., LTD.

^{*(1)} Production, December, 1916.—Announced Jan. 3, 1917, that this company produced in December 30,000 tons of ore and \$188,500 bullion, compared with 37,900 tons of ore and \$177,000 bullion in November and 49,200 tons of ore and \$185,000 bullion in October.

^{*(2)} Stock Issue Planned.—It was stated Jan. 10, 1917, that this company is planning to make a new stock issue to provide for mill extensions. There is \$1,000,000 par value of unissued stock in the treasury, of which \$400,000 will be utilized to take up the option of Dome Extension, and the balance sold to the shareholders pro rata at \$20 a share.

This would net \$1,800,000, which would be applied to doubling the capacity of the mill, bringing the possible tonnage from 1,500 to 3,000 tons a day, which would provide for an increased dividend.

—Feb.

^{*(1)} Output, January, 1917.—Announced Feb. 3, 1917, that this company reported for January tonnage milled 39,600; bullion produced, \$181,600. In December the tonnage milled 39,000; bullion produced, \$183,300.

^{*(2)} Merger Discussion.—On Feb. 7, 1917, the Montreal "Daily Star" said: "A meeting for merging of the Dome Extension and Dome Mines, Ltd., is now apparently only a matter of time. This, no doubt, accounts for much of the buying of the former during the past couple of days, most of which has had its origin in New York."

—Mar.

^{*(1)} Operation Results, February, 1917.—It was announced March 2, 1917, that this company reported for February total tonnage milled as 36,270 and bullion produced, \$172,000, compared with January tonnage milled, 39,600, and bullion produced, \$181,000.

—Apr.

^{*(1)} Operating Results, March, 1917.—On April 5, 1917, this company, in its report of operating results for March, gave the amount of tonnage milled as 36,700 and bullion produced as 36,270. This compares with February tonnage milled 36,270 and bullion produced \$172,500.

DOMINION BRIDGE CO.

^{*(1)} Extra Dividend.—Announced Jan. 17, 1917, that this company had declared a regular quarterly dividend of 2% and 2% extra.

—Apr.

^{*(1)} Dividend Rate Increased to 10%.—On April 19, 1917, the "Montreal Daily Star" said that at the regular quarterly meeting of this company April 18 the bonus which had been in effect since November, 1915, was discontinued and the dividend rate increased from 8% to 15%, the directors declaring a dividend of 2½%, payable May 15 to stock of record April 30.

^{*(2)} Further Disbursements Probable After Completion of Quebec Bridge.—On April 21, 1917, the "Financial Times," Montreal, Que., said, in part: "In spite of the decision of the Board of Directors of the Dominion Bridge Co. to discontinue the bonus on the company's stock which has been paid since November, 1915, certain interests on the Street look for further disbursements on the company's stock after the completion of the Quebec Bridge. This event Pres. Phelps Johnson believes will take place in August. Mr. Johnson points out that in spite of having purchased material from the mills at very favorable prices, transportation difficulties have delayed the completion of the bridge very considerably."

^{*(3)} Canada Orders 2,500 Tons of Steel for Piers.—On April 24, 1917, Dow, Jones & Co. stated that the Department of Railways and Canals of the Canadian Government Commission had placed a contract with this company for 2,500 tons of structural steel for two piers and pier sheds to be constructed in the harbor of Halifax, Nova Scotia. The steel will be furnished by the Bethlehem Steel Co.

The Dominion Harbor Commission has also taken bids on 3,000 tons of structural steel for pier sheds at Quebec, Que. Recent bids on the construction of the second unit of the Eaton department store at Toronto, requiring 12,000 tons of steel, were so high that it was decided to postpone the placing of the contract.

• DOMINION CANNERS, LTD.

^{*(1)} Report, Year Ended Dec. 31, 1916, shows profits of \$668,007, as compared with a loss on operations in 1915 of \$294,439, and profits in 1914 of \$330,852. From this was deducted bond interest of \$111,230, as compared with interest charges of \$113,181 in the previous year. Dividends on the pfd. and usual provisions took \$279,176, leaving a net surplus on the year's operations of \$277,601, as compared with a deficit on operations in 1915 of \$446,620. Adding a balance from 1916 of \$180,813, the balance to credit and profit and loss stands at \$458,414.

^{*(2)} New President.—Announced March 7, 1917, that J. J. Nairn had been elected Pres. of this company in place of H. Richardson. W. P. Innes was made 1st Vice-Pres. and R. L. Innes, 2d Vice-Pres.

^{*(3)} Dividends Resumed on Pfd.—Announced March 9, 1917, that this company had declared the regular quarterly dividend of 1½% on the pfd. stock, payable April 2. Books close March 18 and reopen April 2. The last previous payment was 1½% April 1, 1915.

—Apr.

^{*(1)} Simeco Plant Burned.—A Montreal dispatch April 19, 1917, stated that the Simeco, Ont., plant of this company, valued at \$200,000, had been entirely destroyed by fire on that date.

DOMINION CUTLERY CO., LTD.

^{*(1)} Operations.—It was announced Feb. 22, 1917, that this company, Montreal, Que., had leased two three-story buildings at Westport, Ont., where it will turn out drop forgings, knives, scissors, coffin trimmings, etc. The company recently was incorporated with a capital stock of \$1,000,000.

DOMINION FOODS, LTD.

^{*(1)} Capital Decreased.—On Jan. 3, 1917, letters patent were issued in Canada decreasing the capital stock of this company from \$1,000,000 to \$940,000. The decrease consists of 600 pfd shares of \$100 each.

DOMINION FOUNDRIES & STEEL, LTD.

^{*(1)} New Name Planned.—See Dominion Steel Foundry Co., Ltd.—Item No. 1.

DOMINION IRON & STEEL CO., LTD.

^{*(1)} New Equipment.—It was announced Feb. 9, 1917, that this company had completed plans for the purchase of a 2,000-kilowatt electric generating unit and water tube boilers of 3,000 horsepower for its mines at Wabana, Newfoundland. Other equipment will be bought and the total cost of improvements will be approximately \$1,000,000.

DOMINION OIL & GAS CO.

^{*(1)} Incorporated on Jan. 19, 1917, in Delaware, with a capital of \$1,000,000, to drill and bore for oil, gas, etc. Incorporators: Leonard F. Kenney, E. E. Seler, Chicago, Ill., and F. A. Bridge, Madison, Wis.

DOMINION PORTLAND CEMENT CO., WHANGAREE, N. Z.

^{*(1)} New Zealand Plant Started.—See Fuller Engineering Co.—Item No. 1.

• DOMINION POWER & TRANSMISSION CO., LTD.

^{*(1)} Earnings, January and February, 1917, were \$453,200 gross, an increase of \$32,536 over the corresponding two months of 1916. Net was \$208,797, a gain of \$10,928, and the surplus, after maintenance, depreciation and interest, was \$106,292, an increase of \$11,162.

DOMINION REDUCTION CO.

^{*(1)} Enjoined from Taking Peterson Lake Tailings.—See Peterson Lake Silver Cobalt Mining Co.—Item No. 2.

DOMINION SALES & MANUFACTURING CO.

^{*(1)} New Company Planned.—It was stated Jan. 18, 1917, that plans were being prepared for the incorporation of this company in Indiana, with a capital of \$260,000. Guy C. Hanna is to be Pres. While it will be an Indiana corporation, it will transact business only in Canada, with headquarters at Toronto. The business of the company will be to dispose of the royalties and perhaps later engage in the manufacture of a pneumatic puncture-proof tire invented by Hanna.

• DOMINION STEEL CORP., LTD.

^{*(1)} Yearly Earnings, Estimated.—On Jan. 4, 1917, it was stated that this company likely would report a surplus of approximately \$10,000,000 for the year ending March 31, 1917. That would represent in excess of 30% earned, against less than 10% in 1915-1916, and an average of less than 4% in the years prior to the war.

Early in the corporation's current year estimates of around 20% were considered extremely optimistic. They have been revised, as steel prices have risen to unprecedented levels, and monthly earnings have expanded accordingly, until they are about \$1,000,000 a month.

If the \$10,000,000 surplus is realized for the year, the corporation, with \$4,000,000 carried forward in profit and loss balance a year previously, would have a total surplus equal to \$50 a share on the \$32,000,000 common stock.

^{*(2)} Output in 1916.—It was announced Jan. 3, 1917, that this company's output in 1916 showed a new record in tonnage of ingots, the figures being about 8% higher than in 1915. Pig iron production was more than 12% in excess of the previous year's showing. Coal output was lower at about 4,500,000 tons, against 5,000,000 in 1915, recruiting and the shortage of shipping facilities entering as adverse factors.

Large expenditures were made during the year for improvements and extensions to plant, as well as for renewals.

The statement adds: "The tonnage of steel on order is sufficient to keep the works actively employed for several months, and so far there is no indication of any slackening in the demand for all the materials that the company can produce."

JANUARY 1 TO APRIL 30, 1917

The earnings on the common reached \$30 per share.

—Mar.

¹(1) **Dividend Discussion.**—On March 17, 1917, the "Financial Post of Canada" said that the possibility of a dividend being paid on the common stock of this company was arousing considerable interest. The company, when it closes its year, will show, it is reported, net earnings of over \$9,500,000. As the usual deductions for sinking fund, bond interest and pfd. dividends would account for \$3,000,000, \$6,500,000 would be left available for the common stock. This would represent 20% on the common stock.

²(2) **Dividends Resumed on Common.**—Announced at Montreal March 23, 1917, that this company had declared a dividend on the common stock at the rate of 4% per annum, the first quarterly disbursement being payable April 16 to stock of record March 31. The regular dividend of 1½% on the pfd. stock also was declared, payable May 1 to stock of record April 15.

DOMINION STEEL FOUNDRY CO., LTD.

¹(1) **Plans of Subsidiary.**—See Hamilton Steel Wheel Co., Ltd.—Item No. 1.
¹(2) **Merger Plan Reported Dropped.**—See Nova Scotia Steel & Coal Co., Ltd.—Item No. 4.

—Feb.

²(1) **Dividends.**—Announced Feb. 10, 1917, that this company had declared an additional dividend of 5% on the common stock and the regular quarterly dividend of 1½% on the pfd., both payable March 1 to stock of record Feb. 22. This brings the total for the year to date on the common to 25%. During the previous year the directors paid 40% on the common.

²(2) **Dividends.**—It was announced Feb. 14, 1917, that at a meeting of this company's directors, an additional dividend of 5% on the common stock was declared, this bringing the total amount disbursed so far in 1917 to 25%. In 1916 the directors paid 40% on the common stock. The regular quarterly dividend of 1½% on the pfd. stock was also declared. The dividends are payable March 1 to shareholders of record Feb. 22. Books close from Feb. 23 to 23.

—Apr.

⁴(1) **Merger.**—A Montreal, Que., dispatch April 11, 1917, stated that merger plans were being carried out by this company and its subsidiary, the Hamilton Steel Wheel Co., Ltd., through an exchange of shares of the two companies for shares of a company to be incorporated under the name of "Dominion Foundries & Steel Limited."

The exchange of shares will be made on the following basis: Two and one-half common shares of the new company for each common share of Dominion Steel Foundry; one 8% cumulative pfd. share of the new company for one 1% preference share of the Dominion Steel Foundry; one common share of the new company (par \$100) for four shares (par \$25) of Hamilton Steel Wheel Co.

The Hamilton Steel Wheel Co. continues to operate actively in the manufacture of shells and will not resume its regular business until after the war.

It will be the first Canadian firm to manufacture steel wheels for railroad rolling stock. The head office of the new concern will be at Hamilton and directors will consist of U. W. Sherman, Pres.; W. J. Verity, Robert Hobson, J. J. Hart, Paul J. Myler, W. E. Phil, S. A. Crone, Frank A. Sherman and A. G. Wright, inclusive.

• **DOMINION TEXTILE CO., LTD.**

²(1) **New Director.**—It was announced Feb. 1, 1917, that W. A. Black had been elected a director of this company to fill the vacancy caused by the death of Senator Mackay. Mr. Black is Vice-Pres. and managing director of the Oglivie Flour Mills Co., Ltd., director of several other companies, including the

Kaminstiquia Power Co., of which he is managing director, and is Vice-Pres. of the Montreal Board of Trade.

DOMINION WIRE ROPE CO., LTD.

²(1) **Officers and Directors.**—It was stated March 3, 1917, that at this company's annual meeting, the following officers and directors were elected: Pres., F. W. Fairman; Vice-Pres. and Man. Dir., F. H. Hopkins; Secy. and Treas., J. C. Riddell; Board of Directors, F. W. Fairman, F. H. Hopkins, J. C. Riddell, D. C. W. Colby, E. E. Fairman and G. B. Butters.

DONAHUE OIL & REFINING CO.

⁴(1) **Incorporated** on April 18, 1917, in Delaware, with a capital of \$1,000,000, to carry on a general oil business in all its branches. Incorporators: K. M. Dougherty, C. Fearon and Ferris Giles, Wilmington, Del.

DONALD STEAMSHIP CO.

²(1) **Sold to Oriental Navigation Co.**—See Oriental Navigation Co.—Item No. 1.

DONNACONA PAPER CO., LTD.

⁴(1) **Violation of Anti-Trust Law Alleged.**—See International Paper Co.—Item No. 1.

DONNER STEEL CO., INC.**BUFFALO, N. Y.**

²(1) **Capital Increased.**—On Jan. 4, 1917, this company, Buffalo, N. Y., filed notice at Albany, N. Y., of an increase in capital from \$2,500,000 to \$9,000,000.

—Feb.

²(1) **Report, Year Ended Dec. 31, 1916.**—It was announced Feb. 28, 1917, that the first annual report of this company and subsidiary companies shows total net earnings after deducting all expenses incident to operation of \$1,166,053. Net income after interest on bonds, etc., \$696,689; net income carried to surplus after pfd. dividends, \$547,462.

DORT MOTOR CAR CO.,**FLINT, MICH.**

²(1) **Capital Increased.**—On Feb. 13, 1917, it was stated that this company had decided to increase its capital stock from \$500,000 to \$1,500,000.

DOUBLE DRIVE MOTOR CO.,**(THE) KANSAS CITY, MO.**

¹(1) **Incorporated** in December, 1916, Missouri, with a capital of \$500,000, to manufacture roofing material. Incorporators: Theodore Dittmars, Walter Beck and S. B. Gatewood.

DOUBLE FABRIC TIRE CO.,**AUBURN, IND.**

¹(1) **Incorporated** in January, 1917, in Indiana, with a capital of \$900,000, to manufacture automobiles tires. Directors: Wm. H. Willenar, A. L. Murray and Simon J. Strauss.

DOUGLAS (JOHN) CO.,**CINCINNATI, O.**

²(1) **Capital Increased.**—On Feb. 17, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$30,000 to \$850,000.

—Mar.

²(1) **Melon Cut.**—On March 28, 1917, directors declared a dividend on the common stock amounting to 1.168%. The present common amounted to \$30,000. The dividend will make the outstanding common equal \$350,000. Stockholders will receive 11½ new shares for each share of common held.

The dividend was declared out of surplus. The balance in the surplus fund after the dividend amounts to \$340,641.

George A. Sawyer, of Channer & Sawyer, was elected an additional director. Other directors were re-elected. The management remains unchanged.

DOUGLAS (W. L.) SHOE CO.

²(1) **Pfd. Stock Increase.**—Announced Feb. 27, 1917, that at a special meeting of stockholders of this company it was

voted to amend the agreement of association and articles of organisation by increasing the pfd. stock from \$1,500,000 to \$2,500,000, making a total capitalisation of \$3,500,000.

—Apr.

⁴(1) **Financial Statement.**—On April 18, 1917, this company, incorporated under the laws of Massachusetts, filed with the Massachusetts Secretary of State a statement of its financial condition, dated Jan. 5, which compares as follows:

Assets—	1916	1915
Plant	\$184,657	\$158,338
Fixtures		84,509
Merchandise	3,143,942	1,327,976
Cash and debts receivable	942,219	963,353
Sundry assets	143,268	95,048
Good-will	933,033	933,033
Total	\$5,347,121	\$3,513,200
Liabilities—		
Capital stock	\$2,500,000	\$2,500,000
Accts. payable	618,697	441,925
Floating debt	1,610,000	300,000
Surplus	620,424	271,335
Total	\$5,347,121	\$3,513,200

DOUSE RUBBER CO.

²(1) **Incorporated** on March 14, 1917, in Delaware, with a capital of \$2,500,000, to conduct a general trading, mining and manufacturing business. Incorporators: John S. Logan, John H. Redmond and Arthur Nikolario, all of New York.

DOW CHEMICAL CO.

¹(1) **Extra Dividend on Common.**—Announced Jan. 17, 1917, that this company had declared the regular quarterly dividend of 1¼% and an extra of 5¼% on the common stock.

¹(2) **Dividends.**—It was announced officially Jan. 22, 1917, that this company had declared an extra cash dividend of 6¼%, in addition to the regular quarterly dividend of 1¼% on the common, payable Feb. 15 to stock of record Feb. 5. The previous report about an extra dividend of 5¼% was incorrect.

¹(3) **Comment on Dividends.**—On Jan. 23, 1917, the "Wall Street Journal" said that, including the above dividend, this company had distributed to common stockholders extra dividends aggregating 100% in pfd. stock and 91¼% in cash, making a total of 191¼% since and including Sept. 18, 1915.

It was decided at the annual meeting in June to discontinue the payment of large dividends and convert surplus to new construction and for expansion of the business. This accounts for the lapse in payments between June and December. New buildings have been erected by the company for the manufacture of indigos and dyes, and operations were expected to commence the early part of this year.

Although no statements of earnings are issued by the company, it is said that earnings during 1916 ranged from \$120,000 to \$400,000 monthly, equal to from approximately \$100 to \$320 per share annually on the common stock.

—Feb.

²(1) **New Production.**—A Midland, Mich., dispatch Feb. 18, 1917, stated that this company had begun the manufacture of synthetic indigo in that city. It is stated that the daily output is about 5,000 pounds of 20% paste. Paste of this strength is quoted at \$1.50 a pound in the original package on the New York market.

This departure by the Dow Co. really marks an important step in the history of American coal tar color manufacture. Indigo is perhaps the most used of all colors in the textile field, and German synthetic indigo held this market firmly up to the opening of the war.

—Mar.

²(1) **Indigo Production.**—It was stated March 16, 1917, that this company is producing at the rate of approximately 400 pounds of 20% indigo paste per day. The company has added addi-

JANUARY 1 TO APRIL 30, 1917

tional equipment that should give an output of 20% paste approximating 1,000 pounds per day, and when full set of equipment with which the company is experimenting at the present time is installed the output should total 5,000 pounds daily.

Domestic consumption of indigo aggregates approximately 10,000,000 pounds annually, and as other companies are preparing to enter this field the experiments of the Dow Chemical Co. constitute an important step toward rendering the United States independent of foreign manufacturers.

—Apr.

*(1) Extra Dividend of 6¼% on Common.—This company April 18, 1917, declared the regular quarterly dividend of 1¼% and an extra of 6¼% on the common stock, payable May 15 to stock of record May 5.

*(2) Making 1,000 Pounds of Indigo Daily.—On April 24, 1917, the "Boston News Bureau" stated that this company is producing 1,000 pounds of indigo daily, according to authentic information, at its Midland, Mich., plant. The full capacity of the plant is 5,000 pounds a day.

DOW DRUG CO.

*(1) Initial Dividend on Common.—Announced March 23, 1917, that this company had declared an initial dividend of 1¼% on the common stock, payable May 1, in addition to a dividend of 1¼% on the pfd., payable April 1.

DOWNEY SHIPBUILDING CORP.

*(1) Incorporated on April 7, 1917, in Delaware, with a capital of \$5,000,000 to build boats and ships of all kinds. Incorporators: Herbert E. Latter and C. M. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

DRAGON CONSOLIDATED MINING CO.

*(1) Initial Dividend.—Announced Jan. 12, 1917, that this company had declared an initial dividend of one cent a share.

DRAPER CORP.

*(1) Stock Sale.—It was announced Jan. 3, 1917, that a Boston banking syndicate had purchased 40,000 shares of this company's stock, in equal parts, from George A. Draper and the estate of Eben S. Draper, representing less than half the holdings of each. It represents a diversification of investments by the Drapers and in no wise affects the personnel of the management.

Parkinson & Burr, Lee, Higginson & Co. and Estabrook & Co. are offering 40,000 shares of Draper Corporation stock at \$135 a share.

—Feb.

*(1) Financial Condition, Jan. 1, 1917.—It was announced Feb. 12, 1917, that this company, incorporated in Maine, had filed in Massachusetts a statement of its financial condition as of Jan. 1, 1917, which compares as follows:

	1917	1916
Assets—		
Real estate.....	\$1,837,962	\$1,866,290
Machinery.....	1,135,963	1,128,474
Material, stock in proc.....	1,934,524	1,748,469
Cash and debts receivable.....	5,934,112	4,403,603
Patent rights and good-will.....	5,000,000	100,000
Miscellaneous ..	2,684,231	2,950,309
Total	\$18,524,796	\$12,197,147
Liabilities:		
Capital stock.....	\$17,500,000	\$8,000,000
Accts. payable.....	221,681	233,093
Profit and loss.....	803,114	3,964,053
Total	\$18,524,796	\$12,197,174

DRESSLER (MARIE) MOTION PICTURE CORP.

*(1) Incorporated on Feb. 17, 1917, in Delaware, with a capital of \$2,000,000, to conduct places of amusement. Incorporators: Arthur W. Britton, Louis H. Gunther and Harry W. Davis, New York City.

DRIGGS MFG. CORP.

*(1) Incorporated on Jan. 15, 1917, in New York, with a capital of \$300,000, to deal in machine tools, foundry, factory supplies, ammunition fuses, explosives, marine craft and aeroplanes. Incorporators: W. Zane, W. Abramson and L. L. Driggs, Jr., 120 Broadway, New York.

● DRIGGS-SEABURY ORDNANCE CO.

*(1) Report, Year Ended Dec. 31, 1916, shows \$3,149,436 as net profits from operations, after deducting \$5,998,313 for cost of sales and general expenses. The balance after taxes, charges and pfd. dividends is \$695,181, and surplus after common dividends, \$35,492.

*(2) Earnings on Stock.—It was stated Jan. 31, 1917, that this company's 1916 balance of \$695,181, after payment of pfd. dividends, is equal to 7.86% on \$8,835,500 common stock.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$294,069.

—Mar.

*(1) To Report Earnings Quarterly.—Reported on March 27, 1917, that this company would in future issue quarterly reports of earnings, the first report, for the quarter ending with March being expected to appear in the latter part of April.

It has been rumored that this report will show net earnings of \$18 to \$20 a share on the common stock, or at the annual rate of between \$72 and \$80. All that directors will say on this subject is that the quarter's results will be gratifying.

The United States Government has not placed an order for several thousand Lewis machine guns with the company, as has been reported in some quarters, but it is likely that military preparations will result in the placing of such an order. Owing to the amount of discussion there has been regarding the merits of the Lewis gun, and its use by the Entente Allies, the public has apparently lost sight of the operations of the Sharon plant of the company, which manufactures gun-mounts, limbers, field artillery and shells. Results at this plant are understood to have been very satisfactory in recent months.

The question of the resumption of dividends on the common stock will not be taken up for a few months at least. The directors feel that dividends should not be resumed until it is practically certain that they can be continued at the rate decided on.

*(2) Government Contracts Awarded.—Announcement was made from Sharon, Pa., on March 27, 1917, that this company had been awarded a number of Government contracts for guns and munitions, the value of which will be close to a million dollars. This is the initial order and others are expected to follow which will bring the total to several millions and insure steady operation of the Sharon plant for the next few years. Manager A. B. Davenport admitted that the company had been successful in bidding for Government work. The only confirmed order is for 4-inch gun carriages, and Mr. Davenport was unable to state the number to be made.

The local plant is well equipped for the production of guns from one-pounders up to the 4-inch kind. The initial order, it is understood, comes from the Navy Department. The Driggs-Seabury Ordnance Co. recently completed big shell orders for the Allies and is working on an order for three-inch rapid-fire guns for the British Government. The company recently announced that the Sharon plant is at the disposal of the Government in event of war. It is also understood that the Utica, N. Y., plant is working at top speed on Government orders.

—Apr.

*(1) Machine Gun Order for Subsidiary.—See Savage Arms Co.—Item No. 1.

*(2) Government Order for Guns.—Stated on April 9, 1917, that this company had been awarded a contract for

furnishing a large number of guns to the U. S. Government. They will be five-pounders and work will be speeded up. The contract involves about \$1,000,000. The company has been busily engaged for months turning out three-inch rapid-fire guns for the British Government.

*(3) Government Order Secured for Lewis Guns.—On April 18, 1917, this company, through the Savage Arms Co., closed orders for between 3,000 and 4,000 Lewis guns for the United States Army and Navy. These orders are in addition to the contract for 2,000 guns placed recently by the Marine Corps.

Driggs-Seabury has also taken additional large orders from the Navy for 3-inch and 6-pounder guns. These will be made at its Sharon plant.

The Lewis gun, it was announced from Washington, has been adopted by the Marine Corps as its standard weapon. It is not unlikely that the orders just placed will prove merely preliminary, to be followed later by other and larger orders.

*(4) Report, Quarter Ended March 31, 1917, shows total earnings, after operating expenses, taxes, etc., of \$2,031,858; surplus after charges of \$1,264,815 and balance after 1st and 2d pfd. dividends of \$1,249,053. This is equivalent to \$14.15 earned on 88,355 shares of common stock for the three months, or at the annual rate of \$56.00 a share.

*(5) Orders to Keep Plant Going Two Years.—A Sharon, Pa., dispatch April 20, 1917, stated that this company had orders on the books at the Sharon plant amounting to \$6,000,000. The company is engaged in making guns for the United States Government, and automobile parts. The business will keep the plant running steadily for two years. A large addition to the pressed steel department will be erected.

DRY GOODS REALTY CO., SPOKANE, WASH.

*(1) Capital Increased.—On Jan. 24, 1917, the company filed notice at Olympia, Wash., of an increase in capital stock to \$1,000,000.

DUAL LEATHERS CORP., ELIZABETH, N. J.

*(1) Incorporated on Jan. 15, 1917, in Delaware, with a capital of \$650,000, to manufacture and deal in leather. Incorporators: Wm. McConnell and Arthur G. Quinn, New York, and Fred W. Moore, East Orange, N. J.

DUCKETT STEAMSHIP CO., INC., MANHATTAN, N. Y.

*(1) Incorporated on April 23, 1917, in New York, with a capital of \$1,000,000, to engage in a transportation and navigation business. Incorporators: D. F. Leary, J. E. Clark and A. W. Duckett, 17 Battery Place, New York.

DUCKHAM PIERSON CO., MADISON, N. J.

*(1) Incorporated on April 18, 1917, in New Jersey, with a capital of \$400,000, to plant and deal in flowers and agricultural products, in timber, steel, etc. Incorporators: Lincoln Pierson, Wm. H. Duckham, M. N. Pierson and Mary Duckham, Madison, N. J.

—Feb.

*(1) Report, Year Ended Dec. 31, 1916, states that the loss in revenues caused in 1915 by "jitney" competition had been fully made up and there was a gain of \$110,865, or 8.44% in 1916 over 1915. General business conditions in the territory served are good and promise to remain so throughout 1917, and earnings should continue to show satisfactory increases. Cash position of the company has been strengthened and regular dividends paid on the pfd. stock. Included in operating expenses for the year was \$138,561 for depreciation.

With previous surplus and credit adjustments the surplus account Dec. 31 was \$610,870, from which was paid \$80,000 pfd. dividends, \$12,140 discount, \$37,400 amortization, and \$30,733 miscellaneous debits, leaving the surplus Jan. 1, 1917, \$470,588. The balance sheet of Dec. 31 showed current assets of \$205,160, of which \$35,388 was in cash and current liabilities of \$143,489.

*(2) Income Account, Year Ended Dec. 31, 1916, compares as follows:

DUNDEE CORP. (THE).

*(1) Incorporated on Dec. 30, 1916, in Delaware, with a capital of \$10,000,000, to deal in and with stocks, bonds, notes, and all other evidences of indebtedness and financial obligations. Incorporators: W. J. Maloney, Herbert E. Latzer, C. L. Rimlinger and M. V. Haywood, Wilmington, Del., and Clement M. Egner, Elkton, Md.

DUNLAP (GEO. M.) CO.

*(1) Amalgamation Completed.—See Acme Tea Co.—Item No. 2.

DUNLOP CO.

*(1) Merger Planned.—See Acme Tea Co.—Item No. 4.

DUNLOP TIRE & RUBBER GOODS CO., LTD.

*(1) Tenders Asked.—It was announced March 4, 1917, that proposals would be received by the National Trust Co. of Toronto, Ltd., until March 12, 1917, for the sale to it of sufficient 1st mortgage sinking fund gold 6s to exhaust \$3,500.

DUNLOP TIRE SALES CO., INC., NEW YORK.

*(1) Capital Increased.—On April 4, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000 to \$250,000.

DUNNING-ERICH HARVESTER CO., HARRINGTON, WASH.

*(1) Incorporated on Jan. 27, 1917, in Washington, with a capital of \$300,000. Incorporators: L. A. Dunning, C. A. Erich and C. J. Hastings.

DUOFOLD HEALTH UNDERWEAR CO.

*(1) Capital Increased.—On March 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$175,000 to \$400,000.

DUOFORM CO., NORTH JAVA.

*(1) Capital Increased.—On March 1, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$100,000 to \$600,000.

DUPLAN SILK CORP.

*(1) Incorporated on April 16, 1917, in Delaware, with a capital of \$6,000,000, to manufacture velvet, silk and other textile fabrics. Incorporators: Hean L. Duplan, Neully; S. S. Frances, Wm. R. Knobloch, Mount Vernon, N. Y., and Albert R. Salembier, Weehawken, N. J.

*(2) Organized as Holding Company for Duplan Interests.—On April 17, 1917, the "New York Daily News Record" said that this company, incorporated in Delaware, had been formed to act as a holding corporation for the various Duplan silk interests. These are: The Ida Mills at West New York, N. J., the Puritan Silk Mills at Wilkes-Barre, Pa., the Doraceton Silk Works at Doraceton, Pa., Nanticoke Silk Works, of Nanticoke, Pa., and the Duplan Silk Co., at Hazleton, Pa.

While the definite plans of the silk company have not yet been completed, it was said at the company's headquarters at New York that the various mills will be continued under their present management and probably will retain their individual corporate identity.

In each of these, however, it is planned to have the Duplan Silk Corp. hold the majority of the stock. Jean B. Duplan will continue at the head of the corporation.

DUPLEX TRUCK CO.

*(1) Production Increase Planned.—Stated on March 29, 1917, that this company in the fiscal year to end October 31, 1917, planned an output of at least 750 trucks and, if shipping conditions were favorable, this figure would probably be exceeded.

Construction will begin early in April on a new plant at Lansing, Mich., to consist of a 2-story structure 72x600 ft. The building is expected to be completed in about five months' time, and in the meanwhile the company's trucks will be manufactured at the Charlotte, Mich., factory, where production is being steadily increased. The new factory is to be equipped for a daily production of ten trucks.

The company has an authorized capital stock of \$1,000,000, all of which has been subscribed for. Stockholders have been called upon to pay only 50%, and owing to the satisfactory business of the company no additional payment will be required until the factory at Lansing is well under construction. Par value of the stock is \$10 and the market price is about \$15.

duPONT (E. I.) deNEMOURS & CO.

*(1) Contract for New Village.—It was announced Jan. 3, 1917, that this company had awarded to the J. A. Bader Co., of Wilmington, Del., the contract for the erection of a new village adjoining the Carney's Point, N. J., plant.

It will accommodate 6,000 people; will be situated just east of Riverview and will contain 300 temporary dwellings and 150 six-family apartments for the occupancy of employees and their families.

The company is building an extension to its saltpeter works at Deep Water Point, adjoining Carney's Point.

*(2) Plans for Acquisition.—See Harrison Bros. & Co., Inc.—Item No. 3.

*(3) Damage by Explosion.—It was announced Jan. 12, 1917, that 400,000 lbs. of smokeless powder had been exploded at the Haskell, N. J., works of this company on that date, causing a damage estimated at \$1,500,000. The first explosion, followed by several others and a fire, destroying the plant and surrounding property, was caused by a spark, it was thought. More than 1,500 workers were employed.

—Feb.

*(1) Report, Year Ended Dec. 31, 1916, as made public Feb. 14, 1917, sets forth that the company is not waiting for the end of the war, but is anticipating it with a view to turning the greatly expanded munitions plant over to productive commercial uses as soon as the abnormal demand for their product ceases. Plans have been perfected to cope with any financial conditions that

JANUARY 1 TO APRIL 30, 1917

may develop "after the war." In this connection the report says:

"For 1917 the reduction in prices of military powders and the continued extension of large credits to the purchasers of these powders make it expedient to curtail extraordinary dividend disbursements. Moreover, uncertainty as to industrial conditions after the termination of the war make it advisable to maintain great financial strength.

"To this end the treasurer of the company has recommended a dividend that it is believed can be continued without interruption after the war."

"(2) Statement, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Net	\$82,107,693	\$57,840,758
Bal. after bond		
int. and deb.		
stock divs.	78,459,471	55,542,276
Surp. aft. chgs.		
coms. & subs.		
divs.	19,598,821	1,449,804

"(3) Earnings on Stock.—It was stated Feb. 14, 1917, that this company's balance of \$78,459,471, after debenture stock dividends, is equal to 133.31% on \$58,854,200 common stock, compared with 94.3% earned on the same stock in 1915.

"(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$28,567,038, compared with \$8,968,217 Dec. 31, 1915.

"(5) Statement by President.—In his annual statement to stockholders, it was announced Feb. 14, 1917, Pres. Pierre S. duPont, of this company, said in part: "The allied industries in which M. I. duPont de Nemours & Co. is interested, such as the manufacture of 'Fabrikoid,' 'Pyralin,' lacquers, solvents, chemicals, and the extracting of nitrate in Chile, have been placed on a satisfactory footing, and the company is now deriving a suitable profit from all such investments.

"The laboratories, research and development departments of the company are now actively engaged in the preparation for the necessary changes. With this end in view, they expect to employ the \$60,000,000 of new capital that was authorized in the reorganization of the company in October, 1915.

"The warring nations were unwilling to place orders extending over a great length of time, and therefore our early contracts were closed at prices approximately 25% competition with foreign manufacturers before the war. Out of this price there has been set aside an amount which is sufficient to amortize the cost of constructing new plants to fill such contracts, and consequently it became possible for our company to quote lower prices on later contracts, those for 1917 delivery being closed at prices below the prices prevailing before the war.

"Furthermore, the company has been able to name prices for military powders to the United States Government within the limit imposed by law, though prices of raw materials are very much higher than before the war.

"The reduction in prices doubtless enormously increased our volume of sales, which in the year 1916 aggregated \$318,845,685, which amount is better appreciated when compared with the average sales of the years 1913 and 1914, which amounted to \$25,927,478, an increase of 1,130%.

"It is regrettable that the United States Government has made our stockholders victims of excessive taxation," the report says.

"The tax levied against our company for 1916 under these laws will aggregate an amount equal to 170% of our entire net earnings for the year 1912, in which year we had the largest earnings in the history of the company prior to the war."

"(6) Comment on Annual Report.—On Feb. 16, 1917, the "Wall Street Journal" said in part: "The phenomenal earnings of the duPont Co. in 1916 are

perhaps the crowning demonstration of the magical power of war business to expand profits.

"What war has meant to the American powder business is clear from the fact that in the past two calendar years we have exported some 425,000,000 pounds of gunpowder, netting \$300,000,000—beside \$560,000,000 more for cartridges and other explosives.

"There is magic, financial and physical, also in the duPont figures. For duPont to earn \$82,107,693 net in 1916 against \$57,840,758 in 1915 and \$5,603,153 in 1914, an increase of \$24,266,935, or 41% over the 1915 results and about 1,500% increase over the 1914 figures, it was necessary for the company to expand enormously its physical equipment and, of course, its gross sales.

"This has been done by the expenditure of more than \$60,000,000 in plant construction, most of which has apparently been amortized, so that when war demand ceases the plants even if not fully utilized will not represent any serious drain upon normal operations.

"In 1916, after deduction of the debenture stock dividend, duPont earned 133.3% for its \$58,854,000 common stock. The 1915 surplus for the common, on the same test, was 94.3%. During two years, therefore, the company has earned \$227 per share on stock which in amount is nearly four times the total of Bethlehem Steel's common shares.

"It is very interesting to note that duPont Powder has apparently cut its selling prices so low that its manufacturing profit is but a bit over normal. In 1915 the big profits of \$57,840,758 were admittedly made on an excessively high manufacturing profit. But the ratio of net to gross during 1916 was 25.7%. In ante-bellum times gross sales regularly ran \$25,000,000 to \$30,000,000 and manufacturing profit was 20% to 22%. It is clear, therefore, that even when war is over, the company will not have much of a shrinkage to stand so far as a normal production profit is concerned.

"In 1915 the company did not divulge its gross sales. But they are not believed to have exceeded \$150,000,000. If this supposition be correct, then there was actually more than a 100% increase in 1916 sales, while in tonnage figures the percentage of gain was far and away in excess of this amount. In smokeless powder alone the company is now making more in a day than it formerly manufactured in a month.

"On Dec. 31 duPont had an enormous cash balance of \$82,325,103. Its working capital was about \$160,000,000, against \$105,118,000 at the close of 1915. This working capital has been increased despite the 100% paid in dividends. Present plans are to hold it intact until the end of the war gives the corporation an idea how to shape its future course.

"But, of course, a company which has jumped from a usual gross of \$25,000,000 or \$30,000,000 to the huge total of \$318,845,685 of sales during 1916, with plant equipment to match, will never again be normal. Its days of littleness have definitely passed.

"The company has a producing system which if not devoted to the tragedy of war will be utilized in the arts of peace. This is why duPont is looking forward to the time when output of lacquers, solvents, chemicals, paints, perhaps dyes and other products will absorb its energy and productive ability."

"(7) Decision in Suit Delayed.—It was stated Feb. 27, 1917, that a decision in this company's suit, involving \$56,000,000, would not be handed down until after the annual meeting, March 12.

It is a foregone conclusion that the decision will be appealed no matter whether it be in favor of plaintiffs or defendants. It is understood that the Circuit Court is anxious that Judge J. Whittaker Thompson, who tried the case, shall hand down his decision as early as possible, so that any action on appeal may be disposed of before the Summer vacations.

The suit was instituted on Dec. 8, 1915, by Philip F. duPont, Alfred I. duPont, William duPont and Francis I. duPont later joined the original plaintiff in the suit against Pierre S. duPont and his associates, the officers and directors of the duPont Powder Co. and the duPont Securities Co. The cause of action was that the defendants had purchased from the former Pres. of the Powder Co., T. Coleman duPont, 14,599 shares of the pfd. stock and 63,314 shares of the common stock of the duPont Powder Co., which the plaintiffs claimed should have been purchased for the benefit of the company and not for the benefit of Pierre S. duPont and his associates individually.

The suit was tried in the Federal Court in Wilmington, during the months of June and July, 1916. The witnesses included Henry P. Davison of J. P. Morgan Co., and a dozen other leading bankers of New York and Philadelphia who had participated in a loan of \$5,500,000, to Pierre S. duPont and his associates, to enable them to finance the purchase of the T. Coleman duPont holding.

—Mar.

"(1) Decreased Extra on Common.—Announced Feb. 28, 1917, that this company had declared an extra dividend of 3%, in addition to the regular quarterly dividend of 1½%, on the common stock, both payable March 15 to stock of record Feb. 28. This compares with the regular dividend of 1½% and an extra of 24¼% in December, 1916.

The directors also declared the usual quarterly dividend of 1½% on the debenture stock.

"(2) New Director.—Announced March 12, 1917, that at the annual meeting of this company Eugene duPont was elected a director to succeed Major Wm. G. Ramsay, deceased. The retiring directors were re-elected.

"(3) Acquisition.—It was announced March 15, 1917, that this company had purchased the Harrison Paint Co. for \$5,700,000 in cash, the purchaser assuming all outstanding obligations of the company.

This provides sufficient funds to pay to the pfd. stockholders par and accrued dividends, and to the common stockholders about \$200 a share after payment of expenses incurred in carrying out the negotiations and liquidation of the company.

This sale marks the union of two of the oldest firms in the country. The Harrisons date from 1793 and the duPonts from 1802. Expansion is expected in the manufacture of paints, colors, varnishes and pigments as well as chemicals.

The present Harrison plant covers 40 acres, on which there are 80 buildings, among which there is a model lead plant with an annual capacity of 10,000 tons. The demand for chemicals due to the war caused the company to organize the Mantua Chemical Co., whose works are at Paulsboro, N. J., on a tract of 250 acres. The company also owns a plant at Camden, N. J., and a pyrite mine in Virginia.

The business of the company will be conducted by a new Pennsylvania corporation to be known as "Harrisons, Inc.," which has applied for a charter. The incorporators are Lamont duPont, Dr. Charles L. Reese and Charles A. Meade, of the duPont Co.; A. R. Glancy and William Richter, Sec'y of the Harrison Co.

"(4) Sale Approved.—See Harrison Bros. & Co., Inc.—Item No. 3.

"(5) Final Dividend of Acquired Company.—See Harrison Bros. & Co., Inc.—Item No. 4.

"(6) Acquisition.—See American Graphophone Co.—Item No. 1.

"(7) Deal Concluded.—See Harrison Bros. & Co., Inc.—Item No. 5.

"(8) Capacity to be Increased.—It was stated on March 26, 1917, that the company would be able to meet demands of the United States for powder without interfering with its shipments to the Allies. Present capacity is 1,000,000

JANUARY 1 TO APRIL 30, 1917

pounds of smokeless daily, and this will be increased by 95,000 pounds a day May 1. A contract for 11,000,000 pounds for the peace needs of the army and navy was closed some months ago.

—Apr.

*(1) **Suit Instituted Against Directors.**—A \$15,000,000 stockholders' suit was brought in the United States District Court at Wilmington, Del., on April 5, 1917, against Pierre S. duPont and 17 other directors of this company. The defendants are accused of having misappropriated huge sums of money for the purchase of stock given to employees as bonuses, and it is alleged that much of the stock so distributed went to the directors themselves. Mrs. Eleanor duPont Perot, of Philadelphia, is the complainant in the suit.

Twelve of the duPont directors involved in the litigation are also defendants in the \$56,000,000 duPont stockholders' suit brought by Philip F. duPont, of Merion, Pa., and others, in December, 1915. In the last-named suit, decision in which has been expected for some weeks, the defendants were accused of defrauding the powder company by acquiring for themselves a huge block of stock for which the corporation itself has been negotiating.

*(2) **Decision for Stockholders in Suit.**—On April 12, 1917, it was announced at Wilmington, Del., that Judge J. Whitaker Thompson, of Philadelphia, had filed an opinion in the United States District Court at Wilmington deciding in favor of the plaintiffs in the \$57,000,000 duPont stock suit. The court held that the acquisition of the stock by the duPont Securities Co. was illegal and that the Board of Directors was disqualified from passing on it. The stock was purchased by the Securities Co. from Gen. T. Coleman duPont for \$14,000,000, and is said to have a value of \$57,000,000.

The decision sustained most of the facts as set forth in the bill of complaint of the plaintiffs, and decreed that a special commissioner shall conduct a special meeting of the stockholders of E. I. duPont de Nemours & Co. to decide for themselves whether or not they want to purchase the stock formerly held by T. Coleman duPont, which stock is the basis of the whole action. The decision enjoined the use of this stock for voting purposes at the meeting.

The suit was brought by Philip F. duPont, of Merion, Pa., against Pierre S. duPont, Pres. of the company, and 11 other directors of the company, to compel the return to the treasury of the company of stock, now valued at \$57,000,000, which had been purchased by Pierre duPont and his associates in the duPont Securities Co. from T. Coleman duPont for \$14,000,000. Since that time Pierre and his associates are said to have realized about \$45,000,000 upon these stocks.

The litigation is said to have engendered much bitterness in the duPont family. The fight affected the control of the \$240,000,000 corporation. By acquiring T. Coleman duPont's stock Pierre duPont and his associates obtained control of the powder company. In December, 1915, after the stock transaction, which was the basis for the suit, had been effected, the name of the concern was changed, the name of the duPont de Nemours Powder Co. to E. I. duPont de Nemours & Co., and its capitalization doubled.

*(3) **Appeal from Decision.**—On April 14, 1917, Pierre S. duPont, of this company and of the duPont Securities Co., announced the decision of both of these companies to carry to the United States Circuit Court an appeal from the decision of Judge Thompson in the stockholders' suit, for a review of findings as to fact and the law.

Counsel for the defense contends that the facts as shown from the evidence do not exhibit either moral or legal breach of trust. A majority of the stockholders either in person or by proxy at two annual meetings since the filing of the suits in 1915 have approved the action of the officers and directors in the matter of the purchase of the T. Coleman

duPont holdings. One of the meetings of the stockholders ratifying the action of the directors in this matter was held since the evidence in the case was all before them.

*(4) **Nitrate Fields in Chile Purchased.**—A Wilmington, Del., dispatch April 17, 1917, stated that this company had purchased new nitrate fields in Chile to produce 100,000,000 lbs. a year. The company has plans completed for starting development at once. The output will be available in 1918 and will relieve fertilizer and nitrate shortage in the United States.

*(5) **Synthetic Dye Expansion Plant.**—The "Boston News Bureau" April 21, 1917, said the feeling was very strong here that duPonts had not nearly completed their expansion in the line of synthetic color production. The acquisition of Harrison Bros. & Co.'s plant gave them a large producing capacity on aniline salts and acids, so that they will be in a position to offer these intermediates—from which dyes are made—to the world at large.

"Some of the company's plants in the Middle West, now making explosives, have been so built as to be readily alterable into intermediate and dye factories.

"Finally, the company is believed to be casting its eye on the Federal Dye-stuff & Chemical Co. plant, in Kingsport, Tenn. It is understood that Vice-Pres. of the duPont Co. recently made an unheralded trip to Kingsport, and it is further declared that the Federal Co. would be glad to get a reasonable offer for its plant.

"Should an agreement be made with other American producers of aniline colors, the duPont Co., with its English connection, Levinstein, Ltd., would be the "kingpin" of the non-Teutonic dye situation.

*(6) **Answer Filed to \$14,000,000 Suit.**—An answer to the bill of complaint of Eleanor duPont Perot, commenced against E. I. duPont de Nemours & Co. for the recovery of about \$14,000,000, was filed in the United States District Court at Wilmington, Del., April 25, 1917.

This suit was commenced on April 4. In the complaint the plaintiff attacked the administration of the bonus plan of the company. The plaintiff demanded a return to the company's treasury of all the moneys paid out in bonuses since 1911.

Denials are made to all the charges of the plaintiff in the answer filed. It asserts that the bonus system, as administered by the company, is of incalculable value in securing faithful and efficient service from employees.

U. S. Senator Philander C. Knox, Richard V. Landabury, Congressman George S. Graham, William S. Hilles, and Judge John P. Laffey are attorneys of record for the duPont company.

duPONT FABRIKOID CO.

*(1) **Acquisition.**—It was announced Feb. 27, 1917, that this company, Wilmington, Del., had purchased the Marokene Co., of Elizabeth, N. J. The Marokene Co. manufactures a material similar to fabrikoid, which is used extensively by the automobile, carriage and upholstery industries.

R. B. Heyward, who has been assistant superintendent of the Fabrikoid Co.'s Newburgh plant, will become superintendent of the Marokene plant at Elizabeth, N. J.

The purchaser will make investigations in order to learn if any improvements can be made to the product. All the sales transactions of the Marokene Co. will be under the direction of the Wilmington office and the attention of J. K. Rodgers, sales manager of the duPont Fabrikoid Co.

—Mar.

*(1) **To Run Night Force.**—It was announced from Fairfield, Conn., on March 23, 1917, that this company, the following week, would begin to run a night force in addition to its day force, and would place extra guards around the plant.

—Apr.

*(1) **To Start Operations in May.**—On April 26, 1917, the "Iron Age" stated that this company, 864 Dufferin St., Toronto, Ont., manufacturer of leather goods, etc., would complete its new plant and be ready for operation in May. The company has secured a site of 12 acres at New Toronto, Ont., five acres of which are covered with buildings, representing an expenditure of \$500,000. About 100 men will be employed at the start.

duPONT SECURITIES CO.

*(1) **Decision for Stockholders in Suit.**—See duPont (E. I.) de Nemours & Co.—Item No. 2.

*(2) **Appeal from Decision.**—See duPont (E. I.) de Nemours & Co.—Item No. 3.

DUQUESNE LIGHT CO.

*(1) **Philadelphia Co. Note Offering.**—See Philadelphia Co.—Item No. 1.

DURATEX CO., NEWARK, N. J.

*(1) **Capital Increased.**—On Jan. 17, 1917, the company filed notice at Trenton, N. J., of an increase in capital stock from \$500,000 to \$1,500,000.

DURPASS DRUG CORP.

*(1) **Incorporated on March 5, 1917,** in New York, with a capital of 3,000 shares, \$100 each, 50,000 shares no par value, active capital \$550,000, to deal in drugs, medicines, chemicals and pharmaceutical preparations. Incorporators: W. F. Drennen, P. R. Gordon and D. E. Slattery, 130 West 47th Street, New York.

DURR (C. A.) PACKING CO., INC., UTICA, N. Y.

*(1) **Incorporated on Jan. 11, 1917,** in New York, with a capital of \$250,000, to engage in packing meat, food products, producing and slaughtering cattle. Incorporators: J. F. Ammann, F. M. Tobin and C. A. Durr, 415 Eagle St., Utica, N. Y.

—Mar.

*(1) **Capital Increased.**—On March 27, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$250,000 to \$350,000.

DYER BROS.

*(1) **New Contracts.**—It was announced Feb. 1, 1917, that this company, San Francisco, Cal., had received several structural contracts, including improvements to the Pacific Coast Borax Co. and to the Natomas Consolidated Co.

DYNETO ELECTRIC CO.

*(1) **To Be Taken Over.**—See Dyneto Electric Corp.—Item No. 1.

• DYNETO ELECTRIC CORP.

*(1) **New Company—Acquisition.**—It was announced March 1, 1917, that this company, recently incorporated with a capital stock of 5,000 shares of \$100 each and 15,000 shares of no par value, to carry on business with \$575,000, would take over the Dyneto Electric Co., of Syracuse, N. Y., manufacturer of small electric apparatus.

The business is rapidly increasing and although the company has doubled its plant three times within a year, it is again doubling it and is running a night shift. In connection with the re-financing of the company, the following officers and directors have been elected: C. L. Amos, Pres.; A. E. Do-man, Vice-Pres.; Alexander M. Hall, 2d, of the Liberty National Bank, 2d Vice-Pres.; John C. Boland, Sec'y and J. D. Stemmler, Treas. The directors are Jacob Amos, Carleton A. Chase and W. W. Ward, of the John Deere Plow Co.; Alexander M. Hall, 2d; J. A. Bower, of Hale & Kilburn, Philadelphia; George Timmins, of the National Tube Co., and Dr. John A. Mathews, Pres. and Gen. Mgr., of the Holcomb Steel Co.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

EAGLE & BLUE BELL MINING CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows net earnings of \$163,625, an increase of \$13,233 over the 1915 year. The company produced in 1916 5,714,776 pounds of lead, 347,501 ounces of silver, 987 ounces of gold and 577 pounds of copper. Two dividends of five cents per share were paid, calling for \$89,315.

EAGLE BY-PRODUCTS COAL CO.

¹(1) Incorporated on Feb. 14, 1917, in Maryland, with a capital of \$750,000. Incorporators: E. Leo Dunnock, Robert J. Gill and Clarence W. Whealon.

**EAGLE ROCK OIL CO.,
BUFFALO, N. Y.**

¹(1) Capital Increased.—On April 9, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$500,000 to \$2,500,000.

**EARLES-CLEARY LUMBER &
SHINGLE CO.**

¹(1) Reorganized.—It was announced Jan. 30, 1917, that this company, Bellingham, Wash., had reorganized and incorporated under the name of the Puget Sound Sawmills & Shingle Co., with a capital of \$400,000. The South Bellingham mill, which had been remodeled, resumed operations Feb. 1. The entire plant has been electrified and more than \$100,000 expended in improvements.

EAST BUTTE COPPER MINING CO.

¹(1) Production, December, 1916.—It was announced Jan. 9, 1917, that the production of this company in December was 1,461,300 pounds of copper and 44,732 ounces of silver, compared with 1,648,040 pounds of copper and 51,520 ounces of silver in November.

—Feb.

¹(1) Production, January, 1917.—Announced Feb. 5, 1917, that this company in January produced 1,479,520 pounds of copper.

—Mar.

¹(1) Production, February, 1917.—Announced March 6, 1917, that this company in February produced 1,460,440 lbs. of copper and 40,900 ounces of silver. The January production of copper totaled 1,479,520 lbs.

¹(2) Production, February, 1917.—It was announced March 20, 1917, that this company had produced at the Pitts-
tont smelter during February 1,460,440 pounds of copper against 1,479,520 pounds in January. The silver production for February amounted to 40,900 ounces, or about the same as January.

In December the company made over \$205,000 and the prices received for both the January and February production were considerably higher than in December. It is estimated that earnings for the first two months of this year will be nearly \$500,000, or at the rate of about \$7 per annum on the stock outstanding.

The grade of ore now being mined is running close to 4% copper, which is a big improvement over the grade taken out last year.

—Apr.

¹(1) Operating Results, 1916.—It was announced April 2, 1917, that this company showed a net surplus from 1916 operations of \$1,565,768, equivalent to \$3.80 per share, compared with \$782,997 in 1915. Operations compare as follows:

	1916	1915
Tons ore treated	366,057	181,063
Lbs. cop. prod.	18,340,713	12,542,068
Oz silver prod.	558,542	518,124
Oz. gold prod.	3,844	2,696
Gross income	\$5,523,688	\$2,753,587
Net surplus	\$1,565,768	\$782,997
Cost prod., lb.	16.6878c	11.8538c
Price copper, lb.	28.1978c	19.3143c

¹(2) March Production.—In March, 1917, this company produced 1,597,840 lbs. of copper, compared with 1,306,600 lbs. last year and 1,460,440 lbs. in February.

¹(1) Dividend Deferred.—It was announced March 16, 1917, that dividend payments on the \$750,000 pfd. stock of this company, a subsidiary of the Nova Scotia Steel & Coal Co., had been discontinued owing to the unfavorable results of the 1916 business.

¹(2) Earnings Statement, 13 Months Ended Dec. 31, 1916, shows an operating loss of \$148,498. To this must be added \$58,929 bond interest, \$43,578 interest on bank advances, and \$53,553 representing sinking fund payments and provision for war profits tax due on 1915 business, making a total deficit of \$304,554. The pfd. dividend for the year, amounting to \$48,750, was charged up to the balance of \$250,155 at credit of profit and loss account on Jan. 1, 1916.

When this deduction had been made the statement as of Dec. 31, 1916, showed a deficit of \$103,148, against a credit balance of \$250,155 in profit and loss 13 months before.

EASTERN COPPER CO.

**EASTERN OREGON LIGHT &
POWER CO.**

¹(1) Status, April, 1917.—On April 26, 1917, the "Chicago Daily Tribune" stated that this company is a consolidation formed in 1909. It issued \$1,500,000 of common stock, \$450,000 pfd. and \$1,200,000 of first mortgage bonds.

The latest available report is that of the year ended June 30, 1915. It showed gross earnings, \$198,172; net, \$133,619. Interest and taxes were \$88,104, leaving a surplus of \$45,515. Gross in the year before was \$211,138, but net was only \$90,816, hardly covering fixed charges.

The company serves a population of 16,400. Its bonds have only a moderate margin of security.

**EASTERN PENNSYLVANIA
RYS. CO.**

¹(1) Loss by Fire.—A Pottsville, Pa., dispatch Jan. 6, 1917, stated that the car barns, storage houses and part of the powerhouse of this company at Palo Alto, Pa., had been destroyed by fire. The loss may reach \$750,000. Part of the power equipment and boiler house, including machinery valued at several hundred thousand dollars, was saved, but damaged.

EASTERN POWER & LIGHT CORP.

¹(1) Earnings, Subsidiaries, Year Ended Dec. 31.—On Jan. 16, 1917, this company reported gross of subsidiaries for the year ended Dec. 31, 1916, as \$3,983,000, a gain of \$544,500, or 15.8% over 1915. Reading Transit & Light Co. reported earnings of its electric railway department for November and December, 1916, as \$295,114, a gain of 17.6% over the corresponding two months of 1915, while earnings of the electric light and power department of the company for the two months were \$212,966, a gain of 20%.

The company has placed in service a new 12,500-kilowatt generating unit, and as power business already under contract will absorb this additional generating capacity an order has been placed for a 25,000-kilowatt generating unit to be delivered early in 1918.

—Feb.

¹(1) Merger Planned by Subsidiary.—See Reading Transit & Light Co.—Item No. 1.

—Mar.

¹(1) Increased Revenues.—It was announced March 1, 1917, that the total gross revenues of this company for 1916 had increased 16.5% over 1915. Revenues of the electric department increased 21.7%; of the gas department, 3.5%; of the electric railway department, 16.1%, and of the water department, 10.8%, over 1915.

¹(2) Earnings, February, 1917.—It was stated March 8, 1917, that this company's gross revenues in February, 1917, amounted to \$355,168, an increase of \$54,358, or 18.1% over February, 1916. The gross of the Reading system increased 23% in February, 1917; of the West Virginia system 2.9%; of the Claremont system 25.5%, and of the Vincennes system 12.1%.

¹(3) Combined Earnings Statement, year ended Dec. 31, 1916, compares as follows:

	1916	1915
Gross	\$3,969,700	\$3,412,658
Net income	543,537	388,319
Applicable to stock not owned by East. P. & L. Corp.	64,735	59,945

¹(1) Incorporated on March 5, 1917, in Delaware, with a capital of \$3,000,000, to maintain works for the generation and distribution of gas. Incorporators: E. Hawley Van Wyck Cranford, N. J.; A. F. Beringer, Brooklyn, N. Y. and L. M. Symms, Mount Vernon, N. Y.

EASTERN STEAMSHIP CO.

¹(1) Bond Note.—See Eastern Steamship Corp.—Item No. 2.

EASTERN STEAMSHIP CORP.

¹(1) Sold.—Announcement was made at St. Johns, N. B., Jan. 3, 1917, that the property and leases of this company, in

JANUARY 1 TO APRIL 30, 1917

the hands of receivers, had been sold under foreclosure proceedings for \$3,386,000, the purchasers assuming the liabilities.

The properties in St. Johns, Maine, Massachusetts and New York were bid in by Joe A. Downs, of Hayden, Stone & Co., bankers, of Boston, New York and Montreal, representing a company of stockholders and bondholders, which will reorganize the corporation.

The steamers Calvin Austin, Gov. Dingley, Gov. Cobb and North Star, of the international division (Boston-St. Johns), were among the vessels sold.

The sale also included a large interest in the Boston & Yarmouth S. S. Co., amounting to \$335,000, the par value of 6,700 shares held by the Eastern corporation.

—Feb.

²(1) Dissolution Hearing March 8.—See New York, New Haven & Hartford R. R.—Item No. 7.

—Mar.

²(1) Sale Approved.—A Portland, Me., dispatch March 10, 1917, stated that the master's report of the sale of this company had been approved by Federal Judge Hale and authority given for the transfer of the property to the Eastern Steamship Lines, Inc.

²(2) Bond Note.—On March 19, 1917, it was stated that the bondholders' committee of this company had given notice that it desired to purchase \$700,000 par of the first mortgage 5% bonds of Eastern Steamship Co. to satisfy sinking fund requirements. Offers for sale of bonds will be received until March 29.

EASTERN STEAMSHIP LINES, INC., ELLIOT, ME.

¹(1) Lease.—See American Gas & Electric Co.—Item No. 1.

• EASTMAN KODAK CO.

¹(1) Extra Dividends on Common.—Announced Dec. 30, 1916, that this company had declared two extra dividends of 10% on the common stock, the first payable Feb. 10 to stock of record Jan. 13, and the second payable March 1 to stock of record Jan. 31.

—Feb.

²(1) Extra Dividend on Common.—Announced Feb. 22, 1917, that this company had declared the regular quarterly dividend of 1½% on the pfd., 2½% on the common and an extra of 2½% on the common, all payable April 2 to stock of record March 10.

—Mar.

²(1) Suit.—It was announced at New York March 13, 1917, that Gustave C. Gennert, importer of photographic supplies, had asked for \$924,000, or treble damages, under the Sherman law, in a suit against the Eastman Kodak Co.'s of New York and New Jersey. George Eastman, Henry A. Strong, Walter S. Hubbell and Frank S. Noble. Those named are officers and directors of the defendant companies. The suit was brought in the Federal District Court.

Gennert alleges that since 1902 the defendants have been enforcing a rebate agreement so as to suppress competition and restrain and monopolize commerce in photograph supplies.

—Apr.

²(1) Bonus for Employees.—It was stated April 2, 1917, that employees of this company would receive nearly \$1,000,000 from the sixth annual wage dividend which would be voted by stockholders at the annual meeting in Jersey City. This compares with \$821,000 the previous year. The date of distribution is July 1. In five years \$3,000,000 has been distributed to employees.

²(2) Extra Dividend on Common.—Announced April 11, 1917, that this company had declared an extra dividend of 5% on the common stock, payable June 1 to stock of record April 30.

EASTON POLISHING SUPPLY CO.

ECHO-BREA OIL CO.

²(1) Stock Issue Permit.—It was announced April 4, 1917, that this company, Los Angeles, Cal., had been permitted by California Corporation Commissioner H. L. Carnahan to issue 400,000 shares of Acquilla Oil & Mineral Co. in exchange for approximately 1,000 acres of unpatented claims in the Sespe district, Ventura County; 150,000 shares to A. C. Labrie, J. A. Brower and J. M. Buzzell, in exchange for drilling equipment; to sell 35,000 shares at par, 10 cents per share, to net the company the full amount of the selling price, and 75,000 shares at 25 cents per share, to net not less than \$0.

It is estimated that approximately \$10,000 will be needed to complete the first well, which has been drilled to a depth of about 600 feet, and \$25,000 for each well subsequently drilled.

²(2) Organized to Take Over Acquilla Property.—See Acquilla Oil & Mineral Co.—Item No. 2.

ECLIPSE PHONOGRAPH CORP.

²(1) Incorporated on Feb. 8, 1917, in Delaware, with a capital of \$1,000,000, to manufacture sound-producing machines of all kinds. Incorporators: Arthur W. B. Britton, Samuel B. Howard and L. H. Gunther, New York.

ECONOMY APPLIANCE CO., MARLBORO, MASS.

in construction and operation of railroads and steamships. Incorporators: H. G. Wensel, Jr., F. R. Series and A. E. Palmer, Madison, N. J.

ECONOMIC ELECTRIC CO., WILMINGTON, DEL.

*(1) Incorporated in March, 1917, in Delaware, with a capital of \$500,000, to manufacture electric machines, storage batteries, etc.

EDDYSTONE AMMUNITION CORP.

*(1) Plant Ready for Government Work.—It was stated on April 9, 1917, that no orders for shells for the United States Government had yet been received by this company. Some time ago the plant was placed at the disposal of the Government but no decision has yet been announced as to the Government's disposal of the facilities offered.

The contract for Russian shells will be completed in a few weeks and the plant will then have a large capacity available for Government work. Minor machinery adjustment will enable the plant to make United States Government shells.

*(2) Damage by Explosion.—A series of explosions, from a cause not definitely fixed, on April 10, 1917, caused the death of about 125 persons, the injury of as many more, and a financial loss to the plant estimated at \$25,000, exclusive of the ammunition destroyed. Work was resumed the day following in all departments, except the box-packing and base-charging departments. It was announced that all departments would be in operation by April 24.

More than 10,000 persons are employed at the plant, which is located one mile from Chester, Pa. The company for some time had been engaged in the manufacture and loading of shells for the Russian Government.

*(3) Status.—On April 12, 1917, the "Boston News Bureau" said that the accident or "purposed destruction" wrought at the Eddystone plants emphasized the peculiar misfortune which had hovered about this industrial undertaking from the day of its inception.

The Eddystone situation is one of the most complicated and most difficult to grasp in the entire gamut of American war activity.

The land on which the Eddystone buildings stand has been owned for years by the Baldwin Co. When the war came on a contract for 2,500,000 shells was taken by the Eddystone Ammunition Corp. This concern had but \$50,000 capital and undertook the erection of buildings costing more than \$1,500,000. It was originally owned by a group of wealthy New York interests, some of them large owners of Baldwin Locomotive.

In consideration of certain services performed by Baldwin that company was awarded a royalty of \$1.75 per shell.

The Eddystone Ammunition Corp. failed, it was stated, so badly in carrying out its shell contract that the contract was taken over by the Anglo-Russian Commission, under whose supervision manufacture has been conducted.

The royalty per shell was given up by Baldwin at the time of this change. Since then Baldwin has received a fixed rental from the commission for the use of the buildings occupied by the ammunition company. In addition, when the shell contract is finished, if it ever is, the buildings will automatically become the property of the Baldwin Co.

In addition to the Eddystone Ammunition Corp. there is located on the same property with very extensive buildings the Remington Arms Co. of Delaware, which originally held a contract for 2,000,000 rifles of the Lee-Enfield type for the British Government. This corporation has since become a subsidiary of the Midvale Steel Co. It was sold for \$20,000,000 to Midvale Steel by Marcellus Hartley Dodge. Midvale has arranged to charge this entire \$20,000,000

against its profit and loss. In fact, \$15,000,000 of this amount was so set up against 1916 net profits.

The Remington Co. of Delaware appears not to have been involved in the disaster of April 11. Its plants and operatives escaped unhurt.

Under the original plan the Baldwin was to receive a royalty of \$1 per rifle manufactured by the Remington Co. in consideration of use of the land, financial advances and other practical aids. In its case, too, at the end of the contract the buildings are to revert to Baldwin Locomotive.

But the Remington Co. failed on its contract, it was stated, and was obliged to make a new deal with the English Government. The royalty per rifle to Baldwin, therefore, cancelled and the Remington Co. is paying a fixed rental per month for use of the buildings.

EDEN MANUFACTURING CO.

*(1) Capital Increased.—It was announced March 14, 1917, that this company, St. Louis, Mo., had increased its capital stock from \$150,000 to \$250,000.

EDISON ELECTRIC ILLUMINATING CO., BOSTON.

*(1) Stock Issue Hearing.—It was stated Dec. 30, 1916, that at a hearing before the Massachusetts Gas and Electric Light Commission on petition of the Edison Electric Illuminating Co. to issue 22,523 additional shares of stock, Pres. Edgar stated that it was considered to be the best policy of the company to finance its permanent improvements by stock and not bonds.

The Edison Co., he said, for a long time had been able to borrow on short-term notes at very low rates because of freedom from bonded debt. He stated that the price of \$200 a share for the new stock was fixed by himself after consulting the ablest bankers in Boston.

After Commissioner Lewenberg expressed doubt as to the veracity of Counsel Burdett in regard to an article alleged to have reflected upon a member of the commission, Counsel Burdett withdrew from the case.

*(2) Earnings, December.—Gross, \$950,204, inc. \$106,070, or 12.43%.

From July 1 to Dec. 31 gross earnings \$4,361,354 increased \$466,902, or 11.99%.

This is the first time in the history of the company that the monthly increase in gross earnings on an even comparative basis exceeded \$100,000.

—Feb.

*(1) Note Sale.—It was announced Jan. 31, 1917, that this company, Boston, had withdrawn its application, recently made to the Massachusetts Gas and Electric Commission, for approval of an increase in its capital stock, and had sold \$10,000,000 5-yr. 5% coupon notes to the Old Colony Trust Co., the proceeds to be used in payment of its floating debt, already incurred, and for the future requirements of the company.

*(2) Comment on Note Sale.—On Feb. 1, 1917, the "Boston News Bureau" said the sale by this company of \$10,000,000 five-year 5% notes was a happy solution of the company's financing requirements. It enabled Edison to abandon the proposed stock increase, ready subscription to which was rendered doubtful by the decline in the market price of the shares to 200, at which price the proposed issue was to be made, and at the same time, by providing more than twice as much capital as the stock would have raised, financed the company further into the future.

F. S. Moseley & Co. and Parkinson & Burr are associated with the Old Colony Trust Co. in the purchase of the \$10,000,000 five-year 5% Edison Electric notes. The notes were reported as selling rapidly at a price of 102.22, a 4% basis.

*(3) Operating Figures, 1916.—It was stated Feb. 21, 1917, that all departments of this company made satisfac-

tory reports for the calendar year 1916. The sales department contracted for 53,204 kilowatts, an increase of 23.5% over the previous year. Included in this are contracts for over 26,000 horsepower, a gain of 40% over 1915. A new campaign has just been started to obtain 50,000 horsepower before Oct. 31, 1917.

The company wired 1,816 houses in 1916, compared with 1,524 in 1915. The records of the installations department show an added connected load of 28,287 kilowatts for 1916, making a total for the system of 261,131 kilowatts.

Generating department figures show that during 1916 238,537,144 kilowatt-hours were generated, an increase of 14.5% over 1915.

The maximum day's output increased from 829,200 kilowatts to 990,982 kilowatts (Dec. 22).

There was a large increase in sales of electrical appliances, which numbered 19,716 pieces, amounting in value to \$172,297, gains of 63% in number and 69% in value. It was estimated that a year's earnings from these appliances would be \$87,525.

—Mar.

*(1) Contract.—It was announced March 7, 1917, that the Revere Rubber Co. had decided to shut down its steam and electric plant at the Chelsea factory, and had signed a long-term contract with this company for its entire supply of electricity for all purposes, amounting to approximately 6,000 horsepower.

—Apr.

*(1) Increase in March Earnings.—This company's March, 1917, gross increased \$53,825 or 7.01% over the same month a year ago. The increase for March this year is less than usual because the earnings for March, 1916, were abnormally high, owing to the fact that they included a large proportion of the earnings of the extra day in February, 1916, due to leap year.

*(2) Long Contracts Made Before War.—On April 26, 1917, the "Boston News Bureau" said that this company was particularly fortunate in its coal situation, having made a long-term contract both for coal and for water transportation before the European war began in 1914. The prices under both contracts were at the then going rates, and it is now saving several hundred thousand dollars per year over some of its less fortunate neighbors. These contracts still have some years to run. Edison Co. in 1916 used 238,578 short tons of coal.

The company is also fortunate in its contract for incandescent lamps, the prices being about the same as in 1914. It is feeling severely the labor situation and the high cost of general supplies, but owing to the normal cost of coal and lamps, which are the two big items of expense (30% of the total), the expenses of the company are running only a little above normal.

The third quarter of the year has just closed and the company is able to carry forward, as undivided profits, over \$50,000 more than for the corresponding third quarter of the previous year. If the fourth quarter does as well comparatively, the year will end with an amount considerably over \$900,000 for depreciation reserves and for profit and loss. This is larger than in any previous year and 60% larger than the average for the past half dozen years.

EDISON ELECTRIC ILLUMINATING CO., BROOKLYN.

*(1) Directors Re-elected.—It was announced Feb. 27, 1917, that at the annual meeting of this company, retiring directors had been re-elected.

EDISON ELECTRIC ILLUMINATING CO., LEBANON, PA.

*(1) Merger Planned.—See Reading Transit & Light Co.—Item No. 1.

EDISON ELECTRIC LIGHT & POWER CO. OF AMSTERDAM.

*(1) Sale Plans.—See Adirondack Electric Power Corp.—Item No. 1.

EDISON PHONOGRAPH, LTD., EAST ORANGE, N. J.

*(1) Incorporated on Feb. 21, 1917, in New Jersey, with a capital of \$400,000, as a phonograph enterprise. Incorporators: C. Edison, S. B. Manbert and T. A. Edison, East Orange.

* EDMUNDS & JONES CORP.

*(1) Report, Year Ended Dec. 31, 1916, shows gross sales, \$2,829,285; gross income, \$747,822, after deduction of cost of sales; general expenses, \$185,996; pfd. and common dividends, \$171,625; surplus, \$590,301.

EDWARDS MANUFACTURING CO.

*(1) Portable Tent Stoves Purchased by Army.—On April 21, 1917, the United States Army closed a contract with this company for the purchase of 38,900 portable tent stoves. It is understood the army ultimately will buy 300,000 stoves.

EDWARD VALVE & MANUFACTURING CO., CHICAGO.

*(1) Capital Increased.—On Feb. 26, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$100,000 to \$250,000.

E. & E. CARBURETER CO., INC.

*(1) Incorporated on March 20, 1917, in New York, with a capital of \$500,000, to deal in carbureters, improvements and inventions. Incorporators: E. M. Murray, N. M. Thomson and M. E. Smith, 202 West 123d St., New York.

EFILATEM LUBRICANTS CO.

*(1) Incorporated on April 16, 1917, in Delaware, with a capital of \$1,200,000, to deal in and with lubricants, especially a lubricant known as Efilatem. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

EFLORESE SUGAR CO., CINCINNATI, O.

*(1) Incorporated on Jan. 23, 1917, in Ohio, with a capital of \$550,000, to deal in cereal products. Incorporators: Henry-Gravenkemper, Henry B. Street, M. E. Geiger, G. B. Jolly and Harry T. Evans.

EISENHUTH COMPOUND MOTOR CO.

*(1) Incorporated on April 12, 1917, in Delaware, with a capital of \$30,000,000, to manufacture locomotives, cars, boilers, etc. Incorporators: Samuel B. Howard, Arthur W. Britton and Harry B. Davis, New York.

EITINGON-SCHILD CO., INC., NEW YORK.

*(1) Capital Increased.—On March 1, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$400,000.

EL DORADO COTTON OIL CO.

*(1) Merger.—See Henderson Oil Mill Co.—Item No. 1.

EL DORADO GOLD STAR MINING CO.

*(1) Stock Issue Permit.—It was announced Feb. 24, 1917, that the California Commissioner of Corporations had permitted this company to issue 40,762 shares upon subscriptions heretofore taken for an aggregate selling price of \$27,404.85, and to sell an additional 34,238 shares at par, \$1 a share, so as to net the company not less than 85% of the selling price.

The company is operating claims in the Nob Hill section of El Dorado mining district, Clark County, Nev., and has an option to purchase additional properties. The proceeds are to be used for development work, the payment of indebtedness and the payment of \$15,600 on account of the purchase price of properties to be acquired.

ELECTRICAL SECURITIES CORP.

*(1) Report, Year Ended Dec. 31, 1916, of this company, one of the securities holding companies controlled by General Electric Co., showed gross income of \$567,416, with payment of expenses and taxes of \$74,608 and interest of \$214,671, leaving net income of \$278,137. Net profit from sales of securities was \$24,970, making surplus for the year \$303,107 and total surplus \$1,728,792.

From this were paid pfd. dividends of \$50,000 and common dividends of \$200,000, leaving net surplus Dec. 31, \$1,476,792, to which was added \$74,951 increase in book value of assets in the year, making profit and loss surplus Jan. 1, 1917, \$1,551,743.

The company's balance sheet Dec. 31 showed outstanding 5% collateral trust bonds of \$4,288,000, to secure which were \$5,986,500 face value of bonds appraised at a value of \$4,634,375 and \$14,388 in cash, leaving a surplus of \$300,763 above the amount of bonds outstanding.

In addition, the company owned stocks of a par value of \$2,647,800, appraised at \$765,755, and bonds of a face value of \$3,374,334, appraised at \$2,207,905, with notes and accounts receivable of \$835,068, syndicate accounts of \$258,112, interest receivable of \$57,737, and cash of \$638,363.

Liabilities, aside from the collateral trust bonds, consisted of \$1,000,000 pfd. and \$2,500,000 common stock, \$84,700 accrued interest, \$821 accounts payable, \$12,570 reserve for taxes, \$3,870 suspense, and surplus \$1,551,743.

ELECTRIC BOAT CO.

*(1) Contracts.—Net Yearly Earnings.—On Jan. 10, 1917, this company announced that contracts had been signed with the United States Government for 21 submarine craft at a total cost of \$17,000,000. "The completion of the order," said Pres. H. R. Carse of the company, "will give to the Navy Department one of the very latest, fastest and most complete underwater flotillas among the larger powers of the world."

Mr. Carse said that the final returns would show net earnings from the Electric Boat Co. business of 1916 well in excess of \$6,000,000.

—Feb.

*(1) Report, Year Ended Dec. 31, 1916, of this company and subsidiaries shows earnings as follows:

	1916	1915
Net.....	\$7,012,084	\$5,622,854
Surp. after chgs. and divs.....	1,876,189	3,401,532

*(2) Balance Sheet, as of Dec. 31, 1916, of this company and subsidiaries, exclusive of New York Ship & Engine Co., shows a profit and loss surplus of \$4,166,684, compared with \$4,857,083 Dec. 31, 1915.

*(3) Statement by President.—It was announced Feb. 13, 1917, that Pres. Henry R. Carse, of this company, in his annual statement to stockholders, said: "The gross business done by the company in the different departments for the year 1916 amounted to approximately \$26,000,000, and the unfinished business on hand at the beginning of 1917 amounts to about \$29,000,000."

"Recent developments indicate that business offering to the company during the coming year should be in very large volume and such as will require the development to the fullest extent of all departments of the company's plants and the probable acquisition of new properties in order that this company may be able fully to co-operate with the United States Government in the development of its naval equipment."

"The great value of the submarine boat has been further demonstrated and development in the future will undoubtedly be along lines of larger units, so that ultimately submarine boats will be substituted for torpedo boats and torpedo boat destroyers and probably for light cruisers."

"The construction of submarine boats has now been placed to a great extent on a commercial basis comparable with other lines of shipbuilding, and the company expects, through the development of its plants and equipments, to be able to handle this work to the complete satisfaction of the governments for which the boats may be constructed, especially as to prompt delivery."

"The extraordinary profits for the years 1915 and 1916 were due in great measure to special activity in certain lines of the company's work, which cannot be expected to continue as regular output."

"The increased volume of business which the company is handling requires large working capital, especially as it is necessary to grant deferred terms of payment on certain lines of production."

"The directors of the company, however, expect that, with the developments that are now taking place to handle the great volume of submarine boat construction which presents itself, the returns to the stockholders will prove satisfactory in the future."

—Mar.

*(1) Statement About Dividends.—See Submarine Boat Corp.—Item No. 2.

* ELECTRIC BOND & SHARE CO.

*(1) New Vice-President.—It was announced Jan. 3, 1917, that Edward K. Hall, Vice-Pres. of the New England Telephone & Telegraph Co., had been elected a Vice-Pres. of this company and would assume his new duties Jan. 15. Mr. Hall was formerly general counsel of the New England Telephone & Telegraph Co.

*(2) Vice-Pres. Dahl Resigns.—It was announced Jan. 10, 1917, that Garhard M. Dahl had resigned as Vice-Pres. and director of this company.

The election of Edward K. Hall, formerly Vice-Pres. of the New England Telephone & Telegraph Co., was in anticipation of Mr. Dahl's resignation, and the affairs of the company heretofore in charge of Mr. Dahl will be taken over by Mr. Hall, who will assume his new duties on Jan. 15.

—Feb.

*(1) Board to Be Enlarged.—It was announced Feb. 5, 1917, that at the annual meeting of this company at Schenectady, N. Y., Feb. 21 the number of directors would be increased from 15 to 18. On account of the meeting the transfer books will be closed from Feb. 6 to Feb. 23.

JANUARY 1 TO APRIL 30, 1917

—Mar.

*(1) Status.—It was stated Feb. 28, 1917, that the assets of this company are: Investments in stocks and bonds, \$1,809,416; current assets, \$3,558,470; salary, expense and construction office advances, \$33,493; furniture and equipment, \$27,923; good-will of Westinghouse, Church, Kerr & Co., \$2,000,000; discount on securities issued, \$1,985,740; total, \$9,395,043.

The liabilities are: Pfd. stock, \$3,200,000; common stock, \$4,000,000; bonds called and not presented for payment, \$40,000; notes payable, \$400,000; accounts payable, \$757,118; reserves, \$42,744; surplus, \$948,281; total, \$9,395,043.

While the company has made no statement for publication of the nature of the business for the past year, the brochure sent out Feb. 28, 1917, under the title of "A Free Hand from the Dominion," gives a glimpse into the record of the corporation's affairs.

"The Canadian Government wanted a small arms ammunition plant," says the booklet, "with a capacity of 300,000 .303 rifle cartridges every ten-hour day. They turned over to us an order to go ahead and a hundred acres of unimproved farm land in Lindsay, Ont.

"We worked out this Lindsay arsenal plant in every detail and will deliver it complete, not only as to buildings, power and machinery, but with all the equipment necessary for immediate motion operation.

"The plant is absolutely self-contained, making the cases, bullets and every part of the finished cartridge ready for carriage to the front in the necessary ammunition boxes.

"One of the interesting problems of the work was the necessary methods adopted for the handling of dangerous explosives. We studied and installed the latest devices for drying fulminate of mercury and potassium chlorate, put in flash-proof floors and built the latest type of magazine for storing cordite in quantities. We also provided lightning protection of the latest and most approved type.

"All details were worked out in close co-operation with the Government departments having these matters in charge."

ELECTRIC STORAGE BATTERY CO.

*(1) New Addition.—It was announced Jan. 29, 1917, that this company, Philadelphia, had awarded a contract for an eight-story, reinforced concrete addition to its plant, 120x123 ft., to cost \$500,000.

—Mar.

*(1) Report, Year Ended Dec. 31, 1916, shows income account as follows:

JANUARY 1 TO APRIL 30, 1917

ELGIN MOTOR TRUCK CO.

¹(1) New Name.—See New Era Engineering Co.—Item No. 1.

ELGIN NATIONAL WATCH CO.

¹(1) President States War's Effect on Company Is Slight.—Pres. Hulburd, of this company, April 16, 1917, said: "Our own plants are running at full capacity, but there has been recently some slackening in new orders—nothing consequential, however. Car shortages cause us very little trouble. We have not been in the war goods business, although we did fill a small order for a customer whose products required some of ours to make a finished war article. We could do nothing for the Government because the American toolmakers are too busy, and we have much trouble getting tools from abroad."

ELGIN TRACTOR CORP.

¹(1) Capital Increased.—On Jan. 30, 1917, the company filed notice at Albany, N. Y., of an increase in pfd. stock from \$100,000 to \$300,000; common, 529 to 9,000 shares; capital to carry on business, \$102,625 to \$345,000.

**ELKADER LIGHT & POWER CO.,
ELKADER, IOWA.**

¹(1) New Company.—It was announced Jan. 26, 1917, that this company, of Elkader, Ia., had been incorporated with a capital of \$300,000. Incorporators: F. H. Schmidt, C. G. Schmidt and R. F. Schmidt.

ELK BASIN PETROLEUM CO.

¹(1) Initial Dividend.—Announced Jan. 8, 1917, that this company had declared an initial quarterly dividend of 2½% on the capital stock, payable Feb. 1 to stock of record Jan. 15.

It is planned to increase this rate in subsequent quarters, and it is thought a total of 15% will be declared in 1917.

ELK GOLD MINING CO.

¹(1) Stock Issue.—It was announced Jan. 5, 1917, that this company, of Fresno, Cal., had been permitted by Commissioner of Corporations E. L. Carnahan, of California, to issue 5,000 shares of Charles O'Neal and 20,002 shares of William McEwen, Sr., in exchange for the Willow Creek mining claim and adjacent mill site and various mining equipment situated in the Hildreth mining district, Madera County.

The company is also permitted to sell 19,995 shares at the price of 50 cents per share. The proceeds are to be used for the installation of a 5-stamp mill, concentrator, hoist, buildings and for working capital.

ELKHORN PINEY COAL MINING CO.

¹(1) Bond Sale.—Announcement was made Feb. 16, 1917, of the purchase and sale by Wm. A. Read & Co., of \$1,500,000 of this company's 6% serial gold bonds, due 1919-1930.

**ELLY CO. (THE),
WILMINGTON, DEL.**

¹(1) Incorporated in March, 1917, in Delaware, with a capital of \$425,000, to manufacture wearing apparel.

ELM ORLU MINING CO.

¹(1) Injunction Sought.—See Butte & Superior Mining Co.—Item No. 2.

EL PASO & SOUTHWESTERN R. R.

¹(1) Locomotive Order.—See American Locomotive Co.—Item No. 3.

ELY CONSOLIDATED COPPER CO.

¹(1) Taken Over.—It was announced Jan. 3, 1917, that this company had been taken over by the Pingree-Eccles-Gobbe interests, of Salt Lake City. Plans call for a flotation plant and other necessary equipment for development.

ELYRIA IRON & STEEL CO.

¹(1) Addition Completed.—It was announced Jan. 24, 1917, that this company, with factories at Cleveland and Elyria, O., had completed a large addition to its Cleveland tube mill, which increases the tube capacity approximately 12,000,000 feet per year. All buildings are of the latest monitor type construction, with all modern appliances for the safety and convenience of the employees.

ELY VERMILLION IRON CO.

¹(1) Incorporated on March 22, 1917, in Delaware, with a capital of \$1,500,000, to operate mining claims containing minerals and ores of all kinds. Incorporators: John F. Mahon, Chas. R. Cole and Marlon Luce, Chicago, Ill.

ELY & WALKER DRY GOODS CO.

¹(1) Capital Increased.—Announced Jan. 8, 1917, that this company, of St. Louis, had increased its capital stock from \$450,000 to \$6,000,000 by issuing 15,000 shares of new stock.

EMERSON-BRANTINGHAM CO.

¹(1) Report, Year Ended Oct. 31, 1916, shows net profits amounting to \$351,173, after allowances for interest and depreciation, as compared with \$201,662 in the previous year.

**EMORY MINING & MILLING CO.,
SEATTLE, WASH.**

¹(1) Incorporated on April 4, 1917, in Washington, with a capital of \$500,000. Incorporators: Frank A. Losekamp, Emory W. Rose and Jesseph Carter.

**EMPIRE ALL-STAR CORP.,
EDDYVILLE, N. Y.**

¹(1) Incorporated on Jan. 12, 1917, in New York, with a capital of 4,000 shares, \$100 each, 20,000 shares no par value; to carry on business with \$500,000 in motion pictures. Incorporators: H. C. Hancock, S. E. Collins and W. H. Jeffers, 128 Broadway, New York.

EMPIRE AUTOMOBILE CO.

¹(1) Underwriting Syndicate for New Company.—See Federated Motors Co.—Item No. 3.

EMPIRE CITY SUBWAY CO., LTD.

¹(1) Capital Increased.—On March 15, 1917, the company filed notice at Albany, N. Y., of an increase in capital from \$6,000,000 to \$7,500,000.

EMPIRE GASOLINE CO.

¹(1) Incorporated on March 5, 1917, in Delaware, with a capital of \$2,000,000, to produce and deal in oils and products of oils of all kinds. Incorporators: James M. Satterfield, M. M. Hiron and J. B. Bailey, Dover, Del.

¹(2) New Company Plans.—It was stated March 6, 1917, that this company, incorporated under the laws of Delaware, with a capital stock of \$2,000,000, would be a subsidiary of the Empire Gas & Fuel Co., controlled by Cities Service Co. The new subsidiary will take over the gasoline extraction stations of the Empire Gas & Fuel Co. in Kansas and Oklahoma and extract and market the casinghead gasoline production from the natural gas wells and lines of Empire Gas & Fuel.

EMPIRE GAS & FUEL CO.

¹(1) Bond Sale.—See Empire Refining Co.—Item No. 1.

¹(2) Status of New Refining Co.—See Empire Refining Co.—Item No. 2.

—Mar.

¹(1) Tenders Asked.—It was announced March 5, 1917, that this company had asked for tenders to the Bankers Trust Co., New York, until March 26, 1917, for such an amount of its first mortgage and collateral trust 6% bonds as may be purchased with \$400,000 now available for the sinking fund.

¹(2) New Company Plans.—See Empire Gasoline Co.—Item No. 2.

¹(3) Report, Quarter Ended Jan. 31, 1917, shows gross of \$3,833,243, with net of \$2,638,700 and a balance, after providing for the proportionate share of earnings on stocks of subsidiaries not owned, of \$2,484,553. Bond interest was \$204,562, leaving a surplus for the quarter of \$2,279,993.

EMPIRE PETROLEUM CO.

¹(1) Incorporated on March 5, 1917, in Delaware, with a capital of \$2,000,000, to deal in oils and gas and acquire lands and develop same. Incorporators: James M. Satterfield, M. M. Hiron and J. B. Bailey, all of Dover, Del.

¹(2) New Company Plans.—It was stated March 6, 1917, that this company, incorporated under the laws of Delaware with a capital stock of \$2,000,000 would be a subsidiary of the Empire Refining Co. and would have under its charge the handling of the quick assets of the Refining Company in connection with its manufactured products.

EMPIRE PIPE LINE CO.

¹(1) New Pipe Line Nearing Completion.—On April 16, 1917, the "Wall Street

JANUARY 1 TO APRIL 30, 1917

Journal" said that construction of the 8-inch pipe line of this company from the Kansas oil fields at El Dorado and Augusta to the Ponca City refineries of the company was being pushed rapidly. It is completed to south of Arkansas City and pipe for the remainder of the distance to the refineries is on the ground.

With the completion of this pipe line the refineries at Ponca City and Cushing, controlled by Cities Service Co., subsidiaries, are insured against any possible shortage of crude oil. The refineries in Oklahoma and Texas recently purchased by the Cities Service interests are largely purchasing their supplies of crude oil from outside producers and some of these contracts will expire in May, by which time the new pipe line likely will be completed.

The new pipe line will supply these refineries with oil from the producing fields controlled by Cities Service Co.

EMPIRE REFINERIES, INC., AUGUSTA, ME.

*(1) Incorporated in February, 1917, in Maine, with a capital of \$5,000,000, to own, lease, deal in and operate gas, oil and other mineral-bearing properties.

EMPIRE REFINING CO.

1(1) Bond Sale.—It was announced Jan. 22, 1917, that Montgomery, Clothier & Tyler, Kissel, Kinnicutt & Co., and Henry L. Doherty & Co. had purchased \$7,000,000 Empire Refining Co. first mortgage and collateral trust 10-year sinking fund 6% bonds guaranteed by the Empire Gas & Fuel Co.

These bonds are a first lien, either directly or through ownership of securities, on refineries, tank cars, oil pipe lines, etc., located in Oklahoma and Texas, valued at over \$12,000,000. None of the companies whose securities are pledged will create any mortgage indebtedness unless it is pledged to secure these bonds.

Henry L. Doherty, in a letter to the bankers, stated he was advised by experts that the oil production of the Empire Gas & Fuel properties can be largely increased, and points out that the great strength of this situation is that it is absolutely inter-dependent. The allied company, Empire Gas & Fuel Co., has a sufficient amount of crude production at present to more than take care of all the needs of the refineries, and the Empire Pipe Line Co. is so planned that it will take the oil directly from the fields to the refineries.

Earnings of the properties amounted to over \$4,000,000 net in the year ended Dec. 31. The new bonds will have a sinking fund beginning Aug. 1, 1917, providing for the retirement annually of 10% of the amount issued.

1(2) New Company—Status.—It was stated Jan. 23, 1917, that with the organization of this company, the latest Cities Service Co. subsidiary, the latter company has refining capacity of between 30,000 and 31,000 barrels of crude oil daily. Of this refining capacity 28,250 barrels are in the six refineries in the mid-continent field, comprised in the new company, and about 2,500 barrels daily in the three refineries of the Crew Levick Co. in Pennsylvania. Of the mid-continent refineries the largest is at Gainesville, Tex., the others being located at Okmulgee, Ponca City, Cushing and Oklahoma City.

As Empire Gas & Fuel Co., the producing subsidiary of the mid-continent field, is now marketing about 28,000 barrels of crude oil daily, it will be seen that the producing subsidiary may easily supply all the crude oil needed by the refining subsidiary, and the daily production of Empire Gas & Fuel can be largely increased.

Empire Refining Co. owns about 1,125,000 barrels of tankage in the El Dorado and Augusta districts, and 180 miles of pipe line. The new company will at once take steps to connect these pipe lines with the refineries by the construction of new pipe lines, this work to cost approximately \$1,500,000.

With the completion of these additional pipe lines the Empire Refining Co. will refine the production of the Empire Gas & Fuel Co. Funds for the additional pipe lines and for other improvements will be supplied from a part of the proceeds of the \$7,000,000 Empire Refining bonds recently sold from an authorized issue of \$10,000,000. Additional bonds may only be issued for 75% of the cost of improvements, and under other restrictions.

The properties of Empire Refining Co. are valued in excess of \$12,000,000. Retirement of the bonds will be at the rate of 10% a year, and at least 60% of income, after interest and sinking funds, must be used for extensions and improvements to the properties, for the acquisition of new properties or for the retirement of additional bonds.

Revenues from the new company will add materially to the income of Cities Service Co. For the year ended Dec. 31, 1916, gross of the properties included in Empire Refining Co. was \$11,827,845, and net was \$4,014,329. As interest on the bonds will be \$420,000 annually, this would have left a balance over interest charges of \$3,594,329 for the year.

Empire Gas & Fuel Co., which guarantees the bonds, principal and interest, had a surplus, after all interest and sinking fund charges, for the year ended Dec. 31, 1916, of \$3,263,579.

Capital stock of the new company probably will be \$10,000,000, and all of it will be owned by Cities Service Co.

1(3) Bond Offering.—On Jan. 23, 1917, a syndicate headed by Montgomery, Clothier & Tyler, Kissel, Kinnicutt & Co. and Henry L. Doherty & Co. announced the offering for public subscription at 100 and interest to yield 6%, \$7,000,000 first mortgage and collateral trust 10-year sinking fund 6% gold bonds of this company, dated Feb. 1, 1917, and maturing Feb. 1, 1927.

These bonds are in coupon form, in denominations of \$1,000 and \$500. They are callable as a whole or in part, or for the sinking fund, until and including Feb. 1, 1921, at 104; thereafter until and including Feb. 1, 1924, at 106, and thereafter until maturity at 108.

1(4) Incorporated on Jan. 23, 1917, in Delaware, with a capital of \$10,000,000, to acquire and develop gas and oil-bearing and mineral lands. Incorporators: L. B. Phillips and J. B. Bailey, Dover, Del.

—Mar.

1(1) Plans of New Subsidiary.—See Empire Petroleum Co.—Item No. 2.

—Apr.

1(1) \$7,000,000 Bonds Sold by Syndicate.—Montgomery, Clothier & Tyler, Kissel, Kinnicutt & Co., and Henry L. Doherty & Co., managers of the syndicate which underwrote the \$7,000,000 Empire Refining Co. first mortgage and collateral trust 10-year 6% sinking fund gold bonds, due 1927, announced April 23, 1917, that they had sold the entire issue, but that the syndicate would be kept alive until July 1 unless sooner terminated by the managers.

EMPIRE STATE ZINC & COPPER CO.

1(1) Incorporated on Feb. 12, 1917, in Delaware, with a capital of \$1,000,000, to mine for copper, gold, silver, etc. Incorporators: M. M. Hiron and J. B. Bailey, Dover, Del.

EMPIRE UNITED RYS., INC.

1(1) Reorganization Plan Accepted.—It was announced at Syracuse, N. Y., Jan. 24, 1917, that the plan for the reorganization of this company, exclusive of the Rochester, Syracuse & Eastern R. R., had been accepted by the bondholders' committee. Unpaid interest on the Syracuse, Lake Shore & Northern and the Auburn & Northern bonds are to be paid in full, the bonds continuing as first lien on properties covered.

—Feb.

1(1) Details of Reorganization Plan.—It was stated Feb. 26, 1917, that the committee in charge of the reorganiza-

tion of the Empire United Railways, Inc., had announced details of its plan, providing for the sale of the property under the lien of the Empire United Rys. first and refunding 5% bonds. The plan provides for an assessment of \$50 on each \$1,000 bond and an assessment of \$170 on each \$1,000 of unsecured notes or indebtedness. The common and pfd. stocks of the company will be entirely wiped out in the reorganization. Underlying bonds will not be disturbed and interest on them will be paid.

Securities to be issued by the new company, to be incorporated under the laws of New York, will consist of \$350,000 6% 3-year notes, \$700,000 Series A 6% pfd., \$1,250,000 Series B 6% non-cumulative pfd., and \$1,500,000 common stock. The Series B pfd. and the common stock are to be placed in a voting trust for five years. Ford, Bacon & Davis will be managers of the new company and the committee has arranged to sell the notes to them at 95 and the unissued Series A pfd. stock is to be held subject to a two years' option to Ford, Bacon & Davis to purchase, ex-dividend, at 70.

Of Series B pfd. \$250,000 is to be transferred to Ford, Bacon & Davis as part consideration for their agreement to purchase the 3-year notes at 95 and for their services in connection with the reorganization, and Ford, Bacon & Davis also are to receive \$500,000 of the common stock for their services.

Holders of the Empire United Rys. first and refunding bonds, on payment of an assessment of \$50 per \$1,000 bond, shall receive for each bond \$66.66 par value, Series A pfd., \$625 Series B pfd., and \$450 common stock. If the assessment is not paid, each bond will receive \$350 in Series B pfd. and \$400 in common stock. Each \$1,000 of unsecured notes or indebtedness, on payment of \$170 assessment, will receive \$226.66 Series A pfd., \$200 Series B pfd. and \$500 common stock. Subscriptions under the plan must be made by March 27.

The plan provides cash of \$599,300, of which \$350,000 is for expenses in connection with the foreclosure and the reorganization and in addition to the securities received by Ford, Bacon & Davis for their services they also are to receive \$15,000 cash.

The underlying securities, which will remain undisturbed, are \$2,500,000 Syracuse, Lake Shore & Northern R. R. bonds and \$250,000 Auburn & Northern Electric R. R. bonds.

—Mar.

1(1) Notes Called.—Announced March 19, 1917, that the one-year notes of this company of Feb. 16, 1915, had been called by the Bankers Trust Co., trustee, for payment thereon of the pro rata amount of the net proceeds of funds remitted to the trustee by the guarantors since Dec. 12, 1916, amounting to \$60.30 per \$1,000.

EMPIRE ZINC CO.

1(1) Acquisition.—It was announced Feb. 21, 1917, that the Black Iron zinc mine at Red Cliff, Col., owned in part by the American Zinc Co. of Helena, Mont., had been purchased for \$800,000 in fee and lease by the Empire Zinc Co. of Colorado, a subsidiary of the New Jersey Zinc Co.

The New Jersey corporation is capitalized at \$35,000,000.

ENAMELED TANK CO.

1(1) Taken Over.—See Kalamazoo Sanitary Manufacturing Co.—Item No. 1.

ENDURANCE SILK CO.

PATERSON, N. J.

1(1) Incorporated in April, 1917, in New Jersey, with a capital of \$250,000, to manufacture silk and other textile fabrics.

ENDURANCE TIRE & RUBBER CORP. OF NEW YORK.

1(1) Incorporated on Jan. 27, 1917, in New York, with a capital of \$1,000,000.

JANUARY 1 TO APRIL 30, 1917

to deal in rubber goods, tires, tubes and planters. Incorporators: F. B. York, B. F. Norris and H. G. Smith, 271 Broadway, New York.

ENGELS COPPER MINING CO.

¹(1) **Stock Issue.**—Announced Jan. 5, 1917, that this company, San Francisco, had been permitted to sell 100,000 shares at par, \$1 a share net to the company, for the purpose of building an additional mill and equipment in connection with the operation of the property in Plumas County.

¹(2) **New Plant.**—It was stated Jan. 5, 1917, that this company, operating in Lights Canyon, near Taylorville, Cal., had completed plans for installing a plant with a capacity of 2,000 tons daily, which will be four times as large as the plant now in operation.

The operations of the Engels company have developed a need for electric current, which the Great Western Power Co., with its 1,000-horsepower plant at Butt Valley, will be unable to supply without developing additional power at some other plant.

It is understood that the power company will run a transmission line from its big plant at Las Plumas and deliver additional power to the mine.

ENOCHS-HERMES BRAID CO.

¹(1) **Consolidation.**—See Quaker Braid Co.—Item No. 1.

ENTERPRISE DEVELOPMENT CO., SEATTLE, WASH.

¹(1) **Incorporated** on Jan. 15, 1917, in Washington, with a capital of \$300,000. Incorporators: Chas. V. Harper and Arthur D. Bird.

EQUITABLE CO-OPERATIVE

MILLING CO., HELENA, MONT.
¹(1) **Incorporated** in April, 1917, in Montana, with a capital of \$300,000. Incorporators: John C. Dooley, Jas. E. Waite and E. J. M. Williams. It will establish a milling plant at Helena.

EQUITABLE TRUST CO., NEW YORK.

¹(1) **Capital Increase.**—It was announced Jan. 5, 1917, that the trustees of this company had voted to increase the capital stock from \$3,000,000 to \$6,000,000.

The trustees will recommend to stockholders, called for a special meeting on Jan. 22, to approve of the increase and that the new stock be issued at \$150 per share. Besides supplying the extra \$3,000,000 capital, \$1,500,000 will be added to the surplus account, making that item \$11,550,000.

The deposits of the Equitable Trust Co. are now nearly 2½ times what they were at the close of 1914. This growth, which has been in conformity with the general expansion in the banking business in the past two years, has made a disproportionate ratio between deposit liability and capitalization, and has made necessary the raising of banking capital in a number of instances.

The Equitable's ratio of liability to capitalization, that is capital and surplus account, has been about 13 to 1.

¹(2) **Stock Increase Ratified.**—It was announced Jan. 22, 1917, that stockholders of this company at a special meeting formally ratified the increase in the capital stock from \$3,000,000 to \$6,000,000. The 30,000 new shares will be offered to stockholders at \$150 per share, which will enable \$1,500,000 to be added to surplus. The new stock must be paid for on or before March 1.

¹(3) **Capital Increased.**—On Jan. 24, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$3,000,000 to \$6,000,000.

—Mar.

¹(1) **Dividends.**—Announced March 21, 1917, that the trustees of this company had declared a dividend for March of 1½%, payable March 31 to stock of record March 26. The company paid ½% on its old capitalization on Feb. 28. The new dividend is in the nature of an

interim dividend, bringing the dividend payment back to a quarterly basis, and is equivalent to a 20% per annum basis.

ERD MOTOR CO., SAGINAW, MICH.

¹(1) **Officers and Directors.**—It was announced Feb. 23, 1917, that Ben. G. Appleby had been elected Pres. of this company, Saginaw, Mich.; J. G. Erd, Vice-Pres.; H. S. Erd, Sec'y, and A. W. Seeley, Treas. and Mgr. The directors are: O. L. Dittmar, C. F. Beech, W. J. Passoliti, R. Knapp and the officers named.

—Apr.

¹(1) **\$250,000 Contract Secured.**—The "Iron Age" April 19, 1917, stated that this company, Saginaw, Mich., had signed a contract with a Toronto, Ont., company for the production of \$250,000 worth of engines for tractors. The motors are to be delivered within three months. This order probably will be followed by others. New business estimated to total up to about \$500,000, will necessitate the construction of an addition to the company's plant.

ERICKSON TIRE CORP.

¹(1) **Incorporated** on April 6, 1917, in Delaware, with a capital of \$300,000, to manufacture tires of all kinds. Incorporators: W. Howard Hoople and Walter Alderson, Brooklyn, and Geo. M. Brooks, New York.

ERICKSON WHEEL CORP.

¹(1) **Incorporated** on Jan. 12, 1917, in Delaware, with a capital of \$5,000,000, to manufacture automobiles and all kinds of motor vehicles. Incorporators: John W. Mitchell, C. W. Gould, New York and Augustus B. Wilson, Weehawken, N. J.

ERIE & JERSEY R. R. CO.

¹(1) **Application to List.**—See Erie R. R. Co.—Item No. 4.

—Mar.

¹(1) **Bonds Listed** in New York.—See Erie R. R. Co.—Item No. 1.

ERIE LIGHTING CO.

¹(1) **Bonds Called.**—Announced March 8, 1917, that this company had called for redemption, at 105 and interest, on April 1, at the Guaranty Trust Co., all its outstanding first mortgage 5% bonds.

¹(2) **Acquisition Planned.**—It was announced Jan. 5, 1917, that directors of the Cleveland & Mahoning Valley R. R., owning the line running from Cleveland to the Pennsylvania State line and operated by the Erie, had recommended that the latter carrier be granted a 999-year lease superseding the present lease operative until 1932.

Stockholders will act on the recommendation of the C. & M. V. board at a meeting to be held in Cleveland Feb. 15. Most of the C. & M. V. R. R. stockholders reside in England. They are expected to express their approval of the plan by proxies to resident shareholders.

Approval of the proposed lease will mean that the Erie will go forward with tentatively outlined plans to eliminate grade crossings in Youngstown, O., at a cost of about \$5,000,000 and to improve otherwise its road between Youngstown and Cleveland so as to lessen the running time between the two points.

¹(3) **New Director.**—Announced Jan. 24, 1917, that B. A. Eckhar, of Chicago, had been elected a director of this company, to succeed Geo. W. Perkins, resigned.

—Feb.

	1916	1915

¹(2) **Rivalry for Control.**—See Frontier Electric Ry. Co.—Item No. 1.

¹(3) **Equipment Trusts.**—It was announced Feb. 14, 1917, that this company had petitioned the New York Second District Public Service Commission for authority to issue \$3,680,000 4½% equipment trust certificates, to be designated as Erie Railroad equipment trust series "EE."

¹(4) **Application to List.**—Announced Feb. 17, 1917, that the New York Stock Exchange had received application to list Erie \$6,000,000 Genesee River R. R. first mortgage 6% 50-year sinking fund bonds and \$7,400,000 Erie & Jersey R. R. first mortgage 6% 50-year sinking fund bonds, due July 1, 1935.

—Mar.

¹(1) **Bonds Listed** in New York.—Announced March 1, 1917, that the New York Stock Exchange had listed \$7,378,000 of this company's first mortgage 6% 50-year sinking fund bonds of the Erie & Jersey R. R. Co. and \$3,982,000 first mortgage 6% 50-year sinking fund bonds of the Genesee River R. R. Co.

¹(2) **Note Issue Planned.**—It was announced March 7, 1917, that this company had applied to the New York Second District Public Service Commission for permission to issue \$15,000,000 two-year 5% collateral gold notes, \$9,280,000 to be used in taking up notes, due April 1, 1917, and \$5,720,000 for reimbursement for capital expenditures, leaving unprovided for \$4,560,000.

¹(3) **Syndicate to Make Offering.**—It was stated March 7, 1917, that the \$15,000,000 notes of this company, according to the plans, would be taken by a Morgan syndicate and offered to investors probably on a 5½% basis.

	1917	1916
¹ (4) Earnings—		
Jan. gross	\$4,984,169	\$5,119,712
Net after taxes	156,816	1,018,904

¹(5) **Status.**—It was stated March 7, 1917, that this company's surplus after all deductions, including sinking funds, for the calendar, and also fiscal, year ended Dec. 31, 1916, decreased \$2,800,000, although in the same period gross increased \$7,248,000.

Operating expenses, however, increased \$9,500,000. Gross was \$73,683,000 in 1916, which is over \$7,000,000 in excess of any previous year in the company's history. This is significant merely as indicating that the Erie's rehabilitation has increased its capacity beyond former limits even though under most adverse operating conditions its net went \$2,300,000 below that of 1915. Other income increased \$720,000, but interest, rentals, etc., increased \$1,178,000. The net result was a decline in surplus of \$2,800,000 as indicated by the year's comparisons, which are given below. Fixed charges for 1916 are estimated for one month, actual to November 30.

	1916	1915
Jan. 1-Dec. 31—		
Gross	\$73,683,000	\$68,493,720
Net after taxes	18,497,269	20,815,060
Total income	21,632,405	\$3,277,845
Net income	5,462,341	8,256,041
Sinking fund	881,760	886,068
Surplus	4,580,581	7,369,978

The Erie's balance sheet indicates that on Nov. 30, 1916, the company was not excessively strong in working capital. Current assets totaled \$20,839,000, while current liabilities, exclusive of the \$13,500,000 notes maturing April 1, 1917, were \$15,517,000. Net working capital was therefore approximately \$5,000,000, which is not large for a company doing the volume of business that the Erie does. Including the maturing notes, which will, however, be provided for by issuance of new notes, there was a floating debt of over \$8,000,000.

¹(6) **Security Issue Authorized.**—It was announced March 12, 1917, that the New York Second District Public Service Commission had granted this company permission to issue more than \$18,000,000 in securities. An issue of \$15,000,000 in 5% two-year collateral notes to refund present indebtedness was authorized, as

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

was also an issue of \$3,630,000 in 4½% certificates to net at least \$3,643,000, the proceeds to be used to purchase \$4,464,531 worth of new equipment.

The difference between the equipment cost and the sum raised by the notes is to be contributed in cash from the company's treasury.

*(7) Notes Oversubscribed.—At the office of J. P. Morgan & Co. March 19, 1917, it was announced that the \$15,000,000 two-year 5% notes of this company had been oversubscribed and that the books had been closed. Subscribers will not receive the full amount for which they asked.

—Apr.

	1917	1916
*(1) Earnings—		
February gross.	\$4,458,900	\$5,095,083
Def. after taxes.	299,964	1,088,964
2 months gross.	9,443,079	10,214,800
Def. after taxes.	143,148	72,107,958
†Surplus.		

*(2) Surplus, Year Ended Dec. 31, 1916.—This company's report for the year 1916 showed surplus after charges amounting to \$6,027,664, a decrease of \$2,208,377, compared with the 1915 surplus. After allowing for dividends on the first and second pfd. stocks and deducting \$881,920 applied to sinking and other reserve funds, the balance was equivalent to \$2.30 a share on 1,123,789 shares common stock.

*(3) New Director.—At the annual meeting on April 10, 1917, B. A. Eckhart was elected a director to fill a vacancy caused by the resignation of George W. Perkins. Mitchell D. Folansbee, Myron T. Herrick and Frederick D. Underwood, whose terms as directors have expired, were re-elected for four years.

*(4) Stockholders Vote Dividend Resolution.—At the annual meeting on April 10, 1917, proxies for 1,042,091 shares of stock were voted. The following resolution was unanimously approved by a viva voce vote of stockholders present, the proxy committee not voting:

"Whereas, it appears from the yearly reports of the Erie Railroad Co. that dividends on the pfd. issues have been earned for several years past, therefore, be it resolved, that the directors be requested to declare within thirty days from this date dividends on both pfd. issues in such proportions as are warranted, provided the same shall have been earned." President Underwood stated that this resolution would be presented at the next meeting of the board of directors to be held on April 23.

*(5) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$33,803,704, compared with \$33,599,223 Dec. 31, 1915.

*(6) Deficit After Taxes Shown in Two Months.—On April 16, 1917, the "Wall Street Journal" said, in part: "After years of upbuilding in which millions of dollars have been turned back into their property, Erie stockholders have taken action looking toward a resumption of dividend payments on the 1st and 2d pfd. issues. No dividends have been paid on these stocks since 1907, when they each received 2%."

"There are outstanding \$47,892,400 4% non-cumulative 1st pfd. and \$16,000,000 4% non-cumulative 2d pfd. In the 12 months ended Dec. 31 last Erie earned surplus after charges and sinking fund appropriations of \$5,145,744, equivalent to 10.74% on the 1st pfd. issue outstanding. Allowing for full dividends on both pfd. issues the balance for the common was equal to 2.3% on the \$112,378,900 common stock outstanding. This compares with 4.31% so earned on the common in 1915.

"The Erie has had a long period of struggle and up-building in which millions of dollars have been turned back into the property for its upbuilding. Hopes have recently risen high at times that the road was 'about to arrive' and that pfd. stockholders might expect dividends shortly. Buying of Erie stocks based on such expectation was quite heavy at several times last year.

"In the month of February gross earnings of Erie were \$4,458,900, a loss of \$638,179, compared with last year. For January and February combined the loss was \$771,721, or a decrease of 7.5%, compared with the corresponding period in 1916.

"In February, Erie showed a deficit of \$299,964 after operating expenses and taxes, against a surplus of \$1,088,964 last year, and for the two months ended Feb. 28 the deficit was \$143,148.

"Unless the Interstate Commerce Commission comes speedily to the rescue of the railroads and permits a substantial increase in freight rates, the hope of Erie stockholders for any continuance of dividends will gain vanish."

*(7) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$33,803,704, compared with \$33,599,223 Dec. 31, 1915.

*(8) No Action on Dividends.—This company's directors at their regularly scheduled monthly meeting April 24, 1917, took no action on the resolution adopted by stockholders at their annual meeting recommending that dividends be resumed on the pfd. stock.

*(9) Changes Made in Operating Department.—At the reorganization meeting of the Board of Directors of this company April 24, 1917, Pres. Fred D. Underwood and other executive officials were reappointed to their respective positions. The board announced the following changes in the operating and transportation departments, which represents a radical reorganization in these departments.

William A. Baldwin has been appointed general superintendent of lines west of Salamanca vice Franklin G. Robbins, transferred as general superintendent of the Chicago Division.

John J. Mantell was appointed general superintendent of lines east of Salamanca vice William A. Baldwin, transferred. Augustus E. Ruffer was made superintendent of transportation vice George W. Kirtley, assigned to other duties.

Galen B. Owen was appointed superintendent of maintenance, and Harold Knight assistant superintendent of maintenance.

Other appointments were: Milton A. Baird, signal engineer; Henry O. Dunkle, assistant to the Pres. at Chicago; Frederick B. Lincoln, superintendent of terminals at New York; Edward J. Edmunds, superintendent of Wyoming Division, and Harrison M. Mills, superintendent of Marion Terminal.

The offices of general manager at New York, Youngstown and Chicago and of superintendent of Chicago Division were abolished.

ERIE TEMPERED COPPER PRODUCTS CO.

*(1) Incorporated on March 1, 1917, in Delaware, with a capital of \$250,000, to manufacture and deal in copper products. Incorporators: F. X. Bowman, A. A. Whiteland and C. H. Horne, Erie, Pa.

ERSKINE DANFORTH CORP., MANHATTAN, N. Y.

*(1) Capital Increased.—On April 16, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$300,000.

ESPERANZA MINER OF CALIFORNIA, INC.

*(1) New Name.—See Esperanza Mining Co. of New York.—Item No. 1.

ESPERANZA MINING CO.

*(1) Incorporated on Feb. 24, 1917, in Delaware, with a capital of \$2,000,000, to do a general mining, milling and refining of ores, metals, etc. Incorporators: Arthur W. Brinton, Samuel B. Howard and L. H. Gunther, all of New York.

ESPERANZA MINING CO. OF NEW YORK.

*(1) Change in Name.—On Feb. 28, 1917, the company filed notice at Dover, Del., of a change in name to the Esperanza Miner of California, Inc.

ESSEMAN & ELATE, INC.

*(1) Incorporated on March 30, 1917, in Delaware, with a capital of \$3,000,000 to operate stores and do a general merchandise business. Incorporators: Arthur W. Britton, Samuel B. Howard and L. H. Gunther, all of New York.

ETNA-CONNELLSVILLE COKE CO.

*(1) Officers and Directors.—It was announced Feb. 3, 1917, that at the annual meeting of the stockholders of this company, the following directors were elected: Cyrus Echar, D. M. Parkhill, F. M. Richey, Jr., Joseph L. Fritsch, J. B. Echar, George W. Campbell, J. B. Millard, W. W. Smith, Wade H. Marietta and J. W. Buttermore, all of Connellsville, Pa.; Isaac L. Sparks, Indian Head; W. H. Semans, Scottsdale, and W. E. Mier, Pennsylvania, Pa.

The company did approximately \$250,000 of business in 1916, the best year in its history. It has 119 ovens at the Garwood plant in Redstone Township, Pa.

ETTRICK REALTY CO., NEW YORK.

*(1) Capital Increased.—On March 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$100,000 to \$250,000.

EUREKA OIL CO. (THE).

*(1) Incorporated on Feb. 13, 1917, in Delaware, with a capital of \$3,000,000, to refine and market oil, gas, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

EUREKA PIPE LINE.

*(1) Report, Year Ended Dec. 31, 1916, shows: Profit, \$1,322,069; dividends paid, \$1,200,003; balance to profit and loss, \$122,066.

EVANS-THWING REFINING CO., KANSAS CITY, MO.

*(1) Incorporated in February, 1917, in Missouri, with a capital of \$1,000,000, to build a refinery, storage tank, tank cars, etc.; to refine and deal in oil. Incorporators: Harry M. Evans, Pres.; F. H. Thwing, Vice-Pres. and Treas.; H. G. James, Vice-Pres. and Gen. Mgr.; E. D. Ellison, Sec'y, and Ira E. Ellis, Supt.

EVANSTON HOTEL CO., CHICAGO.

*(1) Incorporated in April, 1917, in Illinois, with a capital of \$350,000, to operate hotels and restaurants.

EVANSVILLE & INDIANAPOLIS R. R.

*(1) Earnings, February.—Gross, \$42,135; deficit after taxes, \$7,871. Two months.—Gross, \$90,769; deficit after taxes, \$20,959.

EVANSVILLE & TERRE HAUTE R. R.

*(1) Stock Exchange Ruling.—On Jan. 2, 1917, it was announced that notice having been received that the interest due on Jan. 1 on the Evansville & Terre Haute R. R. 1st consolidated 6% bonds, due 1921, will be paid on that date, the committee on securities of the New York Stock Exchange had ruled that the bonds be quoted "ex" the coupon Jan. 2, and that until further notice the bonds will continue to be dealt in "flat."

EVERETT GAS CO.

*(1) Receivership.—It was announced Feb. 3, 1917, that this company, together with Tacoma Gas Co., two of the subsidiaries of Standard Gas & Electric Co. in Washington, had been placed in receivership, with Elmer Dover as receiver. This action was taken a preliminary to reorganization and refinancing of the properties.

For several years these properties, like Northern Idaho and Montana Power Co., a similarly controlled corporation recently placed in receivership, had

JANUARY 1 TO APRIL 30, 1917

been contending with the adverse business conditions in the Pacific Northwest.

The physical condition of both properties is excellent, and service has been satisfactory, with relatively lower operating cost; but, due to the small volume of output, they have had unsatisfactory net earnings. Reorganization plans for both companies will be submitted to their security holders early in 1917.

EVERETT, HEANEY & CO., INC.

*(1) Incorporated on April 2, 1917, in New York, with a capital of \$2,000,000, to deal in cotton, wool and textile fabrics. Incorporators: F. J. Heaney, M. R. Lawrence and S. K. Everett, 310 West 100th St., New York.

*(2) Stock All Taken.—On April 7, 1917, Sheldon, Morgan & Co., who underwrote 100,000 shares of this company's stock, announced that all of it had been subscribed for. The stock was offered at \$20 a share.

*(3) Listed on Curb.—On April 7, 1917, the listing committee of the New York Curb Market Association approved for temporary trading the 100,000 shares of capital stock of this company, par value \$20, to be traded in when, as and if issued.

EVERETT MILLS.

*(1) Stock Increase Planned.—It was stated March 1, 1917, that stockholders of this company had been notified of a special meeting March 9 to act on a proposal to increase the authorized capital stock from \$1,400,000 to \$2,100,000 through the conversion into permanent capital of \$700,000 of present surplus assets.

This action if approved will amount to a stock dividend of 50%.

Everett Mills has for years been ranked as among the best and most conservative of New England textile properties.

*(2) Stock Increase Authorized.—Announced March 9, 1917, that stockholders of this company had voted to increase the stock from \$1,400,000 to \$2,100,000, the increase to be distributed among the shareholders of record March 9.

EVINRUDE MOTOR CO., MILWAUKEE, WIS.

*(1) New Plant—Capital Increase.—On March 8, 1917, it was stated that this company would build a complete new gas and oil engine and motor plant costing \$250,000 on a new site. The company has increased its capital stock from \$350,000 to \$600,000 to finance the construction and to enlarge its business to include a general line of oil engines for farm and general utility purposes in addition to its line of gasoline rowboat motors.

—Apr.

*(1) Motor Adopted by Spanish Government.—Announced early in April, 1917, that this company had been notified that the Spanish Government had adopted the Evinrude detachable rowboat motor as standard for diversified uses in its navy. At present 25 governments are using the Milwaukee product as standard equipment.

EXCELSIOR SPRINGS WATER, GAS & ELECTRIC CO.

The company has paid special dividends on its common stock of 2% in March, 1915, 3% in February, 1916, 2% in September, 1916, and 2% in February, 1917.

EXCHEQUER MINING & POWER CO.

*(1) Permit to Sell Bought.—It was announced Jan. 30, 1917, that this company, which generates and sells electricity at Exchequer, on the Merced River, Cal., had applied to the California Railroad Commission for authority to offer its property to the public for sale at \$40,000.

The company stated that its power house and its dam were washed out in January, 1911, and that it is not in a financial condition to rebuild its system.

The application states that the company has expended \$118,076 in the purchase and building of its system.

The company is capitalized at \$1,500,000, of which \$1,102,400 in shares is outstanding, held by 59 shareholders. The company says that it does not owe any money.

EXPORTERS' INTERNATIONAL EXPRESS CO., WILMINGTON, DEL.

*(1) Incorporated on April 24, 1917, in Delaware, with a capital of \$500,000, to engage in a general transfer and express business. Incorporators: S. D. Townsend, Jr., Emile V. Topple and A. F. Husler, Wilmington, Del.

EXPORT-INDUSTRIAL CORP.

*(1) Incorporated on April 19, 1917, in Delaware, with a capital of \$1,000,000, to transact all kinds of mercantile business. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

EXPORT BY CO.

*(1) New Terminal.—It was announced March 22, 1917, that this company, Tampa, Fla., would build \$1,000,000 phosphate terminals, improvements to include dredging, constructing elevators, building railway, etc.

FACTORY PRODUCTS EXPORT CORP.

*(1) Incorporated on March 1, 1917, in New York, with a capital of \$250,000, as brokers for merchandise, motion picture plays, films and apparatus. Incorporators: L. E. Stoddard, W. W. Vick and J. T. Morrow, 61 Broadway, New York.

FAIRBANKS-MORSE CO.

*(1) Dividend at 12% Rate.—It was announced at Chicago March 28, 1917, that this company had increased the dividend on its common stock from a 10% to a 12% basis by the declaration of a quarterly disbursement of 3%, payable March 30 to stock of record March 28.

FAIRHAVEN MILLS.

*(1) New Company.—See New England Cotton Yarn Co.—Item No. 1.

—Apr.

*(1) Initial Dividends.—On April 12, 1917, this company, which is under the management of Harding, Tilton & Co., who bought the property from the New England Cotton Yarn Co., declared its first quarterly dividends of 1½% each on the pfd. and common stock, payable May 15 to stock of record May 5.

*(2) Status (April, 1917).—The company was formed Feb. 5, 1917, therefore there were only eight weeks in the first quarter, ended March 31. The earnings for these eight weeks showed the full quarter's dividend earned on the pfd. stock and five times the quarter's dividend earned on the common stock, after allowing for depreciation.

*(3) Balance Sheet, as of March 31, 1916, shows a profit and loss surplus of \$396,562.

FALK (G.) & BRO., INC.

*(1) Incorporated on Jan. 10, 1917, in New York, with a capital of 4,000 shares, \$100 each; 20,000 shares, no par value; to carry on business with \$500,000 as tobacconists. Incorporators: S. M. Wallach, D. N. Frank and K. S. Falk, 135 West 77th St., New York.

FALL RIVER IRON WORKS CO.

*(1) Strikers Return to Work.—Stated on April 7, 1917, that some of the automatic loom weavers of this company, who had been on strike, had gone back to work without regard to the Weavers' Association.

FALLS RIVET CO., KENT, O.

*(1) Capital Increased.—On April 20, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$200,000 to \$250,000.

FALLS RUBBER CO., CUYAHOGA FALLS.

*(1) Capital Increased.—On Jan. 3, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$300,000 to \$500,000.

FAMOUS MANUFACTURING CO. OF ERIE, N. Y.

*(1) Capital Increased.—On March 19, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$250,000 to \$350,000.

FAMOUS PLAYERS-LASKY CORP., NEW YORK.

*(1) Capital Increase—New Director.—It was announced Jan. 2, 1917, that the stockholders of this company, which comprises among its subsidiaries the Famous Players Film Co., Jesse L. Lasky Feature Play Co., Oliver Morosco Photoplay Co., Pallas Pictures and Paramount Pictures Corp., had increased the capitalization from \$12,500,000 to \$20,000,000, and William H. Engleish, Vice-Pres. of the Empire Trust Co., had been elected to the Board of Directors.

The directorate was increased from 12 to 20, the eight new members to be elected at the following meeting of the present board.

*(2) Capital Increased.—On Jan. 16, 1917, the company filed notice at Albany, N. Y., of an increase in shares from 125,000 to 200,000 shares, to carry on business from \$625,000 to \$1,000,000.

FAMOUS STARS PICTURES CORP., NEW YORK.

*(1) Incorporated on Jan. 3, 1917, in Delaware, with a capital of \$5,000,000, to manufacture and produce motion picture films of all kinds. Incorporators: C. B. Hynson, H. A. Gardner, John A. Stone, all of New York; L. P. Scott, East Orange, N. J., and Richard George, Ridgely, N. J.

FAMOUS STARS PICTURES CORP., WILMINGTON, DEL.

*(1) Incorporated on Jan. 20, 1917, in New York, with a capital of \$5,000,000.

JANUARY 1 TO APRIL 30, 1917

to engage in moving picture business. Representative: Paul F. Lorzer, 149 Broadway, New York.

FAMOUS TRUCK CO., ST. JOSEPH, MICH.

*(1) Proposed New Plant.—It was announced March 29, 1917, that this company, capitalized at more than \$2,000,000, would erect a plant at once to manufacture a light-weight automobile delivery truck. The company is backed by the McIntyre Co., Ltd., Chicago. Machinery will be ordered immediately.

FARMERS CLUB ELEVATOR CO., LTD.

*(1) Incorporated on Feb. 24, 1917, in Canada, with a capital of \$300,000, divided into 3,000 shares of \$100 each, to carry on an elevator and warehouse business. Incorporators: Francis Albert Ogletree, Joseph Muir, David Edward Ogletree, Frank Joseph Clark and Leon Denis Farmer. Chief place of business, Winnipeg, Man.

FARMERS LOAN & TRUST CO., NEW YORK.

*(1) Capital Increase.—Announced Jan. 10, 1917, that stockholders had voted to increase the capital from \$1,000,000 to \$5,000,000.

*(2) Capital Increased.—On Jan. 11, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000,000 to \$5,000,000.

FARMERS & MERCHANTS LIGHT & POWER CO.

*(1) Stock Issue Planned.—It was announced Jan. 29, 1917, that this company, Mongo, Ind., had applied for permission to issue \$500,000 capital stock to purchase and improve five dams and waterpower plants on the St. Joseph and Fawn Rivers in northern Indiana and Southern Michigan. The improvements and development of electrical energy will cost \$278,250.

*(1) Stock Sale Authorized.—It was announced Feb. 23, 1917, that this company had been permitted by the Indiana Public Service Commission to issue and sell \$500,000 capital stock. The proceeds are to be used to purchase five water-power sites in northern Indiana and to construct and operate electric light and power plants. The cost of the proposed plants is placed at \$340,139.

FARM-TO-TABLE ASSOCIATION, INC.

*(1) Incorporated March 2, 1917, in Delaware, with a capital stock of \$500,000, to manufacture containers, boxes, etc., to be used in parcel post transportation. Incorporators: Samuel B. Howard, Arthur W. Britton and Lewis H. Gunther, New York.

FEDERAL AIR CRAFT CORP.

*(1) Incorporated on March 23, 1917, in Delaware, with a capital of \$1,000,000, to manufacture aeroplanes. Incorporators: S. B. Howard, A. W. Britton and Harry B. Davis, New York.

FEDERAL AIRSHIP CO.

*(1) Incorporated on March 12, 1917, in Delaware, with a capital of \$1,500,000, to design and manufacture airships, etc. Incorporators: Wm. F. O'Keefe, E. E. Wright and Geo. Steigler, Wilmington, Del.

FEDERAL CHEMICAL CO.

*(1) Increased Dividend.—Announced at Louisville Jan. 9, 1917, that this company had declared a quarterly dividend of 1½% on the common stock, payable Feb. 1. For five years this issue had been on a 4% per annum basis.

FEDERAL DYESTUFF & CHEMICAL CORP.

*(1) Officials Resign.—Following a meeting of the directors of this company Jan. 23, 1917, announcement was

made that George T. Bishop, Pres. and director; George H. Schuler, Asst. to the Pres.; Ralph L. Fuller, Vice-Pres.; Mark W. Potter, a director, and E. G. Tillotson, of Cleveland, also a director, had turned in their resignations.

E. A. McPherson and E. S. Duell, Vice-Pres., assumed charge of the company until the election of their successors.

Mr. Bishop has been chosen 1st Vice-Pres. of Ralph L. Fuller Co., Inc., of Cleveland, dealers in chemicals and dyes.

Differences over matters of policy were said to be back of the resignations. The company was organized by Archibald S. White, of White & Co. A widespread stock-selling campaign followed the organization.

FEDERAL MINING & SMELTING CO.

*(1) Net Earnings, November, it was stated Jan. 6, 1917, amounted to \$147,732, after all deductions, including depreciation.

—Feb.

*(2) Increased Dividend on Preferred.—Announced Feb. 15, 1917, that this company had declared a quarterly dividend of 1½% on the pfd. stock, payable March 15 to stock of record Feb. 28. The previous dividend was 1½%, paid Nov. 15, 1916.

—Mar.

*(1) Report, Year Ended Dec. 31, 1916, shows gross earnings of \$5,204,513, an increase of \$2,421,854 over the preceding year. Net earnings, after deducting operating expenses, depreciation, etc., were \$808,198, an increase of \$557,831 over 1915. Deducting from the net earnings pfd. dividends amounting to \$509,409, the balance, \$358,789, is equal to 5.97% on the \$6,000,000 common stock, compared with a deficit the year before.

*(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,678,326, compared with \$1,219,537 Dec. 31, 1915.

*(3) Statement by President.—It was stated March 15, 1917, that Pres. F. H. Brownell, of this company, in his annual remarks to stockholders, said, in part: "Stimulated by the high price of metals, every effort was made to increase the output. Total shipments for 1916 were 137,390 tons of lead, silver, etc., as compared with 75,449 tons in 1915. During 1916 the New York quotation for silver averaged 65.67 cents per ounce against 49.67 cents in 1915, while the lead quotation averaged \$6.833 per hundred pounds against \$4.678.

"Developments in the Iron Mountain and Frisco mines were unsatisfactory and both have been shut down. Salvage on plant, supplies, etc., at former amounted to \$678,331; the latter has been sold to the Tamarack-Custer Consolidated Mining Co. for \$150,000. Mineral rights were reserved by the Federal Co. Warder, Morning and Mace mines yielded an aggregate profit of \$1,279,535. Only high prices permitted profitable operation of the first and its life now will be short. The Morning mine showed an increase of 38% in ore produced over that for 1915 and developments were highly satisfactory.

"Option has been acquired on North Star and Triumph groups in Idaho. Purchase price is \$150,000 and \$314,923 was expended on development and construction during 1916. These properties contain a large tonnage of a somewhat complex ore, carrying gold, silver, lead and zinc.

"Although 700,000 tons were mined during the year the ore reserve decreased only about 8%; the current development opening up new ore to the amount of 642,852 tons. At the Morning, our principal producing mine, we increased the reserves 11,400 tons over and above the 476,153 tons mined."

*(4) February Net.—The company reports net earnings for February, 1917, after all deductions, including depreciation, of \$69,186.

—Apr.

*(1) New Directors.—At the annual meeting of this company on April 9, 1917, Roger W. Straus and Frederick Burbridge were elected directors to succeed Frank Sweeney and Charles Sweeney. Other retiring directors were re-elected. At a meeting of the board retiring officers were re-elected.

*(2) Revision of Smelting Contract Sought.—It was announced April 10, 1917, that F. H. Brownell, Pres. of this company had been requested by minority common stockholders to seek of the American Smelting & Refining Co. a revision of the smelting contract, which does not expire until 1930, thereby producing results more favorable to the Federal company. Mr. Brownell has

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

promised to take up the matter of revision with American Smelting & Refining interests who control the Federal. Having in view similar object, stockholders sued the American Smelting Co. several years ago and appeal in the matter has yet to be heard in the New York Supreme Court.

Dividend prospects for the common stock of the Federal Co. do not appear to be very bright, notwithstanding the high prices for lead. The company, after lead crosses 4.10 cents a pound, under terms of its contract, shares equally with the American Smelting Co. which, under the existing conditions, benefits very materially.

The properties of the Federal Co. appear to be a rapidly liquidating proposition and with normal lead prices some of its mines could not profitably operate according to President Brownell. One new mine, recently acquired for \$150,000, has ceased operations on account of a snow slide causing damage estimated to cost the company eventually at least \$100,000, a total of \$250,000 for the property.

⁽³⁾ **March Earnings, \$151,664.**—This company April 26, 1917, reported March net earnings, after all deductions, including depreciation, as \$151,664.

FEDERAL MOTOR TRUCK CO.

⁽¹⁾ **Stock Dividend Planned.**—It was announced Feb. 5, 1917, that stockholders of this company at a special meeting called for Feb. 13 are to vote on a recommendation from the directors that the authorized capital stock of the corporation be increased from \$500,000 to \$2,000,000 and that a 100% dividend in stock be issued to the shareholders, through the transfer of \$500,000 from surplus to capital account.

The remaining \$1,000,000 of new stock, par value \$10, is to be retained in the company's treasury for such future use as may seem advisable.

During 1916 the company distributed 40% in cash dividends, paying quarterly a regular dividend of 5% and an extra dividend of 5%.

The company was incorporated in Michigan in 1910 to engage in the manufacture of motor trucks. The company's original capital of \$100,000 was increased to \$200,000 in 1912 by payment of a 100% stock dividend, and to \$500,000 in 1915 by a stock dividend of 150%.

⁽²⁾ **Stock Dividend Approved by Stockholders.**—Announced Feb. 16, 1917, that this company's stockholders had approved an increase in the company's capital stock from \$500,000 to \$2,000,000 and a dividend of 100% on the old capital. The remaining \$1,000,000 of new capital stock will be held in the company's treasury.

⁽³⁾ **Report, Year Ended Dec. 31, 1916,** shows gross sales of \$4,261,000, an increase of \$1,307,503 over 1915, and net profits of \$680,615.

⁽⁴⁾ **Balance Sheet, as of Dec. 31, 1916,** shows cash amounting to \$121,426, against \$23,986 in the preceding year; accounts receivable of \$573,496, contrasted with \$314,202, and a profit and loss surplus of \$872,100.

FEDERAL OIL CO.

⁽¹⁾ **Well No. 5.**—On Jan. 6, 1917, this company reported the completion, on Jan. 4, of well No. 5 on its John Shause lease in the Irvine field, Kentucky, with approximately 100 barrels daily production, making the 17th successive well completed on the company's property in this district. All are reported good for an average daily initial production of 100 barrels each.

⁽²⁾ **Two New Wells.**—Announced Jan. 18, 1917, that this company had brought in two wells at its property the week of Jan. 7, flowing about 100 barrels a day each. Total production of the company is being worked up to 2,000 barrels daily. The oil is classified with Somerset crude and sells at \$2.18 a barrel.

—Feb.

⁽¹⁾ **Operations.**—It was stated Feb. 2, 1917, that this company had completed arrangements for supplies and equipment to cover 50 additional wells in the Irvine field, Kentucky, and also had arranged to increase the number of drilling rigs from nine to twelve.

Nineteen have been brought in and nine are being drilled. In the first half of February, it was stated, this would increase the initial daily production in the Irvine field to about 2,500,000 barrels.

⁽²⁾ **Kentucky Development.**—On Feb. 16, 1917, this company announced the completion of well No. 2 on its Patrick lease in the Irvine field, Kentucky, with a daily initial production of about 150 barrels. This increases the number of the company's producing wells in Kentucky to 22 with an aggregate daily production of over 2,100 barrels.

⁽³⁾ **Letter to Stockholders.**—It was announced Feb. 19, 1917, that Pres. R. R. Reid, of this company, in a letter to stockholders, said, in part: "Your company now owns 980 acres in the Irvine field, about 750 of which are located within the defined area of the pool. In advance of the Irvine field to the northeast, southeast and south the company owns leases on 14,000 acres. In the proven area in the Irvine field we have acreage sufficient to accommodate 150 wells, from which it is conservatively estimated that between 3,000,000 and 4,000,000 barrels of oil will be produced during the first three years of their existence."

"The Cumberland Pipe Line Co. facilities for taking oil from field well within a few weeks be increased to about 7,500 barrels a day and on completion of its new 4-inch pipe line now under construction will be able to take about 10,500 barrels a day."

"By mid-Summer our monthly income from the Irvine pool alone should approximate \$100,000."

"In the Electra district of Texas we have three leases comprising 1,151 acres, from which we are now receiving a monthly income of about \$2,000 from the wells already connected with the pipe line of the Magnolia Petroleum Co."

"Our properties in Mexico are potentially by far the most valuable of our holdings, comprising 12,800 acres."

"The value of the oil produced from our defined leases in the Irvine pool, Kentucky, after paying all drilling and operating expenses, will approximately equal from \$7 to \$8 per share on the common stock."

⁽⁴⁾ **Irvine Field Development.**—This company, on Feb. 21, 1917, reported the completion of its twenty-third consecutive well in the Irvine field, Ky., being No. 6 on its John Shause lease, good for over 50 barrels per day.

—Mar.

⁽¹⁾ **New Development.**—On March 23, 1917, this company announced that it immediately would commence active drilling in the Eldorado field, Kansas.

—Apr.

⁽¹⁾ **29th Well Brought In.**—On April 16, 1917, this company announced that it had brought in its 29th straight successful well in the Kentucky field.

⁽²⁾ **Development Producing Favorable Results.**—An official report of this company April 16, 1917, stated that development work was producing favorable results. About 29 wells have been completed in the Irvine field. Many of the leases are being connected with the Cumberland Pipe line. The company waited for the spring season so as to transport drilling machinery over dry roads, but casings, pipes and machinery are being installed.

Wildcat territory for which the company paid \$5,000 last fall has greatly increased in value, because another pool has been developed in its vicinity. Several large oil interests are said to be bidding for this tract, and should the Federal Oil Co. dispose of its interests

there it would probably realize a substantial profit.

Development work in the Texas and Kansas fields is proceeding satisfactorily. The company has no debts outside of current expenses.

FEDERAL POWER & LIGHT CO. OF BOSTON.

⁽¹⁾ **Improvements by Subsidiary.**—See Northwestern Ohio Light Co.—Item No. 1.

FEDERAL STEEL & FOUNDRY CO.

⁽¹⁾ **New Plant.**—On March 1, 1917, it was announced that this company had prepared plans for erecting a steel plant and rolling mill at Coburg, Ont., to cost \$250,000.

FEDERAL STEEL PRODUCTS CORP.

⁽¹⁾ **Incorporated on March 23, 1917,** in Delaware, with a capital of \$1,000,000, to engage in the manufacture of steel and its products. Incorporators: Anselin P. Anderson, Thomas E. Huser and K. R. Norton, New York.

FEDERAL SUGAR REFINING CO.

⁽¹⁾ **Notes.**—Announced Jan. 8, 1917, that A. B. Leach & Co. had purchased and would offer for sale an issue of \$2,000,000 Federal Sugar Refining Co., three-year 5% gold notes, maturing Jan. 1, 1920. Earnings applicable to interest charges for the year ended June 30, 1916, are stated to be in excess of 14 times requirements.

⁽²⁾ **Notes Sold.**—On Jan. 4, 1917, A. B. Leach & Co. announced that the \$2,000,000 three-year 5% gold notes of this company, offered on that date, had all been sold.

—Mar.

⁽¹⁾ **Price Advance.**—On March 26, 1917, this company announced an advance in the price of granulated $\frac{1}{4}$ to 7% cents.

—Apr.

⁽¹⁾ **Pres. Spreckels Opposes Cent Tax on Sugar.**—Pres. Claus A. Spreckels, of this company, issued a statement April 14, 1917, relative to the proposal to raise additional Government revenue by taxing sugar 1 cent a pound, saying that the tax and the current market price together would make the commodity almost prohibitive to average consumers. He proposed instead of this levy a tax on the production of domestic beet sugar companies.

"If Congress, as part of its plan to increase revenues, should levy a tax of 1 cent a pound on all sugar, in addition to the tariff of the same amount," he said, "it will mean that sugar will cost the public \$4 more per barrel than it does at present, and make it impossible for most families to pay for their normal supply of this necessity of life."

"There is a better way to augment the national revenue from sugar. At present the Government levies a tariff of 1 cent to 1½ cents a pound on foreign sugars imported and refined here, but receives no revenue whatever from the home-grown beet and cane sugar."

"To-day, with competition eliminated by the war, together with the abnormally high prices and the tariff, which alone adds 1 cent profit to every pound they sell, the domestic beet and cane interests are making from 30% to 100% on their outstanding shares of admittedly watered stock. A blanket tax would give them 1 cent a pound additional protection."

"The cane-sugar refiners, who pay the tariff to the Government, make about 4½% on their total turnover, and derive absolutely no benefit from the tariff."

FEDERATED MOTORS CO.

⁽¹⁾ **New Company.**—See Pathfinder Co.—Item No. 1.

⁽²⁾ **Incorporated.**—It was announced at Indianapolis, Ind., Jan. 15, 1917, that this company had been incorporated with a capital of \$5,000,000, for the pur-

JANUARY 1 TO APRIL 30, 1917

pose of manufacturing automobiles, being a merger of the Pathfinder Co. and the Empire Automobile Co.

¹(8) Underwriting Syndicate.—It was announced Jan. 15, 1917, that an underwriting syndicate headed by Boughton & Co., New York, is underwriting the stock of this company, which is a merger of the Pathfinder Co. and the Empire Automobile Co., manufacturers of automobiles, at Indianapolis. The capital stock is \$5,000,000.

Pres. W. C. Teasdale, Vice-Pres. W. E. Stalnaker and Sec. W. K. Bromley, of the Pathfinder Co., are to occupy similar positions with the new company. The production of the new organization is to be double that of the combined companies.

FELLOWS MEDICAL MANUFACTURING CO., INC., MANHATTAN, N. Y.

¹(1) Capital Increased.—On March 12, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$10,000,000.

FENTON UNITED DYING CO.

¹(1) Initial Dividend.—Announced Jan. 8, 1917, that this company had declared an initial dividend of 2% on the common stock, payable Jan. 15 to stock of record Dec. 26, and a quarterly dividend of 1%, payable April 15 to stock of record April 6.

FERGUSON STEEL & IRON CO., INC., BUFFALO, N. Y.

¹(1) Capital Increased.—On Feb. 18, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$800,000 to \$800,000.

FERRODINE CHEMICAL CORP., SALEM, VA.

¹(1) Incorporated in January, 1917, in Virginia, with a capital of \$500,000. Officers: R. W. Kline, Pres.; Chas. D. Denit, Sec. & Treas.

FESS ROTARY OIL BURNER, BOSTON, MASS.

¹(1) Incorporated in January, 1917, in Massachusetts, with a capital of \$325,000. Directors: Albert A. Richares, Pres.; Norman J. MacGaffin, 53 State Street, Boston, Mass., Treas.; Robert L. Heesmer.

FIBER CONTAINER CORP.

¹(1) Incorporated on April 25, 1917, in Delaware, with a capital of \$1,000,000, to manufacture paper containers, boxes, etc. Incorporators: L. B. Phillips and J. B. Bailey, Dover, Del.

FIDELITY COPPER CO., SPOKANE, WASH.

¹(1) Incorporated on Jan. 6, 1917, in Washington, with a capital of \$1,500,000. Incorporators: Joseph H. Boyd, Robert A. Wilson, L. B. Cornell, John M. Bunn and Ernest C. Ward.

FIDELITY MORTGAGE & LOAN CO.

¹(1) Change in Name—Capital Increased.—Announced at Dover, Del., Jan. 30, 1917, that this company had filed notice of a change in name to the United States Mortgage Co., of Chicago, and of a capital increase from \$6,000,000 to \$10,000,000.

FIDELITY SAVINGS & LOAN CO., CLEVELAND, O.

¹(1) Capital Increased.—On March 20, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$500,000 to \$1,000,000.

FIDELITY TRUST CO. OF ROCHESTER, N. Y.

¹(1) Capital Increased.—On Jan. 20, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$500,000.

FIELD (MARSHALL) & CO.

¹(1) Site Bought for Mills.—It was announced Jan. 4, 1917, that this company, Chicago, had purchased 1,200

acres of land surrounding the town of Martinsville, Va., on which it will erect large factories and mills, employing more than 5,000 men and women. This company now owns factories and mills at Spray, N. C. It is said a private railroad will be built between the two plants. The new plant is located on the Norfolk & Western Ry.

FIELD DELTA SHIPBUILDING & DRY DOCK.

¹(1) Incorporated on Feb. 9, 1917, in Delaware, with a capital of \$5,000,000, to build and operate boats, dry docks, etc. Incorporators: Percy B. Gibson, Jas. A. Gray and Geo. N. Deas, all of New York.

FIELD MOTOR CO., LANSING, MICH.

¹(1) Organized.—It was announced Feb. 2, 1917, that this company had been organized with a capital stock of \$500,000, of which \$200,000 is paid in, to manufacture an improved type of gasoline or kerosene motor, designed especially for tractors. The company plans to start operations as soon as the incorporation papers are returned. Officers are: Edward A. Field, Pres.; John Sehler, Vice-Pres.; A. M. Noorthoek, Sec'y, and J. P. McVain, Treas.

—Mar.

¹(1) Incorporated in March, 1917, in Michigan, with a capital of \$500,000. Incorporators: Adrian M. Noorthoek, Edward A. Field and John Sehler.

FIFTH AVENUE COACH CO.

¹(1) Earnings, Six Months Ended Dec. 31, 1916, compare with earnings for fiscal year ended June 30, 1916, as follows:

	1916	1916
Gross	\$1,107,159	\$1,669,726
Net incl. oth. inc.	332,709	472,937
Surp. aft. chgs.	321,900	454,129

†Six months ended Dec. 31, 1916.

†12 months ended June 30, 1916.

¹(2) Earnings on Stock.—It was stated March 23, 1917, that this company's surplus after charges of \$321,900 for the six months ended Dec. 31, 1916, is equal to 665.41% on \$50,000 capital stock, or at the annual rate of 1,330.82%.

¹(3) Balance Sheet, at close of six months' period ended Dec. 31, 1916, shows a profit and loss surplus of \$1,025,966, compared with \$432,480 at the end of the corresponding period in 1915.

¹(4) Privileges.—It was announced at New York, March 23, 1917, that the Board of Estimate and Apportionment had granted this company the privilege of adopting new lines of service and the installation of additional buses during the Billy Sunday evangelistic campaign beginning April 8.

—Apr.

¹(1) Franchise Bld.—It was stated on April 5, 1917, that in conformity with a request of the New York Board of Estimate for bids for a motor bus franchise this company submitted a more liberal tender than last year.

The company guarantees the city \$3,550,000 in the 15 years of the franchise. It agrees to pay \$50,000 when the franchise is granted, and 5% of the gross receipts of the existing system. Also the company agrees to pay 10% on the first million dollars of receipts—either from the new lines or upon any increment in the earnings of the present system—and 15% on all sums above the first million dollars.

It is estimated by the company that the city will receive at least \$500,000 on the basis of these percentages, and as an evidence of good faith the company guarantees to pay the city every year for the first five years \$150,000, for every year for the second five years \$200,000, and for each of the third five years \$300,000, a total of \$3,550,000.

¹(2) Operation of Motor Buses in Chicago Planned.—See Chicago Stage Co.—Item No. 1.

FIGLI D'HALIA BUILDING & LOAN ASSOCIATION.

¹(1) Incorporated on March 7, 1917, in Pennsylvania, with a capital of \$2,000,000. Incorporator: Carlo Cipressio.

FILMCRAFT CORP.

¹(1) Incorporated on Jan. 20, 1917, in New York, with a capital of \$250,000, to deal in photographic and motion pictures films. Incorporators: A. B. Heath, A. J. & R. V. Rothermel, 131 West 83d St., New York.

FINANCE CO. OF PENNSYLVANIA.

¹(1) Extra Dividend.—Announced Jan. 3, 1917, that this company had declared the regular quarterly dividend of \$1.50 per share and an extra of $\frac{1}{4}$ of 1% on the 2d pfd. stock, payable Feb. 1 to stock of record Jan. 20.

—Mar.

¹(1) Extra Dividend.—Announced March 7, 1917, that this company had declared the regular quarterly dividend of $1\frac{1}{2}\%$ and one-fourth of 1% extra on the 1st pfd. stock, payable April 2 to stock of record March 21.

FINCH, VAN SLICK & McCONVILLE, MANHATTAN, N. Y.

¹(1) Capital Increased.—On Feb. 1, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$2,000,000 to \$3,000,000.

FINLEY-ROBERTSON-PORTER CO., INC., NEW YORK.

¹(1) Capital Increased.—On March 6, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$100,000 to \$500,000.

FIRESTONE TIRE & RUBBER CO.

¹(1) Stock Distribution to Employees.—It was stated Jan. 2, 1917, that this company had adopted a stock distribution plan providing for distribution of from one to ten shares of stock to each employee according to term of service. It can be purchased at \$100 per share, compared with present market value of about \$140. Payments can be spread over five years, during which stock must remain on deposit with company.

¹(2) Merger Denied.—See United States Rubber Co.—Item No. 10.

—Feb.

¹(1) Balance Sheet, as of Oct. 31, 1916, shows cash amounting to \$325,490; notes and receivables, \$6,820,632; inventory, \$9,715,949; notes payable, \$5,245,843; accounts payable, \$1,671,305; surplus, \$18,306,429, and total assets and liabilities, \$34,360,848.

—Mar.

¹(1) Stock Sale.—It was announced March 3, 1917, that this company had sold \$5,000,000 of 6% pfd. stock to the Cleveland Trust Co. Cash received will be used for factory extensions and other improvements. Cleveland Trust Co. officials say that the Firestone Co. has net assets of \$34,000,000 and net quick assets of \$20,000,000.

Outstanding capital of the Firestone Co. is \$3,000,000 common and \$10,000,000 6% pfd. stock.

¹(2) Injunction.—See Perlman Rim Corp.—Item No. 1.

¹(3) Status.—It was stated March 12, 1917, that this company is one of the "big four" tire companies, and during the preceding four months had been doing a business at the rate of \$50,000,000 a year.

For its latest fiscal period, which covered 15 months to Oct. 31, 1916, Firestone earned \$184 a share for its common stock after depreciation and pfd. dividends. This is at the annual rate of a little less than \$150 a share on the common and is calculated on the old capitalization of \$1,000,000 pfd. and \$3,000,000 common.

Since then the pfd. has been increased from \$1,000,000 to \$10,000,000 and the 30,000 shares common of \$100 par have been converted into 300,000 shares of \$10 par, so that the market for the common, instead of being at the level of \$1400 a share is about a tenth of that figure.

Firestone employs 12,000 persons and operates 49 branches. Its sales have increased six-fold in the five years and

JANUARY 1 TO APRIL 30, 1917

profits have grown at a more rapid rate.

(4) Stock Subscription Plan.—It was announced March 24, 1917, that 11,000 employees of this company, under a stock distribution plan, had subscribed to \$3,000,000 worth of stock. The distribution was made on a new basis, length of service instead of salary received. All stock was rated to employees at \$100 a share, instead of the market quotation of about \$145.

FIRST NATIONAL BANK, BOSTON.

(1) Capital Increase.—It was announced Jan. 9, 1917, that at the annual meeting of this bank it was voted to increase the stock from \$5,000,000 to \$7,500,000 by the issuance of 25,000 shares. Each stockholder of record is permitted to subscribe for new stock at \$300 per share, in the ratio of one new for two old shares. Charles F. Weed was elected a Vice-Pres.

FIRST NATIONAL BANK OF BROOKLYN.

(1) New Directors.—Announced Jan. 9, 1917, that at the annual meeting of stockholders of this bank the retiring directors were re-elected and Herman A. Metz, of H. A. Metz & Co.; John T. Barry, of D. D. Williamson & Co., and William S. Irish, Vice-Pres. and cashier of the bank, were added to the board.

FIRST NATIONAL BANK, NEW YORK.

(1) New Director.—Announced Jan. 9, 1917, that at the annual meeting J. R. Morton, Pres. of the Atlas Portland Cement Co., was elected a director. Other directors were re-elected.

FIRST NATIONAL STORES, INC.

(1) Status.—It was stated Jan. 11, 1917, that this company, which had completed plans for a chain for retailing dry goods, started 1917 with 25 stores under option and lease. These stores will be opened for operation, according to Pres. Munger, by March 1 at the latest. With the five stores now in operation this will give the company a chain of 30 stores.

The company's agents have investigated more than 100 stores, and out of this number the 25 under lease were chosen. These stores had a gross business in 1916 of approximately \$3,000,000, with profits averaging about 10 cents on the dollar, or \$300,000.

Unlike other chains, the company is not opening stores in the big cities, the idea being to save rental costs. The present stores operating and under lease have rental costs of 2.40 of gross business.

This is much smaller than most chains, some of which run as high as 10% of gross in rents alone.

FISHER BODY CO.

(1) Consolidated Income Account, March 1 to Aug. 31, 1916.—See Fisher Body Corp.—Item No. 1.

FISHER BODY CO. OF CANADA.

(1) Consolidated Income Account, March 1 to Aug. 31, 1916.—See Fisher Body Corp.—Item No. 1.

FISK RUBBER CO.

(1) Application to List.—Announced Feb. 17, 1917, that the New York Stock Exchange had received application to list \$5,000,000 of this company's 7% cumulative pfd. stock and 200,000 shares common stock, without nominal or par value.

—Mar.

(1) Consolidated Income Account, Aug. 21 to Nov. 30, 1916.—It was announced March 1, 1917, that the consolidated income account of this company from the date of incorporation, Aug. 21, 1916, to Nov. 30, 1916, shows sales during the period of \$4,093,491; net income of \$726,500 and surplus after pfd. dividends of \$639,000, which is equal to \$3.20 a share on 200,000 shares of common stock, no par value.

The consolidated income account of the subsidiary companies in the period from March 1 to Aug. 31 showed net profits of \$998,806. This includes net profits of the Fisher Body Co., Fisher Closed Body Co. and Fisher Body Co. of Canada.

The number of employees at the several plants controlled by the company is approximately 6,000. Plants have a capacity of 400,000 bodies per annum.

(2) Listed in New York.—It was announced March 1, 1917, that the New York Stock Exchange had listed \$5,000,000 of this company's 7% cumulative pfd. stock.

—Apr.

(1) 200,000 Shares Listed on New York Stock Exchange.—The New York Stock Exchange April 26, 1917, announced the listing of 200,000 shares of this company's common stock, without nominal or par value.

(2) Earnings, Aug. 21, 1916, to Feb. 28, 1917.—The New York Stock Exchange April 26, 1917, announced that this company had filed with it the following consolidated statement of income of the parent company and subsidiaries for the period Aug. 21, 1916, to Feb. 28, 1917: Profits from operations, \$1,369,730; total net income, \$1,463,836; surplus after pfd. dividends, \$1,288,836.

After allowing for full dividend requirements of 7% on 50,000 shares of pfd. stock, the balance applicable to the common stock is equivalent to \$5.56 a share earned during the above period on 200,000 shares of common stock.

FISHER CLOSED BODY CO.

(1) Consolidated Income Account, March 1 to Aug. 31, 1916.—See Fisher Body Corp.—Item No. 1.

FISHER-GILDER GARBAGE & STORAGE CO., YOUNGSTOWN, O.

(1) Incorporated on March 23, 1917, in Ohio, with a capital of \$300,000. Incorporators: Alfred H. Delin, Frank B. Gilder, Geo. E. Fisher, C. F. Detchen and Lamont H. Gilder.

FISHERIES PRODUCTS CORP. (THE).

(1) Incorporated on April 20, 1917, in Delaware, with a capital of \$5,000,000, to prepare smoked fish and make same into fertilizers, etc. Incorporators: W. H. P. Roote, S. B. Howard and L. H. Gunther, New York.

FISK RUBBER CO.

(1) Report, Year Ended Dec. 31, 1916, shows net profits of \$1,741,704, equal to 16.17% on \$8,000,000 common stock, after \$443,000 pfd. dividends. Total sales for the year were \$19,457,788. In 1915 the company earned net profits of \$1,646,579, equal to 16.1% on common after \$359,042 pfd. dividends.

(2) New Director.—Announced March 2, 1917, that at the annual meeting of this company J. D. Anderson was added to the Board of Directors.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,875,442, compared with \$1,246,394 Dec. 31, 1915.

(4) Comment on 1916 Report.—On March 6, 1917, the "Boston News Bureau" said that this company had taken rank among the five largest tire producers in the United States. Despite a year of stationary prices for tires, a four months' strike and rising costs of all raw materials, the company was able in 1916 to establish a new high record in both gross and net.

The net profits of \$1,836,829 are between \$600,000 and \$700,000 less than what would have been realized had everything moved along smoothly without labor trouble. At the same time this balance of earnings is equal to 11.4% on the \$8,000,000 common after taking out \$448,000 of pfd. dividends and a pfd. stock sinking fund of \$375,000.

Fisk Rubber has a capacity of about 9,000 tires daily and is outputting between 6,000 and 7,000 per day.

Its 1917 business will easily eclipse any former showing and it will be surprising if net earnings do not come pretty close to the \$3,000,000 mark.

The company made some change in stock capitalization during 1916, involving the issuance of \$5,000,000 new convertible 1st pfd. and \$2,500,000 2d pfd. As a result the company has today two issues of 1st pfd., one amounting to \$4,050,000 and non-convertible and the other \$5,000,000 and convertible into common at 125. In addition there is \$4,500,000 of 2d pfd., all privately held, and \$8,000,000 common.

This is a stock capitalization of \$21,550,000, against which the company did in 1916 \$20,000,000 of gross business with the promise of \$25,000,000 to \$30,000,000 in 1917. The 1916 gain in gross was about \$5,500,000, or nearly 40%.

Net quick assets on Dec. 31 were \$10,381,081, which is in excess of the \$9,050,000 of 1st pfd. issues, but not 125% of those issues.

(5) Earning Rate in 1916.—On March 22, 1917, the "Boston News Bureau" said, in part: "The fact is not generally appreciated that the Fisk Rubber Co. in its fiscal year to Dec. 31 actually earned a balance for its \$8,000,000 common stock of slightly better than \$11 per share."

"As a matter of fact, sales and earnings of the company for the year to Dec. 31 last should be set up against capitalization and plant investment as they were on Dec. 31, 1915. The new capital raised during 1916 was not available nor the new plant itself ready for production except for a very small portion of the fiscal year."

"At the same time the net for the year of slightly in excess of \$1,700,000 with all reserves for depreciation, taxes and other items deducted and after payment of pfd. dividends, less provision for retiring 3,750 shares of 1st pfd. for the year 1916, left a common stock balance of \$11.05 per share."

"This sum would have been available for common stock distribution except for certain pfd. stock restrictions which will be met at an early date."

"The benefits of the increased plant now available, together with the increased working capital, are already reflected in this year's business and the first two months indicate sales for the year of well over \$30,000,000, with more than a proportionate increase in net."

FISK RUBBER CORP.

(1) Comment on Price Advances.—See United States Rubber Co.—Item No. 3.

FISURES EXPLOSION CO.

(1) Shipments.—It was announced Jan. 24, 1917, that this company had shipped its first carload of concentrates from the new mill in American Fork Canyon, the ore coming from the Pacific mine, which is worked under a ten-years' lease. The car weighed 50 tons and is estimated at \$40 a ton, or about \$2,000 gross value.

The mill is handling 60 to 65 tons of the second-class ore daily; the plant was built for 50 tons only and is operated electrically.

FITCHBURG GAS & ELECTRIC CO.

(1) Stock Issue.—It was stated Feb. 21, 1917, that the Massachusetts Gas & Electric Light Commission had issued an order on the petition of this company to issue 2,900 new shares of stock at \$85 a share to pay for permanent extensions and improvements to the plant.

In the order the commissioners stated that price at which stock is to be issued is "materially lower than will insure a ready market for stock and is so low as to be inconsistent with public interest." The board approved of issue of 2,400 shares at \$100, in view of the fact that the stock recently had sold in excess of \$115 a share.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

FITCHBURG & LEOMINSTER STREET RY. CO.

* (1) **Bond Issue Authorized.**—It was announced Feb. 16, 1917, that the Massachusetts Public Service Commission had authorized the issue of an additional \$150,000 of this company's 4½% refunding bonds, due Feb. 1, 1921, to refund \$150,000 first mortgage 5s, due April 1, 1917. This will make a total of \$300,000 of the outstanding 4½s. Total amount authorized is \$350,000.

• FITCHBURG R. R.

* (1) **Statement About Consolidation Plan.**—See Boston & Maine R. R.—Item No. 3.

* (2) **B. & M. Reorganization Plan Approved.**—It was stated March 22, 1917, that directors of this company had voted in favor of the Boston & Maine R. R. reorganization plan, the action being similar to that taken by the Concord & Montreal directors. This leaves further consideration of the plan for stockholders.

FLANDERS CO., PORTLAND, ME.

* (1) **Incorporated in March, 1917, in Maine,** with a capital of \$750,000, to grow, manufacture and deal in all kinds of foodstuffs, canning and preserving same for market.

FLINT & CHESTER, INC., NEW YORK.

* (1) **Capital Increased.**—On March 20, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$275,000.

FLINT MILLS.

* (1) **Dividend Increased.**—Announced March 22, 1917, that this company had declared a quarterly dividend of 6%, payable April 2 to stock of record March 21. Its usual rate until recently had been 1½% quarterly. For the preceding quarter 2% was paid and the quarter before that 4½%.

FLETCHER LUMBER CO.

* (1) **Sold.**—On Jan. 10, 1917, it was stated that interests identified with the Capitol City Lumber Co., Hartford, Conn., had bought this company's plant and business in Springfield, Mass., and had organized a new corporation, capital \$50,000, to take care of the Springfield business. L. J. Korper is Pres. and L. A. Korper, Treas. of Capitol City Lumber Co.; L. A. Korper is Pres. of the firm which will conduct the Springfield business.

FLORIDA LUMBER VULCANIZING CORP., WILMINGTON, DEL.

* (1) **Incorporated on Feb. 24, 1917, in Delaware,** with a capital of \$300,000, to deal in vulcanized and fireproofing lumber. Incorporators: Chas. H. Jones, W. I. N. Lofand and Geo. W. Morgan, Dover, Del.

F. O. B. MANUFACTURING CO.

* (1) **Incorporated on Feb. 5, 1917, in Delaware,** with a capital of \$350,000, to manufacture and sell shock-absorbers and locking devices. Incorporators: F. R. Hansell, Philadelphia; Geo. H. B. Martin and S. C. Seymour, Camden, N. J.

FOLGER (J. A.) & CO., SAN FRANCISCO.

* (1) **Incorporated on Jan. 30, 1917, in Washington,** with a capital of \$400,000. Incorporators: Elizabeth B. Folger, Chas. J. Paddock and Harry Wadsworth.

FOND DU LAC CHURCH FURNITURE CO., FOND DU LAC, WIS.

* (1) **Capital Increased.**—On Feb. 19, 1917, it was announced that this company had increased its capital stock from \$150,000 to \$300,000 to care for expansion of its business.

FOOD & MERCHANDISE CO.

* (1) **Incorporated on Jan. 19, 1917, in Delaware,** with a capital of \$3,000,000, to manufacture and prepare formulas and food products of all kinds. Incorporators: Wm. H. McAllister, New York; Arley B. Magee and Julia S. Jones, Dover, Del.

FORD MOTOR CO.

* (1) **Operations Resumed.**—It was announced Jan. 3, 1917, that operations had been resumed in full at the plant of the company on that date. Work had been suspended for 10 days to relieve congested freight conditions and because of shortage of fuel. About 32,000 men are being employed.

* (2) **President Ford Gives Bond.**—To Build Smelter.—It was announced at Detroit Jan. 6, 1917, that Pres. Henry Ford, of this company, had been permitted to proceed with the construction of a \$12,000,000 smelter on the Detroit River, near that city. The three circuit judges who heard the injunction proceedings against Mr. Ford by the Dodge Bros. accepted a bond of \$10,000,000 to secure the Dodges from any possible loss. The bond was furnished by Henry Ford, Horace H. Rackham and Frank L. Klingensmith, as individuals. They are stockholders of the Ford Motor Co.

The injunction action was started by John F. Dodge and Horace E. Dodge, automobile manufacturers, who are stockholders of the Ford Motor Co. They charged that Mr. Ford's scheme for spending great sums of money for developing the company's business was "reckless and unwise," and petitioned that Mr. Ford be compelled to disburse the company's profits as dividends.

Mr. Ford owns 51% of the stock of the Ford Motor Co. The Dodges own 10%.

—Feb.

* (1) **Balance Sheet, as of Jan. 18, 1917, shows:**

Assets: real estate, \$26,739,261; machinery, \$12,445,377; merchandise, \$45,297,639; cash and accounts receivable, \$53,064,700; total, \$137,547,038.

Liabilities: capital stock, \$2,000,000; accounts payable, \$15,546,682; surplus, \$120,000,356; total, \$137,547,038.

The surplus shows an increase of \$55,000,000 over the report filed the previous year.

* (2) **Contracts for Steel.**—It was announced Jan. 31, 1917, that this company had placed a contract for 20,000 tons of fabricated steel with the American Bridge Co. for manufacturing and assembling plant at Cork, Ireland, to serve the British trade.

The company has only an assembling plant in the British Isles. The company also has closed for about 200,000 tons of sheets, bars, tubes, wire and other products to cover requirements for 1918.

—Mar.

* (1) **Statement of Production.**—It was stated in March, 1917, that since August this company had manufactured and delivered to retail buyers 320,817 cars. The factory at Detroit is now building and 28 assembly plants are assembling approximately 3,000 cars each working day. An increase of approximately 15% in the number of Ford agents for 1917 compared with 1916 is indicated, the number running over 10,000. In the year ended Aug. 1, 1916, Ford Motor Co. turned out 533,921 cars; in the 1915 year, 308,213; in 1914, 248,307; in 1913, 168,220, and in 1912, 78,440.

FORD TRACTOR CO. OF CANADA, LTD.

* (1) **Incorporated on Feb. 13, 1917, in Canada,** with a capital of \$10,000,000, divided into 100,000 shares of \$100 each, to build and operate motor tractors, engines, machinery and equipment. Incorporators: Elizabeth Knox, Emma Pearl King, Mary Elizabeth Cherrier, Eva Levitt, Kate Campbell, Harry Gordon Keen and John Francis Boland.

* (1) **Incorporated on Feb. 7, 1917, in Delaware,** with a capital of \$10,000,000, to build and operate ships. Incorporators: H. G. Steelman, C. P. Cannon and C. L. Dambly, Philadelphia.

—Mar.

* (1) **New Shipyard.**—It was stated March 11, 1917, that this company, incorporated in Delaware, in February, with a capital of \$10,000,000, had completed plans for the construction, on the Delaware River immediately below the mouth of the Schuylkill, of "a shipyard equal to any in the United States." The company has acquired 160 acres for the site.

—Apr.

* (1) **Site Purchased for Shipyard.**—This company, organized with a capital of \$10,000,000 on April 13, 1917, com-

JANUARY 1 TO APRIL 30, 1917

pleted the purchase of 160 acres on the Delaware River at Philadelphia. It will begin work early in 1917 on the erection of a shipyard, which, it is said, ultimately will be as large as any in the United States. The property purchased occupies a mile along the river front just below the Schuylkill River.

The incorporators of the new company are A. G. Steelman, C. P. Cannon and C. M. Dombley.

FORT PITT STEEL CASTING CO.

*(1) Capital Increased.—Announced March 5, 1917, that this company had increased its capital stock from \$15,000 to \$400,000.

FORTY-MILE DREDGE & HYDRAULIC CO., SEATTLE, WASH.

*(1) Incorporated on March 4, 1917, in Washington, with a capital of \$500,000. Incorporators: Raymond H. Rudd, Eugene H. Rudd and George T. Smith.

FOSTER-COPE OIL & GAS CO.

*(1) Incorporated in April, 1917, in Oklahoma, with a capital of \$500,000. Incorporators: Willard Foster and Claud C. Foster, of Blackwell, and Chas. M. Cope, of Pawhuska, Okla.

FOSTER MACHINE CO.

*(1) New Addition.—It was stated Jan. 10, 1917, that this company, Elkhart, Ind., had plans prepared for an addition to cost \$70,000. It has on order equipment to cost approximately \$50,000. This company had the largest year of

business in its history in 1916, marketing about 3,500 turret lathes and screw machines having a value of about \$3,500,000.

FOUR-WHEEL DRIVE AUTO CO.

*(1) Stock Dividend.—It was announced Feb. 3, 1917, that this company, Clintonville, Wis., had declared a stock dividend of 100%, increasing the capitalization from \$500,000 to \$1,000,000.

In addition, a cash dividend of 15% was declared, making a total of 30% declared in 1916, the previous dividend having been paid July 1.

FOX, LEDERER & CO., INC., MILLBROOK, N. Y.

*(1) Incorporated on April 6, 1917, in New York, with a capital of \$500,000, to deal in woollens, cottons, other fabrics, clothing, hats and caps. Incorporators: S. Rosenbaum, H. C. Fox and W. Lederer, 215 West 98th St., New York.

FOX MOTOR TRACTOR CO., SPOKANE, WASH.

*(1) Incorporated on April 9, 1917, in Washington, with a capital of \$1,000,000. Incorporators: Porter C. Fox, Frank C. Fox and H. H. Lelong.

FRANCE (GOVERNMENT OF).

*(1) Note Offering by Syndicate.—Announcement was made March 18, 1917, that J. P. Morgan & Co. had sent out syndicate letters for the \$100,000,000 5½% two-year notes of the French Government, which are to be offered for public subscription at 99 and interest to yield 6%. The new notes at maturity are convertible into 20-year 5½% bonds of the Government of France. The new notes are to be paid in dollars or in francs at the option of the holder at the fixed rate of exchange of 5.75. They are to be dated April 1, 1917, and mature April 1, 1919.

The notes are to be secured by \$120,000,000 of collateral approved by J. P. Morgan & Co. Approximately \$20,000,000 of this collateral is to be of American corporations, including Canadian Pacific Ry. securities.

The remainder of the collateral is to be composed of securities of various governments and cities.

Pending the arrival of certain securities that are to be deposited with the Central Trust Co. as depository, cash will be placed with that institution to make up the difference necessary to bring the collateral up to 120%.

*(2) Syndicate Statement.—It was announced March 20, 1917, that the formation of the syndicate for the new \$100,000,000 French Government 5½% loan had been completed and plans made for the public offering of the notes March 22. Following is the statement issued by H. P. Davison, of J. P. Morgan & Co.:

"The French Government has authorized us to issue in this country \$100,000,000 of 5½% obligations of the Republic of France. These will take the form of two-year 5½% notes, to be offered at a price to yield slightly over 6%, to be secured by high-grade collateral and to be convertible, should the holder desire, into twenty-year 5½% obligations of the French Government. Both the notes and the bonds are to be free from deduction for any French taxes.

"The notes will also embody a clause permitting the holder, at his option, to collect both the principal and the interest in francs, at a rate of exchange of francs, 5.75, which, should normal conditions of trade and exchange be measurably restored within the life of the notes, would yield a substantial further advantage to the investor.

"This country's volume of trade with France is far in excess of any figures ever reached prior to the war, our exports in the calendar year 1916, according to official reports, having aggregated over \$860,000,000, as contrasted with \$500,000,000 in the calendar year 1915, and \$159,000,000 in the year ended

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

June 30, 1914, the last normal year. The extraordinary increase of exports has had its effect on the market for French exchange and the value of the franc, as measured in dollars, is considerably below its normal level.

"Should French exchange return to normal, which is 5.18½ francs to the dollar, the value of the new notes at maturity would work out at a substantial premium, assuming the holder exercised his right to claim payment in Paris in francs. Under normal trade conditions the market for French exchange stays close to the foregoing figure; the range from Jan. 1, 1910, to June 30, 1916, having been between 5.15½@½ and 5.21¼@½. A return to these figures will, obviously, be dependent upon a great many factors which cannot be foreseen, but any advance above the figure of francs 5.75 should inure to the benefit of the holders of these notes, without involving any increased interest cost to the French Government."

—Apr.

*(1) Listed in New York.—Announced April 5, 1917, that the New York Stock Exchange had admitted to the list this government's \$100,000,000 temporary two-year 5½% secured loan convertible notes, due April 1, 1919.

FRANCE & CANADA STEAMSHIP CORP. OF MANHATTAN, N. Y.

*(1) Incorporated on March 27, 1917 in New York, with a capital of \$4,000,000. Incorporators: Francis R. Mayer, John R. Mayer and Judah H. Bear.

FRANCO-AMERICAN STEAMSHIP CO., INC.

*(1) Incorporated on March 24, 1917, in Delaware, with a capital of \$5,000,000 to build and operate boats of all kinds. Incorporators: Percy B. Gibson, Jas. A. Gray, Jr., and Geo. W. Deas, New York City.

FRANKLIN AUTOMOBILE CO.

*(1) Production Increase.—It was stated March 19, 1917, that the completion of five new additions to this company's factory would make possible the building of 1,000 cars in March and would establish production on a basis of 12,000 cars per annum.

In June, 1915, the floor area of the plant was 6¼ acres, and output at the rate of 3,500 cars yearly.

In June, 1916, with the construction of four other additions floor area was increased to a total of 16 acres.

Car production has increased faster than floor space and capacity of plant is figured at 15,000 cars per annum.

The Franklin Co. now owns the largest single industrial building under one roof in Syracuse, N. Y.

FRANKLIN BREWING CO.

*(1) Assignment.—It was announced Jan. 23, 1917, that Justice Callaghan, in the Supreme Court in Brooklyn, had granted permission to Louis Karasik and Christopher Meyericks to file a provisional bond of \$50,000 as assignees of this company. The petitioners stated that the liabilities of the company amounted to \$1,155,000, of which \$541,000 was secured by the property holdings of the company and other collateral. The assets were declared to be \$1,200,000. The statement is sworn to by the secretary of the brewing company.

A petition in involuntary bankruptcy against the company was filed by creditors in the United States District Court. The petitioners stated that the defendant company filed an assignment for the benefit of its creditors.

FRANKLIN COUNTY MINING CO., BENTON, ILL.

*(1) Incorporated.—On April 13, 1917, in Illinois, with a capital of \$400,000. Incorporators: Robert R. Ward, J. M. Seymour and R. D. Kirkpatrick.

FRANKLIN (H. H.) MANUFACTURING CO.

*(1) Car Output.—It was stated Jan. 27, 1917, that this company, maker of the Franklin car, is turning out 30 cars a day, or at the rate of 9,000 a year. This is double the rate of production a year previously, the increased business having necessitated large additions to plant.

The company has no cars in storage and dealers have few, if any, cars in stock. All dealers are sold weeks ahead. New York City, for example, has unfilled orders for 200 cars.

Early in the season the Franklin Co. lowered its prices \$100 per car. In December the old prices were restored, so that the cars are now priced the same as previous year.

FRANKLIN MINING CO.

*(1) Production, 1916.—It was announced Jan. 27, 1917, that this company in 1916 produced 3,116,570 pounds of copper, compared with 1,314,968 pounds in 1915. In late months production was steadily increased to the present monthly rate of 300,000 pounds and a further betterment is expected in the Spring following the severe weather which usually occurs in February and March.

*(2) Production Cost, 1916.—It was stated Jan. 27, 1917, that this company's average cost of production in 1916 was about 17 cents per pound, but with increased production this charge was gradually lowered to 15 cents a pound in December and a better showing is expected, despite high cost of labor and supplies, when output is further increased in the Spring of 1917.

The bulk of Franklin's 1916 copper production was sold at about 26 cents a pound and a large part of its expected 1917 output has been sold at high prices.

The No. 2 shaft has been sunk below the 4th level and when in operation will materially increase production. The stamp mill is now treating 1,100 tons of rock daily against maximum capacity of 1,600 tons daily.

—Apr.

*(1) Annual Report, Year Ended Dec. 31, 1916, shows total receipts of \$804,597 compared with \$275,632 last year; net earnings, \$162,678, against a deficit of \$87,142 last year; surplus, \$30,022, against a deficit of \$117,165 in 1915.

FRANKLIN MORTGAGE CO.

*(1) Incorporated on Feb. 9, 1917, in Delaware, with a capital of \$300,000 to deal in investments of all kinds. Incorporators: F. R. Hansell, Philadelphia, Pa., Geo. B. Martin and S. C. Seymour, Camden, N. J.

FRANKLIN POWER CO., INC., FARMINGTON, ME.

*(1) Incorporated in April, 1917, in Maine, with a capital of \$300,000, to engage in a gas and electric business. Pres., F. J. Savage; Treas., C. O. Sturtevant, Clerk; Alice S. Gilman, Farmington, Me.

FRANZ COAL & LUMBER CO.

*(1) Incorporated in March, 1917, in West Virginia, with a capital of \$500,000. Incorporators: W. E. Deegans, A. J. Deegans, John Faulkner, L. N. Franz and others.

FREDERICK INVESTMENT CO.

*(1) Incorporated on Feb. 22, 1917, in Delaware, with a capital of \$2,500,000, to manufacture and sell automobiles and attachments. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

FREDONIA NATURAL GAS LIGHT CO.

*(1) Sale.—See Frost Gas Co.—Item No. 1.

FREEPORT & TAMPICO FUEL OIL CORP.

*(1) Sale.—See Sinclair Gulf Corp.—Item No. 1.

FREEPORT TEXAS CO.

*(1) Special Dividend.—Announced Jan. 24, 1917, that this company had declared a special dividend of 10%, payable Feb. 15 to stock of record Feb. 10. This is the same as declared Oct. 21, 1916.

FREMONT HOME TELEPHONE CO.

*(1) Merger Planned.—See Central Union Telephone Co.—Item No. 1.

FREMONT SALT CO.

*(1) Stock Issue to Acquire Mining Locations.—California Commissioner of Corporations April 18, 1917, issued a permit to this company to issue 500,000 shares of stock in exchange for 112 saline mining locations in Kern County, Cal. The company plans to erect a refinery near the property, 32 miles north-east of Mojave.

FRENCH BROTHER-BAUER CO., CINCINNATI, O.

*(1) Capital Reduced.—On April 24, 1917, the company filed notice at Columbus, O., of a reduction in capital stock from \$1,000,000 to \$500,000.

FRENCH-OVERSEAS CORP., MANHATTAN, N. Y.

*(1) Incorporated on April 18, 1917, in New York, with a capital of \$1,000,000, to engage in a transportation navigation business. Incorporators: F. R. and J. R. Mayer and J. H. Sears.

FRENCH MEDICINAL CO., INC., MANHATTAN, N. Y.

*(1) Incorporated on April 20, 1917, in New York, with a capital of \$1,000,000, to deal in drugs, chemicals and hospital supplies. Incorporators: D. J. Potterton, P. Hinrichs and W. Z. Pearsall, Fort Washington.

FRESNO CANAL & LAND CORP.

*(1) Bond Offering.—It was announced March 6, 1917, that the Blankenhorn-Hunter Co., of Los Angeles and Pasadena, is offering \$600,000 ten-year first mortgage 5% gold bonds of this company at 96 and interest, yielding over 5½%.

These bonds are a first lien upon all the assets of this company, consisting of 336 miles of main canals, together with distributing systems, rights of way, diverting dams, weirs, head gates and other irrigation works.

FRIEND MANUFACTURING CO., GASPORT, N. Y.

*(1) Capital Increased.—On Feb. 19, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$50,000 to \$300,000.

FRICK (H. C.) COKE CO.

*(1) Coal Land Negotiations.—It was stated Feb. 13, 1917, in a dispatch from Pittsburgh, Pa., that negotiations are under way for the purchase by J. V. Thompson, said to be acting for this company, of 242 acres of coal land and surface near Rice's Landing, Greene County, Pa. The tract is to be used as one of two openings to the 12,000-acre tract recently secured by the Frick company from the Thompson creditors' committee. The option price of the Rice's Landing acreage is \$60,000. The seller is Thomas Hartley.

FRONTIER ELECTRIC BY. CO.

*(1) Rivalry for Control.—It was announced at Albany, N. Y., Feb. 7, 1917, that plans of the Pennsylvania R. R. and the Delaware, Lackawanna & Western to use this company's road between Buffalo and Niagara Falls as an extension of their freight trunk lines were revealed before the New York Second District Public Service Commission when H. A. Taylor, attorney for the Erie R. R., filed an application for the

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

revocation of the Frontier's certificate of convenience and necessity.

The case developed into a struggle between the Pennsylvania and Lackawanna on the one end and the Erie on the other for the business of the rich industrial territory at Niagara Falls and possible future connection with the proposed new trans-continental line of the Canadian Northern.

The Commission indicated that the present application of the Pennsylvania and Delaware, Lackawanna & Western to buy the Frontier Electric would not be disposed of until it had been satisfied of the necessity for the trunk freight line.

The hearing was adjourned pending a decision by the Commission as to the merits of the Erie R. R.'s application to have the certificate of convenience revoked.

FROST GAS CO.

¹(1) Acquisition Authorized.—It was announced March 5, 1917, that the New York Second District Public Service Commission had authorized this company to acquire the properties of the South Shore Natural Gas & Fuel Co., the Principal Realty Co., Silver Creek Gas & Improvement Co., and the Fredonia Natural Gas Light Co. The consolidated companies will become a part of the Cities Service Co. organization, control having been acquired some time previously.

In approving the application, Chairman Van Santvoord dissented, but the other four commissioners joined in authorizing the consolidation.

The Frost Gas Co. is a Delaware corporation, but several years previously was authorized to operate utility properties in New York State and under the jurisdiction of the commission. The majority opinion stated that the plan for the consolidation of the companies offered the only feasible plan for the investment of a large amount of capital in development of natural gas resources of the State and for the relief of the gas consumers of northern New York.

The commission stated that the property to be purchased by this company is worth more than the par value of the new Frost Gas Co. stock that is to be issued.

FROST GEAR CO.

²(1) Officers.—It was announced on Feb. 23, 1917, that at the annual meeting of this company the following officers were elected: Pres., E. E. Frost; Vice-Pres., M. C. Townley; Sec'y, Robert Smith; Treas., A. S. Glasgow.

Besides the above the Board of Directors includes Thomas Woodfield, E. J. Weeks and James Heaslet, of Detroit.

The earnings for the year were given as \$1,248,000.

FULLARD DRYING PRODUCTS CORP. OF PHILADELPHIA.

⁴(1) New Name.—See Allegheny Mines Corp.—Item No. 1.

FULLER ENGINEERING CO., ALLENTOWN, PA.

¹(1) New Zealand Plant Started.—It was announced Jan. 13, 1917, that this company, headed by Col. James W. Fuller, Jr., had started the operation of the Dominion Portland Cement Co., Whangaree, N. Z., 50 miles from Auckland N. Z. The plant, built and designed by the Allentown concern, cost \$1,500,000.

FULLER & SONS MANUFACTORY CO.

²(1) Addition to Plant.—It was stated Feb. 16, 1917, that this company had awarded the contract for an addition to its plant at Kalamazoo, Mich., to be completed by July 15, 1917, at a cost of \$100,000.

FULTON BUILDING & LOAN ASSOCIATION, FULTON, KY.

⁴(1) Capital Increased.—On April 2, 1917, the company filed notice at Frankfort, Ky., of an increase in capital stock from \$200,000 to \$400,000.

FULTON CHAIN RY. CO.

²(1) Sale.—See New York Central R. R. Co.—Item No. 2.

FULTON MOTOR TRUCK CO.

¹(1) Incorporated on Dec. 30, 1916, in Delaware, with a capital of \$7,500,000, to manufacture, sell and deal in and with motor trucks of all kinds. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

¹(2) New Name.—See Clyde Motor Truck Co.—Item No. 1.

FUNCH, EDYE & CO., INC., WILMINGTON, DEL.

¹(1) Incorporated on Jan. 9, 1917, in New York, with a capital of \$600,000, to act as shipowners in navigation, transportation by water, warehousing, expressage and salvage wrecking. Representative: Geo. Rossen, 8 Bridge St.

GALENA-SIGNAL OIL CO.

²(1) New President.—Announcement was made Feb. 23, 1917, that S. A. Megeath had resigned as Pres. and Gen. Mgr. of this company in order to devote his attention exclusively to the refining and foreign branches of the business, with offices at 17 Battery Place, New York. He is succeeded as Pres. by his father-in-law, Gen. Charles Miller. The retiring directors were re-elected.

²(2) Financial Condition.—Announced March 19, 1917, that this company, incorporated under the laws of Pennsylvania, had filed with the Massachusetts Secretary of State a statement of its financial condition, dated Dec. 31, 1916, which compares as follows:

	1916	1915
Assets—		
Real estate and machinery	\$1,218,537	\$990,604
Merchandise	1,855,207	1,005,125
Cash and debts receivable	6,913,622	6,806,458
Patent rights	6,950,000	6,950,000
Total	\$16,937,367	\$16,351,188
Liabilities—		
Capital stock	14,000,000	14,000,000

GARFIELD NATIONAL BANK, NEW YORK.

¹(1) New Directors.—Announced Jan. 9, 1917, that at the annual meeting of stockholders of this bank the retiring directors were re-elected and Joseph H. Emery and Wm. H. McIlvray were added to the board.

GARRETT & CO., INC.

¹(1) Incorporated on Jan. 30, 1917, in New York, with a capital of 12,500 shares, \$100 each, 17,500 shares, no par value; to carry on business with \$1,000,000 in grapefruit, vegetables, cultivators, wines, vinegars and jellies. Incorporators: C. P. Cole, A. F. Knowlton and P. Garrett, 722 Longacre Building, Broadway and 42d St., New York.

GARVIN-ARMOUR STEEL WHEEL CO. (THE).

¹(1) Incorporated on Jan. 25, 1917, in Delaware, with a capital of \$1,000,000, to manufacture wheels, rims, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

GARY & INTERURBAN R. R.

²(1) Report, Year Ended Nov. 1, 1916, shows net earnings, less expenses, of \$7,397.

GARY SCREW & BOLT CO., GARY, IND.

²(1) Capital Increased.—It was announced March 8, 1917, that this company had increased its capital stock from \$400,000 to \$1,000,000.

GARY & SOUTHERN TRACTION CO., GARY, IND.

²(1) Bond Offering.—It was announced March 19, 1917, that the Indiana Public Service Commission had authorized this company to issue \$200,000 of its first mortgage ten-year gold bonds, dated Oct. 1, 1916, due and payable on Oct. 1, 1926, and to sell, at par, \$150,000 of the bonds for the purpose of retiring and cancelling a former issue of \$300,000, of which issue \$250,000, bearing interest at the rate of 6%, have been sold and are outstanding. The remaining \$50,000 of the issue is held in the treasury.

Should the \$150,000 be insufficient to take up the former outstanding issue of \$250,000, the remainder will be paid in cash by the company, and the \$50,000 held in the treasury will be cancelled and destroyed. Of the \$200,000 just authorized \$50,000 will be kept in the treasury to make additions, betterments, extensions and improvements.

JANUARY 1 TO APRIL 30, 1917

GAS APPLIANCE CO.

¹(1) **Acquisition Approved.**—It was announced at Baltimore March 13, 1917, that the stockholders of this company at a meeting on that date had approved the purchase of the General Gas Appliance Co. and the Schmitt Mfg. Co., both of New York. These concerns will be merged with the Baltimore company. The stockholders also sanctioned the sale of pfd. stock to make payment for the absorbed companies. This stock had already been authorized, but had been held unsold in the treasury.

GAS & COKE OVEN CORP. OF AMERICA.

¹(1) **Incorporated on March 1, 1917,** in New York, with a capital of 1,000 shares, \$100 each, 1,000 shares, no par value, to carry on business with 100,000 in coke ovens, stamp mills, smelting machinery and mine coal, oil, gas and construction. Incorporators: M. McManis, L. M. Woodworth and G. H. Rowe, Jr., 122 Milton St., Brooklyn, N. Y.

GAS & ELECTRIC CO., UTICA, N. Y.

¹(1) **Contract Let for Power Station.**—On April 26, 1917, the "Iron Age" stated that this company had let a contract to the Structural Concrete Co., Dayton, Ohio, for a hydro-electric power station, which, with equipment, will cost approximately \$700,000.

GASOLINE PRODUCING CORP.

¹(1) **Incorporated on Feb. 27, 1917,** in Delaware, with a capital of \$1,000,000, to deal in and with gasoline and other oils, etc. Incorporators: F. D. Buck, M. L. Harty and Geo. W. Dillman, Wilmington, Del.

GASTON, WILLIAMS & WIGMORE, INC.

¹(1) **New Officers.**—It was announced Jan. 13, 1917, that W. H. Williams had resigned his position as Treas. of this company to become a Vice-Pres. As Treasurer he will be succeeded by A. W. Frank, who for 30 years had been connected with the Sherwin-Williams Co. of Cleveland.

—Feb.

¹(1) **Russian Contracts.**—It was announced Feb. 15, 1917, that this company had closed contracts with the Russian Government for large shipments of Lombard "caterpillar" tractors, delivery to begin in the Spring of 1917. These machines are similar to those in use on the British front. The type of tractor ordered is a 100-horsepower gasoline machine with caterpillar treads.

The company is completing shipments on an order for 2,500 Royal typewriters to Russia, the largest contract for American typewriting machines ever signed. Over 1,000 machines have been shipped on the order.

¹(2) **Unfilled Orders, as of Feb. 15, 1917,** it was stated Feb. 20, 1917, were \$6,826,036, an increase from Jan. 18 of \$119,078. The company's shipments during this period totaled \$3,535,309, so that the new business received in the period actually amounts to \$3,654,987.

On January shipments, profits of the company were \$394,917. This represents only the earnings of the exporting and importing company, and includes no part of the earnings of the Gaston, Williams & Wigmore Steamship Co., which are running to substantial totals, and which have never been distributed. Furthermore, no earnings of the Petrograd, Paris, or London offices are included.

Of the unfilled orders on hand Feb. 15, less than one-third were for war purposes. The company is not handling any orders for munitions.

—Mar.

¹(1) **Appointment as Representative.**—Announcement was made March 22, 1917, that this company had been appointed the commercial representative in America for the Council of the All Metal Working Industries of Russia. This

council represents a union of all the metal industries in Russia. The purchases to be made in the United States will consist of machinery and equipment for the factories of the various members of the council and other materials.

¹(2) **Unfilled Orders as of March 14, 1917,** totaled \$17,587,399, as compared with \$6,826,036 a month ago. Shipments during the period were just under \$2,300,000, so that new business taken approximated \$13,641,000. The unfilled orders on hand are the largest in the history of the company, and incoming business is at the highest rate since organization. In February the export and importing company earned a net profit of \$235,000. This is exclusive of earnings of the steamship company.

—Apr.

¹(1) **Net Earnings, March, 1917,** amounted to \$276,038, bringing the total for the first quarter of 1917 to \$905,955. These profits are from the operations of the Exporting & Importing Co. alone, and include no part of the earnings of the Steamship Company or of the European companies.

The company paid off out of earnings on April 18, 1917, the \$1,000,000 notes maturing at that date, leaving only \$4,000,000 now outstanding.

Unfilled orders on hand April 18, 1917, were \$23,081,044, compared with \$17,587,399 on March 14, 1917.

¹(2) **Position of General Manager Created.**—This company, April 25, 1917, announced the creation of a new position, that of general manager, and the appointment of Milton J. Budlong to fill it. Mr. Budlong is Vice-Pres. of the company and also of the Gaston, Williams & Wigmore Steamship Corp. The position was created to provide a centralization of authority.

GEM MOTOR CAR CORP.

¹(1) **Plant at Grand Rapids.**—It was announced Feb. 2, 1917, that Beverly Deuel, of Deuel & Sewall, had completed plans for the establishment of the Gem Motor Car Corp. at Grand Rapids, Mich., to manufacture a light, popular-priced car and a light truck.

GENERAL BAKING CO.

¹(1) **Report, Year Ended Dec. 31, 1916,** shows net profits of \$450,053, as compared with \$322,325 in 1915, an increase of \$127,728.

¹(2) **Income Account, Year Ended Dec. 31, 1916,** compares as follows:

	1916	1915
Net income -----	\$919,053	\$741,015
Net profits -----	450,784	322,325
Surp. after pfd. dividends -----	213,784	85,325

¹(3) **Balance Sheet, as of Dec. 31, 1916,** shows a profit and loss surplus of \$1,181,958, compared with \$968,174 Dec. 31, 1915.

—Apr.

¹(1) **Balance Sheet, as of Dec. 31, 1916,** showed profit and loss surplus of \$1,181,957, against \$968,173 last year.

GENERAL BOND & SHARE CO., YOUNGSTOWN, O.

¹(1) **Incorporated on April 18, 1917,** in Ohio, with a capital of \$2,000,000. Incorporators: W. B. Hall, John T. Harrington, U. C. DeForde, W. A. Carroll and J. W. Blackburn.

GENERAL CERAMICS CO.

¹(1) **New Name.**—See German-American Stoneware Works, Keasbey, N. J.—Item No. 1.

GENERAL CHEMICAL CO.

¹(1) **Application to List.**—Announced Jan. 11, 1917, that the New York Stock Exchange had received application to list \$2,622,200 additional common stock of this company.

¹(2) **Listed in New York.**—Announced Jan. 25, 1917, that the New York Stock Exchange had listed \$2,622,200 additional common stock of this company.

¹(3) **Report, Year Ended Dec. 31, 1916,** shows:

	1916	1915
Net profits -----	\$12,481,826	\$6,153,796
Surp. after pfd. & com. divs. -----	5,574,054	772,670

¹(4) **Earnings on Stock.**—Announced Jan. 26, 1917, that this company's balance of \$11,374,328 applicable to common stock is equal to 87.51% earned on the \$13,110,600 common stock, as compared with 48.91% on the \$11,400,500 common stock the previous year.

¹(5) **Balance Sheet, as of Dec. 30, 1916,** shows a profit and loss surplus of \$11,399,010, compared with \$8,024,986 Dec. 30, 1915.

—Apr.

¹(1) **Sale of Processes.**—See National Aniline & Chemical Co., Inc.—Item No. 1.

¹(2) **Profits, Jan. 1-March 31, 1917.**—This company April 20, 1917, reported total profits from Jan. 1 to March 31 of \$2,817,960, compared with total profits in the corresponding period of 1916 of \$2,893,929, a decrease of \$56,969. Dividend and insurance funds amounted to \$617,776, compared with \$454,783, a decrease of \$162,993. Reserve for depreciation was \$500,000, leaving net profits for the quarter of \$1,700,184, compared with net profits for first quarter of 1916, \$1,939,145, a decrease of \$238,962.

	1917	1916
Total profits -----	\$2,817,960	\$2,893,929
Bal. after depr. and insurance -----	2,242,960	1,939,145
Surp. after com. & pfd. divs. -----	1,700,184	1,939,145

¹(4) **Earned \$12.80 a Share on Common in March Quarter.**—During the March quarter this company earned \$12.80 a share on 157,329 shares of common stock.

¹(5) **Quarterly Earnings Enough for Dividends in 1917.**—On April 21, 1917, Dow, Jones & Co. said that this company's total earnings of \$2,817,960 for the three months ended March 31 were more than sufficient to take care of company's dividend requirements for the whole of 1917.

The increase in the common dividend accounts in a great degree for the decrease of \$238,962 in net earnings, as payments to common shareholders during the quarter aggregated \$314,652, an increase of \$115,000 over the corresponding period of 1916.

The payment of \$75,000 to the company's insurance fund is an increase of \$45,000 over that of the first quarter in 1916, so that total profits during the quarter showed a falling off of \$75,968. This decrease is attributable to the difficulties the company has met with in getting necessary supplies and in making shipments owing to congested traffic conditions.

GENERAL CIGAR CO., INC.

¹(1) **Application to List—New Name.**—Announced Feb. 19, 1917, that the New York Stock Exchange had received application to list \$5,000,000 of this company's pfd. stock and \$18,104,000 common stock, being a change in name from the United Cigar Manufacturers Co.

—Mar.

¹(1) **New Directors.**—Announced March 1, 1917, that at the annual meeting of this company, formerly the United Cigar Manufacturers Co., the following new directors were elected: William Best, Jr., David G. Evans and B. J. Meyer. They replace Preston Herbert, Jack Schiffner and Jacob Wertheim, who resigned.

At the reorganization meeting, following the annual meeting, Mr. Herbert resigned as Vice-Pres., and the following new Vice-Presidents were elected: William Best, Jr., M. H. Esberg and B. J. Meyer.

¹(2) **Business Acquired.**—Announced March 1, 1917, that at the annual meeting of the stockholders of this company, formerly the United Cigar Manufacturers Co., the business of the Theobald & Oppenheim Co., of Philadelphia, all of the stock of which was owned by the United Cigar Manufacturers Co.,

JANUARY 1 TO APRIL 30, 1917

was merged with that of the General Cigar Co., Inc.

*(3) Acquisition.—See Lichenstein Bros. Co.—Item No. 1.

GENERAL DEVELOPMENT CO.

*(1) Increased Dividend.—Announced Feb. 5, 1917, that this company had declared a quarterly dividend of \$2, payable March 1 to stock of record Feb. 15. Three months previously \$1.50 was declared.

GENERAL ELECTRIC CO.

*(1) Business in 1916.—It was stated Jan. 5, 1917, that this company during the 12 months to Dec. 31 received gross orders from customers reaching the record total of \$168,200,000, an increase of \$68,000,000, or 70% over the \$98,385,891 of orders booked from customers during the 1915 year. Incidentally, this \$168,200,000 of new business in 1916 was \$55,000,000 more than the company ever received in any twelve months. In 1911 incoming orders reached a total of \$111,000,000, up to 1916 the high-water mark.

The 1916 net profits were computed on the basis of outgoing shipments. These naturally were far less than the flood of incoming business, for the reason that plant capacity is not developed to the point where production can sustain a gross delivery of over \$120,000,000.

With delays and interruptions from different sources it is not likely that General Electric final figures for 1916 will show billings to customers of much over \$110,000,000, which would present an increase of \$25,000,000 over the 1915 total and also a new high record in the company's experience.

It is felt by General Electric leaders that 1917 will be another big year. Gross orders received may perhaps not break the 1916 record, but they will come very close to it. On the other hand, an increase of \$10,000,000 to \$15,000,000 in total of goods billed out to purchasers is not at all unlikely.

This would mean a \$125,000,000 gross base upon which to calculate 1917 net earnings.

*(2) To Remove Plant.—On Jan. 19, 1917, this company, Lynn, Mass., announced plans for the removal of a considerable portion of its railway motor work to its plant at Erie, Pa.

*(3) Annual Report of Subsidiary.—See Electrical Securities Corp.—Item No. 1.

*(4) Lamp Production, 1916.—It was stated Jan. 27, 1917, that in 1916 this company turned out a total of 80,000,000 Edison incandescent lamps. Production is so largely confined to the "Mazda" type that 70,000,000 of these were of this class. There are 40 different operations required to make a lamp, but factory efficiency is so high that 300 lamps a minute is the present factory output.

General Electric has a contract to equip several vessels for the United States navy with electrical machinery and turbines. One of these vessels will have power enough to furnish all the electrical energy consumed in the city of Boston. Four vessels together could supply New York City with current.

*(5) Report of Holding Co. for 1916.—See United Electric Securities Co.—Item No. 1.

—Feb.

*(1) New Company Plans.—See Texas Electric Ry. Co.—Item No. 2.

*(2) New Addition.—Announced Feb. 23, 1917, that this company had purchased from the city of Warren, O., several acres, on which it would erect a new addition to its plant at a cost of \$200,000.

—Mar.

*(1) Merger Discussion.—See Lehigh Navigation Electric Co.—Item No. 2.

*(2) Status (March, 1917).—On March 23, 1917, the "Wall Street Journal" said that orders for electrical apparatus were pouring into the big producers at a flood-tide never before approximated. It is conservatively estimated that the demand for electrical goods is at least 75% greater than the possible produc-

tive capacity of the electrical producers. General Electric ended its fiscal year on Dec. 31 with over \$45,000,000 of unfilled orders. Western Electric had \$30,000,000 and Westinghouse even more.

General Electric has been reluctant for reasons which are not readily apparent to expand physically to meet the big jump in electrical demand. In other periods of rapid increase in demand for electrical goods General Electric has been very prompt to raise new capital, build heavily and absorb the growth. To-day General Electric seems much more content than ever before to hold what it has, build moderately and finance its expansion entirely out of earnings.

Probably one reason that the company's physical expansion in 1915 and 1916 was so relatively moderate was that the labor supply would not justify a heavy plant enlargement. Another factor which held back physical expansion has been the reluctance of the company to engage in a big campaign when the price of essential materials was at such abnormal levels. Had the demand for electrical goods which has been so insistent for the past 18 months occurred at anything except a time of war, the answer of General Electric would probably have been as prompt and progressive as in former days.

—Apr.

*(1) Russian Contract Adjustment.—See American Can Co.—Item No. 1.

*(2) New Business.—It was stated April 2, 1917, that this company is booking new business at a weekly rate in excess of \$4,000,000, which is equivalent to bookings of over \$200,000,000 for the year. In 1916 bookings of approximately \$100,000,000 surpassed the previous record of \$111,000,000 of 1911; 1915 bookings were \$98,000,000. At the high prices for electrical goods, the company's plants have an annual capacity of approximately \$140,000,000, so that the new business coming in is almost 50% in excess of capacity output.

General Electric had also \$50,000,000 in unfilled orders on its books on Jan. 1, as compared with \$20,000,000 at the beginning of 1916, and \$11,000,000 at the beginning of 1915. The company has practically finished its war contract work, and will soon have this extra floor space available, which should enable it greatly to surpass the 1916 record billings of \$117,000,000 of electrical goods.

*(3) Report, Year Ended Dec. 31, 1916, shows that orders received were 50% greater in value than in the best preceding year of the company's history. The best previous year was 1913.

Urgent pressure upon the management for extensive additions to plant, the report said, involved the expenditure of \$8,828,254. The company followed its usual custom of writing down its capital investments from earnings by setting aside from income a sum within \$840,000 of this outlay. The net book value of all plants at the end of the year was \$29,904,764, although the total expenditure since 1893 was \$92,593,437. The difference between the totals was represented in funds written off from earnings year by year.

Outlays related to the acquisition and licensing of new patents amounted to \$891,880, all of which was written off. The stocks, bonds and other securities owned were carried at a valuation of \$33,773,678, of which \$21,675,213 represented the securities of subsidiaries. The company and its subsidiaries had 79,000 employees on their payrolls when the year ended.

*(4) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Sales billed.....	\$134,242,290	\$86,522,076
Net profits.....	15,294,092	8,623,387
Surp. after chgs.	18,589,528	11,737,910
Bal. a'd dividends	10,467,882	3,607,992

*(5) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$34,160,753, compared with \$23,692,871 Dec. 31, 1915.

*(6) Earnings on Stock.—This company's 1916 surplus after charges of \$18,589,528 is equivalent to \$18.1 a share earned on 1,015,125 shares of capital stock, against \$11.56 a share earned in 1915.

*(7) Chairman Tells Stockholders of Prosperous Business in 1916.—Chairman C. A. Coffin, of this company, in his remarks to stockholders April 16, 1917, said, in part: "The extraordinary demand for the various products of your company throughout the year 1916 has made it necessary to operate its manufacturing and other facilities to the limit of their capacity. The values of orders received for electrical machinery and supplies was \$167,169,058, or 70% greater than the orders for electrical product in 1915 and 50% greater than the corresponding orders for the largest previous year, 1913. The orders for special war munitions received during the year, amounting to \$2,416,000, were merely supplementary to previous contracts."

"The number of employees engaged in your factories and offices and in those of your subsidiary companies at the end of 1916 was about 79,000. The total factory floor space in 1916 was 15,300,000 square feet against 9,770,000 square feet in 1911. The book value of all plants in 1916 was \$29,904,764, as compared with \$3,958,528 in 1893. During the 24 fiscal years ended Dec. 31, 1916, additional expenditures have been made aggregating \$83,634,910, while \$62,638,673 has been written off during this period."

"The company has followed its customary practice in writing off against income its total expenditures during 1916 for patents, applications for and licenses under patents and other outlays relating thereto, amounting to \$891,880. The patent account is carried at \$1, as in previous years."

"Stocks, bonds and other securities are carried at a valuation of \$33,773,678, of which \$21,675,214 represents securities of subsidiary companies and \$12,098,464 those of public utility and other companies."

"The current accounts and notes receivable are carried at \$26,816,297."

"Urgent pressure upon the management for immediate and extensive additions to your manufacturing facilities involved the expenditure of \$8,828,254 for plant account during 1916. This outlay, as compared with ordinary costs, was abnormal and excessive, in view of which it has seemed wise to write off against income an amount substantially equal to the year's disbursement."

*(8) 40.4% Gain in Gross Sales in 1916.—On April 19, 1917, the "Boston News Bureau" said this company in 1916 shipped to its customers \$134,242,290 of electrical apparatus, an increase of \$45,036,112, or 50.4%, over the 1915 shipments of \$89,206,178, and comparing with a previous high total of \$110,273,622 in 1913. Not a dollar of floating debt was created, while working capital increased almost \$10,000,000 during the year. In other words, within \$500,000 of the entire balance above dividends was turned back into working capital."

As might naturally be expected, General Electric net kept pace with expanding gross business. The balance for dividends increased from \$11,737,909 to \$18,589,528, equal to 18.4% on the stock and a gain of \$6,851,619, or 58.5%. This is, of course, the biggest balance of profits to which the company has ever confessed. And it was a balance of earnings achieved after charging into operations the record total of \$8,486,822 for construction, machinery, pattern and other plant expenses."

The physical expansion in 1916 was obviously abnormal, particularly as only \$1,860,729 represented new buildings, while 65% was for new machinery. In other words, of the total physical installation \$5,732,187 was for machinery, of which all but about \$1,000,000 was charged off the books."

The net result was that at the close of 1916 General Electric carried its physical properties at \$29,904,764 against \$29,563,331 in 1915, an insignificant increase in view of the huge gross business transacted."

JANUARY 1 TO APRIL 30, 1917

*(9) **New General Sales Manager.**—On April 28, 1917, this company stated that John G. Barry had been appointed general sales manager. He will also continue his duties as manager of the railway department of the company.

GENERAL FILM CO., CANADA, LTD.

*(1) **Incorporated on March 2, 1917,** in Canada, with a capital of \$250,000, divided into 2,500 shares of \$100 each, to manufacture, operate and deal in moving picture theatre films, motion reel films and films of all kinds used for the production of moving pictures. Incorporators: Thomas Allen Hubley, Geo. Thomas Porter, Howard Salter Ross, Eugene Real Angers and Antoinette Defoy Lamarre. Chief place of business, Montreal, Que.

GENERAL FIREPROOFING CO., YOUNGSTOWN, O.

*(1) **Capital Increase Approved.**—It was announced Jan. 30, 1917, that at the meeting of this company on that date the increase in capital stock from \$2,000,000 to \$4,000,000 was approved.

—Feb.

*(1) **Capital Increased.**—On Feb. 7, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$2,000,000 to \$4,000,000.

*(2) **Stock Issue.**—It was announced Feb. 13, 1917, that an issue of \$350,000 of new pfd. stock is being made by this company pro rata at par to shareholders of record Feb. 5, from its recent \$2,000,000 authorization. Subscription books close Feb. 24. Proceeds of the issue are needed for additional equipment and plant extension.

With this issue the corporation will have outstanding \$1,350,000 pfd. and \$1,000,000 common. The corporation reports heavy demand for metal office fixtures and furnishings and expanded metal lath, its chief products.

GENERAL GAS APPLIANCE CO.

*(1) **Sale.**—See Gas Appliance Co.—Item No. 1.

GENERAL GAS & ELECTRIC CO.

*(1) **Status.**—It was stated Jan. 8, 1917, that on Nov. 30, 1916, subsidiaries of this company were serving 22,059 electric consumers, a gain of 12.1% in twelve months; 13,131 artificial gas consumers, a gain of 7%; 5,605 natural gas consumers, a gain of 3%, and 305 steam heat consumers, a gain of 4%.

The company recently purchased leases on a coal property at Hartland, W. Va., and will erect a central electric station to supply energy for its own and neighboring mines. The plant will be operated by the Hartland Power Co., recently incorporated, with \$500,000 common and \$2,000,000 7% pfd. stock and \$1,000,000 first mortgage bonds. From the coal lands which it has leased in this district the company will be able to supply its subsidiaries with an ample amount of coal at a reasonable price.

Construction work at the subsidiaries is being steadily carried on. The Pennsylvania Utilities Co. has installed two 1,100-horsepower boilers and has completed and put in operation a new conduit system. The New Jersey Power & Light Co. has put in operation its new 5,500-horsepower central generating station at Dover, N. J., and the new plant for the Binghamton Light, Heat & Power Co. is progressing rapidly.

New business at all the subsidiaries is coming in at a good rate, and the managers of the company expect to see record results by the operated properties in 1917.

*(2) **Earnings, Subsidiaries, December, 1916.**—This company reported for December gross revenues of its electric subsidiaries, \$179,278, a gain of \$19,137, or 11.9% over December, 1915; gross of gas subsidiaries, \$50,913, a decrease of \$4,320, or 7.8%; gross of electric railway subsidiaries, \$27,770, a gain of \$2,976, or 12%; and gross of steam heating subsidiaries, \$11,999, an increase of \$255, making

total gross revenues of subsidiaries for the month \$269,965, a gain of \$18,047, or 7.2%.

*(3) **Sales by Subsidiary in 1916.**—See Pennsylvania Utilities Co.—Item No. 1.

—Feb.

*(1) **Gross Revenues, Subsidiaries, January, 1917,** were \$289,434, an increase of \$17,012, or 6.7% over January, 1916. The electric light and power subsidiaries showed a gain of 12%, the electric railways of 3.1%, the gas subsidiaries an increase of 3.1% and the steam heating system a gain of 6.4%.

For 1916 65% of the revenues of the company came from electric light and power sales, 20.2% from gas sales, 12.5% from the electric railways and 2.3% from steam heating.

The gain in gross of subsidiaries for 1916 over 1915 was 15.7%.

—Mar.

*(1) **Earnings, February, 1917.**—It was stated March 8, 1917, that this company's gross for February, 1917, was \$262,860, an increase of \$18,092, or 6.5% over February, 1916. The gross of the electric light and power department increased 12.5%. In the gas department there was a decrease of 6.9%. Electric railway gross increased 4.6%, and revenues of the steam heating department decreased 2.8%.

—Apr.

*(1) **Report, Year Ended Dec. 31, 1916,** shows income account as follows:

	1916	1915
Gross revenue.....	\$356,694	\$301,006
Net income.....	101,023	114,072

*(2) **Balance Sheet, as of Dec. 31, 1916,** shows assets of \$11,011,899 in securities, current assets of \$114,568, due from subsidiaries \$1,018,623, and deferred debits of \$47,762. Of liabilities there are \$2,500,000 7% cumulative preferred, \$2,600,000 convertible preferred and \$3,500,000 common stock. There are \$3,240,000 of bonds outstanding, current liabilities of \$281,108, reserve for acquiring minority stock of subsidiaries, \$10,700, and profit and loss surplus, \$60,985.

*(3) **Statement by President.**—It was stated April 5, 1917, that Pres. W. S. Barstow, of this company, in his annual remarks to stockholders, said, in part: "The operating revenues of all subsidiary companies during the past year have shown a steady increase, but owing to the cost of reorganization of several of the properties and operating disturbances due to the large amount of new construction work, expenses were abnormal, especially on the Pennsylvania Utilities Co.'s system. This together with the price of coal and the increased cost of labor prevented the companies from making the showing contemplated."

"While the business of the companies in 1917 will show a gain over 1916, expenses during the coming year will no doubt be proportionally increased by the higher cost of coal and labor. Although the companies have contracted for coal with reliable parties for several months to come, railroad congestion and other uncontrollable causes may necessitate the frequent purchase of coal nearer at hand at higher prices."

"Special attention has been given the coal problem and your company through the control of a coal property hopes to place its subsidiaries in a position where fuel costs can be reduced."

*(4) **New Company Planned.**—See Utilities Coal Co.—Item No. 1.

GENERAL GRAPHITE CO.

*(1) **Incorporated on Feb. 1, 1917,** in Delaware, with a capital of \$1,500,000, to mine for graphite, mica, gold, silver, copper and other metals. Incorporators: J. Standish Clark, L. A. Dorman and Martin W. Ferguson, Birmingham, Ala.

—Mar.

*(1) **Development Plans.**—It was stated March 8, 1917, that this company, Birmingham, Ala., would begin to develop

graphite property in North and South Carolina in May. It is capitalized at \$1,500,000.

GENERAL INDUSTRIES CO., NEW YORK.

*(1) **Capital Increased.**—On March 1, 1917, the company filed notice at Albany, N. Y., of an increase in shares from 30 to 12,500 shares; working capital, \$3,000 to \$300,000.

GENERAL INVESTMENT CO.

*(1) **Opposition to Bethlehem Capital Increase.**—See Bethlehem Steel Corp.—Item No. 1.

GENERAL LAUNDRIES, INC.

*(1) **Incorporated on April 27, 1917,** in New York, with a capital of \$350,000, to carry on a steam and general laundry business. Incorporators: W. Schmidt, M. Levine, W. A. Tait, 174 West 74th St., Brooklyn, N. Y.

GENERAL LUBRICATING CO.

*(1) **Merger.**—See Journal Lubricator Co., Inc.—Item No. 1 (under New Incorporations).

GENERAL MOTORS CO.

*(1) **Increased Dividend Probable in April.**—It was stated Feb. 13, 1917, that with the exception of less than 100 shares each of pfd. and common, all of the stock of the old General Motors Co. had been exchanged for the new Delaware corporation. To all intents and purposes the transfer is complete.

This means that General Motors common stockholders will be treated to a substantial increase in the dividend in April, 1917, it was stated. The initial payment of \$1 a share in January was no indication of what the regular rate was to be when the transition in corporate form is effected. It is probable that the declaration will be at least 1½% and possibly 1%.

General Motors is earning a 6% or 7% regular rate at least five times over. It is understood that two subsidiaries will announce important new models sometime in the Spring.

—Mar.

*(1) **Dividend at 60% Rate.**—Announced March 9, 1917, that this company, New Jersey, the operating company, had declared a quarterly dividend of 15% on its common and 3¼% on its pfd. stock, payable May 1 to stock of record April 12. This establishes an annual dividend rate of 60% for the common stock.

*(2) **Sales, Seven Months.**—It was stated March 9, 1917, that this company had sold during the seven months ended Feb. 28, 1917, 95,533 cars and trucks, compared with 73,057 cars and trucks for the corresponding period a year previously.

The gross sales for the seven months ended Feb. 28 totaled \$102,930,659, compared with \$86,675,712 a year previously. Undivided profits for the common stock are respectively \$16,000,984 for the seven months, as compared with \$14,981,978 for the seven months ended Feb. 28, 1916.

In arriving at the above profits, the figures for January and February, 1917, were estimated on a conservative basis.

—Apr.

*(1) **Business Increase in 1917.**—It was announced April 2, 1917, that sales and shipments of this company are running about 33¼% ahead of 1916, or at a rate which promises an output of close to 175,000 cars for its fiscal year ending with July, 1917.

Production in four months has been running at the rate of 14,400 cars a month, as against 12,600 from August to October, 1916.

All of the General Motors factories are short of freight equipment and have had to resort to wholesale "drive-outs" to keep up production. "Drive-outs" of Buicks, for instance, under their own power have been made as far as Flint to Pittsburgh by the hundreds.

JANUARY 1 TO APRIL 30, 1917

(2) March Sales of Cars and Trucks 16,968.—This company April 18, 1917, reported March sales of finished cars and trucks of 16,968, as against 13,824 a year previously.

For the eight months of its fiscal year ended March 31 General Motors shipped and sold 112,529 cars and trucks, a gain of just under 28% over the output of 86,881 for the first eight months of 1915-16.

At the rate cars are going forward from its Michigan factories General Motors by the end of April will have disposed of practically as many cars as in the entire 1916 fiscal year, 132,088. If it had not been for freight congestion this Winter interfering both with shipments and raw material consignments, General Motors would have crossed its 1916 total.

If General Motors were to do no better than to maintain the same rate of production for the full year as for the first eight months, it would show final shipments for the year of between 167,000 and 168,000.

(3) Retirement of Preferred Recommended by Directors.—Directors of this company at a special meeting April 20, 1917, adopted a resolution recommending the retirement of its pfd. stock at par and accrued interest to Aug. 1, 1917. Of the \$20,000,000 pfd. stock authorized, there is outstanding \$14,985,200 par value. A special meeting of stockholders to pass on the proposed retirement will be held May 10.

(4) Pfd. Stock to Be Retired Belongs to New Jersey Co.—On April 23, 1917, the "Wall Street Journal" said that the General Motors pfd. stock which it has been decided to retire at par and accrued dividends to Aug. 1, 1917, is of the General Motors Co. of New Jersey, the operating company, and not of the General Motors Corp., securities of which are listed on the New York Stock Exchange.

Under the plan of capital readjustment made in 1916 the 7% pfd. stock of the New Jersey Co. was exchanged for 6% pfd. stock of the new corporation in the ratio of three shares of old pfd. for four shares of new pfd. One share of old common received five shares of new common in exchange.

Most of the General Motors Co. stock has been exchanged for General Motors Corp. stock and the retirement of the old pfd. is merely technical.

Of the 149,852 shares of pfd. stock of the old General Motors Co. all but about 3,000 shares have been exchanged for pfd. stock in the new General Motors Corp.

• GENERAL MOTORS CORP.

(1) Initial Quarterly Dividends.—Announced Jan. 8, 1917, that this company, successor to the General Motors Co., had declared an initial quarterly dividend of \$1 per share on the common stock and an initial quarterly dividend of 1½% on the pfd., both payable Feb. 1 to stock of record Jan. 20.

The operating company, General Motors Co., declared the regular quarterly dividend of \$5 per share on the common stock, payable Feb. 1 to stock of record Jan. 20.

(2) Dividend Disappointment.—On Jan. 11, 1917, the "Wall Street Journal" said that the decline in the new common stock of this company since the declaration of the initial quarterly dividend showed that evidently disappointment had been felt in some quarters that only a \$4 dividend rate per annum was decided on by the directors on the \$82,559,000 common stock.

It should be remembered, however, that the present is the transition stage from the old General Motors Co. to the new General Motors Corp. To date somewhat over 70% on the old General Motors shares had been deposited under the plan for exchange into new stock. The old common receives five shares of new for every share of old, and the old pfd. receives one and one-third in new 6% pfd. for every share of old, which carried a 7% dividend rate.

The General Motors Co. had been paying dividends at the rate of 20% per annum, and this rate was continued at the meeting Jan. 8, which meant a 4% rate on the new common stock.

Once the transition from the old to the new has been completed it is expected that the dividend rate on the new stock will be advanced.

In the year ended July 31, 1916, the earnings of the General Motors Co. were equivalent to 33.4% on the amount of the new common stock. In the first four months of the current fiscal year (which is the light season in the automobile trade) the company earned net of \$9,136,000, equal to 10.5% on the new common.

Interests connected with the company confidently expect that the full year to end July 31, 1917, will show net profits of between \$35,000,000 and \$40,000,000, which would be equal to between 40% and 47% on the new common.

In other words, the company is earning its present dividend rate of 4% ten times over.

(3) Stricken from List.—Announced Jan. 23, 1917, that the New York Stock Exchange had stricken from the list this company's old pfd. and common stocks.

—Mar.

(1) Dividend at 12% Rate.—Announced March 9, 1917, that this company had declared a quarterly dividend of 3% on the common and 1½% on the pfd. stock, payable May 1 to stock of record April 12. This establishes an annual dividend rate of 12% for the common, compared with a previous rate of 4%.

GENERAL OPTICAL CO., INC. NEW YORK.

(1) Capital Increased.—On Feb. 6, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$300,000 to \$600,000.

GENERAL ORDNANCE CO.

(1) Expansion.—It was announced Jan. 27, 1917, by Gen. Mgr. Earl W. Chaffee that this company plans to enlarge the plant at a cost of \$100,000, enabling it to triple its present force of employees. Additional land is being acquired for the purpose on the Naugatuck branch of the New York, New Haven & Hartford R. R.

GENERAL PETROLEUM CO.

(1) Earnings, Six Months Ended Dec. 31, 1916.—It was announced at San Francisco April 5, 1917, that Blyth, Witter & Co., the designated fiscal agents of this company, have prepared a statement of earnings for the six months ended Feb. 28. From this it appears that the net profits for the period were \$1,870,434, and that, deducting bond interest amounting to \$149,373 and for exhaustion and depreciation, \$524,500, there remains a surplus of \$1,196,561.

There is outstanding, to the amount of \$3,212,000, pfd. stock, on which the interest for six months would be \$224,854. That would leave to be applied to the common stock \$971,041. As there is outstanding of common \$13,490,200, it may be seen that the company has actually earned 7.2% on the common stock for the six-month period.

In the acquisition of the property of the Lost Hills Development Co., General Petroleum materially increased its oil production, at the same time annexing a field of great prospective capacity. The property comprises 720 acres, containing 41 producing wells, this production being confined to a tract of about 200 acres. Since taking over the property, the General Petroleum has increased the production of Lost Hills about 25%.

General Petroleum is handling 12,000,000 barrels of oil annually. Its tank vessels are all operating and carrying to their utmost capacity. It has 316 producing wells in California.

(2) Assets Back of Note Issue.—See General Petroleum Corp.—Item No. 1.

GENERAL PETROLEUM CORP.

(1) Acquisition.—According to reports received on March 27, 1917, this company has acquired the property of the Lost Hills Development Co. This new acquisition increases the production about 1,000,000 barrels a year.

—Apr.

(1) \$1,650,000 Temporary Certificates Authorized.—The "San Francisco Chronicle," April 20, 1917, stated that California Commissioner of Corporations H. L. Carnahan had authorized Blyth, Witter & Co., San Francisco, to issue temporary certificates of the fact value of \$1,650,000, which are later to be exchanged for notes of the General Petroleum Corp. when the issue has been authorized by the stockholders of the latter company. The temporary certificates are secured by pledge of the notes of the General Petroleum Corp. to their face value.

The General Petroleum note issue will be secured by a deed of trust covering oil properties in Kern County, recently purchased from the Lost Hills Development Co., and by the general assets of the General Petroleum Co.

GENERAL RY. SIGNAL CO.

(1) Earnings Statement, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross	\$354,960	\$23,952
Net	247,984	1108,512
Bal. aft. pfd. divs.	127,984	1223,512
Def. after com. divs.	52,016	408,512

(2) Earnings on Stock.—It was stated March 12, 1917, that this company's 1916 balance after pfd. dividends of \$127,984 is equal to 4.26% on the \$3,000,000 common stock.

(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$651,104, compared with \$767,720 Dec. 31, 1915.

GENERAL REFINING & PRODUCING CO.

(1) Reorganization.—It was announced Feb. 2, 1917, that ex-Gov. John A. Dix, of New York, had organized this company, with an authorized capital of \$1,250,000, of which \$950,000 is issued, to absorb the Nashville Refining Co. plant, Nashville, Tenn., which is to be enlarged and the business extended.

Mr. Dix and his associates have 5,000 acres in the Scotsville district, Allen County, Ky., and the oil from 12 wells is shipped to Nashville. Judge Howard Hendrickson, Albany, N. Y., is Vice-Pres. and Treas.; Samuel Baer, formerly with the Tide Water Oil Co., Bayonne, N. J., is Mgr.

GENERAL ROOFING & MANUFACTURING CO.

(1) Increased Dividend on Common.—Announced Jan. 15, 1917, that a dividend of 2% was paid on the common stock of this company on this date. The last previous payment was 1½%.

—Mar.

(1) Sale.—See Certain-Teed Products Corp.—Item No. 3.

GENERAL SAFETY APPLIANCE CO., SPOKANE, WASH.

(1) Incorporated on Jan. 31, 1917, in Washington, with a capital of \$500,000. Incorporators: Carl Uhden, Thomas G. Aston, Robert A. Koontz, James W. Williams and Frank V. Smith.

GENERAL SECURITIES CO.

(1) Capital Increased.—On April 7, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$2,500,000 to \$5,000,000.

GENERAL SHIPBUILDING & AERO CO., INC., DOVER, DEL.

(1) Incorporated in April, 1917, in Delaware, with a capital of \$1,500,000, to build airships of all kinds.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

GENERAL SILICA CO.

¹(1) Incorporated on April 2, 1917, in Delaware, with a capital of \$1,000,000, to produce, grind and mine for silica, feldspar, etc. Incorporators: Paul Hyde, C. I. Shaffer and John W. Pitt, all of Chicago, Ill.

GENERAL UTILITIES & OPERATING CO.

¹(1) Capital Increased.—On April 14, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$1,500,000 to \$3,000,000.

GENESEE RIVER R. R. CO.

¹(1) Application to List.—See Erie R. R. Co.—Item No. 4.

GENEVA CUTLERY CO., GENEVA, N. Y.

¹(1) Capital Increased.—On April 21, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$60,000 to \$600,000.

GENEVA FURNACE CO., INC.

¹(1) Merger.—See Phillips & Clark Stove Co., Inc.—Item No. 1.

GENEVA, SENECA FALLS & AUBURN R. R.

¹(1) To Revise Fare Schedule.—On March 29, 1917, this company was authorized by the New York Public Service Commission for the Second District to revise the schedule of fares and put a new fare zone in effect. The Commission held that "the figures given lead irresistibly to the conclusion that the revenues of the company are insufficient to yield a fair rate of return on the value of the property used in public service and that the company is justified in its effort to increase its revenue." The company has paid no dividends since June, 1909, has been able to set up no depreciation reserve, and its surplus is insignificant. The Commission found that the interest charges of the company are not excessive.

GENOA RUBBER MANUFACTURING CORP., CHICAGO.

¹(1) Capital Increased.—On Feb. 10, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$1,000,000 to \$2,500,000.

GEORGIA RY. & ELECTRIC CO.

¹(1) Bond Issue Authorized.—See Georgia Ry. & Power Co.—Item No. 1.

GEORGIA RY. & POWER CO.

¹(1) Accumulated Dividends.—It was announced Jan. 8, 1917, that this company had provided for the payment of the 24%, or \$480,000, accumulated dividends on its 1st pfd. stock, by the declaration of 3% in cash and 21% in non-interest-bearing scrip, both payable Jan. 15 to stockholders of record Jan. 5. The scrip will mature at the rate of 1¼% on \$30,000 each six months, beginning July 1, 1917, and ending Jan. 1, 1925.

The issue of the scrip must be approved by the Georgia Railroad Commission.

¹(2) Status.—It was stated Jan. 8, 1917, that the credit balance of this company to profit and loss Oct. 31, 1916, was \$2,151,821. No dividend has been paid on the first pfd. stock since Dec. 31, 1912. The Georgia Railroad Commission has been asked by the company to approve the issue of \$450,000 5% first and refunding mortgage bonds, and \$238,000 5% refunding and improvement bonds, the latter being an obligation of the Georgia Ry. & Electric Co. The issue of these bonds would make \$13,500,000 Georgia Ry. & Power 1st and refunding bonds and \$4,432,000 Georgia Ry. & Electric refunding and improvement bonds outstanding.

Georgia Ry. & Power has acquired all the interests of the Franklin Light & Power Co., Broad River Power Co. and the J. B. McCrary Co., at Hartwell, Ga. The output of the hydro-electric plant at Tallulah Falls for November, 1916, was 14,500,100 kilowatt hours, compared with 11,771,500 for October, 1916, and 14,450,100 kilowatt hours in November, 1915.

Jan. 1 the new wage scale of the company became effective, increasing payrolls about \$50,000 a year.

¹(3) Earnings— 1916 1915
Dec. gross..... \$670,793 \$639,191
Net after taxes..... 297,622 297,935
12 mos. gross..... 6,985,709 6,507,657
Net after taxes..... 3,076,930 2,795,576

—Feb.

¹(1) Bond Issue Approved.—It was announced Feb. 6, 1917, that the Georgia Railroad Commission had approved the application of this company for the issue and sale of \$450,000 in bonds and also that of the Georgia Railway & Electric Co., a subsidiary, for the issue and \$238,000 in bonds.

The commission did not at the same time pass upon the application of the Georgia Ry. & Power Co. to issue \$420,000 in non-interest-bearing scrip to pay the accumulated dividends upon its first pfd. stock.

—Mar.

¹(1) Georgia Commission Ruling on Scrip.—It was stated March 13, 1917, that the Georgia Railroad Commission had held that it has no authority to authorize this company to issue \$420,000 in scrip to liquidate the accumulated dividends on its 1st pfd. stock. The commission held that it has power only to approve the issue of notes or evidences of indebtedness for the acquisition of new properties, construction and equipment of new plants, for extensions of service or for the discharge or refunding of obligations. The commission holds that there is no necessity for the issue of the scrip to pay the dividends.

The board of the company in December declared a dividend of \$60,000 in cash and \$420,000 in scrip to pay the accumulated dividends on the 1st pfd. stock and the commission does not take issue with the statement of the directors that a sufficient surplus has been earned to justify the payment of the dividends, but does state that it hesitates to give its approval to a plan which "would convert corporate profits in long-term corporate debts."

As the dividends have been declared by the company, \$60,000 in cash and \$420,000 in the scrip redeemable \$30,000 each six months, it is probable that the dividends will be paid as planned, but without the issue of the scrip, which would have enabled the stockholders to realize on their dividends in advance of the payment of the scrip.

GEORGIA TERMINAL CO.

¹(1) Valuation Hearings Scheduled.—See Texas Midland R. R.—Item No. 2.

GERMAN ALLIANCE INSURANCE CO., NEW YORK.

¹(1) Capital Increased.—On March 28, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$400,000 to \$1,000,000.

GERMAN-AMERICAN BANK, NEW YORK.

¹(1) Extra Dividend.—Announced Jan. 18, 1917, that this bank had declared the regular semi-annual dividend of 3% and

JANUARY 1 TO APRIL 30, 1917

an extra of 1%, payable Feb. 1 to stock of record Jan. 20.

GERMAN-AMERICAN STONEWARE WORKS, KEASBEY, N. J.

¹(1) Capital Increased.—Change in Name.—It was announced March 23, 1917, that this company, manufacturers of sanitary porcelain and magnesite materials, had increased its capital stock from \$450,000 to \$2,000,000 for extensions. The company has also filed notice of change of corporate name to the General Ceramics Co.

GERMAN-AMERICAN SUGAR CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

¹(1) Stock Dividend.—Announced April 10, 1917, that this company had declared a stock dividend of 100%.

¹(3) Change in Name.—It was announced at Bay City, Mich., April 13, 1917, that stockholders had voted to change the name of this company to the Wolverine Sugar Co. This was done because of difficulty in obtaining seed from Russia and the British possessions, the old name militating against the business outside of the United States.

The company was originated as a co-operative concern by German-American farmers and for several years its stock went begging. Then the management was reorganized, and for several years it has paid satisfactory dividends.

¹(4) Report, Year Ended Dec. 31, 1916, shows a surplus of \$2,044,781.43, while the capital stock outstanding is only \$1,500,000. Total assets are given at \$512,649.55. Reserve for depreciation totals \$718,786.20.

It is stated that owing to inability to operate plants to capacity because of climatic conditions, freight car shortage and higher wages, the cost of manufacturing was increased 25%. Sufficient seed beet is held in warehouses for the 1917 and 1918 planting, the report says, and sufficient beet seed has been contracted for 1919.

The amount of acreage that will be planted for the Bay City plant has not yet been let for 6,650 acres at the Bay City plant.

GERMAN ARTISTIC KNITTING CO.

¹(1) Damage by Explosion.—On Jan. 12, 1917, it was stated that the plant of this company, a mile north of the duPont powder plant at Haskell, N. J., was wrecked by the explosions in the latter plant on that date. The damage to the knitting mill was estimated at \$75,000. Three hundred workers were employed.

GERMANIA BANK, NEW YORK.

¹(1) New Director.—Announced Jan. 10, 1917, that at the annual meeting of stockholders of this bank Frank Gulden was elected a director to succeed his father, Charles Gulden, deceased. Retiring directors were re-elected.

¹(1) Capital Increased.—On April 19, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$400,000.

GETCHELL MINES & DEVELOPMENT CORP.

¹(1) Incorporated on Feb. 13, 1917, in Delaware, with a capital of \$5,000,000, to acquire lands for the development of minerals of all kinds, lay pipe lines for oils, etc. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

GIBNEY TIRE & RUBBER CO.

¹(1) In Involuntary Bankruptcy.—On April 26, 1917, the "Philadelphia Public Ledger" stated that this company, of

Conshohocken, Pa., had been petitioned into involuntary bankruptcy by creditors in the United States District Court in Philadelphia. Creditors with claims aggregating \$185,000 base their petition on an alleged admission of insolvency made by the corporation through a resolution adopted by the Board of Directors.

The petitioners and their claims are: Blake Bros. & Co., of New York, \$80,000 on notes; Edward Maurer & Co., Inc., New York, \$32,851.32, on notes and for alleged breach of contract, and Tradesmen's National Bank of Conshohocken, \$2,378.66, on notes.

The Gibney company incorporated several years ago and is capitalized at \$300,000. The liabilities are said to total \$800,000, with assets several hundred thousand dollars less.

GIBSLAND OIL MILL & FERTILIZER CO.

¹(1) Merger.—See Henderson Oil Mill Co.—Item No. 1.

GIBSON ART CO., CINCINNATI, O.

¹(1) Incorporated on Feb. 28, 1917, in Ohio, with a capital of \$300,000, to deal in art goods. Incorporators: Anson C. Fry, Edwin P. Gibson, Chas. A. J. Walker, Wm. H. Gibson and James E. Mills.

GIER PRESSED STEEL CO.

¹(1) Capital Increased.—On Jan. 18, 1917, the company filed notice at Lansing, Mich., of an increase in capital stock from \$500,000 to \$1,000,000.

GIFFORD-COBALT MINES, LTD.

¹(1) Development.—On Jan. 20, 1917, it was stated that Charles Spearman, mining engineer, in writing to the Pres. of this company, said: "In the last samples of ore sent there was a great deal of ruby silver. This is a sure indication of the silver to be found at a lower depth, and there is every reason to believe that when you locate at a lower depth the promising veins recently cut in your shaft they will carry high silver values."

GILA CANON CONSOLIDATED COPPER CO.

¹(1) Operations.—It was announced March 12, 1917, that this company had reported a strike of sulphide ore, samples of which run 7.8% copper, \$2 in gold, and nearly one ounce silver per ton. This property of 16 claims, 330 acres, is in the Troy district, Gila County, near the properties of the Troy-Arizona Copper Co. The property has been quiet under development for 4½ years, and it is understood that ore shipment to the nearby Hayden Smelter coming out of development work has been sufficient to defray the cost of the work. There are 1,000,000 shares, par \$1.

GILA COPPER SULPHIDE CO.

¹(1) Report Shows 332,420 Tons of Ore in Sight.—A detailed report on this company by mining engineer Brooke, formerly with the American Smelting & Refining Co., stated the "Boston Evening Transcript," April 25, 1917, shows that there are 332,420 tons of ore actually in sight; ore reasonably assured, 338,800 tons, and probable ore, 6,233,710 tons. The tests of ore taken from various levels and drifts show assays averaging 2.7% copper and he adds that the copper contents of the entire tonnage will run 3% or better.

GILE MOTOR CO., BOSTON.

¹(1) Incorporated on Jan. 23, 1917, in Massachusetts, with a capital of \$500,000. Directors: C. H. Hutchinson, Pres.; Herbert A. Palmer and Joseph F. Warren.

GILL GLASS CO., INC., MILLBROOK, N. Y.

¹(1) Incorporated on Feb. 10, 1917, in New York, with a capital of 3,000 shares, \$100 each; 7,000 shares, no par value; to carry on business with a capital of

\$335,000; to deal in glass, glassware, electric light goods, molds and tools. Incorporators: J. F. Fitzharris, M. C. Wilson and F. D. Gill, East York and Thompson Sta., Philadelphia, Pa.

—Apr.

¹(1) New Plant.—The "Iron Age" April 19, 1917, stated that this company, Philadelphia, had awarded the contract for a new plant to cost \$250,000. The works will consist of five buildings.

GILS COPPER SULPHIDE CO.

¹(1) February Profits Estimated.—On April 14, 1917, the "Boston Daily Advertiser" said that the estimated profits of this company for February, after deducting all operating and smelting charges, were at the rate of 30% per annum on the outstanding stock.

GISCOME LUMBER CO., LTD.

¹(1) Incorporated on April 13, 1917, in Canada, with a capital of \$1,000,000, divided into 10,000 shares of \$100 each, to acquire timber licenses, timber leases and timber lands, etc. Incorporators: Wm. Stuart Lane, Jas. Hill Lawson, Roy Wilfrid Ginn, Laura Lavina McGhee and Josephine Viva Keay Lander. Chief place of business, Glacome, B. C.

GLAMORGAN LIGHT & POWER CO.

¹(1) Merger Planned.—See Old Dominion Power Co.—Item No. 2.

GLASSOCLEAR CORP.

¹(1) Incorporated on Feb. 28, 1917, in New York, with a capital of \$500,000, to deal in chemical products, auto equipment, wind shields and store fronts. Incorporators: A. S. Klein, J. I. Lasaroe and L. Frasin, 321 West 92d Street, New York.

GLENCOE WOOLEN CO.

¹(1) Taken Over.—See Glencoe Woolen Mills, Inc.—Item No. 1.

GLENCOE WOOLEN MILLS, INC.

¹(1) New Company Organized.—It was announced Feb. 21, 1917, that this company had been organized with a capital of \$400,000 to take over the plant and assets of the Glencoe Woolen Co. Eli Gledhill is Pres. Men's wear and overcoatings are to be made.

GLEN COVE BANK, OF GLEN COVE, N. Y.

¹(1) Capital Increased.—On March 1, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,312,500 to \$1,500,000.

GLEN ELLEN COAL CO., SEATTLE, WASH.

¹(1) Incorporated on Jan. 2, 1917, in Washington, with a capital of \$1,000,000. Incorporators: R. J. Logan and Earl W. Husted.

GLENLYON DYE WORKS.

¹(1) Capital Decreased.—Announced at Sayersville, R. I., April 6, 1917, that this company had decreased its capital from \$1,000,000 to \$10,000,000.

GLEN MOTOR TRUCK & TRAILER COEP.

¹(1) Incorporated on March 30, 1917, in Delaware, with a capital of \$3,000,000 to manufacture automobiles, trailers, etc. Incorporators: Arthur W. Britton, S. B. Howard and L. H. Gunther, all of New York.

GLENROSE OIL CO.

¹(1) Incorporated in April, 1917, in Oklahoma, with a capital of \$260,000. Incorporators: Roy E. Burke, H. E. Kelly and E. M. Butler.

GLENWAY LOAN & DEPOSIT CO., CINCINNATI, O.

¹(1) Capital Increased.—On Feb. 7, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$2,000,000 to \$3,000,000.

JANUARY 1 TO APRIL 30, 1917

GLOBE DOMINION COPPER CO.

¹(1) **Operations Planned.**—It was stated Feb. 23, 1917, that this company, a prospect, lying adjacent to the Old Dominion, Iron Cap and Superior & Boston properties in Arizona, and of which James H. Barr, of the National Supply Co., is Pres., had assembled on the property all the machinery necessary to begin active development operations.

The company was recently organized under the laws of Arizona, with an authorized capital of 1,500,000 shares of \$1 par value each. There are outstanding 975,000 shares. There are no bonds.

Sidney H. Ball, a mining geologist, who has inspected and made a report on the company's claims, which comprise 400 acres, states that the geological conditions justify a systematic development of the property, and that beneath the surface of the holdings there are certainly from 1,500 to 1,700 feet of sedimentary rocks, such as in the Old Dominion mine, containing ore.

The property is less than two miles from Globe, and is served by the Arizona & Eastern Ry. The Arizona Commercial Co.'s broad-gauge railroad runs one mile to the west and the broad-gauge line of the Arizona & Eastern runs one mile to the east of the property.

²(2) **Operations.**—Announcement was made March 9, 1917, of the flotation of this company, whose property adjoins that of the Old Dominion Copper Co. Work already done shows the veins commercially productive, according to the report of Sydney H. Ball, mining geologist. The company is starting preliminary work to sinking a shaft 600 feet deep and to drift on the 300 and 600-foot levels.

GLOBE GROCERY STORES.

¹(1) **Operations.**—See Jones Bros. Tea Co., Inc.—Item No. 1.

GLOBE OIL & REFINING CO.

¹(1) **Incorporated** on Feb. 14, 1917, in Oklahoma, with a capital of \$500,000. Incorporators: D. S. Smithisier and Guy S. Manatt, of Enid, and A. T. Bontz, Wichita, Kan.

GLOBE TRUCK CO.

¹(1) **Taken Over.**—See Porter Body Co.—Item No. 1.

GLOVERSVILLE KNITTING CO.

¹(1) **Capital Increased.**—It was announced Feb. 8, 1917, that this company, Gloversville, N. Y., had increased its capital stock from \$100,000 to \$250,000.

²(2) **Capital Increased.**—On Feb. 13, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$100,000 to \$250,000.

GORTZ CO., CHICAGO.

¹(1) **Capital Decreased.**—On Dec. 27, 1916, the company filed notice at Springfield, Ill., of a decrease in capital stock from \$300,000 to \$25,000.

GOGEBIC & IRON COUNTIES RY. & LIGHT CO.

²(1) **New Owners.**—See Ironwood & Bessemer Ry. & Light Co.—Item No. 1.

GOLCONDA CONSOLIDATED MINES.

⁴(1) **Sold to Union Metals Corp.**—The "Los Angeles Daily Times" April 9, 1917, stated that stockholders of this company at a special meeting in Phoenix, Ariz., accepted the proposition of the Union Metals Corp. to take over the Golconda properties. This means that every Golconda shareholder will receive share for share in Union Metals Corp.

GOLD CUP MINING CO.

⁴(1) **Drift Heading Toward Buckeye Shaft.**—On April 23, 1917, the "Boston Mining Transcript" said: "The Boston office of the Gold Cup Mining Co. is in receipt of advice that the drift from the 165-foot level of the main working shaft continues to look good and from

three to five tons of ore is hoisted daily. This drift is heading directly for the Buckeye shaft, 425 feet away. A recent shipment from the Buckeye returned \$102.50 per ton concentrating and \$94.92 per ton smelting ore. An assay of ore from the drift in the main shaft shows better than \$85 per ton."

GOLDFIELD CONSOLIDATED MINES CO.

¹(1) **Production, November, 1916.**—It was announced Jan. 2, 1917, that this company in November produced 30,000 tons of ore, from which \$15,137 net was realized. Development work during the month aggregated 1,705 feet, at a cost of \$5.63 a foot.

—Feb.

²(1) **Production, December, 1916.**—Announced Feb. 3, 1917, that this company in December, 1916, produced 28,000 tons of copper.

—Mar.

²(1) **Production, January, 1917.**—Announced March 9, 1917, that this company in January produced 26,500 tons, from which net realization of \$19,503 resulted.

—Apr.

⁴(1) **Report, Year Ended Dec. 31, 1916.** shows the company earned \$452,734 net in 1916 from the milling of 338,880 tons of \$7.52 ore, or a gross assay value of \$2,548,428. This compares with \$1,558,308 net from 390,054 tons of \$10.51 ore in 1915.

⁴(2) **Production, February, 1917.**—Announced April 4, 1917, that this company in February produced 21,000 tons of ore, amounting to \$19,220 net.

⁴(3) **February Production and Earnings.**—In February, 1917, this company produced 21,000 tons of ore, compared with 29,000 tons last year and 26,500 tons in January, 1917. Net earnings in February totaled \$19,220, against \$60,000 last year and \$19,066 in January, 1917.

GOLDFIELDS MINING CO.

¹(1) **Development.**—On Jan. 13, 1917, the company issued the following notice:

"Development on Goldfields' property is making good headway. Work is being pushed day and night. The rich ore encountered some weeks ago is still holding. This property has been looked upon as low-grade, but the high-grade ore now being mined is giving it a different aspect."

GOLDMAN (C.) & CO., INC.

²(1) **Capital Stock Increased.**—On March 29, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$1,000,000.

GOLD REEFS MINING CO.

⁴(1) **Opening of Second Vein Planned.**—The "Toronto World" April 21, 1917, stated that this company had received a report from Mgr. Wright at the mine stating that the work had been carried on underground since the Fall of 1916 on a high-grade vein, and a large amount of ore stoped out. A clean-up will be made on this in May. He stated that only the high-grade will be shipped and the \$10 and \$12 ore will be reserved on the property for treatment there.

Another fine quartz vein has been discovered high in sulphite five feet wide.

GOLDWYN DISTRIBUTING CORP., MANHATTAN, N. Y.

⁴(1) **Incorporated** on April 19, 1917, in New York, with a capital of \$1,000,000, to engage in a motion picture, printing and publishing business. Incorporators: S. Goldfield, G. L. Hess and A. Selwyn, 1451 Broadway, New York.

GOODRICH (B. F.) CO.

¹(1) **Tire Price Advance.**—Announced Jan. 2, 1917, that this company had made advances in the prices of tires, ranging from 5% to 15%, and applying only to cases. No advances in tubing will be ordered.

¹(2) **Comment on Price Advances.**—See United States Rubber Co.—Item No. 3.

¹(3) **Sales, 1916.** It was stated Jan. 8, 1917, increased more than 30% over 1915. Inasmuch as sales for the twelve months ended Dec. 11, 1915, were approximately \$56,000,000, this means a gross in the year of at least \$73,000,000.

¹(4) **Statement by President.**—How the largest rubber factory in the world, with more than 16,000 employees, solved the problem of efficient management and delivered the responsibility largely from one man upon an operating committee of ten of its executives was disclosed by Pres. B. G. Work, of this company, who was quoted Jan. 9, 1917, as saying:

"During the past two years we have many times been impressed with the necessity for evolving some plan by which our huge Akron factories, with their army of workmen, might be readjusted to meet a plan of management which would relieve myself and the board of directors from a growing mass of detail work. With more than 60 departments, each making a number of different rubber products, it was imperative that our plan must embrace the major portion of these if it were to be a success.

"While we regarded the operating committee plan as an unusual departure, the more we considered it the more practical of all solutions it seemed. Certainly an entire group of executives could more intelligently handle the many details pertaining to their respective departments if they each had the advice or counsel of the other men equally responsible.

"Our new plan has been working slightly more than two months now and the results that have accrued leave no doubt in my mind that we have solved an important problem for ourselves."

¹(5) **Merger Denied.**—See United States Rubber Co.—Item No. 10.

¹(6) **Preliminary Report, Estimated.**—It was stated Jan. 20, 1917, that a preliminary report covering operations for 1916 would be ready for stockholders the week of Jan. 21.

For the year ended Dec. 31, 1915, the company earned 17% for its \$60,000,000 common stock, after pfd. dividends. This compared with 5.6% in 1914. For 1916 it is expected that net will fall below 1915. In the first six months net equalled about 6¼% for the common. Important interests connected with the company, it is understood, will be satisfied if the closing six months show up as well as the first half of the year, which would mean 13% for the year for the common shares.

Sales for 1916 are expected to show in the neighborhood of \$73,000,000, as compared with less than \$56,000,000 in 1915. This is a gain of 30%. This shows that Goodrich, like other rubber goods manufacturers, suffered severely from the sharp advance in crude rubber, fabric and other raw materials that go into the manufacture of rubber goods.

¹(7) **Dividends.**—Announced at Akron, O., Jan. 24, 1917, that directors of this company had declared a dividend of 3¼% on the pfd. stock, payable 1¼% April 2 and 1¼% July 2. A quarterly dividend of 1% was declared on the common, payable May 15.

²(8) **Stock Retirement.**—It was announced Jan. 24, 1917, that the directors of this company had voted, subject to the approval of the stockholders at their annual meeting March 14, to retire 9,000 shares of pfd. stock prior to July 1, 1917. This will make a total retirement of 36,000 shares, covering the charter provision.

¹(9) **Net Profits, Year Ended Dec. 31, 1916.** It was stated Jan. 24, 1917, amounted, approximately, to \$9,550,000. This amount, added to the surplus carried over Dec. 31, 1915, \$10,580,000, shows undivided profits of approximately \$14,900,000, after deducting dividends and making the following provisions: \$700,000 for the redemption of pfd. stock; \$121,400, representing the

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

reduction of pfd. stock purchased from cost to par, and a further amount of \$100,000 appropriated for pension fund.

B. G. Work, Pres. of the company, explained that the net earnings of 1916 were less than those of 1915 because the advances in selling prices had not kept pace with rapidly increasing costs.

—Feb.

(1) Pfd. Stock Retirement.—It was stated Feb. 9, 1917, that at a meeting the directors of this company voted, subject to the approval of the stockholders at their annual meeting March 14, 1917, to retire 9,000 shares of pfd. stock prior to July 1, 1917, making a total retirement of 36,000 shares, covering the charter provision for the retirement of pfd. stock prior to July 1.

(2) Report, Year Ended Dec. 31, 1916. shows net earnings of \$9,568,764, against \$12,265,679 in 1915. Net sales in 1916 amounted to \$70,990,781, compared with \$55,416,868 in 1915, a gain of 28%. After the payment of \$1,911,000 in pfd. dividends, there remains a surplus of \$7,657,764, equal to 12.76% on the \$60,000,000 common stock, compared with 17.17% earned on same stock in 1915.

(3) Consolidated Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net sales	\$70,990,782	\$55,416,868
Net profit	10,614,910	13,058,648
Bal. after chgs. and pfd. divs.	7,657,764	10,317,558
Surp. after com. divs.	4,336,299	7,405,630

(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$14,919,888, compared with \$10,583,590 Dec. 31, 1915.

(5) Statement by President.—It was announced Feb. 28, 1917, that Pres. B. J. Work, of this company, in his annual remarks to stockholders, said in part: "The net sales for 1916 amounted to \$70,990,781, as compared with \$55,416,868 for 1915, representing a gain of 28%. This gain was due to increases in all departments of the business.

"The decrease in net earnings was largely due to the fact that advances in selling prices did not keep pace with rapidly increasing costs. Not only materials and labor, but also practically all expenses incident to the conduct of the business were upon a higher scale of costs than during the previous year.

"The directors have voted, subject to the approval of the shareholders, to retire 9,000 shares of the pfd. stock. This is in accordance with the provision of the company's charter which provides for the retirement of a minimum of 9,000 shares of pfd. stock each year, beginning with July, 1914. After this year's retirement there will remain outstanding \$26,400,000 pfd. stock.

"The increase in bills payable shown on the balance sheet is due to a large increase in inventories which was made necessary on account of increased volume of business, congested condition of markets and delays in transportation.

"The company has added to its plant account during 1916 extensions and equipment costing \$3,519,549. Beyond completing the work under construction, no further important plant extensions are planned at present.

"From the surplus at Dec. 31, 1916, the directors voted to set aside \$700,000 for the redemption of pfd. stock, together with \$121,465, representing the reduction of pfd. stock purchased, from cost to par, and a further amount of \$100,000 appropriated for addition to the pension fund."

—Mar.

(1) Pfd. Stock Reduction.—It was announced March 1, 1917, that a special meeting of this company's stockholders would be held March 14, 1917, to provide for a reduction in the authorized pfd. stock from \$27,300,000 to \$26,400,000.

(2) New Officers.—It was stated March 9, 1917, that O. D. Brown had been

elected Treas. of this company to succeed W. A. Means, who was elected 2d Vice-Pres. Mr. Brown was formerly cashier of the First-Second National Bank, Akron, O.

(3) Government Order.—See Curtiss Aeroplane & Motor Corp.—Item No. 2.

(4) New Officers.—It was announced March 14, 1917, that at the meeting of this company's directors subsequent to the annual stockholders' meeting, the old officers were re-elected with the following exceptions: C. B. Raymond and W. A. Means were elected 2d Vice-Pres; Guy E. Norwood, Sec'y and Asst. Treas.; L. B. Brown, Treas. and J. C. Lawrence, Asst. Treas.

The executive committee consists of the following: B. G. Work, A. H. Marks, H. E. Raymond, E. C. Shaw, C. B. Raymond, W. A. Means and A. B. Jones.

L. B. Brown and F. C. Van Cleef were added to the operating committee.

(5) Retirement of Preferred Stock Authorized.—It was announced March 14, 1917, that stockholders of this company at a special meeting voted to retire an additional \$900,000 of pfd. stock. This leaves the authorized and issued pfd. stock at \$26,400,000.

—Apr.

(1) Capital Reduced.—On April 2, 1917, the company filed notice at Albany, N. Y., of a reduction in capital stock from \$87,300,000 to \$86,400,000.

GOODYEAR TIRE & FABRIC CO.

(1) Stock Sale.—See Goodyear Tire & Rubber Co.—Item No. 2.

GOODYEAR TIRE & RUBBER CO.

(1) Tire Price Advance.—Announced Jan. 2, 1917, that this company had ordered an advance of 15% in tire prices.

(2) Comment on Price Advance.—See United States Rubber Co.—Item No. 3.

(3) Merger Denial.—See United States Rubber Co.—Item No. 10.

—Mar.

(1) Stock Issue—Stockholders' Rights.—It was announced at Akron, O., March 1, 1917, that this company would issue \$6,000,000 of new pfd. and \$3,370,000 of the unissued common. The pfd. has been disposed of to banking interests and the new common will be offered to stockholders pro rata, each being permitted to subscribe to 20% of his holdings.

The company has an authorized capital of \$50,000,000, half common and half pfd. Of this only \$35,000,000 has been issued, this being divided equally.

Pres. F. A. Seiberling says the additional capital is sought because a larger stock of raw material is required. He expects gross sales during 1917 will exceed \$100,000,000.

(2) Stock Sale.—It was announced March 6, 1917, that the new issue of \$6,000,000 of this company's pfd. stock had been sold to Borton & Borton, of Cleveland. It is understood that proceeds from the sale of this block of stock will be used to pay for fabric mills in Connecticut purchased by Goodyear. The fabric end of the business will be handled by a new corporation recently formed under the name of the Goodyear Tire & Fabric Co.

(3) Government Order.—See Curtiss Aeroplane & Motor Corp.—Item No. 2.

(4) Earning Rate—Stock Issue.—It was stated March 12, 1917, that this company's sales are running 70% ahead of a year previously, and there is a good prospect that gross for the fiscal year to end Oct. 31, 1917, will total \$100,000,000. Gross for the 1916 fiscal year was just under \$64,000,000.

In 1916 the company put a large amount into plant extension to keep pace with the growth of business and provide storage facilities for adequate quantities of raw material. This, combined with the necessity of carrying much larger supplies of raw material than formerly, has made necessary a

new issue of \$6,000,000 additional pfd. and \$3,370,000 common.

(5) Net of \$10,000,000 Estimated for Current Year.—On March 23, 1917, the "Boston News Bureau" said that, based on the rate of increase for the nearly five months which already had elapsed, it was estimated that this company's net earnings would reach \$10,000,000 for the fiscal year ending Oct. 31, 1917. The company has completed some stock financing, however, so that the percentage earned for the common stock will not show an equivalent increase.

On the enlarged capitalization of \$23,143,200 7% pfd. and \$20,870,000 common, net for the year of \$10,000,000 will mean a balance of more than \$40 a share for the common stock. In the previous year net earnings were slightly in excess of \$7,000,000, equal to 35.6% on \$17,500,000 common stock after pfd. dividends.

Gross is already running at the rate of \$100,000,000 a year, although 70% of the year's sales come in the warm months, April to October, inclusive.

—Apr.

(1) Clubhouse for Employees.—It was announced April 7, 1917, that this company would build a \$450,000 clubhouse for the educational, social and athletic activities of its employees, at Akron, O.

GOODYEAR YELLOW PINE CO., CHICAGO.

(1) Capital Increased.—On Feb. 9, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$2,000,000 to \$3,000,000.

GORDON TIRE & RUBBER CO.

(1) Capital Increase.—On March 3, 1917, the company filed notice at Springfield, O., of an increase in capital stock from \$600,000 to \$1,600,000.

GORHAM MANUFACTURING CO.

(1) Stock Increased.—It was announced March 19, 1917, that the shareholders of this company had ratified the proposed increase of the authorized pfd. stock from \$2,000,000 to \$3,000,000, the new stock to be offered at par pro rata to shareholders of record at the time of the issue.

GOSSARD (H. W.) CO., INC.

(1) Incorporated on Feb. 6, 1917, in New York, with a capital of 5,000 shares, \$100 each; 25,000 shares, no par value; to carry on business with \$1,250,000 in corsets, accessories and ladies' clothing. Incorporators: S. L. Gossard, F. E. Fehlman and I. Niner, 160 Broadway, New York.

(2) Report, Six Months Ended Dec. 31, 1916, shows gross sales of \$1,331,030 and net profits of \$120,533. The earnings were at the rate of over 6% times the dividend requirements on the \$500,000 7% cumulative pfd. stock to be issued. After allowing for pfd. dividends the net earnings for the six months were at the rate of \$8.24 per share on the new common stock.

(3) Balance Sheet, as of Dec. 31, 1916, shows cash amounting to \$68,021 and total assets and liabilities of \$1,727,842.

GOULD PAPER CO.

GRARLER MANUFACTURING CO., CLEVELAND, O.

(1) Capital Increased.—On April 20, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$300,000 to \$3,000,000.

GRACE HARBOR LUMBER CO., DETROIT, MICH.

(1) Capital Stock Increase.—It was announced March 9, 1917, that this company had increased its capital stock from \$140,000 to \$300,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

GRACE RUSSIAN CO.

¹(1) Incorporated on Jan. 5, 1917, in Delaware, with a capital of \$1,000,000, to conduct the business of domestic and foreign merchants. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

GRAFTON & UPTON R. R.

¹(1) Bond Issue Approved.—Announced Jan. 3, 1917, that the Massachusetts Public Service Commission had approved an issue of \$250,000 5% 25-year bonds of this company. Issue is to refund notes maturing June 1, 1917, and bears date of Jan. 1, 1917. Notes were to fund a similar bond issue maturing in 1912.

GRAMM-BERNSTEIN MOTOR TRUCK CO., LIMA, O.

⁴(1) Capital Decreased.—Announced April 7, 1917, that this company had decreased its capital stock from \$4,000,000 to \$1,500,000.

GRANBY CONSOLIDATED MINING, SMELTING & POWER CO., LTD.

¹(1) Earnings, Five Months.—On Jan. 2, 1917, it was stated that this company for the first five months of its new fiscal year earned \$2,400,000, figuring its unsold copper at 25 cents a pound. Subsequent copper transactions at a higher price actually raised the earnings to about \$2,600,000 for the period to Dec. 1. This was at the rate of about \$6,000,000 for a full year.

Granby should have no difficulty in maintaining its new dividend rate of \$10 per annum. Granby has only 149,976 shares.

Development work at the Hidden Creek property is showing excellent results. Production all comes from above the tidewater level, below which it is thought another large mine exists.

¹(2) Production, December, 1916.—Announced Jan. 13, 1917, that this company in December produced 2,395,810 lbs. of copper at Anyox and 823,212 at Grand Forks, making a total for the month of 3,219,022 lbs. In November the total production was 4,151,001 lbs.

¹(3) Comment on December Production.—On Jan. 17, 1917, the "Wall Street Journal" said that this company's December copper production of 3,219,022 pounds was 831,979 pounds less than November output. This curtailment of production was chiefly due to the severe weather experienced at the Granby property.

In order to counteract the effect of the cold weather during the Winter months the directors of Granby Consolidated authorized the construction of an auxiliary power plant at the Hidden Creek Smelter, and hoped to have it in operation by Dec. 1, 1916. The steel company that contracted for the necessary materials failed to make specified deliveries, with the result that the power plant was not constructed on time.

A record year is predicted for Granby Consolidated during 1917. As production in December showed a gain of about 900,000 pounds over December, 1916, and Granby is fast taking steps to offset the ill-effect of Winter, the January production should be approximately 4,000,000 pounds of copper, or about 1,000,000 pounds over output of January, 1916.

Total production for the 12 months of 1916 was over 44,500,000 pounds of copper. On the basis of 25-cent copper, this is equal to over \$40 per share on the 149,965 shares of outstanding capital stock.

For the first six months of its fiscal year Granby should show net earnings of approximately \$3,000,000.

—Feb.

¹(1) Production, January, 1917.—Announced Feb. 19, 1917, that this company in January produced 2,946,476 lbs. of copper, 2,319,502 lbs. of which came from Anyox smelter and 626,975 from Grand Forks.

—Mar.

¹(1) Operations.—It was stated March 2, 1917, that four furnaces of the Anyox smelter again had been placed in commission by this company, following partial cessation of operations caused by climatic conditions. This was reflected in a lower output for January.

About \$3,700,000 bonds now remain outstanding, having been reduced to this amount by sinking fund operations and purchased for the treasury.

¹(2) Production, February, 1917.—Announced March 16, 1917, that this company in February produced 2,580,283 pounds of copper, 1,968,426 pounds of which were from Anyox and 611,857 from Grand Forks, compared with 2,946,476 pounds in January, of which 2,319,502 were from Anyox and 626,975 from Grand Forks.

—Apr.

⁴(1) New March Record.—It was stated April 4, 1917, that a new March record was established by this company when its Anyox smelter handled approximately 70,000 tons of ore. This would indicate a production of 2,000,000 pounds of copper for this plant for March, assuming an average recovery of 35 pounds of copper per ton.

⁴(2) War Taxation.—It was stated April 12, 1917, that, being a Canadian corporation with its properties located in Canada, this company will be amenable neither to taxation imposed by the United States Government upon domestic concerns nor to the contribution of copper at lower than market prices.

In this respect Granby apparently occupies a lone position among the large copper producers of the two American continents, as the principal properties of Mexico and South America, while their title may be in the name of corporations formed in countries where they exist, are owned and controlled by corporations with American charters.

⁴(3) Production, March, 1917.—Announced April 13, 1917, that this company produced in March 3,901,398 pounds of copper, 2,814,780 of which were from Anyox and 1,086,618 from Grand Forks, compared with 2,580,283 pounds in February, of which 1,968,426 pounds were from Anyox and 611,857 from Grand Forks.

⁴(4) New Secretary Elected.—Edward Everett was elected Sec'y of this company April 18, 1917, succeeding Northrup Fowler, resigned.

¹(1) Boat Line Operation Permitted.—It was announced at Washington March 23, 1917, that the Interstate Commerce Commission had handed down a decision permitting this company to retain possession and operate its boat lines on the Great Lakes.

The commission held that the lines are being operated in the interest of the public and to the advantage and convenience of commerce, and that an extension of their operation by the railway "will neither exclude, prevent nor reduce competition on the route by water under consideration."

The lines will be required to file tariffs with the commission like other common carriers.

¹(2) New Industries Along Line.—It was stated March 27, 1917, that approximately 75 new industries representing a capital investment of \$12,000,000 had been located along the line of this company in eastern Canada during the past year. These industries will employ 10,000 men when in full operation. Extensions of already existing plants representing a capital of \$5,000,000 and employment for another 4,000 men have been made in the same period.

Among the plants under construction is a large refinery at Port Colborne, Ont., for the International Nickel Company of New York and New Jersey. This plant, which will mean an investment of several million dollars, places within the Dominion the refining of invaluable nickel ore and the distribution of the finished nickel, work which was previously done outside of Canada.

Other large concerns selecting locations in this district during the past year were the Dominion Sugar Co., Ltd., at Chatham; British Munitions, Ltd., Montreal; St. Catharines Steel & Metal Co., at St. Catharines; Kellogg Toasted Cornflakes Co., at Toronto; Dominion Dustless Sweeper Co., at Peterboro; and William Kennedy & Sons at Collingwood. These six plants represent an investment of approximately \$3,000,000. Since 1910 500 industries, with a total investment of about \$100,000,000, have been located along the Grand Trunk Railway, with the co-operation of the railway.

GRANITE COTTON MILLS CORP.

*(1) Extra Dividend of 1½%.—This company, April 24, 1917, declared a regular quarterly dividend of 2%, and an extra of 1½%, both payable May 1 to stock of record April 21.

GRANVILLE TIRE CO.

*(1) Incorporated on March 31, 1917, in Delaware, with a capital of \$10,000,000, to manufacture tires and to do a general machinery business. Incorporators: F. D. Buck, Geo. W. Dillman and M. L. Harty, Wilmington, Del.

GRAPE FRUITOLA CO., INC.

*(1) Incorporated on April 16, 1917, in New York, with a capital of \$350,000, to engage in the cultivation of grape fruit and manufacture of specialties, beverages, etc. Incorporators: M. Stabinsky, D. H. Hurd and W. P. Anderson, Watertown, N. Y.

GRAPHITE CO. OF AMERICA.

*(1) New Company.—It was announced April 4, 1917, that this new company, capital \$250,000, had been incorporated to mine and prepare graphite for market. Its offices are at Birmingham, Ala., and properties in Clay County, Alabama. The officers are Paul Heyman, Pres.; G. Bibb Jacobs, Vice-Pres.; J. C. Lusky, Vice-Pres., and Clarence Bernstein, Sec'y-Treas., all of Nashville, Tenn.

GRASS CREEK PETROLEUM CO.

*(1) Extra Dividend.—On March 29, 1917, the directors declared the regular quarterly dividend of 3% and an extra dividend of 7%. Earnings are approximately \$700,000 a year. The capital has been ordered increased from \$1,000,000 to \$2,000,000, of which \$140,000 will be issued immediately for the purchase of approximately half a royalty interest in the Elk Basin field.

GRASSELLI CHEMICAL CO.

*(1) Earnings, 1916.—Announced Jan. 25, 1917, that this company had reported earnings of \$9,935,000 for 1916, more than 70% on the common stock, after deducting the pfd. dividend requirements. In 1915 earnings were \$4,859,000, so that the gain for 1916 was substantially 100%. Out of the year's earnings the company charged off \$2,424,331 for depreciation and put \$750,000 into a fire insurance reserve fund.

—Feb.

*(1) Extra Dividend on Common.—It was announced Feb. 21, 1917, that this company had declared the regular quarterly dividends of 1½% on the pfd. and 1½% on the common stocks; also an extra cash dividend of 3½% on the common. All are payable March 31 to

stock of record March 15. The extra is the same as was paid during the first three quarters of 1916.

GRASS VALLEY CONSOLIDATED GOLD MINES.

*(1) Stock Sale Authorized.—It was announced Jan. 22, 1917, that the California Commissioner of Corporations had granted this company permission to sell an additional 1,000 shares of its capital stock at par. \$1 per share, to net the company not less than 82½c. The company, which took over an option to purchase the Allison Ranch and Sullivan-Donovan mining properties in the Grass Valley district, issued 225,000 shares in exchange for the options on these properties, and has since sold 375,000 shares at 60 cents per share.

The company has secured options to purchase the Syndicate group of claims for \$40,000, and the Keystone mining claim for \$1,500. The company has under construction mining and milling equipment on the Allison Ranch claim, and with the proceeds arising from the sale of the 100,000 shares plans to complete the equipment and to continue the development of all properties. An outlay of approximately \$500,000 is contemplated.

GRATON & KNIGHT MFG. CO.

*(1) Capital Increase.—It was announced Jan. 29, 1917, that this company, Worcester, Mass., had voted to increase its capital stock from \$2,000,000 to \$2,500,000. Officers: Walter M. Spaulding, Pres. and Gen. Mgr.; Geo. T. Dewey, Vice-Pres., and Frank H. Willard, Asst. Gen. Mgr.

—Apr.

*(1) Stock Dividend.—Announced April 13, 1917, at Worcester, Mass., that this company had declared a stock dividend of 33½%, payable to common stockholders of record April 3. The company has outstanding 5,000 shares of pfd. and 15,000 of common stock.

GRAY (WM. S.) & CO., BAY SHORE, N. Y.

*(1) Capital Increased.—On Feb. 2, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$250,000 to \$500,000.

GRAY & DAVIS, INC.

*(1) Financial Condition Improved.—On April 17, 1917, the "Boston News Bureau" said: "The Gray & Davis situation is showing distinct signs of material improvement. For the last three months the company has been making substantial net profits, the average for the March quarter being about \$100,000 per month.

"These earnings are only in part coming from war work. Regular domestic business is exceptionally good and would seem to hold out the hope of sustained good earnings throughout this year.

"The only real difficulty which the Gray & Davis Co. had was created by delays in getting raw materials and in standardizing its munition work. All this is in the past, however, and the floating debt situation is showing steady monthly improvement. In the last few months there has been a very sharp cutting down in the amount of outstanding notes."

GRAY MINING CO., OAKLAND, CAL.

*(1) Stock Issue.—It was announced Jan. 10, 1917, that the California Commissioner of Corporations had issued an order permitting this company to issue

500 shares to Alfred H. Dana, 250 shares to D. M. Lynds, and 1,250 shares to P. S. Luttrell for money advanced in experimental and demonstrative work on a patent device; to sell 5,000 shares at par, \$1 per share, to net not less than 50 cents, the proceeds to be used for manufacturing and sales purposes, and to issue a like number of shares in exchange for a patent.

GRAY MOTOR CO., DETROIT, MICH.

*(1) Capital Increased.—On Jan. 10, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$550,000 to \$1,000,000.

GREAT AMERICAN CHEMICAL PRODUCTS CO.

*(1) Incorporated on March 23, 1917, in Delaware, with a capital of \$10,000,000, to carry on a general business as chemists, druggists, etc. Incorporators: Herbert E. Latter and Norman F. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

GREAT AMERICAN REFINING CO.

*(1) Incorporated on Jan. 22, 1917, in Delaware, with a capital of \$10,000,000, to produce, refine and market for oil and its products. Incorporators: Joseph O. More, Orpheus L. Teague and Lewis E. Replogle, all of Indianapolis, Ind.

GREAT ATLANTIC & PACIFIC TEA CO., INC.

*(1) Sales, 10 Months Ended Dec. 31, 1916.—It was announced Jan. 22, 1917, that this company's sales for 10 months ended Dec. 31, 1916, were \$58,683,444, an increase of \$22,818,808, or 65% over a year previously. This is the largest increase ever shown by the company and the fiscal year ending Feb. 28, 1917, will be the best in its history.

—Feb.

*(1) Sales, 11 Months Ended Jan. 27, 1917, it was announced Feb. 8, 1917, amounted to \$63,622,063, an increase of \$28,708,445 over the corresponding period of 1916.

—Mar.

*(1) Yearly Sales, Estimated.—It was stated March 2, 1917, that gross sales of this company for the fiscal year ended Feb. 28, 1917, are expected to be approximately \$74,350,000, which compared with sales of \$44,250,000 in the previous fiscal year, shows an increase of about 68%.

In the year the company opened about 1,200 new stores and now has a chain of 2,900 stores, which makes it the largest chain of stores.

The company has inaugurated a bonus system for its 2,900 store managers which provides for payments to each manager of 6% of his year's salary, payments to be made quarterly. First payment was made March 1.

*(2) Sales, Fiscal Year Ended Feb. 24, 1917, were \$74,662,873, compared with \$44,185,283 previous year, an increase of \$30,447,590, or 69%.

*(3) Bonus System.—On March 8, 1917, this company, operating 3,000 stores, announced that a profit-sharing system had been put into operation in the last quarter of the fiscal year ended Feb. 24, 1917, which gave the manager of each store a bonus of 6% of his salary.

—Apr.

*(1) Sales, Five Weeks Ended March 31.—Announced April 10, 1917, sales of this company for the first five months of the fiscal year ended March 31, 1917, were \$9,623,696, against \$5,733,872 for the corresponding period of 1916, an increase of \$3,889,824, or 68%.

*(2) \$2,000,000 Notes Offered.—On April 25, 1917, the Equitable Trust Co. and Edmund Seymour & Co. announced the offering for public subscription at 102 and interest, to yield net 5.45%, \$2,000,000 Great Atlantic & Pacific Tea Co., Inc., five-year 6% convertible gold notes. They are redeemable in whole or in part

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

on 60 days' notice on any interest date after June 1, 1919, at 102½ and interest. They are also convertible into 7% cumulative pfd. stock at par on any interest date on or prior to June 1, 1919.

GREAT BRITAIN (UNITED KINGDOM OF) & IRELAND.

¹(1) Stricken from List.—Announced Jan. 3, 1917, that the New York Stock Exchange had stricken from the list the United Kingdom of Great Britain and Ireland temporary 2-year 5% secured loan gold notes, due 1918.

¹(2) Admitted to List.—Announced Jan. 3, 1917, that the New York Stock Exchange had admitted to the list the United Kingdom of Great Britain and Ireland permanent 2-year 5% secured loan gold notes, due 1918.

¹(3) New Loan Plans.—It was stated Jan. 16, 1917, that the new United Kingdom of Great Britain and Ireland \$300,000,000 loan being arranged by J. P. Morgan & Co., fiscal agents for the British Government, would be convertible at maturity into a long-term loan bearing interest at 5½%.

The plan, it is said, calls for dividing the loan into two maturities, one of one year and one of two years.

Except for minor details the plans for issuing the new credit are complete, it was said.

¹(4) Statement About Loan.—On Jan. 17, 1917, J. P. Morgan & Co. issued the following statement:

"The British Treasury has this day authorized us to issue a new loan of the United Kingdom in the amount of \$250,000,000, to be dated Feb. 1, 1917, to mature as to \$100,000,000 on Feb. 1, 1918, and as to \$150,000,000 on Feb. 1, 1919; to be secured by the same general assortment of high-grade collateral as prevailed in the last United Kingdom issue; to bear interest at the rate of 5½% per annum; the notes of each maturity to be convertible at par, at the option of the holder, prior to maturity, into a 5½% bond of the United Kingdom of Great Britain and Ireland, maturing in 20 years.

"Increasing ease in money conditions and the prevailing demand for high-grade bonds have led us to suggest to the British Treasury the advisability of issuing at this time a security possessing the advantage of early maturity and at the same time giving to American investors, through the conversion privilege, the opportunity to obtain an obligation of Great Britain yielding an attractive interest return for a considerable period of years after normal conditions shall have been restored."

A public offering of the notes will be made next week at a price to yield about 6%. The value of the collateral will amount to 120% of the loan.

¹(5) Price of New Loan.—On Jan. 19, 1917, further details of the new British Government \$250,000,000 secured loan were made public by J. P. Morgan & Co., who announced that \$100,000,000 of the one-year notes would be offered at 99.52 and interest, and that \$150,000,000 of the two-year notes would be offered at 99.07 and interest. Both series of notes bear interest at 5½%, and at the offering price will yield to investors 6%.

The notes are convertible at the option of the holder, at any time before maturity, into 20-year 5½% bonds of the Government. The loan is secured by the pledge of securities valued at \$300,000,000, which are divided into two groups: First, consisting of securities of American municipalities and corporations, and obligations of the Dominion of Canada, the Colony of Newfoundland, Canadian provinces and municipalities, and stocks and bonds of the Canadian Pacific Ry. Co.; and second, bonds of the Governments of Argentina, Chile, Cuba, Australia, Egypt, Japan, New Zealand, and Union of South Africa and securities of the Grand Trunk Railway of Canada, and bonds of Argentine and British railway companies.

Besides J. P. Morgan & Co., the offering of the British Government notes will be made under the names of the following banks and bankers:

First National Bank, National City Company, Harris, Forbes & Co., Brown Brothers & Co., William A. Read & Co., J. & W. Seligman & Co., Kidder, Peabody & Co., Lee, Higginson Co., Lazard Freres, Kiesel, Kinnicutt & Co., White, Weld & Co., Guaranty Trust Co., Bankers Trust Co., Farmers Loan & Trust Co., Central Trust Co. of Illinois (Chicago), Union Trust Co. (Pittsburgh), Continental & Commercial Trust & Savings Bank (Chicago), First and Old Detroit National Bank (Detroit), and Marine National Bank (Buffalo).

¹(6) Note Offering.—Announcement was made Jan. 24, 1917, that subscription books to the \$250,000,000 United Kingdom of Great Britain and Ireland one and two-year 5½% secured loan convertible gold notes had been opened. The offering price of the former is 99.52 and interest, yielding 6%, and the latter 99.07 and interest, yielding 6%.

Of the total amount \$100,000,000 is due Feb. 1, 1918, and \$150,000,000 are due Feb. 1, 1919. They are convertible at any time before maturity into 5½% 20-year bonds of the United Kingdom of Great Britain and Ireland, payable Feb. 1, 1937.

It was stated that a large number of subscriptions to the issue had been received and the bankers felt confident of its entire success.

¹(7) Loan Oversubscribed.—It was announced Jan. 30, 1917, that notwithstanding that the subscription books to the \$250,000,000 one and two-year notes of the United Kingdom of Great Britain and Ireland were closed at 10 A. M. Jan. 29, two days in advance of the original day set, the entire issue was heavily oversubscribed.

¹(8) Loan Allotments.—In connection with allotments of the \$250,000,000 one and two-year British Government collateral 5½% loans, J. P. Morgan & Co. stated Jan. 30, 1917, as follows: "In closing the subscription books for the new British loan, we find that applications have been so heavy as to make necessary a material reduction in allotments. An effort will be made to allot in full all individual subscriptions up to \$100,000 as particularly representing private investment demands; and in general the allotments on subscription over that amount will be cut 40% to 50%."

Subscriptions to the loan have come in from all parts of the United States, and the managers of the syndicate have been particularly gratified at the large number of small applications, many of them from the Far West and the Pacific Coast.

—Feb.

¹(1) Admitted to List.—Announced Feb. 7, 1917, that the New York Stock Exchange had admitted to the list United Kingdom of Great Britain and Ireland \$100,000,000 5½% secured loan convertible temporary notes, due Feb. 1, 1918, and \$150,000,000 5½% secured loan convertible temporary notes, due Feb. 1, 1919.

—Mar.

¹(1) Application to List.—It was announced March 12, 1917, that application had been made to the New York Stock Exchange to list \$150,000,000 United Kingdom of Great Britain and Ireland permanent 3-year 5½% notes, due Nov. 1, 1919, and \$150,000,000 permanent 5-year 5½% notes, due Nov. 1, 1921.

¹(2) Syndicate Closed.—Announcement was made March 13, 1917, that the syndicate which handled the \$250,000,000 secured United Kingdom note issue had been closed and checks for the syndicate profits mailed to the members. It is understood that the profit on each participation of \$100,000 was in the neighborhood of \$1,340, or approximately 1½%.

These notes were dated Feb. 1, 1917, and are in two maturities, \$100,000,000 maturing in one year and the remainder on Feb. 1, 1919. They are convertible into 20-year 5½% bonds of the United

Kingdom, due Feb. 1, 1937. They are a direct obligation of the British Government and are secured by \$300,000,000 of collateral.

¹(3) Stricken From List.—Announced March 23, 1917, that the New York Stock Exchange had stricken from the list the United Kingdom of Great Britain and Ireland temporary three-year 5½% secured loan gold notes, due Nov. 1, 1919, and temporary five-year 5½% secured loan gold notes, due Nov. 1, 1921.

¹(4) Admitted to List.—Announced March 23, 1917, that the New York Stock Exchange had admitted to the list the United Kingdom of Great Britain and Ireland permanent three-year 5½% secured loan gold notes, due Nov. 1, 1919, and the permanent five-year 5½% secured loan gold notes, due Nov. 1, 1921.

—Apr.

¹(1) Permanent Notes Listed in Place of Temporary Ones.—The New York Stock Exchange announced April 24, 1917, that it had stricken from the list United Kingdom of Great Britain and Ireland \$100,000,000 one-year 5½% secured loan convertible temporary notes due Feb. 1, 1918, and \$150,000,000 two-year 5½% secured loan convertible notes due Feb. 1, 1919, and had admitted to the list the permanent notes in each case.

GREAT BUTTE COPPER MINING CO.

¹(1) Calumet Shaft Below 1,350 Feet.—On April 14, 1917, the "Boston Evening Transcript" said that this company, the greater part of whose stockholders are residents of Pittsburgh, had attained a depth in excess of 1,350 feet in its Calumet shaft, which it is proposed to sink to a depth of 1,500 feet, thence to cross-cut a system of east and west and northwest veins, the outcroppings of which are large and pronounced. This property is located northeast of the Anaconda Hill and is sheared by a large number of fissures.

GREAT EASTERN PAPER CO., LTD., QUEBEC.

¹(1) Incorporated in April, 1917, in Canada, with a capital of \$600,000, to manufacture pulp, paper, etc. Incorporators: A. H. Cook, L. E. Parent and R. Guy.

GREATER OIL, GAS & REFINING CO.

¹(1) Incorporated in April, 1917, in Oklahoma, with a capital of \$800,000. Incorporators: H. S. Gutches and Jas. E. Webb, of Ada, and T. W. Byrne, Francis, Okla.

GREAT LAKES COAL MINING CO., COLUMBUS, O.

¹(1) Incorporated on March 23, 1917, in Ohio, with a capital of \$1,250,000. Incorporators: C. E. Blanchard, R. J. Odell, H. J. Bradbury, F. F. Smith and L. T. Lyle.

GREAT LAKES DREDGE & DOCK CO.

¹(1) Stock Dividend.—Announced Feb. 9, 1917, that this company had declared the regular quarterly dividend of 2% and a stock dividend of 20%, payable Feb. 15 to stock of record Feb. 10.

GREAT LAKES STEAMSHIP CO.

¹(1) Extra Dividend.—Announced Jan. 9, 1917, that this company had declared the regular quarterly dividend of 2% and an extra of 2%, payable April 1.

• GREAT NORTHERN IRON ORE PROPERTIES.

¹(1) Leases.—It was stated March 6, 1917, that leases aggregating \$110,000,000 between this company and the Jones & Laughlin and Inland Steel companies had been concluded.

According to St. Paul reports, both the leases are based on a yearly minimum production of ore and are to run until the mines are exhausted. The Jones & Laughlin lease, it is estimated, will involve total payments of \$70,000,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

and the Inland Steel lease \$40,000,000. Undoubtedly these figures are subject to modification, as they must be based on estimated life on the mines and other factors, such as iron content of ore, which cannot now be definitely determined.

In the United States Steel Corporation's Hill ore lease, which was abandoned on Jan. 1, 1915, payments to Great Northern Ore were much smaller than the sums said to be involved in the two new leases. The Corporation's contract called for the mining of a minimum of 750,000 tons in 1907, with a yearly increase of 750,000 tons, so that in 1917 the amount to be mined would have been 8,250,000 tons, at which maximum figure it was to remain until exhaustion of the mines.

The lease was abandoned at the end of 1914 and it is understood that the about as per contract, or an aggregate amount of ore mined to that date was of 27,000,000 tons. Payments probably ran well under \$25,000,000 and possibly under \$20,000,000. This, however, alludes to royalties alone, as the Corporation had to pay Great Northern 80 cents a ton for haulage.

In all probability the contracts understood to have been closed recently provide for mining by Great Northern, which makes comparison with the Steel Corp. lease difficult.

GREAT NORTHERN LUMBER CO., WILMINGTON, DEL.

¹(1) Incorporated in Washington, Dec. 27, 1916, with a capital of \$850,000. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Ind.

GREAT NORTHERN POWER CO.

¹(1) Notes Called for Payment.—Announced Jan. 10, 1917, that this company had called for payment at 101 and interest Feb. 1, through the Philadelphia Trust Co., all its outstanding collateral trust 6% notes, due Feb. 1, 1918.

GREAT SOUTHERN GRAPHITE CO.

¹(1) Development.—It was stated Feb. 28, 1917, that this company had purchased machinery for the purpose of developing 120 acres of graphite properties near Puyallup, Ala., the plant to have a capacity of 300 tons daily. The following officers were elected: H. O. Moore, Pres.; F. J. Holberg, Sec'y; John D. Hutton, Treas.; A. W. Clark, Gen. Supt., and Edward B. Van Keuren, construction engineer, all of Birmingham.

GREAT WESTERN COPPER CO., INC., SEATTLE, WASH.

¹(1) Incorporated on Jan. 30, 1917, in Washington, with a capital of \$2,000,000. Incorporators: W. F. Chadbourne and J. H. Beattie.

GREAT WESTERN ELECTRO-CHEMICAL CO.

¹(1) Initial Dividend on Pfd.—Announced Jan. 14, 1917, that this company had declared an initial dividend on its pfd. stock at the annual rate of 7%.

¹(2) Status.—It was stated Jan. 14, 1917, that the capital stock of this company is \$2,000,000, divided into \$500,000 7% pfd. and \$1,500,000 common. All the pfd. stock has been sold, the subscriptions having been taken at par. Of the common, \$500,000 is reserved for future uses, \$500,000 was issued as a 100% bonus to purchasers of pfd. stock and \$500,000 was exchanged for the patent rights under which the company operates.

While no detailed statement was made, it is said the earnings for the last six months of 1916 were more than equivalent to a year's dividend requirements on the pfd. stock.

It is announced that the capacity of the plant will be increased by about 25%.

—Mar.

¹(1) Stock Sale Permitted.—It was announced March 11, 1917, that this company had been permitted by California Commissioner of Corporations H. L. Carnahan to sell an additional 4,000 shares of its pfd. stock and to issue 3,400 shares of common so as to net the company \$400,000.

The proceeds are to be used for enlarging the company's plant at Pittsburg, Cal., and to install additional equipment for the purpose of increasing the output of caustic soda and chlorine and to engage in the manufacture of other chemical products.

GREAT WESTERN EXPLORATION CO.

¹(1) Incorporated in December, 1916, in Nevada, with a capital of \$1,000,000. Directors: J. H. Kendall, J. A. Kendall, F. W. Gleason and A. W. Russell.

GREAT WESTERN OIL & CHEMICAL CO.

¹(1) Incorporated on April 17, 1917, in Delaware, with a capital of \$2,000,000, to acquire and develop oil and coal lands. Incorporators: R. H. Locke, A. J. McMahon and J. B. Dudley, Oklahoma City, Okla.

GREAT WESTERN POWER CO. OF CALIFORNIA.

¹(1) Development.—See Engels Copper Mining Co.—Item No. 2.

¹(2) Expansion Authorized.—It was announced Jan. 14, 1917, that this company had been authorized by the California Railroad Commission to build and maintain a transmission line from Big Meadows dam to the Engels Copper Co.'s mine and to the Philadelphia Exploration Co.'s mine at Crescent Mills, and also to build a line from the present Great Western Co.'s line in Indian Valley to Crescent Mills to serve the Exploration Co.'s mine there.

The Plumas Light & Power Co. protested against the granting of this authority, alleging that the extension of the Great Western line would involve an invasion of exclusive territory. The commission found this not so and that the public would be benefitted by the Great Western Co. taking the contract.

¹Accrued dividend on California Electric Generating Co. pfd. stock.

GREAT WESTERN SUGAR CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

¹(1) Special Dividend of \$10 a Share on Common.—A special dividend of \$10 a share on the 15,000 shares of common stock was declared by the directors of this company at their annual meeting April 25, 1917. The dividend represents accumulations prior to March 1, 1913.

¹(2) W. L. Petrikin Elected to Succeed C. S. Morey as Pres.—At the annual meeting of this company April 25, 1917, W. L. Petrikin was elected Pres., succeeding C. S. Morey, who for many years had been the Pres. and who became chairman of the Board of Directors. Mr. Morey announced recently that he desired not to succeed himself as Pres.

Other officers elected were: R. K. Marsh, 1st Vice-Pres.; Charles Boettcher, 2d Vice-Pres.; S. M. Edgell, 3d Vice-Pres.; M. D. Thatcher, Pueblo, Treas.; C. W. Luff, Sec'y & Asst. Treas., and S. P. Saunder, Auditor and Asst. Sec'y.

Directors also authorized and instructed proper officers of the company to purchase at the market \$2,000,000 par value of United States Government war bonds, "when issued," or as soon thereafter as in their judgment they deem it wise.

The directors also voted to pay farmers 50 cents a ton above the contract price for sugar beets in the Fall of 1917.

GREEN BAY & WESTERN R. R.

	1916	1915
November gross	\$80,885	\$72,211
Net after taxes	24,461	23,554
5 mos. gross	370,717	333,500
Net after taxes	110,481	92,361

¹(2) Dividends.—Announced Jan. 29, 1917, that this company had declared 1% on the debentures B and 5% on the debentures A and the capital stock, payable Feb. 15 to stock of record Feb. 8. A year previously a payment of 7% was made on the debentures B, and in 1915 7%.

¹(3) December Production Reported Satisfactory.—It was stated Jan. 8, 1917, that the leading persons interested in this company regard as satisfactory the December figures, showing a decrease of 925,000 pounds in the output. It is pointed out that the Christmas holiday always affects the total for December, as the miners do not return immediately, but celebrate for several days, thus causing a considerable falling off over a period of almost a week.

The total production of the company for 1916 totaled, in round numbers, 60,000,000 pounds of copper, approximately as large as any other year in the company's history, it is stated. Such a total must be considered a good one, in view of the many difficulties encountered during mid-Summer, when the American employees were ordered from Mexico and operations were carried on entirely by Mexican miners.

For four months the production ranged between 4,500,000 and 5,000,000 pounds, as compared with figures in excess of 5,180,000 pounds in the preceding four months.

Another factor which held the output in check in January was that operations were resumed at the property only in December of 1915, and the mines were not up to anything near normal until after the beginning of February.

GREENE CANANEA COPPER CO.

*(1) Average Monthly Earnings.—On Jan. 3, 1917, it was stated that monthly earnings of this company had been ranging between \$600,000 and \$700,000, the variation being due very largely to the difference in price on which copper deliveries were made.

Costs have been high at Cananea because of the extraordinary taxes levied. It was a gradual assessment that was made against the company and is understood to have amounted to between 2½ and 3 cents a pound of copper produced.

With the fulfillment of agreements made by the Mexican Government it is believed that the taxes will be reduced.

*(2) Production, December, 1916.—Announced Jan. 8, 1917, that this company in December produced 4,975,000 pounds of copper, 140,130 ounces of silver and 750 ounces of gold, compared with November's production of 5,100,000 pounds of copper, 164,380 ounces of silver and 951 ounces of gold.

—Feb.

*(1) Production, January, 1917.—Announced Feb. 8, 1917, that this company in January produced 5,700,000 pounds of copper, 158,690 ounces of silver and 770 ounces of gold, compared with December's production of 4,975,000 pounds of copper, 140,130 ounces of silver and 750 ounces of gold.

—Mar.

*(1) Production, February, 1917.—Announced March 8, 1917, that this company produced in February 5,100,000 pounds of copper, 144,610 ounces of silver and 815 ounces of gold, compared with January's production of 5,700,000 pounds of copper, 158,690 ounces of silver and 770 ounces of gold.

—Apr.

*(1) March Production.—In March, 1917, this company produced 5,500,000 lbs. of copper, 161,410 ounces of silver and 860 ounces of gold.

GREENFIELD GAS LIGHT CO.

*(1) Bond Issue Authorized.—It was announced March 15, 1917, that the Massachusetts Gas & Electric Light Commission had granted permission to this company to issue \$142,000 bonds to run not more than 20 years at not more than 8%. The money is to be used to cancel \$75,000 bonds and other indebtedness.

GREEN-HAAS-SCHWARTZ CO.,

*(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,059,569, compared with \$1,372,712 Dec. 31, 1915.

*(3) Increased Dividend on Common.—Announced Feb. 16, 1917, that this company had declared a semi-annual dividend of 3½% on its common stock, payable March 1 to stock of record Feb. 20. In September, 1916, 3% was disbursed. The September installment of 3½% on the common was also declared, payable Sept. 1 to stock of record Aug. 20.

—Apr.

*(1) Operating to Capacity.—On April 10, 1917, the "Wall Street Journal" had the following: "The Griffin Wheel Co. is operating to capacity, and is booked to capacity until well into the Summer. Indications are for continued good business, with no effect from the war except loss of men. That is a serious matter at present, however, as the extent of operations is limited to the supply of labor. That means that the management is just able, by strenuous effort, to keep the plants fully manned. Margin of profit is somewhat smaller than last year, because increased prices have not begun to keep pace with increased costs. Pig iron costs \$38 a ton, as against \$18 a year ago. Wages are up 30%. Fortunately the company's plant capacity has been increased around 25%. The next dividend meeting will not be held until the middle of July, when it is officially stated that the directors, as usual, will declare the regular semi-annual dividend of 3% on the preferred, payable August 1."

GROTON IRON WORKS,
AUGUST, ME.

*(1) Incorporated on April 12, 1917, in Virginia, with a capital of \$9,000,000 to engage in an automobile business. C. F. Gazley, Pres., Detroit, Mich., and B. C. Brownell, Sec'y, Cleveland, O.

GUGGENHEIM EXPLORATION CO.

*(1) Tax Suit Won.—Announcement was made Jan. 5, 1917, that this company won the suit brought against it by the United States Government for the collection of a corporation income tax of \$67,471 because of the sale by the company in 1911 of 112,490 shares of the American Smelters Securities Co. The Government asserted that the proceeds from this sale represented a profit to the company, and that it was therefore subject to the tax.

Judge Manton, of the Federal District Court for the Southern District of New

York, said that the net income of a corporation could not be determined by bookkeeping, but only by the facts. Any increase in the book value of the assets of a corporation through a revaluation of the property does not constitute, he said, any part of the gross amount of its income.

Judge Manton said that the word "income" was not the same as the word "receipts," that the statutes make a difference between them, and that income as used in the statute is different from property and invested capital. Therefore money obtained by a sale of stock could not be considered as income, but could be regarded only as receipts.

GULF FINANCE CO.

*(1) Incorporated on March 31, 1917, in Delaware, with a capital of \$2,750,000, to deal in and with investments. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egnor, Elkton, Md.

GULF, MOBILE & NORTHERN R. R.
CO.

*(1) Organized.—It was announced Jan. 18, 1917, that this company, formerly the New Orleans, Mobile & Chicago R. R., had been permanently organized by the election of the following officers:

Pres., W. F. Owen; Chairman, John W. Platten; Vice-Pres. and Controller, J. M. Hood; Asst. to Pres. and Sec., H. F. Ricker; General Manager, E. D. Hogan; Treas., Eugene Harvey; Asst. Treas., W. L. Duffee; Asst. Sec., C. H. Murphey.

The following directors were chosen: John W. Platten, Frederic W. Scott, A. H. S. Post, T. Nelson Strother, W. H. Coverdale, J. S. Dale, J. C. Rich, W. F. Owen, Charles K. Beekman, Chauncey H. Murphey, and I. B. Tigrett.

*(2) Construction Plans.—It was stated Jan. 18, 1917, that the newly elected officers of this company had discussed the plans for the completion of the line from the northern terminus, Middleton, Tenn., to Jackson, Tenn., and decided to begin construction soon. More than 97% of the bondholders of the old road have deposited their bonds with the reorganization committee, and it is expected that the new securities distributed under the plan will be ready early in February.

Depositing bondholders will receive for their bonds 83¼% in voting trust certificates for pfd. stock and 75% in voting trust certificates for common stock. The voting trustees are John W. Platten, S. S. Campbell, A. H. S. Post, Frederic W. Scott and T. Nelson Strother.

JANUARY 1 TO APRIL 30, 1917

—Feb.

¹(1) Stock Notice.—See New Orleans, Mobile & Chicago R. R. Co.—Item No. 1.

GULF OIL CORP.

¹(1) Report, Year Ended Dec. 31, 1916, shows net earnings of \$17,893,410, an increase of \$7,948,278 over 1915; surplus, \$38,259,783, increase \$15,825,736; assets, \$106,371,846, increase \$48,549,544.

¹(2) Earnings on Stock.—It was stated March 9, 1917, that this company's 1916 earnings on the \$34,462,000 issued capital stock were at the rate of 51.9%, against 28.8% on \$34,427,000 in 1915.

GULF PORTS TERMINAL R. R. CO.

¹(1) New Railroad.—It was announced at Pensacola, Fla., Dec. 27, 1916, that this company, capital \$1,000,000, had been chartered to build and operate a railroad from Pensacola to and across Perdido Bay and thence to Mobile, Ala., with branches. It is said that the Pensacola, Mobile & New Orleans R. R. will be included and completed.

Elwood McLaughlin, of the latter, is Pres. of the new company; A. C. Blount, Vice-Pres.; C. E. Dobson, Sec'y, and W. J. Forbes, Treas. These, with W. J. Bullock, are the directors.

New York capital, independent of any other railroad, is said to be enlisted in the new plans.

GULF PRODUCING CO.

¹(1) Incorporated on Jan. 25, 1917, in Delaware, with a capital of \$3,000,000, to prospect for and market oil. Incorporators: M. L. Rogers, L. A. Irwin and Harry W. Davis, Wilmington, Del.

GULF REFINING CO.

¹(1) New Texas Well.—An Austin, Tex., dispatch Jan. 10, 1917, stated that the recent bringing in of a well in the Sour Lake field of a daily flow of 12,000 barrels by this company had served to attract new interest to that field. This large flow is attributed to the fact that the well is 200 feet deeper than that of any other well in the immediate vicinity, the lower strata being struck at a depth of 2,300 feet.

¹(2) Acquisition.—It was announced at Houston, Tex., Jan. 15, 1917, that Gulf Refining interests had closed with Gibson & Zahniser for their Mexican holdings with the gusher well on it. The Gulf interests paid \$1,500,000 for a 70% interest in the lease and well, \$750,000 in cash and the balance out of oil.

In addition, the Gulf Co. agrees to build an 8-inch line from the field to the deep water at Lobos Island, where tankers can be loaded and the oil transported to the United States.

GULF STATES STEEL CO.

¹(1) Earnings, December and 1916.—On Jan. 23, 1917, this company reported December net earnings amounting to \$225,528, an increase of \$143,805 over the same month of 1915. This is after liberal reserves for depreciation, etc.

For the year ended Dec. 31, 1916, net earnings were \$2,452,510, an increase of \$1,837,836 over 1915.

¹(2) Comment on December and 1916 Earnings.—On Jan. 25, 1917, the "Wall Street Journal" said that net earnings of this company in December brought the earnings for the year 1916 to \$2,452,510. This figure does not take account of a very liberal reserve fund over and above the depreciation fund, for which no specific use has been found. This will be accounted for in the annual report.

The net earnings of \$2,452,510 are equivalent to the 7% on the \$2,000,000 1st pfd. stock, 6% on the \$4,000,000 2d pfd., and 41% on the \$5,000,000 common. The 2d pfd., however, is convertible into the common at any time, and since the common pays 8% and the 2d pfd. only 6%, it is assumed that all of the 2d pfd. ultimately will be converted into common stock, making a total of \$9,000,000 common outstanding.

On this basis the 1916 earnings are equivalent to 25% a share on the common.

—Feb.

¹(1) Net Earnings, January, 1917, it was stated Feb. 14, 1917, after reserve, depreciation and taxes, amounted to \$267,928, an increase of \$155,455 over January, 1916. January earnings were \$42,400 greater than December earnings.

—Mar.

¹(1) Report, Year Ended Dec. 31, 1916, shows net earnings of \$2,452,510; dividends, \$679,827, and surplus, \$1,772,683. The balance sheet as of the end of the year showed cash in banks and on hand of \$1,881,477.

¹(2) Comment on 1916 Report.—On March 15, 1917, the "Wall Street Journal" said that the 1916 earnings of this company, after allowing the regular 7% on the \$2,000,000 pfd. and the regular 6% on the \$4,000,000 2d pfd., are equivalent to 41.5% on the \$5,000,000 common stock. The 2d pfd. stock is convertible into common at any time. On Dec. 31 there was outstanding only \$1,685,600 2d pfd. and consequently \$7,314,400 common. On this basis the year's earnings were equivalent to \$30 on the outstanding common stock. If all the 2d pfd. stood converted the earnings would be equivalent to 25.7% on \$9,000,000 common stock.

The report sets forth the strong cash position of the Gulf States Steel Co. Liquid assets at the end of the year were \$3,860,014 and current liabilities only \$510,845, leaving net liquid assets of \$3,349,168. This sum is sufficient to offset practically the entire outstanding issues of 1st and 2d pfd. stocks at par, leaving all the properties and plants of the concern for the common stock.

The company has no floating debt and does all of its business on a strictly cash basis. The only debt ahead of the stock is an underlying mortgage on a subsidiary coal company for \$239,000 and this is being paid off in instalments.

Out of the \$2,452,510 net earnings the company paid out \$488,727 in dividends, carrying the sum of \$1,963,782 to surplus and making total surplus \$2,656,549. Total assets are placed at \$14,678,626.

The company has installed 27 by-product coke ovens with a capacity of 450 tons of coke a day. The new equipment, according to the report of James Brown, Pres. of the company, will permit a daily output of 3,500 gallons of tar, 12,000 pounds of sulphate of ammonia, 7,600 gallons of benzol, and 150 gallons of toluol. Arrangements have been made for the sale of these products, making an entirely new source of revenue.

The company's ore reserves were increased during the year to the extent of about 5,500,000 tons and the coal reserves by 300,000 tons.

¹(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,656,549, compared with \$692,768 Dec. 31, 1915.

¹(4) Earnings, February, 1916.—It was stated March 15, 1917, that this company

had reported net operating income for February of \$313,151, which is an increase of \$179,924 over February, 1916, and an increase of \$33,155 over January of 1917. For January and February, 1917, net operating income was \$592,947, an increase of \$342,154 over the corresponding month of 1916.

After allowing a total of \$22,631 for depreciation, reserves and taxes the net income for February was \$290,420. These figures include a reserve set by the directors to provide for the payment of the excess profits tax.

¹(5) Comment on February Earnings.—On March 16, 1917, the "Wall Street Journal" said that, with only 22 working days in the month, all plant production records of this company were broken in February. Net earnings of \$313,151 were the second largest monthly earnings in the company's history. The net operating income of January and February combined was at the annual rate of \$60 a share on \$5,000,000 common stock. Assuming that all the \$4,000,000 2d pfd. stock will be converted into common, this amount is equivalent to an annual rate of \$38 a share on \$9,000,000 common.

—Apr.

¹(1) March Net Income of \$378,286 a New High Record.—On April 24, 1917, the "Wall Street Journal" stated that this company had net operating income in March of \$378,286, a new high record. This is an increase of \$212,186 over March, 1916. After allowing a total of \$61,700 for depreciation, reserves and taxes, including the present Federal excess profits tax, plus the anticipated increase in the Federal tax, the net income was \$316,586. After allowing for 7% dividends on \$2,000,000 pfd., this is at the annual rate of \$40 a share on the \$9,000,000 common stock.

In the first quarter of 1917 the Gulf States Steel Co. earned \$971,234, an increase of \$534,341 over the same period in 1916. The first quarter, therefore, was sufficient to pay the full year's dividends of 7% on the pfd. and 8% on the common and leave a balance of \$111,234.

HABRA VALLEY LAND & WATER CO.

¹(1) Capital Decreased.—In December, 1916, the company filed notice in Sacramento, Cal., of a decrease in capital stock from \$500,000 to \$100,000.

HADFIELDS, LTD.

¹(1) Projectile Bids.—It was announced at Washington Jan. 5, 1917, that the opening of bids for armor-piercing shells by the United States Navy Department disclosed that this company, of England, agreed to supply 3,000 10-inch projectiles in 16 months at \$612 each, duty paid. The Bethlehem Steel Corp. wanted \$775 each to provide 4,000 in 36 months, while the price from the Midvale Steel & Ordnance Co. was \$900 each for 1,000 in 24 months.

For 14-inch shells Hadfields, Ltd., offered a price of \$356 each for 4,500, delivered in 11 months.

The Midvale Steel Co. wanted \$650 each for 5,600 shells, to be delivered in 30 months, while the Crucible Steel Co. asked \$543.50 each for 2,000, deliverable in 34 months.

¹(2) Shell Contracts Awarded.—Announcement was made at Washington Jan. 17, 1917, that the United States Navy Department had awarded to this company, of London, Eng., contracts for 3,000 16-inch shells at \$513 each and 4,500 14-inch shells at \$356 each, delivery in 16 months.

* (3) Damage by Fire.—Announced March 21, 1917, that a large frame barn of this company, located near Hagerstown, Md., had been destroyed by fire, together with nine cars and other contents, causing a loss of \$75,000.

HAGERSTOWN LIGHT & HEAT CO.

* (1) Sale.—It was announced March 20, 1917, that this company had been sold to the Electric Bond & Share Co., New York. Along with it, the latter company secured control of six other gas companies, the majority of which are located in Pennsylvania.

HALE & KILBURN CO.

* (1) Report, Year Ended Dec. 31, 1916, shows total sales amounting to \$3,130,810, compared with \$1,938,075 in 1915, and total net income of \$389,912, compared with a deficit of \$68,915 previous year. The 1916 income was disposed of as follows: Interest and miscellaneous charges, \$81,182; adjustment of working assets, per inventory, \$151,331; adjustment of property values, per appraisal, \$129,353; transferred to surplus account, \$23,044.

* (2) Statement by President.—It was stated March 12, 1917, that Pres. Joseph A. Bower, of this company, in his annual remarks to stockholders, said, in part: "The net shipments of your plant during the fiscal year 1916 aggregated \$3,130,810, upon which net earnings, exclusive of interest charges, amounted to \$384,912. While the showing appears very favorable in comparison with the previous year, you should be advised that the period just closed has marked many changes.

"The products at present are steam and electric railway car seats, interior finish for railway cars, enclosed automobile bodies, automobile stampings and parts, woven cane, gas ranges and miscellaneous.

"Prospective of the year 1917, your company has on its books unfilled orders aggregating approximately \$3,250,000, which is in excess of the total shipments made during the year 1916."

HALIFAX ELECTRIC TRAMWAY CO., LTD.

* (1) Stockholders' Rights.—See Nova Scotia Tramways & Power Co., Ltd.—Item No. 4.

HALLADAY MOTOR CAR CO., MANSFIELD, O.

* (1) Incorporated on March 8, 1917, in Ohio, with a capital of \$1,000,000. Incorporators: T. E. Huth, Y. F. Stewart, J. N. Horne, G. B. Stayce and E. D. Baxter.

* (2) New Company.—See Barley Motor Car Co., Streator, Ill.—Item No. 1.

HALL (GEORGE) COAL & TRANSPORTATION CO., INC., OGDENSBURG, N. Y.

* (1) Incorporated on Feb. 15, 1917, in New York, with a capital of \$1,750,000, to deal in coal, pulp, wood, commodities, marine wrecking and salvage. Incorporators: E. L. Strong, J. C. Howard and G. Hall, 52 North Water St., Ogdensburg.

HALL (C. M.) LAMP CO.

* (1) Acquisition.—See Badger Brass Manufacturing Co.—Item No. 1.

with the labor question settled and a good chance that the roads will get an increase in rates, equipment buying should be resumed before long. Manufacture of war munitions, which was done by the company for a short period of time, was successful in every way. All munition contracts were completed

last summer. Earnings of the company are running well above interest charges, and interest payments, which have been made regularly to date, will be easily maintained. A block of \$50,000 of the company's first mortgage bonds is retireable next October, and the company has substantially more than enough funds at the present time to meet this obligation.

HALL SIGNAL CO.

* (1) Tenders Asked.—See Hall Switch & Signal Co.—Item No. 1.

HALL SWITCH & SIGNAL CO.

* (1) Tenders Asked.—Announced Jan. 5, 1917, that this company is asking for tenders of the Hall Signal Co.'s first mortgage 6% bonds, due Oct. 1, 1917. Proposals will be accepted up to Jan. 20.

—Mar.

* (1) Status (March, 1917).—On March 24, 1917, the "Wall Street Journal" said that affairs of this company were in good shape. Owing to the uncertain railroad situation the roads had not been buying much equipment such as the Hall Co. manufactures. However, naces, contracts for which were recently placed with the American Bridge Co.

Two other units, requiring 5,000 tons of steel, are expected to be built in time for the installation of the furnaces to be delivered in June and July.

HAMILTON BRIDGE WORKS.

* (1) New Contract.—It was announced Feb. 2, 1917, that this company had closed a contract with the Canadian Munitions Board to construct the first unit of the electrical steel plant at Toronto, Ont., to house 10 electrical fur-

HAMILTON & DE LOSS CO.

* (1) New Plant.—It was announced at Fairfield, Conn., Dec. 29, 1916, that this company, recently organized with \$300,000 capital to manufacture metal parts, had secured a site for a factory near the Handy & Harmon plant, and has plans for a structure to cost \$100,000. The company will scrap silver, steel, brass and copper and it expects to employ from 500 to 800 persons.

HAMILTON & DE LOSS, INC., BRIDGEPORT, CONN.

* (1) Incorporated in January, 1917, in Connecticut, with an authorized capital stock of \$300,000, to manufacture metal goods, etc. Incorporators: Harold H. Hamilton, Harry H. De Loss and Jas. A. Marr. Reported as having plans for the erection of a plant at Fairfield, Conn.

HAMILTON FURNACE CO., BUTLER, O.

* (1) Incorporated on March 21, 1917, in Ohio, with a capital of \$400,000, to deal in iron. Incorporators: John A. Savage, J. E. McCloskey, Jr., A. E. Gillespie, F. J. Lashley and J. C. Alexander.

HAMILTON MANUFACTURING CO.

* (1) Increased Dividend.—Announced Jan. 30, 1917, that this company had declared a semi-annual dividend of 4%, thus placing the stock on an 8% basis, as against 5% heretofore. During the year just ended the company is said to have earned more than 25% on its capital stock.

—Feb.

* (1) Status.—It was stated Jan. 31, 1917, that during the year ended Dec. 31, 1916, this company earned more than 25% on its capital stock. The gross debt is about \$1,000,000, against which there are quick assets of over \$900,000. Since the present treasurer assumed office over \$1,000,000 has been expended in renewals and for new machinery, which has been paid for out of earnings.

—Apr.

* (1) New President.—It was announced April 2, 1917, that Felix Rackeman had been elected Pres. of this company, succeeding C. Minot Weld, who resigned in compliance with the Clayton law. George H. Whiting and Arthur Adams were elected directors.

HAMILTON MOTION PICTURE SERVICE CORP.

* (1) Incorporated on March 29, 1917, in New York, with a capital of \$500,000, to deal in spot-light diffusers, motion pictures, non-flicker projector devices, vacuum cleaners, automatic and mechanical devices. Incorporators: E. J. Harlam, T. J. Meehan and F. C. Hamilton, 11 East 32d St., New York.

HAMILTON MOTORS CO.

* (1) Operations Started.—It was announced Feb. 1, 1917, that this company, incorporated with a capital stock of \$500,000, had established a new plant at Grand Haven, Mich., and had begun the production of cars.

HAMILTON STEEL WHEEL CO., LTD.

* (1) Plans.—It was announced Jan. 10, 1917, that the authorized capital stock of this company, the newly created subsidiary of the Dominion Steel Foundry Co., had been fixed at \$2,000,000, divided into 80,000 shares of \$25 each.

Of the total \$1,000,000 has been issued, \$200,000 being subscribed and paid for in cash by the Dominion Steel Foundry Co., and \$800,000 being fully paid stock issued to C. W. Sherman under an agreement for services, patents, etc.

The officials state that the subsidiary was formed because the business of the parent company had increased so enormously as to demand it.

—Apr.

* (1) Merger.—See Dominion Steel Foundry Co., Ltd.—Item No. 1.

HAMILTON WARD CO.

* (1) Incorporated in March, 1917, in Illinois, with a capital of \$250,000, to engage in a mail order business.

HAMILTON WOOLEN CO.

* (1) Addition.—It was announced Jan. 17, 1917, that this company, Southbridge, Mass., had let the contract for a new \$45,000 mill. Fancy cashmeres and worsted novelties are manufactured.

HAMMOND FILM CORP.

* (1) Incorporated on Feb. 16, 1917, in New York, with a capital of \$1,600,000, to deal in photographic films, plates, paper, cameras and accessories. Incorporators: R. D. Hanna, R. Lynch and H. Hammond, 120 Broadway, New York.

HAMMOND LUMBER CO., WILMINGTON, DEL.

* (1) Incorporated on Jan. 3, 1917, in Washington, with a capital of \$8,500,000. Incorporators: Harold B. Eglar, New York; James D. Boyd, Bayonne, N. J., and Thomas F. Bayard, Wilmington, Del.

● HANCOCK CONSOLIDATED MINING CO.

* (1) Production, February, 1917.—It was announced March 22, 1917, that this company, in February, produced 335,000 lbs. of copper, compared with 335,000 in January. The February production was encouraging owing to the small number of working days.

—Apr.

* (1) Report, Year Ended Dec. 31, 1916, shows total receipts of \$875,202 and total disbursements of \$771,514, an excess for receipts of \$103,687. During the year the company received \$117,016 in assessments.

The company in 1916 produced 2,824,934 pounds of refined copper, as against 871,124 pounds in 1915. It marketed 2,680,859 pounds at an average price of 28.063 cents per pound.

JANUARY 1 TO APRIL 30, 1917

HANFORD GAS & ELECTRIC CO.

²(1) Bonds.—It was announced Feb. 7, 1917, that a meeting of the stockholders of this company, California, had been called for March 27 to consider the creation of a bonded indebtedness of \$70,000, increasing the total bonded debt to \$100,000. The bonds are to be in \$100 denominations, bearing 6% interest.

HANFORD GAS & POWER CO.

⁴(1) Report, Year Ended Dec. 31, 1916, shows gross operating revenue of \$23,006, gross corporate income of \$2,918, and net corporate income of \$243.

⁴(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$59,574.

HANKS FRUIT & PRODUCE CO.,

NORTH YAKIMA, WASH.
²(1) Incorporated on Jan. 27, 1917, in Washington, with a capital of \$4,200,000. Incorporators: C. H. Swigart, F. M. Raymond, W. D. Wrighter, B. K. Cunningham, J. H. Corbett, J. E. Spitsmeyer and Will Hanks.

HANOVER COAL CO., BELLAIRE, O.

¹(1) Capital Increased.—On Jan. 18, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$225,000 to \$300,000.

HARRISON-WALKER

REFRACATORIES CO.
²(1) Extra Dividend on Common.—Announced Feb. 5, 1917, that this company had declared an extra dividend of 6% on the common stock, payable Feb. 20 to stock of record Feb. 10.

HARD PAPER PRODUCTS CO.

OF AMERICA.
²(1) Incorporated on March 1, 1917, in Delaware, with a capital of \$250,000, to manufacture and sell hard paper products. Incorporators: M. L. Gatchell, L. A. Irwin and I. B. Davis, Wilmington, Del.

HARGRAVES & PARKER MILLS.

²(1) Dividends Resumed.—Announced Jan. 27, 1917, that this company had declared a quarterly dividend of 1%, payable Feb. 4 to stock of record Jan. 25. The last previous dividend was in 1917.

HARGRAVES SILVER MINES, LTD.

²(1) New Development.—It was stated Jan. 10, 1917, that, acting on the advice of Mine Manager Shaw, directors of this company had decided to start work at once on the main vein, located at the 125-foot level. The new equipment required at the mine was decided upon, and orders were placed.

—Feb.

²(1) New Vein.—It was stated Feb. 8, 1917, that a high-grade vein had been struck in the No. 1 shaft of this company at the 75-foot level. Two tons of the ore has been bagged, and assays show the vein to run over 3,000 ounces of silver to the ton.

—Apr.

⁴(1) High-Grade Ore Developed.—The "Toronto World" April 19, 1917, said that although nominally work was resumed on the Hargraves in November, 1916, it did not get really under way until Feb. 1, and since then a profit of \$11,000 has been realized over all expenses. A sensational find has been made at the 375-foot level. In the winze being continued down from that level a vein four inches wide has been located. Values here go 5,000 ounces per ton. Specimens brought down by Mgr. Shaw are equal to any ever seen in Toronto from the Cobalt district.

In a raise from the same level ore has been found averaging 3,900 ounces per ton. Furthermore, the wall rock for a distance of one foot on each side of these veins carries from 15 to 20 ounces of silver per ton. This gives, in addition to the exceptionally high-grade, fully two feet of excellent milling ore.

HARLAN & HOLLINGSWORTH**CORP.**

²(1) New Coaches.—It was announced Jan. 31, 1917, that this company is working on a contract for the Norfolk & Western Ry. for 50 new coaches, estimated to cost \$1,000,000.

—Feb.

²(1) New Vessels.—See United Fruit Co.—Item No. 2.

—Mar.

²(1) New Contract.—See Philadelphia & Reading R. R. Co.—Item No. 1.

—Apr.

⁴(1) Strike of Employees.—Announced on April 10, 1917, that, demanding an eight-hour day and a 5% increase in wages, 1,000 employees of this company had gone on strike. The company is engaged in shipbuilding and recently accepted many large contracts.

HARLEY CO. (THE),**SPRINGFIELD, MASS.**

²(1) Incorporated on Jan. 9, 1917, in Massachusetts, with an authorized capital of \$1,200,000, divided into 6,000 common and 6,000 shares pfd., both \$100 par, to manufacture and deal in metals, alloys, forgings, etc.

HARMONY MILLS.

²(1) Initial Dividend on Common.—Announced Jan. 30, 1917, that this company had declared an initial dividend of 1% on the common stock, payable Feb. 1 to stock of record Jan. 25.

—Mar.

²(1) Financial Condition.—It was announced March 23, 1917, that this company, incorporated under the laws of Massachusetts, had filed with the Massachusetts Secretary of State a statement of its financial condition, dated Dec. 31, 1916, which compares as follows:

Assets—	1916	1915
Real estate and machinery	\$4,246,000	\$4,246,000
Merch., material, stock in proc.	499,369	377,835
Cash and debts receivable	360,982	420,430
Total	\$5,106,352	\$5,044,266
Liabilities—		
Capital stock	3,648,000	2,898,800
Notes payable	750,000	1,415,000
Floating debt	8,282	12,583
Deprec. reserve	300,000	200,000
Surplus	399,269	511,883
Total	\$5,106,352	\$5,044,266

—Apr.

⁴(1) Dividend Increased on Common.—This company April 26, 1917, announced it had declared a dividend of 2% on the common stock and the regular quarterly dividend of 1% on the pfd., both payable May 1 to stock of record April 27. Three months previously a dividend of 1% was declared on the common.

HARRIMAN NATIONAL BANK,**NEW YORK.**

²(1) Dividend.—Announced Jan. 11, 1917, that the directors of this bank had declared a dividend of 100%, payable to stockholders of record Jan. 11.

HARRIS-MILLER-MORAND, INC.

²(1) Incorporated on Feb. 1, 1917, in New York, with a capital of \$250,000, to act as stock and bond brokers. Incorporators: M. Rubinger, E. S. Merrill and T. F. Vondorin, 160 Broadway, New York.

HARRISBURG, PORTSMOUTH,**MOUNT JOY & LANCASTER**

R. R. CO.
²(1) Sale Agreement.—See Pennsylvania R. R. Co.—Item No. 7.

—Mar.

²(1) Sale Approved.—See Pennsylvania R. R. Co.—Item No. 13.

²(2) Sale.—It was announced March 24, 1917, that the stockholders of this com-

pany had approved the sale of the property to the Pennsylvania R. R., which company has approved the purchase.

HARRISON BROS. & CO., INC.**PHILADELPHIA, PA.**

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

²(1) Report, Year Ended Oct. 31, 1916, shows:

	1916	1915
Gross profit	\$2,233,371	\$698,987
Net profit	1,683,748	230,160
Prev. surp.	558,289	328,120
Adjustments	24,732	—
Surplus	2,217,303	558,289

²(2) Change in Officers.—It was announced at Philadelphia Jan. 10, 1917, that at the meeting of the Board of Directors of this company T. J. Armstrong retired as Secretary and Wm. Richter, Treas., was elected in his place. Mr. Richter will fill both offices. Other officers were re-elected.

²(3) President's Statement About Sale Plans.—It was announced Jan. 11, 1917, that Pres. Russell S. Hubbard, of this company, in a letter to stockholders outlined plans for the sale of this company to E. I. duPont de Nemours & Co.

The letter refers to the special meeting of stockholders of Harrison Bros. & Co. March 15 to vote on approval of the sale.

Continuing, the letter says: "A firm offer has been received from E. I. duPont de Nemours & Co. of Wilmington as a result of negotiations which have been pending for some time between that company and Lee, Higginson & Co. and your president.

"The offer has been submitted to the Board of Directors of Harrison Bros. & Co., who have carefully considered the same, and who recommend that it be accepted by the stockholders. Under this offer if approved by the stockholders, the duPont company will pay Harrison Bros. & Co. the sum of \$5,700,000 in cash and will assume all of the outstanding indebtedness and obligations of the company.

"This will provide sufficient funds to pay to pfd. stockholders par and accrued dividends, and to common stockholders about \$200 per share, after payment of the commissions and legal and other expenses incurred in the carrying out of the negotiations and liquidation of the company."

²(4) Comment on Sale Plan.—On Jan. 15, 1917, the "Philadelphia News Bureau" said that this company's common stockholders, if \$200 per share is realized, as expected under the proposed sale of the property to the duPont Powder interests, would receive close to the book value of the stock, which is considered by the management as a very favorable result for the stockholders.

Ahead of the \$2,000,000 Harrison Bros. common stock are \$1,500,000 pfd., \$1,189,000 bonds and \$843,500 notes outstanding, besides some \$350,000 current liabilities. Total assets as per the balance sheet Oct. 31 were \$8,752,764.

Whether another quarterly dividend of 2% is paid to common stockholders prior to the transfer of the property is not of particular moment, since if not paid out in the form of a dividend, the stockholders get the amount in the distribution of proceeds from the sale of the assets.

—Mar.

²(1) Mandamus Proceedings.—It was announced March 7, 1917, that R. C. Kerr of New York, who owns 200 shares of the pfd. stock of this company, had brought mandamus proceedings in the Common Pleas Court, in Philadelphia, charging that the common stockholders are attempting to obtain, through the officers of the company, an unfair advantage over the pfd. stock in the proposed sale of the assets, franchises and property of the Harrison corporation to E. I. duPont de Nemours & Co.

In his petition, Kerr asserts that he paid \$20,000 for his block of stock in 1899, and that he has been refused facts

JANUARY 1 TO APRIL 30, 1917

concerning the business of the company sought in connection with the proposed sale of the property.

*(2) **Sold.**—See duPont (E. I.) de Nemours & Co.—Item No. 3.

*(3) **Sale Approved.**—A Philadelphia dispatch March 15, 1917, stated that at a special meeting of stockholders of this company there on that date the sale of the property, etc., to E. I. duPont de Nemours & Co. was approved. R. C. Kerr, of New York, voted 200 shares, through an attorney, against the sale.

*(4) **Final Dividend on Pfd.**—Announced March 16, 1917, that this company had declared a dividend of \$1.16% on the pfd. stock, payable April 1 to holders of record March 19.

It was stated that this was a final dividend covering February and March, the company having sold out to E. I. duPont de Nemours & Co.

*(5) **Deal Concluded.**—It was announced March 21, 1917, that settlement involving \$7,000,000 had been concluded in full at the Tradesmen's National Bank March 20, 1917, by E. I. duPont de Nemours & Co. for the purchase of the property of this company, which the new owners propose to operate under the title of Harrison's, Inc. The purchaser agreed to pay \$5,700,000 for the plant and assume the obligation of \$1,300,000 bonds outstanding.

HARRISONS, INC.

*(1) **New Company Planned.**—See duPont (E. I.) de Nemours & Co.—Item No. 3.

HARRISON STEEL CASTINGS CO., ATTICA, IND.

*(1) **Incorporated** on Feb. 14, 1917, in Indiana, with a capital of \$300,000, to manufacture steel castings. Directors: Joseph W. Harrison, Glen W. Harrison and Chas. R. Milford.

*(2) **New Company.**—It was announced Feb. 19, 1917, that Pres. J. W. Harrison, of the National Car Coupler Co., Attica, Ind., had organized a new company to build a plant at Murphysboro, Ill. The plant will be a duplicate of that at Attica, which employs 650 men and is one of the largest steel foundries in Indiana.

The new concern has signed contracts for a steel foundry to be erected by Sept. 1, 1917, at a cost of \$300,000.

HARROLD'S MOTOR CAR CO., MANHATTAN, N. Y.

*(1) **Capital Increased.**—On April 13, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$30,000 to \$300,000.

HARROUN MOTORS CORP.

*(1) **Stock Sale Reopened.**—It was announced at Detroit Jan. 30, 1917, that the Michigan Securities Commission had decided to permit the sale of this company's stock in that State under certain conditions. Following the announcement, Ray Harroun, of the company, stated the sale of the stock would be reopened at once. The formal statement of the Commission, in part, follows:

"Considerable testimony has been taken concerning the worth of the car, the company's organization and the prospects of a successful business development. After considering all the facts disclosed and viewing the situation from the standpoint of the stockholders who have already invested in this stock, the present condition of this company and the public interest, we have determined as follows:

"First—That this Commission is powerless to change the original sale of the \$5,000,000 of stock above mentioned.

"Second—That the \$4,000,000 of stock issued to the promoters must be placed in escrow with the Commission by the holders thereof until the company is financially able to pay 6% dividends on the entire capital stock from earnings. Otherwise the same shall be subject to this Commission's order for the benefit of the company and its stockholders.

"Third—That when this stock is so

escrowed the company may sell the \$1,000,000 of its treasury stock in this State, paying a commission of not to exceed 10% for brokerage.

"Fourth—That all advertisements regarding such sales shall first be submitted to this Commission for its approval.

"Fifth—That this order applies only to the \$1,000,000 treasury stock mentioned."

HARTFORD AUTO PARTS CO.

*(1) **Extra Dividend.**—Announced that this company had declared a regular semi-annual dividend of 3% and an extra of 2%, payable Feb. 15. Transfer books close Feb. 2 and reopen Feb. 15.

†After deducting all expenses of merchandising and administration, depreciation, etc.

*(2) **Earnings on Stock.**—It was announced March 5, 1917, that this company's 1916 surplus after charges of \$1,802,033, is equal to 15% on the \$12,000,000 capital stock, compared with 10.47% in 1915.

• HART, SCHAFFNER & MARX, INC.

*(1) **Income Account, Year Ended Nov. 30, 1916,** compares as follows:

	1916	1915
Net profits	\$1,792,002	\$1,287,505
Net after pfd. dividends, etc.	1,162,571	547,232
Surp. after common dividends	562,571	547,232

*(2) **Earnings on Stock.**—It was stated Jan. 22, 1917, that the company's net of \$1,162,571, after pfd. dividends, etc., is equal to 7.75% earned on the \$15,000,000 common stock.

*(3) **Balance Sheet, as of Nov. 30, 1916,** shows a profit and loss surplus of \$2,155,714, compared with \$1,593,143 Nov. 30, 1915.

HARTSELL MILLS CO.

*(1) **New Name.**—See Young-Hartsell Mills Co.—Item No. 1.

HARVEY-CAMPBELL DIRIGIBLE AIRCRAFT CORP., SPOKANE, WASH.

*(1) **Incorporated** on Jan. 25, 1917, in Washington, with a capital of \$1,000,000. Incorporators: Earl E. Harvey, O. A. Campbell, E. A. McGoldrick, Kenneth Campbell and W. B. Price.

HARVEY (WILLIAM) CORP.

*(1) **Incorporated** on Feb. 8, 1917, in New York, with a capital of \$250,000, to mine, quarry, mill, smelt, refine and manufacture tin, lead, zinc, baryta, iron, copper, gold, silver and by-products. Incorporators: G. D. Dorsey, R. E. Pearce and E. J. Cornish, 111 Broadway, New York.

HARVEY MOTOR TRUCK CO., HARVEY, ILL.

*(1) **Incorporated** in December, 1916, in Illinois, with a capital of \$300,000, to manufacture and deal in motor trucks and automobiles.

HARWOOD ELECTRIC CO.

*(1) **Report, Year Ended Dec. 31, 1916,** shows income account as follows:

	1916	1915
Gross	\$596,516	\$498,929
Net after taxes	179,343	163,496
Surp. after chgs.	5,213	44,148

*(2) **Balance Sheet, as of Dec. 31, 1916,** shows a profit and loss surplus of \$342,254, compared with \$342,477 Dec. 31, 1915.

*(3) **Statement by President.**—In connection with the annual report of this company, Pres. S. D. Warriner, it was stated Feb. 27, 1917, said: "The net amount expended during the year for additions and betterments to plant and property was \$156,288.

"The property of your company was maintained in efficient condition. The amount of business your company now has under contract and in prospect is so large as to require extensive additions and changes in the plant, and these were authorized and are now under way, consisting chiefly of the installation of two 15,000 kilo-volt-ampere turbo-generators, with the necessary condensers and other auxiliaries, the rearrangement of and additions to the present boiler system, the installation of Cox stokers and coal storage and ash-handling improvements.

"During the year the Board of Directors deemed it advisable to provide for the depreciation in the value of the securities owned, as shown on the books, which will naturally follow when the coal has been mined out of the property of the Harwood Coal Co.,

JANUARY 1 TO APRIL 30, 1917

and therefore authorized the establishment of a 'reserve for the amortization of purchased price of securities owned' by crediting thereto out of income an amount equal to the dividends received from the Harwood Coal Co. and Harwood Store Co. after Jan. 1, 1916."

HASELIP (JAMES) OIL & GAS & REFINING CO. (THE).

¹(1) Incorporated on March 22, 1917, in Delaware, with a capital of \$1,000,000, to drill and bore for oil and natural gas, etc. Incorporators: K. M. Dougherty, C. Fearon and E. Lynch, Wilmington, Del.

HASKELL & BARKER CAR CO., INC.

¹(1) Meeting Time Changed.—Announced Jan. 10, 1917, that at the annual meeting of stockholders of this company the directors were re-elected and it was decided to change the date of the annual meeting from the second Tuesday in January to the second Wednesday of April.

—Apr.

¹(1) Report, Year Ended Jan. 31, 1917, shows gross earnings of \$1,135,367 net earnings after renewals and special maintenance and reserve for special renewals amounting to \$694,618 and a surplus after dividends of \$529,618.

¹(2) Earnings on Stock.—It was announced April 3, 1917, that this company's net earnings of \$694,618 for the year ended Jan. 31, 1917, are equal to 7.42% earned on \$9,332,000 capital stock of no par value, of which there are 220,000 shares outstanding.

¹(3) Balance Sheet, as of Jan. 31, 1917, shows a profit and loss surplus of \$529,617.

HATHAWAY MANUFACTURING CO.

¹(1) Stock Dividend.—Announced April 12, 1917, that this company had declared a 100% stock dividend, payable to shareholders of record March 10. The capital is thereby increased from \$800,000 to \$1,600,000.

HAWAIIAN AGRICULTURAL CO.

¹(1) Extra Dividend.—This company, of Hawaii, in January, 1917, paid a dividend of 30 cts. monthly and \$1.20 extra, or \$150,000.

HAWAIIAN COMMERCIAL & SUGAR CO.

¹(1) Extra Dividend.—Announced March 20, 1917, that this company had declared an extra dividend of 50 cents a share, in addition to the regular monthly dividend of 25 cents, payable April 5 to stock of record March 23.

—Apr.

¹(1) Report, Year Ended Dec. 31, 1916, as issued by Pres. F. F. Baldwin, shows

the company marketed during the year 59,035 tons, the second largest crop in its history. The company earned in excess of 35% on the capital stock, the total earnings being \$3,567,754. Dividends were \$3,000,000, or \$7.50 per share on the 400,000 shares. This is 30% on its par value of 25. The company closed the year with a balance carried forward of \$1,985,755. Because of climatic conditions the crop of 1917 will fall below early estimates. Pres. Baldwin does not expect to harvest more than 55,000 tons, a falling off of almost 5,000 tons.

HAWAIIAN ELECTRIC CO.

¹(1) Dividend.—Announced that this company in January, 1917, paid a dividend of \$1 monthly, or \$10,000.

—Mar.

¹(1) Report, Year Ended Dec. 31, 1916, shows the company earned \$1,189,290 in 1916 from a crop of 27,900 tons grown on 4,502 acres, including 1,065 acres in the Gay and Robinson fields. Earnings for the year were at the rate of \$7.93 per share on the 150,000 shares of capital stock. Dividends paid amounted to \$1,050,000 and the company closed the year with a balance of \$831,849. The plantation manager estimates the 1917 crop at 24,238 tons.

HAWLEY MOTOR DEVICES CO.

¹(1) Incorporated on March 27, 1917, in Delaware, with a capital of \$2,000,000 to manufacture gas generators and substitutes for carburetors on gasoline motors. Incorporators: A. W. Posey, H. Bonsal and E. G. Adams, Wilmington, Del.

HAWS (A. J.) & CO.

¹(1) Sale.—See Haws Refractories Co.—Item No. 1.

HAWS REFRACTORIES CO.,

JOHNSTOWN, PA.
¹(1) Incorporated on Jan. 20, 1917, in Pennsylvania, with a capital of \$250,000. Incorporators: Campbell Patch, Harry D. Thomas and Harry L. Tredennick, Johnstown, Pa.

—Feb.

¹(1) Acquisition.—It was announced at Johnstown, Pa., Feb. 23, 1917, that a deal involving the payment of approximately \$800,000 had been consummated in the purchase of the Johnstown plant and properties in Mifflin, Juniata and Huntingdon Counties, Pa., from A. J. Haws & Co. by this company. The purchase became a matter of record when deeds and a mortgage for \$700,000 to secure indebtedness were filed for recording.

The purchase of the A. J. Haws & Co. properties was the first step in a campaign of plant extension and improvement that will involve the expenditure of several hundred thousand dollars.

The new plant will have a production capacity of between 80,000 and 100,000 nine-inch bricks per day, which will double the output of the company. This plant will be ready to begin operations about May 1, 1917.

HAYES IONIAN CO., IONIA, MICH.

¹(1) Capital Increased.—On April 4, 1917, the company filed notice at Lansing, Mich., of an increase in capital stock from \$162,500 to \$757,500.

HAYES MANUFACTURING CO.

¹(1) Bonds Called for Payment.—It was announced Feb. 23, 1917, that 23 of this company's first mortgage 6% bonds of 1913 of \$1,000 and nine of \$500 had been called for payment at 108 and interest on April 1, 1917, at the Union Trust Co., Detroit, Mich.

—Mar.

¹(1) Earnings, January, 1917.—It was announced March 2, 1917, that this company's earnings for January, 1917, amounting to \$55,947, were at the rate of 40% on the stock. The company re-

JANUARY 1 TO APRIL 30, 1917

cently increased its capital from \$625,000 to \$1,500,000. The company in making public its first balance sheet shows assets of \$2,192,124.

HAYTIAN-AMERICAN CORP., MILLBROOK, N. Y.

1(1) Incorporated on Jan. 8, 1917, in New York, with a capital of 60,000 shares, \$100 each; 120,000 shares, no par value; to carry on business with \$6,000,000 as brokers, manufacturers, construction financial agents and developers in Republic of Haiti. Incorporators: H. C. Straude, Port au Prince, Haiti; E. H. York and G. B. Caldwell, 2 W. 45th St., Manhattan, N. Y.

1(2) To Develop Hayti's Resources.—It was stated Jan. 27, 1917, that the incorporation of this company in New York Jan. 8, 1917, by New York, Chicago and Cincinnati bankers, is the first definite step toward real development of the resources of Hayti by American capital. (For the incorporation item, see issue of Jan. 10; page 39.)

The company has acquired the control of the railroad, electric light plant, wharf and warehouses in Port au Prince, the capital and principal seaport of the island, which are now being operated profitably under exclusive concessions and which serve the most thickly populated portion of the country. The company also has acquired control of the electric light property at Cape Haitien.

With possession of those facilities the company plans to cultivate and grind sugar cane, principally in the fertile plains of Cul de Sac and Leogane. This, it is believed, will be a most profitable undertaking, both in itself and for the community in the island.

To that end the corporation has obtained control and ownership of land in excess of 20,000 acres and will install a centrale with a capacity of 2,000 tons a day.

1(3) Stock Offering.—Announcement was made Jan. 29, 1917, of the offering, at 100 and accrued dividend, of \$5,500,000 of 7% convertible pfd. stock of this company by a syndicate headed by Breed, Elliott & Harrison and P. W. Chapman & Co. Associated with these firms are large financial institutions throughout the United States. The pfd. shares will be accompanied by 25% in ordinary common shares and 50% in founders shares.

The company's capital consists of \$6,000,000 pfd. stock, par \$100, callable at \$110, of which \$5,500,000 is issued and \$500,000 is reserved for future corporate purposes; 60,000 shares ordinary common stock, without par value, of which 2,500 shares are held in the treasury, and 60,000 shares founders stock, without par value. The corporation has no bonded indebtedness and none can be created without the assent of 75% of the pfd. shares.

This corporation is the result of an extended investigation instituted at the time it became apparent that the United States was to enter into a protectorate over the Haytian Republic.

1(4) Directors.—On Jan. 29, 1917, it was stated that the directorate of this company includes:

F. A. Dillingham, Pres., Guanica Central; Sec. South Porto Rico Sugar Co., New York.

E. D. Douglas, Williams, Diamond & Co.; Treas. American Hawaiian Steamship Co., San Francisco.

Philip W. Henry, Vice-Pres., American International Corp., New York.

George E. Turnure, Lawrence, Turnure & Co., New York.

Stacey C. Richmond, Winslow, Lanier & Co., New York.

W. W. Lanahan, W. W. Lanahan & Co., Baltimore.

Edward H. York, Ervin & Co., Philadelphia.

E. Pavenstedt, Treas., South Porto Rico Sugar Co., New York.

H. C. Staude, G. Kettel & Co., Port au Prince, Hayti.

H. R. Tippenhauer, Haytian American Corporation, New York.

W. K. Dick, Brooklyn.
Hayden B. Harris, New York.
George B. Caldwell, New York.
S. Mallet-Prevost of the law firm of Curtis, Mallet-Prevost & Colt, New York.

P. W. Chapman, P. W. Chapman & Co., Chicago and New York.
C. Edgar Elliott, Breed, Elliott & Harrison, Chicago, Indianapolis, Cincinnati.

HAYTI OIL & REFINING CO.

1(1) Status.—It was stated Jan. 18, 1917, that this company, organized under the laws of New York, with an authorized capital stock of 200,000 shares, without par value, and presently to be issued, is to acquire all the capital stock, except qualifying shares, of the Compagnie Haitienne de Petrole, a subsidiary to be organized under the laws of the Republic of Hayti. The latter company, through the acquisition of a concession granted by the Republic of Hayti, in effect will have absolute control of the oil industry of that country, it is stated in a circular issued by Shivers & Co., syndicate managers, New York.

The Haytian Government shares in the profits of the subsidiary to the extent of 4½ cents a gallon on all illuminating oil sold in Hayti, in return for which the refinery, shares, etc., are exempt from taxes, the circular states.

The subsidiary company is to erect a modern refinery having a capacity of 17,000 gallons a day. The assets, in addition to the concession, will be approximately as follows: Plant investment, \$175,000; working capital, \$175,000; liabilities, none.

The net earnings for the first year's operation are expected to be in excess of \$275,000, or \$1.375 per share, based on which the company estimates it will be able to pay dividends of \$1 per share and set aside a surplus.

HEALD MACHINE CO.

1(1) Capital Increase.—It was stated Feb. 23, 1917, that this company, at its annual stockholders' meeting, had voted to increase its capital stock from \$100,000 to \$250,000, to take care of its rapidly increasing business, amounting to approximately \$1,000,000 a year. The increase in working capital is to be taken from the \$500,000 surplus, and the 1,500 additional shares will be distributed pro rata among its stockholders.

The annual report of the company shows the business to be 50% larger than in 1915, and three times larger than in 1914.

It was also stated the new addition to the plant had been placed in operation.

HEALDTON PETROLEUM CO.

1(1) Incorporated in April, 1917, in Oklahoma, with a capital of \$250,000. Incorporators: S. J. Cullinan, Roy M. Johnson and L. S. Dolman.

HEARD NATIONAL BANK, JACKSONVILLE, FLA.

1(1) Closed.—Announced Jan. 16, 1917, that this bank had been closed, a notice on the door stating that its affairs were in the hands of a Federal bank examiner. Suspension was attributed by Comptroller Williams to mismanagement.

HECLA MINING CO.

1(1) Curb Market Rullng.—It was announced April 3, 1917, that the listing committee of the New York Curb Market Association had ruled that all transactions in this company's stock to and including April 3 should be divided on, up to and including April 3, and ex-dividend on all transactions on April 4. A due bill for the dividend, which will be paid April 20 to holders of record March 28, must accompany all deliveries from March 27 to April 4, inclusive.

• HEDLEY GOLD MINING CO.

1(1) Extra Dividend.—Announced March 9, 1917, that this company had declared

an extra dividend of 2% in addition to the quarterly dividend of 3%, payable March 31 to stock of record March 24.

—Apr.

1(1) Report, Year Ended Dec. 31, 1916, shows:
1916 1915
Net profits \$248,617 \$374,745
Surp. after divs. 8,617 74,745

1(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$443,687, compared with \$435,070 Dec. 31, 1915.

1(3) Net Profits, 1916, Equal to \$2.07 a Share.—This company's 1916 net profits are equal to \$2.07 a share earned on 120,000 shares of capital stock, as compared with \$3.12 a share earned in 1915.

HEINE SAFETY BOILER CO.

1(1) Bond Offering.—It was announced Feb. 23, 1917, that Smith, Moore & Co., St. Louis, are offering \$250,000 first mortgage 6% serial gold bonds, dated Oct. 1, 1916, due serially, \$20,000 each Oct. 1, 1917, to 1927. The company has a capital stock of \$500,000. The bonds are subject to call on any interest date on 30 days' notice, all or in part at 102½ and interest.

HELBURN, THOMPSON CO., SALEM, MASS.

1(1) Incorporated in February, 1917, in Massachusetts, with a capital of \$250,000, to deal in leather and merchandise. Pres., J. Willard Helburn, Salem; Treas., Arthur F. Johnson, Cambridge; Clerk, Hervey W. King, Milton.

HELENA LIGHT & RY. CO.

1(1) Improvements Planned.—It was announced Feb. 23, 1917, that this company had completed plans for improvements to its system in Helena amounting to \$80,000. The improvements include the installation of new ties and heavier rails on the East Helena line, the reconstruction of the upper Broadwater line to a great extent and the addition of several new cars.

HELM (GEO. W.) CO., INC., JERSEY CITY, N. J.

1(1) Incorporated on Feb. 21, 1917, in New York, with a capital of \$8,000,000, to deal in leaf tobacco. Representative: Edmund D. Christian, 111 Fifth Ave., New York.

• HELME (GEORGE W.) CO.

1(1) Earnings Statement, Year Ended Dec. 31, 1916, compares as follows:

HENDERSON COTTON OIL & MANUFACTURING CO.

1(1) Organized.—It was announced March 14, 1917, that this company, Shreveport, La., capital \$400,000, had been organized, with R. W. Henderson, Talladega, Ala., Pres.; M. C. Stock-

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

bridge, Ruston, La., Vice-Pres. & Mgr. The company will build a cottonseed-oil mill to cost \$150,000, with daily capacity of 200 tons cottonseed.

HENDERSON OIL MILL CO.

*(1) New Company Organized.—It was announced March 8, 1917, that this company, capital \$400,000, Shreveport, La., had been organized with R. W. Henderson, Talladega, Ala., as Pres., and M. C. Stockbridge, Ruston, Ala., as Vice-Pres. and Gen. Mgr.

The company is a consolidation of the following: El Dorado Cotton Oil Co., El Dorado, Ark.; Warren Ice, Cotton Oil & Fertilizer Co., Warren, Ark.; Vidalia Oil Mills, Vidalia, La.; Ruston Oil Mill & Fertilizer Co., Ruston, La.; and Gibsland Oil Mill & Fertilizer Co., Gibsland, La.

The company has acquired a 10-acre tract near Shreveport, on which it will erect a cottonseed oil mill at a cost of \$150,000.

HENDERSON UNION OIL CO.

*(1) Capital Decreased.—In December, 1916, the company filed notice at Sacramento, Cal., of a decrease in capital stock from \$1,000,000 to \$100,000.

HENDEY MACHINE CO.**TOBRINGTON, CONN.**

*(1) Capital Increased.—It was announced on March 8, 1917, that this company had increased its capital stock from \$900,000 to \$1,200,000.

HEPPELL CO., INC.

*(1) Incorporated on April 6, 1917, in New York, with a capital of \$300,000, to deal in insecticides, drugs, medicines, supplies and sundries. Incorporators: A. Guggenheim and B. and H. J. Mayer, 49 Wall St., New York.

HERBERION REALTY CO.,**AKRON, O.**

*(1) Capital Increased.—On Jan. 12, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$250,000 to \$350,000.

HERCULES FIRE INSURANCE CO.**(THE)**

*(1) Incorporated on March 21, 1917, in Delaware, with a capital of \$1,000,000, to do a general insurance business. Incorporators: Glen Thompson, Salina, Kan.; Lowry Vahey and Chas. L. Moore, Oklahoma City, Okla.

HERCULES MINING CO.

*(1) Dividend Increased.—On Jan. 15, 1917, this company paid a monthly dividend of 25 cents, which was an increase of 5 cents over the last previous payment.

HERCULES POWDER CO.

*(1) Report, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Gross	\$63,419,030	\$15,715,880
Net	116,653,873	4,922,402
Surp. after int. and pfd. div.	16,284,373	4,517,794

†Net after deduction of all expenses incident to manufacture and sale, repairs, maintenance, depreciation, etc.

*(2) Earnings on Stock.—It was stated Feb. 15, 1917, that this company's 1916 surplus of \$16,284,373 is equal to 227.75% on \$7,150,000 common stock, compared with 63.18% earned on the same stock in 1915.

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$14,812,435, compared with \$5,320,562 Dec. 31, 1915.

—Mar.

*(1) Dividends.—Announced March 6, 1917, that this company had declared the regular quarterly dividend of 2% and an extra dividend of 2% in cash; also a dividend of 47%, payable in Anglo-French bonds at 94 flat.

This distribution and the cash dividends are payable March 24 to stock of record March 15.

*(2) Statement About Dividends.—On March 6, 1917, announced that in con-

nection with the distribution of the extra 47% dividend payable in Anglo-French bonds, this company made the following statement to its stockholders:

"The distribution of the remainder of the company's Anglo-French bonds is in line with the policy of distributing to stockholders all earnings that are not profitably employed in the business.

"Out of the earnings of the last two years there remains something over \$9,000,000 or about \$125 a share that will be required for working capital while our military business continues and to enable the company to extend its business if the opportunity appears, and to pass with ease through the period of readjustment that must necessarily follow the close of the war.

"While still adding substantial sums to surplus out of current earnings, the board believes that a quarterly rate of at least \$4 a share (approximately 6% a year on common stock and surplus Jan. 1, 1917, after deducting Anglo-French bonds), can be maintained until such time as the restoration of normal conditions will permit either the distribution of present working capital as extra dividends or its investment in extensions of our business, which should bring about a permanent increase in our regular dividend rate."

HERMAN (JOSEPH M.) SHOE CO.

*(1) Reincorporated.—It was announced Feb. 23, 1917, that this company, incorporated under the laws of Maine, had been reincorporated under Massachusetts laws with an authorized capital of \$300,000, divided into 500 pfd. and 2,500 common shares, par \$100.

HERR CORP.

*(1) Incorporated on Jan. 26, 1917, in New Jersey, with a capital of \$2,400,000, to deal in real estate. Incorporators: Philip L. Poe, J. Craig McLanahan and E. McClure Rouge, Baltimore.

HERRESHOFF MFG. CO.

*(1) To Be Taken Over.—It was announced Feb. 7, 1917, that a new corporation had been formed to take over this company, Bristol, R. I., with Robert W. Emmons, 2d, of Boston, at its head as syndicate manager. Nathaniel G. Herreshoff will be the active head of the new company, which has Boston and New York capital invested in it.

A. Lorind Swasey and the firm of Swasey, Raymond & Page, Inc., Boston, specialists in power craft, will become a part of the new company. Mr. Emmons, Charles Francis Adams, George Nichols, of New York, and others have bought the interest of John B. Herreshoff, deceased.

HERRESHOFF MANUFACTURING CO., INC.

*(1) Incorporated on Feb. 28, 1917, in New York, with a capital of 3,000 shares, \$100 each, 3,000 shares no par value; to carry on shipbuilding business \$450,000. Incorporators: E. M. Souza, N. G. Herreshoff and R. W. Emmons, 2d, Boston.

HERSEY MANUFACTURING CO.,**BOSTON, MASS.**

*(1) Incorporated in March, 1917, in Massachusetts, with a capital of \$500,000, to manufacture motors and machinery. Francis C. Hersey is Pres. and Francis C. Hersey, Jr., treasurer. These gentlemen, with W. A. Hersey, are directors.

HERZOG ART FURNITURE CO.

*(1) Contract.—Announced March 16, 1917, that this company, Saginaw, Mich., had closed a contract with the Sonora Phonograph Corp. for goods totalling \$25,000,000. The contract covers a period of 15 years, with a minimum annual delivery of \$500,000 worth of phonograph cabinets and a maximum of \$2,000,000 annually, delivered and inspected at Saginaw.

HESSION TILLER & TRACTOR CORP.

*(1) Incorporated on April 18, 1917, in Delaware, with a capital of \$10,000,000,

to manufacture all kinds of farm machinery. Incorporators: C. Fearon, K. M. Dougherty and Ferris Giles, Wilmington, Del.

HETRICK HOSIERY MILLS.

*(1) Branch Plant.—It was announced at Columbia, S. C., Feb. 13, 1917, that this company would build a branch plant at Anderson, S. C., investing in it from \$33,000 to \$48,000.

HEUSCH FOOD CO., INC.,**DOVER, DEL.**

*(1) Incorporated on April 3, 1917, in New York, with a capital of \$1,000,000, to deal in infants' and invalids' food, food products and beverages. Representative: H. Grass, 233 Broadway, New York.

HEYWOOD BROS. & WAKEFIELD CO.

*(1) Earnings Discussion.—On March 5, 1917, the "Boston News Bureau" said that this company is another of the smaller New England Industrials whose earnings in 1916 felt the stimulus of rising prices and national prosperity, both gross sales and net profit reaching record levels at \$8,750,000 and \$1,600,000 respectively.

Though gross sales registered an increase of \$1,750,000 the big increase was in net, which, according to balance sheet comparisons, more than doubled the 1915 showing. Exact net profits in 1916 apparently figure out at \$1,615,639, as against \$729,822 the year previous. In addition to the \$828,957 increase in profit and loss surplus there should be included in profits the \$186,682 decrease in plant account, which in 1916 was actually benefitted by the erection of new fireproofing buildings at Gardner and which at \$2,118,000 compares with \$3,900,000 back in 1903.

Heywood, therefore, earned a balance for its \$3,000,000 common stock of \$1,375,639, the equivalent of nearly \$46 a share. In four years Heywood has earned a total of 100% on its common stock—which helps to make clear the conservatism of the recent \$5 extra dividend and an increase in the regular distribution from 6% to 8%. There are those who believe that sooner or later Heywood directors will see fit to capitalize a portion of its rapidly growing surplus.

HICKORY SPINNING CO.

*(1) New Plant.—It was announced Jan. 30, 1917, that this company, Hickory, N. C., contemplated building a plant of 5,000 spindles. The company recently was incorporated with a capital of \$300,000.

HIGRADE MOTORS CO.,**GRAND RAPIDS, MICH.**

*(1) Organized.—The "Iron Age" April 26, 1917, stated that this company had been organized and, it is reported, is looking for a factory site. It is capitalized at \$250,000, with more than \$100,000 paid in. The officers are: J. Elmer Pratt, Pres.; L. W. Coppock, Vice-Pres.; W. J. Loomis, Sec'y, and Raymond W. Starr, Treas.

HILL-CHEESMAN MANUFACTURING CO.

*(1) Merger.—See Hill-Standard Co., Anderson, Ind.—Item No. 2.

HILLCREST COLLIERIES, LTD.

*(1) Report, Year Ended Dec. 31, 1916, shows net profits amounting to \$81,593, as against \$85,846 in 1915, a decrease of \$4,253. Miscellaneous revenue was \$9,663, against \$9,880 in 1915. This with the balance brought forward on Jan. 1, 1916, of \$160,000, brought the total credit up to \$251,266. Of this amount \$49,399 was required for pfd. dividends, while bond interest amounted to \$16,250 and \$15,000 was added to reserve, leaving the balance carried forward as \$170,617.

HILLCREST COPPER CO.,**SPOKANE, WASH.**

*(1) Incorporated on April 9, 1917, in Washington, with a capital of \$1,500,000.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Incorporators: Harley C. McCullough, Chas. F. Clough and Andrew Laidlaw.

HILL PUBLISHING CO.

¹(1) Merger Completed.—See McGraw Publishing Co., Inc.—Item No. 1.

HILL-STANDARD CO.,

ANDERSON, IND.

¹(1) Incorporated in February, 1917, in Indiana, with a capital of \$600,000. Directors: Hugh Hill, James M. Starr, Walter H. Fairchild, Isaac C. Ash and Clayton E. Cheesman.

²(2) New Company—Merger.—It was announced Feb. 19, 1917, that this company, incorporated with a capital of \$600,000, had completed plans for merging the plant of the Hill-Cheesman Manufacturing Co., Toledo, O., with the Hill-Standard factory at Anderson. The capacity of the latter will be doubled. Buildings to cost \$40,000 are to be erected. The company had orders for more than 1,000,000 wheels for children's vehicles, and will add the manufacture of wheels for farm machinery.

HINDE & DAUCH PAPER CO.,

SANDUSKY, O.

¹(1) Capital Increased.—On Feb. 19, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$2,000,000 to \$5,000,000.

HIRST CHICAGO MINING CO.,

SEATTLE, WASH.

¹(1) Incorporated on Jan. 30, 1917, in Washington, with a capital of \$1,000,000. Incorporators: Wm. N. Armstrong and R. E. Hutchinson.

HOAGLAND CORP. (THE).

¹(1) Incorporated on Jan. 18, 1917, in Delaware, with a capital of \$2,000,000, to purchase, lease, hold and own real estate. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

HOLD-FAST CUE TIP CO.,

PHILADELPHIA.

⁴(1) Incorporated on April 18, 1917, in Delaware, with a capital of \$600,000, to manufacture cue tips for billiard and pool tables, etc. Incorporators: Wray C. Arnold and H. Wolfender, Philadelphia.

HOLEPROOF HOSIERY CO.

²(1) Capital Stock Increase.—On March 27, 1917, this company filed notice at Madison, Wis., of an increase in capital stock from \$500,000 to \$1,000,000.

HOLIHAN MANUFACTURING CO.

⁴(1) Name Changed.—It was announced March 31, 1917, that at the annual meeting of this company the name was changed to the Motors Metal Manufacturing Co. The firm manufactures metal stampings for motors.

Gustavus D. Pope and Sidney Ferriess were added to the directorate. The other directors are H. A. Burnett, L. N. Allen, Morris Friedberg and Charles R. Talbot. The officers are: Charles R. Talbot, Pres.; H. A. Burnett, Vice-Pres., and William Christian, Sec'y-Treas. and Gen. Mgr.

HOLLAND CANNING CO.

⁴(1) Dividend.—Announced Jan. 20, 1917, that this company had declared a dividend of 10%. The company plans to place a small block of stock on the market.

²(2) New Officers.—Announced Jan. 20, 1917, that at the annual meeting of this company, Holland, Mich., the following officers were elected: Luke Lugers, Pres.; C. J. Lokker, Vice-Pres.; William Vander Ven, Mgr.; George E. Kollen, Treas. Directors: Luke Lugers, George E. Kollen, Daniel Ten Cate, C. J. Lokker, H. Brinkman, W. E. Van Dyke, William Vander Ven and Benjamin Brower.

HOLLEY SECURITIES CORP.

²(1) Incorporated on March 20, 1917, in New York, with a capital of 5,000 shares, \$100 each, 5,000 shares, no par value, active capital \$525,000, to deal in stocks and bonds. Incorporators: N. Shiman, G. C. Smith and A. T. Holley, Hackensack, N. J.

• HOLLINGER CONSOLIDATED GOLD MINES, LTD.

¹(1) Earnings, Four Weeks Ended Dec. 1, 1916.—It was announced Jan. 1, 1916, that this company earned its dividend in the four weeks ending Dec. 1, with a narrow margin over. The operation of the mine appears to be still affected by the scarcity of labor and the high cost of supplies.

The working costs per ton advanced 10 cents to \$3.74, but there was still a margin between this and the average value of the ore treated of over \$5 per ton.

The mill was operated to but 90% of its capacity, but the tonnage treated was, with one exception, a record in the history of the company, being over 50,000 tons of ore, having an average value of \$8.78.

The value of the current assets is \$438,000 and of gold assets \$471,000.

—Feb.

²(1) Operating Profits, 1916.—It was stated Jan. 30, 1917, that profits of this company for the last 28 days of 1916 fell below those of the preceding three months and were \$21,943 less than the dividend requirements.

The operating profits for the year were \$2,868,984. The current and gold assets at the end of the year amounted to \$981,263, with current liabilities only \$425,211.

The average value of the ore treated in the last period of the year was \$8.49, which is 29 cents below that of the previous period and lower than any month of the year. At the same time there was an advance in working costs over the two preceding months.

During December the company received \$180,000 in premiums on the new stock issue, which was applied to the deficit existing since the merger. The deficit was reduced to \$79,015.

²(2) Dividend Discussion.—On Feb. 17, 1917, the Toronto "Globe" said: "Although no official announcement has yet been forthcoming, the 'Globe' has authority for the statement that the directors of Hollinger Consolidated Gold Mines have at present under consideration the reduction of the existing dividend by one-half, which will make the rate 6½% per annum.

"This prudent step will be taken to conserve the assets of the company and to meet a condition of exorbitant costs, both of labor and supplies. These conditions are at present prevailing in all the northern mining camps, the shortage of unskilled labor being particularly acute."

²(3) Earnings, January, 1917.—It was stated Feb. 27, 1917, that this company earned gross operating profits, before new construction and depreciation, of \$217,000 in the 28 days ending Jan. 28, 1917, a decrease of \$7,067, as compared with the previous period.

The annual report showed a deficit of \$298,490 Jan. 1, 1916.

During the first 28 days of January there was milled 48,119 tons of \$8.71 ore.

—Mar.

²(1) Dividends on 6½% Basis.—It was stated March 6, 1917, that at the annual meeting of the stockholders of this company on that date the decision of the board to pay a dividend of 1% every eight weeks instead of making the distribution each four weeks was announced. The rate thus becomes 6½% instead of 13% a year. The stockholders re-elected the retiring directors, and J. R. Timmins in addition.

²(2) Comment on February Profits.—It was reported on March 27, 1917, that the exhibit of this company for the 28 days ending Feb. 25 showed a gross of \$210,868. It was from the profits of this period that dividend No. 56 was paid, and apparently the next statement will show a considerably larger accumulation of cash.

There has not been much change in the Hollinger situation as disclosed by the current report, which is signed by A. R. Globe, Asst. Gen. Mgr. The average value of the ore treated was \$8.54, which is below that of previous months, except of December. There was a slight gain in the tonnage milled, but the labor conditions under which the operation of the mine is being conducted are shown by the fact that the mill ran only 83% of the possible running time. Working costs advanced further to \$3.96 per ton.

Nothing is said in the monthly statement of the recent find on the Acme property, regarding which some exaggerated reports have been published. It is understood, however, that a vein on the 425-foot level of the Acme has been yielding some exceptionally rich ore and that these extraordinarily high values are being maintained. It is not a new discovery, as the vein on the other levels has been very rich.

—Apr.

⁴(1) Resumption of 1% Dividends Likely.—On April 15, 1917, the "Montreal Times," Montreal, Que., said:

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

"Toronto hears a report that Hollinger will shortly resume its regular four-weekly dividend of 1 per cent. Unless unforeseen obstacles arise Hollinger Consolidated will be treating in the neighborhood of 2,800 tons of ore every 24 hours by the end of June. This, it is understood, will permit of the resumption of the regular four-weekly dividend of 1%. It was well understood that the reduction was only temporary."

"(2) Profit of \$210,749. Four Weeks Ended March 25.—The "Toronto World," April 24, 1917, stated that this company made a gross profit of \$210,749 in the four weeks ended March 25, or only \$119.16 less than was reported for the preceding period. This is \$87,749 in excess of the dividend requirements.

Not only are the mines meeting the dividend, but the surplus profits of \$146,717 in the past three periods of the year had reduced the nominal deficit carried over into the year until it was \$122,837, whereas current assets are \$934,064, as against current liabilities of \$492,176.

Were it not for the labor menace, which at the worst is temporary, the management is assured that another few months would witness the completion of the enlarged mill, the preparation of the mines for much greater production and a stronger cash position.

Of the liabilities, \$439,260 pertains to the new plant and general equipment, toward which there was an expenditure of \$82,963 in March, indicating that there is no let-up in the expansion policy.

HOLMES AUTOMOBILE & MANUFACTURING CO.

"(1) Construction Plans.—It was announced Jan. 17, 1917, that this company, Canton, O., organized to manufacture automobiles with air-cooled engines, had completed plans for the erection of a reinforced concrete factory, providing 120,000 sq. ft. of floor space. Arthur Holmes, for a number of years chief engineer of the Franklin Motor Car Co., Syracuse, N. Y., is Pres. of the company, which will be incorporated with a capital of \$2,500,000.

—Mar.

"(1) Incorporated on March 8, 1917, in Ohio, with a capital of \$2,500,000. Incorporators: Arthur Holmes, Clarence G. Harbruck, Geo. B. Belden, H. E. Black and H. L. Alexander.

—Apr.

"(1) Acquisition.—It was announced March 31, 1917, that this company, incorporated with a capital of \$2,500,000, had purchased the plant of the Republic Stamping & Enameling Co., including a tract of 23 acres. H. C. Milligan, Pres. of the Republic Co., states that engineers are preparing plans for buildings to cost approximately \$500,000, that will be erected as an addition to the west plant on Harrison avenue, Canton, O.

HOLTON (FRANK) & CO., CHICAGO.

"(1) Capital Increased.—On March 19, 1917, the company filed notice at Springfield, Ill., of an increase in capital from \$300,000 to \$500,000.

HOLZWORTH CO., INC.

"(1) Status.—It was stated March 11, 1917, that this company operates 5 and 10-cent stores at Milwaukee and Oshkosh, Wis., and Aurora, Danville and Rock Island, Ill. The two Wisconsin stores were opened in 1915, the others in 1916. The company reports net earnings in 1916 at \$11,603. Its balance sheet of Jan. 1 shows \$84,075 of net tangible assets.

It does not show the amount of stock outstanding, but a circular says \$25,960 of pfd. has been issued and that quarterly dividends of 1½% each have been paid on it to date. The company is selling more pfd. stock to finance the opening of new stores.

HOMA OIL CO.

"(1) Stock of Carden Oil Co. Acquired.—On April 14, 1917, this company announced that it had acquired all the

stock of the Carden Oil Co., which owns leases on about 960 acres in the producing area of Mound Valley in Labette County, Kans., and approximately 60,000 acres in other parts of the same State. These wells are producing from a shallow sand at a depth of about 630 feet. The company has a pipe line connection with the Prairie Oil & Gas Co.

HOMAOKLA OIL CO.

"(1) Incorporated on Jan. 29, 1917, in Delaware, with a capital of \$500,000, to acquire and develop oil lands. Incorporators: J. M. Burk, F. Julius Fohrs and N. J. Gubser, Tulsa, Okla.

HOME PROJECTOR & MOVIE PHONE CO. (THE), INC.

"(1) Incorporated on Feb. 5, 1917, in New York, with a capital of \$1,000,000, to deal in cinematographic machines, photographic apparatus, materials and accessories. Incorporators: C. Ru-roede, C. Wurm and F. von Madaler, 1,772 69th St., Brooklyn, N. Y.

HOMER & CORTLAND GAS LIGHT CO.

"(1) Directors Re-elected.—Announced Jan. 25, 1917, that at this company's annual meeting retiring directors were re-elected.

HOMESTAKE MINING CO.

"(1) Report, Year Ended Dec. 31, 1916, shows net earnings amounting to \$1,823,528, a decrease of \$322,017, compared with 1915. The net earnings are equal to 7.26% on the \$25,116,000 capital stock, against 9.33% earned on same capitalization previous year. Dividends to the amount of \$2,210,208 were distributed in 1916.

"(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$949,933, compared with \$1,032,932 Dec. 31, 1915.

HOME SUPPLY CO.

"(1) Incorporated on Jan. 13, 1917, in Delaware, with a capital of \$500,000, to do a general mail-order business. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

HOME TELEPHONE CO., COVINA, CAL.

"(1) Bond Issue Permit Sought.—This company April 10, 1917, filed with the California Railroad Commission an application for authority to issue \$10,000 of 6% first mortgage refunding gold bonds, to be sold at par, with permission to pay a commission of 5%, the money to be for additions and betterments. The company has an authorized capital stock of \$200,000, \$92,450 of which is outstanding. The gross earnings for 1916 were \$38,963, and the net income was \$7,819.

HOME TELEPHONE & TELEGRAPH CO., LOS ANGELES, CAL.

"(1) Report, Year Ended Dec. 31, 1916, shows gross operating revenue of \$2,125,943; net operating revenue of \$704,311; and net corporate income of \$373,012.

"(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$395,226.

HOME TELEPHONE & TELEGRAPH CO., PASADENA, CAL.

"(1) Report, Year Ended Dec. 31, 1916, shows gross operating revenue of \$303,547 and net corporate loss for the year of \$32,965. The total deficit Dec. 31, 1916, was \$180,510.

HONOLULU CONSOLIDATED OIL CO.

"(1) Government Seeks Oil Lands.—It was announced at Los Angeles, Cal., Feb. 27, 1917, that seven suits to recover an aggregate of 2,270 acres of oil land in the midway field in Kern County, Cal., said to be worth \$20,000,000, had been filed in the United States District Court there by the United States Government against this company, Southern California Gas Co., Mid-

way Gas Co. and Standard Oil Co. Appointment of a receiver and an accounting are asked by the Government in each suit.

The land involved is a portion of the second naval reserve set apart in 1912 by the Government. The suits are filed under the Taft withdrawal order of 1909.

HONOLULU PLANTATION CO.

"(1) New Vice-President.—It was stated March 1, 1917, that at the annual meeting of this company William Matson was elected Vice-Pres. to fill the vacancy caused by the death of N. Ohlandt. J. A. Buck, Jr., was elected a director to fill Mr. Ohlandt's place.

"(2) Report, Year Ended Dec. 31, 1916, shows net profits of \$1,188,900, equivalent to \$11.89 per share, or 23.78%, at the par value of \$50. Dividends for the year amounted to \$710,000, or \$7.10 per share, equivalent to 14.20%.

HOOD RUBBER CO.

A complete description of this company appears in the "Miscellaneous Book" in your card cabinet.

"(2) Report, Year Ended Dec. 31, 1916, —It was announced Jan. 30, 1917, that this company, America's second largest producer of rubber footwear, had a remarkably successful year in 1916. Gross sales exceeded all former records, and came close to \$10,000,000.

The early snows in the winter were a big help to 1917 sales.

Hood Rubber is practically sold up at capacity operations throughout the balance of 1917.

The new tire plant will go into operation some time in 1917, when output of tires will be trebled.

—Feb.

"(1) Status.—It was stated Feb. 24, 1917, that this company, America's second largest manufacturer of rubber footwear, during the fiscal 12 months to Dec. 31, 1916, broke all records for shipments, the total amounting to \$11,660,000.

Hood Rubber has outstanding \$2,750,000 non-taxable pfd., well distributed among a high-class clientele of New England investors. On Dec. 31, 1916, the corporation had net assets for this pfd. of \$6,326,000, which is nearly two and one-third times the par of the pfd. issue.

During 1916 the company issued \$250,000 additional pfd. stock as part of the cost of the \$475,000 devoted to construction. The balance of new construction outlays was met without new financing.

The 1916 year was another period of important physical expansion for Hood Rubber. On Dec. 31 the company had 1,036,000 square feet of floor space devoted to its business, against 883,311 at the close of 1915, an increase of 152,689 feet, against 109,000 in 1915. The corporation directly or indirectly now owns nearly 58 acres of land in Watertown, against 43½ acres in 1915.

Gross sales of Hood Rubber in 1916 aggregated \$11,666,501, against \$9,083,693 in 1915 and \$8,579,479 in 1914. This was a gain of better than 28% over the 1915 results.

On Dec. 31, 1916, the corporation had a net working capital of \$3,266,300, against \$3,159,048 at the end of 1915 and \$516,000 in excess of the par of the entire pfd. issue.

A feature of the Dec. 31, 1916, balance sheet is that it contained no liabilities whatever aside from the \$2,280,000 of notes payable. The company has no contingent liabilities whatever and has never approximated the maximum of its agreed lines of discounts at its own own banks. During 1916 the company earned the 7% dividend on the pfd. four times over, and the common dividend, after deducting pfd. dividends, was earned three times over.

The company's new tire factory should be occupied some time in March and will have a daily capacity of 750 tires, against 300.

The footwear departments are now working on a ticket calling for 38,000 pairs of rubber boots and shoes daily

JANUARY 1 TO APRIL 30, 1917

and 36,000 pairs of vulcanized rubber canvas shoes daily, or a total of 74,000 pairs of footwear each 24 hours.

The balance sheet as of Dec. 31, 1916, shows a profit and loss surplus of \$1,076,700, after a common stock dividend of \$500,000, compared with \$1,274,850 Dec. 31, 1915 and \$1,168,148 Dec. 31, 1914.

HOOSAC COTTON MILLS.

*(1) Balance Sheet, as of Dec. 31, 1916, shows total assets of \$2,014,000, comparing with \$1,906,878 at the close of 1915. Cash and debts receivable represented \$162,938, against \$174,377; and merchandise is valued at \$547,273, contrasted with \$420,783. Accounts payable stand at \$146,578, as compared to \$100,627; the floating debt shows a reduction from \$325,000 to \$80,000, and the surplus is reported at \$370,069, in comparison with \$119,706.

HOOVEN AUTOMATIC TYPE-WRITER CORP.

*(1) Incorporated on Jan. 12, 1917, in New York, with a capital of \$3,000,000, to deal in printing and typewriting apparatus, devices, accessories and supplies. Incorporators: G. C. Patten, H. H. Hasseloff and M. E. Roberts, Manhattan Square Hotel, New York.

*(2) Stock Offering.—On Jan. 22, 1917, Bergmann & Caraher, New York, Chicago, Boston and Philadelphia, announced the offering at \$9, par \$10, of treasury shares of this company.

This company, which owns the Hooven automatic typewriter, now in widespread use in large corporate and business offices, has an outstanding capital stock of \$3,000,000. Of this total, shares to the amount of \$1,000,000 have been issued and \$2,000,000 are held in the treasury. The shares are all of one class, full-paid and non-assessable. There are no bonds, funded indebtedness or pfd. stock.

The proceeds from the sale of the \$2,000,000 treasury shares are to go into the treasury of the company for the enlargement of the manufacture and marketing of the Hooven automatic typewriter.

HOPKINS & ALLEN ARMS CO.

*(1) Financial Condition.—It was announced March 19, 1917, that this company, incorporated under the laws of Massachusetts, had filed with the Massachusetts Secretary of State a statement of its financial condition, dated Feb. 1, 1917, which compares as follows:

HOPKINS & ALLEN MACHINE GUN CO., BOSTON, MASS.

*(1) Incorporated in April, 1917, in Massachusetts, with a capital of \$500,000. Directors: Samuel Vaughan, Pres.; Francis R. Boyd, Treas., and John Noble.

HORN BROS. WOOLEN CO., LTD.

*(1) New Mill Completed.—Announcement was made from Lindsay, Ont., on April 5, 1917, that the mill erected to replace the plant of this company, which was destroyed by fire the previous Summer, had been completed. The

new structure is of standard mill construction, two stories and basement, with a floor space of 7,000 square feet.

HORN SILVER MINES CO. OF UTAH.

*(1) Listed on New York Curb.—The New York Curb Market Association April 26, 1917, announced the listing of the capital stock of the Horn Silver Mines Co. of Utah, consisting of 400,000 shares of the par value of \$1 a share.

HOUGHTON COPPER CO.

*(1) Report, Year Ended Dec. 31, 1916, shows balance of assets Dec. 31 as \$24,419. The company produced 204,274 pounds of copper from rock which yielded 10½ pounds per ton.

*(1) Suit Won.—It was stated Feb. 21, 1917, that the Texas Court of Appeals had decided in favor of this company in the suit instituted about four years previously by the State of Texas for the forfeiture to the State of about 88,000 acres of land and the recovery of damages for a large sum of money.

This suit was decided in favor of the company in the lower court, but an appeal was taken to the Court of Appeals by the State. The decision handed down is on that appeal.

The amount of land sued for by the State represented about 10% of the total acreage at that time owned by the company.

vided into 5,000 shares of \$100 each, to manufacture rifles, rifle parts and their accessories. Incorporators: Joseph Alphonse Hout, Stanislaus Edmond Desmarais, Joseph Arthur Belair, Louis Albert Dubrue and Paul Larue Dubrue. Chief place of business, Montreal, Que.

HOWARD SHIPYARDS CO.

¹(1) **Organized.**—It was stated Jan. 8, 1917, that this company, with Charles G. Brazier, New York, as Pres., has been organized. It will take over five shipyards of the Old Howard Co. One is in Jeffersonville, Ind., on which \$1,000,000 will be spent. The others at Cincinnati, Madison, Paducah, Ky., and Mound City, will divide the remaining \$3,000,000.

Ocean-going freighters of 4,000 tons and other ships will be constructed, and 1,000 men will be employed. The new company, it is said, will be the largest inland shipbuilding corporation on record in America.

¹(2) **To Be Taken Over.**—See Howard Shipyards & Dock Co.—Item No. 2.

HOWARD SHIPYARDS & DOCK CO.

¹(1) **Incorporated in January, 1917,** in Indiana, with a capital of \$4,000,000 by a syndicate of New York bankers, the Pres. being Charles D. Brazier, for the purpose of taking over all the Howard shipyards.

¹(2) **Plans.**—It was stated Jan. 17, 1917, that this new company, capital \$4,000,000, formed by a syndicate of New York bankers, with Charles D. Brazier as Pres., had completed plans for taking over the Howard shipyards, located at the following places: Howard's Shipyards, Jeffersonville, Ind.; Madison Marine Railway & Dock Co., Madison, Ind.; Queen City Marine Ry. & Dock Co., Cincinnati; Paducah Marine Railway & Dock Co., Paducah, Ky., and the Mississippi Valley Marine Ry. & Dock Co., Mound City, Ill.

HUBBARD (LEWIS) & CO., CHARLESTON, W. VA.

⁴(1) **Capital Increased to \$750,000.**—The "Pittsburgh Gazette-Times," April 25, 1917, stated that this company had been authorized by the Secretary of State at Charleston, W. Va., to increase its capital stock from \$600,000 to \$750,000 and to issue additional shares of pfd. stock, par \$100, to the 3,000 shares at present under the old authority.

HUDSON BAY CO.

⁴(1) **Status.**—It was stated April 12, 1917, that this London, Eng., corporation is one of the wealthiest and most prosperous in the world, owning one-twentieth of all the surveyed land of Western Canada and operating many of the Dominion's largest department stores and steamships, with other extensive investments.

This company was the commercial pioneer in Canada, having been incorporated in 1870. Its first trading posts were contemporaneous with the first missions and forts, frequently antedating them.

The company's lands available for settlement aggregate 5,000,000 acres. No account is taken in this statement of "post lands" north of the Saskatchewan River, which are simply held against the remote future and not handled by the company's land department. Only one other concern in Canada has more settlement land to sell, namely, the Canadian Pacific, with its 6,000,000 to 7,000,000 acres.

It has been this railway's policy to settle its lands, and it has been in good position to encourage immigration. It has enjoyed general exemption from taxation, whereas the Hudson Bay Co. pays taxes on all the land it owns. The latter has not pressed its land for sale, however, and the result has been that it is getting as good prices as the Canadian Pacific in the three prairie provinces, where all of its settlement lands are located.

Its sales of land between April 1, 1916, and Jan. 31, 1917, were 201,500 acres, at an average price of \$16.50. This compares in amount and in price favorably with the Canadian Pacific's showing.

A. M. Nanton, a director of both companies, stated that the Hudson Bay Co. in 1916 sold \$3,500,000 worth of land and the Canadian Pacific sold \$5,000,000 to \$6,000,000 worth, at an average price for both companies combined of \$16 to \$17 an acre.

It owns the mineral rights in the land it owns, and retains those rights. It sells the timber under permits, practically in the same way as the Government does. The timber problem becomes more difficult with density of settlement because the danger of fires increases. There are no large blocks of timber area in its holdings, as no large amount of its lands are contiguous.

The Hudson Bay's holdings amount to one-twentieth of the surveyed land in the West, and as unsurveyed land is surveyed one-twentieth of it reverts to the company.

HUDSON BAY ZINC CO.

⁴(1) **Listed on New York Curb.**—On April 19, 1917, the New York Curb Market Association listed 1,000,000 of this company's capital shares, par value \$5.

HUDSON & MANHATTAN R. R.

¹(1) **Passing of Bond Interest.**—On Feb. 26, 1917, it was announced that the April 1 interest on the \$33,000,000 adjustment income bonds of this company would not be paid. Directors have determined to appropriate \$340,000 to the reserve fund, which clears off surplus earnings for period ended Dec. 31, 1916. On account of the higher cost of labor, fuel and supplies, expenses have increased. This action was taken despite of the fact that the gross earnings for the year ended Dec. 31, 1916, were the largest in the history of the company.

¹(2) **Report, Year Ended Dec. 31, 1916,** shows gross revenues increased by \$383,983. Operating expenses also increased \$264,799, and other charges more than \$38,000. The balance was \$722,135, a gain of \$81,003. From the above balance there was deducted \$390,000 appropriations to reserves for contingencies, leaving a balance of \$332,135, to which there was added \$50,244, balance carried forward from prior period, making a total of \$383,379. From this amount interest paid to income bondholders amounting to \$331,020 was deducted, leaving a final balance to be carried forward of \$52,359.

—Apr.

⁴(1) **Statement by President.**—It was stated April 2, 1917, that Pres. Wilbur C. Fisk, of this company, in his annual report to stockholders, called attention to the growth of traffic which began to manifest itself late in 1915 and continued steadily throughout 1916, the passenger increase during 1916 being 6,268,438, or approximately 10.5%. Hudson Terminal buildings have continued fully rented, and at times demand for space has exceeded supply.

Mr. Fisk said in part: "In common with other railroads, this company has experienced unavoidable increases in cost of operations. These became most noticeable in the later months of the year, and were the result principally of wage increases and fuel shortage amounting in all to \$266,000. Notwith-

standing, the physical property is in excellent condition.

"After careful study your Board of Directors reached the conclusion that it was in the interest of the company and its security holders to strengthen itself financially, so that it might be fortified against any contingencies which might arise in connection with operation of its tunnels, lines of railroad and other operations. Therefore, at a meeting held Feb. 26, 1917, an appropriation of \$340,000 was made to reserve account out of net income for the period ended Dec. 31, 1916. An initial appropriation of \$50,000 to this reserve was made as of June 30, 1916, making total so appropriated to date \$390,000.

"It is the opinion of your directors that this plan if continued for a time will secure the proper, safe and adequate maintenance, equipment and operation of the tunnels, lines of railroad and other properties of the company and preserve its earning capacity, for which purpose reserves may be set aside under provisions of the adjustment income mortgage. As this appropriation absorbed surplus earnings for the period ended Dec. 31, 1916, no distribution of interest on adjustment income bonds will be made April 1, 1917.

"As of Dec. 31, 1916, there were in the treasury unsold \$126,500 face value of this company's first lien and refunding mortgage 5% bonds. To Dec. 31, 1916, the company has expended further amounts in addition and improvements in the redemption of car purchase certificates, and in reduction of real estate mortgages, in total aggregating \$447,528."

HUDSON METAL PRODUCTS CO.

⁴(1) **British Order.**—Announced April 4, 1917, that this company had received an additional order for 420 9.2-inch British howitzer high-explosive shell bodies.

HUDSON NAVIGATION CO.

⁴(1) **Status.**—See United States Steamship Co.—Item No. 1.

HUDSON POWER CORP.

⁴(1) **Incorporated on April 9, 1917,** in New York, with a capital of \$3,000,000 to furnish gas and electricity to cities, villages, and towns in Hudson River counties. Incorporators: J. C. Grier, S. P. Curtis and I. W. Day, 400 Park Avenue, New York.

HUDSON TRUST CO.

¹(1) **New Director.**—Announced Jan. 19, 1917, that at the annual meeting of stockholders of this company the retiring directors were re-elected. At a subsequent meeting Dr. Victory A. Rendon, of Yucatan, Mex., and New York City, was elected a director. Richard A. Purdy was made a Vice-Pres., as well as Sec'y.

HUEBNER-TOLEDO BREWERIES CO.

¹(1) **Dividends.**—Announced Feb. 15, 1917, that this company had declared a dividend of 3% on the pfd. stock, payable 1% in 30 days, 1% in 60 days and 1% in 90 days. The last previous dividend on this issue was 3%, paid Nov. 6, 1913.

HUGENOT PARK ESTATES, INC., MANHATTAN, N. Y.

⁴(1) **Incorporated on April 19, 1917,** in New York, with a capital of \$250,000, to engage in a real estate and building business. Incorporators: J. F. Freiberger, C. M. Hart and F. F. Norman, Huguenot, N. Y.

HULL IRON & STEEL FOUNDRIES, INC.

¹(1) **Additions Planned.**—It was announced Feb. 5, 1917, that this company,

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

Hull, Que., had planned to make additions to its plant at a cost of \$500,000.

HULL PUMP & TANK CO., OWENSBORO, KY.

¹(1) Removal.—Announcement was made Dec. 28, 1916, of plans for the immediate removal of this company's plant to Indianapolis, Ind. The company has business to the amount of \$1,000,000 on its books and has experienced difficulty in obtaining materials in Owensboro.

HUMBLE OIL CO.

¹(1) Proceeds of Stock Increase.—Reported from Houston, Tex., on March 27, 1917, that the recent action of this company in increasing its capital stock from \$300,000 to \$4,000,000 was followed by the announcement that money derived from the increase would be used to build a refinery and to acquire extensive additional oil-producing holdings. The company recently declared an annual dividend of \$600 a share on its stock of \$300,000. The stock is held principally by a group of wealthy men of Houston and Beaumont.

HUNKEN, NEALE & FORBES, INC.

¹(1) Incorporated on March 21, 1917, in New York, with a capital of 2,000 shares, \$100 each, 2,000 shares no par value, active capital \$210,000, to engage in millinery, notions and dry goods business. Incorporators: D. C. Jones, Jr., W. L. Glenn and W. B. Walsh, 26 Exchange Place, New York.

HUNTER CREEK LIVE STOCK CO., SPOKANE, WASH.

¹(1) Incorporated on Jan. 17, 1917, in Washington, with a capital of \$1,000,000. Incorporators: R. R. Christian, W. E. Odell and D. Needham.

HUNTINGTON GAS CO.

¹(1) Transfer of Property Authorized.—See Long Island Lighting Co.—Item No. 2.

¹(2) Details of Consolidation.—See Long Island Lighting Co.—Item No. 3.

HUNTINGTON LIGHT & POWER CO.

¹(1) Transfer of Property Authorized.—See Long Island Lighting Co.—Item No. 2.

¹(2) Details of Consolidation.—See Long Island Lighting Co.—Item No. 3.

HUNTINGTON VIOLIN CO., HUNTINGTON, W. VA.

¹(1) Incorporated in March, 1917, in West Virginia, with a capital of \$300,000. Incorporators: J. William Hogan, Jr., N. M. Hill, M. M. Bothwell, Samuel Biern and R. M. Baker, all of Huntington.

HURLEY MACHINE CO., CHICAGO.

¹(1) Capital Increased.—On Dec. 27, 1916, the company filed notice at Springfield, Ill., of an increase in capital stock from \$100,000 to \$2,000,000.

—Apr.

¹(1) Proposed New Plant.—It was announced April 5, 1917, that this company was planning the erection of a factory for the manufacture of washing machines and vacuum cleaners at an estimated cost of \$400,000.

HURLEY WATER CO.

¹(1) New Owners.—See Ironwood & Bessemer Ry. & Light Co.—Item No. 1.

HURON NAVIGATION CORP.

¹(1) Incorporated on April 16, 1917, in Delaware, with a capital of \$1,000,000, to build and operate boats of all kinds. Incorporators: Herbert E. Latter and C. L. Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

HUTCHESON MANUFACTURING CO.

¹(1) Expansion.—It was stated April 4, 1917, that this company, Banning, Ga., operating 5,000 spindles, had completed plans for adding 2,500 spindles. It will build a dam to develop water-power and will connect with the transmission system of the Georgia Power Co., providing sufficient power to operate without water when necessary. Electric or steam power will be used when water-power is not available.

¹(2) Sold to Tallapoosa Mills Officials.—An Atlanta, Ga., dispatch, April 24, 1917, stated that this company, Banning, Ga., had been taken over by officials of the Tallapoosa Mills, Inc., of which Justin C. Jackson is Pres.

HUTCHINSON SUGAR PLANTATION CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows earnings of \$518,560, of which \$500,000 was paid in dividends. This is 20% on the capitalization of \$2,500,000. The company closed the year with a net profit carried to surplus account of \$506,430. The balance sheet shows assets and liabilities of \$2,538,923. The company, as of Dec. 31, 1916, had a total of funds on hand and quick assets of \$354,707.

HYDRAULIC POWER CO., NIAGARA FALLS, N. Y.

¹(1) Proposed Merger.—See Clips Electrical Distributing Co.—Item No. 1.

HYDRAULIC PRESSED STEEL CO., CLEVELAND, O.

¹(1) Stock Dividend Reported as Planned.—It was reported Feb. 8, 1917, that this company would declare a stock dividend of 125% on the common stock. The plan of the directors is to increase the common capital stock from \$1,500,000 to \$4,500,000.

Of the new stock \$1,875,000 will be used as the stock dividend, according to the plan: \$875,000 will be needed in connection with the acquisition of the Cleveland Welding & Manufacturing Co., which was paid for with cash out of earnings, and \$250,000 will be kept in the company's treasury.

—Mar.

¹(1) Capital Increased.—On March 12, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$2,700,000 to \$5,700,000.

HYDRO-CARBON GAS CO., INC., DOVER, DEL.

¹(1) Incorporated on Jan. 26, 1917, in New York, with a capital of \$1,000,000, to deal in gas machinery and merchandise. Representative: O. U. Bean, 42 Broadway, Manhattan, N. Y.

HYDRO MOTOR CAR CO.

¹(1) New Company.—Announcement was made at Canton, O., Jan. 13, 1917, that this company, incorporated for \$100,000, would begin the construction of hydro automobiles. Preliminary tests are to be held before Government experts in February.

The car is designed to run backward in water by means of special propellers. When land is reached the land wheels take a firm grip. A feature of the car is that it can be used as an armored machine either on land or water.

The manufacturers of the car claim they have the assurance of contracts from the Government if all tests are satisfactory.

HYMAN (S.) CO., NEW YORK.

¹(1) Capital Increased.—On Feb. 13, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$200,000 to \$350,000.

IDAHO POWER CO.

¹(1) Bond Sale.—It was announced March 19, 1917, that this company had sold to Boston and New York bankers \$4,500,000 first mortgage 30-year 5% bonds, for offering at 93½ and interest.

The bonds cover hydro-electric plants of 32,000 horse-power, 983 miles of transmission lines and water power sites capable of large future development. For the year ended Jan. 31, 1917, gross was \$1,137,425, with net of \$558,224. The company is controlled by the National Securities Corp., organized by interests identified with the Electric Bond & Share Co.

All the common stock of \$15,000,000, the 1st pfd. of \$300,000 and the 2d pfd. of \$400,000 with \$4,530,000 of notes payable are owned by the National Securities Corp. The authorized amount of the first mortgage bond issue is \$100,000,000.

—Apr.

¹(1) Note Retirement Planned.—See National Securities Corp.—Item No. 1.

IDAHO SOUTHERN R. R.

¹(1) Sold.—See Zelnicker (Walter A.) Supply Co.—Item No. 1.

ILLINOIS BRICK CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows net profits of \$674,542, an increase of \$143,890, compared with 1915. The surplus after deduction of dividends and depreciation amounts to \$8,819, a decrease of \$6,213, compared with the 1915 surplus.

—Apr.

¹(1) Status (April, 1917).—On April 9, 1917, the "Wall Street Journal" had the following: "Illinois Brick Co., with more orders on its books than a year ago and more than enough to continue operations at full capacity into the summer, is operating only three of its ten plants as the result of the so-called car shortage, which President Schlaake says is particularly bad on the St. Paul, Pennsylvania and Baltimore & Ohio. Mr. Schlaake says to Dow, Jones & Co.:

"We expect to open a few more plants soon on promises of some relief from the railroads. If the car situation gets worse we will be seriously hampered, and even hampered as we are it is impossible to say what effect the war will have on our business. We know

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

that with a free car movement we would be working full time at all plants. There is no indication of any tendency for the building industry to halt and this season promises to exceed last season if the congestion can be removed. Barring congestion, the war would have no effect.

"Prices for brick are the same as last year. Costs are somewhat higher on account of advances in prices of coal, fuel oil and ice. Wages have not changed as we are working under a five-year contract."

"Mr. Schlaake was asked whether he looked for the usual Spring disturbances among the building trades labor crafts and replied that indication in that respect were seldom more hopeful at this period. The new compulsory arbitration agreement between the building contractors and the unions has done well thus far."

ILLINOIS CENTRAL R. R. CO.

¹(1) Mechanical Improvements.—It was stated Jan. 4, 1917, that this company is making extensive improvements to its mechanical facilities at Louisville, Ky., for the repair of cars and engines. The plan includes the erection of a roundhouse with 17 stalls and an 85-foot turntable at a cost of \$58,000; a machine shop, to cost \$20,000, and a two-story lavatory building for engineers and shop men, to cost \$10,000. Besides these structures, there will be built a one-story lavatory building for car repair men, cost \$3,500; a paint shop and office for car repair foremen, \$3,500; sandhouse, sandbin, etc., \$4,000, and a station and yard office.

¹(2) Car Orders.—It was announced Jan. 16, 1917, that this company had ordered 500 furniture automobile cars from the Standard Steel Car Co.

ILLINOIS NORTHERN UTILITIES CO.

¹(1) Report, Five Months Ended Dec. 31 showed gross earnings of \$536,157; net earnings, \$227,638; surplus, \$63,344.

ILLINOIS PIPE LINE CO.

¹(1) New Pipe Line.—It was announced Jan. 30, 1917, that plans had been completed by this company for constructing a pipe line from the new Big Muddy Oil Field, Wyoming, to Casper, about 20 miles distant. Casper is the location of the Midwest Refining Co. and Standard Oil Co. of Indiana refineries. Other pipe line construction in Wyoming is contemplated.

These projects are believed to be preparatory to the building of a trunk line out of Wyoming either to Omaha or eastward to a connection with the Prairie system. This trunk line, it is figured, will be built by the Illinois Pipe Line interests.

When these facilities are provided Wyoming is sure to come rapidly to the front as a producer of high-grade oil. At present the State is producing about 8,000,000 barrels a year, compared with about 1,000,000 a few years previously. Because of its high-grade oil gasoline content Wyoming oil is being actively sought by the big gasoline manufacturing interests who find their supply of high-grade oil in other fields is not keeping up with the demand for gasoline.

Regardless of the prospects of the Illinois Pipe Line Co. from the increased traffic in oil in Wyoming, the company's business is on a satisfactory basis.

Illinois Pipe Line Co. in 1916 showed runs from wells of 13,578,141 barrels, compared with 14,045,288 barrels in 1915, a decrease of 467,147 barrels. Other receipts in 1916 amounted to 13,581,781, compared with 9,197,971 in 1915, an increase of 4,383,813 barrels. Its regular deliveries in 1916 were 1,062,224 barrels, against 2,143,872 in 1915, a decrease of 1,081,648.

Other deliveries were 27,804,519 in 1916, compared with 26,918,123 barrels in 1915, a gain of 886,396 barrels. Stocks on hand on Dec. 31, 1916, were 2,755,533 barrels, compared with 5,214,644 barrels at the end of the preceding year.

—Mar.

¹(1) Balance Sheet, as of Dec. 31, 1916, compares as follows:

Assets—	1916	1915
Pipe line prop.....	\$18,618,150	\$18,905,236
Cash and accts. receivable.....	2,037,482	4,461,301

Surplus.....	365,242	334,827
Total.....	\$20,831,693	\$23,516,542

²(2) Laying New Line.—Announced on March 29, 1917, that this company was laying an 18-mile line from the Midwest Refining Co. plant at Casper, Wyo., to the Big Muddy field, where several important developments had occurred during the previous two months. The erection of this new line is of particular importance and significance to the future productivity of this region, since within a few weeks runs will be taken from all producing properties along its route.

ILLINOIS ZINC CO.

¹(1) Capital Increased.—On Feb. 7, 1917, the company filed notice at Springfield, Ill., of an increase in capital stock from \$2,000,000 to \$4,000,000.

IMP CARBON CHASER CO.

¹(1) Three Dividends of 1 Cent Per Share Declared.—According to "Markets," April 13, 1917, this company authorized the payment of three dividends of 1c. per share each on April 23, May 12 and May 23, to stock of record April 16, May 5, and May 16, respectively. The initial dividend on this stock was paid Feb. 15, 1917, being for 1c. per share on 160,212 shares outstanding at the stock record date. It is stated there are 231,000 shares of stock outstanding, which will participate in the dividends authorized.

IMPERIAL COAL & COKE CO.

¹(1) New Coal Mine.—It was stated Dec. 27, 1916, that \$200,000 would be required for the opening and equipment by this company of a new coal mine at Bradford, Ala., to have a daily output of 1,000 tons.

One-fourth of the new mine's production will be consumed by the company in its beehive ovens being constructed at Bradford. The coal is on the Black Creek seam, and a portion of the output has been contracted for by Mexican smelters. The mine is located on the Birmingham Mineral R. R., 23 miles northeast of Birmingham. A switch will be constructed to the main line.

IMPERIAL OIL CO., LTD.

¹(1) Crude Oil Price Advanced.—It was announced at Toronto, Ont., Jan. 30, 1917, that this company had advanced the price of Canadian crude oil 5 cents a barrel to \$2.23 a barrel.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

IMPERIAL STEAMSHIP CO.

¹(1) New Company.—A Savannah, Ga., dispatch Jan. 8, 1917, stated that a petition for a charter of a \$2,500,000 shipping corporation, to be known under the above name, had been filed with Georgia State officials by Charlton G. Ogburn of Savannah.

It is understood the company will operate a steamship line between Savannah and Dutch ports. The other incorporators are George Kaltenbach, Herman Widmer, Jr., and O. Mueller, all of New York, and C. Cool of Amsterdam, Holland.

IMPERIAL TALKING MACHINE CO.

¹(1) Incorporated on March 21, 1917, in Delaware, with a capital of \$2,000,000, to manufacture and deal in talking machines of all kinds. Incorporators: Percy Warren Green, Rebecca H. Norton and Jas. P. Rutledge, Wilmington, Del.

IMPERIAL TELEPHONE CO.

¹(1) Sale Authorized.—It was announced Jan. 18, 1917, that the California Railroad Commission had authorized this company to sell to the Pacific Telephone & Telegraph Co. its entire property, and the Mountain States Telephone & Telegraph Co. to convey the entire capital stock of the Imperial Co. of \$25,000 to the Pacific Co.

The Pacific Co. has long been operating the Imperial Co.'s system and wants to acquire it so that the ownership of the property may be in the corporation which is charged with the responsibility of conducting it.

The present value of the Imperial Co.'s system is put down at \$156,348. The Mountain States Co. is one of the Bell companies, and owns all the stock of the Imperial Co.

IMPERIAL TOBACCO CO. OF CANADA, LTD.

¹(1) Statement About Bonus.—See British-American Tobacco Co., Ltd.—Item No. 4.

¹(2) Bonus to Stockholders.—Announced at London, Eng., Jan. 23, 1917, that this company had declared a final dividend of 5%, making 10% for the year, also a bonus of 2s. 6d. per share, free of income tax.

—Mar.

¹(1) Letter About Stock Distribution.—See British American Tobacco Co., Ltd.—Item No. 1.

IMPERIAL TOBACCO CO. (OF GREAT BRITAIN AND IRELAND), LTD.

¹(1) Income Account, Year Ended Dec. 31, 1916, compares as follows:

	1916	1915
Net profits	£3,812,685	£3,689,800
Bal. after chgs.	2,310,335	2,208,813
Dividends	2,105,461	1,966,009
Bonus to cust.	129,075	112,340
Surplus	75,799	130,464

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of £319,386, compared with £313,587 Dec. 31, 1915.

IMPERIAL TRUST CO. (THE).

¹(1) Incorporated on Jan. 27, 1917, in Delaware, with a capital of \$500,000, to do a general trust company business. Incorporators: L. B. Phillips and J. B. Bailey, Dover, Del.

IMPERIAL UNDERWEAR CO., PIQUA, O.

¹(1) Capital Increased.—On Jan. 4, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$110,000 to \$300,000.

—Feb.

¹(1) Capital Increase.—It was announced at Piqua, O., Jan. 31, 1917, that this company, manufacturer of men's knitted and woven fabric union suits, had increased its capital from \$150,000 to \$300,000, the increase being in pfd. stock.

IMPERIAL WAGON CO., INC., WEST LYNCHBURG, VA.

¹(1) Incorporated on April 17, 1917, in Virginia, with a capital of \$300,000, to manufacture wagons. J. A. Gumm, Pres., Atlanta, Ga.; M. G. Houser, Sec'y and Treas., Lynchburg, Va.

INDEPENDENT CORP., NEW YORK.

¹(1) Stock Increase Planned.—Announced Jan. 11, 1917, that a special meeting of stockholders of this company would be held Jan. 26 to vote on increasing the capital from \$500,000 to \$850,000.

¹(2) Capital Increased.—On Jan. 29, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$500,000 to \$650,000.

INDEPENDENT HARVESTER CO.

¹(1) Government Loses Suit.—It was announced at Chicago Feb. 19, 1917, that the United States Government's case against this company collapsed when Judge A. L. Sanborn ruled that there was no evidence to convict and ordered the jury to bring in a verdict of "not guilty."

The Independent Harvester Co. had a plant at Plano, Ill. It was capitalized at \$10,000,000 and sold about \$6,000,000 worth of stock to farmers all over the United States, who were to be permitted to buy their implements at cost.

The Government sought to show the company tried to defraud through use of the mails.

INDEPENDENT REFINING CO.

¹(1) Sold.—A Franklin, Pa., dispatch March 16, 1917, stated that the plant and business of this company, Oil City, Pa., had been sold to a group of Oil City and Emlenton, Pa., capitalists for \$350,000. The company had been in operation since 1882.

INDEPENDENT TORPEDO CO., FINDLAY, O.

¹(1) Capital Increased.—On April 23, 1917, the company filed notice at Columbus, O., of an increase in capital stock from \$100,000 to \$500,000.

INDIANA CREEK COAL CO.

¹(1) Expected to Exercise Option.—Reported from Evansville, Ind., on March 23, 1917, that this company was expected before April 1 to close an option and take over the property of the S. W. Little Coal Co.

INDIANA MINING CO.

¹(1) Assessment Levied.—Notice was given on Feb. 7, 1917, that an assessment of \$1 per share had been levied on the capital stock, payable March 1,

1917, by holders of record Feb. 28, 1917.

¹(2) Statement of Operations.—Pres. R. M. Edwards in his remarks accompanying the assessment notice on Feb. 7, 1917, outlined operations since the publication of the last annual report in April, 1916, as follows: "Since last April 700 ft. of openings have been made at the 1,400 ft. and 1,150 ft. levels following the contact between the felsite and trap. This work shows the felsite as far as developed to be a very irregular shaped and much faulted mass.

"Some native copper was found in the felsite near the contact, but not in quantities that could be considered commercial. No. 2 drill hole was not encountered, nor any deposit of richness indicated by No. 2 drill core. The directors feel that the prospects of developing a mine in a reasonable time are brighter in the horizon of the South Lake amygdaloid lodes which lie from 400 ft. to 1,000 ft. above No. 8 conglomerate.

"One of these lodes outcrops in S. W. quarter of section 21, carrying a little copper at the surface. A shaft has been started on it and has reached a depth of 160 ft. This shaft will be continued to 300 ft. and the value of the lodes thoroughly tested by drifting and cross-cutting at this depth."

INDIANA NATURAL GAS & OIL CO.

¹(1) Bond Offering.—Announced Jan. 18, 1917, that E. C. Benedict & Co. are offering the refunding mortgage 5% bonds of this company, with principal and interest, guaranteed by the People's Gas Light & Coke Co.

INDIANA PIPE LINE CO.

¹(1) Statement, Year Ended Dec. 31, 1916, shows earnings as follows:

	1916	1915
Net increase	\$1,300,838	\$1,271,416
Surp. aft. divs.	400,836	471,416

¹(2) Earnings on Stock.—It was stated Feb. 15, 1917, that this company's 1916 net of \$1,300,000 is equal to 28.01% on \$5,000,000 capital stock, compared with 25.42% earned on same capitalization in 1915.

¹(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$2,477,075, compared with \$2,076,239 Dec. 31, 1915.

—Mar.

¹(1) New Director.—It was announced March 21, 1917, that Ray A. Miller had been elected director to succeed George A. Pifer, resigned. Other directors were re-elected. At the directors' meeting retiring officers were re-elected.

INDIANA POWER & WATER CO., BLOOMFIELD, IND.

¹(1) Stock and Bond Issues Approved.—It was announced Feb. 23, 1917, that the Indiana Public Service Commission had granted this company permission to issue and sell, at not less than 80% par value, \$119,000 in capital stock and \$569,000 in bonds, for extensions and improvements to its properties.

INDIANA TRUCK CORP., MARIAN, IND.

¹(1) Incorporated in January, 1917, in Indiana, with a capital of \$1,000,000. Incorporators: C. G. Barley, J. W. Stephenson, S. W. Winter and G. C. Harwood.

INDIANOLA COAL CO.

¹(1) Sale.—See Inland Steel Co.—Item No. 1.

¹(2) Sale of Property.—See Inland Steel Co.—Item No. 2.

INDIAN REFINING CO.

¹(1) Deferred Dividend.—It was announced Jan. 25, 1917, that this company had declared a quarterly dividend of 1% on the pfd. stock, payable Feb. 28 to stock of record Feb. 10. This is the first dividend to be paid by the company since Sept. 15, 1911. In as much as pfd. dividends are cumulative, this

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

declaration represents the dividend due Dec. 15, 1911. About 35% in dividends have accrued to date.

¹(2) Status.—It was stated Jan. 24, 1917, that the company had a most successful year in 1916, having converted a deficit of \$2,686,000 on Dec. 31, 1915, into a small surplus on Dec. 31, 1916. The prospects for the current year are said to be most promising. The management plans to continue to maintain its present strong cash position, but as surplus accumulates it is the purpose at frequent intervals to pay off the accumulation of pfd. dividends.

If business continues at present rate this should be accomplished during 1917 and possibly in six months.

The annual report will be issued about the end of February. The company has outstanding \$3,000,000 pfd. and \$3,000,000 common stock.

—Mar.

¹(1) Accumulated Dividends.—Announced Feb. 28, 1917, that this company had declared a dividend of 5½%, covering accumulated dividends on the pfd. stock for the three quarters ended Sept. 15, 1912. The dividend is payable March 26 to stock of record March 10.

¹(2) Report, Year Ended Dec. 31, 1916, shows net income of \$2,771,774, compared with \$790,793 in 1915. The profit and loss surplus Dec. 31, 1916, was \$35,451, compared with a deficit of \$2,686,322 Dec. 31, 1915.

—Apr.

¹(1) Redemption of Bonds Planned.—"Financial America" April 20, 1917, stated that the Bankers Trust Co., trustee for this company, was inviting proposals for the redemption of gold bonds to exhaust the sinking fund of \$108,719. Bids are to be received not later than May 7.

¹(2) Special 5¼% Dividend on Pfd.—This company April 26, 1916, declared a dividend of 5¼% on account of accumulated dividends on the pfd. stock, payable May 26 to stock of record May 10.

INDIVIDUAL DRINKING CUP CO., INC., FREEPORT.

¹(1) Incorporated on Feb. 6, 1917, in New York, with a capital of \$1,000,000, to deal in drinking cups, individual service accessories and vending machines. Incorporators: E. M. Simpson, E. G. Wessman and C. P. Bender, 2 West 103d St., New York. The Maine corporation of the same name surrendered its charter.

INDUSTRIAL CHEMICALS, LTD.

¹(1) Incorporated on Jan. 10, 1917, in Canada, with a capital of \$2,750,000, divided into 27,500 shares of \$100 each, to manufacture, produce, import, export and deal in chemicals and chemical compounds. Incorporators: Gordon Walters MacDougall, Lawrence Macfarlane, Wm. Bridges Scott, John Macnaughton and James Geary Cartwright. Chief place of business, Montreal, Que.

INDUSTRIAL LABORATORIES CORP., BOSTON.

¹(1) Incorporated on Jan. 29, 1917, in Massachusetts, with a capital of \$450,000, to manufacture thermostats. Directors: Robert Cushman, Pres.; Chas. D. Woodberry, Treas., and S. B. Montgomery.

INDUSTRIAL PRODUCTS MINING CO., SEATTLE, WASH.

¹(1) Incorporated on March 7, 1917, in Washington, with a capital of \$500,000. Incorporators: Joseph Hahn and J. M. Ragland.

• INGERSOLL-RAND CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net earnings.....	\$7,925,156	\$5,459,884
Bal. after chgs....	7,256,616	4,687,077
Surp. after pfd. divs.	7,104,098	4,535,559

¹(2) Consolidated Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$6,024,451, compared with \$5,333,323 Dec. 31, 1915.

¹(3) Earnings on Stock.—It was stated April 6, 1917, that this company's 1916 surplus of \$7,104,098 is equal to \$65.17 per share on \$10,900,035 common stock, against \$53.55 on \$8,469,400 common stock in 1915.

¹(4) Comment on Earnings.—On April 9, 1917, the "Wall Street Journal" said that this company, having declared a stock dividend increasing its common stock from \$8,469,400 to \$10,900,035 early in 1916, the actual improvement in its earnings from 1915 to 1916 did not appear by comparing the percentages, 53.57% and 65.17%, earned on the stock outstanding at the end of the two years. Based on its capitalization at the beginning of 1915 the company, in two years, piled up profits equal to over \$137 a share, or 53.57% in 1915 and 83.86% in 1916.

These large earnings were due to a considerable extent to profits from the manufacture of shells which the company has been making steadily for about two years. Although it has hardly figured in the limelight as a munition concern it has actually been one of the most successful of the organization that entered that field two years ago.

Ingersoll-Rand has completed the last of its foreign shell contracts, but it has not abandoned the munitions field, as it is now working on an order for shells for the United States Government. In addition to activity on this line the company is doing an unprecedented volume of business in its regular line, the manufacture of rock drills, air compressors and similar products.

The report shows that Ingersoll-Rand was in excellent financial shape at the end of 1916. Its working capital had increased from \$11,810,898 a year previous to \$13,860,464, while the book value of its common stock had increased in the same time from \$160 a share to \$216.60 per share, on the increased capitalization.

¹(5) Extra Dividend on Common.—Announced April 14, 1917, that this company had declared an extra dividend of 20% on the common stock, payable April 30 to stock of record April 23.

INLAND NAVIGATION CO., INC.

¹(1) Wabash Ry. Ordered to Establish Through Rates.—See Wabash Ry. Co.—Item No. 1.

INLAND OIL CO., PHOENIX, ARIZ.

¹(1) Incorporated in February, 1917, in Arizona, with a capital of \$2,500,000. Incorporators: J. G. Blitt, Norman A. Morrison and F. H. Larsen.

INLAND STEEL CO.

¹(1) Stock Issue Planned.—It was announced Jan. 22, 1917, that shareholders of this company would meet Jan. 30 to vote on the proposition to exchange 2½ shares of new stock for one share of stock outstanding. It is expected the new stock will be placed on an 8% annual basis.

New steel plants going in will give the Inland Steel Co. a capacity of 1,000,000 tons of steel annually. The company will start its third new blast furnace some time next month.

¹(2) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Net earnings.....	\$11,241,046	\$4,414,139
Surp. after chgs....	110,450,786	3,787,414
Bal. after divs....	9,650,879	3,155,358

†Net after deduction of \$1,344,407 for maintenance and repairs.

†Equal to 105.29% on \$9,924,665 capital stock as compared with 38.19% on \$9,915,016 capital stock last year.

¹(3) Earnings on Stock.—It was stated Jan. 30, 1917, that this company's surplus, \$10,450,786, for the year ended Dec. 31, 1916, is equal to 105.29% on \$9,924,665 capital stock, as compared with 38.19% on \$9,915,016 capital stock the previous year.

¹(4) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$16,359,409, compared with \$6,708,530 Dec. 31, 1915.

—Feb.

¹(1) Increased Dividend.—Announced Feb. 1, 1917, that this company had declared a quarterly dividend of \$5 a share, payable March 1 to stock of record Feb. 10. This is an increase of \$3 over the former payment.

¹(2) Incorporated on Feb. 6, 1917, in Delaware, with a capital of \$30,000,000, to manufacture iron, steel, copper and other metallic compounds. Incorporators: Herbert E. Latter and Norman P. Coffin, Wilmington, Del., and Clement M. Egner, Elkton, Md.

—Mar.

¹(1) Ore Leases.—See Great Northern Iron Ore Properties.—Item No. 1.

¹(2) New Mill in Operation.—It was announced late in March, 1917, that this company had placed in operation at its Chicago Heights mill a new electrically driven 18-inch roughing mill, installed for the purpose of breaking down so-called discard billets. It will deliver these billets from its Indiana Harbor mill to be rolled at Chicago, largely into reinforcing bars. This new equipment is a logical accommodation in the situation prevailing for some time for taking care of the large tonnage of discard steel produced, as well as making up the deficiency of rerolling rails.

—Apr.

¹(1) Coal Purchase.—It was announced April 5, 1917, that this company had purchased 2,000 acres of twin Freepoint coal land from the Indianola Coal Co., Pittsburgh, for \$2,000,000 and, for the first time in the history of a western steel company, would enter the coal field of Allegheny County Pa., for fuel.

The property, situated just south of Dorseyville, in the Allegheny Valley, has not been worked for about 12 years. There are two shafts already sunk. It is the intention of the Inland Co. to enlarge and concrete them at once. A daily production of 5,000 tons is figured on.

The coal is to be used exclusively for by-product purposes at the Chicago mills.

¹(2) Acquisition of Coal Lands.—Reported on April 10, 1917, that this company had purchased 2,000 acres of Freepoint coking coal land from the Indianola Coal Co., west of Pittsburgh. The coal will be shipped by rail to lake dock and by boat to Indiana Harbor. The company will save substantially by this move. The property, with proposed developments, cost \$2,000,000.

The property is proven coal land on which the Indianola Co. did some work twelve years ago. The coal mined will be used to supply the company's 150 coke ovens. None of it will be put on the market.

It was for the purpose of acquiring this coal property and organizing a separate company to operate it that Inland Steel recently obtained a Delaware charter. The coal operating company will retain the name Indianola Coal Co. It is expected that shipping of coal from mine will be started before navigation closes next Fall.

• INSPIRATION CONSOLIDATED COPPER CO.

¹(1) Production, December, 1916.—Announced Jan. 3, 1917, that this company produced in December 10,400,000 pounds of copper, compared with 10,800,000 pounds in November, 11,800,000 in October and 11,850,000 in September. December, 1915, production was 5,541,140 pounds.

¹(2) Yearly Profits, Estimated.—On Jan. 6, 1917, the "Boston News Bureau" said that production profits of \$22,000,000 accrued to this company from its first full year's operation. These estimated earnings were based on the year's output, approximating 122,000,000 pounds of copper, costing about 8½ cents a pound, and the average copper prices of about 25 cents a pound.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

The 1916 report of the Inspiration Co. will, it is understood, base the 1916 earnings on the copper actually delivered during the period, so that the item will be somewhat less than that indicated by "production profits."

It is roughly estimated that a total about 40,000,000 pounds of copper—all sold at the highest prices—was carried over into 1917 for the account of the Inspiration Co. and that the proceeds from sale of this copper, although actually sold in 1916, will appear in the 1917 records as having been delivered and paid for during this year.

(8) Profits, 1916, Estimated.—On Jan. 8, 1917, the "Boston News Bureau" stated that production profits of \$22,000,000 were made by this company from its first full year's operations. These earnings are based on the 1916 output, approximating 122,000,000 pounds of copper, costing about 8½ cents a pound, and an average copper price of about 25 cents a pound.

The 1916 report, however, will base the 1916 earnings on the copper actually delivered during the period, so that they may be less than the above theoretical "production profits."

The proceeds from sale of about 40,000,000 pounds of copper, although actually sold in 1916, will appear in the 1917 accounts as having been delivered and paid for during the calendar year.

—Feb.

(1) Production, January, 1917.—Announced Feb. 2, 1917, that this company's production in January totaled 11,600,000 pounds of copper, compared with 10,400,000 in December and 5,354,815 in January, 1916.

(2) Comment on January Production.—On Feb. 3, 1917, the "Wall Street Journal" said that this company's production again is running at high levels. January's output of 11,600,000 pounds, remarkable to a great extent on account of stormy weather, was only 200,000 pounds under the high record production of 11,800,000 pounds registered for September, 1916. Furthermore the January production represents an increase of 1,200,000 pounds over December output, 1,000,000 over November, and 300,000 over October.

(3) Production Rate.—It was stated Feb. 7, 1917, that this company started 1917 with production at the rate of 140,000,000 pounds per annum, against a rate of but 64,000,000 pounds at the beginning of 1916. The January yield of 11,600,000 pounds was in fact the second largest monthly output made to date, being exceeded only in September, 1916, when production amounted to 11,850,000 pounds.

The mill at intervals during January treated as high as 17,000 tons of ore daily in its 18 sections, while improved metallurgical results also added to the final figures of production.

(4) Operations.—It was stated Feb. 13, 1917, that this company during January produced 518,000 tons of copper, while the concentrator handled 523,000. In accomplishing this the mine worked but 28 days out of the 31, while the mill worked full time. The fact that the mill treated more than the mine produced is accounted for by there being a difference in the amounts on hand in the mine and mill bins at the end of the month.

Progress is being made in the work of making leaching tests at the experimental plant built for that purpose by the Inspiration Co.

—Mar.

(1) Production, February, 1917.—Announced March 3, 1917, that this company in February produced 10,250,000 pounds of copper, compared with 11,600,000 in January, 1917, and 10,400,000 in December, 1916.

(2) Dividend Discussion.—On March 13, 1917, the "Wall Street Journal" said that this company's directors would meet for dividend action on March 22.

Some interests in the company continue to suggest an increase in the dividend rate from \$2 a share to \$2.50

a share, or \$2 regular and 50 cents extra in view of Inspiration's strong financial position, especially its cash holdings, but conservatives on the Board of Directors urge that action to increase the dividend rate be deferred until the June meeting.

Inspiration's 1916 profits of approximately \$22,000,000, with an estimated production of 122,000,000 pounds, are expected to be surpassed in the current 12 months.

Estimating 1,183,000 shares outstanding, the 1916 earnings were at the rate of more than \$18 a share, and yet profits in 1917 are expected to reach \$25,000,000, or about \$21 a share. Such earnings would be equivalent to more than two and one-half times the current dividend requirements.

Counting in the metal carried over from 1916, Inspiration is being groomed to turn out 150,000,000 pounds of copper this year at a profit of better than 16 cents a pound, with a 5-cent cost and sales averaging 25 cents a pound.

Dividends in 1916 of \$6,200,700 left an estimated surplus of about \$16,500,000 on Jan. 1, 1917, including the 1915 surplus of more than \$600,000. A quarterly dividend of \$2 a share ordered March 22 would call for the payment of \$2,338,000, leaving more than \$14,700,000 in surplus account.

With output continuing at the estimated rate of 150,000,000 pounds annually, production profits through the first five months of 1917 should add about \$10,500,000 to surplus, bringing that item up to about \$24,500,000 on June 1, 1917.

If the company's conservative dividend policy is maintained and the \$2 dividend rate continued through the rest of the year, Inspiration with increased production and high copper prices seems likely to show a surplus of more than \$32,000,000 on Jan. 1, 1918, after all charges and dividends.

—Apr.

(1) Production, March, 1917.—Announced April 3, 1917, that this company in March produced 11,100,000 lbs. of copper, compared with 10,250,000 in February and 11,600,000 in January, 1917.

(2) Earning Rate.—On April 6, 1917, the "Boston News Bureau" said that earnings of this company are approximating \$2,000,000 a month or at the rate of about \$25,000,000 per annum. Against this earning power the company pays dividends of \$8 a year.

In April another section of the mill should be made ready for operation, making the treatment of about 800 tons additional of ore over the present capacity. This will be reflected in higher production.

In the first quarter of 1917 Inspiration made a substantial increase in output over the same period of 1916.

(3) Estimate of Earnings.—On April 6, 1917, the "Boston News Bureau" said that it was estimated that earnings of this company were running about \$2,000,000 a month, or at the rate of nearly \$25,000,000 per annum. Against this earning power the company pays dividends of \$8 per share a year on 1,181,000 shares, or about 33% of actual earnings. This month another section of the mill should be ready for operation making possible the treatment of 800 tons of ore additional. In the first quarter of this year Inspiration made a substantial increase in output over the same period of last year.

An increase in dividends above the present \$8 rate would not create great surprise in view of earnings and may be authorized at next dividend meeting of the board.

(4) Annual Report, Year Ended Dec. 31, 1916.—Sales of copper amounted to \$53,496,343. Profits for the year of \$20,629,498, after expenses, depreciation and interest, were equal to \$17.45 a share. Profits for 1915 totaled \$600,062, and were equal to 65 cents a share on the then outstanding capitalization for the first six months of the company's operation as a producer.

Refined copper production in 1916 was 120,772,637 pounds, all of which has been

sold at an average price of 25.393 cents a pound. The yield in refined copper per ton of ore was 22.625 pounds. The cost per pound of copper, exclusive of depreciation, Federal income tax and interest on bonds, was 8.673 cents.

(5) Balance Sheet, as of Dec. 31, 1916, showed profit and loss of \$12,681,501, against \$600,062 last year.

(6) Statement by President.—Pres. William B. Thompson in his remarks to shareholders accompanying the annual report for the year 1916, said, in part: "During the year experimental work was inaugurated to determine the method of treating these oxide ores best adapted to our conditions. Good results were obtained from a leaching scheme which is now being tried out with a small scale plant erected for that purpose. At the same time attention has been given, with encouraging results, to the problem of recovering a higher percentage of oxide copper associated with sulphide ores."

"The last unit of the mill was completed Feb. 21, since which date the entire plant has been in continuous operation. Results have been highly satisfactory. Mining and milling costs have been low notwithstanding the exceedingly high cost of all supplies and labor and natural disadvantages of starting and systematizing such a large operation."

"Practically 91% of copper sulphides was saved from ore assaying 1.54% copper. Two additional sections which will soon be in operation were added to insure mill capacity of 16,000 tons daily. This tonnage has already been exceeded, and it is safe to say 20 sections will have a daily capacity in excess of 18,000 tons. The mine is in shape to maintain a daily production of at least 20,000 tons."

(7) Liberal Reserves.—On April 17, 1917, the "Boston News Bureau" said that liberal reserves had been set up by the management of this company, one of which sets aside 20 cents for drifting, raising and haulage ways for every ton of ore mined. During 1916 the actual expenditure against these items was but 10 cents a ton.

Determination of 20 cents a ton as a proper charge was reached because of the estimate that for every 1,000 tons of ore mined there will have to be driven 13 feet of ordinary sized drifts, 20 feet of main raises and 1.4 feet of haulage ways. There was charged to mining in 1916 60.6 cents a ton, including the 20-cent charge, whereas the actual cost of mining a ton of ore was but 50.6 cents.

More than \$1.10 a share was represented in deductions of \$1,302,441 made from total profits of 1916, so that the net reported was \$20,629,498. The Federal income tax of \$401,407 was equal to about 35 cents a share on outstanding stock, while nearly double this amount was charged off to depreciation.

(8) Directors, With One Exception, Re-elected.—At the annual meeting of this company at Augusta, Me., April 24, 1917, the retiring directors, with the exception of John F. Alvord, were re-elected. The board now consists of 14 directors.

(9) Full Plant in Operation.—On April 26, 1917, the "Boston News Bureau" said that two new units of the Inspiration concentrator had been placed in commission, bringing the plant up to its contemplated capacity of 20 sections. It will take several weeks before the two additions have been attuned to capacity treatment of ore, following which, however, copper production should be increased approximately 10%.

Unless arbitrarily curtailed, the monthly copper yield should soon exceed 12,000,000 pounds.

(10) Directors Re-Elected.—At the meeting of directors of this company April 26, 1917, retiring officers were re-elected.

• INTERBOROUGH CONSOLIDATED CORP.

(1) Income Account, Year Ended Dec. 31, 1916, as made public Jan. 19, 1917, by Pres. Theo. F. Shonts, showed a sur-

JANUARY 1 TO APRIL 30, 1917

plus of \$1,875,877 after the deduction of interest charges amounting to \$3,795,138, the payment of \$2,744,430 in dividends upon the pfd. stock and an appropriation of \$350,000 for the retirement of Interborough-Metropolitan 10-year 6% collateral gold notes.

The surplus balance carried over from Dec. 31, 1915, amounted to \$1,834,089. The dividends earned on holdings of stock of the Interborough Rapid Transit Co. stock amounted to \$6,782,560, and the interest and dividends received from other investments amounted to \$122,876.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,875,878, compared with \$1,834,089 Dec. 31, 1915.

¹(3) Directors Re-elected.—Announced Jan. 24, 1917, that at the annual meeting of this company retiring directors were re-elected.

—Mar.

¹(1) Dividends.—See Interborough Rapid Transit Co.—Item No. 3.

¹(2) Pfd. Stockholders.—It was stated March 23, 1917, that the total number of this company's pfd. stockholders had increased from 1,881 on Dec. 10, 1916, to 2,120, as of March 10, 1917.

INTERBOROUGH-METROPOLITAN CO.

¹(1) Notes.—On Jan. 23, 1917, it was stated that the Interborough-Metropolitan Co. 10-year 6% collateral notes, dated Jan. 1, 1915, of which there were \$2,500,000 outstanding on Jan. 1, 1916, were retired during the year. For that purpose the company secured on July 1, 1916, from the Bankers' Trust Co., New York, an advance of \$2,000,000 for nine months at 4½% interest, the balance required for the purpose of the retirement being taken from surplus cash.

The gross revenue of the subway and elevated lines for the six months' period ended Dec. 31, 1916, notwithstanding the strike, increased approximately \$2,193,000. The earnings of the surface lines, upon the other hand, are gradually assuming normal proportions.

• INTERBOROUGH RAPID TRANSIT CO.

¹(1) Traffic, December, 1916.—It was stated Jan. 13, 1917, that the number of passengers carried by this company during December broke all previous records, according to figures compiled. The increase over December, 1915, was 8,177,069, while over the preceding November alone the gain was 3,267,861. The number carried during Christmas week exceeded 1915 by 2,295,000.

The subway carried during the month 88,643,458 passengers, while the elevated carried 31,069,572, making a total for the Interborough of 69,703,030, against 61,525,961 for December, 1915.

Revenue from the subway was \$210,088 greater, and that from the elevated \$199,064 greater than in December, 1915. The total fares for the month were: Subway, \$1,930,063; elevated, \$1,552,611, or \$3,482,674 for the system.

—Feb.

¹(1) Traffic, December, 1916.—It was announced Feb. 3, 1917, that this company's service in December was greater than ever before in its history. The total number of passengers carried on subway and elevated lines exceeded all records.

Interborough carried 69,703,030 passengers in December, an increase of 8,177,069 over December, 1915, and 3,267,861 over November, 1916.

Planned for a daily capacity of 400,000 persons, the average subway riding rose through the month to 1,541,832—the new high record set on Dec. 18. The elevated also reached its high-water mark of 1,252,063 passengers carried that day.

Figures for passengers carried over the seven days in the week before Christmas were more than 2,295,000 greater than in the corresponding week of 1915.

¹(2) New Equipment.—It was announced Feb. 14, 1917, that contracts prepared by this company for the purchase of 310 new steel cars for use on the subways and subway extensions had been approved by the New York First District Public Service Commission. Permission has been given to the company to purchase 167 more cars of the same type within six months.

¹(3) Traffic, December, 1916.—It was announced Feb. 20, 1917, that the New York First District Public Service Commission had compiled the following comparative statement of passenger traffic on the lines operated by this company during December:

	1916	1915
Subway division	38,651,526	34,446,391
Elevated division	31,071,384	27,079,570

¹(4) Bond Issue Hearing.—It was stated Feb. 21, 1917, that upon application of this company for permission to issue \$18,426,000 5% bonds, the New York First District Public Service Commission had fixed March 8 at 2:30 P. M. as the date for the hearing. This additional issue is to be made under the first and refunding mortgage of \$300,000,000 made to the Guaranty Trust Co. on March 20, 1913.

The proceeds of the application are to be used for the completion of the work on the elevated line of the Manhattan Ry. system, on which already \$28,827,800 has been expended.

The new issue is to be divided as follows: \$10,444,000 for third-tracking of the elevated system; \$2,533,000 for extensions; \$2,301,000 for various improvements and equipment, and \$1,088,000 for expenses in marketing the bonds and for discount.

The bonds are to be sold at not less than 93½%, and will bear interest at the rate of 5% from date of issue.

—Mar.

	1917	1916

Add Q's Sub.	104,720	112,291
Surplus	5,196,830	4,767,828

¹(2) Traffic, January and Seven Months.—January, 69,554,800 passengers, against 60,503,906 last year.

Seven Months—434,732,507 passengers, against 380,798,553 last year.

¹(3) Dividends.—Announcement was made March 6, 1917, that directors of this company at their meeting on that date had declared the regular quarterly dividend of 5% upon the stock, payable April 2 to stock of record March 20; a dividend of 1¼% on the stock of the Subway Realty Co., payable April 2 to stock of record March 20, and a dividend of 1½% on the pfd. stock of the Interborough Consolidated Corp., payable April 2 to stock of record March 10.

¹(4) President's Statement.—It was announced March 6, 1917, that in recommending dividends to the directors at their annual meeting on that date Pres. Theodore P. Shonts said: "The earnings of the Interborough Rapid Transit Co. for the three months ending March 31, 1917 (February partly and March wholly estimated), show a gross operating revenue of \$10,671,000, an increase of \$1,045,221 over 1916.

"After the payment of all operating expenses, taxes, interest and other fixed charges there will remain for the Interborough Rapid Transit Co. a net corporate income of \$2,753,000, an increase of \$210,549 over the same period last year.

"For the fiscal year to date, the nine months ending March 31, 1917, the Interborough Rapid Transit Co. shows a gross operating revenue of \$29,694,024, an increase of \$3,235,210 over the same period last year. After paying all operating expenses, taxes, interest and other charges, other than strike expenses, there remains a net corporate income of \$6,973,832, an increase of \$532,228 over the similar nine months last year.

"The surplus of the Interborough Rapid Transit Co. on Dec. 31, 1916, was \$18,269,402. Adding the net corporate income for the three months ending March 31, gives an estimated total surplus as of that date of \$21,022,402.

"Payment on April 1 of the usual quarterly dividend of 5%, or at the rate of 20% per annum, on \$35,000,000 capital stock outstanding, amounting to \$1,750,000, will leave a surplus on that date of \$19,272,402, an increase of \$1,003,000 over the surplus of Jan. 1, 1917.

"The estimated surplus balance of the profit and loss account of the Interborough Consolidated Corp. as of March 31, 1917, will be \$2,673,738. After paying out of that surplus the quarterly dividend of 1½% on the \$45,740,000 preferred stock outstanding, that dividend amounting to \$686,100, there will remain on March 31, 1917, an estimated surplus of \$1,967,638, an increase of \$111,759 over the surplus balance at the end of the calendar year 1916.

"The foregoing is particularly gratifying in view of the fact that the March quarter contains one day less than the March quarter of last year. The earnings show with the continued development of the city there is a growing increased demand on the part of the public for service that your company is attempting to provide."

¹(5) Hearing on Bond Issue Request.—It was announced March 9, 1917, that the application of this company for permission to make an additional issue of \$18,436,090 in 5% bonds under the first refunding mortgage of \$300,000,000 made on March 20, 1913, following the signing of the dual system contract, had been given a hearing before the New York First District Public Service Commission when E. F. J. Gaynor, auditor of the Interborough Co., and other accounting and engineering officials testified to the extraordinary expenditures of the company.

Expenditures already made and contemplated show an increase of \$15,367,833 over what the company proposed in 1913 to spend. Part of this sum is represented by new work, and part by increased costs which the company testified have been incurred in elevated third-tracking and extension work. Estimates as of January 6, 1913, it appeared from the testimony, were to amount for this work to \$26,953,702.

Up to Oct. 31, 1916, there had been expended for these purposes \$24,298,832 with estimate requirements to complete the work fixed at \$18,022,703. The company officials fixed the total indicated costs, as of Jan. 1, 1917, at \$42,321,535. The increase of \$15,367,833 over the estimates of 1913 means that the dual system of rapid transit will cost just that much more than was indicated, plus the increased costs estimated for the city-owned lines, making the total cost of the dual system in the neighborhood of \$377,000,000.

Pres. Shonts stated that these bonds, when authorized, stand in the same situation as bonds heretofore authorized.

Evidence submitted showed that the estimates of 1913 were more than \$3,000,000 short of the actual cost.

¹(1) February Earnings Show Increase.—The New York First District Public Service Commission issued a statement April 14, 1917, showing a comparison of the earnings of this company between the month of February, 1917, and the same period in 1916, compiled from reports of ticket sales. The figures for the subway division for February, 1917, are \$35,190,476, as compared with \$32,232,673 in 1916.

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

The figures for the elevated division shows a corresponding increase, being \$26,706,676 for February, 1917, as against \$25,353,230 for the same period in 1916.

	1917	1916

(1) Bond Offering.—It was announced March 10, 1917, that Liggett, Hichborn & Co. are offering this company's first mortgage 8% gold bonds, due to mature Aug. 1, 1942, at 102, to yield 5.85%.

• INTERNATIONAL AGRICULTURAL CORP.

(1) New Director.—Announced Jan. 23, 1917, that at the annual meeting of this company J. R. Floyd, Secy. and Asst. Treas., was elected a director to succeed Charles H. Sabin, resigned. Other retiring directors were re-elected.

(2) Statement by Vice-President.—It was announced Jan. 23, 1917, that John J. Watson, Vice-Pres. and Treas. of this company, stated at the stockholders' meeting on that date that he was against the declaration at this time of a dividend on the pfd. stock, on which 28% had accumulated. He explained that the company's finances had improved with a reduction of \$4,000,000 to \$5,000,000 in liabilities. He said that deliveries of 18,000 tons of acid a month were being received from the Tennessee Copper Co. under a contract which had been the cause of a dispute between the two companies, and that he considered the new management of the Tennessee favorable to the International.

—Feb.

(1) Earning Rate.—It was stated Feb. 8, 1917, that the divergence between market price and earning position of this company's pfd. was never more marked. The company is earning 40% on the current market quotation for the \$13,000,000 issue, it was reported.

In two years the company has improved its financial position by nearly \$5,500,000.

Although the 7% dividend on the pfd. is being more than earned, it is doubtful if any move in the direction of its restoration will be made during 1917.

The feeling among directors in this respect is that it will be wiser to build up working capital to a point where the company can handle without borrowing that increase in business which is felt will be the accompaniment of the restoration of peace.

Demand for fertilizers is excellent, and International Agricultural officials are confident they can sell every ton that the company will produce.

—Mar.

(1) Earnings, Year Ended June 30, 1917, Estimated.—On March 13, 1917, the "Boston News Bureau" said that this company in its fiscal year to June 30 should more than earn a balance of \$12 per share for its \$13,000,000 pfd. stock.

The company is steadily accumulating a balance of working capital and, while it is not as large as it should be, it should total on June 30, 1917, about \$4,500,000, or \$2,000,000 more than at the close of the 1915 year—two years previously.

The query has been raised whether the ending of the war and cessation of demand for sulphuric acid for powder purposes will not work to the serious disadvantage of International Agricultural. There is no sure answer to such a question. At the same time it is felt that many plants which are now making sulphuric are doing so purely on a temporary basis.

Much of the great increase in sulphuric acid output has come from northern plants. When war demand ceases there will be so severe a freight handicap against these plants that they cannot compete in the selling field in which International naturally will market 75% at least of its acid.

(2) Acid Contract Discussion.—On March 24, 1917, the "Wall Street Journal" said that this company promised to do much better with its acid contract for 35% of the acid it may normally produce than it was generally supposed. The feeling had been that with the war concluded there would

be a big drop in the demand for sulphuric that would leave International Agricultural with considerable unsalable tonnages.

Good judges of the situation, however, feel that even when the war is finished International Agricultural will be able to sell 100% of all the acid it will receive from Tennessee Copper. The company has recently booked a contract for 35% of the acid it may normally count upon from Tennessee Copper, and this contract runs concomitant to the Tennessee Copper contract. In addition, International Agricultural can use in its own fertilizer business from 75,000 to 100,000 tons of acid yearly. The amount that it will have to sell is, therefore, reduced to a very small and probably a very safe minimum.

The price of acid has been climbing back. The ship situation has almost entirely cut off importation of Spanish pyrites, so that manufacturers in the country are very glad to buy of big handlers of acid like the International Corporation. Acid to-day for fertilizer purposes is worth from \$14 to \$15 per ton.

International Agricultural in 1917 should sell at least 50% more fertilizers than last year, and it may do even better. There will be a decidedly satisfactory profit in this business.

INTERNATIONAL ASSOCIATED PHARMACISTS.

(1) Incorporated on April 20, 1917, in Delaware, with a capital of \$10,000,000, to manufacture, drugs, medicines and food products of all kinds. Incorporators: A. W. Britton, S. B. Howard and L. H. Gunther, New York.

• INTERNATIONAL HARVESTER CO. OF NEW JERSEY.

*(1) Binder Twine to Be Lower.—A Washington dispatch Jan. 9, 1917, stated that the Senate Agricultural Committee, after investigation of the alleged sisal monopoly, involving the International Harvester Co. and the Commission Reguladora, a rival Mexican corporation in Yucatan, recommended to the State Department that negotiations be undertaken with the Carranza Government to relieve American farmers from exorbitant prices charged for binder twine used in harvesting.

It estimated the alleged monopoly made \$28,000,000 increased profit from the American people in 1916.

—Mar.

*(1) Government Reargument in Dissolution Suit.—It was announced at Washington March 7, 1917, that, in reargument before the United States Supreme Court of the Federal dissolution suit against the International Harvester Co. Attorney-General Gregory personally presented the Government's reason for seeking disintegration of the so-called trust. He declared that if the intent of Congress to prohibit undue concentration of capital and restraint of competition were not carried out, Government control, if not ownership, in all likelihood would follow, with its evils and dangers.

Such "colossal combinations" of capital, enjoying preponderant control of an industry—even if "good" combinations—are illegal and harmful, the Attorney-General argued. He pointed to evidence that the defendant controlled between 77% and 85% of the harvesting machinery trade, asserting that one "dummy" and six "office boys" formed the combination. This referred to the transfer of constituent corporations' assets to William C. Lane for subsequent transfer to the New Jersey corporation.

Solicitor-General Davis concluded the Government's plea, contesting the defendant's suggestion that the Sherman law prohibits undue restraint of trade, but not necessarily of competition.

• INTERNATIONAL HARVESTER CORP.

*(1) Government Brief Filed in Dissolution Suit.—It was announced Feb. 17, 1917, that the Government had filed papers on that date at Washington in its dissolution suit against this company. The brief by the Department of Justice asks the Supreme Court to affirm the decree of Minnesota District Court which ordered dissolution of the alleged trust on the ground that it constituted a combination in restraint of trade and was thoroughly repugnant to the doctrine that "competition, not combination be the law of trade." From that decision the "Harvester Trust" appealed.

The Government brief says this "trust" was formed from International Harvester Co., the manufacturing concern; International Harvester Co. of America, the marketing concern; International Flax Twine Co., Wisconsin Steel Co. and Wisconsin Lumber Co., industries which make essential products used in reaping and harvesting cereal crops; Illinois Northern Ry. and

Chicago, West Pullman & Southern Ry. and railway plant facility of the alleged trust; Cyrus H. McCormick, Charles Deering, Harold F. McCormick, James Deering, John J. Glessner, William H. Jones, Richard F. Howe, George W. Perkins, George F. Baker, Norman B. Ream and several other organizers.

It declares this group of men and companies organized a trust composed of several independent manufacturers. It is argued that all these companies were thriving on a competitive basis.

The Government charges that these elements in the trade, through agency of J. P. Morgan & Co., combined their industries and formed a combination which dominated the trade and restrained normal competition. The brief states that the defendants admit control of 80% to 85% of the trade in harvesting machinery.

INTERNATIONAL HOME BUILDING CO., INC., BUFFALO, N. Y.

*(1) Incorporated on April 13, 1917, in New York, with a capital of \$600,000, to engage in a real estate, construction and brokerage business. Incorporators: G. P. Keating, H. C. E. Smith and Seward H. Millener, Tonawanda, N. Y.

INTERNATIONAL MAGNESITE CO., LTD.

*(1) Incorporated on Dec. 20, 1916, in Canada, with a capital of \$250,000, divided into 2,500 shares of \$100 each, to prospect, mine, reduce, refine and deal in magnesite, graphite and other minerals. Incorporators: Leon Daoust, Alme Daoust, Ernest Douglas Wintle, Annie McPartlin and Elsie Bramson. Chief place of business, Montreal, Que.

INTERNATIONAL MANGANESE CO., PORTLAND, ME.

• INTERNATIONAL MERCANTILE MARINE CO.

*(1) Earnings Discussion.—It was stated Jan. 8, 1917, that this company's monthly earnings are no longer publicly announced. The last official figures were for September, 1916, when \$3,700,000 was earned.

A director stated that there had been a gradual improvement since, and that the average for the three months ended Dec. 31, 1916, had been about \$4,000,000 net per month. This is at the rate of \$48,000,000 a year.

After allowing \$16,000,000 for war taxes, this would leave \$32,000,000 for the pfd. stock, equivalent to over \$90 a share.

*(2) Earnings in 1916, Estimated.—It was stated Jan. 11, 1917, that the net earnings of this company in the year ended Dec. 31, 1916, were approximately \$40,000,000, after deducting the war tax. The earnings in September, it is stated unofficially, were \$3,700,000; October, \$3,800,000; November, in excess of \$4,500,000, and December running as strong as the previous month. This denotes a steady and consistent earning power.

It remains to be seen what effect the new British shipping policy will have on earnings. It is stated in shipping circles that the decrease in earnings on space commandeered by the Government will be largely made up by the increase in earnings from space offered to the public.

The pfd. stock of the company a year previously sold at 78%, or practically on a parity with the present price. Since that time the company has added about \$40,000,000 in cash to its assets and has reduced its interest-bearing debt by about \$25,000,000. All ships lost in the Admiralty service have been paid for by the British Government at a price above the book value.

Plans for the funding of the 88% back dividends on the pfd. naturally will await a more propitious time. It

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

is believed that the plans which were checked when the new "nationalized" shipping policy went into effect will be advocated anew at the proper time.

¹(3) December Earnings Increased.—It was stated Jan. 17, 1917, that earnings of this company in December were nearly \$5,000,000, or \$500,000 greater than the best previous estimate. The trend of earnings had been upward since September, and new contracts are being made at the highest freight rates on record. These conditions indicate big earnings, which may exceed the record monthly earnings of \$6,700,000, made during the summer of 1916.

These conditions also upset the adverse calculations made a month previously, when the new British policy of "nationalizing" shipping was announced. This policy permitted the British Government to commandeer 85% of space on Atlantic liners flying the British flag. It can be stated that this company will get in the neighborhood of \$10 a ton for all space so commandeered. This is somewhat less than half the rate charged to the public, but, on the other hand, it is triple the rate in vogue before the war started.

On the basis of this rate the I. M. M. Co. can overcome the increased cost of transportation and still make a fair profit.

The Marine Co.'s floating debt of \$6,000,000, which was contracted for among New York banks when the reorganization plan was adopted, was paid off out of earnings in three months. In addition, about \$1,000,000 has been spent out of earnings for the improvement of ships. There are several millions of cash in the treasury, it is estimated.

The cash or the equivalent of cash in the treasuries of the English subsidiaries of the I. M. M. Co., inclusive of the amounts paid by the British Government for ships sunk while in Admiralty service, is about \$30,000,000.

The paying off of \$30,000,000 in bonds has added about 60% of assets to the \$52,000,000 pfd. stock, but this fact has not been reflected in the market price of the pfd.

No funding plans are under consideration, but it is probable that the matter will be taken up again when the full effect of the new British shipping policy is known.

A readjustment of the back dividends could be effected in peace times as well as in war times, it is contended in official circles.

—Mar.

¹(1) Verdict for Company.—It was announced March 8, 1917, that a verdict for this company had been returned by the jury in the damage suit for \$100,000 by Michael J. O'Connor. The suit had been on trial before Judge Manton, in the United States District Court. O'Connor, who claims to be the owner of the Lord Leitrim estate in Ireland, took passage on one of the company's steamers, and was refused permission to land when the steamer reached Southampton. He was kept on board by order of the British Government, and brought action against the International Mercantile Marine Co., for false imprisonment.

¹(2) Initial Dividend on Preferred.—It was announced March 15, 1917, that directors of this company had declared an initial dividend of 3% on the pfd. stock, payable April 14 to stock of record March 30.

¹(3) Comment on Initial Dividend.—On March 16, 1917, the "Wall Street Journal" said that there was nothing to indicate whether the payment of the initial dividend on the pfd. stock of this company was quarterly, semi-annual or annual. The inference is, however, that it is semi-annual and that the stock will remain on a 6% basis. The funding of the 88% of back dividends will probably be reserved for a more opportune time.

A director of the company said: "It was only fair that the stockholders should get some return on their investment. The company can afford to

pay this dividend, and the stockholders have been very patient. Earnings in January were very satisfactory."

¹(4) Stock Certificates.—It was announced March 19, 1917, that notice had been given to holders of outstanding stock trust certificates for pfd. stock of this company to present their certificates at the agency of the voting trustees, 51 Newark Street, Hoboken, N. J., to be exchanged for definitive stock of the company.

Pursuant to the foregoing notice, J. P. Morgan & Co., as agents for the voting trustees, will be prepared on and after April 14, 1917, to distribute the dividend of 3% to holders of pfd. stock issued in exchange for stock trust certificates who file mailing instructions with them.

—Apr.

¹(1) Status.—It was stated April 5, 1917, that the new relations between Great Britain and the United States have a bearing on the financial status of this company. It is considered probable that the \$40,000,000 tied up in the treasuries of the British subsidiaries of the Mercantile Marine Co. will be released. That sum would be sufficient to pay off nearly all of the 88% accrued dividends on the \$52,000,000 of preferred stock.

There was a meeting of the finance committee of the Mercantile Marine on April 4 and the question of releasing the money held abroad, it is understood, was discussed.

Ocean tonnage is selling at the highest prices on record and this augurs well for the shipping business in the event of an early peace.

¹(2) Ships Under British Flag Requisitioned by Great Britain.—Pres. P. A. S. Franklin, of this company, announced April 16, 1917, that all of the company's ships sailing under the British flag had been requisitioned by the British Government. About 90% of the fleet sails under British register, but some of them had been taken over by the Government previous to the order. The information caused a general decline in shipping shares.

Although ships commandeered by the British Admiralty are operated under secret orders, it is understood that the owners receive from the Admiralty \$10 for every ton of freight transported across the Atlantic. The rate charged in the open market is \$100.

These two figures compare with a rate of \$4 which prevailed previous to the outbreak of the war in 1914.

The lines affected are the Atlantic Transport, White Star, Dominion, and Leyland. The American Line is also a part of the company, but as its vessels fly the flag of the United States they cannot be requisitioned by the British Government.

¹(3) Earnings Under New British Order Estimated at \$2,250,000 a Month.—On April 17, 1917, the "Wall Street Journal" said that under the order of the British Government requisitioning all cargo and passenger space of ships flying the British flag this company should be able to earn \$2,500,000 a month in operating revenue, exclusive of the excess profits tax. This is based on the assumption that there will be no wholesale destruction of ships and that the United States Government will not pursue a radical policy in commandeering ships of the company flying the American flag.

The American ships owned and chartered by the American Line and the Atlantic Transport Line of West Virginia have about 20% of the total tonnage of the Mercantile Marine fleets.

Earnings of \$2,500,000 a month would leave no doubt that the International Mercantile Marine Co. could easily maintain a 6% dividend rate on the pfd. stock and lay aside a handsome surplus. This estimate compares with current monthly earnings of about \$4,000,000 and with the record monthly earnings of \$6,700,000, made in May, 1916.

This estimate of \$2,500,000 a month is at the annual rate of \$30,000,000. Subtracting one-third of the net operating revenue for special war taxes would leave \$20,000,000, equivalent to \$38 a

share on the \$52,000,000 pfd. stock. In 1916 the company earned about \$40,000,000 net, over and above the special taxes, equivalent to about \$76 a share on the pfd.

¹(4) Blue Book Rate Said to Be \$2.64 Per Month.—On April 18, 1917, the "Boston News Bureau" said this company's financial outlook for the remainder of the war period depends a good deal upon what constitutes the British Admiralty "Blue Book" rate for tonnage. This rate is more or less of a state secret, but it is understood to be about 11 shillings (\$2.64) per ton per month for regular cargo boats. Passenger boats are more expensive to operate, and presumably will be compensated for on a higher basis.

Just prior to the war the "Blue Book" rate was 7 shillings. The present rate of 11 shillings, therefore, does not much more than measure the increase in operating expenses. The open market rate for time charters on British tonnage is about 33 shillings for boats operating under restrictions requiring them to reserve 85% of their capacity for British Government requirements. For boats operating without this restriction the rate is about 40 shillings.

It will be seen, therefore, that the Admiralty rate is only one-third the earning capacity of the boats in the open market.

INTERNATIONAL MOTOR ACCESSORIES CORP.

¹(1) Incorporated on March 14, 1917, in Delaware, with a capital of \$4,000,000, to manufacture automobiles and motorcycles. Incorporators: C. Fearon, E. Lynch and J. M. Dougherty, Wilmington, Del.

INTERNATIONAL MOTORCAR CO.

¹(1) To Enlarge Plant.—It was stated on March 28, 1917, that the Allentown, Pa., plant of this company would be enlarged by the erection of an assembling building 240 by 50 feet, for which the contract has been awarded to Butz & Clader. The same contractors are just completing two other shops, 50 by 54 feet and 50 by 70 feet, which will be used for stock and machining purposes. February's output was the largest in the history of the plant, including 80 trucks.

INTERNATIONAL MOTOR CO.

¹(1) Expansion.—It was stated Jan. 24, 1917, that work is proceeding on the enlargement of the Allentown, Pa., shops of this company so the capacity would be increased to 100 large trucks a month. The capacity of the Allentown shops has been 75 trucks monthly. The Allentown plant now employs 800 men, and when the enlargements are completed by March 1 the force will be increased to 1,000.

Of orders aggregating 1,500 trucks for the European battlefields the company still has 275 to manufacture, and the endeavor will be to make the total output for 1917 3,000 trucks, including several hundred pieces of motor-driven fire apparatus.

¹(2) Recapitalization Results.—It was stated Jan. 24, 1917, that the recent readjustment of the capitalization of this company had resulted in a large improvement in the company's working capital. For some years the company had been embarrassed by the need of working capital, and while its production of trucks increased, the lack of funds made inroads on receipts, and prevented the real earning power from being shown.

The capital readjustment resulted in the company receiving sufficient money to pay off its current debts and leave it with approximately \$600,000 in cash. Present capitalization is \$4,381,590 7% first cumulative pfd., \$2,723,000 7% 2d pfd. cumulative in two years, and 53,638 shares of common with no par value.

The company makes two well-known trucks, the Mack and Sauer. The former is regarded as among the best trucks on the market and is always in

This information, while not guaranteed, is believed to be correct.

JANUARY 1 TO APRIL 30, 1917

demand. Considering the lack of working capital, production has been on a large scale. In 1915 production was 1,403 trucks and in 1916 it was increased to 2,713 trucks.

Orders on hand at the beginning of 1917 were larger than the year before, with further orders being received. Output for 1917 is expected to reach at least 3,000 trucks, and with the improvement in working capital and credit the company is expected to show largely increased earnings.

Average earnings in 1915 and 1916, the latter year partly estimated, were sufficient to pay both pfd. dividends and leave \$2.75 a share on the common.

—Apr.

“(1) Order for 150 Trucks from Great Britain.—After careful tests the British Government April 17, 1917, ordered from this company 150 5½-ton chassis of the “bull-dog” type. These vehicles are 40-horsepower heavy-duty trucks, and are the same standard product used so extensively in commercial lines in the United States.

INTERNATIONAL MOTOR TRUCK WHEEL CORP.

“(1) Incorporated on March 16, 1917, in Delaware, with a capital of \$1,000,000, to manufacture motor cars, trucks and appliances. Incorporators: Franklin A. Froman, Ed. F. Kans and Arthur L. Roehmeyer, Chicago.

INTERNATIONAL NAVIGATION CORP. OF WILMINGTON, DEL.

“(1) Incorporated on Feb. 22, 1917, in Delaware, with a capital of \$1,000,000, to build and own shipyards, docks and boats. Incorporators: Wm. O’Keefe, Geo. G. Stiegler and E. E. Wright, Wilmington, Del.

INTERNATIONAL NICKEL CO.

“(1) Income Account, Three and Nine Months Ended Dec. 31, 1916, compares as follows:

	1916	1915
\$ mos. gross.....	\$4,853,351	\$3,541,776
Net	4,501,047	3,423,246
Surp. aft. chgs., pfd. & com.		
divs.	1,366,464	733,122
9 mos. gross.....	12,628,496	10,209,531
Net	11,849,924	9,741,828
Surp. aft. chgs., pfd. & com.		
divs.	4,933,258	4,131,588

“(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$4,933,258, compared with \$5,644,083 Dec. 31, 1915.

“(3) Earnings on Stock.—On Jan. 26, 1917, it was stated that in the quarter ended Dec. 31, 1916, International Nickel Co. had a balance for the \$41,834,000 common stock of \$3,876,540. This is equivalent to 9.2%, or an annual rate of 36.8%, which is over \$9 a share.

For the nine months ended Dec. 31, the balance for the common amounted to \$9,963,410, or 23.7%. In other words the company earned in three-fourths of the current fiscal year practically the entire year’s dividend at the rate of \$6 a share, which is now being paid.

In the last two months balance of earnings for the common stock was at a rate of 40% a year, or \$10 a share.

—Mar.

“(1) Forecast of Earnings.—On March 30, 1917, it was stated that this company, according to interests in close touch with its affairs, for the year ending March 31 would show earnings of more than \$8.25 a share on the common stock.

Of late earnings have been running at the rate of approximately \$10 a share. It is expected that the increase in the price of nickel, recently announced, will enable the company to show an additional \$2 a year earned on its common.

With the construction of the new Canadian smelter, which will be completed in the latter part of 1917, the company’s capacity should be increased from 60,000,000 pounds to 80,000,000 pounds per annum, or 33½%. If earnings increase proportionately, it would mean about \$16 a share for Nickel common.

INTERNATIONAL PAPER CO.

“(1) Readjustment Plan.—It was announced Feb. 5, 1917, that a plan for consolidating the indebtedness of this company under one mortgage for the liquidation and discharge of the accumulated dividends upon its pfd. stock, for taking care of all bond indebtedness maturing during 1918 and 1919, and for the providing for future capital requirements, had been formulated by the directors and approved by a committee of which F. N. B. Close, Vice-Pres. of the Bankers’ Trust Co., New York, is chairman.

Holders of pfd. stock are asked to deposit their shares with the Bankers’ Trust Co. The deposit agreement authorizes the committee to vote the deposited stock in favor of the creation of a new first and refunding 5% sinking fund mortgage on the company’s properties, under which not more than \$20,000,000 30-year bonds can be issued.

Only \$7,500,000 of these bonds are to be issued to the public for the purpose of retiring existing bonds, but an important feature is that the mortgage meets any possible future requirements of the company for the development of its properties.

An increase in the pfd. stock will be authorized to the amount of 75,000 new shares to be issued if required for the conversion, at par, of \$7,500,000 bonds to be issued under the new mortgage.

Assenting holders of pfd. stock are offered in full settlement of all unpaid dividends 7½% of the face value of their holdings in cash, 14% in 6% cumulative pfd. stock, and 12% in common stock. This offer is made on condition that the proposal shall be accepted forthwith by the holders of a sufficient amount of pfd. stock.

The plan also provides for the issue of such amounts of unissued pfd. and common shares as may be necessary to make payment required for the adjustment of deferred dividends.

Holders of the old bonds will be allowed a cash commission of 1½% when taking the new bonds. Only the first \$7,500,000 of the bonds issued under the new mortgage will, for a period of five years, carry the conversion privilege.

Under the plan \$727,000 of the bonds will be reserved to provide for refunding or retiring two issues which mature in 1919, and the sum of \$8,373,000 will be reserved to provide for extension to plants, new property, etc.

When readjustment is effected the new mortgage will be a first lien upon the plants and properties of the company.

“(2) Statement by President.—In commenting on the financial readjustment plan of this company Pres. Dodge pointed out that it would not be wise to attempt to liquidate the accumulated dividends in cash, and under the plan the equity of the stock in the properties which the company owns will be increased. Directors intend to use a substantial part of earnings for 1916 and 1917 for retirement of bonded debt. It is believed that earnings for 1916, after allowing for charges and depreciation, will reach \$4,500,000.

Unpaid dividends upon the \$22,406,700 cumulative pfd. stock amount to 33½%, or \$7,506,214. During the preceding nine years, when the full 4% on the pfd. shares was not paid, the company expended \$24,848,000, an amount in excess of the total outstanding pfd. stock, for repairs, maintenance, floating debt and retirement of the bonds. The largest contribution in this list, \$12,300,000 for repairs, maintenance and betterments, was charged to earnings.

The company’s timber lands in the United States and Canada, including upward of 4,000,000 acres of free and leased lands, will be covered by lien through the pledge with the trustee of the stocks of companies holding title to this property.

These properties thus covered are virtually unencumbered, except for two small liens aggregating less than \$350,000.

“(3) Comment on Readjustment Plan.—On Feb. 7, 1917, the “Boston News Bureau” said that extraordinary war conditions had produced a period of prosperity great enough to permit this company to devise and announce a complete financial reorganization plan.

This step had been talked about for years. Now it is brought forward with complete assurance that it can be carried out successfully.

The company has maturing in 1918 its first mortgage 8% issue, which, as of December, 1916, amounted to \$8,138,000. Some of these bonds will be paid off in cash, but about \$7,500,000 will be refunded into the new first mortgage sinking fund 5%.

In addition, International Paper has maturing at different times in 1918 four different lots of divisional bonds amounting in the aggregate to \$2,028,000. These undoubtedly will be paid off in full in cash out of the assured big profits of 1917.

Other than these bonds International Paper has but one issue, the convertible 5%, of which \$4,340,000 are outstanding.

The refunding process is expected, therefore, not only to give the company a broad financing medium, but it will cut bonded debt from \$14,612,000 to about \$11,800,000 and all 6% issues will be renewed on a 5% basis.

The decision to clean up the 33½% of accrued dividends on the \$22,406,700 pfd. is also part of the financial rejuvenation of this company.

This dividend is clearly being paid out of the earnings of the 1916 and 1916 fiscal years. It will be noted that this plan gives 7½% in cash, 14% in pfd. and 12% in common. For a company which in 1916 earned 20% on its pfd. and which in 1917 promises to earn 50% to 60%, this small cash distribution seems rather niggardly.

The cleaning up of this accrued dividend will result in distribution of \$1,080,000 in cash, about \$3,138,000 in additional pfd. and \$2,688,000 in additional common.

On the basis of 100 for the pfd. and 42 for the common this payment of the accrued pfd. dividend gives shareholders the equivalent of \$26 per share in cash. In this sense it is liberal.

“(4) Stockholders’ Meeting March 15.—It was announced Feb. 7, 1917, that a special meeting of stockholders of this company would be held on March 15 to vote on new financial reorganization plan of the company. Large deposits of pfd. stock have been made with the Guaranty Trust Co., as well as a large amount of the bonds in exchange for the new 5%, and the company has made application to list \$22,406,700 pfd. rights.

“(5) Admitted to List.—It was announced Feb. 15, 1917, that the New York Stock Exchange had admitted to its list \$4,437,400 of this company’s Bankers’ Trust Co. certificates of deposits for its pfd. stock, with authority to add \$17,969,300, making the total amount authorized to be listed \$22,406,700.

“(6) Gain in Quick Assets.—On Feb. 16, 1917, in commenting on the proposition to retire \$7,000,000 of this company’s bonds during 1917, the “Boston News Bureau” said that the annual statement would show net quick assets slightly in excess of \$15,000,000.

This, it was stated, is the largest balance of quick assets the company has ever carried. It represents a 50% increase over the net working capital of \$10,137,011 on hand Dec. 31, 1915, and is three times the working capital the company had when Pres. Dodge came to the corporation.

Further than that it is a larger balance of net quick than the corporation actually needs. It amounts to better than 60% of a normal year’s gross business.

There is hardly a question but that International Paper can retire the \$7,000,000 bonds and still have a working capital at the close of 1917 that will be very close to the Dec. 31, 1916, figures.

JANUARY 1 TO APRIL 30, 1917

—Mar.

* (1) **Stock Deposits.**—It was announced March 7, 1917, by Chairman Close of this company's pfd. stockholders' committee, that up to March 6, 1917, 149,657 shares of pfd. stock had been deposited with the Bankers Trust Co. to adjust the deferred dividends, constituting more than two-thirds of the pfd. stock, without taking into account stock deposited at sub-depositories, or written acceptances of the plan actually lodged with the committee. March 10 is the final date for deposit.

* (2) **Price Reduction.**—On March 8, 1917, the "Boston News Bureau" said it was not likely that the reduction in newsprint prices which this company and other newsprint producers made to 2½ cents per pound would materially alter the bond refunding plans of the International. This plan comprehended the proposition of consolidating its bonds into a single 5% mortgage issue and paying off from current assets nearly \$7,000,000, or about 50% of present \$14,500,000 bonds of various issues, including subsidiaries.

The retirement of \$7,000,000 bonds should not prove especially burdensome in view of the fact that on Dec. 31, 1916, net working capital was in excess of \$15,000,000 and on March 1 must have been between \$16,000,000 and \$17,000,000. A normal net working capital of \$8,000,000 would be sufficient.

Two-thirds of International's output is newsprint and one-third other grades of paper. Two-thirds of the company's net profits, however, come from "other grades," which furnish one-third the output.

* (3) **Time Extended for Tenders.**—It was announced March 14, 1917, that this company, to allow bondholders who had not tendered their bonds to participate in the offer submitted by the committee, had extended time in which it will receive tenders to and including March 23. Holders of bonds in excess of \$7,500,000 have already accepted the offer, thus assuring success of the bond refunding plan.

* (4) **Refunding Plan Reported Successful.**—On March 17, 1917, it was stated that this company's plan to refund its bonds into a new general and first mortgage 5% issue of \$7,500,000, paying off out of current resources and out of surplus profits of 1917 over \$7,000,000 of the bonds, was an assured success. More than the needed amount of the nearly \$15,000,000 bonds outstanding had assented to the plan.

So far as the proposition to pay the 3¾% of accumulated dividends with 7½% in cash, 14% in pfd. and 12% in common is concerned, this plan also seems likely of success.

* (5) **Earnings, 1916, Estimated.**—It was stated March 22, 1917, that this company in its final year to Dec. 31, 1916, is understood to have earned approximately \$18 per share for its \$17,442,800 common stock after deducting the entire 6% pfd. dividend. In 1915 the company disclosed but 5.44% for its pfd., and even in the good year of 1906 profits for the pfd. ran up to but 8.86%.

* (6) **Mortgage Authorized—Preferred Stock Payment Plan.**—Shareholders at a special meeting held on March 27, 1917, authorized the refunding mortgage and authorized the directors at their discretion to act on the preferred stock dividend payment plan.

* (7) **Comment on New Financing.**—On March 28, 1917, the "Wall Street Journal" said that the bond adjustment plan declared operative would consolidate under one mortgage the entire bonded debt of the company by the creation of a new first and refunding 5% sinking fund mortgage on the company's properties, under which not more than \$20,000,000 30-year bonds can be issued. Only \$7,500,000 of these bonds is to be issued to the public at this time, for the purpose of retiring existing bonds so that the mortgage will meet any possible future requirements of the company for the development of its properties.

The company's bonded debt at the present time is approximately \$15,000,000

of which \$8,138,000 International Paper Co. first consolidated 6s, \$1,500,000 Hudson River Pulp & Paper Co. 6s and \$550,000 Rumford Falls Sulphite Co. 6s fall due in 1918. Holders of these bonds have the privilege of exchanging their bonds par for par for the new 5% bonds and will receive 1½% cash commission on the par amount of their bonds for exchange and adjustment of difference on interest receivable on present bond to maturity and that to be earned by the new bond.

It is the company's intention to pay at the date of maturity a substantial amount of these 6% bonds in cash and in the event of the receipt of offers for exchange for more than \$7,500,000 of the new bonds reserves the right to pro-rate the \$7,500,000 of new bonds among bondholders offering to exchange. As outstanding 6s maturing in 1918 approximate \$10,000,000 bonds tendered but not accepted will receive payment in cash at par and accrued interest, together with a premium of the rate of 1% per annum from the time of payment to the date of maturity of such bonds.

—Apr.

* (1) **Violation of Sherman Law Alleged.**—Announcement was made April 12, 1917, that five members of the executive committee of the News Print Manufacturers' Association and two other men had been indicted by the Federal Grand Jury at New York on the charge of having violated the Sherman anti-trust law by entering into a combination to limit the output of and increase the price of newsprint paper.

Contrary to the usual custom, the indictment names only individuals. The maximum penalty on conviction is \$5,000 fine or one year in prison or both. The case is being handled for the Government by Bainbridge Colby and Mark Hyman, special Assistant United States District Attorneys.

The five executive members of the News Print Association who were indicted are:

George H. Mead, chairman of the executive committee of the association, and Pres. of the Spanish River Pulp & Paper Mills, the Lake Superior Paper Co. and of the G. H. Mead Co., of Dayton, O.

Philip T. Dodge, Pres. of the International Paper Co.

Edward W. Backus, Pres. of the Minnesota & Ontario Power Co. and of the Fort Frances Pulp & Paper Co.

George Chahoon, Jr., Pres. of the Laurentide Co. and manager of the Canada Export Paper Co.

G. H. P. Gould, Pres. of the Gould Paper Co. and the Donnacona Paper Co.

The other defendants are: Alexander Smith, a banker, of Chicago, and Frank J. Sensenbrenner, Vice-Pres. of the Kimberly-Clark Co., paper manufacturers.

Mr. Hyman said that the alleged conspiracy to raise the price of newsprint paper began late in 1915 or early in 1916.

* (2) **Indicted Officers Plead Not Guilty.**—The seven men prominent in the manufacture of newsprint paper who were indicted on the charge of violating the Sherman anti-trust law through combining to raise the price of paper, appeared before Judge Cushman in the United States District Court at New York April 17, 1917, and pleaded not guilty, giving \$3,000 bail each.

They were George H. Mead, chairman of the executive committee of the Manufacturers Association; Philip T. Dodge, Pres. of the International Paper Co.; Edward W. Backus, Pres. of the Minnesota & Ontario Power Co., and the Fort Frances Pulp & Paper Co.; Geo. Chahoon, Jr., Pres. of the Laurentide Co.; Gordias H. P. Gould, Pres. of the Gould Paper Co.; Alexander Smith, a Chicago banker, and Frank J. Sensenbrenner, associated with the executive committee.

It came out incidentally at the arraignment of the defendants that Judge Cushman had discharged the Federal Grand Jury, which found the indictment, for a period of three years.

Bainbridge Colby, who with Mark Hy-

man, is the special Government prosecutor, was greatly chagrined to learn this.

* (3) **Deposits of Stock Received Until April 26.**—The pfd. stockholders' committee of this company April 18, 1917, issued a notice to stockholders announcing that deposits of stock would be received up to and including April 26, at which time it must be decided whether the plan is to be carried out.

* (4) **Wage Increase at Watertown, N. Y.**—This company April 20, 1917, announced the granting of a general wage increase to all employees of its mills at Watertown, N. Y. The increases are voluntary by the company and add two cents an hour to the existing rates of all men working by the hour and \$1 to the weekly salaries of those paid by the week. Increases are given in addition to the regular 10% bonus which has been in effect since November. About 500 men in the Watertown district are affected. The increase will call for an additional outlay of approximately \$25,000 per annum.

* (5) **Report, Year Ended Dec. 31, 1916, shows:**

	1916	1915
Gross revenue....	\$7,465,827	\$3,121,681
Surp. after int. and deprec....	4,620,727	1,219,515
Bal. after pfd. divs.	3,836,493	771,381

* (6) **Balance Sheet, as of Dec. 31, 1916,** shows a profit and loss surplus of \$18,238,743, compared with \$12,402,250 Dec. 31, 1915.

* (7) **Earned \$20.62 a Share on Preferred in 1916.**—This company's 1916 surplus after charges of \$4,820,727 is equivalent to \$20.62 a share earned on 224,067 shares of pfd. stock, as compared with \$5.44 earned in 1915.

* (8) **Finances in Best Condition in History, States Pres. Dodge.**—Pres. Philip T. Dodge, of this company, in his report to stockholders for 1916, showed that the company's finances were in a better condition than ever before. Total earnings of \$7,465,827 show an increase of over \$4,000,000, as compared with 1915 and 1914, respectively, and an increase of over \$5,000,000, compared with those of 1913. Balance of \$4,620,727 is a gain of \$3,401,212 as compared with 1915, and this after deduction of depreciation account almost \$1,000,000 greater than in previous years. Cash on hand of \$2,688,521 is the greatest in the history of the company and an increase of approximately \$1,500,000, as compared with 1915.

Pres. Dodge, in his remarks to stockholders, pointed out that net gain for the year after deduction of interest charges, sinking fund and proper depreciation, was \$4,620,727, an increase over that of the previous year of \$3,401,212.

The most notable occurrences of the year were the extinguishment of the floating debt and the restoration of the 6% dividend on the pfd. stock, which, for eight years past, have received but 2% per annum.

Mr. Dodge said the statements that high price of newsprint is due to limitation of output by the manufacturers and to a combination to increase prices are without foundation. The base price established by International Paper Co., \$3.10 per 100 pounds at the mill, is, with two exceptions, the lowest price of any large manufacturer within the United States. At the present time the production of the company averages 1,800 tons of paper per day, of which about two-thirds is newsprint paper and the balance special papers of many varieties.

Water powers of the company are extensive and valuable and are located largely in the United States, in fields where they are of increasing value.

The company is also the owner of extensive woodlands, both in the United States and Canada, and is also the possessor of extensive Canadian Crown lands, carrying the right to cut wood in Canada. The woodlands are of great and increasing value and in years to come are expected to be a great protection in assuring a supply of pulpwood to the mills of the company.

JANUARY 1 TO APRIL 30, 1917

Improvement and extension of mill properties are to be continued, and it is probable that at a suitable time it will be found advantageous to erect one or more mills in Canada, where the company controls both wood and water powers.

(9) Court's Aid for Stockholders to Be Sought, States Judge Holmes.—On April 28, 1917, a Corinth, N. Y., dispatch to the "Wall Street Journal" stated that Judge D. A. Holmes, a stockholder of this company, at the annual meeting, after requesting information as to assets, etc., said that he was preparing to go into court and compel the directors to make some provision for stockholders. He questioned Pres. Dodge as to why no provision had been made for deferred payments on the pfd. stock when the company had shown an increased surplus at the end of each year since 1908.

Judge Holmes maintained that in view of the fact that the common stock had received no dividends in about 15 years the directors should be authorized to make some payment. Resolutions to authorize dividend on the common stock were defeated in vote of the stockholders.

Pres. Dodge stated the pfd. stock was entitled to dividends only when the directors believed the condition of the company called for them. The directors are all large stockholders, he said, and are looking out for the best interests of the company. The \$2,000,000 cash which the company has on hand is to be used for the redemption of bonds maturing in 1918.

The affairs of the company at the present time are in better shape than ever before, but to make a cash payment of back dividends on the pfd. stock would wreck the company, he added.

A stockholder then stated that few people realized what difficulties the International Paper Co. had to combat, and said the greatest menace confronting the company is the antagonism of the newspaper publishers.

(10) Meeting Adjourned for Two Weeks.—The meeting of the Board of Directors of this company April 27, 1917, was adjourned for two weeks without action upon the plan for adjustment of the deferred dividends. Deposits of stock will continue to be received until May 10, 1917. All retiring officers of the company have been re-elected for the ensuing year.

Pres. Dodge stated that apparently holders of a substantial amount of the stock which had not been deposited fail to understand the company's position in regard to the proposed settlement of back dividends. He stated since the plan was presented to stockholders in January conditions had materially changed in the paper industry, which make the acceptance of the plan by the stockholders appear as even more desirable than at the time it was put out.

While it is believed favorable earnings will continue throughout 1917, it is not possible to predict the future, particularly in view of the increasing cost of operation. All the surplus earnings of 1916, as well as of 1917, will be required to meet maturing bonds and for the cash distribution to stockholders. If the dividend adjustment plan is carried out.

(11) President Asks Stockholders' Aid.—Pres. P. T. Dodge, of this company, issued a statement April 27, 1917, which expressed a doubt whether the proposed plan for readjusting the finances could be put through without fuller support from pfd. stockholders. The proposal calls for the consolidation of the corporation's indebtedness under a single mortgage, and the payment of the 33 1/3% of dividends in arrears on the pfd. partly in cash and the remainder in stock.

"With nearly 90% of the stock deposited," said Mr. Dodge, "it would be especially regrettable if failure to carry out the plan resulted from the indifference of a few stockholders or from failure to deposit stock held for speculative accounts."

"Stockholders should remember as soon as normal conditions return sharp competition will again prevail, and while the International Paper Co. has every confidence in its ability to meet this competition, it is not safe to figure that earnings will be sufficient to more than assure the regular dividends upon the pfd. stock."

"Only a small percentage of the non-deposited stock has indicated any opposition to the dividend adjustment plan, and it would seem as though the failure of many stockholders to deposit is due largely to indifference, or to a misunderstanding of the object, advantage, and purpose of the adjustment."

INTERNATIONAL PAPER CORP.

(1) Application to List.—Announced Feb. 8, 1917, that the New York Stock Exchange had received application to list International Paper Corp. \$22,406,700 Bankers Trust Co.'s certificates of deposits for pfd. stock.

INTERNATIONAL PHONOGRAPH CORP.

(1) Incorporated on March 31, 1917, in Delaware, with a capital of \$1,500,000, to manufacture all kinds of talking machines. Incorporators: Paul A. Zetzelman, Wm. C. Griffiths and Ernest H. Greenwood, all of New York.

INTERNATIONAL POWER & CONSTRUCTION CO., LIBBY, MONT.

(1) New Company.—It was announced Jan. 28, 1917, that this company had been incorporated with a capital of \$250,000, to engage in manufacturing and mining and milling business and to own and develop public utility properties. Incorporators: C. Edwards Lukens, Leo H. Faust, M. Lukens and M. H. Faust.

INTERNATIONAL E. R. OF NEW BRUNSWICK.

(1) Purchase by Government.—It was stated at St. John, N. B., Jan. 12, 1917, that the Canadian Government had purchased this company's railroad property, which extends from Campbellton, near the Quebec line, to St. Leonards, on the main border. It is said that the price was between \$2,000,000 and \$3,000,000.

The line, which is about 120 miles long, had been operated by the Government under a lease. Its eastern terminal taps the main line of the Intercolonial Ry. and at St. Leonards it connects with the Canadian Pacific.

INTERNATIONAL RY. CO.

(1) Improvements.—It was stated Jan. 29, 1917, that this company, Buffalo, N. Y., controlled by the United Gas & Electric Corp. through the International Traction Co., would spend in excess of \$1,000,000 early in 1917 in improvements. The company will purchase 50 new cars for the city lines and many of the older cars are to be rebuilt. The 10,000 horsepower generating unit ordered some time previously will be delivered in February and will be in service in March.

This will relieve the shortage of power experienced by the company since the Canadian Government placed an embargo on the exportation of power from the Canadian-Niagara plants to northern New York. A number of extensions will be built and new double-tracking will be done.

—Apr.

(1) Bond Issue Planned.—It was announced April 3, 1917, that a petition had been filed by this company with the New York Second District Public Service Commission for authority to issue \$1,458,717 5% bonds under its improvement and refunding mortgage, and to use \$102,000 of the bonds authorized in 1916.

(2) Bond Issue Planned.—It was announced April 4, 1917, that a petition had been filed with the New York Second District Public Service Commission by this company for authority to

issue \$1,458,717 5% bonds under its refunding and improvement mortgage, and to use \$102,000 of said bonds authorized in 1916.

INTERNATIONAL RYS. OF CENTRAL AMERICA.

(1) Earnings—	1917	1916
Feb. gross.....	\$57,739	\$57,472
Net after taxes..	33,493	34,459

INTERNATIONAL REFINING CO.

(1) Earnings, 10 Months Ended Jan. 31, 1917: Gross, \$3,681,721; operating expenses, including ordinary repairs, maintenance and taxes, \$2,927,375; net income, \$734,346; less interest, \$17,323; net earnings, \$717,023; surplus, March 31, 1916, \$700,088; total, \$1,417,111; less dividends, \$50,000; surplus, Jan. 31, 1917, \$1,367,111.

INTERNATIONAL SALT CO.

(1) Dividend Increased.—Announced March 1, 1917, that this company had declared a dividend of 1 1/4%, an increase of one-half of 1% over the last previous dividend, declared in December, 1916. The dividend is payable April 1 to stock of record March 15.

—Apr.

(1) Earned 11% on Common in 1916.—At the annual meeting of this company April 17, 1917, at which retiring directors were re-elected, Pres. M. B. Fuller reported that after deducting all charges for operation and depletion, the combined gross earnings of the subsidiary companies were \$1,034,681. After payment of interest on all bonds and notes and the proportion of earnings due on the stock of subsidiaries held by others, the net profits were \$667,439, which equals 11% on the \$6,077,130 par value of capital stock outstanding.

INTERNATIONAL SHIPBUILDERS CO., SEATTLE, WASH.

(1) New Organization.—Organization of this company was perfected on March 31, 1917, with L. F. Chester as president; G. W. Ninemire as vice-president; I. M. Howell as secretary, and W. S. Bradley as treasurer. The capitalization of the new company will be \$500,000.

The new company expects to specialize in wooden motor ships of 3,000 tons dead weight cargo. A seven-acre site has been secured on the Duwamish waterway and work on the new plant will start at once. As soon as material can be assembled on the grounds the keels of the two 3,000-ton vessels will be laid.

(2) Incorporated on April 3, 1917, in Washington, with a capital of \$500,000. Incorporators: I. M. Howell, G. W. Ninemire, W. S. Bradley, R. E. Cavette and L. F. Chester.

INTERNATIONAL SHIPBUILDING CORP., LTD.

(1) Incorporated on Feb. 28, 1917, in Canada, with a capital of \$2,000,000, divided into 20,000 shares of \$100 each, to construct and operate or cause to be constructed and operated any shipyards, timber limits, sawmills, wharves, dock, etc. Incorporators: Henry Almon Lovett, Geo. Wilson Cole, Norman Sheach, Burton Frederick Bowler and Patrick Francis Brown. Chief place of business, Montreal, Que.

—Apr.

(1) Shipbuilding Plant for New Brunswick, N. S.—On April 28, 1917, the "Boston Evening Transcript" said this company, with \$2,000,000 capital stock, had secured a site near Newcastle, on the Miramichi River, in New Brunswick, had acquired a saw mill and planing mill there and is negotiating for a foundry, with the intention of reviving on a large scale the shipbuilding industry that formerly thrived. It is said that contracts have been made or are pending for the construction of thirty vessels, and that the company expects to employ 700 men. B. B. Crowninshield, of Boston, will lay out the yard.

JANUARY 1 TO APRIL 30, 1917

INTERNATIONAL SILVER CO.

*(1) Preferred on 7% Basis.—Announced Feb. 28, 1917, that this company had declared a quarterly dividend of 1 1/4% on the pfd. stock, thus placing it on a 7% basis. The last previous quarterly dividend was 1 1/4%.

*(2) Report, Year Ended Dec. 31, 1916, shows:

	1916	1915
Gross	\$1,250,454	\$768,214
Bal. aft. dep.	1,007,598	487,935
Surp. aft. chgs.		
& pfd. divs.	407,078	†234,985
†Deficit.		

*(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$3,212,751, compared with \$2,850,873, Dec. 31, 1915.

INTERNATIONAL STEAM PUMP CO.

*(1) Russian Contract Adjustment.—See American Can Co.—Item No. 1.

INTERNATIONAL STEEL TREATING CO.

*(1) Capital Increased.—On March 1, 1917, the company filed notice at Dover, Del., of an increase in capital stock from \$1,000,000 to \$1,250,000.

INTERNATIONAL STEEL TUBE & ROLLING MILLS, INC.

*(1) Plant Addition.—It was stated Feb. 28, 1917, that this company, Cleveland, O., had completed plans for the erection of a plant in Warren, O., for the manufacture of iron and steel tubular goods, including lap-welded iron and steel boiler tubes and lap and butt welded pipe. The company has closed a deal with the Warren Board of Trade for a 28-acre tract along the line of the Baltimore & Ohio and Erie railroads.

The company has a capital stock of \$2,500,000. H. K. Flagler, who has built a number of tube mills, is Pres. and Gen. Mgr., and C. H. Hopkins is Treas.

INTERNATIONAL TICKET CO., MONTCLAIR, N. J.

*(1) Incorporated on Feb. 1, 1917, in New Jersey, with a capital of \$500,000, to deal in all kinds of theatre and street railway tickets and restaurant checks. Incorporators: Louis F. Dodd, Geo. Dodd, Rosendale, N. J., and A. J. Brett, New York City.

INTERNATIONAL TRACTION CO.

*(1) Improvements by Controlled Co.—See International Ry. Co.—Item No. 1.

INTERNATIONAL TRADING CORP., SEATTLE, WASH.

*(1) Incorporated on April 20, 1917, in Washington, with a capital of \$5,000,000. Incorporators: John Herck, Theo. H. Carey, Wm. Wexelblatt, E. N. Winslow and Jay H. Kugler.

INTERNATIONAL TRUST CO., BOSTON.

*(1) Capital Increased.—It was announced Jan. 8, 1917, that an increase in the capital stock of this company from \$1,000,000 to \$1,500,000 had been voted at the annual meeting. Stockholders of record Jan. 15, 1917, have the right to subscribe for an amount equal to 50% of their holdings, at the rate of \$200 a share, to be paid for March 1, 1917.

INTERNATIONAL TYPESETTING MACHINE CO.

*(1) Patent Decision Upheld.—See Intertype Corp.—Item No. 1.

INTERNATIONAL WOOD & PAPER PRODUCTS CO.

*(1) Initial Dividend.—Announced Jan. 16, 1917, that this company had declared an initial semi-annual dividend of 5%, payable Jan. 15 to stock of record Dec. 30.

INTERSOUTHERN LIFE INSURANCE CO., LOUISVILLE, KY.

*(1) Capital Decreased.—On April 15, 1917, the company filed notice at Frankfort, Ky., of a decrease in capital stock from \$900,000 to \$750,000.

INTERSTATE FOUNDRY CO.

*(1) Plant Sold.—Announced Feb. 1, 1917, that this company's plant at Cleveland, O., had been sold to new interests, composed of Mortimer C. Rosenfeld, of the Grabler Mfg. Co., who will be at the head of the company, and several associates. F. B. Whitlock, former Treas. and Gen. Mgr., becomes Vice-Pres. and Gen. Mgr. It is the plan of the new owners to enlarge the plant in order to double the capacity of the heavy shop devoted to the manufacture of automobile cylinder castings.

*(2) New Company Formed.—It was announced Feb. 22, 1917, that this company, Cleveland, O., had completed its organization by the election of M. C. Rosenfeld, Pres.; F. B. Whitlock, Vice-Pres. and Gen. Mgr.; L. A. Murfey, Treas., and C. A. Trathen, Sec'y and Asst. Treas.

The company will enlarge its plant by extensions to its heavy shop. It is the intention to gradually discontinue the manufacture of heavy castings, turning the entire plant into a light shop, particularly for the manufacture of automobile castings.

INTERSTATE IRON & STEEL CO., CHICAGO.

*(1) Capital Increased.—On Dec. 27, 1916, the company filed notice at Springfield, Ill., of an increase in number of directors and an increase in capital stock from \$400,000 to \$7,000,000.

*(2) Mortgage.—It was announced Jan. 15, 1917, at Marion, O., that a first mortgage, aggregating \$4,000,000, on three plants of this company, in Marion, East Chicago, Ind., and Chicago, Ill., payable to the Continental Commercial Trust Savings Bank and Frank H. Jones, trustee, Chicago, had been filed there.

The first \$2,500,000 of the mortgage represents the value of the company's plants, the additional \$1,500,000 being specified in the mortgage to be used for improvements.

—Feb.

*(1) Initial Dividend on Pfd.—Announced Feb. 23, 1917, that this company had declared an initial quarterly dividend of 1 1/4% on the pfd. stock, payable March 1 to stock of record Feb. 23.

*(2) Statement by Officer.—On Feb. 23, 1917, an officer of this company was quoted as saying: "War crisis has not reduced volume of new business, nor is there anything in sight to reduce it. Our difficulty is insufficient capacity. Our plants are booked full all year and their annual production exceeds 300,000 tons, including 130,000 at East Chicago, 60,000 at 18th Street, 60,000 at Old Grand Crossing plant, and 60,000 at Marion, O."

INTERSTATE LIGHT & POWER CO.

*(1) Operations.—See Northern States Power Co.—Item No. 6.

● INTERSTATE RYS. CO.

*(1) Report, Year Ended Jan. 31, 1917, shows:

	1917	1916
Income	\$592,021	\$571,112
Surp. aft. chgs.	152,271	129,865
Bal. aft. pfd. divs.	92,271	69,865

INTERSTATE RY. SUPPLY CO.

*(1) Incorporated on March 19, 1917, in Delaware, with a capital of \$500,000, to manufacture railway appliances. Incorporators: Geo. C. Havener and C. L. Bowman, Washington, D. C., and Chas. G. Guyer, Wilmington, Del.

INTERTYPE CORP.

*(1) Patent Decision Upheld.—It was announced March 19, 1917, that the Supreme Court had upheld the decision of the United States Federal Court at New York by dismissing the Linotype patent infringement suits brought by the Mergenthaler Linotype Co. against the International Typesetting Machine Co. and the Intertype Corp., the successor company.

INVINCIBLE VACUUM CLEANER MANUFACTURING CO.

*(1) Incorporated on April 11, 1917, in Delaware, with a capital of \$600,000, to manufacture and sell vacuum cleaners and electric appliances of all kinds. Incorporators: Herbert E. Latter and Carl Rimlinger, Wilmington, Del., and Clement M. Egner, Elkton, Md.

IOLA PORTLAND CEMENT CO.

*(1) Sale.—See Lehigh Portland Cement Co.—Item No. 2.

IOWA CENTRAL R. R. CO.

*(1) Stricken from List.—Announced Jan. 23, 1917, that the New York Stock Exchange had stricken from the list this company's pfd. stock.

IOWA PACKING CO.

*(1) New Enterprise.—It was stated April 10, 1917, that this company had completed plans for a new packing plant at Des Moines, Ia. A building to cost \$250,000 will be erected. Fred T. Fuller and George J. Sayer, of Chicago, and H. H. Stipp, of Des Moines, are directors.

IOWA SECURITIES CORP., MANHATTAN, N. Y.

*(1) Capital Increased.—On April 16, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$1,000,000 to \$2,000,000.

IPSWICH MILLS.

*(1) Stock Dividend.—It was announced March 22, 1917, that directors of this company had voted a 100% stock dividend to common shareholders, payable April 1 to stock of record March 14. Capitalization is \$250,000 8% pfd. and \$750,000 common, and it is proposed to issue \$750,000 additional common stock. Authorized capital is \$2,000,000 common and \$750,000 pfd.

Ipswich Mills have been paying 12% on common for several years, consisting of 4% extra and 8% regular. It is probable 8% will be paid on the new issue.

*(2) Financial Condition.—Announced March 23, 1917, that this company, incorporated under the laws of Massachusetts, had filed with the Massachusetts Secretary of State a statement of its financial condition, dated Dec. 31, 1916, which compares as follows:

	1916	1915
Assets—		
Real estate and machinery	\$779,522	\$631,061
Material, stock in process	1,205,782	984,175
Cash and debts receivable	1,111,393	908,078
Prepayment	33,454	26,978
Total	\$3,130,152	\$2,550,293
Liabilities—		
Capital stock	1,000,000	750,000
Accts. payable	163,869	138,653
Floating debt	875,000	1,200,000
Reserves	253,622	15,761
Surplus	780,890	399,930
Accruals	56,770	45,948
Total	\$3,130,152	\$2,550,293

IRELAND & MATTHEWS MANUFACTURING CO., DETROIT, MICH.

*(1) New Plant Being Erected.—Announced on March 28, 1917, that this company, manufacturers of stove trimmings, sheet-metal goods and automobile supplies, was erecting a plant on a site of about seven acres, at an estimated cost of over \$500,000 and containing more than six acres of floor space. The main building will be 60x666 feet, four stories, with a one-story room, 60x638 feet. The power plant will be 51x178 feet; the brass foundry, two stories, 56x129 feet, and the heavy press building, 75x568 feet. The plant is to be ready for operation about June, 1917.

IRON BLOSSOM CONSOLIDATED MINING CO.

*(1) Dividend Reduced.—Announced April 12, 1917, that this company had declared a quarterly dividend of 5

JANUARY 1 TO APRIL 30, 1917

cents a share, payable April 25 to stock of record April 16. On Jan. 25, 1917, a dividend of 10 cents a share was paid.

IRON BONNET GOLD MINING CO.

¹(1) Incorporated on Jan. 27, 1917, in Delaware, with a capital of \$500,000, to engage in mining of all kinds. Incorporators: Arthur W. Britton, Samuel B. Howard and L. H. Gunther, all of New York.

IRON CAP COPPER CO.

¹(1) Report, Year Ended Dec. 31, 1916, shows ore shipments of 10,360 tons, from which smelter returns show 60,027 ounces of silver and 1,629,897 lbs. of copper.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$280,212.

¹(3) Development in 1916.—A statement issued by Supt. Woodward, of this company, in connection with the annual report, says:

"A crosscut on the 800 level to vein No. 1 has proven to be the most important work of the year; here we found 10 feet of bornite and covellite ore averaging better than 10% copper, and we are now drifting east and west on it. This proves that the west end of the property carries commercial ore of exceptionally good grade; it proves that the iron oxide found above was, as expected, the capping of an ore body, and it also proves that the constantly increasing body of ore, as they open it east in the Copper Hill mine of the Arizona Commercial, is seemingly continuous through the Iron Cap."

¹(4) Development.—It was stated Jan. 22, 1917, that the drift run 35 feet from shaft at Iron Cap at a depth of 900 feet struck the same body of ore found on 800 level. Ore body was first struck at 600 feet, and has been encountered at various levels to 900-foot level.

—Apr.

¹(1) Ore to El Paso Smelter Yielded \$21,317 in February.—Pres. Knight, of this company, April 19, 1917, said that during February 25 cars of ore were shipped to the El Paso smelter, which yielded a net profit of \$21,317.

Mr. Knight added: "We have recently visited the property to find it looking better than we have ever seen it. The production should increase materially from now on. Part of the ore is concentrating and is being shipped to the Old Dominion Mill. We shall continue to ship the higher grades to El Paso smelter as has been our custom for several years, under a contract which expired April 1, a new one having been made which insures a market for our output. Present indications are that March earnings will exceed those of February."

IRONCLAY BRICK CO., COLUMBUS, O.

¹(1) Capital Decreased.—On January, 1917, the company filed notice at Columbus, O., of a decrease in capital stock from \$300,000 to \$200,000.

IRONTON SOLVAY COKE CO., IRONTON, O.

¹(1) Incorporated on Jan. 31, 1917, in Ohio, with a capital of \$2,000,000. Incorporators: Talbot E. Pierce, Frank R. Rhodes, Nelson Weedon, Richard B. Parker and Proctor K. Mallin.

¹(2) New Company Organized.—A Syracuse, N. Y., dispatch Feb. 9, 1917, stated that the Kentucky Solvay Coke Co. had announced the organization of the Ironton Solvay Coke Co., to build a by-product coke plant at Ironton, O., with an authorized capital of \$2,000,000, of which \$1,600,000 is to be issued.

—Mar.

¹(1) Stock Issue.—It was stated March 22, 1917, that this newly incorporated company, capital \$2,000,000, had issued \$1,600,000 of its stock, the Kentucky Solvay Coke Co. having purchased \$800,000 and \$200,000 having been purchased by Ironton, Od., investors, with the remainder open to subscription by the Kentucky Solvay Coke Co.

¹(2) Officers.—It was stated March 22, 1917, that the officers of this new company are: Pres., John G. Hazard; Vice-Pres., E. C. Witherby; Treas., N. D. Whitford; Sec'y, R. B. Parker.

IRONWOOD & BESSEMER RY. & LIGHT CO.

¹(1) New Owners.—It was announced Feb. 21, 1917, that control of this company, of Ironwood, Mich., including the Gogebic & Iron Counties Ry. & Light Co., the Ashland Light, Power & Street Ry. Co., the Ashland Power Co., the Hurley Water Co. and the Ironwood Water Works Co., with the Big Falls, the Tylers Fork, the Brownstone Falls, the Copper Falls and the Superior Falls hydro-electric developments and power sites, had passed into hands of Chicago interests.

On the completion of hydro-electric power developments now under way on the Montreal, Flambeau and Tylers Fork Rivers, these companies will comprise about 40,000 horsepower of hydro-electric and steam generating capacity. The construction of 9,000 horsepower steam capacity is under way.

The consideration involved in the sale of the properties was approximately \$3,500,000. L. E. Myers, of Chicago, has been elected Pres. of the company, with L. N. Bosen, of Chicago, as Vice-Pres.

IRONWOOD WATER WORKS CO.

¹(1) New Owners.—See Ironwood & Bessemer Ry. & Light Co.—Item No. 1.

IROQUOIS IRON CO.

¹(1) New Furnace Planned.—It was announced March 22, 1917, that this company had completed plans for a second new furnace at South Chicago of approximately 400 tons daily capacity. This will bring the plant of the company up to six furnaces, with an aggregate daily production of about 2,500 tons of pig iron.

IRRIGATION EQUIPMENT CO., INC.

¹(1) Incorporated on Jan. 31, 1917, in New York, with a capital of \$500,000, to deal in irrigation equipment, machinery, pumps, engines and dynamos. Incorporators: T. P. Campbell, G. E. Leonard and E. C. G. Munro, McAlpin Hotel, New York.

ISLAND CREEK COAL CO.

¹(1) Extra Dividend on Common.—Announced March 20, 1917, that this company had declared the regular quarterly dividend of \$1.50 a share on the pfd. stock; also a regular quarterly dividend of 50 cents and an extra of \$1 per share on the common stock, the same as three months previously. All dividends are payable April 2 to stock of record March 24.

¹(2) Earnings, 1917, Estimated.—On March 22, 1917, the "Boston News Bureau" said that this company, according to official estimates, should earn between \$17 and \$20 per share on its 120,000 shares of common stock during 1917. The company cannot hope to produce as much coal in 1917 as in 1916. Its 1916 production was slightly better than 2,250,000 tons.

In 1917 if output reaches 2,000,000 tons the hopes of the management will be fulfilled.

Island Creek Coal is exceedingly well off in cash. The Dec. 31 cash balance was \$1,269,000 and has increased.

The company has no development work to finance and is in the comfortable position of being able to pay out practically its entire net earnings as dividends if directors so vote.

Excellent as 1917 results promise to be, interests identified with Island Creek believe that 1918 will be the banner year, and that from that point there will be a gradual recession in gross and net profits.

—Apr.

¹(1) Report, Year Ended Dec. 31, 1916, shows net profits before interest of \$1,266,290, and final profits of \$1,125,655, after allowing \$146,833 for depreciation. This is equal to \$6.78 per share of common, against \$3.30 per share during

1915. The production of coal for the year totaled 2,280,661 tons, against 2,213,616 in 1915.

¹(2) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,375,422, compared with \$904,845 Dec. 31, 1915.

¹(3) Statement by President.—In his annual remarks to stockholders Pres. T. B. Davis, of this company, it was stated April 2, 1917, said, in part: "Profits for 1916 showed an increase of \$135,314, compared with those of last year, and it is the most profitable year that the company has had since the coal properties were acquired."

"Production amounted to 2,280,661 tons, an increase of 67,045 tons over last year. At one time it seemed as if the increase would be considerably larger, but during the last quarter car supply fell off very seriously, due to a break-down in railway transportation that was then, and is yet, more or less general over the whole country, with the result that decreases in output had to be recorded for these three months as compared with corresponding three months of the previous year."

"Although our mines have been opened up, developed and equipped for a production much in excess of the maximum tonnage that has been mined as yet, the actual production has not increased to the extent that had been expected during the past five years. The reason for this is that a large number of new mines have been opened up in territory served by the Chesapeake & Ohio Ry. Co., to handle which output no adequate increase in equipment has been made by the railway company."

"Towards the close of the year it was decided to open up another mine, and development on mine 13 was commenced in December. This mine will be producing coal within a short time."

"Additions to property account amount to \$103,078."

"The outlook for year 1917 is one of great prosperity, the only thing marring the prospect being the traffic situation already referred to, which should improve in the near future."

¹(4) Directors.—It was announced April 12, 1917, that at this company's annual meeting the following had been elected directors: Stephen L. Bartlett, Edward A. C. Clark, Thomas P. Davis, Frederick H. Goff, C. A. Hight, Benjamin D. Hyde, Charles G. Rice, Galen L. Stone and Sidney W. Winslow.

¹(5) Net Profits in 1917 First Quarter Over \$350,000.—On April 25, 1917, the "Boston News Bureau" stated it understood that this company made net profits of a little over \$350,000 in the first quarter of 1917.

These profits were based on a selling price of \$1.50 for coal at the mines, against an average of 91 cents for the same period in 1916, when net profits were \$220,000.

During the period just ended a large amount of low-priced coal was delivered on old contracts. Since April 1 the company has been making sales on a much higher price basis.

There is nothing in sight to change the estimate that for 1917 Island Creek should earn not less than \$20—perhaps \$25—per share on its 119,000 shares of common stock, after \$6 per share is paid on 50,000 shares of preferred. This is notwithstanding the possibility that the 1917 output will not exceed 2,000,000 tons, against 2,250,000 tons in 1916.

The company is strong in cash, having on Dec. 31 a balance of \$1,269,000, which has been materially added to since that time.

ISLAND CREEK SALES CO.

¹(1) Suit Filed.—See Cincinnati, Hamilton & Dayton Ry. Co.—Item No. 3.

ISLAND OIL & TRANSPORT CO.

¹(1) Incorporated on Jan. 2, 1917, in Virginia, with an authorized capital of \$30,000,000. John P. Fritts, of Larchmont, N. Y., is Pres. The charter does not permit the company to operate a public utility business, but it grants wide powers.

JANUARY 1 TO APRIL 30, 1917

ISLE ROYALE COPPER CO.

¹(1) Production, December and 12 Months.—Announced Jan. 23, 1917, that this company in December produced 1,006,287 pounds of copper, against 1,036,492 in November.

During 1916 the production totaled 12,364,584 pounds, against 9,342,106 in 1915.

—Feb.

²(1) Production.—Announced Feb. 19, 1917, that this company in January produced 1,172,149 lbs. of copper.

—Mar.

²(1) Production, February, 1917.—Announced March 16, 1917, that this company in February produced 1,141,888 pounds of copper, compared with 1,172,149 in January, 1917.

²(2) Income Account, Year Ended Dec. 31, 1916, shows:

	1916	1915
Copper sold	\$3,209,537	\$1,715,251
Silver sold	53,096	38,973
Total	\$3,262,624	\$1,754,224
Net profit	1,396,855	498,277
Def. after chgs. and dividends.	211,164	149,277
†Surplus.		

²(3) Statement by President.—It was stated March 21, 1917, that in commenting upon the 1916 operations of this company Pres. E. V. R. Thayer said, in part: "Among the expenditures at the surface of the mine the large item was the construction of 3,700 feet of standard gauge railroad, connecting the No. 7 shaft end of the mine with the main line of the Isle Royale Railroad.

"The mill ran with great efficiency all the year, stamping 700,400 tons of rock (214,648 tons were sent to The Lake Milling, Smelting & Refining Co.'s mill at Point Mills). The coal docks were abandoned and all coal is now received from the Union Coal Dock at Dollar Bay, this being cheaper than using the company dock."

—Apr.

²(1) Dividend Increase.—On April 9, 1917, directors declared a quarterly dividend of \$1.50, payable April 30 to stock of record April 11. Three months previously \$1 regular and \$1 extra were declared.

²(2) Comment on Dividend Increase.—On April 11, 1917, the "Boston News Bureau" said that the action of this company's directors in declaring a quarterly dividend of \$1.50 per share, as against \$1 and \$1 extra declared three months previously, would seem to indicate that so long as present copper metal conditions obtain, there is confidence of the company's ability to maintain dividends at the rate of at least \$6 per annum.

Incidentally, this is only one-half of the company's present earning capacity, as for the first quarter of 1917 profits were at the rate of better than \$1 per share per month. This is in spite of the fact that profits are being severely handicapped by the continued operation of the policy of selling copper c. i. f. London, which means that the mining company must absorb the extraordinary costs of ocean freight rates and marine and war risk insurance.

On May 1 Isle Royale will have net quick assets of \$1,300,000, after payment of above dividend. It would seem as though the directors could have paid more than \$1.60, but the uncertainty of the future outlook seemed to call for the exercise of conservatism.

At \$32 per share Isle Royale is earning almost 40% on its stock market selling price.

Underground Isle Royale is equipped to make a record output in 1917. Rock treatment is about 85,000 tons per month, the rock returning about 13 pounds of copper per ton.

The best part of it is Isle Royale is now financially and physically equipped to pay dividends—at least \$2 per share—on 15-cent copper.

²(3) Conditions Improved in Shaft No. 6.—Conditions in Isle Royale No. 6 are improving steadily, said the "Boston

News Bureau" April 14, 1917. The shaft is close to the 18th level, 2,100 feet from surface. All of the difficulties arising from the flooding of the mine are now out of the way and work is progressing up to record.

Conditions are better now than ever before at this low-grade producer. While cost of production is high, there is no reason to fear that Isle Royale could show a profit and pay dividends on a 15-cent metal market. The mine has been sufficiently opened in advance and will be kept that far ahead to be certain of a rock tonnage of better than 3,000 tons a day under the most unfavorable circumstances.

²(4) Production, March, 1917.—This company April 18, 1917, reported March production as 1,210,330 lbs. of copper, compared with 1,141,888 previous month.

ITHACA GAS & ELECTRIC CORP.

¹(1) Stock Issue Authorized.—It was announced Jan. 16, 1917, that the New York Second District Public Service Commission had authorized this company to issue and sell, at not less than par, \$576,200 of its common stock. The proceeds of the new stock will be used to pay notes held by the Associated Gas & Electric Co., J. G. White & Co. and Montgomery, Clothier & Tyler, issued for the acquisition of the stocks of the Homer & Cortland Gas Light Co., the Norwich Gas & Electric Co. and the Oneonta Light & Power Co.

¹(2) Directors Re-elected.—Announced Jan. 25, 1917, that at this company's annual meeting retiring directors were re-elected.

JACKSON MILLS EMERY CO., INC.

²(1) Acquisition.—It was announced Feb. 1, 1917, that this company had acquired the business of the Easton Polishing Supply Co. All business will continue to be conducted under the same management.

¹(2) Dividend Not Declared.—It was stated Jan. 26, 1917, that at their meeting the directors of this company, Jacksonville, Fla., declared no dividend on the \$500,000 6 cumulative pfd. stock. The dividend is normally payable Feb. 1. In August, 1916, only $\frac{1}{4}$ of 1% was paid.

¹(3) Statement by Board.—On Jan. 27, 1917, the Board of Directors, in regard to the passing of the dividend, stated:

"During the last few weeks earnings have shown some improvement, but in the opinion of the board conditions do not warrant any dividend at this time. The prosperity of the City of Jacksonville largely depends on the export business, which due to the high rates of shipping brought about by the war, has as yet failed to show any substantial improvement.

"Every effort has been made to reduce operating expenses without curtailing service or proper maintenance. Jacksonville is an important wholesale distributing centre, and a return to normal business conditions should improve the earnings of the company."

JACOBS (H.) & SONS, INC.

²(1) Incorporated on April 12, 1917, in New York, with a capital of \$750,000, to engage in a merchandise, realty, personal and brokerage business. Incorporators: M. E. and H. Jacobs, 511 East 42d Street, Manhattan, N. Y.

JENCKES SPINNING CO.

²(1) Capital Increase.—It was announced at Pawtucket, R. I., Jan. 30, 1917, that this company had raised its capital stock by \$1,950,000, approximately doubling the present capitalization.

JENKINS MANUFACTURING CO.**BLOOMFIELD, N. J.**

²(1) Capital Increased.—On April 26, 1917, the "Iron Age" stated that this company, Bloomfield, N. J., manufacturer of brass goods, castings, etc., had increased its capital from \$150,000 to \$600,000.

JENNINGS LACE WORKS CORP.**NEW YORK.**

²(1) Capital Increased.—On March 10, 1917, the company filed notice at Albany, N. Y., of an increase in capital stock from \$150,000 to \$350,000.

JENNINGS MOTOR SALES CORP.,**BALTIMORE, MD.**

²(1) Incorporated on March 2, 1917, in Delaware, with a capital of \$375,000, to deal in automobiles and automobile parts. Incorporators: C. C. Rohr, Baltimore, Md.; Joseph A. Jennings, Christian Mygund and L. B. C. Delany, all of Washington, D. C.

JEROME-DAISY COPPER CO.

²(1) Listed on New York Curb.—On April 13, 1917, there was listed, as a prospect, this company's 2,000,000 capital shares, par 50 cents. The Registrar & Transfer Co. is the transfer agent and registrar.

JEROME-DEL MONTE COPPER CO.

²(1) New Company.—It was stated March 23, 1917, that Boston financiers had formed this company with a total authorized capital of 2,000,000 shares, owning 711 acres of mining claims in the Jerome district, Arizona, located adjoining the United Verde Extension at one end and the Green Monster at the other.

Of the total 600,000 shares have been used to acquire the property and 600,000 to provide working capital of an amount sufficient to demonstrate by shaft, drifts and cross-cuts whether the property does or does not contain commercial ore.

The shaft has been located by Oscar H. Hershey, geologist, and work has already begun under the direction of E. S. Armstrong, of Los Angeles.

The directors of the company are: Tasker L. Oddie, former Governor of Nevada; E. S. Armstrong, mining engi-

JESSUP & MOORE PAPER CO.

¹(1) Dividends.—It was announced at Philadelphia April 6, 1917, that this company had declared a dividend of 8¼% on its \$1,250,000 common stock, payable April 15. This follows a dividend of 1¼% just paid, and one of 6% paid in January, making 16% disbursed so far in 1917.

The earnings of this company, which operates mills in Delaware and Maryland, are running well ahead of the \$62 a share rate in the six months to Dec. 31, 1916. It is understood that January net was at the annual rate of more than \$150 a share on the common stock. The company does not make newspaper and, it is understood, is not affected by the agreement made between the Federal Trade Commission and some of the paper producers.

• JEWEL TEA CO.

	1916	1915
¹ (1) Sales—		
4 weeks to Dec. 30	\$1,161,502	\$743,638
12 mos.-----	12,441,321	7,924,932

—Feb.

¹(1) Report, Year Ended Dec. 31, 1916, shows that net earnings were \$1,479,673, compared with \$1,464,273 in 1915, an increase of \$15,400. After allowing \$280,000 for dividends on \$4,000,000 pfd. there remained \$1,199,673 for the \$12,000,000 common. This is equivalent to 10% on that issue, compared with 9.80% in 1915.

¹(2) Sales, Four Weeks Ended Jan. 27, 1917, totaled \$1,161,951, as reported by the company Feb. 13, 1917. This is an increase of \$364,703 over the corresponding period of 1915.

—Mar.

¹(1) Earnings Statement, Year Ended Dec. 31, 1916.—It was stated March 7, 1917, that this company's first annual report shows net profits from 1916 operations of \$1,479,673 and surplus after pfd. dividends of \$1,204,534.

¹(2) Earnings on Stock.—It was stated March 7, 1917, that after deducting from the company's 1916 surplus of \$1,204,534 the \$280,000 dividend requirements on the 7% cumulative pfd. stock, the balance, \$924,534, is equal to 7.70% on the \$12,000,000 common stock.

¹(3) Balance Sheet, as of Dec. 31, 1916, shows a profit and loss surplus of \$1,941,673.

¹(4) Sales, Four Weeks Ended Feb. 24, 1917, were \$1,208,887, compared with \$837,219 for the same period of 1916, an increase of \$371,667, or 44.39%. For the eight weeks ended Feb. 24, sales were \$2,370,837, compared with \$1,634,407, an increase of \$736,370, or 45.06%.

—Apr.

¹(1) Sales Four Weeks Ended March 24.—The company reported sales for the four weeks ended March 24 as \$1,215,351 compared with sales during the corresponding period of 1916 of \$864,565, an increase of \$350,786, or 40.57%. Total sales for the 12 weeks ending March 24 amounted to \$3,588,189 compared with sales during the corresponding period of 1916 of \$2,499,033, an increase of \$1,087,156, or 43.50%.

JEWETT-THACKER COMMERCIAL CORP., PARKERSBURG, W. VA.

¹(1) Incorporated in January, 1917, in West Virginia, with a capital of 1,200,000. Incorporators: Ed. H. Jewett, Harry M. Jewett, G. B. Yerkes, J. D. McKay and Daniel E. Wade, all of Detroit, Mich. Corporation offices, Hale, W. Va.

JIM BUTLER TONOPAH MINING CO.

¹(1) Net Profits, December.—Announced Jan. 18, 1917, that the net profits of this company for December were \$22,500, against \$31,500 for November and \$22,000 in November, 1915. The power line was broken for six days during the month, causing a reduced output.

JOHNS (H. W.)-MANVILLE CO.

¹(1) Report, Year Ended Dec. 31, 1916, showed net earnings of \$2,620,221, an increase of almost \$2,000,000 over net earnings for 1915 and equal to approximately \$115 per share on the outstanding pfd. stock. The company paid no dividends on the common during 1916, but on Feb. 15, 1917, a dividend of 1¼% was paid.

Total sales during the year of \$22,284,711 compared with sales during 1915 of \$15,671,151, an increase of \$6,613,560. Pfd. dividends paid aggregated \$157,937, leaving a surplus for the year of \$2,571,284, making a total surplus as of Dec. 31, 1916, of \$5,182,379.

JOHNSTOWN & STONY CREEK R. R.

¹(1) Bituminous Rates Ordered Extended.—See Johnstown Switching Co.—Item No. 1.

JOHNSTOWN SWITCHING CO., JOHNSTOWN, PA.

¹(1) Bituminous Rates Ordered Extended to Clearfield District.—An Interstate Commerce Commission ruling April 24, 1917, ordered this company, the Pennsylvania R. R. Co. and connecting railroads to extend to the Clearfield district rates on bituminous coal to Eastern destinations, such rates having been refused on coal from mines served by the Johnstown & Stony Creek R. R., although extended to other mines in the same district.

JONES BROS. TEA CO., INC.

¹(1) Operations.—According to a statement accredited to Pres. Harry Jones Jan. 10, 1917, the business of this company will be substantially larger in 1917 than any year in its history. A large number of new stores will be opened by both subsidiaries, the Grand Union Tea Co. and the Globe Grocery Stores. Four new stores will be opened by the Grand Union company, bringing its chain up to 200 stores, while a number of other stores will be opened during the year. The Globe Grocery Stores will add between 25 and 40 stores to its chain of 60 stores during 1917.

The Jones Brothers company has closed a contract for practically its entire output of glycerine during the current year at 38 cents a pound, compared with current price of 30 cents a pound and normal price of approximately 13 cents a pound. This contract, according to Pres. Jones, should result in a clear profit of \$200,000.

Pres. Jones said in regard to the contract: "Deliveries are now being made on this contract which should mean a clear profit of \$200,000. It is one of the most profitable of our recent contracts, inasmuch as it calls for solely a by-product of our soap factory. The soap department is working at capacity, turning out approximately 125,000 bars of soap daily.

"Other departments are equally busy. For instance, our coffee department is so far behind orders that the regular inventory had to be taken on New Year's Day, instead of closing the factory for that purpose on the last day of December."

—Feb.

¹(1) New Director.—It was announced Feb. 27, 1917, that at a special meeting of this company S. S. Kresge, of S. S.

Kresge & Co., had been elected a member of the Board of Directors.

The Jones Bros. Tea Co. operates 256 stores under the titles of the Grand Union Tea and the Globe Grocery Stores.

JONES & LAUGHLIN STEEL CO.

¹(1) New Blast Furnace.—It was stated March 1, 1917, that this company is building a new 500-ton blast furnace in the Eliza group of its Pittsburgh works.

¹(2) Ore Leases.—See Great Northern Iron Ore Properties.—Item No. 1.

JONES OIL & GAS CO. (THE).

¹(1) Incorporated on Feb. 23, 1917, in Delaware, with a capital of \$1,000,000 to carry on the business of an oil and gas company. Incorporators: Noah E. Reese and Richard T. Jones, Baltimore, Md., and Harry W. Davis, Wilmington, Del.

JOURNAL LUBRICATOR CO.

¹(1) Merger.—See Journal Lubricator Co., Inc.—Item No. 1 (under New Incorporations).

JOURNAL LUBRICATOR CO., INC. (THE).

¹(1) Incorporated on Feb. 6, 1917, in New York, with a capital of \$2,065,000. Incorporators: J. A. Mooney, G. D. Gregory and H. F. Lippold, 2205 Foster Ave., Brooklyn, N. Y. This company was formed by the consolidation of General Lubricating, Axle Lubricating, Pad Lubricator and Journal Lubricator companies.

JUNCTIONS CO.

¹(1) Deal.—See Southern Ry. Co.—Item No. 3.

JUPITER MINES, LTD.

¹(1) Books Close Finally Jan. 25.—Notice was given Jan. 9, 1917, by the liquidators of this company that the books would be closed finally on Jan. 25, 1917, and that the assets available for distribution thereafter would be divided among the shareholders as shown by the company's records.

KAHN (JACQUES), INC.

¹(1) Incorporated on March 6, 1917, in New York, with a capital of \$250,000, to deal in mirrors and glass. Incorporators: F. K. Maximilian, E. J. and L. Kahn, 254 East 68th St., New York.

KALAMAZOO SANITARY MANUFACTURING CO.

¹(1) Organized.—It was announced Feb. 5, 1917, that this company, Kalamazoo, Mich., had been organized with a capital of \$350,000, and had acquired the Enameled Tank Co. It was stated the company would erect a pottery plant, costing approximately \$200,000. Carl H. Zwermann is Pres. and E. C. Brigham, 1st Vice-Pres.

KALSFLEISCH CORP.

¹(1) Incorporated on April 10, 1917, in New York, with a capital of \$2,500,000, to mine bauxite, ores and petroleum products, to deal in chemicals, drugs, foods, merchandise, commodities, and do an engineering and construction business. Incorporators: E. E. Hurley, I. L. Schwartz and A. Forshay, 49 Pulaski Street, Brooklyn.

KANONA & PRATTSBURG R. R.

*(1) Sold at Foreclosure.—It was announced Feb. 23, 1917, that Jacob C. Klink, receiver, had bought this road, 11 miles in length, for \$60,000, on Feb. 9. Mr. Klink represented the holders of the company's \$70,000 bonds outstanding.

KANSAS CITY LIGHT & POWER CO.

*(1) Capital Increase Authorized.—It was announced Jan. 15, 1917, that the Missouri Public Service Commission had authorized this company to increase its capital stock from \$2,000,000 to \$4,977,000 by March 1.

Nearly a year previously the commission authorized the company, which is the reorganization of the lighting and power properties of the old Kansas City Ry. & Light Co., to issue and sell \$4,977,300 of bonds, these bonds having now been placed.

The issue of the stock is ordered by the commission in advance of an order fixing rates for the new company in Kansas City. The company claims a valuation of \$7,500,000 for its property, and the action of the commission in ordering the stock issue in addition to the bonds is taken as evidence that the commission will accept this valuation in fixing rates.

With the fixing of rates the company will proceed with its plans for the erection of a large central generating station in Kansas City.

*(1) Receiver Appointed.—A Topeka, Kans., dispatch to "Financial America," New York, April 17, 1917, stated that Federal Judge Pollock had appointed W. T. Kempner, of Kansas City, receiver for this company. The application was made by a committee of bankers representing holders of the two-year gold notes, issued at the time when the road was sold under foreclosure three years previously. The bankers contended that the new company failed to pay \$213,000 due under the old receivership and to meet interest and principal on the gold notes.

KANSAS CITY NORTHWESTERN R. R.

*(1) Receiver Appointed.—It was announced at St. Louis Feb. 26, 1917, that United States Circuit Judge Hook had appointed Louis S. Cass receiver for this company on the petition of holders of \$3,000,000 of the road's bonds issued in 1894, a majority of which are held by the Missouri Pacific Ry. Co.

The road runs between Kansas City, Kan., and Seneca, Kan., a distance of about 162 miles.

KANSAS CITY & PACIFIC RY. CO.

*(1) Stock Exchange Ruling.—On Jan. 11, 1917, it was stated that notice having been received that the interest matured Aug. 1, 1916, on this company's first mortgage guaranteed 4% bonds, due 1990, will be paid on presentation of coupons on and after Jan. 29, 1917, but that payment of interest due Feb. 1, 1917, will not be made, the committee on securities of the New York Stock Exchange had ruled that the bonds be quoted on Jan. 29, 1917, "ex" the August, 1916, coupons, and that until further notice the bonds continue to be dealt in "flat" and must carry the February, 1917, and subsequent coupons to be a delivery.

KANSAS CITY PROCESS OIL & REFINING CO.

*(1) Incorporated on April 18, 1917, in Delaware, with a capital of \$1,000,000, to produce and refine oil and gas and operate pipe lines. Incorporators: J. M. K. Smith, Harry W. Jones, Independence, Kan., and Merle V. Cadman, Tulsa, Okla.

KANSAS CITY RYS. CO.

*(1) Increased Earnings.—It was announced Feb. 2, 1917, that in the 10½ months since the electric railways of Kansas City were taken over by this company there had been a gain of 7%, or about \$500,000, in gross. In that time the company built nine miles of new extensions and reconstructed 16.7 miles of old line at a cost of \$1,000,000.

*(2) Improvements.—It was stated Feb. 6, 1917, that this company, the reorganization of the Metropolitan Street Ry. of Kansas City, controlled by the Kansas City Rys. & Light Co., had perfected plans for the expenditure in 1917 of \$2,251,446 in track extensions and rehabilitation work. Of this sum \$1,303,146 will be spent on way and structures, \$594,300 for equipment and \$354,000 for power supply.

(2) Fuel Cost Causes March Decrease in Net.—On April 25, 1917, the statistical department of the Electric Bond & Share Co. stated that this company's statement of earnings for March shows an increase in gross earnings equal to 17%, an increase in expenses and taxes equal to 46%, and a decrease in net earnings equal to 30%. The increase in expenses, with the resulting decrease in net earnings, is due almost entirely to increased fuel cost. During March, 1917, the fuel for the operation of its plants cost the company approximately \$23,000 more than it did during March, 1916.

The reason for this abnormal increase in fuel was due to the necessity of purchasing oil in the open market.

As the period of cold weather is past, the Kansas Gas & Electric Co. is again getting a normal supply of natural gas, due to the smaller consumption for house heating purposes.

KANSAS NATURAL GAS CO.

(1) Motion Overruled.—It was announced Feb. 3, 1917, that Federal Judge Holdren had overruled a motion presented by the attorneys of this company to strike from record the motion of the Attorney-General of Kansas for an order directing the receiver to dismiss all rate litigation in the Federal Court and restore the 28-cent rate for natural gas, as approved by the Kansas Utilities Commission.

—Apr.

(1) Rate Fixed by Commission Ruled as Confiscatory.—The Federal District Court at Topeka, Kan., April 23, 1917, ruled that the rate of 28 cents a thousand cubic feet for natural gas fixed by the Kansas Public Utility Commission to be charged by the Kansas Natural Gas Co. was confiscatory and therefore could not be enforced. The court also held that neither the Public Utility Commission of Kansas nor Missouri has any jurisdiction over the rates of the Kansas Natural Gas Co., as its business is interstate and therefore not subject to State control.

This leaves the Kansas Natural Gas Co. free to fix such rates as it may deem reasonable for the service rendered.

KANSAS-OKLAHOMA-TEXAS OIL & GAS CO.

(1) Incorporated on March 16, 1917, in Delaware, with a capital of \$5,000,000, to bore and drill for oils, natural gas, etc. Incorporators: T. C. Coffman, J. H. Butts, U. G. Charles, I. M. Hackney and H. W. Lewis, Wichita, Kan.; J. W., J. B. and B. E. Hilt, Winfield, Kan., and John A. Edwards, Eureka, Kan.
